Re: RE 180—Compliance Filing—Triennial Program Report

Purpose

In compliance with Order No. 17-172, the purpose of this filing is to provide the sixth annual report on PacifiCorp d/b/a Pacific Power's (PacifiCorp or the Company) Schedule 45 Public DC Fast Charger Optional Transitional Rate Delivery Service (Schedule 45), which became effective June 1, 2017, with the approval of Advice 16-020 by the Public Utility Commission of Oregon (Commission). PacifiCorp filed Advice 16-020 on December 27, 2016, which was supplemented on April 14, 2017 (Supplemental Filing). In its Supplemental Filing, PacifiCorp committed to file both annual and triennial reports on the effects of Schedule 45 throughout the time it remains in effect.

Background

In response to Senate Bill 1547, which passed in March of 2016, PacifiCorp filed applications for new programs and rates to accelerate transportation electrification in Advice 16-020. In advance of filing these applications, the Company held a series of public stakeholder workshops, during which various parties indicated that, at current utilization levels, demand charges are a significant impediment to maintaining and expanding a network of public electric vehicle direct current (DC) fast charging stations. As a result of these meetings, as well as PacifiCorp's own analysis, it became apparent that, while it may not often be economic for customers to install DC fast chargers at the frequency they are currently utilized, the availability of a dependable network of publicly available DC fast chargers that can quickly recharge electric vehicle batteries is critical to the acceleration of transportation electrification. PacifiCorp addressed these concerns in its initial filing in Advice 16-020, which proposed replacing demand charges with on-peak energy charges for separately-metered, publicly-available DC fast chargers. After discussions with Commission staff, PacifiCorp's Supplemental Filing included a proposal for both annual and triennial reporting on Schedule 45, a cap of 200 program participants, and an explicit glide-path for Schedule 45 customers back to Schedule 28 over a period of nine years. This proposal was ultimately approved by the Commission, and Schedule 45 became effective June 1, 2017.

Rate Design

Customers on Schedule 45 pay all applicable rates under Schedule 28, plus a 10.738 cents per kilowatt-hour on-peak energy adder that is designed to collect the same amount of revenue as the

¹ In the Matter of PacifiCorp dba Pacific Power, Advice 16-020 (ADV 485), Schedule 45 and 745 Public DC Fast Charger Delivery Service Optional Transitional Rate, Docket No. UE 328, Order No. 17-172 (May 16, 2017).

Schedule 28 demand charges.² While the customer pays both the demand charges and the on-peak energy adder, the schedule includes complementary percentage discounts that prevent the customer from ever paying the full amount of either charge. These percentage discounts are scheduled to change annually on May 15 in a way that increases the demand charges and decreases the on-peak energy adder by 10 percent. Continuing this glide-path, rates will return to standard Schedule 28 rates after nine years.

Report Requirements

The Supplemental Filing proposed both annual and triennial reports as detailed below:

- Information provided annually:
 - The monthly number of customers, including the number of DC fast chargers participating in the tariff. The monthly energy on the tariff.
 - An analysis that compares these customers' monthly bills with what they would have been on standard rates.
 - The location by ZIP Code of installed chargers plus known information on the size and capacity of chargers.
- Information provided triennially:
 - Lessons learned from the program, including any anecdotal feedback from customers or from plug-in electric vehicle (PEV) drivers who use the participating DC fast chargers. Information, if available, on the rates charged to drivers and if those rates vary by time period.
 - o Recommendations for changes to the schedule, if needed. A request for continuance of offering, if needed.

PacifiCorp's response to both the annual and triennial reporting requirements detailed above follows.

² To maintain an on-peak period consistent with what is currently offered to residential and small non-residential consumers, the Company uses the on-peak time period currently effective for Schedule 210, Portfolio Time-of-Use Supply Service. This is defined as 4-8 p.m. in summer; 6-10 a.m. and 5-8 p.m. in winter (except weekends and holidays).

Participation and Bill Comparisons

The table below provides the locations of the 31 sites that have participated in Schedule 45, along with known information on the size and capacity of the chargers at the sites.

Conclusion

As shown in the table above, Schedule 45 has helped reduce the cost for publicly available DC fast charging stations, and PacifiCorp will continue to promote Schedule 45 to eligible customers as a valuable alternative rate schedule.

Participation in Schedule 45 decreased by one site since the Company filed its previous Annual Program Report in 2022, and now totals 28 sites. Participation is still well below the 200-participant cap.

Please direct any questions about this filing to Cathie Allen, Regulatory Affairs Manager, at (503) 813-5934.

MU/n

Sincerely,

Matthew McVee

Vice President, Regulation
