RE: Frontier Communications Northwest Inc. – Custom Local Area Signaling Service
(CLASS)

Dear Ms. Grindeland:

Frontier Communications Northwest Inc. (Frontier) hereby submits for electronic filing the original and a redlined copy of the revised sheets for the Statewide Price List.

The purpose of this filing is to correct the Customized Local Area Signaling Service (CLASS) feature description for Selective Call Forward and Selective Call Acceptance.

It is respectfully requested that this filing become effective on December 11, 2015.

Please return stamped tariff sheets to:

Frontier Communications
Linda Saldaña
9260 E. Stockton Blvd.
Elk Grove, CA 95624

Any questions or notifications of action taken on this filing should be directed to me at (503) 645-7909 or Renee.Willer@ftr.com.

Sincerely,

A handwritten signature in black ink that reads "Renee M. Willer".

Renee M. Willer

CALLING SERVICES

III. INDIVIDUAL SERVICES

B. FEATURE DESCRIPTIONS - Continued

5. CUSTOM LOCAL AREA SIGNALING SERVICE (CLASS) - Continued

Complete Blocking - Per Line - Provides free per-line blocking in exchanges where Caller ID-Number Only is offered by the Company. This service is offered free of monthly and NRC charges. This service prevents the delivery of customer's telephone number to the called party. A Complete Blocking - Per Line customer has the option of deactivating this feature and forwarding their telephone number on a per call basis by dialing the code *82 prior to placing a call.

Priority Call - Is an incoming call management feature which will allow the subscriber to define a list of calling directory numbers that will provide the subscriber with special incoming call treatment. Any incoming calls on this list will be indicated by a distinctive ringing. Any numbers which are not on the list or which cannot be identified will be given standard treatment. To gain access to this service, the customer dials "*61" or "1161" on a rotary telephone.

Selective Call Acceptance - Allows a customer to select specific telephone numbers from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller that the customer is not accepting calls. Selective Call Acceptance is accessed by dialing "*64" or "1164" on a rotary telephone.

Selective Call Forward - Allows a customer to program up to 15 telephone numbers to be forwarded automatically to another telephone number. Incoming calls that are on the Selective Call Forwarding list will be forwarded to the predetermined telephone number. Selective Call Forwarding is accessed by dialing "*63" or "1163" from a rotary telephone. After gaining access to the service, the customer can activate or deactivate by dialing an activation/deactivation code as directed by an announcement. Entries on the Selective Call Forwarding list, as well as the forward-to telephone number, can be changed at any time.

Selective Call Rejection - Allows a customer to reject call attempts from up to 15 telephone numbers. To use this service, the customer preprograms telephone numbers of calling parties they wish to reject. Any call attempts to the customer's telephone from these specified numbers will be prevented from being completed to that customer. The calling party will get a recording advising the caller that the called party is not receiving calls. The customer can also add an "unknown" caller to the Selective Call Rejection list by activating the feature immediately after receiving an unwanted call. Selective Call Rejection is activated by dialing "*60" for "1160" from a rotary telephone. After gaining access to the service, the customer can activate or deactivate by dialing an activation/deactivation code as directed by an announcement.

Multiple Simultaneous Call Forward - This feature provides a business customer with the capability to specify the number of calling paths that will be forwarded from one subscriber line to another telephone number. The feature is offered where facilities permit and at no time will this service take precedent over the requirement for these facilities to provide a customer with telephone service. Multiple Simultaneous Call Forward is restricted to voice use only. The feature is available only as an enhancement to one or more of the following features: Call Forwarding, Call Forwarding Busy and Call Forward No answer. Multiple Simultaneous Call Forward is limited to ten (10) call forwarding paths per telephone number. It can be used with any of the following services: B1, PBX, Centrex and ISDN BRI.
