

**BEFORE THE PUBLIC UTILITY COMMISSION  
OF OREGON**

UE 245

In the Matter of

PACIFICORP dba PACIFIC POWER

2013 Transition Adjustment Mechanism

RULING

**DISPOSITION: TRANSCRIPT CORRECTED**

On September 14, 2012, a ruling was issued setting a time for objections to the parties' proposed corrections to the hearing transcript in this docket. No objections were received.

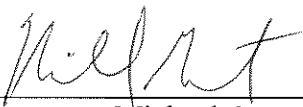

On September 17, 2012, Noble Americas Energy Solutions requested two additional corrections. Noble Solutions explained that it had circulated the additional proposed edits the other parties, and that no parties had objected at the time of filing. I treat the request as a motion, and conclude that the time for objections to the motion has passed. Because no objections were filed, Noble Solutions' motion is granted.

Accordingly the transcript is corrected as indicated in the September 14, 2012 ruling, with the following additional corrections.

|         |                                      |
|---------|--------------------------------------|
| Page 23 | line 10: insert "what" after "about" |
| Page 47 | line 14: delete "free"               |

The parties may contact the court reporter to request corrected replacement pages to the transcript.

Dated this 27th day of September, 2012, at Salem, Oregon.
