Subject: rulings about eminent domain

I learned with great dismay that OPUC is willing to allow utilities to take private land for their purposes through eminent domain without the necessary procedures. This is an outrage. Why have rules and procedures in place if they will be ignored for the profit of a utility. I make a plea to the PUC to uphold the rules that are in place. You have a responsibility to the taxpayers of this state, not just to be at the beck and call of utilities.
