BEFORE THE PUBLIC UTILITY COMMISSION

OF OREGON

UM 1027(5)

NW Natural Application for Reauthorization)
For Deferred Accounting of Refunds or)
Collections of Distribution Margin)

In accordance with ORS 757.259 and ORS 757.262, and OAR 860-030-0035, NW Natural (or the "Company") files this application with the Public Utility Commission of Oregon (the "Commission") for an order authorizing the Company to record and defer with interest, on an ongoing basis, the amount by which actual distribution margin per residential and commercial customer is different from the margin to be collected from residential and commercial customers based on "normal" consumption, as assumed in the company's most recent general rate case. This application seeks reauthorization for the period October 1, 2007 through September 30, 2008.

In support of this Application, NW Natural states:

1. NW Natural

NW Natural is a public utility in the state of Oregon and is subject to the jurisdiction of the Commission with regard to rates, service, and accounting practices. NW Natural also provides retail natural gas service in the states of Oregon and Washington.

2. Statutory Authority

This Application is filed pursuant to ORS 757.259 and ORS 757.262, which empower the Commission to authorize the deferral of expenses or revenues of a public utility for later incorporation in rates.

3. Communications

Communications regarding this Application should be addressed to:

Inara K. Scott, Manager
Regulatory Affairs
NW Natural

Portland, OR 97209-3991
Telephone: (503) 721-2476

E-mail: ork@nwnatural.com

4. Basis for Application

On September 12, 2002, the Commission issued Order No. 02-634, which among other effects, approved the partial decoupling mechanism described in the Settlement Agreement in Docket UG 143. The Commission's policies, expressed in Order No. 92-1673 and in statute at ORS 757.262, support recovery of utility revenues and earnings that are affected by the conservation activity of its customers.

5. NW Natural Proposal

In accordance with the statutory authority provided by ORS 767.259 and ORS 757.262, and the Commission's approval of the Settlement Agreement in Docket UG 143, NW Natural proposes to record and defer, with interest, the amount by which actual distribution margin per residential and commercial customer is different from the margin to be collected from residential and commercial customers based on "normal" consumption, as assumed in the company's most recent general rate case filing in Docket UG 152 and further adjusted for price elasticity effects since the rate case.

6. Amounts Subject to Deferral

NW Natural cannot estimate what amounts will be recorded in the distribution margin normalization "use balancing account" for the upcoming 12-month period because the amount is dependent on volume variance resulting from the actual price elasticity and conservation responses.

7. Accounting

NW Natural proposes to record the amounts described in paragraph (a) above of this Application in a subaccount of Account 186. In the absence of the Commission's approval of this Application, the company would record under- or over-collected distribution margin as utility operating revenue in FERC Account 400.

WHEREFORE, NW Natural respectfully requests that in accordance with ORS 757.259, as amended, the Commission authorize the Company to record and defer, on an ongoing basis and commencing as of the date of this filing, the

amount by which actual distribution margin per residential and commercial customer is different from the margin assumed in UG 152 to be collected from residential and commercial customers based on “normal” consumption.

DATED this 25th day of September, 2007.

Respectfully submitted,

NW NATURAL
