RE: 2021 Unused Energy Report for Net Metering Facilities and Solar Payment Option (SPO) Net Metering Customers in 2020

Portland General Electric Company (PGE) hereby submits, pursuant to Oregon Administrative Rule (OAR) 860-039-0060(3), this summary report detailing the total number of unused kilowatt-hour (kWh) credits accumulated by net metering customers (PGE Schedule 203) at the close of the annual billing cycle. In addition, the report confirms the dollar value associated to these kWh credits at the applicable average annual avoided cost tariff rate (PGE Schedule 201) that is being transferred to low income energy assistance.

Although not required in the rule, and consistent with OAR 860-084-0360(1), the solar payment option (SPO) customers participating in the Solar Payment Net Metering Option program (PGE Schedule 215 and 216) also agree to have their excess generation donated to low income energy assistance. That is also included in this report.

At the end of the billing year that concluded March 31, 2021, the unused net metering kWh credits totaled 3,225,438 kWh with a dollar value of \$90,653, which was calculated at the average annual avoided cost rate of 2.810 cents/kWh.

At the end of the billing year that concluded in March 31, 2021, the unused SPO kWh credits totaled 178,698 kWh with a dollar value of \$5,063, which was calculated using the average annual avoided cost rate of 2.810 cents/kWh.

PGE proposes to transfer the amount of \$95,717 to Oregon Energy Services, the organization that provides energy assistance to low income customers, within 45 days of this letter.
