**Re: UE \_\_\_ In The Matter of IDAHO POWER COMPANY's 2012 Annual Power Cost Update**

Attention Filing Center:

Enclosed for filing in the above-referenced matter is an original and five copies of the testimony of Scott Wright (Idaho Power/100-107). Please direct all communications in this matter to:

Lisa Nordstrom  
Idaho Power Company  
PO Box 70  
Boise, ID 83707-0070  
[lnordstrom@idahopower.com](mailto:lnordstrom@idahopower.com)

Christa Bearry  
Idaho Power Company  
PO Box 70  
Boise, ID 83707-0070  
[cbeary@idahopower.com](mailto:cbeary@idahopower.com)

Lisa Rackner  
McDowell Rackner & Gibson PC  
419 SW 11<sup>th</sup> Avenue, Suite 400  
Portland, OR 97204  
[lisa@mcd-law.com](mailto:lisa@mcd-law.com)

A copy of this filing has been served on all parties to the 2011 APCU (UE 222). Please contact me with any questions.

Very truly yours,

Wendy McIndoo  
Legal Assistant

IN THE MATTER OF IDAHO POWER )  
COMPANY's 2012 ANNUAL POWER )  
COST UPDATE )  
OCTOBER UPDATE )  
\_\_\_\_\_  
)

**IDAHO POWER COMPANY**  
**DIRECT TESTIMONY**  
**OF**  
**SCOTT WRIGHT**

October 20, 2011

- 1   **Q. Please state your name, business address, and present occupation.**
- 2   A. My name is Scott Wright. I am employed by Idaho Power Company ("Idaho Power")  
3       or ("Company") as a Regulatory Analyst in the Regulatory Affairs Department. My  
4       business address is 1221 West Idaho Street, Boise, Idaho 83702.
- 5   **Q. Please describe your educational background.**
- 6   A. I received a Bachelor of Science degree in Business Economics from Eastern  
7       Oregon University. I have also attended the Center for Public Utilities "Practical  
8       Skills for a Changing Electric Industry" course at New Mexico State University in  
9       Albuquerque, New Mexico, as well as the Edison Electric Institute "Electric Rate  
10      Advanced Course" in Madison, Wisconsin.
- 11   **Q. Please describe your work experience.**
- 12   A. In May 1998, I accepted a position as Research Assistant with Idaho Power in the  
13      Regulatory Affairs Department. In March 2007, I was promoted to a Regulatory  
14      Analyst I. In March 2010, I was promoted to a Regulatory Analyst II. As a  
15      Regulatory Analyst II, I am responsible for running the AURORA model to calculate  
16      net power supply expenses ("NPSE") for ratemaking purposes, as well as the  
17      marginal cost of energy used in the Company's marginal cost analysis. My duties  
18      also include providing analytical support for other regulatory activities within the  
19      Regulatory Affairs Department. In my current role, I have served as the Company's  
20      power supply expense witness in the last three Annual Power Cost Update ("APCU")  
21      filings before the Public Utility Commission of Oregon ("Commission"), UE 203, UE  
22      214, and UE 222.
- 23   **Q. What is the purpose of your testimony?**
- 24   A. The purpose of my testimony is to describe the Company's October Update for the  
25      2012 APCU, which is required as detailed in Order No. 08-238.
- 26   **Q. What is the October Update?**

1 A. The October Update is the Company's estimate of what "normal" power supply  
2 expenses will be for an upcoming water year. In this case, the water year is April  
3 2012 through March 2013.

4 Q. **Was the AURORA model used for this October Update?**

5 A. Yes.

6 Q. **Please describe the AURORA model and how it is used by the Company.**

7 A. The AURORA model is a comprehensive electric market resource dispatch model.  
8 The Company uses AURORA to determine the economic dispatch of its resources to  
9 determine a net power supply expense under "normal" conditions.

10 Q. **Please describe the variables that are to be updated in the AURORA model as  
11 delineated in Order No. 08-238.**

12 A. Order No. 08-238 identifies a number of variables to be updated in the AURORA  
13 model annually in October: fuel prices, transportation costs, maintenance rates, heat  
14 rates, and forced outage rates for the thermal plants. This year's update is for the  
15 April 2012 through March 2013 test year and reflects updated plant capacities for all  
16 Company-owned resources as well as an updated Sales and Load Forecast.

17           Natural gas prices were updated using the forecast methodology used in the  
18 Company's Integrated Resource Plan. This methodology uses the Northwest Power  
19 and Conservation Council (NPCC), New York Mercantile Exchange (NYMEX),  
20 Natural Gas Exchange (NGX), Energy Information Administration (EIA) and Moody's  
21 forecast data to develop a normalized gas price that is used for ratemaking  
22 purposes. The normalization process reduces volatility that may occur in the short-  
23 term market.

24           Public Utility Regulatory Policies Act of 1978 ("PURPA") contracts and other  
25 wholesale contracts were updated to reflect expected costs during the April 2012  
26 through March 2013 test year.

1     **Q. Have any additional resources been added to the Company's resource  
2       portfolio, since last year's 2011 October Update?**

3     A. Yes. The Langley Gulch power plant has been included in the 2012 October Update.  
4       Langley Gulch is a 300 megawatts combined-cycle natural gas plant currently under  
5       construction. It is expected to be on-line in July 2012, during the April 2012 through  
6       March 2013 test year.

7     **Q. Have you prepared an exhibit to demonstrate the normalization of variable  
8       power supply expenses for this scenario?**

9     A. Yes. Exhibit 101 shows the results of the variable power supply expense  
10      normalization modeling for the April 2012 through March 2013 test year. Exhibit 101  
11      shows the summary results containing the 83-year average variable power supply  
12      generation sources and expenses.

13     **Q. Please summarize the sources and disposition of energy shown on Exhibit  
14       101.**

15     A. Hydro generation supplies 8.6 million megawatt-hours ("MWh"), approximately 46  
16      percent ( $8.6 \text{ million MWh} / 18.8 \text{ million MWh} = 46 \text{ percent}$ ) of the generation mix.  
17      Thermal generation supplies 6.6 million MWh (Bridger 4.5, Boardman 0.4, Valmy 0.8,  
18      Langley Gulch 0.9), approximately 35 percent ( $6.6 \text{ million MWh} / 18.8 \text{ million MWh} = 35 \text{ percent}$ ) of the generation mix. Danskin and Bennett Mountain are peaking units  
19      supplying energy at times when resources and/or transmission lines are constrained.  
20      Purchases of power are made up of short-term and longer-term market purchases  
21      and PURPA. PURPA purchases are normalized and account for nearly 2.7 million  
22      MWh. PURPA purchases are not included on Exhibit 101; however, when combined  
23      with market purchases of 0.9 million MWh, total purchases amount to 3.6 million  
24      MWh ( $2.7 \text{ million MWh} + 0.9 \text{ million MWh} = 3.6 \text{ million MWh}$ ) or approximately 19  
25      percent ( $3.6 \text{ million MWh} / 18.8 \text{ million MWh} = 19 \text{ percent}$ ) of the generation mix. Of

1       the 18.8 million MWh consumed, 16.1 million MWh are utilized for system loads  
2       while nearly 2.7 million MWh are sold as surplus.

3       **Q. Please explain the changes in coal prices from last year's October filing.**

4       A. Coal prices for each of the Company's coal-fired thermal generation plants have  
5       been updated to reflect current operating costs. The coal prices at the Bridger plant  
6       have increased from \$22.33 per MWh to \$22.54 per MWh. The coal prices at the  
7       Boardman plant have increased from \$18.65 per MWh to \$20.40 per MWh. The coal  
8       prices at the Valmy plant have increased from \$29.09 per MWh to \$34.77 per MWh.

9       **Q. Please describe the change in PURPA generation and expenses since last  
10      year's October filing.**

11      A. PURPA generation has increased from 195 average megawatts ("aMW") to 310  
12      aMW, an increase of 115 aMW. PURPA expenses have also increased from \$129.1  
13      million to \$193.2 million, an increase of \$64.1 million.

14      **Q. Please explain the large increase in PURPA since the 2011 October Update.**

15      A. The large increase in PURPA generation and expenses since the 2011 October  
16      Update is primarily driven by additional wind projects coming on-line during the April  
17      2012 through March 2013 test year.

18      **Q. Please explain the treatment of PURPA expense in Oregon.**

19      A. Many of the PURPA contracts have payment provisions that require the Company to  
20      provide leveled monthly payments over the length of the contract. Oregon  
21      regulation requires the Company to reflect a non-leveled payment stream in rates,  
22      rather than the leveled monthly payment stream. The Oregon method provides  
23      benefits in the early years of the contract by paying less than the actual contract  
24      levels. As time passes, the non-leveled method required in Oregon begins to  
25      exceed the leveled monthly payment stream, therefore, reflecting the higher re-  
26      priced costs.

- 1   **Q. Please describe the change in the Company's system loads since last year's**
- 2   **October filing.**
- 3   A. The Company's annual normalized system load used in last year's April 2011
- 4   through March 2012 filing was 1,826 aMW. The Company's April 2012 through
- 5   March 2013 annual normalized system load used in this filing is 1,841 aMW, an
- 6   increase of 15 aMW.
- 7   **Q. Does the normalized system load for the April 2012 through March 2013 test**
- 8   **period include expected loads from Special Contract customer Hoku Materials,**
- 9   **Inc. ("Hoku")?**
- 10   A. Yes. Hoku, a manufacturer of solar panels, is expected to be receiving power during
- 11   the April 2012 through March 2013 test period.
- 12   **Q. Please explain the Hoku contract.**
- 13   A. The Electric Service Agreement ("ESA") between the Company and Hoku includes a
- 14   rate structure that is separated into two blocks. The first block of the contract rate
- 15   structure charges market based rates, while the second block charges embedded
- 16   rates. The first block energy-related revenues are subtracted from the NPSE in a
- 17   similar manner to the treatment of surplus sales, which also reduce NPSE.
- 18   **Q. How is the Hoku ESA treated in your NPSE calculations?**
- 19   A. The Hoku ESA loads were included during the April 2012 through March 2013 time
- 20   period, while first block energy-related revenues were subtracted from the NPSE as
- 21   mentioned above.
- 22   **Q. What forward price curve did the Company use to re-price purchased power**
- 23   **and surplus sales?**
- 24   A. For the October Update, the Company used the methodology approved in Order No.
- 25   08-238. This methodology uses a one-year average of the daily forward price curves
- 26   for April 2013 through March 2014 shown in Exhibit 102, which is then discounted for

1 inflation back to April 2012 through March 2013 according to the quarterly inflation  
2 indices provided in Exhibit 103.

3 **Q. What are the average forward price curves the Company used to re-price  
4 purchased power and surplus sales for the normalized test year?**

5 A. Exhibit 104 shows the revised monthly prices for April 2012 through March 2013.  
6 These are considered the “normal” forward prices used to re-price the Company’s  
7 purchased power and surplus sales estimates for the normalized test year as set  
8 forth in Order No 08-238.

9 **Q. How does the re-pricing of purchased power and surplus sales, using a  
10 “normal” forward price curve, change the purchased power expenses and  
11 surplus sales revenues as modeled by AURORA?**

12 A. Exhibit 101 shows the purchased power expenses and surplus sales revenues  
13 before re-pricing. Exhibit 105 shows the same normalized generation dispatch, with  
14 purchased power and surplus sales re-priced using the normalized forward price  
15 curve shown in Exhibit 104. A comparison of Exhibit 101 and Exhibit 105  
16 demonstrates the changes due to re-pricing. Purchased power expenses increase  
17 by \$1.6 million, moving from \$40.3 million to \$41.9 million. Surplus sales revenues  
18 increase by \$18.2 million, moving from \$86.9 million to \$105.1 million.

19 **Q. Does the methodology used to estimate the power supply expenses  
20 represented in Exhibit 104 conform with the methodology detailed in Order No.  
21 08-238?**

22 A. Yes, it does.

23 **Q. What is the October Update unit cost per megawatt-hour (\$/MWh) represented  
24 by this filing?**

25 A. Exhibit 105 shows the normalized annual sales at customer level for the April 2012  
26 through March 2013 test year are 14,713,937 MWh. Based upon test year sales, the

1 cost per unit for the October Update to become effective on June 1, 2012, is \$19.07  
2 per MWh (\$280.6 million / 14.714 million MWh = \$19.07 per MWh).

3 **Q. How does this \$19.07 per MWh October Update compare to the October Update  
4 that resulted from last year's computation?**

5 A. The October Update unit cost which became effective June 1, 2011, was \$16.96 per  
6 MWh. This year's October Update of \$19.07 per MWh equates to an increase of  
7 \$2.11 per MWh (\$19.07 – \$16.96 = \$2.11).

8 **Q. Please explain how the revenue requirement for the October Update is  
9 calculated using the unit cost of \$2.11 per MWh.**

10 A. The revenue requirement for the October Update is calculated by multiplying the unit  
11 cost of \$2.11 per MWh by the loss adjusted sales for the April 2012 through March  
12 2013 test period of 659,350.677 MWh creating a revenue requirement of \$1.4 million.

13 **Q. What method of allocation are you proposing to spread the incremental  
14 revenue requirement associated with the October Update to the various  
15 customer classes?**

16 A. I am proposing to allocate the incremental revenue requirement associated with the  
17 2012 October Update according to the revenue spread methodology approved by the  
18 Commission in UE 214, Order No. 10-191. Order No. 10-191 established a revenue  
19 spread methodology whereby the revenue requirement for the October Update is  
20 allocated to individual customer classes on the basis of the total generation-related  
21 revenue requirement approved in the Company's last general rate case, UE 213.  
22 The Commission's preferred allocation methodology further applies a subsidy  
23 correction adjustment to any customer class whose final revenue allocation in UE  
24 213 was below the cost-of-service revenue requirement. As a result of applying the  
25 subsidy correction adjustment in this case, Irrigation Service and Traffic Control  
26 Lighting Service receive a revenue increase equal to 150 percent of the 2012

1       October Update cost-of-service revenue requirement. The proposed revenue spread  
2       resulting from the application of the Commission-approved allocation methodology is  
3       shown on Exhibit 106.

4       **Q. What is the overall revenue impact of this year's October Update compared to  
5                   last year's October Update using the rate spread methodology described  
6                   above?**

7       A. The overall revenue impact of the October Update compared to last year's October  
8                   Update is a 3.34 percent increase.

9       **Q. Have you supervised the preparation of an exhibit showing the summary of  
10                  revenue impact resulting from the October Update proposed by the Company?**

11      A. Yes. Exhibit 107 provides a summary of the revenue change resulting from this  
12                  year's October Update as compared to current revenue.

13      **Q. Does this conclude your testimony?**

14      A. Yes, it does.
