**Re: UM 2143 Investigation into Resource Adequacy in the State  
CONFIDENTIAL Information Filing**

Dear Filing Center,

Attached for electronic filing is Avangrid Renewables' completed Northwest Power Pool Western Resource Adequacy Program workbook, submitted pursuant the Public Utility Commission of Oregon (Commission) Staff's UM 2143 Informational Filing update of January 11, 2022.

Due to administrative errors related to staffing changes, Avangrid Renewables is aware that it submits this information for filing significantly later than Staff's requested due date of January 25, 2022. As such, Avangrid Renewables sincerely regrets the untimely nature of this filing and apologizes for the inconvenience to Staff this mistake may have caused.

The information provided in the data workbook is commercially sensitive information and its disclosure outside the Commission would create a competitive disadvantage for Avangrid Renewables. Therefore, as permitted by OAR 860-001-0070, Avangrid Renewables designates the data workbook as confidential and requests that the Commission and its staff maintain the confidentiality of this information.

Please let me know if you have any questions regarding this filing.

Sincerely,

A handwritten signature in blue ink that reads "K. Lynch".
