CONTRACT SUMMARY

I. CONTRACT ANALYSIS

- a. Please provide the rationale and justification for creating a special class of service. The rationale must include a discussion as to why no previously approved class of service (contract or tariff) is acceptable to the Customer for whom the utility proposes a special class of service. Determination of a special class of service must be based on the following:

The quantity of service used, the time when used, the purpose for which used, the existence of price competition or a service alternative, the services being provided, the conditions of service, or any other reasonable consideration.

Answer:

Current tariffs for services included in the contract do not provide pricing recognizing this customer's volume of service and commitment to retain service across CenturyLink's territory. The total volume of facilities being ordered by the customer justifies going beyond the standard terms offered in the tariff for similar services. Competitive alternatives such as resale of CenturyLink QC service are available to customers.

- b. The number of similarly situated Customers who should receive the same terms and conditions. Also, include the number of billing units for those Customers.

Answer:

All similarly situated customers should receive the same terms and conditions.

- c. If there are other similarly situated Customers who should not receive the same terms and conditions, explain the differences between those Customers and the special contract Customer.

Answer:

Not applicable; all similarly situated customers should receive the same offer.

- d. Summarize termination clause in the contract that protects CenturyLink if the customer stops the service early and CenturyLink does not recover initial costs.

Answer:

Termination Liability applies per the Oregon QC Exchange and Network Services Price List.
