Re: In the Matter of the Petition of Eschelon Telecom of Oregon, Inc. for Arbitration  
with Qwest Corporation, Pursuant to 47 U.S.C. Section 252 of the Federal  
Telecommunications Act of 1996  
Docket No. ARB 775

Dear Sir/Madam:

Enclosed for filing are an original and five copies of the Direct Testimony of Douglas Denney, Bonnie J. Johnson, and Michael Starkey with exhibits in the above-referenced matter.

Also enclosed is a certificate of service. I have also enclosed an additional copy of this letter and request that you date stamp its receipt and return it to me in the enclosed self-addressed, stamped envelope.

Sincerely,

A handwritten signature in blue ink that reads "Tobe Goldberg".

Tobe L. Goldberg  
Senior Legal Secretary  
Eschelon Telecom, Inc.

BEFORE THE PUBLIC UTILITY COMMISSION

OF OREGON

Docket No. ARB 775

In the Matter of the Petition of Eschelon  
Telecom of Oregon, Inc. for Arbitration  
with Qwest Corporation, Pursuant to 47  
U.S.C. Section 252 of the Federal  
Telecommunications Act of 1996

CERTIFICATE OF SERVICE

I hereby certify that the Direct Testimony of Douglas Denney, Bonnie J. Johnson, and Michael Starkey with exhibits on behalf of Eschelon Telecom of Oregon, Inc. was filed electronically with and the original and five copies were sent via overnight mail on the 11th day of May, 2007 to:

Oregon Public Utility Commission  
ATTN: Filing Center  
550 Capitol Street N.E.  
Suite 215  
Salem, Oregon 97301-2551

and a true and correct copy was sent via email and hand delivery on May 11, 2007, to:

Jason Topp  
Qwest Corporation  
200 South Fifth Street  
Room 395  
Minneapolis, MN 55402  
Jason.Topp@qwest.com

DATED this 11<sup>th</sup> day of May, 2007.

## TABLE OF CONTENTS

<b>I. INTRODUCTION.....</b>	<b>1</b>
<b>II. OVERVIEW AND INTRODUCTION TO DIRECT TESTIMONY .....</b>	<b>2</b>
A.    ESCHELON BUSINESS NEED FOR INTERCONNECTION AGREEMENT TERMS.....	9
B.    ISSUES FOR WHICH QWEST AGREES COMMISSION SHOULD ADOPT ICA LANGUAGE .....	11
C.    ISSUES WHICH QWEST SEEKS TO EXCLUDE FROM THE ICA AND IGNORE THE NEED FOR CONTRACTUAL CERTAINTY .....	13
1.    QWEST POSITION ON EXCLUDING ISSUES FROM ICA .....	19
2.    REJECTION OF QWEST’S PROPOSAL TO EXCLUDE TERMS FROM ICA .....	22
3.    CMP HISTORY ESTABLISHES ICA TERMS MAY VARY AND, WHEN THEY DO, ICA CONTROLS OVER CMP .....	24
4.    CMP BACKGROUND: REALITIES OF CMP AND PCAT .....	36
a.    CMP TERMINOLOGY AND PROCEDURES .....	40
b.    EXAMPLES: QWEST VACILLATES OR MANEUVERS ON CMP .....	49
i.    CRUNEC EXAMPLE .....	50
ii.   DESIGN CHANGES EXAMPLE .....	60
iii.  MINNESOTA 616 EXAMPLE .....	64
iv.   SECRET TRRO PCATS EXAMPLE.....	74
5.    ESCHELON’S POSITION IS CONSISTENT WITH SECTION 252 AND CMP SCOPE AND EACH ISSUE REQUIRES DISPOSITIVE ICA LANGUAGE .....	95
<b>III. SUBJECT MATTER NO. 1: INTERVAL CHANGES AND       PLACEMENT .....</b>	<b>96</b>
Issue No. 1-1 and subparts: ICA Sections 1.7.2; 7.4.7, 9.23.9.4.3, Exhibit C (Group 2.0 & Group 9.0), Exhibit I (Section 3), Exhibit N, Exhibit O .....	96
Issue No. 1-1: Changes to Intervals – Section 1.7.2 and Exhibits N and O .....	103
Issue No. 1-1(a): Interconnection Trunks – Section 7.4.7; Issue 1-1(b): UDIT Rearrangements—Exhibit C, Group 2.0; Issue 1-1(c): LIS Trunking— Exhibit C, Group 9.0; Issue 1-1(e): Intervals for Loop Mux Combinations (LMC)—Section 9.23.9.4.3 (Eschelon)/ Section 24.4.4.3 (Qwest).....	109
Issue No. 1-1(d): ICB Provisioning Intervals – Exhibit I, Section 3 .....	110
<b>IV. SUBJECT MATTER NO. 11: POWER.....</b>	<b>115</b>
Issue No. 8-21 and subparts: ICA Sections 8.2.1.29.2.1; 8.2.1.29.2.2; 8.3.1.6; 8.3.1.6.1; 8.3.1.6.2 and subparts, 8.1.4.1 and subparts, 8.6.1.3.1 and Exhibit A.....	115
<b>V. SUBJECT MATTER NO. 12: NEBS STANDARDS.....</b>	<b>142</b>
Issue No. 8-24: ICA Section 8.2.3.9 .....	142
<b>VI. SUBJECT MATTER NO. 14: NONDISCRIMINATORY ACCESS TO       UNES.....</b>	<b>143</b>
Issue No. 9-31: ICA Section 9.1.2 .....	143

<b>VII. SUBJECT MATTER NO. 15. DELAYED ORDERS WHEN FACILITIES ARE NOT AVAILABLE.....</b>	<b>158</b>
Issue No. 9-32 and Subparts (a) – (c): ICA Sections 9.1.2.1.3.2.1; 9.1.2.1.3.2.2; 9.2.2.3.2; and 9.2.2.16.....	158
<b>VIII. SUBJECT MATTER NO. 16. NETWORK MAINTENANCE AND MODERNIZATION.....</b>	<b>159</b>
Issue Nos. 9-33, 9-33(a), 9-34, 9-35 and 9-36: ICA Sections 9.1.9 and 9.1.9.1.....	159
<b>IX. SUBJECT MATTER NO. 18: CONVERSIONS .....</b>	<b>182</b>
Issue Nos. 9-43 and 9-44 and subparts: ICA Sections 9.1.15.2.3; 9.1.15.3 and subparts; 9.1.15.3.1; 9.1.15.3.1.1; 9.1.15.3.1.2.....	182
Issue No. 9-43: Conversions – Circuit ID, Section 9.1.15.2.3.....	194
Issue No. 9-44 – Manner of Conversion – Section 9.1.15.3.....	199
Issue No. 9-44(a): Manner of Conversion – Use of adder or surcharge – Section 9.1.15.3.1.....	202
Issue No. 9-44(b): Manner of Conversion – Use of USOC – Section 9.1.15.3.1.1.....	204
Issue No. 9-44(c): Manner of Conversion – Same USOC – Section 9.1.15.3.1.1.....	204
<b>X. SUBJECT MATTER NO. 19: INTERFERING BRIDGE TAP.....</b>	<b>207</b>
Issue No. 9-46: ICA Section 9.2.2.9.6.....	207
<b>XI. SUBJECT MATTER NO. 24: LOOP-TRANSPORT COMBINATIONS .....</b>	<b>208</b>
Issue No. 9-55: ICA Sections 9.23.4; 9.23.4.4; 9.23.4.4.1; 9.23.4.5; 9.23.4.6; 9.23.4.5.4.....	208
<b>XII. SUBJECT MATTER NO. 27: MULTIPLEXING (LOOP-MUX COMBINATIONS).....</b>	<b>216</b>
Issue No. 9-61 and subparts: ICA Sections 9.23.9 and subparts; 24.4 and subparts; 9.23.2; 9.23.4.4.3; 9.23.6.2; 9.23.9.4.3; 9.23.4.4.3; 9.23.6.2; Exhibit C; 24.4.4.3; Exhibit A; Section 9.23.6.6 and subparts.....	216
Issue No. 9-61: Loop-Mux Combination (“LMC”) – Placement – Section 9 and Section 24.....	227
Issue No. 9-61(a): Loop-Mux Combination (LMC) – LMC Loop versus LMC, Sections 9.23.9 and subparts, 24.4 and subparts, and 9.23.2.....	228
Issue No. 9-61(b): LMC Multiplexing – Intervals - Sections 9.23.9.4.3, 9.23.4.4.3, 9.23.6.2, Exhibit C, and 24.4.4.3 .....	232
Issue No. 9-61(c): LMC Multiplexing - Exhibit A Section 9.23.6.6 and subparts.....	233

1 **I. INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS FOR THE**  
3 **RECORD.**

4 A. My name is Michael Starkey. My business address is QSI Consulting, Inc., 243  
5 Dardenne Farms Drive, Cottleville, Missouri 63304.

6 **Q. WHAT IS QSI CONSULTING, INC. AND WHAT IS YOUR POSITION**  
7 **WITH THE FIRM?**

8 A. QSI Consulting, Inc. ("QSI") is a consulting firm specializing in regulated  
9 industries, econometric analysis and computer-aided modeling. I currently serve  
10 as the firm's President.

11 **Q. PLEASE PROVIDE A SYNOPSIS OF YOUR EDUCATIONAL**  
12 **BACKGROUND AND RELEVANT WORK EXPERIENCE.**

13 A. Included with this testimony as Eschelon/2 is a thorough description of my  
14 educational background and relevant work experience. In brief, I have been a  
15 consultant to telecommunications providers, equipment manufacturers,  
16 government agencies and other private parties since 1996. Previous to my  
17 consulting experience, I served as the Director of Telecommunications for the  
18 Maryland Public Service Commission ("PSC") and prior to that, as the Office of  
19 Policy and Planning's Senior Policy Analyst for the Illinois Commerce  
20 Commission. I began my career as a Senior Economist at the Missouri PSC.  
21 Throughout my career I have spent a great deal of time studying

1 telecommunications networks, including substantial time and effort aimed at  
2 developing rationale, efficient means by which competing communications  
3 carriers can interconnect their respective facilities. I have likewise analyzed the  
4 underlying economic characteristics of communications networks and have on  
5 numerous occasions provided expert testimony regarding the costs of providing  
6 various services. Finally, I am very familiar with the negotiation, mediation and  
7 arbitration processes envisioned by Section 252 of the Telecommunications Act  
8 of 1996 and I have, since 1996, participated in dozens of negotiations and  
9 arbitrations<sup>1</sup> on behalf of some of the largest, and smallest, carriers in the nation.

10 **II. OVERVIEW AND INTRODUCTION TO DIRECT TESTIMONY**  
11

12 **Q. HOW IS ESCHELON'S DIRECT TESTIMONY PHYSICALLY**  
13 **ORGANIZED?**

14 A. Eschelon's direct testimony follows the organization of the Issues by Subject  
15 Matter List. I have provided as Eschelon/3 a copy of the Issues by Subject Matter  
16 List annotated to indicate where in Eschelon's direct testimony the discussion of  
17 that Subject Matter may be found (*i.e.*, which witness discusses that Subject  
18 Matter for Eschelon).<sup>2</sup> The Issues by Subject Matter List is a roadmap to all of

---

<sup>1</sup> The docket numbers for the Qwest-Eschelon ICA arbitrations are, for Arizona, T-03406A-06-0572; T-01051B-06-0572 ("Arizona arbitration"); for Colorado, 06B-497T ("Colorado arbitration"); for Minnesota, P-5340, 421/IC-06-768 ("Minnesota arbitration"); for Oregon, ARB 775 ("Oregon arbitration"); for Utah, 07-2263-03; petition filed but no testimony yet ("Utah arbitration"); and for Washington, UT-063061 ("Washington arbitration").

<sup>2</sup> The Issues by Subject Matter List (non-annotated) was provided as Exhibit 2 to Eschelon's Petition for Arbitration.

1 the open issues, ICA Section numbers, and groupings of issues. The Issues by  
2 Subject Matter List follows the same grouping and issue numbering as found in  
3 the joint Revised Disputed Issues Matrix (“Disputed Issues Matrix”),<sup>3</sup> for ease of  
4 reference. In the Issues by Subject Matter List and the Disputed Issues Matrix,  
5 the issues are generally discussed in the order in which they appear in the  
6 Interconnection Agreement (“ICA”). Generally, the first number of the Issue  
7 Number refers to the Section number of the ICA. For example, Issue 2-3 refers to  
8 contract language that appears in Section 2 of the ICA (entitled “Interpretation  
9 and Construction”) and issue number three of the total open issues.<sup>4</sup>

10 There are 46<sup>5</sup> Subject Matter groupings identified on the Issues by Subject Matter  
11 List, with 26 remaining wholly or partially disputed. The discussion of these

---

<sup>3</sup> The Oregon Disputed Issues Matrix was filed initially as Exhibit 3 to Eschelon’s Petition for Arbitration in this matter on October 10, 2006. *See* Eschelon Telecom’s Petition for Arbitration of Inter-carrier Negotiations with Qwest Corporation under the Telecommunications Act of 1996. *In the Matter of the Petition of Eschelon Telecom of Oregon, Inc., for Arbitration with Qwest Corporation, Pursuant to 47 U.S.C. Section 252 of the Federal Telecommunications Act of 1996.* Oregon PUC Docket No. ARB 775 [“Eschelon Petition”], Exhibit 3. A brief written narrative summarizing Eschelon’s position with respect to the open issues is set forth in the Disputed Issues Matrix for each issue [“*Eschelon position statement*”]. The Disputed Issues Matrix also includes a brief written narrative drafted by Qwest that summarizes Qwest’s position for each issue [“*Qwest position statement*”].

<sup>4</sup> There will be gaps in the issue numbering. For example, there is no issue 1-2. These gaps are generally due to renumbering or closure of issues.

<sup>5</sup> At the time that the Issues by Subject Matter List was filed as Exhibit 2 to Eschelon’s Petition for Arbitration in this proceeding, there were 46 Subject Matter groupings on the list (with three of those subject matters – 19, 21 and 41 – shown as intentionally blank). Since that time, seventeen (17) additional Subject Matter groupings have been closed and other Subject Matter groupings have had some issues closed or, in some instances, altered. At the time of filing of this testimony, 26 Subject Matter groupings remain wholly or partially disputed. For each issue that has been partially or totally closed, Eschelon witnesses will provide the agreed upon language in Direct Testimony. Eschelon Direct Testimony will also point out any new or altered proposal for any of the remaining open issues. I have provided as Eschelon/3 to this testimony an updated Issues by Subject Matter List, showing the current status of the disputed issues (including the issues that have closed) and the Eschelon witness that addresses each disputed issue.

1 Subject Matters in individual Eschelon testimony will begin with headings  
2 indicating the Subject Matter number, followed by the Issue Numbers for that  
3 grouping and then the ICA Section numbers for each issue. In an electronic  
4 version of Eschelon's Direct Testimony, which will be provided on CD-ROM in  
5 addition to the hardcopy version, the files are linked such that the reader may  
6 generally click on the Subject Matter heading (1-46) in the Issues by Subject  
7 Matter List, and it will take the reader to that portion of Eschelon's direct  
8 testimony. It is Eschelon's hope that this will allow the Commission an efficient  
9 way to review each of the issues.

10 **Q. IN TERMS OF CONTENT, HOW IS ESCHELON'S DIRECT**  
11 **TESTIMONY ORGANIZED?**

12 A. I begin with an overview of the open issues and address Qwest's claim, with  
13 respect to a number of those issues, that they should be excluded from the  
14 interconnection agreement and dealt with outside of the contract, such as in  
15 Qwest's Change Management Process. After this overview, I turn to the  
16 individual issues set forth in the Issues by Subject Matter List. In my testimony  
17 and the direct testimony of the other Eschelon witnesses, Eschelon addresses each  
18 Subject Matter individually and asks the Commission to consider it on the merits.  
19 Eschelon generally begins with an explanation of the business need that led  
20 Eschelon to bring the particular issue – out of the numerous other issues that arise  
21 in the Qwest-Eschelon business relationship – to the Commission for resolution.  
22 Eschelon identifies its proposed language, briefly describes Qwest's position, and

1 then discusses the reasons why the Commission should adopt Eschelon's  
2 proposal. Ideally, an overview and introduction would include a brief summary  
3 of each Subject Matter. To avoid redundancy and given the length of the  
4 testimony, however, Eschelon instead refers the reader to its position statement in  
5 the Disputed Issues Matrix, as well as to the description of Eschelon's business  
6 need in the testimony, for a summary of each issue.

7 **Q. HOW IS CONTRACT LANGUAGE IDENTIFIED IN ESCHELON'S**  
8 **TESTIMONY?**

9 A. I provide the language proposals of both Eschelon and Qwest for each issue. The  
10 format used to identify the disputed language in my testimony will be similar to  
11 the format shown for Eschelon's proposed language in Exhibit 3 to Eschelon's  
12 Petition for Arbitration. When Eschelon's proposed language is shown, any  
13 language that is proposed by Eschelon and opposed by Qwest will be shown in  
14 underlined text to denote that the language is not agreed to. Oftentimes it is  
15 helpful to review Qwest's language alongside that of Eschelon's within  
16 Eschelon's proposed language to illustrate the differences in proposals, and in  
17 these instances, Qwest's proposed language is shown in ~~strikeout text~~. The same  
18 goes for when Qwest's proposed language is displayed: Qwest proposed language  
19 opposed by Eschelon is shown in underlined text, and Eschelon's language is  
20 shown in ~~strikeout text~~. Any agreed to language that is provided for context will  
21 not be highlighted in any way (*i.e.*, not underlined and not strikeout).

1 **Q. ARE THE 26 SUBJECT MATTERS THAT REMAIN OPEN<sup>6</sup> PROPERLY**  
2 **BEFORE THIS COMMISSION FOR DETERMINATION OF**  
3 **APPROPRIATE INTERCONNECTION AGREEMENT LANGUAGE**  
4 **RESOLVING THE ISSUE?**

5 A. Yes. Section 252(b) of the federal Telecommunications Act (“the Act”) indicates  
6 that interconnection “agreements [will be] arrived at through compulsory  
7 arbitration” for issues raised in the arbitration petition and any response thereto.<sup>7</sup>  
8 The issues are properly before the Commission for action to determine the  
9 interconnection agreement’s terms.

10 The 26 open Subject Matters represent only a small number of the total issues that  
11 Eschelon and Qwest confront in their business relationship. These 26 Subject  
12 Matters, however, rise to the level of needing Commission action to arrive at  
13 interconnection agreement terms. A key factor in determining the importance of  
14 an issue is often the effect on End User Customers. With respect to many of the  
15 issues, therefore, Eschelon will describe the customer impact when explaining  
16 Eschelon’s business need reflected in the issue to be arbitrated. If the End User  
17 Customer is harmed, Eschelon’s reputation and its ability to compete  
18 meaningfully are harmed as well. Many of the terms and conditions that Eschelon  
19 believes need to be included in the ICA have a direct impact on End User

---

<sup>6</sup> The Issues by Subject Matter List provided with Eschelon’s Petition for Arbitration shows 46 Subject Matters. A number of Subject Matters have since closed. The closed language for these issues is shown in Eschelon’s direct testimony.

<sup>7</sup> 47 U.S.C. §252(b).

1 Customers, and those terms and conditions should not be changed without  
2 Commission oversight through approval of contract amendments.

3 Eschelon has no incentive to arbitrate unnecessarily. Qwest is the dominant  
4 carrier, and Eschelon is dependent on Qwest for the products and services  
5 governed by this Section 251/252 interconnection agreement. Eschelon's annual  
6 revenue is less than 2% of Qwest's annual revenue.<sup>8</sup> It is too time consuming and  
7 expensive for Eschelon to arbitrate unnecessarily. The Commission can fairly  
8 draw an inference that Eschelon – in bringing forward in this arbitration a  
9 relatively few, but specific, issues<sup>9</sup> winnowed from the vast number of day-to-day  
10 business issues – is raising them because the business need is compelling and a  
11 Commission determination of *ICA language* resolving the substance of each issue  
12 is critical. Obtaining ICA language resolving the language issues now will help  
13 avoid future disputes.

14 **Q. ARE THERE ANY EXHIBITS TO YOUR DIRECT TESTIMONY?**

15 A. Yes. Eschelon/2 through Eschelon/8 are exhibits to my direct testimony. These  
16 exhibits are described as follows:

- 17
- Eschelon/2: Curriculum Vitae

---

<sup>8</sup> Eschelon's business is described further in the Testimony of Mr. Denney.

<sup>9</sup> Qwest will likely enumerate for the Commission the number of issues that Eschelon has brought to Qwest's Change Management Process (CMP). In addition, Eschelon must raise many more issues in weekly and monthly communications to the Qwest service management team, as described in the Testimony of Ms. Johnson. Although Qwest may attempt to characterize the number of arbitration issues as large (and the workload may feel that way), the number selected for arbitration is very small when compared to the total potential number.

---

<sup>10</sup> The Issues by Subject Matter List filed as Exhibit 3 to Eschelon’s Petition for Arbitration has been updated and annotated in Eschelon/3 to show closed issues and to show which Eschelon witness addresses each issue in his or her direct testimony.

<sup>11</sup> The Minnesota Arbitrators’ Report and the commission’s ruling with respect to it are attached to the testimony of Mr. Denney as Eschelon/29 and Eschelon/30. *See* Order Resolving Arbitration Issues, Requiring Filed Interconnection Agreement, Opening Investigation and Referring Issue to Contested Case Proceeding [“MN PUC Arbitration Order”], *In the Matter of the Petition of Eschelon Telecom, Inc. for Arbitration of an Interconnection Agreement with Qwest Corporation Pursuant to 47 U.S.C. § 252(b) of the Federal Telecommunications Act of 1996*, (March 30, 2007) [“Minnesota arbitration”] (Eschelon/30); see also Arbitrators’ Report, Minnesota arbitration, OAH No. 3-2500-17369-2; MPUC Docket No. P-5340,421/IC-06-768 (Jan. 16, 2006) (“MN Arbitrators’ Report”) (Eschelon/29).

1                   Pursuant to 47 U.S.C. Section 252 of the Federal Telecommunications Act  
2                   of 1996 (“Eschelon-Qwest Arizona Arbitration”).

3                   • Eschelon/8: Qwest Power Measuring Amendment (see Issue 8-21).<sup>12</sup>

4                   A.     ESCHELON BUSINESS NEED FOR INTERCONNECTION  
5                   AGREEMENT TERMS

6     **Q.     WHAT CRITICAL BUSINESS NEEDS ARE COMMON TO THE**  
7                   **REMAINING 26 SUBJECTS FOR WHICH ESCHELON SEEKS**  
8                   **DISPOSITIVE<sup>13</sup> LANGUAGE IN THE ICA?**

9     A.     Interconnection agreements are contracts. A primary reason why Eschelon needs  
10            an interconnection agreement addressing these issues is fundamental to most  
11            contracts – Eschelon needs certainty to plan and manage its business. The FCC  
12            has specifically recognized this need for CLECs to “rely on” interconnection  
13            agreements “on a permanent basis.”<sup>14</sup> While the interconnection agreement can  
14            be amended and therefore is not “permanent” in the sense that it is frozen in time,  
15            the FCC recognized that permanency is needed for the term of the contract when  
16            the parties do not agree to changes through contract amendment. Eschelon needs  
17            certainty and reliability to plan its business and effectively compete. The FCC

---

<sup>12</sup> Note: This Exhibit is *not* an Eschelon ICA amendment. Eschelon has not signed the Power Measuring Amendment and so this amendment does not apply to Eschelon.

<sup>13</sup> By “dispositive,” I mean language that resolves the substantive dispute, and not language that defers the dispute for another day (such as language referring to Qwest’s ever changing Product Catalog, or “PCAT”).

<sup>14</sup> Notice of Apparent Liability for Forfeiture, *In the Matter of Qwest Corporation Apparent Liability for Forfeiture*, FCC File No. EB-03-IH-0263 (March 11, 2004) (“*FCC Forfeiture Order*”) at ¶ 32.

1 has also recognized that interconnection agreement terms can be “many and  
2 complicated.”<sup>15</sup>

3 Another business need common to these Subject Matters is the need for  
4 Commission involvement and oversight to address the imbalance created by  
5 Qwest’s continued dominance in the areas governed by the interconnection  
6 agreement. In terms of arbitrating issues brought to the Commission, Qwest’s  
7 special status as an incumbent monopoly provider for Section 251 products and  
8 services requires Commission intervention to break the deadlock when Qwest and  
9 Eschelon disagree. Eschelon does not have any of the leverage in negotiations  
10 that would result from saying it will go elsewhere to obtain the product, because  
11 Qwest is its only source for these types of products. Section 252(b) addresses the  
12 lack of this more typical customer leverage by instead giving CLECs an ability to  
13 obtain Commission resolution of disputes and interconnection agreement terms  
14 through “compulsory arbitration.” To fulfill this function of Section 252(b), an  
15 arbitration decision needs to provide the type of certainty and reliability  
16 recognized as a business need by the FCC. All of the issues in this proceeding  
17 have been negotiated by Eschelon and Qwest and are, therefore, properly before  
18 the Commission for resolution on their merits in this arbitration.

---

<sup>15</sup> Memorandum and Order, *In the Matter of Qwest Communications International Inc. Petition for Declaratory Ruling on the Scope of the Duty to File and Obtain Prior Approval of Negotiated Contractual Arrangements under Section 252(a)(1)*, WC Docket No. 02-89, (rel. October 4, 2002) (“*Declaratory Ruling*”) at ¶ 8.

1            **B. ISSUES FOR WHICH QWEST AGREES COMMISSION SHOULD**  
2            **ADOPT ICA LANGUAGE**

3            **Q. DOES QWEST AGREE THAT THE ISSUES THAT ESCHELON IS**  
4            **ASKING THE COMMISSION TO RESOLVE IN THIS COMPULSORY**  
5            **ARBITRATION SHOULD RESULT IN DISPOSITIVE**  
6            **INTERCONNECTION AGREEMENT LANGUAGE?**

7            A. For certain issues, yes, Qwest agrees. As indicated by Qwest’s position  
8            statements in the Disputed Issues Matrix, Qwest arranges the issues into two  
9            categories: (1) interconnection agreement issues that do not belong in the Change  
10           Management Process (“CMP”)<sup>16</sup> so that Qwest agrees the Commission may  
11           decide upon ICA language resolving the issue in this arbitration [“contractual  
12           non-CMP issues”]; and (2) issues that Qwest claims inherently belong in CMP so  
13           that Qwest argues the Commission should not decide upon dispositive ICA  
14           language in this arbitration and should defer its oversight and decision making  
15           authority to CMP [“inherent CMP issues”].

16           **Q. FOR WHICH ISSUES DO ESCHELON AND QWEST AGREE THAT THE**  
17           **COMMISSION SHOULD DECIDE UPON DISPOSITIVE CONTRACT**  
18           **LANGUAGE ADDRESSING THE MERITS OF THE ISSUE?**

---

<sup>16</sup> I discuss further Qwest’s claims regarding the ICA and the need for contractual certainty below. For a more detailed description of the terms of CMP, *see* the Qwest “CMP Document” which sets forth the rules for conduct of CMP. The CMP Document is attached to the Testimony of Ms. Johnson as Eschelon/53. (It is also Exhibit G to the SGAT and the proposed ICA.) The “scope” provision of the CMP Document (§1.0) provides that “CMP provides a means to address changes that support or affect pre-ordering, ordering/provisioning, maintenance/repair and billing capabilities and associated documentation and production support issues for local services (local exchange services) provided by Competitive Local Exchange Carriers (CLECs) to their end users.”

1 A. Eschelon and Qwest agree that the Commission should establish dispositive ICA  
2 language for the following Subject Matters<sup>17</sup> and decide them individually and on  
3 the merits to determine ICA language that provides certainty as to how issues will  
4 be handled for the term of the contract, unless amended:<sup>18</sup>

- 5 • **RATE APPLICATION (2)**<sup>19</sup>: Issue No. 2-3
- 6 • **EFFECTIVE DATE OF LEGALLY BINDING CHANGES (3)**: Issue  
7 No. 2-4
- 8 • **DESIGN CHANGES (4)**: Issue No. 4-5 and subparts<sup>20</sup>
- 9 • **DISCONTINUATION OF ORDER PROCESSING AND**  
10 **DISCONNECTION (5)**: Issue Nos. 5-6, 5-7 and subpart
- 11 • **DEPOSITS (6)**: Issue Nos. 5-8, 5-9, 5-11, and 5-12
- 12 • **REVIEW OF CREDIT STANDING (7)**: Issue No. 5-13
- 13 • **COPY OF NON-DISCLOSURE AGREEMENT (8)**: Issue 5-16
- 14 • **TRANSIT RECORD CHARGE AND BILL VALIDATION (9)**: Issue  
15 Nos. 7-18, 7-19
- 16 • **POWER (11)**: Issue No. 8-21 and subparts<sup>21</sup>
- 17 • **NONDISCRIMINATORY ACCESS TO UNES (14)**: Issue No. 9-31
- 18 • **NETWORK MAINTENANCE AND MODERNIZATION (16)**: Issue  
19 Nos. 9-33 and 9-34<sup>22</sup>
- 20 • **WIRE CENTER (17)**: Issues 9-37 – 9-42
- 21 • **UNBUNDLED CUSTOMER CONTROLLED REARRANGEMENT**  
22 **ELEMENT (UCCRE) (22)**: Issue No. 9-53
- 23 • **APPLICATION OF UDF-IOF TERMINATION (FIXED) RATE**  
24 **ELEMENT (22A)**: Issue 9-51
- 25 • **LOOP-TRANSPORT COMBINATIONS (24)**: Issue No. 9-55

---

<sup>17</sup> 20 out of 26 open Subject Matters.

<sup>18</sup> This is Eschelon's current understanding based on Qwest's position statements in the Disputed Issues Matrix. For these Subject Matters, Qwest does not argue in its position statement that the issue should be addressed through CMP. As discussed below and demonstrated by the Exhibits to the Testimony of Ms. Johnson, Qwest's position on whether an issue belongs in CMP or not vacillates, so the list is a moving target.

<sup>19</sup> The number in parentheses indicates the Subject Matter Number on the Issues by Subject Matter List.

<sup>20</sup> Qwest's position as to whether design changes is a CMP issue has vacillated over time. See my discussion of the Design Changes example below, *e.g.*, quoting Exhibit 2 to Minnesota Petition for Arbitration (Joint Disputed Issues Matrix) (May 26, 2006), Qwest position statement at p. 15.

<sup>21</sup> Issue 8-22 has been closed since Eschelon's Petition for Arbitration was filed in this case.

<sup>22</sup> Issues 9-33(a), 9-35 and 9-36 are closed.

- 1 • **SERVICE ELIGIBILITY CRITERIA – AUDITS (25)**: Issue No. 9-56
- 2 • **COMMINGLED EELS/ARRANGEMENTS (26)**:<sup>23</sup> Issue Nos. 9-58
- 3 and subparts, 9-59
- 4 • **MULTIPLEXING (LOOP-MUX COMBINATIONS) (27)**: Issue No.
- 5 9-61 and subparts
- 6 • **RATES FOR SERVICES (44)**: Issue Nos. 22-88 and subparts and 22-89
- 7 • **UNAPPROVED RATES (45)**: Issue No. 22-90 and subparts

8 C. ISSUES WHICH QWEST SEEKS TO EXCLUDE FROM THE ICA  
9 AND IGNORE THE NEED FOR CONTRACTUAL CERTAINTY

10 **Q. FOR WHICH ISSUES DO ESCHELON AND QWEST DISAGREE THAT**  
11 **THE COMMISSION SHOULD DECIDE UPON DISPOSITIVE**  
12 **CONTRACT LANGUAGE ADDRESSING THE MERITS OF THE ISSUE**  
13 **IN THIS ARBITRATION?**

14 A. The list of open Subject Mattes on which Eschelon and Qwest disagree is shown  
15 below.<sup>24</sup> For each of these issues, Eschelon asks the Commission to decide the  
16 issue on the merits and provide much needed certainty for purposes of planning  
17 and conducting business and competing effectively. Eschelon provides ample  
18 support for its position and business need with respect to each of these issues and  
19 encourages the Commission to individually review the evidence related to each  
20 issue. Eschelon is not seeking to force Qwest to make substantial changes in how  
21 it does business. Indeed, several of the provisions that Eschelon proposed, and

---

<sup>23</sup> See my discussion below of the Secret TRRO PCATs Example; see also Eschelon/59 (Secret TRRO PCAT Chronology) to the testimony of Ms. Johnson.

<sup>24</sup> Six out of the 26 remaining open Subject Matters. At the outset of the first arbitration (in Minnesota), about one-third of the total issues were on this list. After the Minnesota Arbitrators' ruling in the Qwest-Eschelon arbitration, a number of those issues closed with Eschelon's language for six states.

1 Qwest has opposed on the ground that they deal with issues that should be  
2 addressed outside the contract, did not require Qwest to make any change at all.  
3 Rather, those proposals merely reflected Qwest's current practices, often as  
4 reflected in its PCAT. In fact, several of the issues for which Qwest took this  
5 same position closed for all six states after a Minnesota arbitration ruling<sup>25</sup> with  
6 Eschelon language in the ICA, showing that they are appropriate for inclusion in  
7 an ICA. For the remaining issues of this type, Qwest may deny that Eschelon's  
8 language reflects its current practice, but Eschelon will show that it is Qwest's  
9 established practice even though Qwest may deny it in arbitration (see Issue 12-  
10 72, Jeopardies & Issue 12-87, Controlled Production) or Qwest has changed it  
11 unilaterally over CLEC objection (see Issue 12-67, Expedites) or Qwest has no  
12 proper process but instead implemented an alleged process outside of CMP and  
13 without CLEC input (see Issue 9-43, Conversions). For other issues, Eschelon  
14 will show that its proposal is similar to or incorporates existing Qwest practices  
15 (Issue 1-1, Intervals & Issue 12-64 Root Cause Analysis and Acknowledgement  
16 of Mistakes). By including the now closed and Eschelon's proposed language for  
17 the remaining open provisions in the interconnection agreement, the Commission

---

<sup>25</sup> MN Arbitrators' Report, ¶229 (PSOs); ¶¶ 244 & 246 (Fatal Rejection Notices); ¶¶ 249 & 251 (Loss and Completion Reports and Trouble Report Closure); *see id.* ("Qwest would delete all of the disputed language. In the section concerning trouble report closure, it would simply reference the procedures available on its wholesale website. Qwest maintains inclusion of this language in Eschelon's ICA would 'lock in' these processes, preclude future changes, and require Qwest to operate in one way for Eschelon and another way for all other CLECs. . . . The disputed language exactly reflects Qwest's current practice. Inclusion of Eschelon's language in the ICA would not prohibit future changes, whether through the CMP or ICA amendment. Eschelon's language merely defines the minimum elements that make these resources useful to CLECs. Eschelon's language should be adopted for these issues.").

1 will be assuring that terms that Eschelon has come to rely on, and in some cases  
2 expended substantial resources helping to develop, will continue to be available.

3 As there is little, if any, substantive response that Qwest can make to Eschelon's  
4 evidence, Qwest instead asks the Commission to consider these issues in the  
5 abstract. Qwest asks the Commission to find that, regardless of whether these are  
6 pressing business issues for Eschelon, *conceptually* they are somehow different in  
7 some respect that makes them inherently inappropriate for inclusion in an ICA  
8 and appropriate for CMP instead (regardless of whether they have *already* been  
9 resolved in Eschelon's favor in CMP, as is the case for some of these issues).  
10 Qwest asks the Commission to leave the future uncertain and, instead of the ICA,  
11 rely upon Qwest's Product Catalog ("PCAT")<sup>26</sup> or Standard Interval Guide  
12 ("SIG")<sup>27</sup> language – for which the only certainty is that Qwest can accomplish  
13 change over Eschelon's objection without amending the interconnection  
14 agreement.

---

<sup>26</sup> The "PCAT," which is an acronym for Product Catalog, is a web-site published by Qwest to distribute a catalog describing Qwest's products and services. Qwest's PCAT is provided for informational purposes only and does not govern rates, terms or conditions that exist between Qwest and Eschelon. Section 4.0 of both the SGAT and agreed upon language in the proposed ICA, for example, provide in the definition of "Product Catalog" or "PCAT" that: "Qwest agrees that CLEC shall not be held to the requirements of the PCAT." Not all Qwest PCAT changes are generated as a result of CMP. *See, e.g.,* Eschelon/59 (Secret TRRO PCAT Chronology).

<sup>27</sup> The "SIG," or Standard Interval Guide, is a Qwest document posted on Qwest's web site listing various provisioning intervals with respect to Resale, UNE and other Interconnection Services. *See, e.g.,* Qwest Communications Service Interval Guide for Resale, UNE and Interconnection Services, V73.0, updated 7/21/06 [http://www.qwest.com/wholesale/downloads/2006/060721/InterconnSIG\\_V73.pdf](http://www.qwest.com/wholesale/downloads/2006/060721/InterconnSIG_V73.pdf). CMP applies only to changes to intervals "in Qwest's SIG" (*see* Eschelon/53, CMP Document §§ 5.4.3 & 5.4.5). It does not control conflicting intervals in ICAs. (*Id.* at §1.0.)

1 The open Subject Matters identified on the Issues by Subject Matter List which  
2 Qwest currently places in this category are:

- 3 • **INTERVAL CHANGES AND PLACEMENT (1)**: Issue No. 1-1 and  
4 subparts
- 5 • **CONVERSION (18)**:<sup>28</sup> Issue Nos. 9-43 and 9-44 and subparts
- 6 • **ROOT CAUSE ANALYSIS AND ACKNOWLEDGEMENT OF**  
7 **MISTAKES (29)**: Issue No. 12-64 and subparts
- 8 • **EXPEDITED ORDERS (31)**: Issue No. 12-67 and subparts
- 9 • **JEOPARDIES (33)**: Issue Nos. 12-71, 12-72, 12-73
- 10 • **CONTROLLED PRODUCTION (43)**: Issue No. 12-87

11 **Q. YOU STATE THAT IT IS CRITICAL FOR THE ICA TO PROVIDE**  
12 **CERTAINTY. HAS QWEST RECOGNIZED THE NEED FOR**  
13 **CERTAINTY IN THE ICA DESPITE QWEST’S PROPOSAL TO**  
14 **EXCLUDE A NUMBER OF THE OPEN ISSUES FROM THE ICA?**

15 **A.** Yes. Qwest has confirmed that certainty is important and is a valid basis for  
16 deciding to include terms in an interconnection agreement. Qwest testified in the  
17 arbitrations in other states<sup>29</sup> that “a critical goal of this arbitration should be  
18 establishing clarity concerning the parties’ rights and obligations.”<sup>30</sup> Qwest added

---

<sup>28</sup> See my discussion below of the Secret TRRO PCATs Example; *see also* Eschelon/59 (Secret TRRO PCAT Chronology) to the testimony of Ms. Johnson.

<sup>29</sup> Reference to the Minnesota arbitration refers to the ICA arbitration between Qwest and Eschelon in Minnesota PUC Docket No. P-5340, 421/IC-06-768; OAH Docket No. 3-2500-17369-2 [“Minnesota arbitration”]. The hearing was held in Minnesota the week of October 16-20, 2006. The MN Arbitrators’ Report is Eschelon/29 and the MN PUC Arbitration Order is Eschelon/30 (attached to the testimony of Mr. Denney). Reference to the Arizona arbitration refers to the ICA arbitration between Qwest and Eschelon in Arizona (ACC) Docket Nos. T-03406A-09-0572 & T-01051B-06-0572 [“Arizona arbitration”]; Reference to the Washington arbitration refers to the ICA arbitration between Qwest and Eschelon in Washington UTC Docket No. UT-063061 [“Washington arbitration”].

<sup>30</sup> Direct Testimony of Karen Stewart, Minnesota PUC Docket No. P-5340, 421/IC-06-768; OAH Docket No. 3-2500-17369-2; August 25, 2006 (“Stewart Minnesota Direct”), p. 13, lines 4-6; *see also* Direct Testimony of Karen Stewart, Washington UTC Docket No. UT-063061 (Sept. 29, 2006) (“Stewart Washington Direct”), p. 20, lines 6-8; *see also* Direct Testimony of Karen Stewart,

1 that “clear ICA language is necessary so that the parties *know what is expected of*  
2 *them* under the agreement and to avoid or minimize future disputes.”<sup>31</sup> Further,  
3 Qwest argued that it is a “reasonable expectation” that a party’s obligations  
4 “should be clearly defined and should not be subject to future interpretations” that  
5 a party “develops based on its needs and desires at a given time.”<sup>32</sup> Eschelon  
6 likewise needs and requests clearly defined obligations, especially for issues that  
7 are likely to impact its core business operation and ultimately its ability to  
8 effectively serve its customers. The Commission should clearly define these  
9 obligations by establishing interconnection agreement terms and conditions that  
10 must be filed, approved, and amended if changed. Unlike Qwest, Eschelon asks  
11 that the Commission define these obligations for all of the open issues in the  
12 arbitration, and not just a subset hand-picked by Qwest.

13 **Q. PLEASE ELABORATE ON YOUR LAST POINT. WHY DO YOU**  
14 **SUGGEST THAT QWEST IS ASKING THE COMMISSION TO RULE ON**  
15 **ONLY A SUBSET OF THE ISSUES?**

---

Arizona (ACC) Docket Nos. T-03406A-09-0572 & T-01051B-06-0572 (Nov. 8, 2006) (“Stewart Arizona Direct”), p. 16, lines 5-6 (“paramount goal”).

<sup>31</sup> Stewart Minnesota Direct, p. 13, lines 6-7 (emphasis added); *see also* Stewart Minnesota Direct, p. 13, lines 16-17 (“the goal of avoiding future disputes under the ICA”); *see also* Stewart Arizona Direct, p. 16, lines 6-8; *see also* Stewart Washington Direct, p. 20, lines 8-9..

<sup>32</sup> Stewart Minnesota Direct, p. 13, lines 13-16; *see also* Stewart Washington Direct, p. 20, lines 12-14. Qwest was specifically referring to itself as the party at the time. *See id.* Eschelon believes the statement applies to Qwest as well, such as Qwest’s position that language should be subject to future interpretations that Qwest develops based on its needs and desires at a given time, through CMP (*see, e.g.*, CRUNEC example, Eschelon/56 – Eschelon/58), through disregarding CMP results (*see, e.g.*, the jeopardies example in Eschelon/110 and Eschelon/115), and through non-CMP activities (*see, e.g.*, Qwest’s recent collocation non-CMP notice discussed with respect to Issue 9-31, access to UNEs, and the non-CMP “TRRO” PCATs, discussed in Eschelon/59).

1 A. When an issue is to Qwest's advantage, Qwest welcomes, and often insists (*e.g.*,  
2 by requiring an ICA amendment),<sup>33</sup> on certainty in the ICA as to terms protecting  
3 Qwest's interests. Yet, for a number of issues for which Eschelon has asked for a  
4 definitive decision, Qwest argues (or has argued)<sup>34</sup> that the only decision that  
5 should be made is a decision to punt the issue to a forum in which it has much  
6 more control, and there is much less Commission oversight – *i.e.*, CMP.<sup>35</sup> For  
7 other important business issues, Qwest seeks to simply exclude them from the  
8 ICA in favor of Qwest's own discretion.<sup>36</sup> While Qwest may naturally desire to  
9 protect its own interests by picking and choosing the issues it would like the  
10 Commission to decide, the Commission's decision should be based upon the  
11 merits of each company's proposed language. A decision that the decision should  
12 be made elsewhere (*e.g.*, CMP), is no decision at all, especially when one

---

<sup>33</sup> *See, e.g.*, Issue 12-67 (Expedites) & Eschelon/93 and, *see below*, CRUNEC example.

<sup>34</sup> A review of closed issues for which Qwest advocated use of CMP shows that Qwest is not applying a consistent test to decide whether issues belong in CMP or the ICA and these issues can be included in the contract if Qwest so desires. *See* Eschelon/45 (Matrix of Closed Language and Associated CMP Activity, if Any).

<sup>35</sup> Issue 1-1 (Interval Changes and Placement); Issue 12-67 (Expedited Orders); Issues 12-71 – 12-73 (Jeopardies). It is unclear whether Qwest is now proposing use of CMP for Conversions (Issues 9-43 and 9-44) and Commingled EELs (Issues 9-58 and 9-59). Qwest did not use CMP for unilaterally producing its non-CMP PCAT terms but is now claiming it may belatedly put some TRRO issues through CMP (rather than use the ICA change of law provisions or update its SGAT). *See* my discussion below of the Secret TRRO PCATs Example; *see also* Eschelon/59 (Secret TRRO PCAT Chronology) to the testimony of Ms. Johnson.

<sup>36</sup> Regarding Issue 12-87 (Controlled Production), Qwest does not even rely upon CMP. As discussed by Ms. Johnson with respect to this issue, Qwest is violating a previously agreed upon requirement to bring its IMA implementation guidelines through CMP. Instead, Qwest wants the ICA to be silent on the issue addressed by Eschelon's proposal (which reflects Qwest's current practice), leaving it entirely to Qwest's discretion to change course. Regarding Issue 12-64 (Root Cause Analysis and Acknowledgement of Mistakes), Qwest did not submit processes ordered by the Minnesota Commission to CMP despite its own claims about CMP, as discussed by Ms. Johnson regarding Issue 12-64.

1 considers the distinct advantage Qwest enjoys in implementing or denying issues  
2 via CMP (an issue I describe in more detail below).

3 **1. QWEST POSITION ON EXCLUDING ISSUES FROM ICA**

4 **Q. HOW DOES QWEST PROPOSE TO DETERMINE THE ALLEGED**  
5 **CONTRACTUAL OR NON-CONTRACTUAL NATURE OF AN ISSUE TO**  
6 **DETERMINE WHICH ISSUES SHOULD BE EXCLUDED FROM THE**  
7 **ICA?**

8 A. Qwest suggests a couple of criteria or tests in its Oregon position statements for  
9 determining whether an issue allegedly belongs only in CMP so that it must be  
10 excluded from the ICA, notwithstanding Section 252's arbitration provisions.  
11 The first Qwest-proposed standard is whether a label of "process" or "procedure"  
12 can be attached to the proposed provision.<sup>37</sup> According to Qwest, "processes" and  
13 "procedures" should be excluded from the ICA and relegated to CMP.<sup>38</sup>  
14 However, this type of labeling tends to be fairly circular, with the chosen label  
15 often restating the desired result. Even so (or perhaps because of this measure of  
16 control when needed to obtain desired ends), it does not necessarily lead to  
17 consistent or fair results. For example, as discussed with respect to "Minnesota

---

<sup>37</sup> See, e.g., Disputed Issues Matrix to Eschelon's *Petition for Arbitration* ("Eschelon Petition"), Exhibit 3, p. 1 ("Eschelon is attempting to import PCAT-like process language into the ICA"). See also Eschelon/6 [Transcript, Vol. 1, p. 58, lines 1-11 (Testimony of Ms. Albersheim) Minnesota arbitration (Oct. 16, 2006) ("Q. Now, just as an overall question, am I correct to understand from your testimony that there are some issues that should be addressed only in the CMP and should not be in an interconnection agreement? A. Yes. Q. Is that right? A. I believe that process and procedure detail, which is covered in our PCATs, is intended to be managed through the CMP and not through individual interconnection agreements.")].

<sup>38</sup> See *id.*

1           616” example below, when Qwest was ordered to propose “*procedures*” for  
2           promptly acknowledging mistakes,<sup>39</sup> Qwest did not use CMP to implement the  
3           “procedures” it then put in place.<sup>40</sup> Similarly, Qwest agreed in its Oregon ICA  
4           with Covad to certain terms regarding repeat troubles like those it now claims are  
5           “processes” or “procedures” (such as an *interval*<sup>41</sup>), without any CMP activity.<sup>42</sup>  
6           Under the Qwest-Covad Oregon ICA, Covad may charge Qwest for dispatches in  
7           the case of certain repeat troubles.<sup>43</sup> If Qwest had placed these procedures  
8           through CMP, other CLECs would likewise be able to charge Qwest in such  
9           circumstances using these procedures. The label of “procedures” applies, but  
10          Qwest did not rush to CMP to implement this unfavorable ruling for Qwest or the  
11          undesirable ICA terms for Qwest.

12          The second standard that Qwest puts forward in multiple Oregon position  
13          statements is that CMP applies when provisions “affect all CLECs, not just  
14          Eschelon.”<sup>44</sup> A review of the first list above, which contains the issues on which

---

<sup>39</sup> Order Finding Service Inadequate and Requiring Compliance Filing, *In the Matter of a Request by Eschelon Telecom for an Investigation Regarding Customer Conversion by Qwest and Regulatory Procedures*, Docket No. P-421/C-03-616, (July 30, 2003) (“MN 616 Order”). See Eschelon/5, Starkey/14.

<sup>40</sup> See also discussion of Issue 12-64 and subparts in Ms. Johnson’s testimony.

<sup>41</sup> Qwest’s Response to Eschelon’s Petition for Arbitration, Oregon PUC Docket ARB 775 (“Qwest Response”), p. 42, lines 10-12 (“Service intervals are exactly the type of *process* that the Commission and the industry anticipated that CMP would address.”) (emphasis added). Section 12.3.4.4 (second bullet point) of the Qwest-Covad Oregon ICA includes a three business day interval during which Covad must report the repeat trouble. See Eschelon/47, Johnson/5 [Qwest-Covad Oregon ICA, §12.3.4.4 (October 20, 2005)].

<sup>42</sup> See Eschelon/47, Johnson.

<sup>43</sup> See Eschelon/47, Johnson/5 [Qwest-Covad Oregon ICA, §12.3.4.4 (October 20, 2005)].

<sup>44</sup> See Disputed Issues Matrix, Exhibit 3 to Eschelon Petition (Qwest position statements for Issues 1-1, 8-20, 8-24, 8-29, 9-32, 9-43, 12-64, 12-67, 12-70, 12-71 – 12-73, 12-74, 12-75, 12-76, 12-81, 12-

1 the companies agree contract language should be included in the ICA, includes  
2 numerous examples of terms that could affect all CLECs as much as those on the  
3 second list (which contains the issues Qwest proposes to exclude from the ICA).  
4 Yet, Qwest considers the issues on the first list to be contractual non-CMP issues.  
5 The ruling discussed in the previous paragraph, which was unfavorable to Qwest,  
6 affected multiple CLECs.<sup>45</sup> Still, Qwest did not implement those multiple-CLEC  
7 affecting procedures through CMP.

8 As this and other examples in Eschelon's direct testimony show, Qwest's own  
9 proposed criteria fail based upon Qwest's past and current inconsistencies in  
10 labeling an issue as a "process" or asking if "multiple CLECs are affected." Both  
11 alleged criteria allow Qwest too much room to maneuver to achieve its desired  
12 results.

13 **Q. HAS QWEST IN THE PAST PROPOSED OTHER CRITERIA OR TESTS**  
14 **FOR EXCLUDING ISSUES FROM AN APPROVED ICA?**

15 A. Yes. Qwest in the past proposed limiting interconnection agreements to the  
16 schedule of itemized charges and associated descriptions of the services to which  
17 the charges apply – *i.e.*, limited to terms that advantage Qwest by ensuring its  
18 right to charge CLECs, without offering CLECs certainty as to what they will get

---

86); *see also* Qwest Response, pp. 27, 35, and 38. Regarding issues for which Qwest made this CMP argument and then closed without CMP activity or CMP activity only as to a portion of the issue, see Eschelon/45 to the Testimony of Ms. Johnson.

<sup>45</sup> *See* Eschelon/5, Starkey/14 (MN 616 Order, 7/30/03). The Minnesota Commission ordered Qwest to develop procedures generally – not procedures specific only to Eschelon. *See id.*

1 in return.<sup>46</sup> Several of the issues on Qwest’s non-CMP contractual list relate to  
2 charges.<sup>47</sup> Qwest also points out that rates are outside the scope of CMP, when it  
3 does not want to address an issue in CMP, even if it has at some point relied on  
4 CMP for the same issue.<sup>48</sup>

5 **2. REJECTION OF QWEST’S PROPOSAL TO EXCLUDE**  
6 **TERMS FROM ICA**

7 **Q. HAS THE FCC CONSIDERED THIS QWEST PROPOSAL FOR**  
8 **LIMITING THE SCOPE OF INTERCONNECTION AGREEMENTS?**

9 A. Yes. The FCC expressly rejected Qwest’s argument. In its *Declaratory Ruling*,  
10 the FCC addressed the scope of the mandatory filing requirement under Section  
11 252(a)(1) of the Telecommunications Act. The FCC said:

12 [W]e find that an agreement that creates an ongoing obligation  
13 pertaining to resale, number portability, dialing parity, access to  
14 rights-of-way, reciprocal compensation, interconnection,  
15 unbundled network elements, or collocation is an interconnection  
16 agreement that must be filed pursuant to section 252(a)(1). This  
17 interpretation, which directly flows from the language of the Act,  
18 is consistent with the pro-competitive, deregulatory framework set  
19 in the Act. This standard recognizes the statutory balance between  
20 the rights of competitive LECs to obtain interconnection terms  
21 pursuant to section 252(i) and removing unnecessary regulatory

---

<sup>46</sup> See e.g., Issue 12-67 (expedited orders – and specifically Integra’s comments, in Eschelon/94, Starkey/3-4, See also Eschelon/93, that Integra did not know when signing the Qwest template expedite amendment that Qwest would later remove unbundled loops from the Expedites Requiring Approval process). See also the “CRUNEC” example discussed below and the Secret PCAT Chronology in Eschelon/59 to the Testimony of Ms. Johnson (describing how Qwest required CLECs to sign the *TRRO* amendment before revealing password-protected terms to them).

<sup>47</sup> See, e.g., Issue 9-51 (Application of UDF-IOF Termination (Fixed) Rate Element).

<sup>48</sup> See, e.g., my discussion below of the Design Changes example; see also the discussion of Issue 4-5 (design changes) in the Testimony of Mr. Denney; See also the Exhibits to Ms. Johnson’s testimony relating to Issue 12-67 (expedited orders). See Eschelon/93 and Eschelon/94. See also Eschelon/80 – Eschelon/83 (optional testing charges introduced through CMP).

1           impediments to commercial relations between incumbent and  
2           competitive LECs. *We therefore disagree with Qwest that the*  
3           *content of interconnection agreements should be limited to the*  
4           *schedule of itemized charges and associated descriptions of the*  
5           *services to which those charges apply.* Considering the *many and*  
6           *complicated terms* of interconnection typically established  
7           between an incumbent and competitive LEC, *we do not believe*  
8           *that section 252(a)(1) can be given the cramped reading that*  
9           *Qwest proposes.* Indeed, on its face, section 252(a)(1) does not  
10          further limit the types of agreements that carriers must submit to  
11          state commissions.<sup>49</sup>

12   **Q.     CAN QWEST AVOID THE FCC’S RULING ABOUT THE CONTENT OF**  
13    **INTERCONNECTION    AGREEMENTS    BY    POSTING    THE**  
14    **INFORMATION ON ITS WEB-SITE, SUCH AS IN ITS PCAT OR SIG?**

15    A.    No. In its *Forfeiture Order*,<sup>50</sup> the FCC also expressly rejected Qwest’s claim that  
16    the *Declaratory Ruling* authorized posting of information regarding service  
17    offerings on a website in lieu of an agreement filed with, and approved by, state  
18    commissions. To that end, the FCC observed, “At no point did we create a  
19    general ‘web-posting exception’ to section 252(a)...[A] ‘web-posting exception’  
20    would render that provision meaningless, since CLECs could not rely on a  
21    website to contain all agreements on a permanent basis. Moreover, unlike the  
22    terms of an SGAT, web-posted materials are not subject to state commission

---

<sup>49</sup> *Declaratory Ruling* at ¶ 8 (footnotes omitted) (emphasis added).

<sup>50</sup> Notice of Apparent Liability for Forfeiture, *In the Matter of Qwest Corporation Apparent Liability for Forfeiture*, FCC File No. EB-03-IH-0263 (March 11, 2004) (“*FCC Forfeiture Order*”).

1 review, further undermining the congressionally established mechanisms of  
2 section 252(e).”<sup>51</sup>

3 **Q. WAS CMP IN PLACE WHEN THE FCC MADE THIS DECISION?**

4 A. Yes. Qwest’s CMP has been in place since at least the fall of 2002,<sup>52</sup> and the  
5 FCC did not issue its *Forfeiture Order* until March of 2004. The FCC has created  
6 no special “web-posting exception” for postings (such as PCAT or SIG) that are  
7 made through CMP.

8 **3. CMP HISTORY ESTABLISHES ICA TERMS MAY VARY**  
9 **AND, WHEN THEY DO, ICA CONTROLS OVER CMP**

10 **Q. QWEST HAS REFERRED TO THE CMP AS A COMMISSION-**  
11 **APPROVED PROCESS, IMPLYING THAT IT HAS SOME SPECIAL**  
12 **MERIT BECAUSE IT WAS CREATED AS A VEHICLE FOR HELPING**  
13 **IMPLEMENT SECTION 271 OF THE ACT.<sup>53</sup> WOULD YOU LIKE TO**  
14 **RESPOND?**

15 A. While it is true that the CMP was developed related to Qwest’s request for Section  
16 271 relief, the FCC’s later decision in the *Forfeiture Order* confirms that CMP has  
17 no special merit that would allow it to supplant good-faith negotiations or  
18 interconnection agreements that result from Section 252 of the Act. This is  
19 especially true when a CLEC, like Eschelon, specifically identifies issues that are

---

<sup>51</sup> *FCC Forfeiture Order* at ¶ 32.

<sup>52</sup> *See* Eschelon/53 to Ms. Johnson’s Testimony (Qwest CMP Document).

<sup>53</sup> *See, e.g.*, Qwest Response, p. 8.

1 important enough to its ongoing business and ability to compete to warrant  
2 Commission oversight in the form of arbitration (as in this case).

3 CMP will continue to play a role in the relationship between Qwest and Eschelon,  
4 because CMP is the vehicle that Qwest uses to announce changes related to terms  
5 that are not addressed in the ICA. Further, certain terms may not be included in  
6 the ICA by agreement and, in some cases, the issue may be left to CMP for  
7 resolution (per ICA Section 12.1.6). However, none of the issues addressed by  
8 the 26 remaining disputed Subject Matters are issues that Eschelon agrees to leave  
9 to CMP. As I discussed earlier, there are a multitude of other day-to-day issues  
10 that Eschelon has not brought forward in this arbitration, which are handled and  
11 will continue to be handled through CMP, service management, billing disputes,  
12 *etc.*

13 **Q. SINCE CMP WILL CONTINUE TO PLAY A ROLE, DO THE CMP**  
14 **RULES, SET FORTH IN EXHIBIT G TO THE ICA<sup>54</sup> (AND THE SGAT),<sup>55</sup>**  
15 **DETERMINE THE RELATIONSHIP BETWEEN CMP AND THE**  
16 **INTERCONNECTION AGREEMENT?**

---

<sup>54</sup> Eschelon provides the CMP Document as Eschelon/53 to the direct testimony of Bonnie Johnson.

<sup>55</sup> The CMP Document is also Exhibit G to the SGAT. As explained below (when discussing the Secret TRRO PCATs), despite repeated statements that Qwest would be updating the SGAT, Qwest recently distributed a Level 1 CMP notice on 1 day's notice indicating that SGATs would no longer be available for CLEC opt-in. See Eschelon/66, Johnson/1. Eschelon has objected to the notice, although CMP has no formal comment period for Level 1 notices. See Eschelon/53, Johnson/38-39 (CMP Document). Level 1 changes "are defined as changes that do not alter CLEC operating procedures or changes that are time critical corrections to a Qwest product/process." *Id.* p. 38.

1 A. Yes. The “CMP Document” outlines the rules and procedures governing conduct  
2 of Qwest’s CMP. The following excerpt from Section 1.0 (“Introduction and  
3 Scope”) of the CMP Document<sup>56</sup> addresses the relationship between the  
4 interconnection agreement and CMP and clearly indicates that Commission-  
5 approved interconnection agreement terms control:

6 In cases of conflict between the changes implemented through this  
7 CMP and any CLEC interconnection agreement (whether based on  
8 the Qwest SGAT or not), the rates, terms and conditions of such  
9 interconnection agreement shall prevail as between Qwest and the  
10 CLEC party to such interconnection agreement. In addition, if  
11 changes implemented through this CMP do not necessarily present  
12 a direct conflict with a CLEC interconnection agreement, but  
13 would abridge or expand the rights of a party to such agreement,  
14 the rates, terms and conditions of such interconnection agreement  
15 shall prevail as between Qwest and the CLEC party to such  
16 agreement.

17 This requirement is so important and integral to CMP in relation to the ICA that  
18 the same language must appear in all CMP notices to inform CLECs receiving the  
19 notice that it does not apply to them if it conflicts with their interconnection  
20 agreements.<sup>57</sup> In other words, per the CMP terms and conditions, CMP changes  
21 may affect some, but not all, CLECs, depending on the terms of their  
22 interconnection agreements and whether the change conflicts with those terms for

---

<sup>56</sup> See also Eschelon/54, Johnson/2-3 (Gap Analysis #150) (CMP redesign meeting minutes addressing CMP in relation to ICAs).

<sup>57</sup> Qwest is required, per the CMP Document, to include this language in CMP notices. See Eschelon/53, §5.4, which states (with emphasis added): “The following defines five levels of Qwest originated product/process changes and the process by which Qwest will originate and implement these changes. None of the following shall be construed to supersede timelines or provisions mandated by federal or state regulatory authorities, certain CLEC facing Web sites (e.g., ICONN and Network Disclosures) or individual interconnection agreements. ***Each notification will state that it does not supersede individual interconnection agreements.***”

1 each CLEC. This built-in recognition in the governing CMP document that ICA  
2 terms will vary from CMP disproves Qwest's claim repeated throughout its  
3 position statements that the "entire purpose" of CMP is to create processes "that  
4 are uniform among all CLECs."<sup>58</sup> Instead, Qwest is attempting to circumvent this  
5 clearly defined hierarchy under which the ICA controls by preventing issues from  
6 being included in the ICA. Qwest seeks to render this carefully crafted and  
7 "Commission approved" hierarchy meaningless by making CMP the only source  
8 of terms for several of the arbitration issues, so that in the end Qwest's *CMP*  
9 *controls* those issues through ever changing PCAT and SIG language.

10 Qwest received 271 approval, at least in part, based upon the availability of a  
11 CMP that reflected the hierarchy reflected in Section 1.0 of the CMP Document.  
12 The Commission should not allow Qwest, now that it has 271 approval, to use  
13 that very CMP to undermine the CMP's own governing provision as to its scope.  
14 Terms that rise to the level of being arbitrated and approved as part of an  
15 interconnection agreement not only govern as between Qwest and Eschelon, but  
16 also, per Section 1.0 of the CMP Document, are outside the scope of CMP.

17 The Minnesota Commission noted the integral role that the CMP scope provision  
18 plays when it examined this issue in the Minnesota Eschelon-Qwest arbitration  
19 case. The Minnesota Arbitrators, as affirmed by the Minnesota Commission,  
20 found that: "The CMP document itself provides that in cases of conflict between

---

<sup>58</sup> See e.g., Oregon Disputed Issues Matrix, Exhibit 1 to Qwest's Petition (Qwest position statements for Issues 1-1, 8-20, 8-24, 8-29, 9-32, 9-43, 12-64, 12-67, 12-70, 12-71 – 12-73, 12-74, 12-75, 12-76, 12-81, 12-86).

1 changes implemented through the CMP and any CLEC ICA, the rates, terms and  
2 conditions of the ICA shall prevail. In addition, if changes implemented through  
3 CMP do not necessarily present a direct conflict with an ICA but would abridge  
4 or expand the rights of a party, the rates, terms, and conditions of the ICA shall  
5 prevail. **Clearly, the CMP process would permit the provisions of an ICA  
6 and the CMP to coexist, conflict, or potentially overlap.**<sup>59</sup>

7 **Q. IN ADDITION TO THE APPROVED CMP DOCUMENT ITSELF, ARE  
8 THERE OTHER INDICATIONS THAT CMP OR THE PCAT SHOULD  
9 NOT GOVERN A CLEC'S RIGHTS?**

10 A. Yes. Before Qwest obtained 271 approval, it needed to have an SGAT in place  
11 for requesting CLECs to adopt as their ICA. The Oregon SGAT provides, in  
12 Section 2.3, that: "In cases of conflict between the SGAT and Qwest's Tariffs,  
13 PCAT, methods and procedures, technical publications, policies, product  
14 notifications or other Qwest documentation relating to Qwest's or CLEC's rights  
15 or obligation under this SGAT, then the rates, terms and conditions of this SGAT  
16 shall prevail. To the extent another document abridges or expands the rights or  
17 obligations of either Party under this Agreement, the rates, terms and conditions

---

<sup>59</sup> Minnesota Arbitrators' Report, OAH 3-2500-17369-2/MPUC No. P-5340,421/IC-06-768, ¶ 21. (emphasis added) The Minnesota Commission adopted the Arbitrators' Report in relevant part. See, Order Resolving Arbitration Issues, Requiring Filed Interconnection Agreement, Opening Investigation and Referring Issue to Contested Case Proceeding, *In the Matter of the Petition of Eschelon Telecom, Inc. for Arbitration of an Interconnection Agreement with Qwest Corporation Pursuant to 47 U.S.C. § 252(b) of the Federal Telecommunications Act of 1996*. ["Minnesota Qwest-Eschelon ICA Arbitration"], OAH No. 3-2500-17369-2; MPUC Docket No. P-5340,421/IC-06-768 (March 30, 2007) ["MN PUC Arbitration Order"]. See Eschelon/29 & Eschelon/30.

1 of this Agreement shall prevail.”<sup>60</sup> Consistent with this provision, the definition  
2 of “Product Catalog” in Section 4 of the SGAT explicitly provides: “Qwest  
3 agrees that CLEC shall not be held to the requirements of the PCAT.”

4 Both of these SGAT provisions recognize that there will be overlap between the  
5 ICA and CMP, including different terms for different CLECs, and when that  
6 happens, the ICA controls. After all, there would be no need for a provision  
7 regarding “cases of conflict between the SGAT and Qwest’s . . . PCAT, methods  
8 and procedures” if conflicts were not expected to occur because the CMP existed  
9 to make all PCAT terms and methods and procedures uniform. Both of these  
10 SGAT provisions, therefore, further disprove Qwest’s repeated claim that the  
11 “entire purpose” of CMP is to create processes “that are uniform among all  
12 CLECs.” If that were true, the CMP Document and the SGAT would both  
13 provide that, in cases of conflict, the CMP Document controls to maintain  
14 uniformity. They send the opposite message, however. The purpose of these  
15 provisions<sup>61</sup> is defeated if Qwest is successful in excluding terms from the ICA so  
16 no conflict may occur and CMP, by default, prevails.

17 **Q. DOES QWEST STILL MAKE SGATS AVAILABLE FOR CLEC OPT IN?**

---

<sup>60</sup> This clause is also found in Section 2.3 of the ICA. See, Eschelon’s Petition, p. 17. [“...in cases of conflict between the Agreement and Qwest’s Tariffs, PCAT, methods and procedures, technical publications, policies, product notifications...this Agreement shall prevail.”]

<sup>61</sup> Both of these provisions are also part of the proposed ICA, as closed language in Section 2.3 and 4.0 (definition of “Product Catalog” or “PCAT”).

1 A. No. Qwest recently unilaterally notified CLECs that, per Qwest, SGATs are no  
2 longer available for opt-in by CLECs.<sup>62</sup> I discuss this new Qwest position below  
3 in my discussion of the secret TRRO PCATs.

4 **Q. ARE UNIFORM TERMS AND CONDITIONS FOR CLECS REQUIRED**  
5 **BY THE ACT?**

6 A. No. Nothing in the Telecommunications Act requires that terms and conditions of  
7 an interconnection agreement be identical for all CLECs.<sup>63</sup> To the contrary, the  
8 structure of the Act reflects the exact opposite: that an interconnection agreement  
9 should be tailored to accommodate specific needs of the CLEC in order to provide  
10 a meaningful opportunity to compete.<sup>64</sup> Had Congress intended that the  
11 interconnection agreement be a “one size fits all” document, as Qwest is trying to  
12 make it, Congress would have provided the SGAT as the sole means by which  
13 terms and conditions of interconnection would be made available by the ILEC.  
14 That Congress did not do so shows that it recognized the need for individual  
15 CLECs to be able to enter into ICAs that are specific to their particular  
16 competitive needs. Furthermore, when implementing the Act, the FCC defined an

---

<sup>62</sup> See Eschelon/66, Johnson/1.

<sup>63</sup> Qwest claims (incorrectly) that processes and procedures should be “standardized” or made “uniform” across all CLECs through the CMP. *See, e.g.*, Qwest Response, pp. 7, 8, and 9 (“standardized”) and pp. 38, 39, 40, 41, and 43 (“uniform”)

<sup>64</sup> Indeed, the FCC has found that state commission implementation of the nondiscrimination requirements of the Act and FCC rules and orders is key. *See, First Report and Order* at ¶ 310 [“We expect that the states will implement the general nondiscriminatory rules set forth herein by adopting, inter alia, specific rules determining the timing in which incumbent LECs must provision certain elements, and any other specific conditions they deem necessary to provide new entrants, including small competitors, with a meaningful opportunity to compete in local exchange markets.” Emphasis added] *See also, US WEST Communications, Inc. v Hix*, 57 F. Supp. 2d 1112, 1119 (D. Colo. 1999).

1 “interconnection agreement” broadly, to include any “agreement that creates an  
2 ongoing obligation pertaining to resale, number portability, dialing parity, access  
3 to rights-of-way, reciprocal compensation, interconnection, unbundled network  
4 elements, or collocation.”<sup>65</sup> This shows that neither Congress nor the FCC  
5 intended the ICA to be as narrow as Qwest wants it to be.

6 **Q. HAVE OTHER STATE COMMISSIONS REJECTED QWEST’S**  
7 **STANDARDIZATION ARGUMENT?**

8 A. Yes. The Washington Commission has twice rejected such claims of uniformity  
9 or standardization and has found that asking for specific terms in an individual  
10 ICA is not a request for preferential treatment. The arbitrator in the recent  
11 Verizon arbitration case in Washington said:

12 The fact that there are differences in change of law provisions  
13 among various agreements is not discriminatory: It reflects the  
14 variations in negotiation and arbitration of terms in  
15 interconnection agreements. The interconnection agreements  
16 are filed with the Commission and available for review.  
17 CLECs have opted into a number of agreements, including the  
18 agreement originally arbitrated by MCI.<sup>66</sup>

19 In the same order, the Washington Commission found it reasonable to include  
20 “operational procedures to ensure customer service quality” in an interconnection

---

<sup>65</sup> Declaratory Ruling, ¶ 8. See also, Forfeiture Order, ¶ 11.

<sup>66</sup> Washington State Utilities and Transportation Commission, Docket UT-043013, Order No. 17 *Arbitrator’s Report and Decision* dated July 8, 2005 at ¶ 79, [“*Washington ALJ Report*”], *affirmed in relevant part in “Washington Order No. 18.”*

1 agreement.<sup>67</sup> Similarly, the arbitrator made the following observation in the  
2 Qwest-Covad arbitration in Washington:

3 While Qwest relies heavily on “consensus” reached in the  
4 Section 271 proceeding as a strong reason for retaining the  
5 30-day period, that argument does not apply to an  
6 arbitration proceeding. Parties engage in arbitration to  
7 enter into an agreement tailored to the companies’ needs,  
8 not to adopt a standard agreement. Covad is not bound to  
9 the 30 day payment period simply because it was a party to  
10 the SGAT negotiations and hearings.<sup>68</sup>

11 Furthermore, in the recent Verizon/CLEC arbitration, the Washington  
12 Commission pointed to the likelihood of reducing the opportunity for future  
13 disputes as a basis for including specific contract language for issues addressed in  
14 the order.<sup>69</sup>

15 **Q. ARE PROCESSES AND PROCEDURES APPROPRIATE FOR**  
16 **INCLUSION IN THE ICA?**

17 A. Yes. The FCC has said that processes and procedures are appropriate content for  
18 interconnection agreements:

19 Individual incumbent LEC and competitive LEC arrangements  
20 governing the *process and procedures* for obtaining access to an  
21 UNE to which a competitive LEC is entitled, are more

---

<sup>67</sup> *Washington Order No. 18* at ¶ 61 (quoting *Order No. 17* at ¶ 416, quoting *TRO* ¶ 586); *see also* ¶¶ 60-64, 112.

<sup>68</sup> Arbitrator's Report and Decision, *In The Matter Of The Petition For Arbitration Of Covad Communications Company, With Qwest Corporation, Pursuant To 47 U.S.C. Section 252(B) And The Triennial Review Order*, WUTC Docket No. UT-043045, Order No. 04, Nov. 2, 2004 [“WA Covad Arbitration Order”], at note 16 to ¶ 100. Although the Commission rejected Covad’s 30-day proposal (which is not an issue in this case), it did so on other grounds.

<sup>69</sup> *Washington Order No. 18* at ¶¶ 28, 31-32, 36, 42, 48, 58, 64; *see also* Conclusions of Law ¶¶ 102, 104, 105, 106, 111, 112.

1 appropriately addressed in the context of individual  
2 interconnection agreements pursuant to section 252 of the Act.<sup>70</sup>

3 **Q. HAS ANY BENEFIT OF INDIVIDUAL, NON-UNIFORM ICA TERMS**  
4 **BEEN RECOGNIZED?**

5 A. Yes. And, ironically, Qwest is among those that have previously proclaimed the  
6 benefits of unique interconnection agreements. On October 16, 2003, Qwest, in  
7 opposing the then current application of the FCC's "pick and choose" rule, filed  
8 extensive comments extolling the virtues of negotiated interconnection  
9 agreements and the importance of the "...dynamic, innovative interconnection  
10 negotiations intended by the Telecommunications Act of 1996."<sup>71</sup> Qwest  
11 recognized that: "ILECs and CLECs have a fundamental interest in making the  
12 interconnection process as cooperative and open as possible, since both parties  
13 benefit from well-negotiated and mutually beneficial wholesale arrangements."<sup>72</sup>

14 Even more specific to the point here, Qwest argued that:

15 "...the pick-and-choose rule restricts the ILEC's willingness to  
16 **tailor negotiations and contracts to the specific needs of**  
17 **CLECs and their business plans.** Further, the current rule does  
18 not realistically reflect the ordinary trade-offs and give-and-take  
19 that characterize free negotiations, in which an ILEC would  
20 ordinarily be willing to give up one term of a contract in order to  
21 get another."<sup>73</sup>

---

<sup>70</sup> *TRRO* ¶ 358 (emphasis added).

<sup>71</sup> *Comments of Qwest Communications International Inc.*, CC Docket Nos. 01-338, 96-98, 98-147, October 16, 2003, p. ii.

<sup>72</sup> *Comments of Qwest Communications International Inc.*, CC Docket Nos. 01-338, 96-98, 98-147, October 16, 2003, pp. 3-4.

<sup>73</sup> *Comments of Qwest Communications International Inc.*, CC Docket Nos. 01-338, 96-98, 98-147, October 16, 2003, p. 4 [emphasis added]

1 Finally, Qwest summarized its arguments with the following opinion:

2 “The ability of carriers to negotiate binding agreements with each  
3 other was a cornerstone of the Act.”<sup>74</sup>

4 Now that Qwest has reaped the benefits of eliminating the pick-and-choose rule  
5 by making these arguments, Qwest seeks to deny Eschelon the very ability to  
6 “tailor negotiations and contracts” to Eschelon’s “specific needs” and “business  
7 plans” upon which Qwest relied to defeat that rule.

8 **Q. DOES INCLUSION OF TERMS, INCLUDING POTENTIALLY UNIQUE**  
9 **TERMS, IN AN INTERCONNECTION AGREEMENT MEAN THAT**  
10 **ESCHELON ARGUES FOR EXCLUSIVE TERMS FOR ITSELF?**

11 A. No. Contract language in a Commission-approved interconnection agreement  
12 allows the Commission to review the terms, decide disputed issues on the merits,  
13 and approve changes before they are made to avoid disruption that may occur  
14 without Commission oversight. The alternative, *i.e.*, a lack of contract language,  
15 leaves Eschelon in a position in which it will likely be forced to approach the  
16 Commission in crisis mode, after it is being faced with adverse consequences that  
17 impact its End User Customers,<sup>75</sup> perhaps requesting expedited relief.<sup>76</sup> It simply  
18 makes more sense to allow the Commission to consider the issues in an orderly  
19 manner through ICA arbitration, as envisioned by Section 252 of the Act.

---

<sup>74</sup> *Comments of Qwest Communications International Inc.*, CC Docket Nos. 01-338, 96-98, 98-147, October 16, 2003, p. 6.

<sup>75</sup> *See, e.g.*, the “CRUNEC” example that I discuss below.

<sup>76</sup> This assumes resources are available to challenge individual issues on a piece-meal basis in every state affected. If that is not the case, Qwest may gain an unjust or anticompetitive advantage simply due to lack of resources rather than merit.

1 Further, if terms are arbitrated, the approved agreement is then available for opt-in  
2 pursuant to Section 252(i), or for use as a negotiations template/proposal,<sup>77</sup> by  
3 other, and potentially “multiple,” CLECs.

4 CLECs should have a choice of opting into ICAs and ICA amendments that best  
5 suit their business models, instead of all CLECs being forced to sign the same  
6 agreement or amendment. Clearly, Section 252(i) of the Telecommunications Act  
7 provides CLECs the ability to opt into other CLECs’ ICAs:

8           AVAILABILITY TO OTHER TELECOMMUNICATIONS  
9           CARRIERS.--A local exchange carrier shall make available any  
10           interconnection, service, or network element provided under an  
11           agreement approved under this section to which it is a party to any  
12           other requesting telecommunications carrier upon the same terms  
13           and conditions as those provided in the agreement.

14 This language recognizes that different CLECs have different business models  
15 and needs.

16 **Q. IN ANY EVENT, IS ESCHELON IN THIS ARBITRATION TRYING TO**  
17 **DEFEAT “UNIFORM PROCESSES?”**

18 A. No. Indeed, the majority of the contract language proposed by Eschelon for the  
19 issues Qwest initially wanted to exclude from the ICA matches Qwest’s current  
20 practices, including language describing the same terms in the PCAT.<sup>78</sup>

---

<sup>77</sup> Although the FCC eliminated the pick-and-choose rule in favor of the all-or-nothing rule, when it did so, the FCC clearly stated that doing so did not limit the nondiscrimination provisions of the Act, which remain available to protect CLECs. See Section Report and Order, *In re. Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers*, CC Docket No. 01-338 (Rel. July 13, 2004), at ¶¶ 20-23.

<sup>78</sup> See Eschelon/45. See also MN Arbitrators’ Report, ¶229 (PSOs); ¶¶ 244 & 246 (Fatal Rejection Notices); ¶¶ 249 & 251 (Loss and Completion Reports and Trouble Report Closure).

1 with all of the talk about “change requests” in CMP, which is sometimes  
2 described as an “industry forum,” it may come as a surprise to learn that the vast  
3 majority of changes in CMP occur through Qwest email announcements for  
4 which there is no discussion on the CMP calls. There is no collaborative  
5 development or even any mention of them. When reading the CMP Document  
6 (which is Exhibit G to the ICA and SGAT and which I described earlier as the  
7 document containing the governing rules and procedures for the conduct of  
8 CMP),<sup>80</sup> this may not be immediately apparent. The reader has to get through the  
9 description of the four “levels” of changes in the CMP Document (which I  
10 describe more fully below) to discover that only the highest, fourth level requires  
11 Qwest to submit a “request” rather than a notification. Even then, for product and  
12 process changes (which are different from “systems” changes), Qwest does not  
13 need any kind of vote on adoption of or consent to its “request” before  
14 implementing it, provided that Qwest follows the applicable time periods. In  
15 some cases, CLECs may comment, but Qwest may reject or “respectfully  
16 decline”<sup>81</sup> the comment and proceed as planned, as though the CLEC had never  
17 commented at all. In one of the examples below (“CRUNEC”), pretty much  
18 every actively participating CLEC objected to the Qwest CMP notification, but  
19 Qwest implemented it anyway. Qwest may have created a different impression  
20 when, throughout its position statements in the Joint Disputed Issues Matrix, it  
21 states that the purpose of CMP was to “ensure that the industry (not just Qwest or

---

<sup>80</sup> See Eschelon/53 (“CMP Document”).

<sup>81</sup> See, e.g., Eschelon/56, Starkey/1, entry for 5/21/03.

1 one CLEC) is involved in creating and *approving* processes” (emphasis added).<sup>82</sup>  
2 Qwest requires no approval from CLECs to implement product and process  
3 changes in CMP. To the contrary, as the CRUNEC example described below  
4 shows, Qwest will implement a process change in the face of clearly articulated  
5 disapproval by multiple CLECs.

6 And, although much of the work of CMP is conducted through Qwest email  
7 “notifications,” not all Qwest email notifications are “CMP” notifications.<sup>83</sup>  
8 Carriers may choose among a variety of other notices, such as billing, contract,  
9 and network notices, and those notices do not follow the CMP procedures, such as  
10 assignment of “levels.” Similarly, with respect to Qwest’s PCAT, continual  
11 reference to the PCAT in conjunction with CMP may suggest that all PCAT  
12 changes are made through CMP. It is not the case that all Qwest PCAT changes  
13 are generated as a result of CMP, as one of the four examples discussed below  
14 (involving Secret TRRO PCATs) demonstrates quite clearly.

15 By recognizing these CMP and PCAT realities, Eschelon is not requesting  
16 changes to CMP or suggesting that the Commission needs to make a finding that

---

<sup>82</sup> See Joint Disputed Issues Matrix, Exhibit 3 to Eschelon Petition (Qwest position statements for Issues 1-1, 8-20, 8-24, 8-29, 9-32, 9-43, 12-64, 12-67, 12-70, 12-71 – 12-73, 12-74, 12-75, 12-76, 12-81, 12-86).

<sup>83</sup> See Eschelon/59 (Secret TRRO PCAT Chronology, at footnote 5). The **SUBJECT** field of a Qwest announcement starts with “CMP” when it is a CMP notice. Not all Qwest customer “notices” and PCAT changes are generated as a result of CMP. Carriers may choose among a variety of notices, such as billing, contract, and network notices, that are not CMP notices. See <http://www.qwest.com/wholesale/notices/cnla/maillist.html>. In addition, if it is a CMP notice, the listed contact person is a CMP representative. If it is not a CMP notice, the contact person is the Qwest Service Manager or other contact. CMP notices with comment periods identify the timeframe for comment.

1 CMP is flawed before it can find in Eschelon's favor. Such findings are  
2 unnecessary for Eschelon to prevail. Eschelon's position on each issue is fully  
3 supported by the facts and should prevail on the merits of that issue, as discussed  
4 with respect to each individual issue throughout the direct testimony. The  
5 purpose in relating these CMP and PCAT realities is to ensure that the facts about  
6 CMP and the PCAT are known when evaluating claims made by Qwest and when  
7 reviewing the examples and chronologies. Several chronologies are attached to  
8 the testimony of Ms. Johnson, who was personally involved in those events.<sup>84</sup>  
9 Because the chronologies often relate to CMP events, they use a lot of CMP  
10 terminology (such as references to CMP numbering, the "levels" of notices, *etc.*).  
11 The absence of any reference in any of these chronologies to a vote being taken  
12 on adoption or rejection of any of the requests is explained, for example, by the  
13 discussion below explaining that there is no voting on adoption or rejection of  
14 product and process changes in CMP.

15 Certainly, the realities of CMP and the PCAT shed some light on why, for critical  
16 business issues, a CLEC may conclude it needs to exercise its Section 252 right to  
17 negotiation and compulsory arbitration. This is particularly true when the manner

---

<sup>84</sup> Eschelon/56 (CRUNEC); Eschelon/59 (Secret TRRO PCATs); Eschelon 79 (No Build Held Order/Delayed Order); Eschelon/90 (Qwest Retail letter); Eschelon/93 (Expedites); and Eschelon/110 (Jeopardy and FOC). Mr. Denney also provides a CFA Design Change Chronology associated with Qwest's recent attempt to limit CFA changes to one per circuit at the time of the cut. *See*, Eschelon/27. Two further examples are Eschelon/79, the No Build Held Order (Delayed Order) Chronology, and Eschelon/80, CMP Documentation, Qwest CR # PC100101-5 (Optional Testing). CLEC's escalation of PC100101-5 and Qwest's response to CLEC's escalation of this CR are provided as Eschelon/81 - Eschelon/83 to the direct testimony of Ms. Johnson, respectively. These exhibits provide additional evidence of Qwest's inconsistent and improper use of the CMP process and the need for contractual certainty to govern Eschelon's relationship with Qwest.

1 in which Qwest has used CMP and the PCAT to achieve its objectives, as  
2 demonstrated by the examples, is taken into account. Even though CMP may  
3 inform Eschelon that Qwest is making changes that will be adverse to Eschelon's  
4 business, CMP provides Eschelon no real ability to keep Qwest from unilaterally  
5 making those changes.<sup>85</sup> Contract language appears to be the vehicle that will  
6 give Eschelon the ability to "force Qwest to the table" to negotiate those types of  
7 changes. As discussed above, Section 252 provides this ability to CLECs.  
8 Qwest's proposal (*e.g.*, use CMP) does not.

9 Significantly, the realities of CMP and the PCAT also run counter to Qwest's  
10 basic premise that some issues ("process" issues) are inherently CMP issues that  
11 should be excluded from the ICA. After providing background information about  
12 CMP and the PCAT, I describe four examples (CRUNEC, Design Changes,  
13 Minnesota 616, and Secret TRRO PCATs)<sup>86</sup> that each in its own way  
14 demonstrates how Qwest's own conduct is not in accord with that claim. Instead,  
15 Qwest has the capability to use, and sometimes uses, CMP as either a sword or a  
16 shield toward furthering its own policy initiatives.

17 a. CMP TERMINOLOGY AND PROCEDURES

18 **Q. PLEASE BRIEFLY DESCRIBE HOW CMP WORKS.**

---

<sup>85</sup> See MN Arbitrators' Report", ¶22 ("Eschelon has provided convincing evidence that the CMP process does not always provide CLECs with adequate protection from Qwest making important unilateral changes in the terms and conditions of interconnection.").

<sup>86</sup> Qwest's handling of Jeopardies is another excellent example. Ms. Johnson discusses this example in her testimony relating to Issues 12-71 – 12-73 and Eschelon/110-Eschelon/118.

1 A. CMP generally works through a series of change requests (“Change Requests” or  
2 “CRs”) submitted by CLECs to Qwest (or, in some cases, by Qwest to Qwest) or  
3 announcements by Qwest to CLECs in the form of “CMP notifications.” Change  
4 Requests and a small sub-set of the Qwest CMP notifications are discussed on  
5 CMP monthly and ad hoc calls among Qwest and participating CLECs. Qwest  
6 maintains minutes of the calls and posts the minutes on its CMP web-site.<sup>87</sup> A  
7 “change request” contains a description of the request for a new, or change to an  
8 existing, product, process, or system. All CLEC proposed changes are submitted  
9 as change requests because there are no CLEC CMP notifications. CLECs must  
10 propose a change to Qwest, and Qwest may decide to either accept or reject a  
11 CLEC request for product or process changes. While some Qwest changes are in  
12 the form of change requests, Qwest generally announces its changes through its  
13 email notification process. As indicated above, although much of the work of  
14 CMP is conducted through Qwest email “notifications,” not all Qwest email  
15 notifications are “CMP” notifications.<sup>88</sup>

16 Each change (whether by request or notification) within CMP is classified by its  
17 potential impact on carriers, or the time-critical nature of the change. Changes to  
18 a product or process within CMP are assigned severity or “disposition” levels.  
19 Each change is classified as a Level 0, 1, 2, 3, or 4 change. The following table

---

<sup>87</sup> See <http://www.qwest.com/wholesale/cmp/index.html>

<sup>88</sup> See Eschelon/59 (Secret TRRO PCAT Chronology, footnote 5).

1 provides a high level overview of the disposition levels used in the CMP  
2 notification process:<sup>89</sup>

3

Level 0	Level 0 changes are defined as changes that do not change the meaning of documentation and do not alter CLEC operating procedures. Level 0 changes are effective immediately without notification. [CMP Document, Section 5.4.2]
Level 1	Level 1 changes are defined as changes that do not alter CLEC operating procedures or changes that are time critical corrections to a Qwest product/process. Time critical corrections may alter CLEC operating procedures, but only if such Qwest product/process has first been implemented through the appropriate level under CMP. Level 1 changes are effective immediately upon notification. [CMP Document, Section 5.4.2.1]
Level 2	Level 2 changes are defined as changes that have minimal effect on CLEC operating procedures. Qwest will provide notification of Level 2 changes at least twenty-one (21) calendar days prior to implementation. [CMP Document, Section 5.4.3]
Level 3	Level 3 changes are defined as changes that have moderate effect on CLEC operating procedures and require more lead-time before implementation than Level 2 changes. Qwest will provide initial notification of Level 3 changes at least thirty-one (31) calendar days prior to implementation. [CMP Document, Section 5.4.4]
Level 4	Level 4 changes are defined as changes that have a major effect on existing CLEC operating procedures or that require the development of new procedures. Level 4 changes will be originated using the CMP Change Request process and provide CLECs an opportunity to have input into the development of the change prior to implementation. [CMP Document, Section 5.4.5]

4

---

<sup>89</sup> A non-CMP Qwest notification (such as a billing, network, or contract notice) generally would not be assigned or contain these CMP disposition levels.

1 **Q. DO THE DESCRIPTIONS OF LEVEL 3 AND 4 CHANGES MEAN THAT**  
2 **ALL CHANGES THAT HAVE A MODERATE OR MAJOR EFFECT ON**  
3 **CLEC OPERATING PROCEDURES MUST GO THROUGH CMP?**

4 A. No. Many of the agreed upon ICA provisions, for example, have a moderate or  
5 major effect on Eschelon's operating procedures, but many of them did not go  
6 through CMP as they were negotiated or opted in to and publicly filed with the  
7 Commission.<sup>90</sup> CMP is expressly limited by its "scope" provision.<sup>91</sup> As  
8 discussed above, interconnection agreement terms are outside the scope of CMP  
9 and, when they conflict with CMP, the ICA terms control.<sup>92</sup> Sections 251 and  
10 252 of the Act, as well as state rules, apply to ICA negotiation and arbitration.

11 **Q. WHAT ARE PRODUCT, PROCESS, AND SYSTEM CHANGES?**

12 A. Change Requests and Qwest CMP notifications are classified by whether they  
13 relate to a Qwest product or process or system.<sup>93</sup> Changes to systems (such as  
14 Interconnect Mediated Access or "IMA")<sup>94</sup> are handled in CMP somewhat

---

<sup>90</sup> See Eschelon/44 (table showing changes that were not noticed through CMP). See also Eschelon/45.

<sup>91</sup> See Eschelon/53 (CMP Document) at Section 1.0.

<sup>92</sup> See Eschelon/53 (CMP Document) at Section 1.0.

<sup>93</sup> Numbers are assigned to CMP notifications and change requests. Whether a CMP Change Request (Change Request) or notice is a product, process, or systems Change Request or notice is easily determined by looking at the assigned CMP number. If the number begins with "PROD" it is a product Change Request/notice, and if the number begins with "PROS," it is a process Change Request/notice. The CMP Document provides that changes that go through the process and product procedures "are not changes to OSS Interfaces" (*i.e.*, are not system changes). See CMP Document, §5.4.

<sup>94</sup> These are changes to the "systems," as distinguished from other processes (such as manual processes, which are handled as "process" changes), for purposes of CMP. Although the term "Operations Support Systems" or "OSS" may come to mind as it is sometimes used in this sense, the term "OSS" is broader and also includes the associated business processes, including manual processes. In the Third Report and Order (at ¶ 425), the FCC said: "In the *Local Competition First*

1 differently from product and process changes. None of the relevant changes in  
2 the four examples discussed below were systems changes. The notifications and  
3 change requests discussed here are product and process (*i.e.*, not systems)  
4 notifications and requests.<sup>95</sup>

5 **Q. DO QWEST AND THE CLECS VOTE ON ADOPTION OR REJECTION**  
6 **OF PRODUCT AND PROCESS CHANGE REQUESTS?**

7 A. No. Voting in the CMP occurs in only two narrow circumstances. First, voting  
8 occurs for changes to the CMP Document itself and certain procedures within the  
9 Document, *e.g.*, whether to change the disposition level of a Change Request<sup>96</sup> or  
10 whether to grant an exception to the CMP Document's procedures.<sup>97</sup> Second,  
11 voting occurs to prioritize (*i.e.*, rank) proposed systems changes.<sup>98</sup> If Qwest, in  
12 CMP, chose to change terms affecting any of the issues Eschelon has included in  
13 arbitration (as identified in the Disputed Issues Matrix), none of those changes

---

*Report and Order*, the Commission defined OSS as consisting of pre-ordering, ordering, provisioning, maintenance and repair, and billing functions supported by an incumbent LEC's databases and information. OSS includes the manual, computerized, and automated systems, together with associated business processes and the up-to-date data maintained in those systems." *In the Matter of Implementation of the Local Competition Provisions of the Telecommunications Act of 1996*. Third Report and Order and Fourth Further Notice of Proposed Rulemaking. CC Docket No. 96-98. FCC 99-238. Released 11/5/99.

<sup>95</sup> The only open issue relating to systems is Issue 12-87 (Controlled Production). For that issue, no change is required, as Eschelon's proposed language reflects Qwest's current practice documented in the Implementation Guidelines. *See* discussion of Issue 12-87 in Ms. Johnson's testimony. *See also* MN Arbitrators' Report ¶255 ("Qwest agrees that Eschelon's language accurately depicts its current practice, which does not require CLECs to recertify if they have successfully completed testing of a previous release; in addition, Qwest admits that Qwest can control whether a CLEC can access its OSS.")

<sup>96</sup> CMP Document Section 5.4.3.1.

<sup>97</sup> CMP Document Section 16.2.1.

<sup>98</sup> CMP Document Sections 5.2.1, 5.2.2, 10.3.3, 10.3.4 16.2, et al., and 17.0.

1 would be subject to voting as they relate to adoption or rejection of the changes.<sup>99</sup>

2 In other words, no vote is taken on whether a particular product or process change  
3 request should be implemented or not. Therefore, even if a change is universally  
4 opposed by CLECs, Qwest is still free to implement the change after the time  
5 period applicable to product and process changes has run its course. *See* CMP  
6 Document (Eschelon/53), Section 5.4. Although a CLEC may request that Qwest  
7 postpone a change, Qwest is the sole decision maker as to whether a  
8 postponement request is granted. If Qwest determines that it will not postpone  
9 the implementation of a proposed change, Qwest may implement the change  
10 thirty days after giving notice of its decision to deny the request to postpone.<sup>100</sup>

11 **Q. DOES QWEST IMPLEMENT MOST OF ITS OWN CHANGES**  
12 **THROUGH CHANGE REQUESTS?**

13 A. No. The vast majority of Qwest-initiated CMP changes are accomplished  
14 through Level 0-3 email notifications. When Qwest issues a Level 3 “Notice” to  
15 CLECs, indicating that it intends to implement a change, Qwest provides CLEC  
16 15 days to provide written comment on the proposed change. Qwest then  
17 responds to the CLECs’ comments. The CMP rules (in the CMP Document)  
18 allow Qwest to implement the proposed change no fewer than 15 days after it has  
19 provided its response to CLEC comments. If Qwest responds to CLEC

---

<sup>99</sup> Eschelon would have thought that Issue 12-87 would be an exception to this, as it relates to a systems issue and systems changes are at least ranked in CMP. Qwest has recently claimed that the Implementation Guidelines are not subject to CMP, despite CMP redesign history to the contrary. *See* discussion of Issue 12-87 in Ms. Johnson’s testimony.

<sup>100</sup> CMP Document Section 5.5.3.3.

1 comments immediately following the close of the CLEC comment period, Qwest  
2 can implement its proposed changes (notwithstanding any CLEC objections), 31  
3 days following its initial notification.

4 Therefore, CMP affords Qwest a “Notice and Go” capability, *i.e.*, if Qwest wants  
5 to make a change, it simply notices CLECs, solicits and then may deny their  
6 requests for modifications, and implements its proposed change in as little as 31  
7 days after initial notice.<sup>101</sup> At times, this can be the “sword” that Qwest wields  
8 through CMP, such as when Qwest dramatically restricted Eschelon’s ability to  
9 successfully order DS1 capable loops, simply by changing one-word in its PCAT  
10 through a Level 3 email notification (see the CRUNEC example discussed  
11 below). Specific contract language in the interconnection agreement would offer  
12 Eschelon some defense against this type of behavior on the part of Qwest and  
13 provide Eschelon with some much needed measure of control over its own  
14 business.

---

<sup>101</sup> As I use the term “notice and go,” the “go” in the “notice and go” allows Qwest to implement its proposed product or process change once the notice period is over (which is 31 days for a Level 3 Notice). No vote is taken regarding the product or process change and Qwest can reject objections from CLECs and implement the change. In other words, Qwest may “go” forward after the applicable notice period. Comments and objections are ineffectual if Qwest disagrees because it can implement its product and process changes even over unanimous CLEC opposition. [See CMP Document (Eschelon/53), Section 5.4. For example, in the CRUNEC example discussed below, the twelve active CLECs all unanimously objected, and Qwest moved forward anyway, until a state commission became involved. See Eschelon/56, Johnson/3-4] The issue is the ability of Qwest to move forward (*i.e.*, “go”) with its changes after issuing a notice of a product or process change, regardless of the comments or objections it may receive from CLECs.

1 Q. CAN CLECS EMPLOY THE SAME “NOTICE AND GO” APPROACH  
2 TO CHANGES THEY REQUEST IN CMP, OR IN DISPUTING A  
3 CHANGE ANNOUNCED BY QWEST?

4 A. No.<sup>102</sup> In contrast to the relatively quick “notice and go” process that is available  
5 to Qwest, if a CLEC disagrees with a change implemented by Qwest and desires a  
6 Commission determination to reverse the change, it may seek dispute resolution  
7 in each state affected by the change, but that is expensive and time consuming.<sup>103</sup>  
8 As part of a CMP dispute resolution, Eschelon filed a complaint against Qwest  
9 before the Arizona state commission in April of 2006.<sup>104</sup> In that case, Qwest  
10 argued vigorously against an October hearing date, citing its intent to conduct  
11 multiple depositions and other discovery as well as scheduling conflicts. On  
12 Qwest’s motion for reconsideration of the schedule, Qwest argued that six months  
13 to hear the single issue presented by the Complaint was so short an amount of  
14 time that Qwest had not even heard of rocket dockets proceeding that fast.<sup>105</sup> The

---

<sup>102</sup> CMP Document Sections 5.4.5, 5.4.5.1.

<sup>103</sup> CMP Document Sections 5.4, 15.0. Any recourse within CMP that has Qwest as a decision maker, regardless of format (escalation, *etc.*), does not accomplish the goal of obtaining an outside, enforceable decision to resolve the dispute between Qwest and Eschelon. A third party decision maker is available through Alternative Dispute Resolution, but the CMP Document expressly provides: “***Without the necessity for a prior ADR Process***, Qwest or ***any CLEC*** may submit the issue, following the commission’s established procedures, with the appropriate regulatory agency requesting resolution of the dispute. This provision is not intended to change the scope of any regulatory agency’s authority with regard to Qwest or the CLECs.” *Id.* (emphasis added).”

<sup>104</sup> See Complaint, *In re. Complaint of Eschelon Telecom of Arizona, Inc. Against Qwest Corporation*, ACC Docket No. T-01051B-06-0257, T-03406A-06-0257 (April 14, 2006) [“Arizona Complaint Docket”].

<sup>105</sup> AZ Complaint Docket, Transcript, Procedural Conference (July 27, 2006), at p. 18, lines 20-24 (Counsel for Qwest stated: “So the whole point is, we look at this scheduling question as one that is perplexing; that why is it that we are moving -- I mean I’ve been involved in rocket dockets. I’ve never seen a case that goes from beginning to end within this period of time that we’ve proposed in this case, and maybe there’s cases here that I’m unaware of. None in my experience.”)

1 hearing date was extended to February of 2007 – ten months after filing of the  
2 Complaint – with Qwest expressing an intention to conduct additional discovery  
3 during the intervening months. It has been extended again until August of 2007.  
4 This is a far cry from the 31 day notice-and-go process available only to Qwest.  
5 This case exemplifies that time required for a CLEC to obtain a result through  
6 CMP dispute resolution is much longer than the time in which Qwest can  
7 accomplish changes through Level 3 CMP notifications. Qwest’s expressed  
8 intent to conduct multiple depositions and other discovery in that case is also an  
9 example of the expense and resources that a CLEC in dispute resolution will  
10 experience that Qwest does not with its quick and easy notification process. It is  
11 clear that CMP dispute resolution is not a salve for all ills, particularly for issues  
12 that a CLEC has already spent the time and resources necessary to bring before  
13 the Commission through arbitration in an exercise of its Section 252 rights (as is  
14 the case here).

15 In addition, there may be some misimpression that there is a “special” process for  
16 CMP dispute resolution that offers benefits beyond a typical individual complaint  
17 case. That is not the case, as dispute resolution under CMP works much like  
18 dispute resolution under other provisions of the ICA, and may result in an  
19 individual CLEC filing a complaint against Qwest before the Commission, as  
20 with any other complaint. Any reference to “CMP” dispute resolution for issues  
21 involving “multiple” CLECs should not be construed to mean there is a special  
22 “multiple CLEC” CMP dispute resolution process. While companies may opt to

1 jointly bring complaints or intervene in them under Commission rules, those rules  
2 are no different for CMP.

3 The dispute resolution terms of the CMP Document are few and simple. When an  
4 individual CLEC disagrees with a Qwest action in CMP, the CMP Document  
5 contains dispute resolution procedures that provide that an individual CLEC “*may*  
6 pursue the dispute resolution processes...”<sup>106</sup> The dispute resolution procedures  
7 in the CMP Document are expressly qualified by the following statement: “This  
8 process does not limit any party’s right to seek remedies in a regulatory or legal  
9 arena at any time.”<sup>107</sup> Section 252 arbitration, for example, is one such  
10 “regulatory or legal arena” that a CLEC may pursue unhindered by the dispute  
11 resolution provisions of the CMP Document.

12 b. EXAMPLES: QWEST VACILLATES OR MANEUVERS  
13 ON CMP

14 **Q. WITH THAT BACKGROUND INFORMATION TO HELP EXPLAIN**  
15 **THE CMP TERMINOLOGY AND PROCEDURES, PLEASE PROVIDE**  
16 **THE FOUR EXAMPLES YOU MENTIONED EARLIER.**

17 A. As I mentioned previously, the four examples below illustrate that Qwest either  
18 has had trouble in the past identifying issues that are inherently tied to CMP, or  
19 Qwest chooses when to label certain issues as inherently relating to CMP for its  
20 own convenience or to achieve a particular purpose. I will refer to the four

---

<sup>106</sup> See CMP Document Section 15.0 (emphasis added).

<sup>107</sup> See CMP Document Section 15.0.

1 examples as CRUNEC, Design Changes, Minnesota 616, and Secret TRRO  
2 PCATs.<sup>108</sup> I present an accurate explanation of each example and Ms. Johnson  
3 provides supporting documentation, including detailed chronologies, for three of  
4 these examples (*see* Eschelon/56, Eschelon/90, and Eschelon/59 attached to Ms.  
5 Johnson’s direct testimony), which allows for an independent review of the facts  
6 of these examples. To avoid voluminous filings of many exhibits, Eschelon has  
7 made efficient and proper use of summary information (such as chronologies) and  
8 excerpts (such as quotations from documents in those chronologies), while  
9 providing sufficient information (including URLs to information on Qwest’s own  
10 website) to allow further review of the entire documents (many of which were  
11 prepared by Qwest) if desired.

12 **i. CRUNEC EXAMPLE**

13 **Q. PLEASE DESCRIBE THE CRUNEC EXAMPLE RELATING TO**  
14 **SPECIAL CONSTRUCTION CHARGES.**

15 A. The first example involves a change that Qwest implemented through CMP  
16 relating to special construction charges, which Qwest calls “CLEC Requested  
17 UNE Construction” or “CRUNEC.”<sup>109</sup> Generally, special construction is not  
18 required to provide UNEs except in those situations when other alternatives have  
19 been exhausted and no facilities are available to provide the requested service.  
20 The other alternatives that Qwest must perform before indicating there are no

---

<sup>108</sup> As indicated above, Qwest’s handling of Jeopardies is another excellent example. Ms. Johnson discusses this example in her testimony relating to Issues 12-71 – 12-73.

<sup>109</sup> See Eschelon/56 – Eschelon/58.

1 facilities include work that has been referred to as “Incremental Facility Work.”  
2 For example, Section 9.1.2.1.2 of the SGAT provides: “If cable capacity is  
3 available, Qwest will complete incremental facility work (*i.e.*, conditioning, place  
4 a drop, add a network interface device, card existing subscriber Loop carrier  
5 systems at the Central Office and remote terminal, add Central Office tie pairs,  
6 add field cross jumpers) in order to complete facilities to the Customer premises.”

7 If, after exploring all alternatives including “Incremental Facility Work,” facilities  
8 are still not available, these are “no-build situations.” No-build situations exist  
9 when Qwest will not build for CLECs because it would likewise not build for  
10 itself for the normal charges assessed to its customers. However, for “special”  
11 additional charges associated with the cost of building facilities, Qwest will build  
12 facilities when the CLEC submits an application and agrees to pay those higher  
13 charges through the process that Qwest calls “CRUNEC.” Eschelon does not use  
14 the relatively time-consuming and expensive special construction, or CRUNEC,  
15 process.

16 On April 30, 2003, Qwest sent to all participating CLECs a Level 3 (“notice and  
17 go”) CMP notification, indicating an effective date of June 16, 2003, for a one-  
18 word change to its PCAT. The notice said:

19 Qwest is modifying/changing the existing manual process by  
20 removing conditioning as a limiting factor of the CRUNEC

1           [“CLEC Requested UNE Construction”] process as it relates to  
2           DS1 Capable Loops when facilities are not available.<sup>110</sup>

3           Specifically, via this email notification, Qwest revised the PCAT dealing with  
4           special construction for UNEs so as to remove the word “conditioning” from the  
5           definition of “Incremental Facility Work” as follows:

6                   Incremental Facility Work: Completing facilities to an end-user’s  
7                   premises (*e.g.*, ~~Conditioning~~, Place a drop, add a Network  
8                   Interface Device (NID), Central Office (CO) tie pairs, field cross-  
9                   connect jumpers, or card in existing Subscriber Loop Carrier  
10                  systems at the CO and Remote Terminal).<sup>111</sup>

11          Qwest sends a substantial number of email notifications about a wide variety of  
12          issues and products (some of which, like CRUNEC, Eschelon generally does not  
13          order). Eschelon has to sift through the Qwest notifications for those impacting  
14          its business and has little reason to review those relating to CRUNEC (so was  
15          surprised, as discussed below, to find that such a notice could significantly impact  
16          its business).

17          On May 13, 2003, Covad objected to Qwest’s revision, expressing concerns as to  
18          how this relatively minor-looking change might be implemented by Qwest in  
19          undertaking conditioning activities used by Covad on a regular basis. Covad  
20          indicated its concerns were rooted in the fact that the section of the PCAT from  
21          which the word “conditioning” was being removed was a list of activities Qwest  
22          would undertake *without* the need for the special construction (CRUNEC) process

---

<sup>110</sup> PROS.04.30.03.F.011071.CRUNEC. For further details, *see* Eschelon/56 and Eschelon/57 to the Testimony of Ms. Johnson.

<sup>111</sup> [http://www.qwest.com/wholesale/downloads/2003/030430/PCAT\\_CRUNEC\\_V4\\_1.doc](http://www.qwest.com/wholesale/downloads/2003/030430/PCAT_CRUNEC_V4_1.doc)

1 – *i.e.*, activities Qwest would perform in the normal course of providing UNEs *at*  
2 *no additional charge*.<sup>112</sup> Therefore, the likely impact of Qwest’s change would be  
3 to require additional costly special construction (CRUNEC) charges for  
4 conditioning activities in situations in which CRUNEC-related charges were not  
5 required before (*i.e.*, previously, Qwest had conditioned loops in the normal  
6 course of provisioning without additional charge).

7 On May 21, 2003, Qwest “respectfully declined” Covad’s comments. Instead of  
8 answering Covad’s concern, Qwest’s response to Covad in its entirety said:

9 Removal of the word “conditioning” from the PCAT language  
10 allows the CLEC to use CRUNEC for the build process of  
11 products where before they could not. Current products that have  
12 conditioning at no charge will not be affected. Qwest respectfully  
13 declines this comment.<sup>113</sup>

14 Qwest’s proposed change went into effect, as Qwest planned, on April 30, 2003,  
15 with no delay as a result of Covad’s expressed concerns. As indicated below,  
16 only later did Eschelon and other CLECs learn that, by extending the so-called  
17 opportunity to CLECs “to use CRUNEC for the build process of products where  
18 before they could not,” Qwest was, through its CMP email notification, actually  
19 requiring CLECs to pay special construction charges (*i.e.*, “use CRUNEC”) in  
20 situations when before they paid no additional charges pursuant to their  
21 interconnection agreements.

<sup>113</sup> [http://www.qwest.com/wholesale/downloads/2003/030521/CNL3\\_response\\_CRUNEC\\_V4.doc](http://www.qwest.com/wholesale/downloads/2003/030521/CNL3_response_CRUNEC_V4.doc)

1 **Q. DID QWEST'S CHANGE TO ITS PCAT CAUSE UNEXPECTED**  
2 **PROBLEMS FOR ESCHELON AND ITS END USER CUSTOMERS?**

3 A. Yes, though at first it was unclear that Qwest's CMP notice was the cause of the  
4 problem. There was no apparent reason to associate the two events. As I said  
5 earlier, Eschelon did not use the special construction (CRUNEC) process, so it did  
6 not expect changes in that process to affect its business. Almost immediately  
7 after the effective date of Qwest's unilateral email notification, however,  
8 Eschelon began experiencing a dramatic spike in the number of held orders  
9 relative to DS1 loops ordered from Qwest. Early on, Eschelon reported receiving  
10 more than *four times* the number of these held order notices in 25 days than it had  
11 received in the previous 170 days.<sup>114</sup> When an order goes "held," it is delayed, so  
12 the End User Customer does not receive service on the expected due date or, if  
13 cancelled, not at all. Therefore, inappropriate held orders are a serious  
14 competitive issue.

15 **Q. DID ESCHELON IMMEDIATELY NOTIFY QWEST WHEN IT**  
16 **NOTICED THAT THE NUMBER OF DS1 HELD ORDERS HAD SPIKED?**

17 A Yes. Eschelon queried Qwest as to the substantial increase in held orders via  
18 several emails, such as those attached to Ms. Johnson's testimony. Qwest  
19 responded that the increase was likely due to the CMP change identified above,  
20 and admitted that the effect of its CMP notice was to implement a new Qwest

---

<sup>114</sup> Eschelon's Comments Regarding Staff Second Report, ACC Docket No. T-00000A-97-0238 (July 18, 2003), p. 5.

1 policy related to “charging” for certain activities for which it had assessed no  
2 charges in the past. Qwest said:

3 Qwest has in the past not fully enforced our contractual right to  
4 collect on the charges incurred when completing DS1 level  
5 unbundled services. Charging is the specific change that has  
6 occurred.<sup>115</sup>

7 Recall that rates and the application of rates are outside the scope of Qwest’s  
8 CMP process. Although Eschelon and Qwest disagree about what all this means  
9 and how Qwest implements it, Qwest admits that “discussion around rates  
10 associated with an Interconnection Agreement are outside the scope of the CMP  
11 process.”<sup>116</sup> In addition, Qwest has acknowledged that, in the meetings in which  
12 CMP procedures were developed (known as CMP “Re-Design”), “it was agreed  
13 that discussions on rate change were not in the scope of CMP.”<sup>117</sup> Nonetheless,  
14 through its email notification, Qwest had revised the PCAT, via CMP, so that it  
15 could “enforce [its] contractual rights” to assess charges by requiring use of  
16 Qwest’s CRUNEC process that it had not, in the past, assessed. I find it  
17 interesting here that Qwest used its CMP notice to enforce “contractual” rights  
18 that can only be interpreted as referring to an ICA (that is the primary contract  
19 dictating terms between Qwest and CLECs). In other words, even though the

<sup>116</sup> See Eschelon/93 (Expedite Chronology, quoting Qwest’s response sent by email on November 7, 2005 (and dated November 4, 2005), to McLeod-Eschelon escalation. See [http://www.qwest.com/wholesale/downloads/2005/051104/Qwest\\_Response\\_to\\_Escalation\\_39\\_McLeodUSA.doc](http://www.qwest.com/wholesale/downloads/2005/051104/Qwest_Response_to_Escalation_39_McLeodUSA.doc)

<sup>117</sup> See CMP Meeting Minutes (May 12, 2002); see <http://www.qwest.com/wholesale/downloads/2002/020614/ProductProcessCMPMeetingDistributionPackage06-19-02.pdf>

1 ICA is meant to govern when there are conflicts between an ICA and a CMP  
2 notice, Qwest purposefully used a CMP notice to implement a change in policy  
3 related to interpreting its ICAs.

4 Perhaps more importantly, however, is the fact that Qwest's use of CMP held up  
5 Eschelon's DS1 End User Customers relative to their normally-scheduled due  
6 dates. The orders went on hold, even though the ICA under which Eschelon and  
7 Qwest were operating had not changed (nor had the SGAT, quoted above). As  
8 leverage to obtain those higher charges, Qwest refused to provide facilities unless  
9 Eschelon and other CLECs requested special construction through "CRUNEC."  
10 The interval for a DS1 capable loop is nine business days in Oregon. Under  
11 Qwest's "CRUNEC" process, there are 3-, 2-, 5-, and 30-day intervals for various  
12 activities associated with obtaining a quote before construction even begins.<sup>118</sup>  
13 The interval to actually construct the facilities is unknown because the interval is  
14 Individual Case Basis ("ICB").<sup>119</sup> Even assuming a CLEC were willing to pay the  
15 expensive CRUNEC charges, the impact on serving the customer in a timely  
16 fashion is unacceptable when the CRUNEC process should not be required at all.

17 Before issuing its CMP notice, Qwest routinely performed "Incremental Facility  
18 Work" using UNE intervals and at no additional charge. This shows that Qwest  
19 had the capability to make facilities available in this way but had, through its  
20 "notice," simply chosen not to. Qwest's one-word CMP notice was just a means

---

<sup>118</sup> See <http://www.qwest.com/wholesale/clecs/crunec.html>

<sup>119</sup> See *id.*

1 by which Qwest implemented a rate hike – using CMP as the vehicle to do so and  
2 causing End User Customer delays for Eschelon’s customers as the manner by  
3 which to force payment.

4 **Q. WERE COVAD AND ESCHELON THE ONLY CLECS TO OBJECT?**

5 A. No. Twelve CLECs were active in CMP, and all twelve joined in escalating  
6 Qwest’s conduct in CMP.<sup>120</sup> Qwest implemented the change in its notice in CMP  
7 over the strenuous objection of all of these active CLEC CMP participants.  
8 CLECs then had to complain to the Arizona commission, which still had an open  
9 271 proceeding at the time.

10 **Q. DID THE ARIZONA COMMISSION AGREE WITH ESCHELON?**

11 A. Yes. In a September 16, 2003 Order in the 271 Docket, Docket No. T-00000A-  
12 97-0238 (Decision No. 66242), the Arizona commission agreed with its Staff’s  
13 position, as outlined in a Staff report, that Qwest should suspend its new policy  
14 and not change rates in this manner, in the context of CMP. Specifically, the  
15 Commission said:

16 109. Staff agrees with Eschelon with respect to the recently  
17 imposed construction charges on CLECs for line conditioning.  
18 Staff is extremely concerned that Qwest would implement such a  
19 significant change through its CMP process without prior  
20 Commission approval. As noted by AT&T, during the Section 271  
21 proceeding, the issue of conditioning charges was a contested

---

<sup>120</sup> On August 15, 2003, Allegiance, AT&T, Cbeyond, Contact Communications, Covad, Eschelon, MCI, McLeodUSA, MTI, Tel-West, Time Warner Telecom, and US Link proposed a resolution (the "12-CLEC Proposal"), to be discussed on the August 15th ad hoc CMP conference call, with respect to the CMP process, CRUNEC and CMP notices PROS.04.30.03.F.01071.CRUNEC\_ V4.0, PROS.05.21.03.F.01089.FNL\_CRUNEC, PROD.07.11.03.F.03468.UNECCRUNEC\_V5.0, and PROD.08.06.03.F.03494.DelayedResponseCRUNEC.

1 issue. Language was painstakingly worked out in the Qwest SGAT  
2 dealing with the issue of line conditioning which Qwest's new  
3 policy is at odds with. Staff recommends that Qwest be ordered to  
4 immediately suspend its policy of assessing construction charges  
5 on CLECs for line conditioning and reconditioning and  
6 immediately provide refunds to any CLECs relating to these  
7 unauthorized charges. Qwest should reinstitute its prior policy on  
8 these issues as reflected in its current SGAT. If Qwest desires to  
9 implement this change, then it should notify the Commission in  
10 Phase III of the Cost Docket, but must obtain Commission  
11 approval of such a change prior to its implementation. To the  
12 extent Qwest does not agree to these conditions, Staff recommends  
13 that Qwest's compliance with Checklist Items 2 and 4 be reopened.  
14 We agree with Staff.

15 **Q. SINCE THE TIME OF THIS EXAMPLE, HAS THE FCC CONFIRMED**  
16 **THAT QWEST MUST PERFORM THIS TYPE OF INCREMENTAL**  
17 **FACILITY WORK FOR ESCHELON AND OTHER CLECS?**

18 A. Yes. In its *Triennial Review Order* (“TRO”), the FCC confirmed that Qwest (and  
19 other ILECs) must make “routine network modifications” on behalf of CLECs  
20 ordering UNEs, under the same terms and conditions by which they undertake  
21 those same types of modifications for themselves and their own retail  
22 customers.<sup>121</sup> In other words, only if Qwest forces its own customers into a time  
23 consuming and expensive construction process to build new facilities in the same  
24 circumstances (which it does not), would the same treatment for CLECs be  
25 justified. Therefore, Qwest’s initial observation that it was not “fully enforcing”  
26 its rights to hold orders and apply charges for these types of “conditioning”

---

<sup>121</sup> Report and Order and Order on Remand, *Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers*, 18 FCC Rcd 16978 (2003), *vacated in part and remanded*, *USTA v. FCC*, 359 F.3d 554 (D.C. Cir.), *cert. denied*, 125 S.Ct. 313, 316, 345 (2004) (“TRO”) at ¶¶ 630-648.

1 activities<sup>122</sup> was mistaken from the outset – an issue Eschelon would almost  
2 certainly have raised if Qwest had been required to address the issue with  
3 Eschelon via negotiations or a contract amendment.

4 **Q. WHAT SHOULD THE COMMISSION TAKE AWAY FROM THIS**  
5 **EXAMPLE WITH RESPECT TO ADOPTION OF ICA LANGUAGE?**

6 A. Qwest, through its CMP notice described above, knew it was changing the  
7 manner in which it processed and assessed charges related to CLEC orders. It is  
8 clear that the process Qwest wanted to implement (*i.e.*, assessing additional  
9 charges for conditioning) was inconsistent with the current language in its PCAT  
10 – language that needed to be changed in order to square with Qwest’s intentions.  
11 Because that language was in the PCAT, and not specified in an ICA at a  
12 necessary level of detail, Qwest was able to implement that change unilaterally  
13 and over the objection of its multiple CLECs. This change substantially  
14 undermined Eschelon’s existing business processes and caused real-world orders  
15 to fail and Eschelon End User Customers to be delayed or go without service. If  
16 contract language in an ICA had governed this issue in more detail, Qwest could  
17 not so easily, or independently, have changed its policy (or its “contractual  
18 rights”) regarding this issue. Qwest would have had to offer the change in  
19 language to Eschelon, explain its intentions, and negotiate or arbitrate an  
20 amendment with Eschelon. Had Qwest been required to follow this approach,  
21 Eschelon’s End User Customers would not have been held up and the dramatic

---

<sup>122</sup> Qwest (Teresa Taylor) email to Eschelon (July 3, 2003).

1 spike in Eschelon’s DS1 related “held orders” (each one representing an Eschelon  
2 End User Customer whose service is delayed) could have been avoided while the  
3 issue was debated.

4 Instead, Eschelon and other CLECs had to rush to a state commission in a crisis  
5 mode, while End User Customers were being negatively affected, and request  
6 speedy relief. Fortunately, Arizona happened to have an open 271 proceeding in  
7 which comments were soon due. The alternative today, without 271 proceedings,  
8 would be for each objecting CLEC to incur the expense of filing one or more  
9 complaints before the state commissions, under the CMP or ICA dispute  
10 resolution provisions (or both), asking the commissions for expedited relief.  
11 Inclusion of specific ICA language in the contract on open issues as a result of  
12 this arbitration will help avoid disputes and these kinds of crisis situations that  
13 require expedited action from the Commission.

14 **ii. DESIGN CHANGES EXAMPLE**

15 **Q. PLEASE DESCRIBE THE DESIGN CHANGES EXAMPLE.**

16 A. The substantive discussion of Issue 4-5, Design Changes, is contained in the  
17 testimony of Mr. Denney. I discuss the issue here because Qwest’s treatment of  
18 its proposed language for Issue 4-5 Design Changes is another example of  
19 Qwest’s directing – or, inconsistently, not directing – issues to CMP, to its own  
20 advantage (and the corresponding disadvantage) of CLECs. Consequently, the

1 issue highlights the need for the certainty of ICA language to govern the  
2 Qwest/Eschelon business relationship for the years to come.

3 A design change is a change in circuit design after engineering review that allows  
4 a CLEC to change a service previously requested without the unnecessary delay  
5 and cost involved in canceling and re-submitting the request. Qwest provided  
6 design changes to Eschelon without additional charge from the inception of the  
7 Qwest/Eschelon ICA until September 1, 2005. On that date, Qwest issued a  
8 unilateral, non-CMP announcement addressing two things that would occur in one  
9 month's time: (1) Qwest would commence billing CLECs new (non-Commission-  
10 approved) non-recurring charges for design changes to Unbundled Loop  
11 circuits;<sup>123</sup> and (2) Qwest would use a new definition of "design change."<sup>124</sup>  
12 When Eschelon inquired about these changes, Qwest CMP personnel responded  
13 that "this item is outside the scope of CMP."<sup>125</sup> While this statement would be  
14 correct regarding rates (which clearly do not belong in CMP), it does not answer  
15 the fact that Qwest chose to address the *definition* of design changes (a non-rate or  
16 rate application issue) outside the CMP, and also chose to unilaterally establish  
17 new rates not only outside CMP but without benefit of Commission review or  
18 approval.

---

<sup>123</sup> Eschelon/10, September 1, 2005 letter from Qwest with the subject line "Billing for design changes on Unbundled Loop."

<sup>124</sup> In its September 1, 2005 letter, Qwest stated that design changes include the following activities: Connecting Facility Assignments (CFA) change, Circuit Reference (CKR) change, CKL 2 end user address change on a pending LSR, Service Name (SN) change, and NC/NCI Code change on a pending LSR.

<sup>125</sup> See, Eschelon/11, Denney/3.

1 Qwest then changed its position when it developed its position on design changes  
2 for arbitration. In its Minnesota position statement for the definition of design  
3 change (which was an open issue at the time) submitted with the first Disputed  
4 Issues Matrix submitted in arbitration, Qwest stated that:

5 Qwest agrees that there needs to be a common understanding of  
6 this definition, but this definition concerns a process that affects all  
7 CLECs, not just Eschelon. The entire purpose of CMP was to  
8 ensure that the industry (not just Qwest or one CLEC) is involved  
9 in creating and approving processes so that processes are uniform  
10 among all CLECs. Processes that affect all CLECs should be  
11 addressed through CMP, not through an arbitration involving a  
12 single CLEC. Further, implementing a unique process for Eschelon  
13 that Qwest does not follow for other CLECs would require Qwest  
14 to modify its systems or processes and would cause Qwest to incur  
15 costs it is entitled to recover under the Act.

16 Despite taking this position, Qwest then proceeded to agree to a definition of  
17 “design change” in the Eschelon arbitration – outside of the CMP – that differs  
18 markedly from the definition that it introduced in its September 2005 non-CMP  
19 letter to all CLECs.<sup>126</sup> Qwest’s vacillation on the treatment of a significant issue  
20 such as the governing definition for design changes illustrates the need for ICA  
21 contract language to govern dealings between Eschelon and its wholesale  
22 provider.

---

<sup>126</sup> *Compare*, the closed definition of Design Changes, which states in part that, “Design change does not include modifications to records without physical changes to facilities or services, such as changes in the circuit reference (CKR)...or Service Name (NM)...” *with* the definition in Qwest’s September 1, 2005 letter, which states in part: “Among the charges for the design changes that will be billed, the following activities will generate a non-recurring design change charge per occurrence:...”Circuit Reference (CKR) change”...”Service Name (SN) change...” As Mr. Denney discusses further in his testimony, the jury is still out regarding Qwest’s actual application of the agreed upon new definition.

1 Qwest's treatment of the design change rate issue that arose in its unexpected  
2 non-CMP notice in September, 2005, is similarly illustrative of the need for  
3 certainty that only contract language can bring. In the September 1, 2005, notice,  
4 Qwest stated that it would "commence billing CLECs non-recurring charges for  
5 design changes to Unbundled Loop circuits" beginning in one month's time.<sup>127</sup>  
6 Qwest provided no basis for the sudden imposition of a new rate, indicating only  
7 that it would bill CLECs "at the rate found in the miscellaneous elements of  
8 Exhibit A or the specific rate sheet in your Interconnection agreement."<sup>128</sup> Such a  
9 reference would seem to presuppose support for the rate in the ICA, but, in fact,  
10 the only mention of design change charges in relevant governing documents is at  
11 Section 9.6.4.1.4 of the SGAT, which provides for design change charges not for  
12 loops but for "Unbundled Dedicated Interoffice Transport" (UDIT). In  
13 Minnesota, Qwest then admitted that there is no rate for design changes for loops.  
14 Ms. Stewart's rebuttal testimony in the Minnesota arbitration confirmed that the  
15 rates for design changes for loops Qwest implemented via a mere letter leapt  
16 straight from Qwest's business plans to its CLEC billings: "...neither Qwest's  
17 SGAT nor the parties' current ICA includes a design change charge for loops."<sup>129</sup>  
18 As Mr. Denney explains in his testimony, such an admission warrants Qwest's

---

<sup>127</sup> Eschelon/10, September 1, 2005 letter from Qwest with the subject line "Billing for design changes on Unbundled Loop."

<sup>128</sup> *Id.*

<sup>129</sup> Rebuttal Testimony of Karen Stewart on behalf of Qwest Corp. Minnesota PUC Docket No. P-5340, 421/IC-06-768; OAH Docket No. 3-2500-17369-2. September 22, 2006, p. 6, lines 27-28 ("Mr. Denney is correct in stating that neither Qwest's SGAT nor the parties' current ICA includes a design change charge for loops.").

1 promptly crediting CLECs for the unsupported design change charges it has billed  
2 CLECs since October, 2005. Yet, despite Qwest's admission, Qwest continues to  
3 bill those charges, which Eschelon disputes.

4 **Q. WHAT SHOULD THE COMMISSION CONCLUDE FROM THIS**  
5 **EXAMPLE?**

6 A. Qwest's treatment of design change definition and charges shows that Eschelon  
7 must have contract language upon which it may fairly depend in its dealings with  
8 Qwest, and that Qwest's on-again, off-again reliance on CMP is in no way a  
9 substitute.

10 iii. MINNESOTA 616 EXAMPLE

11 **Q. TO WHAT DOES THE TERM "MINNESOTA 616" REFER?**

12 A. "Minnesota 616" refers to the last digits of the docket number for two Minnesota  
13 Public Utilities Commission ("PUC") orders dated 7/31/03 and 11/12/03 from the  
14 docket entitled *In The Matter of a Request by Eschelon Telecom for an*  
15 *Investigation Regarding Customer Conversion by Qwest and Regulatory*  
16 *Procedures* [Minnesota PUC Docket P-4211C-03-616 ("MN 616 orders")]. The  
17 abbreviated docket number is any easy, shorthand way to refer to the case that  
18 also avoids use of confidential customer-identifying information (as the name of  
19 the end user customer involved in that case is confidential information).

20 Eschelon has proposed contract provisions for its Oregon ICA that reflect

1 procedures adopted in the Minnesota 616 case by the Minnesota commission,<sup>130</sup>  
2 which also adopted Eschelon’s language for Issue 12-64 and subparts in the  
3 Minnesota arbitration.<sup>131</sup> The Minnesota Commission ordered Qwest to create  
4 procedures for acknowledging mistakes related to Qwest’s errors that affect  
5 CLEC’s End User Customers. Specifically, the Minnesota Commission said:

6 Within 30 days of the date of this Order, Qwest shall make a  
7 compliance filing detailing its proposal for remedying the service  
8 inadequacies identified in this Order. This proposal shall include  
9 ... (b) procedures for promptly acknowledging and taking  
10 responsibility for mistakes in processing wholesale orders; (c)  
11 procedures for reducing errors in processing wholesale orders,  
12 including a report on the feasibility of maximizing reliance on  
13 electronic processing, with an explanation of the necessity for each  
14 manual operation required for wholesale order processing.<sup>132</sup>

15 In a situation in which the End User Customer requests a written  
16 acknowledgement of the error causing the service disruption, Qwest should be  
17 required to acknowledge its mistake. As the Minnesota Commission observed,  
18 “Providing adequate wholesale service includes taking responsibility when the

---

<sup>130</sup> See the discussion of Issue 12-64 in the testimony of Ms. Johnson. *See also* Eschelon/88 – Eschelon/91 (attached to the testimony of Ms. Johnson). In its position statement, Qwest argued that Eschelon’s proposed language is inappropriately expands the scope of the Minnesota 616 Orders, stating: “the Minnesota ruling Eschelon relies upon is flawed, Eschelon’s proposed language significantly expands the effect of the ruling by encompassing not just problems involving orders, but multiple other potential situations.” *See* Exhibit 3 to Arbitration Petition, Joint Disputed Issues Matrix, Qwest position statement, pp. 162-163. The Minnesota commission’s adoption of Eschelon’s language indicates the commission disagrees regarding the scope of its own order. *See* Eschelon/29, Denney (MN Arbitrators’ Report ¶208). In any event, there is no reason that an ICA provision that will apply on a going forward basis needs to be limited to the scope of the single example in that case. The example demonstrates the need for ICA language.

<sup>131</sup> Eschelon/30, Denney 23 [MN PUC Arbitration Order, p. 23, ¶4 (Topic 27)]. *See* the discussion of Issue 12-64 in the testimony of Ms. Johnson. *See also* Eschelon/88 – Eschelon/91 (attached to the testimony of Ms. Johnson).

<sup>132</sup> Order Finding Service Inadequate and Requiring Compliance Filing, *In the Matter of a Request by Eschelon Telecom for an Investigation Regarding Customer Conversion by Qwest and Regulatory Procedures*, MN PUC Docket No. P-421/C-03-616. July 30, 2003, p. 9 [“MN 616 Order”], *see* Eschelon/5, Starkey/14.

1 wholesale provider's actions harm customers who could reasonably conclude that  
2 a competing carrier was at fault. Without this kind of accountability and  
3 transparency, retail competition cannot thrive. Telecommunications is an  
4 essential service, and few customers will transfer their service to a competitive  
5 carrier whose service quality appears to be inferior to the incumbent's."<sup>133</sup>

6 Eschelon's need to protect against harm to its business and its reputation is as  
7 great in Oregon as it is in Minnesota; the Oregon Commission should therefore  
8 consider and adopt the reasonable measures proposed by Eschelon, for the  
9 reasons further described by Ms. Johnson regarding Issues 12-64 and subparts  
10 (Root Cause and Acknowledgement of Mistakes). I raise the Minnesota 616 case  
11 here with respect to Qwest's position on CMP. Ms. Johnson describes the facts  
12 of the case in her direct testimony.<sup>134</sup>

13 **Q. ARE THE FACTS OF THE MINNESOTA 616 CASE UNUSUAL?**

14 A. The unusual aspect of these facts is the "smoking gun" nature of the evidence.  
15 Usually, a CLEC may learn of such Qwest Wholesale-Qwest Retail contacts, or  
16 believe based on a course of events that they have occurred, but cannot prove  
17 Qwest's conduct. Rarely are the contacts in writing (as happened in the  
18 Minnesota 616 case) or, if they are written and provided to Customers, the  
19 Customers may not want to be caught in the middle by providing copies to the

---

<sup>133</sup> Eschelon/5, Starkey/13.

<sup>134</sup> The 616 case is also described in the Minnesota Arbitrators' Report ¶¶204-208 (Eschelon/29, Denney/50-52).

1 CLEC. The absence of the “smoking gun” evidence in these more typical cases,  
2 however, does not mean that Qwest’s errors and improper Wholesale-Retail  
3 contacts, such as those demonstrated in the above example, do not occur.

4 Another example occurred just recently, when a Qwest End User Customer  
5 decided to switch to Eschelon. After Eschelon submitted the conversion order to  
6 Qwest Wholesale, this Customer received a letter from Qwest’s Retail group<sup>135</sup>--  
7 while its order to switch to Eschelon was still pending. The letter begins: “Thank  
8 you for once again putting your trust in Qwest. We’re pleased to continue  
9 bringing you the quality and reliability you demand . . . .” It then asked the End  
10 User Customer to “please verify your order details listed at left and review the  
11 enclosed instructions.” The order number given in the letter is the *Eschelon* order  
12 number for Eschelon’s order submitted to Qwest to switch the Customer to  
13 Eschelon. (In other words, Qwest is asking the Customer switching to Eschelon  
14 to verify whether Eschelon placed the order correctly.)

15 Carriers cannot use Customer Proprietary Network Information (“CPNI”) to  
16 attempt to retain a customer “during the time subsequent to the customer’s  
17 placement of an order to change carriers and prior to the change actually taking  
18 place.” The FCC has specifically found that this is anti-competitive:

---

<sup>135</sup> See Eschelon/88 to the Testimony of Ms. Johnson (Qwest’s Retail letter to Eschelon’s End User Customer) and Eschelo/89 and Eschelon/90 (Email exchange and chronology of the events associated with this incident).

1 “[C]ompetition is harmed if *any* carrier uses carrier-to-carrier information, *such*  
2 *as switch or PIC orders*, to trigger retention marketing campaigns.”<sup>136</sup>

3 Furthermore, at a minimum, if Qwest’s letter ended with the above quoted request  
4 for order verification from Qwest Retail, it would still create customer confusion.  
5 The letter proceeds, however, with a fairly undisguised winback message: “As  
6 your communications needs expand and change, you know you can call us at 1-  
7 800-997-9378.” Although the letter invited the End User Customer to call Qwest,  
8 the End User Customer in this case did not initiate contact with Qwest. Instead,  
9 *Qwest’s Retail Business Office called the End User Customer directly about*  
10 *Eschelon’s wholesale order*. Qwest’s Retail Business Office told the End User  
11 Customer that the service would be disconnected at Eschelon’s request. Qwest’s  
12 Retail Business Office neglected to tell the End User Customer that his service  
13 would be transferred to Eschelon, so service disruption would *not* occur.  
14 Naturally, the End User Customer was extremely concerned and informed  
15 Eschelon that he was considering canceling his request of the service transfer to  
16 Eschelon. Only after Eschelon explained to the Customer that the Customer  
17 would not be losing service, despite Qwest’s use of the term “disconnect,” did the  
18 Customer agree to proceed with the service transfer. Clearly, had the Customer  
19 not contacted Eschelon to check the distorted “facts” presented by Qwest’s Retail  
20 group, Eschelon would not know why the Customer changed his mind, and why  
21 Qwest accomplished an improper “winback” so quickly. Eschelon requested a

---

<sup>136</sup> See Order on Reconsideration and Petitions for Forbearance, FCC 99-223, CC Docket No. 96-149; Adopted August 16, 1999; Released September 3, 1999 (“CPNI Order”), at ¶69, 76.

1 root cause analysis on this incident, to which Qwest responded that Qwest's  
2 contact with this customer switching to Eschelon was incorrect and the result of  
3 "human error."<sup>137</sup> Although Qwest proposes exclusion of all of Eschelon's  
4 proposed language for Issue 12-64 and subparts from the ICA, incidents like this  
5 further bolster the need for inclusion of Eschelon's language in the ICA to prevent  
6 such incidents.

7 **Q. IS QWEST'S HANDLING OF THE PROCEDURES ORDERED BY THE**  
8 **MINNESOTA COMMISSION IN THE 616 CASE CONSISTENT WITH**  
9 **ITS POSITION ON CMP?**

10 A. No. Qwest chose not to implement the Minnesota Commission-ordered product  
11 and process procedures through CMP (for Minnesota or any state) or to inform  
12 other CLECs via CMP of the availability of such acknowledgments and how and  
13 when to obtain them. The CMP Document outlines procedures for initiating a  
14 Change Request (known as a "Regulatory CR") in CMP when a regulatory  
15 agency orders Qwest to make a change,<sup>138</sup> as well as for Qwest to voluntarily  
16 initiate a change request if not mandated.<sup>139</sup> A change may be implemented on a

---

<sup>137</sup> See Eschelon/90, Johnson/3 (8/24/06 entry).

<sup>138</sup> The CMP Document defined a regulatory change request as follows: "A Regulatory Change is mandated by regulatory or legal entities, such as the Federal Communications Commission (FCC), a state commission/authority, or state and federal courts. Regulatory changes are not voluntary but are requisite to comply with newly passed legislation, regulatory requirements, or court rulings. Either the CLEC or Qwest may originate the Change Request." See Exhibit BJJ-1 to Ms. Johnson's testimony (CMP Document) at §4.1. If the requirements for a Regulatory CR are not met, a company may submit a regular change request. Consistent with its position that this issue should be addressed in the ICA, Eschelon did not initiate a Change Request.

<sup>139</sup> CMP Document (Eschelon/53), §5.4.

1 state-specific basis.<sup>140</sup> Eschelon is *not* advocating use of the CMP procedures, as  
2 it has consistently maintained that this issue should be addressed in the  
3 interconnection agreement. In contrast, Qwest’s stated position is that processes,  
4 procedures, and business practices should be handled in CMP and not in  
5 interconnection agreements to avoid “one-off” processes.<sup>141</sup> Yet, for this  
6 particular issue of acknowledging Qwest mistakes, Qwest did not use CMP even  
7 though Qwest later admitted its decision not to do so has resulted in a “one-off”  
8 process.<sup>142</sup> The inconsistency in Qwest’s position may reflect the fact that the  
9 results of the Minnesota Commission’s order were unfavorable to Qwest. Qwest  
10 simply chose not to implement them through CMP. While CMP is apparently

---

<sup>140</sup> A process affecting “all CLECs” that Qwest contends belongs in CMP may be specific to one state. *See, e.g.*, the Washington-only expedite terms. *See* Eschelon 104, Johnson/3[Qwest’s PCAT, *Expedites and Escalations Overview – V. 44.0*, stating: “The Expedites Requiring Approval section of this procedure does not apply to any of the products listed below (unless you are ordering services in the state of WA).”].

<sup>141</sup> *See, e.g.*, Albersheim Colorado Rebuttal, p. 6, lines 3-7 (“Eschelon seeks to expand Qwest’s obligations and create *one-off, unique processes* for CMP-related ICA issues in dispute: Issue 1-1: service intervals, Issues 12-71 through 12-73: jeopardy notices, and Issue 12-67: expedited orders. Eschelon’s approach to these issues has a *dire effect* on the CMP . . . .”) (emphasis added). *See also* Qwest-Eschelon ICA MN Arbitration, Qwest (Mr. Linse) MN Direct, p. 12, lines 12-19 (“Even if Eschelon were to agree that its language constitutes a standing request to tag whenever necessary, this would still represent a significant ‘one-off’ from Qwest’s existing process. Eschelon’s proposed language would create a unique process that would apply only to Eschelon and other CLECs that may opt into Eschelon’s agreement. Qwest’s technicians on service calls would be unreasonably burdened with the responsibility of understanding this one-off process and keeping straight for which CLECs it applied. This would create significant administrative and logistical difficulties.”) (Issue 12-75, now closed).

<sup>142</sup> Ms. Albersheim admitted its proposal of a Minnesota-only provision for Issue 12-64 is a “one-off” process. Qwest-Eschelon Minnesota arbitration, Transcript, Vol. I, p. 15, line 17 – p. 16, line 3 (Albersheim) (Eschelon/6).

1 optional for Qwest when issues affect multiple CLECs,<sup>143</sup> Qwest does not propose  
2 to give Eschelon that option.

3 **Q. IN ADDITION TO REFERRING TO CMP, QWEST ARGUES THAT**  
4 **ESCHELON'S PROPOSAL TO REQUIRE ACKNOWLEDGEMENT OF**  
5 **MISTAKES IS UNNECESSARY BECAUSE OF THE EXISTENCE OF**  
6 **PERFORMANCE INDICATOR DEFINITIONS ("PIDS"). IS QWEST**  
7 **CORRECT?**<sup>144</sup>

8 A. No. Qwest's argument is incorrect for a number of reasons. First, PIDs do not  
9 capture all types of Qwest's inadequate service. Ms. Johnson's direct testimony  
10 contains Eschelon/87 that provides several real-life examples in which Qwest's  
11 mistakes affected Eschelon's End User Customers and for which Eschelon  
12 requested (and Qwest provided) root cause analysis. In one of these examples,  
13 Qwest's technician insulted Eschelon's End User Customer with profanity.<sup>145</sup> In  
14 another example, Eschelon's End User Customer was unnecessarily called to the  
15 customer premises at 10 p.m., while Qwest's technician did not show up (and did  
16 not need the Customer's presence at the customer premises).<sup>146</sup> PIDs do not  
17 measure these types of mistakes. Similarly, PIDs do not measure the harm to

---

<sup>143</sup> In its order finding Qwest's compliance filing inadequate, the Minnesota Commission's fourteen ordering paragraphs (a-n) regarding the required contents of Qwest's next compliance filing included, for example, the following items that referred to "all" Qwest wholesale orders and CLECs generally (not only Eschelon): "(f) Procedures for extending the error acknowledgment procedures set forth in part (e) to *all* Qwest errors in processing wholesale orders." Order, *MN 616 Case* (Nov. 13, 2003) p. 4] (emphasis added).

<sup>144</sup> Qwest Response, pp. 43-44.

<sup>145</sup> Eschelon/87, Example 1.

<sup>146</sup> Eschelon/87, Example 4.

1 Eschelon's reputation done by Qwest's mistakes in situations in which the End  
2 User is led to believe that Eschelon was at fault. In the specific incident that  
3 prompted the Minnesota Commission to direct Qwest to create procedures for the  
4 acknowledgement of its mistakes, it was not the outage of service itself, but  
5 Qwest's conduct, that caused Eschelon to lose the End User Customer. The PIDs  
6 would capture the outage, but not Qwest's inappropriate conduct that  
7 misrepresented the outage as caused by Eschelon.

8 Further, even if Qwest is penalized for a specific instance of inadequate service  
9 via PIDs, Qwest may still have incentives to commit a mistake because gains  
10 from winning back a large End User Customer may exceed PID penalties. The  
11 specific incident that prompted Minnesota Docket No. P-421/C-03-616, for  
12 example, illustrates this problem: Qwest's conduct in that case caused Eschelon  
13 to lose, and Qwest to win back, a large End User Customer. The Commission's  
14 order notes that annual telecommunications bills from this End User Customer  
15 were approximately \$463,655 per year.<sup>147</sup> In this instance, Qwest's stream of  
16 recurring revenues is likely to far exceed one-time PID penalties from causing  
17 outage to the customer.

18 **Q. IS QWEST'S POSITION REFLECTED IN ITS POSITION STATEMENT**  
19 **IN THIS CASE CONSISTENT WITH THE POSITION IT HAS TAKEN IN**  
20 **LATER STAGES OF THE QWEST-ESCHELON ARBITRATIONS IN**  
21 **OTHER STATES?**

---

<sup>147</sup> Eschelon/5, Starkey/7..

1 A. No. In Minnesota, Qwest agreed to the majority of Eschelon’s language for Issue  
2 12-64 and subparts. In Oregon, Qwest objects in its position statement to  
3 Eschelon’s proposed language for Issue 12-64 and subparts in its entirety,  
4 arguing, as it does with a number of other issues:

5 Further, this issue involves processes that affect all CLECs, not just  
6 Eschelon. The entire purpose of CMP was to ensure that the industry (not  
7 just Qwest or one CLEC) is involved in creating and approving processes  
8 so that processes are uniform among all CLECs. Processes that affect all  
9 CLECs should be addressed through CMP, not through an arbitration  
10 involving a single CLEC. Further, implementing a unique process for  
11 Eschelon that Qwest does not follow for other CLECs would require  
12 Qwest to modify its systems or processes and would cause Qwest to incur  
13 costs it is entitled to recover under the Act.<sup>148</sup>

14 Qwest’s previous conduct, however, shows that Qwest has excluded this issue not  
15 only from the ICA but also from CMP. When Eschelon has pointed this out in  
16 other states, Qwest changed its position (from the one quoted above) and testified:  
17 “This process is not one that requires Qwest to alter its procedures overall, nor  
18 does it apply to all CLECs.”<sup>149</sup>

19 As Qwest’s inconsistent conduct in the Minnesota 616 example shows, Qwest’s  
20 proposed tests of labeling an issue as a “process” or asking if “multiple CLECs  
21 are affected” are results oriented and do not provide a legitimate basis for  
22 excluding language from the ICA. Both proposed tests allow Qwest to

---

<sup>148</sup> See Exhibit 3 to the Arbitration Petition, Joint Disputed Issues Matrix (10/10/06), Qwest position statement, p. 163.

<sup>149</sup> Albersheim Arizona Rebuttal, p. 40, lines 9-11; Albersheim Minnesota Rebuttal, p. 40, lines 13-15; Albersheim Washington Rebuttal, p. 39, lines 9-11 (same quote in all three states).

1 pigeonhole an issue as CMP or not (as in this case it did on different occasions for  
2 the same issue) at its unilateral discretion.

3 **iv. SECRET TRRO PCATS EXAMPLE**

4 **Q. WHY DO YOU REFER TO THE FOURTH EXAMPLE AS THE “SECRET**  
5 **TRRO PCATS” EXAMPLE?**

6 A. After the FCC issued its *TRO*, Qwest developed a PCAT document intended to  
7 implement terms of the *TRO* in a fashion Qwest claimed to be most consistent  
8 with its newly-defined obligations relating to UNEs. Qwest attempted to force  
9 CLECs to execute amendments reflecting Qwest’s interpretation of its post-  
10 *TRO/TRRO* obligations (when read in conjunction with its TRRO PCAT) without  
11 allowing CLECs the ability to review the PCAT documents in which Qwest  
12 placed operative language regarding Qwest’s interpretation. Qwest password  
13 protected the PCAT changes and initially refused to provide the password until  
14 after a CLEC signed Qwest’s *TRRO* amendment, so the CLEC would learn the  
15 full effect of those amendment terms only after signing it. Although the password  
16 is now available, these PCATs remain password protected. The term “secret” is  
17 used to distinguish them from the portions of the PCAT that are not password  
18 protected.

19 **Q. PLEASE ELABORATE ON THE “SECRET TRRO PCATS” EXAMPLE.**

20 A. On October 27, 2004, Qwest issued a change request entitled, “FCC Triennial  
21 Review Order CC 01-338 (TRO), U.S. Court of Appeals for the DC Circuit

1 decision (USTA II) Decision No. 00-1012, and FCC Interim Rules Compliance:  
2 Certain Unbundled Network Elements (UNE) Product Discontinuance.”<sup>150</sup> A  
3 chronology of events relating to this Change Request is attached to the testimony  
4 of Ms. Johnson.<sup>151</sup>

5 Qwest’s Change Request dealt with the availability of UNEs pursuant to Qwest’s  
6 interpretation of the *TRO*, USTA II Decision, and the FCC’s Interim Order. This  
7 notice said it was to inform CLECs that whatever UNEs Qwest claimed were  
8 “declassified” pursuant to these rulings would no longer be available through the  
9 PCAT or for CLECs without an ICA. Qwest indicated that there would be no  
10 transition for these changes and that the impacts of this notice would be  
11 retroactive.<sup>152</sup> On November 8, 2004, Covad escalated the issue in CMP, asking  
12 Qwest to withdraw the TRO/USTA II Change Request.<sup>153</sup> Covad objected on  
13 numerous grounds, including: (i) it was premature for Qwest to make these  
14 determinations about UNE availability since there were pending proceedings  
15 before the FCC and state commissions dealing with these exact issues; (ii) it was  
16 inappropriate for Qwest to implement its legal rights and obligations through  
17 CMP instead of ICAs; (iii) Qwest’s interpretation of the FCC’s rules and court  
18 orders was incorrect; (iv) and Qwest did not follow the proper steps for issuing a

---

<sup>150</sup> Change Request No. SCR102704-1RG. Qwest originally filed this Change Request as a “systems” Change Request, but later changed that designation to a “product/process” Change Request.

<sup>151</sup> See Eschelon/59.

<sup>152</sup> Note that when the FCC’s *TRRO* came out, it included very specific transition timeframes for UNEs that are declassified.

<sup>153</sup> Covad Escalation No. PC102704-1E32.

1 regulatory Change Request.<sup>154</sup> Eschelon joined Covad’s escalation in November  
2 2004. Importantly, in its binding response to Covad’s escalation, Qwest on  
3 November 16, 2004, stated that the “Change Request is not superseding the  
4 language in the CLEC ICA” and that because “this is a change to limit the  
5 availability of certain products only, Qwest believes this is a Level 4 change and  
6 belongs in CMP.”<sup>155</sup> Eschelon and CLECs continued to raise concerns about  
7 Qwest’s Change Request in CMP monthly meetings and oversight committee  
8 meetings, stating that changes that affect UNE availability should be addressed in  
9 negotiation/arbitration and not in CMP.<sup>156</sup>

10 On January 7, 2005, Qwest refused to withdraw the TRO/USTA II PCAT. When  
11 the permanent rules were released in the *TRRO*,<sup>157</sup> it was evident that Qwest’s  
12 interpretation of its obligations set out in its premature PCATs did not comport

---

<sup>154</sup> *See id.*

<sup>155</sup> *See* Eschelon/61 (11/16/04 Qwest binding response to Covad). Qwest’s entire response to Covad’s escalation is provided in Eschelon/61, and Covad’s escalation is provided as Eschelon/60.

<sup>156</sup> *See* Eschelon/59 (11/17/04 CMP November monthly meeting - Eschelon stated that “this should not be discussed in CMP. We do not discuss legal interpretation in CMP. This should be done in a different forum.” At the same CMP meeting, Covad stated, “this is an ICA negotiation discussion.” TelWest said “It should be arbitrated and not unilaterally implemented by Qwest.”); *see also id.* (1/4/05 CMP Oversight Committee Meeting - Eschelon indicated that “if Qwest will limit product availability in its existing ICA, Qwest would need to notify Eschelon through the change in law provisions of its contract and not through a PCAT CMP notice.” Bill Campbell from Qwest agreed.); *see also id.* (1/10/05 CMP Oversight Committee meeting - Eschelon expressed concern about dealing with these issues in CMP: “Bonnie Johnson said that product availability is based on the ICA and even though Qwest notices about product availability, CLECs can’t get the products without an agreement including the product.” Also “Liz Balvin [Covad] and Bonnie Johnson stated that the Change Request should not have defaulted to CMP as it was not the appropriate approach and the importance of keeping the CMP guidelines in tact.” Covad, Eschelon AT&T, TDS/Metrocom and MCI all recommended that the Change Request be deferred until permanent rules are issued.)

<sup>157</sup> Order on Remand, *Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers*, WC Docket No. 04-313; CC Docket No. 01-338, FCC 04-290 (rel. February 4, 2005) (“*TRRO*”).

1 with the permanent rules. Qwest indicated that it would withdraw its previous  
2 PCATs that were inconsistent with the permanent rules and “*would notify via the*  
3 *same Change Request.*”<sup>158</sup> Although CLECs requested ICA negotiations rather  
4 than use of CMP, Qwest at least indicated it would do one or the other. At a June  
5 30, 2005 CMP ad hoc meeting, Qwest then indicated that it would negotiate ICAs  
6 with CLECs and that “no *TRO/TRRO* changes to its products and processes will  
7 be made across the board until such language is final.”

8 **Q. DID QWEST GO FORWARD WITH EITHER THE CMP APPROACH OR**  
9 **ICA NEGOTIATIONS FOR IMPLEMENTING ITS TRRO PCAT**  
10 **CHANGES?**

11 A. No. Qwest made matters even worse. Qwest initially told CLECs in CMP  
12 meetings that Qwest will negotiate the *TRRO* changes with CLECs and will not  
13 update the PCATs until language is finalized and PCAT changes are brought  
14 through CMP.<sup>159</sup> However, on September 12, 2005, Qwest issued a wholesale  
15 notification, entitled “Triennial Review Remand Order (*TRRO*) Products &  
16 Services.”<sup>160</sup> Contrary to Qwest’s statements in CMP, this notification was not a  
17 CMP notice, which means that it did not go through CMP and there was no  
18 opportunity for CLEC comment, input, or other participation. Qwest made this  
19 non-CMP notice effective three weeks after the issuance date – even quicker than  
20 the “notice and go” notifications Qwest issues through CMP. But Qwest’s non-

---

<sup>158</sup> See Eschelon/59, Johnson/7 (2/16/05 CMP February monthly meeting minutes).

<sup>159</sup> Eschelon/59, Johnson/7-9 (Meeting Minutes from 6/30/05 AdHoc CMP meeting).

<sup>160</sup> Product Notice Document No. PROS.09.12.05.F.03236.TRRO\_Login\_Product\_Page

1 CMP notice<sup>161</sup> was even more egregious: *Qwest posted its proposed TRO/TRRO-*  
2 *related documents on a password protected website, and refused to provide*  
3 *CLECs with the necessary username/password to access the documents until*  
4 *after the CLEC executed the TRO/TRRO amendments.*<sup>162</sup> This is the secrecy  
5 referred to in “Secret” TRRO PCAT.<sup>163</sup>

6 **Q. DID ESCHELON RAISE CONCERNS ABOUT THE SECRET TRRO**  
7 **PCAT?**

8 A. Yes. On September 12, 2005, Eschelon requested a copy of the secret TRRO  
9 PCAT, and also raised concerns about Qwest’s intentions with respect to the non-  
10 CMP secret TRRO PCAT:

11 Does Qwest intend to try to take a similar approach, in which  
12 Qwest does not include terms in the ICA but then attempts to  
13 impose them through a PCAT (one that has not even been through  
14 CMP), after Eschelon has signed an Agreement?...the language  
15 described in the enclosed notice did not go through  
16 CMP...Qwest’s notice does not even allow for a comment  
17 period...This notice/conduct appears to be yet another reason to  
18 limit any reference to the PCAT in the ICA and deal with any  
19 terms that need to be negotiated in the ICA. The ICA controls; not

---

<sup>161</sup> See Eschelon/59, Johnson/11 (1/18/06 CMP monthly meetings - Jill Martain (Qwest) stated that the TRRO notice “was separate and that it was a non-CMP notice.”)

<sup>162</sup> See Eschelon/59, Johnson/9-10 (9/12/05 - Qwest’s non-CMP announcement stated: “When the CLEC receives a copy of their signed amendment Qwest will also include a letter that advises them how to access the web site using an assigned USERID and Password to access the PCATs.” Qwest’s non-CMP notice included a similar “Note” that is included on CMP documentation stating that “in cases of conflict between the changes implemented through this notification and any CLEC interconnection agreement (whether based on the Qwest SGAT or not), the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement.”)

<sup>163</sup> Password-protected PCATs are referred to as “Secret” PCATs to distinguish them from generally available PCATs accessible without a password distributed through Qwest’s notice process.

1 the PCAT...If you want such terms with Eschelon, you need to  
2 propose them in negotiations and negotiate with us.<sup>164</sup>

3 On September 29, 2005, Qwest announced that “[a]s a result of customer  
4 feedback” the password for the secret TRRO PCAT was being made available to  
5 CLECs, but that it would continue to be distributed outside of CMP and would  
6 remain password-protected or “secret.”<sup>165</sup> Qwest continues to issue additional  
7 secret PCATs.<sup>166</sup> Additional users that want to review secret PCATs have to  
8 obtain the password before being able to do so.

9 **Q. DID QWEST EVER OFFER ANY REASON FOR ISSUING THE SECRET**  
10 **PCAT AS A NON-CMP NOTICE?**

11 A. Amazingly, Qwest claimed that there was agreement among Qwest and CLECs in  
12 CMP that Qwest could make changes *unaccompanied by any ICA negotiations,*  
13 *SGAT review, or any other method for CLEC input and participation and/or*  
14 *Commission oversight.* Qwest ignores that, when this issue was discussed in  
15 CMP, CLECs said the proper alternative to CMP was to handle TRRO changes in  
16 law through ICA negotiations that, if unsuccessful, would be decided by state  
17 commissions in ICA arbitrations.<sup>167</sup> Qwest also ignores its own statements

---

<sup>164</sup> See Eschelon/59, Johnson/10 (9/12/05 – Eschelon email to Qwest).

<sup>165</sup> See Eschelon/59, Johnson/11 (9/29/05 Qwest announcement).

<sup>166</sup> See, e.g., Eschelon/64 (7/21/06 non-CMP Product notice document number PROS.07.21.06.F.04074.TRRO\_Reclass\_Termin\_V1). There are now 99 secret TRRO PCAT versions. See, Eschelon/77.

<sup>167</sup> See, e.g., Eschelon/59, Johnson/4-5 (11/17/04 CMP November monthly meeting minutes).

1 afterward that it would pursue its Change Request in CMP and to bring PCAT  
2 changes through CMP.<sup>168</sup>

3 Qwest claims that CLEC opposition to addressing these issues in CMP rather than  
4 ICA negotiations can somehow be construed as CLEC consent for Qwest to  
5 unilaterally impose its *TRRO* view “outside the scope of CMP”<sup>169</sup> with no  
6 negotiation or arbitration. No reasonable interpretation of CLEC comments leads  
7 to this result. For example, TelWest specifically said in CMP that the issues  
8 “should be arbitrated *and not unilaterally implemented by Qwest.*”<sup>170</sup> Qwest’s  
9 claim now that CLECs’ position on ICA negotiations meant that Qwest can  
10 unilaterally implement the TRRO PCATs flies in the face of such clear statements  
11 to the contrary.

12 CLECs, including Eschelon, maintained that Qwest should negotiate TRRO  
13 issues, including operational and conversion issues, in ICA negotiations,<sup>171</sup> as  
14 recommended by the FCC.<sup>172</sup> To the extent that there was any “agreement” to  
15 deal with issues later, it was to deal with them after the permanent rules were  
16 issued.<sup>173</sup> On February 16, 2005, Qwest said in CMP that, once it determined  
17 what the final rulings are, Qwest “would notify via this same CR” in CMP (*i.e.*,

<sup>168</sup> See, e.g., Eschelon/59, Johnson/7-9 (6/30/05).

<sup>169</sup> See Eschelon/59, Johnson/11-12 (3/29/06 – Qwest service management email to Eschelon)

<sup>170</sup> See Eschelon/59, Johnson/4-5 (11/17/04 CMP November monthly meeting minutes)

<sup>171</sup> See, e.g., Eschelon/59, Johnson/4-5 (11/17/04 CMP November monthly meeting minutes).

<sup>172</sup> E.g., *TRRO*, ¶¶ 196 and 227.

<sup>173</sup> Eschelon/59, Johnson/6-7 (1/10/05); Eschelon/71 (1/10/05 CMP Oversight Committee minutes).

1 not outside of CMP).<sup>174</sup> The final rules were effective on March 11, 2005.  
2 Although Qwest has made unsupported assertions since then that there is some  
3 kind of agreement,<sup>175</sup> Qwest has provided no evidence at all of any agreement (or  
4 the time, place, date, parties to the agreement, or alleged content of any  
5 agreement) at any later date on this issue.

6 Qwest has said over time that the alleged agreement is specific to the Statement  
7 of Generally Available Terms (SGAT) and that changes will be made in  
8 conjunction with SGAT updates. Qwest has taken this position in CMP, through  
9 its service management team, and in ICA negotiations. On June 30, 2005, Qwest  
10 committed in CMP:

11 *. . . as SGAT language changes, we will have a comment period*  
12 *and that the States will engage you when decisions are made.*  
13 *Cindy also said that PCAT changes will be brought through*  
14 *CMP.*<sup>176</sup>

15 On March 29, 2006, Qwest service management similarly told Eschelon:

16 As agreed to at CMP, the PCATs/Business Procedures associated  
17 specifically to TRRO are handled outside the scope of CMP *until*  
18 *such time that there is an approved SGAT*, which is why the  
19 change was noticed as a non-CMP document.<sup>177</sup>

20 On April 6, 2006, the Qwest ICA negotiations team similarly told Eschelon:

21 From those discussions it was agreed that *until such time that a*  
22 *SGAT is filed* and the TRRO related issues were finalized that all

---

<sup>174</sup> Eschelon/59, Johnson/7 (2/16/05).

<sup>175</sup> See, e.g., Eschelon/63, Johnson/1 (Qwest 9/7/06 email).

<sup>176</sup> Eschelon/59, Johnson/8-9 (6/30/05) (emphasis added).

<sup>177</sup> Eschelon/59, Johnson/11; see also Eschelon/63 (full text) (emphasis added).

1 of the TRRO processes and issues would be deferred from a CMP  
2 perspective.<sup>178</sup>

3 **Q. DO RECENT ACTIONS BY QWEST TELL A DIFFERENT STORY?**

4 A. Yes. Despite these assurances over more than a year's time from every one of  
5 these groups within Qwest that Qwest would update the SGATs and deal with  
6 "TRRO" issues (including those that Eschelon was asking Qwest to negotiate  
7 under Section 252) in CMP as Qwest did so, Qwest recently said that it had  
8 "*stopped updating its SGATs.*"<sup>179</sup> Qwest added that, "Indeed, the SGATs have  
9 not been updated to incorporate changes in law since 2003 and are therefore  
10 outdated documents."<sup>180</sup> Then, on November 15, 2006, Qwest issued a Level 1

---

<sup>178</sup> Eschelon/59, Johnson/12 (4/6/06) (emphasis added). At the time this statement was made (4/6/06), Qwest had already filed its comments in the Oregon and Colorado wire center proceedings and its petition in the Minnesota wire center proceeding. *See, e.g.*, Conference Report, *In re. Covad, Eschelon, Integra, McLeodUSA, and XO Request for Commission Approval of Non-Impairment Wire Center List*, Docket No. UM 1251 (March 15, 2006); Qwest Corporation's Comments in Response to Commission Order Opening a Docket and Allowing a Response, Docket No. 06M-080T (March 1, 2006); Qwest's "Petition for Commission Investigation and Expedited Proceeding to Verify Qwest Wire Center Data and Resolve Related Issues," MPUC Docket No. P-5692, 5340, 5643, 5323, 465, 6422/M-06-211 (March 3, 2006). That Qwest made this statement more than a month *after* Qwest made its filings in the wire center proceedings shows that Ms. Stewart's claim that TRRO change request is deferred by "agreement" pending the completion of the wire center proceedings is false. *See* Stewart Minnesota Rebuttal, p. 72, lines 22-25. As the above quotation shows (*see also* full paragraph quoted at Eschelon/59, Johnson/12), in April of 2006, Qwest was still promising to raise the separate, business impacting "processes and issues" with the Commission in association with SGAT filings. Qwest made the latter statement in response to Eschelon's Section 252 request to negotiate collocation and APOT issues (*see id.* & Eschelon/64), which are not being addressed in the wire center proceedings. Yet, Qwest responded that it is "premature to initiate TRRO discussion at this time." *See* Eschelon/59, Johnson/12. Given that Eschelon asked to negotiate TRRO issues years ago (*see, e.g.*, Eschelon/59, Johnson/4-5, 11/17/04) and also the APOT issue promptly when Qwest finally disclosed it (*see* Eschelon/64), the Commission should not allow Qwest to exclude these issues from this arbitration because Qwest had steadfastly refused to take up the issues in negotiations (or even CMP) in the intervening months and years. Eschelon has properly brought them to negotiation and before this Commission in arbitration. [*See* Subject Matters 18 (Conversions) and 26 (Commingled Arrangements).]

<sup>179</sup> Stewart Minnesota Rebuttal, p. 36, line 14 (emphasis added).

<sup>180</sup> Stewart Minnesota Rebuttal, p. 36, lines 14-15.

1 CMP notice – effective on 1 day’s notice<sup>181</sup> – that informed CLECs that SGATs  
2 will *no longer be available for opt in*.<sup>182</sup> Qwest is attempting to address some of  
3 the inherent inconsistencies in its position by eliminating SGAT terms and  
4 conditions established in 271 proceedings so that these terms and conditions do  
5 not conflict with the terms and conditions Qwest has unilaterally established in its  
6 Negotiations Template Agreement. Qwest’s move to eliminate the SGAT  
7 without any Commission involvement is in direct conflict with the CMP  
8 Document’s scope provision (Section 1.0), which addresses potential conflict  
9 between the CMP and SGATs as well as ICAs. It is a prime example of why the  
10 FCC rejected Qwest’s proposed reliance on web-postings instead of 251/252  
11 ICAs.<sup>183</sup>

12 As the above quotations illustrate, Qwest has consistently pushed out dealing with  
13 business-impacting issues that have resulted from the TRO/TRRO based on its  
14 promise to deal with them collaboratively when the time is right – and when it  
15 updated its SGATs. At the same time, Qwest has been busily churning out

---

<sup>181</sup> PROS.11.15.06.F.04322.MultLangChangeforSGATs (effective 11/16/06). As a result of this change, SGATs are no longer available for opt-in by CLECs and are available on Qwest’s website only as reference documents. See, Eschelon/65, Eschelon/66, and Eschelon/67. These exhibits show that Qwest provides SGATs on its website for “Reference Only.”

<sup>182</sup> Process Notification PROS.11.15.06.F.04322.MultLangChangeforSGATs (dated 11/15/06, effective 11/16/06) is provided in Eschelon/66. In addition to Qwest’s 11/15/06 notice, this exhibit contains Qwest’s testimony from the companion Minnesota arbitration proceeding (Ms. Stewart) indicating that Qwest has not updated its SGATs for a number of years and has no intention to do so. This exhibit also contains screen shots from Qwest’s website showing that Qwest has replaced SGATs on its website with Qwest’s Negotiations Template Agreements and now provides SGATs only as reference documents (in PDF). The link for “SGATs” takes the user to the Qwest template, not the SGAT. Then, the user has to use another link to get to the SGATs, which are identified as reference documents.

<sup>183</sup> The fact that Qwest withdrew its SGATs on one day’s notice supports the FCC’s finding that CLECs “could not rely on a website to contain all agreements on a permanent basis.”

1 business-affecting<sup>184</sup> secret (*i.e.*, password-protected) PCATs<sup>185</sup> that do not go  
2 through any collaborative process at all – not ICA negotiations (as requested by  
3 Eschelon and other CLECs),<sup>186</sup> not CMP (as promised by Qwest),<sup>187</sup> and not  
4 Commission proceedings (as also promised by Qwest).<sup>188</sup> Qwest implements its  
5 own “TRRO” view of the world through notifications that it chose *not to send*  
6 *through the CMP* notification or change request processes, while at the same time  
7 refusing to negotiate these issues under Section 252 on the grounds that *Eschelon*  
8 should take the issue to CMP or that it would do so when it updated the SGATs.  
9 Then, Qwest declared it would not update the SGATs at all. Eschelon has  
10 exercised its Section 252 right to raise these issues in negotiation and arbitration.  
11 Qwest, as the party advocating they belong in CMP, elected not to raise them  
12 there (or in any regulatory proceeding) before commencement of arbitration and  
13 should not be allowed to benefit from its contradictory statements and conducts

---

<sup>184</sup> See Eschelon/77 (showing Qwest has implemented *ninety-nine* versions non-CMP secret TRRO PCATs).

<sup>185</sup> Eschelon/59, Johnson/9 & 12-14.

<sup>186</sup> See, *e.g.*, Eschelon/59, Johnson/4-5 (11/17/04 CMP November monthly meeting minutes).

<sup>187</sup> See, *e.g.*, Eschelon/59, Johnson/8-9 (6/30/05).

<sup>188</sup> Eschelon/59, Johnson/8-9 (6/30/05). Not only is there no such agreement, but also these business-affecting issues will not be decided in the wire center proceedings. Despite the above-quoted promises by Qwest that it would bring such issues to the Commission, Qwest asked the Commission in that proceeding only to identify the non-impaired wire centers, “confirm Qwest’s right” to assess non-recurring charges (“NRCs”) at tariffed rates, and establish a process for future updates of non-impaired wire centers. See Qwest’s “Statement of Issues,” Colorado Docket No. 06M-080T (April 28, 2006). Although circuit identification is discussed in that case, for example, it is in the context of costs if the circuit id is changed and not whether it should be changed. Given Qwest’s above-quoted statements about updating the SGATs with the state commissions and bringing issues to the CMP, CLECs could not have anticipated that Qwest would later argue that this narrow proceeding was the one place that CLECs should have raised the issues that Qwest itself promised to raise elsewhere. Consistent with this, this Commission did not address all of these business-affecting issues in its Order. See Eschelon/40.

1 by avoiding an arbitration ruling. This arbitration is the appropriate place to deal  
2 with the business impacting aspects of the TRO/TRRO.

3 **Q. BRIEFLY, WHY SHOULDN'T QWEST IMPLEMENT TRRO PCATS**  
4 **UNILATERALLY?**

5 A. Aside from the fact that Qwest agreed to negotiate these issues before making  
6 *TRRO* changes across the board and said it would at least bring TRRO PCATs  
7 through CMP,<sup>189</sup> the law and current interconnection agreements require Qwest to  
8 negotiate changes of law (such as *TRRO*) through interconnection agreement  
9 negotiation and arbitration.

10 While Qwest may argue that it has unilateral control over provisioning of  
11 elements that are no longer required to be unbundled, the transition away from  
12 UNEs is subject to Section 252, including its provisions giving authority to the  
13 Commission to decide these issues. In the Verizon arbitration in Washington, for  
14 example, the ALJ found that “the Commission specifically provided that the  
15 parties address through the Section 252 process the transition away from  
16 provisioning elements on an unbundled basis that the FCC has determined are no  
17 longer required to be unbundled.”<sup>190</sup>

18 In any event, Qwest’s so-called “TRRO” PCATs are not limited to provisioning  
19 of elements that are no longer required to be unbundled and address or at least

---

<sup>189</sup> See Eschelon/59 (6/30/05 CMP ad hoc meeting minutes)

<sup>190</sup> See Verizon WA ALJ Arbitration Order, ¶105, citing *TRO*, ¶¶ 700, 701; *TRRO*, ¶ 142 n.399, ¶ 198 n.524, ¶ 228 n.630, ¶ 233.

1 impact UNEs and other Section 251 services. Qwest recently issued another non-  
2 CMP, secret PCAT notice about new Qwest terms for converting UNEs to  
3 alternative or analogous services.<sup>191</sup> This recent secret PCAT is discussed in  
4 Issues 9-43 and 9-44 (conversions). Although Qwest refers to it as a “TRRO”  
5 PCAT, it relates to collocation and contains terms that affect UNEs (such as a  
6 freeze on ordering and changing UNEs for a time). Eschelon has requested  
7 negotiation of these issues with Qwest and specifically asked for participation of  
8 Qwest subject matter experts to facilitate the discussion. Qwest has rejected  
9 Eschelon’s request, indicating that this issue should be addressed in CMP –  
10 despite the fact that Qwest did not issue a CMP notice on this change to begin  
11 with, and has refused to address this issue in CMP. Information is sketchy, but  
12 there appear to be significant problems (not the least of which is a freeze on any  
13 new orders or moves, adds, changes in affected collocations for a time) with  
14 Qwest’s new changes (for which the Qwest effective date has passed). These  
15 issues should be negotiated and reflected in ICA language.

16 **Q. WHAT DOES QWEST’S INSISTENCE ON ACTING UNILATERALLY**  
17 **SAY ABOUT ITS TRUE VIEW OF ICA NEGOTIATIONS AND CMP?**

18 A. When Qwest’s objective was to defeat the pick-and-choose rule, as I mentioned  
19 earlier, Qwest extolled the virtues of negotiated interconnection agreements and

---

<sup>191</sup> See Eschelon/64 (7/21/06 - “TRRO-Reclassification of Terminations for Unbundled Network Element (UNE) Conversions – V1.0”).

1 the importance of “...*dynamic, innovative interconnection negotiations*.”<sup>192</sup>  
2 Qwest recognized that: “ILECs and CLECs have a fundamental interest in  
3 making the interconnection process as *cooperative and open* as possible, since  
4 *both parties benefit* from well-negotiated and mutually beneficial wholesale  
5 arrangements.”<sup>193</sup> Qwest added that the “ability of carriers to negotiate binding  
6 agreements with each other was a cornerstone of the Act.”<sup>194</sup> Similarly, regarding  
7 CMP, Qwest in its position statements in the Joint Disputed Issues Matrix  
8 (Exhibit 3 to the Petition) time and again asserts the benefits of ensuring that  
9 Qwest and multiple CLECs collectively create processes, suggesting this is to the  
10 benefit of all.

11 Here, we have another situation in which multiple CLECs are entreating Qwest to  
12 join each of them in that “cooperative and open” ICA negotiations process to  
13 negotiate *TRRO* changes to obtain a mutual benefit.<sup>195</sup> Previously, Qwest at least  
14 said it would bring the TRRO PCATs through CMP, which in this case it claims  
15 is the appropriate forum for “processes” and “procedures.” Despite the benefits  
16 that Qwest has, when convenient, extolled as to each of these procedures, Qwest  
17 has refused to use either of them with respect to the TRRO PCATs. Significant  
18 business issues, that may affect End User Customers and impose resource

---

<sup>192</sup> *Comments of Qwest Communications International Inc.*, CC Docket Nos. 01-338, 96-98, 98-147, October 16, 2003 at page ii (emphasis added).

<sup>193</sup> *Id.*, pp. 3-4 (emphasis added). See also Eschelon/49 and Ms. Johnson’s description of Eschelon/46 and Eschelon/49 in her direct testimony.

<sup>194</sup> *Id.*, p. 6.

<sup>195</sup> Regarding additional Eschelon requests for Qwest to involve other CLECs in the negotiations and implementation of the Qwest template and *TRO* provisions, see Eschelon/51 and Eschelon/52.

1 burdens associated with implementation, require exchange of information,  
2 discussion, and negotiation. But, Qwest has provided no forum for this, despite  
3 significant passage of time and multiple requests from multiple CLECs, including  
4 Eschelon. Instead, Qwest has operated in secret behind the scenes to devise its  
5 own plan of implementing those changes in law, which it has presented as a fait  
6 accompli.

7 **Q. DID QWEST RECENTLY AGREE TO TAKE AT LEAST SOME OF**  
8 **THESE SECRET TRRO PCATS THAT QWEST UNILATERALLY**  
9 **DEVELOPED TO CMP?**

10 A. On October 16, 2006, Qwest sent Eschelon a letter advising Eschelon of “a  
11 policy-related decision Qwest has reached” to take the issue discussion under  
12 Issue 9-58 in this arbitration to CMP “within the next two months” (*see*,  
13 testimony of Mr. Denney for Issue 9-58).<sup>196</sup> Despite its previous protestations  
14 that there was an alleged “agreement” preventing Qwest from taking issues to  
15 CMP, Qwest made this policy decision on its own, without collaboration with or  
16 agreement from other companies to amend any alleged previous agreement. This  
17 shows that Qwest could have made this policy decision at any time. It does so  
18 now to avoid a Commission ruling when it prefers a forum without Commission  
19 scrutiny.

---

<sup>196</sup> Qwest’s 10/16/06 letter and Eschelon’s 10/17/06 response letter are attached to Ms. Johnson’s testimony as Eschelon/78.

1           Then, at the Minnesota hearing, Qwest testified that it planned on taking *all* of the  
2           secret TRRO PCATs to CMP.<sup>197</sup> But, at the CMP Monthly Meeting held on  
3           November 15, 2006, Qwest announced that it was bringing only a sub-set of those  
4           secret TRRO PCATs to CMP. It said it would bring its former *TRO/TRRO*  
5           change request<sup>198</sup> out of deferred status to address *some* (but not all) TRO/TRRO  
6           issues in CMP.<sup>199</sup> Qwest was unable to provide any additional information on  
7           which PCATs it intended to take to CMP at the following ad hoc call. Later,  
8           Qwest indicated that it will not address issues that are in litigation and asked  
9           CLEC CMP participants to sort out what is in litigation and what is not. When  
10          re-designing CMP, New Edge pointed out that CLEC CMP participants are  
11          operational business people, not attorneys who could address “regulatory, legal  
12          type processes” and changes that “impacts an ICA.”<sup>200</sup> Qwest replied that CLECs  
13          should not be concerned about this because: (1) this has been addressed with  
14          language in the CMP Document that states the ICA controls over CMP; and (2)  
15          “contractual issues, themselves, would not be addressed” in CMP.<sup>201</sup>

---

<sup>197</sup> Eschelon/6 [Minnesota Transcript, Vol. III, p. 57, line 5 – p. 58, line 4 (Oct. 18, 2006) (Ms. Stewart)].

<sup>198</sup> CR (PC102704-1ES). *See* Eschelon/59 (Secret TRRO PCAT Chronology).

<sup>199</sup> Qwest stated that “TRRO issues that are being addressed by Qwest and CLECs in arbitrations of their ICAs or items being challenged by law will not immediately be processed through CMP.” (11/15/06 CMP Monthly Meeting Minutes). However, as shown in Eschelon/78, Qwest has indicated its intention to take to CMP issues being addressed between Eschelon and Qwest in this arbitration under Issue 9-58.

<sup>200</sup> Transcript of 271CMP Workshop Number 6, Colorado Public Utilities Commission Docket Number 97I-198T (Aug. 22, 2001), pp. 291-292.

<sup>201</sup> Transcript of 271CMP Workshop Number 6, Colorado Public Utilities Commission Docket Number 97I-198T (Aug. 22, 2001), pp. 291-292 (Andrew Crain of Qwest and Penny Bewick of New Edge); *see id.* p. 292, lines 14-15 (Mr. Crain) (“Contractual issues, themselves, would not be addressed in the Change Management Process.”)

1 Implementation of the TRO/TRRO is a legal and contractual<sup>202</sup> issue. Recently,  
2 Qwest again asked CLECs to identify and discuss legal issues in CMP relating to  
3 the FCC's TRO/TRRO orders. CLECs indicated that Qwest's PCAT deals with  
4 legal issues (such as when a product is legally available under the FCC's rulings)  
5 that should be dealt with in ICAs and negotiation of those agreements. In  
6 response, Qwest agreed on a CMP ad hoc call to circulate to CLECs a redlined  
7 version of at least one non-CMP TRRO PCAT to show which issues it believed  
8 were "process" issues that should be dealt with in CMP and were not redundant  
9 of ICA or template ICA terms. At a later monthly CMP meeting, however, Qwest  
10 reneged on that commitment.

11 Now that Qwest has unilaterally developed terms outside of ICA negotiations  
12 (despite requests by Eschelon and other CLECs),<sup>203</sup> CMP (despite promises by  
13 Qwest),<sup>204</sup> and Commission proceedings (also despite promises by Qwest),<sup>205</sup> it is  
14 considering these terms and conditions as Qwest's "existing" process and Qwest  
15 may claim that it will be too costly or time-consuming to change them.<sup>206</sup> Qwest  
16 should not have been implementing *TRO/TRRO* terms and conditions unilaterally  
17 in the first place. If it ultimately incurs costs in changing processes that it should

---

<sup>202</sup> See, e.g., TRRO ¶196 & note 519 & ¶198.

<sup>203</sup> See, e.g., Eschelon/59, Johnson/4-5 (11/17/04 CMP November monthly meeting minutes).

<sup>204</sup> See, e.g., Eschelon/59, Johnson/8-9 (6/30/05).

<sup>205</sup> Eschelon/59, Johnson/8-9 (6/30/05).

<sup>206</sup> Now that Eschelon has expended the money and resources to arbitrate Issue 9-58, Qwest is attempting to pull the decision away from the Commission and belatedly decide for itself in CMP. If the result is unsatisfactory, Qwest would send Eschelon back to "square one" to expend more money and resources to litigate the issues again.

1 not have put in place unilaterally and over Eschelon's objections, Qwest is the  
2 cost causer and should bear those alleged costs.<sup>207</sup>

3 **Q. WHAT INFORMATION CAN BE TAKEN FROM THE SECRET TRRO**  
4 **PCATS EXAMPLE?**

5 A. This example demonstrates a continuing need for Commission oversight and  
6 involvement. While Qwest may have learned its lesson with respect to this  
7 particular tactic, the possibilities available to Qwest in unilaterally implementing  
8 terms and conditions consistent with its own policy objectives seem endless.

9 This example also typifies my contention that Qwest has a tendency to use CMP  
10 as a "shield" or "sword," whichever benefits Qwest at that particular time. Qwest  
11 imposed its unilateral view, in CMP, of the *TRO*, *USTA II*, and FCC's Interim  
12 Rules, which proved to be premature and a poor reflection of the permanent rules  
13 that were ultimately established (*i.e.*, the sword). This was done over the strong  
14 objection of CLECs, who disagreed with Qwest's use of CMP to implement  
15 changes in law as well as Qwest's interpretation of those changes. Then, after  
16 permanent rules are issued, Qwest sends a notice notifying CLECs about new  
17 "secret" PCATs that are being established unilaterally outside the scope of the  
18 CMP to define Qwest's legal obligations (*i.e.*, the shield), without any  
19 participation by CLECs, and without CLECs even being afforded the opportunity

---

<sup>207</sup> Qwest has implemented no fewer than 99 non-CMP TRRO PCAT versions. *See*, Eschelon/77 (list of Qwest non-CMP TRRO PCATs)

1 to review the initial *TRRO* PCAT language before being asked to execute the  
2 *TRRO* amendment.

3 **Q. IF ESCHELON DID NOT SIGN THE AMENDMENT RELYING ON THE**  
4 **“SECRET PCAT,” WHY IS IT RELEVANT IN THIS ARBITRATION?**

5 A. Qwest in this arbitration attempts to relegate to CMP a number of the issues  
6 brought forward by Eschelon, purportedly because those issues have some  
7 inherent relationship to the CMP process. Yet, Qwest’s own actions indicate that  
8 it views CMP as a vehicle that can be used to suit Qwest’s purpose, and that any  
9 inherent relationship between an issue and CMP appears to be defined solely by  
10 Qwest’s decision to pursue the issue there or not. Qwest stated in CMP before it  
11 issued the first secret PCAT that it would negotiate *TRO/TRRO* changes with  
12 CLECs, yet Qwest has in its negotiations with Eschelon again punted these issues  
13 back to CMP. Qwest then takes the position that an “agreement” exists between  
14 itself and CLECs not to act on those issues in CMP, so it refuses to address those  
15 issues in CMP, and establishes *TRO/TRRO* PCAT changes through non-CMP  
16 notices. Finally, once Qwest unilaterally establishes *TRO/TRRO* PCATs, Qwest  
17 decides to take some of the issues to CMP (after refusing to do so) with no  
18 indication that it will deviate from what it unilaterally established. If Qwest  
19 believed that CMP was the appropriate forum (which presumably explains Qwest  
20 referring Eschelon back to CMP again), Qwest would have issued its notice  
21 through CMP and followed the rules laid out for CMP. Now that Qwest has  
22 developed dozens of unilateral, non-CMP secret *TRRO* PCATs, it now claims

1 that that is has “existing” processes, some of which it may now take to CMP and  
2 argue that it would be costly and unnecessary to modify the “existing” processes  
3 Qwest unilaterally developed.

4 **Q. ANY FINAL OBSERVATION FROM THESE EXAMPLES?**

5 A. Yes. Qwest may attempt to claim that these examples are isolated incidents that  
6 may not occur again. In some respects, however, the significance of these  
7 examples is that they occurred at all. If CMP were the disciplined process Qwest  
8 claims it is, or if the line between ICA issues and CMP were as clear as Qwest  
9 suggests, these examples would not have occurred at all. The examples  
10 demonstrate, however, how much play there is in the process and how much room  
11 Qwest has to maneuver – and the fact that Qwest has used that room to advantage  
12 itself relative to its own policy positions. After reviewing these same examples in  
13 the Minnesota Eschelon-Qwest arbitration case, the Minnesota Arbitrators, as  
14 affirmed by the Minnesota Commission, found that “Eschelon has provided  
15 convincing evidence that the CMP process does not always provide CLECs with  
16 adequate protection from Qwest making important unilateral changes in the terms  
17 and conditions of interconnection.”<sup>208</sup>This shows that the potential for abuse in  
18 the future (*i.e.*, during the new ICA term) is real. Qwest is still the dominant

---

<sup>208</sup> Minnesota Arbitrators’ Report, OAH 3-2500-17369-2/MPUC No. P-5340,421/IC-06-768, ¶ 22. The Minnesota Commission adopted the Arbitrators’ Report in relevant part. See, Order Resolving Arbitration Issues, Requiring Filed Interconnection Agreement, Opening Investigation and Referring Issue to Contested Case Proceeding, *In the Matter of the Petition of Eschelon Telecom, Inc. for Arbitration of an Interconnection Agreement with Qwest Corporation Pursuant to 47 U.S.C. § 252(b) of the Federal Telecommunications Act of 1996*. [“Minnesota Qwest-Eschelon ICA Arbitration”], OAH No. 3-2500-17369-2; MPUC Docket No. P-5340,421/IC-06-768 (March 30, 2007) [“MN PUC Arbitration Order”].

1 competitor in the markets in which Eschelon competes, as well as Eschelon's  
2 largest supplier. As such, safeguards are needed to protect against the capability  
3 that Qwest has to wield CMP as a shield and sword. Section 252 affords these  
4 safeguards through arbitrated interconnection agreement terms. Eschelon has  
5 exercised its right to bring certain terms and conditions to the Commission for  
6 review and to obtain a dispositive decision. By dispositive, I mean a decision that  
7 meets Eschelon's business need for certainty to plan its business and remain  
8 competitive and also helps avoid disputes in the future by providing clear  
9 contractual terms on important issues. Relegating those issues to CMP, rather  
10 than providing commercial certainty by deciding each issue on the merits of the  
11 disputed contract language, would not meet that need.

12 As these examples show, participating in CMP can be much like playing cards  
13 with a big brother. It's frustrating when, because he's bigger and has more access  
14 to information, he makes up the rules of the game as he goes along.<sup>209</sup> Eschelon's  
15 ability to compete is at stake, while Qwest as the dominant carrier holds the cards.  
16 Nonetheless, Congress has decided that it is the Commission who should set the  
17 "rules" by establishing interconnection agreement terms and conditions that must  
18 be filed, approved, and amended if changed.

---

<sup>209</sup> This is particularly apparent in the jeopardies example, which is discussed at greater length below and Eschelon/110 to the Testimony of Ms. Johnson.

1                   **5. ESCHELON'S POSITION IS CONSISTENT WITH**  
2                   **SECTION 252 AND CMP SCOPE AND EACH ISSUE**  
3                   **REQUIRES DISPOSITIVE ICA LANGUAGE**

4   **Q.    IS ESCHELON TRYING TO CIRCUMVENT CMP OR OTHERWISE**  
5           **“END RUN” THE PROCESS ENVISIONED BY THIS COMMISSION OR**  
6           **THE FCC IN ESTABLISHING CMP?**

7    A.    No.    Eschelon's position is fully consistent with the terms and procedures  
8           developed by the Commission and the FCC during the 271 proceedings, as shown  
9           by the above discussion of the hierarchy adopted as part of the Scope of CMP and  
10          in the SGAT, and with terms and purposes of Section 252(i) and the all-or-  
11          nothing rule, also described above.

12          Although CMP has weaknesses that become self-evident when describing CMP  
13          procedures and providing examples of how Qwest has used CMP, the  
14          Commission does not have to find that CMP is “bad” or “broken” to determine  
15          any of the disputed issues in Eschelon's favor. The Commission simply has to  
16          recognize, as it did when addressing the scope of CMP,<sup>210</sup> that interconnection  
17          agreement terms may vary and, when issues warrant arbitration and inclusion of  
18          language in the contract, the resulting publicly available terms govern. The issue  
19          then becomes whether each arbitrated issue, on its own merits, warrants inclusion  
20          in the contract, and if so, whether Eschelon's or Qwest's proposed language better  
21          fits the bill. As I understand it, according to Section 252 of the Act, the

---

<sup>210</sup> The Scope of CMP is Section 1.0 of Exhibit G to the ICA. The Commission also allowed the SGAT to go into effect, including Exhibit G containing this provision.

1 Commission must decide each issue in the arbitration petition and respond  
2 individually on the merits of that issue.<sup>211</sup> In the remainder of Eschelon’s direct  
3 testimony, Eschelon lays out each open issue and the reasons that Eschelon’s  
4 position and proposed contract language on each issue should be adopted on the  
5 merits, starting with Issue No. 1-1 and moving through the Issues by Subject  
6 Matter List.

7 **III. SUBJECT MATTER NO. 1: INTERVAL CHANGES AND PLACEMENT**

8 *Issue No. 1-1 and subparts: ICA Sections 1.7.2; 7.4.7, 9.23.9.4.3, Exhibit C*  
9 *(Group 2.0 & Group 9.0), Exhibit I (Section 3), Exhibit N, Exhibit O*

10 **Q. PLEASE DESCRIBE THE BUSINESS REASON REGARDING INTERVAL**  
11 **CHANGES AND PLACEMENT (ISSUE 1-1 AND SUBPARTS (A)-(E)).**

12 A. Provisioning intervals are critical to Eschelon’s ability to provide timely service  
13 to its End User Customers on the date they expect service. These provisioning  
14 intervals dictate the timing of service delivery to the End User Customer, as well  
15 as timing of the activities that the CLEC must perform in preparation for service  
16 provisioning. When provisioning intervals are lengthened, the End User  
17 Customer is forced to wait longer to receive service, and Eschelon is forced to  
18 incur costs and dedicate personnel to adjust its internal systems and processes to  
19 the longer interval. Shortened intervals, on the other hand, often benefit

---

<sup>211</sup> See 47 U.S.C. §252(b)(4). *See also* MN Arbitrators’ Report ¶21 (“The Administrative Law Judges agree with the Department’s analysis that any negotiated issue that relates to a term and condition of interconnection may properly be included in an ICA, subject to a balancing of the parties’ interests and a determination of what is reasonable, non-discriminatory, and in the public interest.”) (Eschelon/29).

1 customers by allowing them to receive service more quickly, yet allow the CLEC  
2 to keep the longer interval to the point necessary to effect necessary internal  
3 adjustments.

4 The Interval Changes issues (Issue 1-1 and subparts (a)-(e)) will determine  
5 whether provisioning intervals for the products that Eschelon purchases from  
6 Qwest will reside in the ICA and require negotiation and Commission approval  
7 for critical changes, as proposed by Eschelon, or whether, as proposed by Qwest,  
8 the ICA will point to non-contractual sources (such as CMP/PCAT/SIG) for  
9 provisioning intervals that can be changed by Qwest over CLEC objection.

10 There are established intervals in place today for Qwest products. CLECs who  
11 have built systems and products to support these intervals, and customers who  
12 depend on those intervals to receive service, have come to rely on these  
13 established intervals. Inclusion of intervals in the ICA is the logical way to  
14 ensure End User Customers and their providers such as Eschelon an orderly and  
15 reliable provisioning process. In contrast, relegating these provisioning intervals  
16 to non-contractual sources, as proposed by Qwest, would result in (1) no binding  
17 commitment on the part of Qwest to continue to provision service within the  
18 existing intervals, (2) no certainty for Eschelon to rely on future provisioning  
19 intervals for its business planning because its ability to deliver timely services to  
20 its customers could change at Qwest's will, and (3) no vehicle for Commission  
21 filing. In other words, Qwest's proposal would defeat the purpose of a contract.

1 It is important to note that Eschelon is not asking for different intervals in this  
2 arbitration than what Qwest already provides. Eschelon is only seeking stability,  
3 unless and until the interval is changed through an orderly process. Qwest's  
4 resistance to including currently-existing intervals in the contract signals that  
5 Qwest will, indeed, change those intervals if and when it sees fit, regardless of the  
6 negative effects on Eschelon and its End User Customers.

7 **Q. WHAT IS ESCHELON'S PROPOSAL ON ISSUE 1-1?**

8 A. Eschelon proposes alternative ICA language modifications (Eschelon proposed  
9 language shown in underline) for Issue 1-1. The first option would: (i) include  
10 provisioning intervals in Exhibit C to the ICA; (ii) require ICA Amendment  
11 (using a streamlined process) and Commission approval to lengthen provisioning  
12 intervals; and (iii) allow shortening of intervals to be implemented through CMP.  
13 Eschelon's second option for Issue 1-1 also includes provisioning intervals in  
14 Exhibit C but provides that ICA Amendment (using the streamlined process) and  
15 Commission approval would be needed for all interval changes, not just when  
16 intervals are lengthened.

17 **Issue 1-1 (1<sup>st</sup> of 2 options)**

18  
19 1.7.2 If the Commission orders, or Qwest chooses to offer and  
20 CLEC desires to accept intervals longer than those set forth  
21 in this Agreement, including Exhibit C, the Parties shall  
22 amend this Agreement under one (1) of the two (2) options  
23 set forth in Section 1.7.1 (an interval Advice Adoption  
24 Letter or interval interim Advice Adoption Letter  
25 terminating with approval of negotiated Amendment)  
26 pertaining to the new interval (rather than new product) (or

1 as otherwise ordered by the Commission). The forms of  
2 such letters are attached hereto as Exhibits N -O).

3  
4 1.7.2.1 Notwithstanding any other provision in this  
5 Agreement, the intervals in Exhibit C may be  
6 shortened pursuant to the Change Management  
7 Process (CMP) without requiring the execution or  
8 filing of any amendment to this Agreement.

9  
10 **Issue 1-1 (2<sup>nd</sup> of 2 options)**

11  
12 1.7.2 If the Commission orders, or Qwest chooses to offer and  
13 CLEC desires to accept intervals different from those set  
14 forth in this Agreement, including Exhibit C, the Parties  
15 shall amend this Agreement under one (1) of the two (2)  
16 options set forth in Section 1.7.1 (an interval Advice  
17 Adoption Letter or interval interim Advice Adoption Letter  
18 terminating with approval of negotiated Amendment)  
19 pertaining to the new interval (rather than new product) (or  
20 as otherwise ordered by the Commission). The forms of  
21 such letters are attached hereto as Exhibits N -O).

22 **Q. WHAT IS ESCHELON'S PROPOSAL FOR ISSUES 1-1(A) THROUGH**  
23 **(E)?**

24 **A.** In Issues 1-1(a) through (e), Eschelon addresses the same issues as 1-1 (*i.e.*,  
25 intervals should be in the ICA and changed through amendment and Commission  
26 approval) in the appropriate ICA sections regarding specific products Eschelon  
27 may purchase from Qwest pursuant to the ICA. Issue 1-1(a) applies to  
28 interconnection trunk intervals; 1-1(b) applies to UDIT rearrangement intervals;  
29 1-1(c) applies to Local Interconnection Services (LIS) Trunking intervals; 1-1(d)  
30 applies to Individual Case Basis intervals; and 1-1(e) applies to LMC (Loop-Mux  
31 Combinations) intervals.

32 **Issue 1-1(a)**

1           7.4.7 Intervals for the provision of Interconnection trunks will  
2 conform to the performance objectives set forth in Section  
3 20. Intervals are set forth in Exhibit C. Any changes to the  
4 Interconnection trunk intervals will be made as described in  
5 Section 1.7.2 through the Change Management Process  
6 (CMP) applicable to the PCAT, pursuant to the procedures  
7 set forth in Exhibit G. Operational processes within Qwest  
8 work centers are discussed as part of the CMP. Qwest  
9 agrees that CLEC shall not be held to the requirements of  
10 the PCAT.  
11

12           **Issue 1-1(b)**: [Eschelon proposes deletion of Qwest's proposed footnote regarding  
13 UDIT rearrangements from Exhibit C, and include intervals in  
14 Exhibit C].

15           **Issue 1-1(c)**: [Eschelon proposes to include the LIS Trunking intervals in Exhibit  
16 C].

17           **Issue 1-1(d)**<sup>212</sup>

18           3.1.1 For the following products and services, for which the  
19 interval is ICB, Qwest shall provide the ICB due date  
20 interval to CLEC as follows:

21  
22           3.1.1.1 No later than seventy-two (72) hours after the application  
23 date for:

- 24           a) 25 or more 2/4 wire analog loops;  
25           b) 25 or more 2-wire non-loaded loops;  
26           c) 25 or more 4-wire non-loaded loops;  
27           d) 25 or more xDSL-I capable loops;  
28           e) 9 or more conditioned loops for 2/4 wire non-loaded,  
29 ADSL compatible, xDSL-I, ISDN; and  
30           f) 25 or more lines Quick Loop and Quick Loop with LNP.  
31

32           3.1.1.2 No later than one-hundred and ninety two (192) hours after  
33 the application date for:

- 34           a) 25 or more DS0 UDITs;  
35           b) 25 or more DS0 EEL/Loop Mux;

---

<sup>212</sup> The language for Issue 1-1(d) resides in Section 3 of Exhibit I (ICB intervals) to the ICA.

- c) 4 or more DS3 UDITs; and
- d) 4 or more DS3 EEL/Loop Mux

**Issue 1-1(e)**<sup>213</sup>

~~9.23.9.4.3 Standard s~~ Service intervals for LMC(s) are set forth in Exhibit C. in the Service Interval Guide (SIG) available at [www.qwest.com/wholesale](http://www.qwest.com/wholesale)

**Q. WHAT IS QWEST'S PROPOSAL FOR ISSUES 1-1 AND (A)-(E)?**

A. Qwest proposes the following language for these issues:

**Issue 1-1**

1.7.2 Notwithstanding any other provision in this agreement, the attached Exhibit C will be modified pursuant to the CMP process without requiring the execution of an amendment.

**Issue 1-1(a)**

7.4.7 Intervals for the provision of Interconnection trunks will conform to the performance objectives set forth in Section 20. Intervals are set forth in Exhibit C. Any changes to the Interconnection trunk intervals will be made through the Change Management Process (CMP) applicable to the PCAT, pursuant to the procedures set forth in Exhibit G as described in Section 1.7.2. Operational processes within Qwest work centers are discussed as part of the CMP. Qwest agrees that CLEC shall not be held to the requirements of the PCAT.

**Issue 1-1(b)**

Qwest proposed footnote in Exhibit C: "For UDIT rearrangements see Qwest's wholesale website for the Service Interval guide."

---

<sup>213</sup> The remainder of Section 9.23.9.4.3 not shown under Issue 1-1(e) is addressed under Issue 9-61(a) and 9-61(b) below.

1        **Issue 1-1(c)** [Qwest proposes deletion of entire Section 9.0 of Exhibit C (LIS  
2        Trunking Service Intervals).]

3

4        **Issue 1-1(d)**<sup>214</sup>

5                3.2    For ICB intervals for those standard products and services  
6                that require negotiated project time lines for installation,  
7                such as 2/4 wire analog loop for more than twenty-five (25)  
8                loops, Qwest shall make every attempt to provide an FOC  
9                to CLEC pursuant to the guidelines contained in the  
10               Service Interval Guide.

11

12        **Issue 1-1(e)**

13                                [24.4.4.3] Standard Service intervals for LMC(s) Loops  
14                                are in the Service Interval Guide (SIG) available at  
15                                www.qwest.com/wholesale-set forth in Exhibit C.

16        Qwest's proposal for Issues 1-1 and 1-1 (a) through (e) are designed to address  
17        provisioning intervals in non-contractual sources such as CMP, PCAT, and SIG,  
18        rather than in the ICA. Qwest's language for Issue 1-1 makes clear that changes  
19        will be made to these intervals as Qwest desires, without ICA amendment or  
20        Commission approval. Qwest makes several arguments in support of its  
21        proposals on Issue 1-1 and (a)-(e), most of which relate to its overarching position  
22        that the CMP process should be used to ensure uniformity among CLECs.<sup>215</sup>

---

<sup>214</sup> Qwest's proposed language for Issue 1-1(d) resides in Exhibit I (ICB intervals) to the ICA.

<sup>215</sup> See, e.g., Qwest Response, p. 41. I address Qwest's position on the CMP process and the extent to which it should be relied upon in the ICA in place of contractual certainty above.

1 Issue No. 1-1: Changes to Intervals – Section 1.7.2 and Exhibits N and O

2 **Q. WHAT ARE THE KEY REASONS THAT YOU RECOMMEND**  
3 **ADOPTION OF ESCHELON’S LANGUAGE OVER QWEST’S FOR**  
4 **ISSUE 1-1 “INTERVAL CHANGES”?**

5 A. Eschelon’s proposed language offers the reliability and consistency necessary for  
6 End User Customers and their providers such as Eschelon to plan for their  
7 business needs. The ability to look to the ICA for an essential term of each  
8 product – the interval in which it will be provisioned – is consistent with the  
9 scheme of the ICA and also with pronouncements of the FCC, as discussed more  
10 fully below. The Eschelon language offers the Commission the opportunity to  
11 use its regulatory oversight in a manner that is consistent with the Commission’s  
12 mission, yet streamlined. And Eschelon’s proposed language would not create a  
13 system that is unduly burdensome for either Qwest or regulators.

14 **Q. YOU MENTIONED THAT ESCHELON’S LANGUAGE CREATES THE**  
15 **OPPORTUNITY FOR THE COMMISSION TO ASSERT ITS**  
16 **REGULATORY OVERSIGHT. CAN YOU EXPAND ON THIS?**

17 A. Eschelon’s language is necessary to ensure that the Commission considers and  
18 approves a longer interval before it goes into effect. This would allow the  
19 Commission to consider the effects that these longer service intervals will have on  
20 CLECs and their End User Customers and weigh that against Qwest’s reasons for  
21 lengthening the intervals. The Commission will also be able to consider whether  
22 Qwest’s new provisioning intervals meet applicable rules and regulations. For

1 example, the Commission must determine that the longer interval still meets the  
2 FCC’s requirement that UNEs be provided on terms that are just, reasonable, and  
3 nondiscriminatory, and that the UNE is provided in “substantially the same time  
4 and manner” (for an element with a retail analogue) and in a way that provides a  
5 “meaningful opportunity to compete” (for an element with no retail analogue).<sup>216</sup>  
6 The Commission would have no opportunity to make these determinations before  
7 Qwest makes these changes if Qwest has its way.

8 **Q. HAS ANY STATE COMMISSION RECOGNIZED THE POTENTIALLY**  
9 **HARMFUL EFFECTS OF QWEST LENGTHENING PROVISIONING**  
10 **INTERVALS?**

11 A. Yes. The Washington Commission recognized this in the context of its review of  
12 Qwest’s request for Section 271 authorization. In that case, Qwest proposed an  
13 interval for DS1 loops that was longer than the interval that the Commission had  
14 established when it approved US WEST’s merger with Qwest, and the  
15 Washington Commission directed that the proposed interval be reduced to that  
16 which the Commission had previously approved.<sup>217</sup> In addition, in the recent  
17 Verizon/CLEC arbitration in Washington, the Washington Commission found it

---

<sup>216</sup> Memorandum Opinion and Order, *In the Matter of the Application by Bell Atlantic New York for Authorization Under Section 271 of the Communications Act To Provide In-Region, InterLATA Service in the State of New York*, FCC 99-404, CC Docket No. 99-295 (rel. December 22, 1999) (“NY271 Order”) at ¶ 125.

<sup>217</sup> Twentieth Supplemental Order, Initial Order (Workshop Four): Checklist Item No. 4; Emerging Services, General Terms and Conditions, Public Interest, Track A, and Section 272, *In the Matter of the Investigation into US WEST COMMUNICATIONS, INC.’s Compliance with Section 271 of the Telecommunications Act of 1996 and In the Matter of US WEST COMMUNICATIONS INC.’s Statement of Generally Available Terms Pursuant to Section 252(f) of the Telecommunications Act of 1996*. Washington Docket Nos. UT-003022 and UT-003040 (November 14, 2001) (“WA 271 Order”), ¶ 125.

1 appropriate to include an interval in the ICA to protect both ILEC and CLECs  
2 “from unnecessary delay and gamesmanship.”<sup>218</sup>

3 **Q. HAS ANOTHER STATE COMMISSION FOUND THE NEED TO EXERT**  
4 **ITS AUTHORITY WITH REGARD TO QWEST INTERVAL CHANGES?**

5 A. Yes. When Qwest previously tried to move from a 5-day to a 9-day loop interval  
6 by simultaneously lengthening the interval for its retail customers, the Minnesota  
7 Commission rejected Qwest’s parity argument and found that the 5-day loop  
8 interval allowed competitors a meaningful opportunity to compete.<sup>219</sup> The  
9 Minnesota Commission found that Qwest cannot make intervals “unreasonable by  
10 lengthening the intervals for provision of retail service.”<sup>220</sup>

11 **Q. WOULD ESHELON’S PROPOSAL #1 REQUIRE COMMISSION**  
12 **APPROVAL FOR ALL INTERVAL CHANGES?**

13 A. No. Eschelon’s language will allow Qwest to shorten intervals without amending  
14 the ICA, only requiring negotiation and amendment for lengthening the intervals.  
15 According to Qwest’s website, Qwest shortened service intervals in its SIG 39  
16 times from July 2002 to June 2006. In contrast, according to Qwest, it has not

---

<sup>218</sup> Washington Order No. 18, ¶¶ 70, 114.

<sup>219</sup> Findings of Fact, Conclusions of Law and Recommendations, *In the Matter of a Commission Investigation into Qwest’s Compliance with Section 271(c)(2)(B) of the Telecommunications Act of 1996; Checklist Items 1,2,4,5,6,11,13, and 14*, Docket No. P-421/CI-01-1371 (Sept. 16, 2003) (“*MN ALJ 271 Order*”), ¶125.

<sup>220</sup> *MN ALJ 271 Order*, ¶ 125.

1           lengthened any service intervals during this same time frame.<sup>221</sup> Based on past  
2           Qwest experience,<sup>222</sup> a vast majority of interval changes (if not all changes) would  
3           not require ICA amendments under Eschelon’s proposed language. Therefore,  
4           Eschelon’s proposal would not be burdensome because it would rarely, if ever, be  
5           used, and would be used only when there is a disagreement between the CLEC  
6           and Qwest. Qwest’s proposal, on the other hand, would first require CLECs to  
7           address this issue in CMP, during which time Qwest can implement longer  
8           intervals over the challenge of CLECs, and then require the CLECs to come to the  
9           Commission when Qwest’s changes affect the service provisioned to CLEC End  
10          User Customers.

11       **Q.    YOU STATED THAT ESCHELON’S PROPOSAL FOR THIS ISSUE IS**  
12       **CONSISTENT WITH THE SCHEME OF THE ICA. IS IT TRUE, AS**  
13       **QWEST IMPLIES, THAT CMP CONTROLS SERVICE INTERVALS**  
14       **THAT ARE CONTAINED IN ICAS?**

---

<sup>221</sup> Qwest Response, p. 41, lines 16-18. Qwest states “To date, since Qwest obtained 271 approval, *all* such modifications have been reductions in the lengths of service intervals for various services and have been for the benefit of CLECs.” Qwest also states at page 42 of its Response: “Eschelon seeks protection against modifications that have not occurred even once since 271 approval, that is, the lengthening of service intervals...” Eschelon counted two lengthened intervals during this time frame, but these lengthened intervals were to make corrections and comply with state service quality rules. Qwest “Service Interval Guide for Resale, UNE & Interconnection Services History Log” [http://www.qwest.com/wholesale/downloads/2006/060615/HL\\_SIG\\_V71.doc](http://www.qwest.com/wholesale/downloads/2006/060615/HL_SIG_V71.doc)

<sup>222</sup> Though Qwest points out that all interval changes have been shortened intervals, it has not made any commitment to continue this trend. And, unlike in previous years, no 271 approvals are pending to incent Qwest to shorten intervals.

1 A. No. According to the CMP Document, the only interval changes required by  
2 CMP to go through CMP are interval changes to Qwest's SIG.<sup>223</sup> If an interval in  
3 the contract conflicts with an interval in the SIG, the CMP Document is very clear  
4 that the ICA controls.<sup>224</sup> Qwest's assertion that these intervals should be  
5 relegated to CMP to ensure uniformity is belied by Qwest's CMP documentation  
6 that discusses potential differences between the intervals established in SIG and  
7 those negotiated or arbitrated between Qwest and the CLEC in an ICA.

8 **Q. YOU ALSO TESTIFIED THAT ESCHELON'S PROPOSAL FOR**  
9 **INTERVALS IS CONSISTENT WITH FCC FINDINGS. HAS THE FCC**  
10 **ADDRESSED RELIANCE ON NON-CONTRACTUAL WEBSITE**  
11 **POSTINGS, AS ADVOCATED BY QWEST IN ITS PROPOSAL?**

12 A. Yes. In its *Forfeiture Order*, the FCC held that at "no point did we create a  
13 general 'web-posting exception' to section 252(a)."<sup>225</sup> In other words, the FCC  
14 has made clear that Qwest cannot avoid negotiation or arbitration simply by  
15 posting changes (in this instance, changes to intervals) to the internet – which is  
16 what Qwest is attempting to do here.

17 **Q. YOU EXPLAINED ABOVE THAT COMMISSION APPROVAL WOULD**  
18 **RARELY, IF EVER, BE NEEDED BECAUSE LENGTHENED**  
19 **INTERVALS HAVE NOT OCCURRED IN THE PAST. HAS ESCHELON**

---

<sup>223</sup> CMP Document, Eschelon/53, Johnson/40, §5.4.3 ("Reduction to an interval in Qwest's SIG"); and Johnson/44, §5.4.5 ("Increase to an interval in Qwest's Service Interval Guide (SIG)").

<sup>224</sup> Exhibit Eschelon/53, CMP Document at §1.0.

<sup>225</sup> *FCC Forfeiture Order*, ¶32.

1           **DESIGNED ITS PROPOSAL SUCH THAT IT IS NOT UNDULY**  
2           **BURDENSOME ON THE RARE OCCASION THAT COMMISSION**  
3           **APPROVAL IS SOUGHT FOR A LONGER INTERVAL?**

4    A.    Yes. Amending the contract for changes in intervals is an efficient process  
5           because Eschelon’s language uses established streamlined procedures to amend.  
6           Eschelon’s proposed Section 1.7.2 and Exhibits N and O largely mirror Section  
7           1.7.1 and Exhibits L and M, which contain streamlined procedures agreed to by  
8           Eschelon and Qwest, to implement new products in the ICA.<sup>226</sup> And, assuming  
9           Qwest does not radically change past policy to pursue longer intervals, ICA  
10          amendments would not be necessary for interval changes under Eschelon’s  
11          Proposal #1.

12   **Q.    GIVEN THE IMPORTANCE OF INTERVALS, SHOULDN’T THE ICA**  
13   **STATE THAT ALL INTERVAL CHANGES REQUIRE COMMISSION**  
14   **APPROVAL?**

15   A.    Eschelon’s Proposal #1 does not require Commission approval for shortened  
16          intervals because shortened intervals can benefit the CLEC and its End User  
17          Customers, and a longer due date can be obtained, if needed. Since changes to  
18          shorten intervals would almost certainly be agreed to, and occur much more

---

<sup>226</sup> Compare closed Exhibits L (Advice Adoption Letter) and M (Interim Advice Adoption Letter) that apply to new products to Eschelon-proposed Exhibits N (Interval Advice Adoption Letter) and O (Interval Interim Advice Adoption Letter) that apply to new intervals. The differences between the agreed-to Advice Adoption Letters and the Eschelon-proposed Advice Adoption Letters is that Eschelon’s proposed Advice Adoption Letters use the term “new interval for product/service” instead of the term “new product” (with a few additional textual changes to refer to intervals instead of “rates, terms and conditions” for a new product). The agreed-to Advice Adoption Letters also require the rates, terms and conditions related to the new product be attached to the Letter, whereas the Eschelon-proposed Letter would refer to the new interval in the body of the Letter.

1 frequently than lengthened intervals, Eschelon’s proposal efficiently utilizes  
2 resources of the Commission, Qwest and CLECs by requiring Commission  
3 approval only when disagreement about the change in interval may occur.

4 However, given the importance of intervals, the Commission may desire that all  
5 interval changes require Commission-approved amendments. If so, Eschelon  
6 proposes a second language option (Proposal #2), which requires ICA amendment  
7 whether an interval is lengthened or shortened. This option also uses the  
8 established, streamlined procedures that have been applicable in the past to new  
9 products (see proposed ICA Section 1.7.1)<sup>227</sup> to expedite these amendments.

10 Issue No. 1-1(a): Interconnection Trunks – Section 7.4.7; Issue 1-1(b): UDIT  
11 Rearrangements—Exhibit C, Group 2.0; Issue 1-1(c): LIS Trunking—Exhibit C,  
12 Group 9.0; Issue 1-1(e): Intervals for Loop Mux Combinations (LMC)—Section  
13 9.23.9.4.3 (Eschelon)/ Section 24.4.4.3 (Qwest)

14 **Q. WHAT IS THE RATIONALE BEHIND ESCHELON’S PROPOSALS ON**  
15 **ISSUES 1-1(A) INTERCONNECTION TRUNKS, 1-1(B) UDIT**  
16 **REARRANGEMENTS,<sup>228</sup> 1-1(C) LIS TRUNKING, AND 1-1(E) LOOP-**  
17 **MUX COMBINATIONS?**

---

<sup>227</sup> See also SGAT Section 1.7.1 and subparts & Exhibits L and M.

<sup>228</sup> Qwest’s website describes a UDIT Rearrangement as follows: Rearrangement allows you to move or rearrange your UDIT or E-UDIT terminations on your demarcation point or change your UDIT or E-UDIT options. These Rearrangements are available through a single office or dual office request. Single office Rearrangements are limited to the movement of terminations within a single wire center. Dual office Rearrangements are used to change options or movement of terminations in two wire centers. Rearrangement is only available for existing and working UDITs or E-UDITs. <http://www.qwest.com/wholesale/pcat/udit.html>

1 A. These issues also relate to whether intervals for various products that Eschelon  
2 purchases from Qwest must be contained in the contract, or whether it is sufficient  
3 for the contract to include references to Qwest's PCAT, SIG or its website.

4 The intervals proposed by Eschelon in Exhibit C for each of these products are  
5 identical to the intervals that Qwest provides for the products today. Therefore,  
6 Eschelon's proposal requires no change by Qwest; Eschelon seeks only the  
7 inclusion of the current intervals in the Eschelon / Qwest contract, with the ability  
8 of Qwest to lengthen intervals through the amendment process. Indeed,  
9 Eschelon's proposed language virtually mirrors SGAT Section 9.23.5.3 (which is  
10 also the same language as in the Qwest-AT&T ICA approved by this  
11 Commission). In contrast, a unilateral lengthening of product intervals by Qwest  
12 could significantly adversely affect Eschelon's business and its ability to compete.  
13 And Qwest has identified no business reason, new circumstance or other basis for  
14 varying from what is in the SGAT or ICAs with other carriers.

15 Issue No. 1-1(d): ICB Provisioning Intervals – Exhibit I, Section 3

16 **Q. WHAT IS ESCHELON'S RATIONALE FOR ITS PROPOSAL FOR ISSUE**  
17 **1-1(D)?**

18 A. Again, Qwest's language points to non-contractual sources (here the SIG) for the  
19 timeframe in which Qwest will provide ICB intervals. Eschelon's proposal, on  
20 the other hand, includes the ICB due date intervals in the ICA.

1 **Q. ARE THERE OTHER REASONS THAT ESCHELON’S LANGUAGE**  
2 **SHOULD BE ADOPTED FOR ISSUE 1-1(D), BESIDES ESCHELON’S**  
3 **OVERALL REASONING THAT INTERVALS SHOULD BE INCLUDED**  
4 **IN THE ICA?**

5 A. Yes. Section 3.1 of Exhibit I (“Individual Case Basis”) states that Qwest will  
6 provide an ICB interval within 20 business days, unless the ICA contains a  
7 “specific provision” for when the ICB interval will be provided. Qwest provides  
8 an ICB interval for certain products in the Firm Order Confirmation (FOC), which  
9 arrives in much less than 20 days. Therefore, Eschelon’s proposal for Issue 1-  
10 1(d) is designed to include in the ICA the same ICB provisioning intervals for  
11 certain products that Qwest provides via FOCs in less than 20 business days  
12 today.<sup>229</sup> Eschelon’s proposal requires no change by Qwest in its ICB due date  
13 intervals<sup>230</sup> and, unlike Qwest’s proposal, gives meaning to Section 3.1 of Exhibit  
14 I.

15 **Q. PLEASE ELABORATE ON HOW ESCHELON’S PROPOSAL GIVES**  
16 **MEANING TO SECTION 3.1 OF EXHIBIT I.**

17 A. Section 3 of Exhibit I discusses “specific provision(s)” in which ICB intervals  
18 will be less than 20 business days. Eschelon’s proposed language only spells out  
19 some of those specific provisions – provisions that exist today – to ensure that

---

<sup>229</sup> These products and intervals are found in Eschelon’s proposed language for Issue 1-1(d), shown above.

<sup>230</sup> [http://www.qwest.com/wholesale/downloads/2006/060615/InterconnSIG\\_V71.doc](http://www.qwest.com/wholesale/downloads/2006/060615/InterconnSIG_V71.doc)

1 Qwest provides these ICB intervals in the FOC as it does today and not the much  
2 longer 20 business day interval.

3 In addition, Section 9.2.4.3.1. of the ICA provides in agreed upon language that,  
4 for certain loop products, Qwest will return a FOC to CLEC within 72 hours from  
5 order receipt. It states that “[s]uch FOC will provide CLEC with a firm Due Date  
6 commitment...” There is no exception for ICB due dates. Eschelon’s proposed  
7 language would therefore connect the dots between Section 3.1 of Exhibit I,  
8 which discusses specific provisions in which Qwest will provide ICB intervals  
9 within the FOC period, and Section 9.2.4.3.1.2, which discusses FOC intervals of  
10 72 hours.

11 **Q. DID THE MINNESOTA COMMISSION AGREE WITH ESCHELON’S**  
12 **POSITIONS ON ISSUES 1-1 AND SUBPARTS WHEN THESE SAME**  
13 **ISSUES WERE EXAMINED IN THE MINNESOTA ARBITRATION**  
14 **PROCEEDING?**

15 A. Yes. The Minnesota Arbitrators’ Report, as affirmed by the Minnesota  
16 Commission, ruled in favor of Eschelon on Issues 1-1 and subparts, finding:

17 22. Eschelon has provided convincing evidence that the CMP  
18 process does not always provide CLECs with adequate  
19 protection from Qwest making important unilateral changes in  
20 the terms and conditions of interconnection. Service intervals  
21 are critically important to CLECs, and Qwest has only  
22 shortened them in the last four years. Qwest has identified no  
23 compelling reason why inclusion of the current intervals in the  
24 ICA would harm the effectiveness of the CMP process or  
25 impair Qwest’s ability to respond to industry changes. The  
26 Administrative Law Judges recommend that Eschelon’s first

1 proposal for Issue 1-1 be adopted and that its language for  
2 Issues 1-1(a)-(e) also be adopted.<sup>231</sup>

3 The Minnesota Commission agreed with Eschelon that Qwest can make unilateral  
4 changes to intervals in CMP, and that adopting Eschelon’s proposal (the same  
5 proposal Eschelon has offered in this proceeding for Issues 1-1 and subparts)  
6 would not harm the effectiveness of CMP or Qwest’s ability to respond to  
7 industry changes. Furthermore, as I discuss above in my discussion of CMP and  
8 the need for contractual certainty, the CMP Document’s scope provision  
9 recognizes potential differences in terms between ICAs and CMP, and says that  
10 when these differences arise, the ICAs rule. Though Qwest has recognized and  
11 discussed the CMP scope provision,<sup>232</sup> Qwest argues that including terms in ICAs  
12 that are different from the CMP would “subvert”<sup>233</sup> or “undermine”<sup>234</sup> the CMP.  
13 The Minnesota Arbitrators, as affirmed by the Minnesota Commission, found that  
14 Qwest is wrong:

15 The CMP document itself provides that in cases of conflict  
16 between changes implemented through the CMP and any CLEC  
17 ICA, the rates, terms and conditions of the ICA shall prevail. In  
18 addition, if changes implemented through CMP do not necessarily

---

<sup>231</sup> Eschelon/29, Denney/7 (Minnesota Arbitrators’ Report, OAH 3-2500-17369-2/MPUC No. P-5340,421/IC-06-768, ¶ 22). The Minnesota Commission adopted the Arbitrators’ Report in relevant part. See, Eschelon/30, Order Resolving Arbitration Issues, Requiring Filed Interconnection Agreement, Opening Investigation and Referring Issue to Contested Case Proceeding, *In the Matter of the Petition of Eschelon Telecom, Inc. for Arbitration of an Interconnection Agreement with Qwest Corporation Pursuant to 47 U.S.C. § 252(b) of the Federal Telecommunications Act of 1996*. [“Minnesota Qwest-Eschelon ICA Arbitration”], OAH No. 3-2500-17369-2; MPUC Docket No. P-5340,421/IC-06-768 (March 30, 2007) [“MN PUC Arbitration Order”].

<sup>232</sup> E.g., Direct Testimony of Renee Albersheim in Colorado Docket 06B-497T (Eschelon-Qwest Arbitration case), p. 7 (12/15/06).

<sup>233</sup> See, e.g., Albersheim Colorado Direct Testimony, Colorado Docket No. 06B-497T, p. 7, line 31.

<sup>234</sup> See, e.g., Qwest Response, pp. 10, line 1; p. 13, line 26; p. 43, line 11.

1 present a direct conflict with an ICA but would abridge or expand  
2 the rights of a party, the rates, terms, and conditions of the ICA  
3 shall prevail. Clearly, the CMP process would permit the  
4 provisions of an ICA and the CMP to coexist, conflict, or  
5 potentially overlap. The Administrative Law Judges agree with the  
6 Department's analysis that any negotiated issue that relates to a  
7 term and condition of interconnection may properly be included in  
8 an ICA, subject to a balancing of the parties' interests and a  
9 determination of what is reasonable, non-discriminatory, and in the  
10 public interest.<sup>235</sup>

11 Given that ICA and CMP terms can "coexist, conflict, or potentially overlap,"  
12 there is no basis for Qwest's position that intervals should be excluded from the  
13 ICA because they are also addressed in CMP. The same goes for the other issues  
14 that Qwest recommends excluding from the ICA and relegating to CMP (*see, e.g.*,  
15 Issues 12-67 and 12-71 – 12-73).

16 **Q. PLEASE SUMMARIZE THE INTERVAL CHANGE ISSUES (ISSUES 1-1**  
17 **AND (A)-(E)).**

18 A. Provisioning intervals are critical to Eschelon's ability to provide timely service  
19 to its End User Customers on the date they expect service. Eschelon's proposed  
20 language calls for this key term to be included in ICA language for the relevant  
21 products offered by Qwest. Eschelon does not ask for any change to Qwest's  
22 current intervals, just the inclusion of the terms in the ICA to provide necessary  
23 reliability for end users and Eschelon. Eschelon's proposal allows the  
24 Commission appropriate regulatory oversight over these significant provisions,  
25 but allows for an existing, streamlined process to execute any change. Eschelon's  
26 language is consistent with the relationship between the ICA and CMP and in

---

<sup>235</sup> Eschelon/29, Denney/6-7 (MN Arbitrators' Report, ¶ 21).

1 harmony with FCC findings requiring more than ILEC “website posting” of terms  
2 and conditions. The Commission should reject Qwest’s language, which would  
3 allow Qwest non-contractual control over provisioning intervals.

4 **IV. SUBJECT MATTER NO. 11: POWER**

5 Issue No. 8-21 and subparts: ICA Sections 8.2.1.29.2.1; 8.2.1.29.2.2; 8.3.1.6;  
6 8.3.1.6.1; 8.3.1.6.2 and subparts, 8.1.4.1 and subparts, 8.6.1.3.1 and Exhibit A

7 **Q. WHAT IS THE BUSINESS NEED ESCHELON ADDRESSES IN SECTION**  
8 **8 OF THE ICA WITH ITS PROPOSED CONTRACT LANGUAGE**  
9 **RELATED TO ISSUES 8-21 (A)-(E)?**

10 A. Eschelon purchases DC (“Direct Current”) power from Qwest to electrify  
11 telecommunications equipment it houses in collocation areas within Qwest’s  
12 central offices. Eschelon purchases DC power produced by the same “power  
13 plant” equipment Qwest uses to electrify its own telecommunications equipment.  
14 The contract language proposed by Qwest would force Eschelon to pay for large  
15 amounts of power plant capacity it does not use. Likewise, it would force  
16 Eschelon to pay more for DC power than Qwest itself pays. Eschelon’s proposed  
17 language is meant to ensure that Eschelon pays for the DC power and the power  
18 plant capacity that it uses, and no more. Likewise, Eschelon’s language is meant  
19 to prohibit the type of discrimination inherent in Qwest’s proposal.

20 **Q. WHAT IS ESCHELON’S PROPOSAL FOR ISSUES 8-21 AND (A)-(E)?**

1 A. Eschelon proposes the following language for Issues 8-21 and (a)-(e). Eschelon-  
2 proposed language opposed by Qwest is shown in underlined text, while Qwest-  
3 proposed language that Eschelon opposes is shown in ~~strikeout text~~:

4 **Issue 8-21**

5 8.2.1.29.2.1 CLEC orders DC power ~~plant~~ feeder cables in  
6 increments of twenty (20) amps per feed minimum. If CLEC  
7 orders an increment larger than sixty (60) amps, engineering  
8 practice normally terminates such feed on a power board. Qwest  
9 measures power ~~usage~~ on the power board, as described in Section  
10 8.2.1.29.2.2 below. If CLEC orders an increment of sixty (60)  
11 amps or less, the power feed will normally appear on a Battery  
12 Distribution Fuse Board (BDFB). No power usage measurement  
13 occurs at a BDFB.

14 **Issue 8-21(a)**

15 8.2.1.29.2.2 Measurement of ~~Power~~ Usage at the Power Board –  
16 Unless CLEC requests power measurement, power will not be  
17 measured. Qwest will bill CLEC ~~power usage~~ based on the size of  
18 the feeder cable ordered pursuant to Section 8.2.1.29.2.1 above  
19 ~~amount of power ordered~~ unless power measurement is requested  
20 and until a reading is taken pursuant to this Section. Qwest will  
21 measure ~~power~~ usage at the power board on a semi-annual basis.  
22 However, Qwest also agrees to take a reading within thirty (30)  
23 Days of a written CLEC request. Qwest will perform a maximum  
24 of four (4) readings per year for a particular Collocation site.  
25 ~~CLEC is required to have its equipment in place prior to making~~  
26 ~~any request for Qwest measure power usage.~~ If the initial  
27 measurement is zero, CLEC must notify Qwest when its equipment  
28 is in place and allow Qwest an additional reading to measure  
29 power. Based on these readings, if CLEC is utilizing less than the  
30 ordered amount of power, Qwest will reduce the monthly ~~power~~  
31 usage rate to CLEC's actual use based on the reading from the date  
32 of CLEC's measuring request on a going forward basis until the  
33 next reading. If CLEC is utilizing more than the ordered amount,  
34 Qwest will increase the monthly usage rate to the CLEC's actual  
35 use. Once Qwest receives a CLEC measuring request, it will bill  
36 the actual power usage rate based on the reading from the date of  
37 the CLEC's measuring request, on a going forward basis, until the  
38 next reading.

1

2

**Issue 8-21(b)**

3

8.3.1.6 -48 Volt DC Power. There are two -48 Volt DC Power charges, as described below, one for -48 Volt DC Power Plant and one for -48 Volt DC Power Usage. Both Power Charges described in this Section are adjusted based on usage readings when power is measured.

4

5

6

7

8

9

**Issue 8-21(c)**

10

8.3.1.6.1 There are two -48V DC Power charges: (1) The -48 Volt DC Power Plant charge provides -48 Volt DC power to CLEC collocated equipment and is fused at one hundred twenty-five percent (125%) of request. The DC Power Plant Charge recovers the cost of the capacity of the power plant available for CLEC's use. (2) The -48 Volt DC Power Usage Charge, which is also specified in Exhibit A. Both -48V DC Power charges may be either non-measured or measured, as follows:

11

12

16 **Issue 8-21(e)**

17 8.1.4 Power Plant

18 8.1.4.1.1 Less Than 60 Amps, ~~per Amp Ordered~~

19 8.1.4.1.2 Equal to or Greater Than 60 Amps, ~~per Amp Ordered~~

20 8.1.4.2 Power Usage

21 8.1.4.2.1 Less Than 60 Amps, ~~per Amp Ordered~~

22 8.1.4.2.2 Greater Than 60 Amps, ~~per Amp Ordered or Used~~

23 Eschelon and Qwest also disagree on the appropriate power plant rates under  
24 Issue 8-21(e). Eschelon proposes rates of \$9.20 and \$7.32 for rate elements  
25 8.1.4.1.1 and 8.1.4.1.2 of Exhibit A, respectively, compared to Qwest's proposed  
26 rates of \$11.95 and \$9.31, respectively. Mr. Denney addresses these rate element  
27 issues under Issues 22-90 and subparts.

28 **Q. WHAT IS QWEST'S PROPOSAL FOR ISSUES 8-21 AND (A)-(E).**

1 A. Qwest's proposed ICA language is shown below. Qwest proposed language that  
2 Eschelon opposes is underlined and Eschelon-proposed language opposed by  
3 Qwest is shown in ~~strikeout~~.

4 **Issue 8-21**

5 8.2.1.29.2.1 CLEC orders DC power plant feeder cables in  
6 increments of twenty (20) amps per feed minimum. If CLEC  
7 orders an increment larger than sixty (60) amps, engineering  
8 practice normally terminates such feed on a power board. Qwest  
9 measures power usage on the power board, as described in Section  
10 8.2.1.29.2.2 below. If CLEC orders an increment of sixty (60)  
11 amps or less, the power feed will normally appear on a Battery  
12 Distribution Fuse Board (BDFB). No power usage measurement  
13 occurs at a BDFB.

14 **Issue 8-21(a)**

15 8.2.1.29.2.2 Measurement of Power Usage at the Power Board –  
16 Unless CLEC requests power measurement, power will not be  
17 measured. Qwest will bill CLEC power usage based on the ~~size of~~  
18 ~~the feeder cable ordered pursuant to Section 8.2.1.29.2.1 above~~  
19 amount of power ordered unless power measurement is requested  
20 and until a reading is taken pursuant to this Section. Qwest will  
21 measure power usage at the power board on a semi-annual basis.  
22 However, Qwest also agrees to take a reading within thirty (30)  
23 Days of a written CLEC request. Qwest will perform a maximum  
24 of four (4) readings per year for a particular Collocation site.  
25 CLEC is required to have its equipment in place prior to making  
26 any request for Qwest measure power usage. ~~If the initial~~  
27 ~~measurement is zero, CLEC must notify Qwest when its equipment~~  
28 ~~is in place and allow Qwest an additional reading to measure~~  
29 ~~power.~~ Based on these readings, if CLEC is utilizing less than the  
30 ordered amount of power, Qwest will reduce the monthly power  
31 usage rate to CLEC's actual use based on the reading from the date  
32 of CLEC's measuring request on a going forward basis until the  
33 next reading. If CLEC is utilizing more than the ordered amount,  
34 Qwest will increase the monthly usage rate to the CLEC's actual  
35 use. Once Qwest receives a CLEC measuring request, it will bill  
36 the actual power usage rate based on the reading from the date of  
37 the CLEC's measuring request, on a going forward basis, until the  
38 next reading.  
39

1           **Issue 8-21(b)**

2           8.3.1.6 -48 Volt DC Power. There are two -48 Volt DC Power  
3           charges, as described below, one for -48 Volt DC Power Plant and  
4           one for -48 Volt DC Power Usage. ~~Both Power Charges described~~  
5           ~~in this Section are adjusted based on usage readings when power is~~  
6           ~~measured.~~  
7

8           **Issue 8-21(c)**

9           8.3.1.6.1 ~~There are two -48V DC Power charges: (1) The -48 Volt~~  
10          ~~DC Power Plant charge provides -48 Volt DC power to CLEC~~  
11          ~~collocated equipment and is fused at one hundred twenty-five~~  
12          ~~percent (125%) of request. The DC Power Plant Charge recovers~~  
13          ~~the cost of the capacity of the power plant available for CLEC's~~  
14          ~~use. The -48 Volt DC Power Usage Charge, which is also~~  
15          ~~specified in Exhibit A. Both -48V DC Power charges may be~~  
16          ~~either non-measured or measured, as follows:~~  
17

18          **Issue 8-21(d)**

19          8.3.1.6.2 The -48 Volt DC Power Usage Charge recovers the cost  
20          of the CLEC's power usage. -48 Volt DC Power Usage can be  
21          provided and charged on a non-measured basis, or, in some cases  
22          specified below, on a measured basis.

23  
24          a)       Non-Measured -48 Volt DC Power Usage Charge –  
25          Qwest will apply the -48 Volt Power Usage charge for the  
26          quantity of power ordered by the CLEC. Qwest will not  
27          adjust the billed usage based upon power usage readings.  
28          This applies to all CLEC orders for -48 Volt DC Power  
29          which are equal to or less than sixty (60) amps. Qwest will  
30          apply the -48 Volt DC Power Usage Charge for the  
31          quantity of power ordered by CLEC. Qwest will not adjust  
32          the billed usage based upon ~~actual usage.~~ power usage  
33          readings. This charge also applies to all CLEC orders for -  
34          48 Volt DC Power Usage which are greater than sixty (60)  
35          amps, unless CLEC orders -48 Volt DC Power  
36          Measurement, in which case CLEC will be charged for

1 Measured -48 Volt DC Power Usage as described in  
2 Section 8.3.1.6.2(b) below.

3 b) Measured -48 Volt DC Power Usage Charge – This  
4 measured power usage charge applies, if elected by CLEC,  
5 on a per amp basis to all orders of greater than sixty (60)  
6 amps. For orders of greater than sixty (60) amps, CLEC  
7 may elect Measured -48 Volt DC Power Usage pursuant to  
8 this provision by ordering -48 Volt DC Power  
9 Measurement. Qwest will initially apply the -48 Volt DC  
10 Power Usage Charge to the quantity of power ordered by  
11 CLEC. Qwest will determine read the actual power usage  
12 as described in Section 8.2.1.29.2.2 and will charge based  
13 on the power usage at the time of the reading, on a going  
14 forward basis, until the next reading.

15 **Issue 8-21(e)**

16 8.1.4 Power Plant

17 8.1.4.1.1 Less Than 60 Amps, per Amp Ordered

18 8.1.4.1.2 Equal to or Greater Than 60 Amps, per Amp Ordered

19 8.1.4.2 Power Usage

20 8.1.4.2.1 Less Than 60 Amps, per Amp Ordered

21 8.1.4.2.2 Greater Than 60 Amps, per Amp Ordered or Used

22 **Q. DOES THIS ISSUE DEAL WITH THE PROPER APPLICATION OF**  
23 **RATES?**

24 A. Yes. Language contained in Issues 8-21 and (a) through (e) deals with the proper  
25 application of DC Power Rate elements assessed by Qwest when Eschelon  
26 purchases DC power to electrify telecommunications equipment Eschelon  
27 collocates in Qwest central offices. Eschelon takes issue with the manner by  
28 which Qwest intends to assess those rates. Specifically, Eschelon has asked

1 Qwest to measure the amount of electrical usage Eschelon consumes in  
2 electrifying its equipment, and assess its DC Power rates based upon that usage  
3 (on a “per Ampere” or “per Amp” basis). Qwest has agreed to that approach for  
4 one of its rate elements (*i.e.*, the rate element specifically assigned to the current  
5 used by Eschelon’s equipment), but not the other (a rate element meant to recover  
6 Qwest’s investment in the “power plant” facilities that convert AC current  
7 purchased by Qwest from the electric utility into the DC power required by  
8 telecommunications equipment). The companies also disagree about the  
9 appropriate interim rates for Power Plant, see Mr. Denney’s discussion of Issues  
10 22-90 and subparts.

11 **Q. PLEASE DESCRIBE THE TWO DC POWER-RELATED RATE**  
12 **ELEMENTS THAT YOU REFERENCE ABOVE.**

13 A. Qwest, in Exhibit A, identifies two rate elements related to -48 Volt DC Power:  
14 (i) a *Power Usage* element that recovers the cost of the electrical current that  
15 electrifies telecommunication equipment (Exhibit A, 8.1.4.1.2) and (ii) a *Power*  
16 *Plant* element that recovers Qwest’s investment in the physical equipment that  
17 converts the AC power purchased from the utility to the -48 Volt DC Power used  
18 by most telecommunications equipment (Exhibit A, 8.1.4.1.1). Both rate  
19 elements are identified in Exhibit A as being applied “per ampere, per month”  
20 (*see*, 8.1.4.1). The disagreement arises as to whether the “amps per month”  
21 should be based upon the electricity Eschelon actually uses (*i.e.*, a measured  
22 basis), or whether Qwest should be allowed to use the size (in amps) of

1 Eschelon’s power distribution cables connecting its collocation arrangement to  
2 the Qwest power plant to assess the rates (what Qwest erroneously refers to as  
3 Eschelon’s “power order”). There are six discrete sections of the ICA (including  
4 Exhibit A) in which contract language has not been agreed to (representing Issues  
5 8-21 and subparts), and each of these issues is directly tied to this overall  
6 disagreement.

7 **Q. WHAT IS POWER PLANT, AS THAT TERM IS USED IN YOUR**  
8 **TESTIMONY?**

9 A. There are four basic components which comprise a central office power system  
10 used to electrify telecommunications equipment: (i) AC commercial power  
11 (shown in black in Figure 1 below),<sup>236</sup> (ii) standby AC power equipment (shown  
12 in green),<sup>237</sup> (iii) DC power plant (shown in blue)<sup>238</sup> and (iv) DC power  
13 distribution including power cables that connect a collocation area to Qwest’s  
14 power plant (shown in red)<sup>239</sup>:

---

<sup>236</sup> For non-color copies, “AC Commercial Power” is the large rectangle box entitled “Commercial AC” excluding the small rectangle box entitled “Stand By Power.”

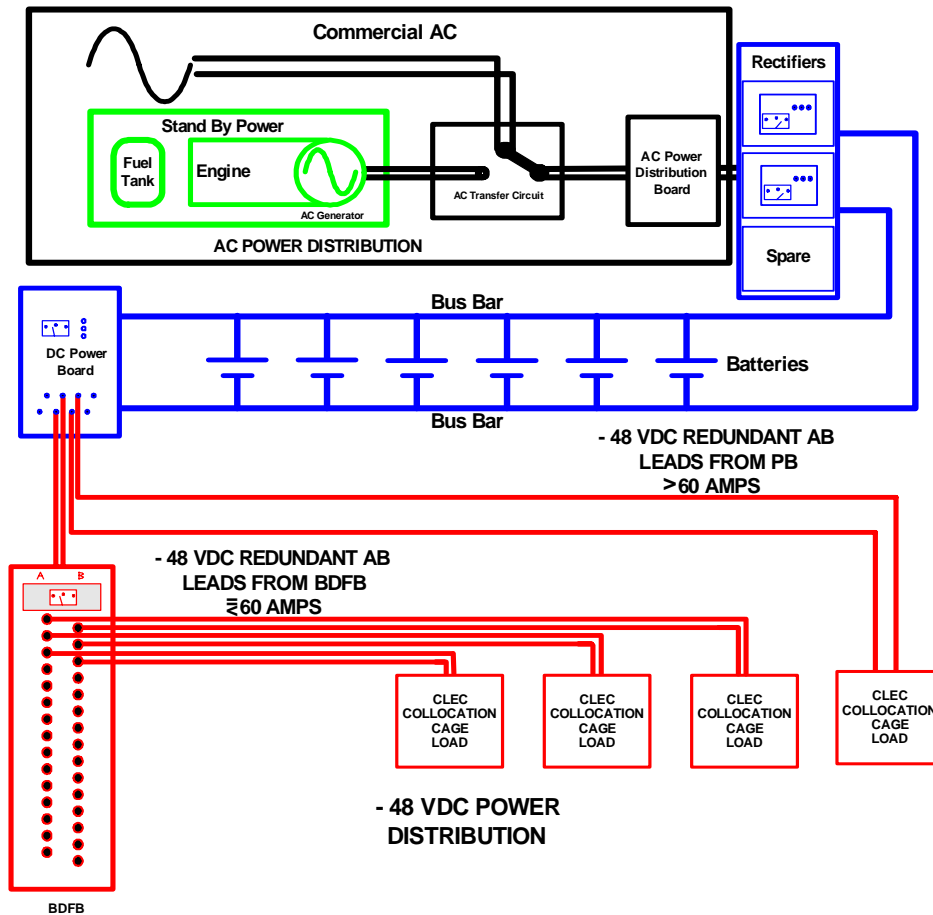

<sup>237</sup> For non-color copies, “Standby AC Power” is the small rectangle box entitled “Stand By Power” inside the larger rectangle box entitled “AC Commercial Power.”

<sup>238</sup> For non-color copies, “DC Power Plant” encompasses equipment from the “rectifiers” to the “DC Power Board.”

<sup>239</sup> For non-color copies, “DC Power Distribution” encompasses equipment from the “DC Power Board” to the BDFB and CLEC collocation (or Qwest equipment – not shown on diagram).

Figure 1

1  
2  
3  
4  
5  
6  
7  
8  
9  
10

The primary purpose of the “power plant” is to convert the AC power purchased from the utility, to the DC power required by telecommunications equipment. DC power plant generally consists of the following equipment: (i) rectifiers, which are used for the AC/DC conversion; (ii) batteries, which provide the necessary current to power the equipment, serve as a filter to smooth out fluctuations in the commercial power, remove the ‘noise’ that power often carries, and provide necessary backup power should commercial power fail; and (iii) controllers, which manage the DC power. Power plant is a shared resource that serves all

1 equipment in the central office. Qwest and its collocators power their equipment  
2 from the same power plant facilities.

3 **Q. DOES ESCHELON OR ANY CLEC ORDER A CERTAIN AMOUNT OF**  
4 **POWER PLANT CAPACITY?**

5 A. No. A key point in this disagreement relates to Qwest's erroneous claim that  
6 when a CLEC orders power cables (150 amp power cables, for example), a CLEC  
7 is simultaneously placing an order for 150 amps of power plant capacity. Qwest  
8 has made this erroneous claim time and again in testimony in other states (in an  
9 attempt to support its application of the power plant rate based on the size of the  
10 CLEC power cable), but has failed to cite any documentation or any authority at  
11 all, for that matter, that supports Qwest's claim. Qwest's collocation application  
12 asks CLECs for their requested *power cable size* – there is no place on the Qwest  
13 collocation application that asks the CLEC for their requested *power plant*  
14 *capacity*, nor does Qwest inform CLECs that it equates the power cable order  
15 with an order for power plant capacity. And, as I explain below, Qwest's own  
16 Technical Publications dictating the manner by which it engineers power cables  
17 and power plant capacity belie Qwest's claims. In other words, Qwest's own  
18 Technical Publications and safety standards require cables to be sized larger than  
19 the power that is expected to be carried by those cables. Yet, it is this claim that  
20 serves as the fundamental premise for Qwest's position that applying the Power  
21 Plant rate element on a measured basis would allow a CLEC to pay for less power  
22 plant capacity than it ordered. The bottom line is this: CLECs do not order power

1 plant capacity from Qwest. Instead, CLECs order power feeder cables from  
2 Qwest, who then purportedly engineers its power plant facilities based upon those  
3 feeder orders (in contravention of its Technical Publications). Unfortunately, the  
4 available evidence shows that Qwest attributes a far larger portion of its power  
5 plant facilities to CLECs than it does to itself for the same level of power usage,  
6 resulting in a highly discriminatory rate structure. This causes CLECs to pay for  
7 substantially more of Qwest's power plant investment relative to their power  
8 usage, than does Qwest.

9 **Q. MUST QWEST PROVIDE COLLOCATION POWER IN A**  
10 **NONDISCRIMINATORY MANNER?**

11 A. Yes. This is an important point because Qwest will undoubtedly argue in its  
12 testimony on Issues 8-21 and subparts that it sizes power plant for its own  
13 equipment based on peak usage, but sizes power plant for CLECs based on a  
14 higher amount dictated by the size of power cables. This is discriminatory on its  
15 face. And this treatment runs contrary to the clear language of the ICA which  
16 requires Qwest to provide collocation power in a nondiscriminatory manner:

17 8.2.1.1 Qwest shall provide Collocation on rates, terms and  
18 conditions that are just, reasonable and non-discriminatory. In  
19 addition, Qwest shall provide Collocation in accordance with all  
20 applicable federal and State laws.

21 Therefore, Qwest's different treatment of Eschelon with regard to power plant  
22 sizing (which leads to Qwest overcharging Eschelon for power plant) is  
23 prohibited conduct under the Qwest/Eschelon ICA.

1 Furthermore, though I am not an attorney, it is my understanding that the FCC has  
2 established that the prohibition against discrimination that appears throughout §  
3 251 of the Act is *unqualified and absolute*. Unlike § 202 of the Act, § 251 does  
4 not qualify the term “nondiscriminatory” with the words “undue” or “unjust and  
5 unreasonable.”

6 By comparison [with section 202], section 251(c)(2) creates  
7 a duty for incumbent LECs "to provide . . . any requesting  
8 telecommunications carrier, interconnection with a LEC's  
9 network on rates, terms, and conditions that are just,  
10 reasonable, and nondiscriminatory." The  
11 nondiscrimination requirement in section 251(c)(2) is not  
12 qualified by the "unjust or unreasonable" language of  
13 section 202(a). We therefore conclude that Congress did  
14 not intend that the term "nondiscriminatory" in the 1996  
15 Act be synonymous with "unjust and unreasonable  
16 discrimination" used in the 1934 Act, but rather, intended a  
17 more stringent standard.<sup>240</sup>

18 Therefore, the nondiscriminatory provisions of § 251 of the Act do not allow for  
19 “justified discrimination” as Qwest will likely attempt to argue.

20 **Q. HAS QWEST AGREED THAT ONE OF THE RATE ELEMENTS**  
21 **DESCRIBED ABOVE, I.E., POWER USAGE GREATER THAN 60 AMPS**  
22 **(8.1.4.1.2.2) SHOULD BE BILLED BASED UPON ESCHELON’S ACTUAL**  
23 **ELECTRICAL USAGE, RATHER THAN THE SIZE OF THE POWER**  
24 **FEEDER CABLES ESCHELON MAINTAINS BETWEEN ITS**  
25 **COLLOCATION AND QWEST’S POWER PLANT?**

---

<sup>240</sup> See, *Implementation of the Local Competition Provisions in the Telecommunications Act of 1996*, CC Docket No. 96-98, FCC 96-325, First Report and Order, 11 FCC Rcd.15499 ¶ 217 (1996) (“Local Competition Order”).

1 A. Yes. In late 2004, Qwest made available to its collocating CLECs an ICA  
2 amendment that would change the way Qwest assesses its DC power rate  
3 elements – the *DC Power Measuring Amendment* (a copy of that amendment is  
4 included with this testimony as Eschelon/8). In its amendment, Qwest agrees to  
5 change the manner by which it would assess at least one of its DC power rates  
6 (*i.e.*, *Power Usage Greater than 60 Amps* – 8.1.4.1.2.2). Qwest agreed to  
7 measure the amount of electricity actually used by collocators and assess its  
8 Power Usage rate based upon the measured amperage, rather than applying its per  
9 amp rate to the number of amps capable of being carried by the collocators’  
10 power distribution cables as it had done in the past.

11 **Q. DID QWEST’S PROPOSED AMENDMENT INDICATE THAT IT**  
12 **WOULD ALSO CHANGE THE WAY IT ASSESSES ITS *POWER PLANT***  
13 **RATE, *I.E.*, WHETHER IT WOULD NOW ALSO CHARGE ITS *POWER***  
14 ***PLANT RATE* BASED UPON MEASURED USAGE?**

15 A. There is substantial debate between Qwest and at least one of its collocators in  
16 that regard.<sup>241</sup> The Amendment can certainly be read to suggest that Qwest did  
17 indeed agree to change the manner by which it charges CLECs its *Power Plant*  
18 rate as well (*i.e.*, agreeing to assess it based upon measured usage), however, that  
19 issue is moot in this circumstance. Eschelon did not sign the amendment.

---

<sup>241</sup> McLeodUSA filed complaints against Qwest regarding Qwest’s application of the power plant rate based on an Amendment that McLeodUSA and Qwest signed. *See, e.g., McLeodUSA Telecommunications Services, Inc. v Qwest Corporation*, Colorado PUC Docket No. 06F-124T. Eschelon did not sign the Power Measuring Amendment and this Amendment does not apply to Eschelon.

1           Instead, because Eschelon was already in discussions with Qwest regarding a  
2           successor ICA, Eschelon has addressed this issue in its ICA negotiations and now  
3           in this arbitration. Nonetheless, whether Qwest should assess its per amp Power  
4           Plant rate by applying it to the number of amps actually used by Eschelon (as  
5           measured by Qwest), or to the number of amps defining the capacity of  
6           Eschelon's power distribution cables remains the underlying question. Eschelon's  
7           proposed language, Issues 8-21 (a)-(e), would require Qwest to assess both its  
8           *Power Usage* and *Power Plant* rates based upon the number of amps Eschelon  
9           actual uses (as measured by Qwest). Given that Qwest has agreed to assess its  
10          power usage charge in this fashion, the remaining dispute involves only the  
11          *Power Plant* element.

12   **Q.   WHY SHOULD QWEST ASSESS THE POWER PLANT CHARGE**  
13   **BASED ON THE POWER USED BY ESCHELON RATHER THAN THE**  
14   **SIZE OF THE POWER CABLE ESCHELON ORIGINALLY ORDERED?**

15   A.   Qwest sizes its power plant facilities so that they are capable of producing enough  
16    electricity to power all of the telecommunications equipment in the central office  
17    (equipment for both Qwest and collocators) at peak demand. More specifically,  
18    Qwest power engineers identify, over time, the "busy hour" that exists in a given  
19    year, meant to reflect the absolute maximum or "peak" electrical drain required of  
20    the power plant by all existing equipment. The engineers then ensure that the  
21    power plant is sized so as to accommodate that "peak drain" – what power  
22    engineers often refer to as the "List 1 drain" for the central office. In this way the

1 power plant is driven by the amount of DC power used by the equipment in the  
2 central office (or stated differently, costs related to increasing the size of the  
3 equipment are incremental to additional usage). This is consistent with the  
4 application of *Power Plant* rates based on a collocator's usage because it requires  
5 power users who consume more electricity to pay for a larger portion of the power  
6 plant needed to meet their needs, while smaller electrical consumers pay less  
7 because they use less of the power plant's overall capacity.

8 **Q. WOULD APPLYING QWEST'S "PER AMP" POWER PLANT RATE TO**  
9 **THE SIZE OF ESCHELON'S POWER CABLE (MEASURED IN AMPS)**  
10 **BRING ABOUT A SIMILAR RESULT?**

11 A. No. DC power distribution cables are sized not based upon peak demand under  
12 normal operating conditions (*i.e.*, List 1 drain) like power plant is, but instead on  
13 the maximum current that the equipment may draw when the batteries providing  
14 DC power are approaching a condition of total failure (loosely defined as "List 2  
15 drain") – and as such, the equipment must draw more current (amps) so as to  
16 maintain necessary voltage. At the highest level, power cables are sized to  
17 accommodate the much larger List 2 drain because they anticipate *non*-"normal  
18 operating conditions" that may occur. If Eschelon or any other collocator is  
19 regularly using enough DC power to fully load its power feeder cables, a serious  
20 problem exists. For that reason, Qwest, by assessing its Power Plant rate based  
21 upon the size of Eschelon's DC power cables (instead of its measured usage),

1 forces Eschelon to pay for a substantial amount of power plant capacity that it  
2 doesn't use.

3 The List 2 drain is also known as the recommended amperage because it is the  
4 amperage level Eschelon must order for its power cables to operate the equipment  
5 properly and in accordance with manufacturer's recommendations and safety  
6 standards. The recommended amperage is set at a higher amperage level  
7 (compared to the amperage that will actually be used by the equipment under  
8 normal circumstances) because it takes into account the worst case scenario, such  
9 as low voltage during a battery discharge.

10 When sizing power cables a power engineer must identify the allowable  
11 maximum voltage drop between the BDFB/PB and the telecommunications  
12 equipment or CLEC collocation. This allows the engineer to size the smallest  
13 diameter power cable based on the cable length that must be traversed with a  
14 given amperage. Therefore, CLECs (and Qwest) are required by manufacturer's  
15 recommendations and safety standards to size power cables to a larger capacity  
16 than the power that will be carried by those cables, but Qwest pretends that  
17 CLECs expect to use as much power as their power cables will carry at maximum  
18 capacity as support for charging CLECs more for power than it charges itself.

19 **Q. YOU STATE THAT QWEST SIZES DC POWER PLANT BASED ON THE**  
20 **PEAK USAGE OF ALL TELECOMMUNICATIONS EQUIPMENT IN**

1           **THE CENTRAL OFFICE. WHAT IS YOUR BASIS FOR THAT**  
2           **STATEMENT?**

3    A.    Qwest uses engineering requirements and guidelines memorialized in Qwest's  
4           own Technical Publications to size power plant (and other components of central  
5           office power systems). Qwest's Technical Publications dictate that power plant  
6           should be sized based on peak usage (*i.e.*, List 1 drain). For example, Bellcore  
7           technical document "Power Systems Installation Planning" BR-790-100-652  
8           requires Qwest engineers, when sizing power plant, to "determine equipment  
9           powered directly from the dc plant and the average busy hour current drain of the  
10          equipment at normal operating voltage." This engineering manual goes on to  
11          describe the procedure used by Qwest engineers to size power plant as follows:

12                    "Step 1: Identify all DC operated telecommunications equipment that  
13                    needs power,  
14                    Step 2: determine operating voltages (nominal and limits) of all DC-  
15                    operated telecommunications equipment,  
16                    Step 3: determine List 1 drains of all telecommunications equipment,  
17                    Step 4: compute and plot all busy-hour and power failure drains, Step 5:  
18                    Select DC plants."

19          Steps 3 and 4 are particularly relevant to this point because they show that Qwest  
20          sizes DC power plant on peak usage.

21    **Q. CAN YOU PROVIDE A SIMPLE EXAMPLE OF HOW QWEST**  
22    **ENGINEERS WOULD GO ABOUT SIZING POWER PLANT FOR THE**  
23    **CENTRAL OFFICE?**

24    A.    Yes. In a basic example of a Qwest central office, Qwest power engineers  
25          monitor the actual usage of DC power and observe the peak power usage that

1 takes place at the busy hour. Qwest engineers would then take steps to ensure that  
2 the DC power plant is capable of handling the usage that occurs at this peak  
3 period. In other words, DC power plant is sized based on the maximum power  
4 draw that takes place on a central office-wide basis during the busy hour. Or,  
5 perhaps more appropriately, Qwest engineers identify a “target” usage level  
6 which may indicate to them that the existing power plant, given forecasted peak  
7 usage, may fall short in a busy hour scenario. Hence, when usage hits that “target”  
8 level, they begin to explore augmentation alternatives. Importantly, however,  
9 Qwest DC power engineers do not augment the DC power plant infrastructure  
10 based on particular orders for power distribution cables of a CLEC or Qwest.  
11 Given that DC power plant is sized based on forecasted peak usage for all  
12 equipment in the office, there is no correlation between Qwest’s  
13 investment/augmentation in DC power plant and sizes of power cables (whether  
14 they are from Qwest or a CLEC).

15 **Q. PLEASE DEFINE THE TERMS “BUSY HOUR DRAIN” AND “LIST 1**  
16 **DRAIN.”**

17 A. The “busy hour drain” is the load (or amount of power usage) of the central office  
18 for the busy day of the busy season, and represents the point at which the load on  
19 the central office power plant is greatest. The “busy hour” is simply the hour,  
20 once per year, that represents the highest level of drain on the power system, and  
21 oftentimes occurs sometime on Mother’s Day, though the busy hour can vary by  
22 central office. List 1 drain is the busy hour current during normal plant operation,

1 as indicated by Qwest Technical Publication “*Power Equipment and Engineering*  
2 *Standards*,” Technical Document No. 77385 (Chapter 2):

3 **2.4 Engineering Guidelines**

4 When sizing power plants, the following criteria shall be used:

5  
6 **List 1** drain is used for sizing batteries and chargers; *the average busy-*  
7 *hour current at normal operating voltage should be used.* Telephony List  
8 1 drains are measured at 9 ccs or at 18 ccs for the first 2 hours of a  
9 discharge and 6 ccs thereafter.

10 **Q. ARE THERE OTHER SOURCES THAT REQUIRE POWER PLANT TO**  
11 **BE SIZED BASED ON PEAK USAGE?**

12 **A.** Yes. For instance, Qwest Technical Publication 77385 discusses the sizing of  
13 battery plant – a component of DC power plant – as follows:

14 BATTERY PLANT SIZING — when a battery plant is initially  
15 installed, the meter and bus bar should be provided based on the  
16 projected power requirements for the life of the plant. Base  
17 chargers and batteries should be provided based on the projected  
18 end of engineering interval connected average busy-hour current  
19 drains (List 1).

20 In addition, Bellcore’s “*DC Distribution*,” Technical Document No. 790-100-656,  
21 Section 2 “Telecommunications Equipment Loads” states as follows:

22 List 1 – These drains are used to size batteries and rectifiers.  
23 These drains represent the average busy-hour current at normal  
24 operating voltages.

25 Furthermore, legacy document REGN 790-100-654RG “DC Plant” (published by  
26 Qwest) states as follows:

27 When selecting DC power plants and system components, the  
28 following current drain types can be used:

1  
2 List 1 drains are used to size batteries and rectifiers. These drains  
3 represent the average busy-hour current at normal operating  
4 voltages...

5 Another excerpt from Qwest's engineering manuals specifically warns against  
6 sizing power plant on any other standard. Qwest technical document REGN 790-  
7 100-655G "Batteries" Issue No. 9 dated February 2006 (at page 22) states:

8 In some cases, List 2 drains are significantly higher than List 1  
9 drains, and if they were used, would result in sever [sic] oversizing  
10 of the battery plant.

11 This last quote is particularly relevant because by applying the power plant charge  
12 based on cable size (which are sized based on List 2 drain), as Qwest proposes,  
13 Qwest is assessing charges on Eschelon based on a severely oversized DC power  
14 plant.

15 **Q. EARLIER YOU MENTIONED LIST 2 DRAIN. WHAT IS LIST 2 DRAIN**  
16 **AND WHAT IS ITS SIGNIFICANCE?**

17 A. Qwest's Technical Publications define List 2 drain as follows:

18 List 2 – These drains are used to size feeder cables and fuses.  
19 These drains represent the peak current for a circuit or a group of  
20 circuits under worst case operating conditions.

21 The concept of List 2 drain is significant because Qwest proposes to assess Power  
22 Plant charges based on the size of Eschelon's power cables, which as noted  
23 above, are sized based on List 2 drain (so that the cables are capable of handling a  
24 worst case scenario). However, the numerous Qwest Technical Publications

1 referenced above require power plant to be sized based on the lower List 1 drain  
2 (peak usage under normal operating conditions). Hence, while Qwest sizes power  
3 plant based on List 1 drain (peak usage), it assesses the power plant charge based  
4 on the higher List 2 drain (used to size the power cables). For example, let's  
5 assume that both Qwest's and Eschelon's List 1 drain is 100 amps and their List 2  
6 drains (or the size of their power cables) is 200 amps. Further, assume that the  
7 TELRIC rate for power plant (Equal to or Greater than 60 Amps is \$7.32  
8 (Eschelon's proposed Power Plant rate, Exhibit A, 8.1.4.1.2). Under this  
9 hypothetical scenario, Qwest would assign \$732.00 ( $\$7.32 \times 100$ )<sup>242</sup> in power  
10 plant costs to itself, but would assign \$1,464 ( $\$7.32 \times 200$ )<sup>243</sup> in power plant  
11 costs to Eschelon. This is despite the fact that, in this example, both Qwest and  
12 Eschelon have identical power and load characteristics (List 1 drain and List 2  
13 drain). If we change the example to assume that Qwest's List 1 drain increases to  
14 150 amps, Qwest would assign \$1,098 ( $\$7.32 \times 150$ )<sup>244</sup> in power plant costs  
15 to itself (less than to Eschelon), even though Qwest is consuming more power  
16 plant capacity than is Eschelon. This is discrimination prohibited by the Act and  
17 the companies' ICA.

18 This is problematic because it forces Eschelon to pay Power Plant rates based  
19 upon the much higher List 2 drain upon which its power cables are sized, when it  
20 actually uses a much smaller amount of electricity and, in turn, a much smaller

---

<sup>242</sup> This number would be \$931 based on Qwest's proposed power plant rate of \$9.31.

<sup>243</sup> This number would be \$1,862 based on Qwest's proposed power plant rate of \$9.31.

<sup>244</sup> This number would be \$1,397 based on Qwest's proposed power plant rate of \$9.31.

1 component of Qwest's power plant capacity. In other words, it forces Eschelon to  
2 pay for more of Qwest's power plant than Eschelon actually uses. Because Qwest  
3 uses the majority of the electricity in the central office, and therefore, it uses the  
4 majority of the power plant capacity, Eschelon's overpayment reduces the amount  
5 of capacity Qwest must recover from its own services supported by its equipment.  
6 This results in a discriminatory situation in which Eschelon pays substantially  
7 more for DC power than does Qwest – a situation specifically prohibited by the  
8 FCC's rules governing prices for collocation and unbundled network elements.

9 **Q. IN ADDITION TO THE DISAGREEMENT ABOUT THE POWER PLANT**  
10 **RATE APPLICATION, ESCHELON AND QWEST ALSO DISAGREE**  
11 **ABOUT THE COMMENCEMENT OF POWER CHARGES. PLEASE**  
12 **EXPLAIN.**

13 A. This disagreement is under Issue 8-21. Eschelon's proposal is that, once the  
14 CLEC's equipment is in place in its collocation, it will notify Qwest so that Qwest  
15 can measure, and charge based on, actual usage. Qwest's proposal would require  
16 the CLEC to have its equipment in place before making a request for measured  
17 power usage. Qwest's proposal appears to be designed to prevent CLECs from  
18 requesting power measurement before installing equipment (so that the measure is  
19 zero) and after installing equipment, obtaining up to six months of zero usage  
20 charges. Eschelon agrees that this should not occur and its language would  
21 require CLEC to notify Qwest when equipment is placed so that Qwest can take a  
22 measurement – and so that the situation that apparently concerns Qwest does not

1 occur. Eschelon's language has an added benefit that Qwest's proposal does not:  
2 Eschelon's proposal would keep Qwest from charging Eschelon for power that it  
3 does not use. It makes no sense for Qwest to assess power charges associated  
4 with Eschelon's power draw before Eschelon even has the ability to draw power;  
5 yet that is what Qwest's proposal would require. Eschelon's proposal, on the  
6 other hand, treats both sides fairly by allowing Qwest to measure power draw  
7 once equipment is collocated and, at the same time, not forcing Eschelon to pay  
8 for power that it never uses.

9 **Q. YOU MENTIONED ABOVE THAT THE COMPANIES DISAGREE**  
10 **ABOUT THE APPROPRIATE RATE FOR POWER PLANT. ARE YOU**  
11 **ADDRESSING THE DISAGREEMENT RELATED TO THE RATE**  
12 **ELEMENT AMOUNTS?**

13 A. No, my testimony on Issues 8-21 and subparts focuses on the proper application  
14 of the interim Power Plant rates – Mr. Denney addresses the rate levels for the  
15 interim rates. For the Power Plant – Less than 60 Amps rate element (Exhibit A  
16 8.1.4.1.1), Eschelon proposes an interim rate of \$9.20, compared to Qwest's  
17 proposed interim rate of \$11.95. For the Power Plant – Equal to or Greater than  
18 60 Amps rate element (Exhibit A 8.1.4.1.2), Eschelon proposes an interim rate of  
19 \$7.32, compared to Qwest's proposed interim rate of \$9.31. Qwest's proposed  
20 interim rates for Power Plant exceed the Commission approved rates in all other

1 Qwest states in which Eschelon does business, with one minor exception.<sup>245</sup> Mr.  
2 Denney addresses Eschelon's proposed interim rates for power plant under Issues  
3 22-90 and subparts and explains how they were developed.

4 **Q. PLEASE RECAP WHY ESCHELON'S PROPOSED ICA LANGUAGE IS**  
5 **THE SUPERIOR LANGUAGE?**

6 A. As I mentioned above, the disagreements under Issues 8-21 and subparts stem  
7 from an overarching disagreement about how the Power Plant power charge  
8 should be assessed. For the reasons explained above, Eschelon's proposal to  
9 apply the Power Plant charge on measured usage is based on Qwest's Technical  
10 Publications and is consistent with proper cost recovery principles. I have also  
11 explained that Qwest's proposal to apply the Power Plant rate to the size of the  
12 Eschelon power cable would result in Qwest double-recovering its costs and  
13 Qwest discriminating against Eschelon in violation of the Act, FCC rules and  
14 orders, and the Qwest/Eschelon ICA by forcing Eschelon to pay for a larger  
15 portion of the shared central office power plant than Qwest pays. Based on this  
16 premise that the Power Plant rate should be assessed based on measured usage  
17 (like Power Usage), Eschelon's proposals for Issues 8-21 and subparts should be  
18 adopted for the following reasons:

---

<sup>245</sup> The Power Plant Equal to or Greater than 60 Amps rate element in Washington is \$9.34, compared to Qwest's proposed interim rate in Oregon of \$9.31. However, in Washington, unlike Oregon, there is no rate differentiation for Power Plant Below 60 Amps and Equal to or Greater Than 60 Amps (i.e., both Power Plant varieties in Washington are priced at \$9.34).

- 1
- Issues 8-21 and 8-21(a): Qwest proposes to insert the word “usage”  
2 in Section 8.2.1.29.2.1 and “power usage” in Section 8.2.1.29.2.2  
3 to support its position that only one charge (*i.e.*, Power Usage) of  
4 the two power charges (*i.e.*, Power Usage and Power Plant) should  
5 be assessed based on usage. Eschelon disagrees and proposes to  
6 strike “usage.” In addition, Eschelon proposes language in  
7 Sections 8.2.1.29.2.1 and 8.2.1.29.2.2 to clarify that CLECs order  
8 power cables and not power plant capacity. And for the reasons  
9 discussed in the immediately preceding Q&A, Eschelon’s language  
10 regarding commencement of charges in Section 8.2.1.29.2.2 should  
11 be adopted.
  - Issues 8-21(b), 8-21(c) and 8-21(d): For the reasons explained  
12 above, Eschelon proposes language in Sections 8.3.1.6, 8.3.1.6.1,  
13 and 8.3.1.6.2 to clarify that both power charges should be billed  
14 based on power measurement.
  - Issues 8-21(e): the Power Usage and Power Plant rate elements in  
16 Exhibit A should be applied in the manner described in Section 8  
17 of the ICA as explained under Issues 8-21 and subparts (a) through  
18 (d). Qwest proposes to add text in Exhibit A to the Power Usage  
19 and Power Plant rate elements (8.1.4) that reflects its proposal to  
20 apply measured usage only to the Power Usage rate element and  
21 bill the Power Plant rate element based on the amps “ordered.”  
22

1 Eschelon disagrees with this language because measured usage  
2 billing should apply to both power charges and because CLECs do  
3 not “order” power plant, but order power cables instead. Section  
4 8.1.4.1 of Exhibit A indicates that the power charges apply “per  
5 amp, per month” and Section 8 of the ICA describes whether the  
6 charge should be assessed based on measured usage or the size of  
7 the power cable (what Qwest refers to as the “ordered” amps).  
8 Furthermore, as discussed by Mr. Denney, Eschelon’s proposed  
9 interim rates for Power Plant should be adopted.

10 **Q. PLEASE SUMMARIZE ISSUES 8-21 AND (A)-(E).**

11 A. Power plant is a shared resource within the central office that is used by all power  
12 users in the central office, including Qwest, to electrify their respective  
13 telecommunications equipment. Accordingly, the investment in power plant  
14 should be recovered from the users of that power plant based on the proportionate  
15 usage of each power user. Eschelon’s ICA language ensures that the Power Plant  
16 rate element is applied in this manner. Qwest’s proposed language would result  
17 in Eschelon paying for power that Eschelon does not use, and Eschelon paying  
18 more than Qwest pays to use the very same power plant. Or, in other words,  
19 Qwest’s language is discriminatory. For all of the reasons described in  
20 Eschelon’s business need and in these responses, the Commission should adopt  
21 Eschelon’s language for Issues 8-21 and (a)-(e).

1 **V. SUBJECT MATTER NO. 12: NEBS STANDARDS**

2 *Issue No. 8-24: ICA Section 8.2.3.9*

3 **Q. HAS ISSUE 8-24 CLOSED SINCE ESCHELON'S PETITION FOR**  
4 **ARBITRATION WAS FILED?**

5 A. Yes. This issue was closed based on Eschelon's proposed language for Section  
6 8.2.3.9 and a slight modification to Section 8.2.3.10. This language is shown  
7 below, with the agreed-to modification in Section 8.2.3.10 shaded in gray:

8 8.2.3.9 Qwest will determine and notify CLEC, in the manner described  
9 below, within ten (10) Days of CLEC submitting its Collocation  
10 application if Qwest believes CLEC's listed equipment does not  
11 comply with NEBS Level 1 safety standards or is in violation of  
12 any Applicable Laws or regulations, all equally applicable to  
13 Qwest. If CLEC disagrees, CLEC may respond with the basis  
14 for its position within ten (10) Days of receipt of such notice  
15 from Qwest. If, during installation, Qwest determines CLEC  
16 activities or equipment other than those listed in the Collocation  
17 application do not comply with the NEBS Level 1 safety  
18 standards listed in this Section or are in violation of any  
19 Applicable Laws or regulations all equally applied to Qwest,  
20 Qwest has the right to stop all installation work related to the  
21 activities or equipment at issue until the situation is remedied or  
22 CLEC demonstrates that Qwest's determination was incorrect...

23  
24 8.2.3.10 This section 8.2.3.10 applies as set forth herein, notwithstanding  
25 anything that may be to the contrary in Section 8.2.3.9. All equipment  
26 placed will be subject to random safety audits conducted by Qwest.  
27 Qwest will not enter CLEC's caged Collocation space or access CLEC's  
28 cageless Collocation equipment as part of a random safety audit. These  
29 audits will determine whether the equipment meets the NEBS Level 1  
30 safety standards required by this Agreement. CLEC will be notified of  
31 the results of this audit. . . .

1 **VI. SUBJECT MATTER NO. 14: NONDISCRIMINATORY ACCESS TO**  
2 **UNES**

3 *Issue No. 9-31: ICA Section 9.1.2*

4 **Q. WHAT IS ESCHELON'S BUSINESS ISSUE RELATING TO**  
5 **NONDISCRIMINATORY ACCESS TO UNES (ISSUE 9-31)?**

6 A. Nondiscriminatory access to UNEs and interconnection is the cornerstone of local  
7 competition. The FCC has read this nondiscriminatory access requirement for  
8 UNEs to apply broadly and has required that UNEs must be provisioned in a way  
9 that would make them useful. This means Qwest is required to provide  
10 nondiscriminatory access to the UNEs themselves as well as to the means of  
11 obtaining the UNEs, repairing the UNEs, and modifying the UNEs. This is  
12 critical for CLECs because these are all activities that Qwest performs for its own  
13 retail customers, and if CLECs are unable to obtain these activities related to  
14 UNEs on reasonable terms and conditions and at cost based rates, CLECs will be  
15 competitively disadvantaged vis-à-vis Qwest. Qwest has proposed language that  
16 would modify the nondiscriminatory access to UNEs provision of the ICA to  
17 create a loophole that may allow Qwest to charge tariff rates for activities that  
18 have historically been provided at TELRIC rates pursuant to Qwest's Section 251  
19 obligations to provide access to UNEs without first obtaining Commission  
20 approval. Eschelon opposes this language and asks the Commission to adopt its  
21 language, which would ensure that TELRIC rates continue to apply to access to  
22 UNEs unless Qwest obtains an order to the contrary.

1           Although Section 9.1.2 contains language regarding nondiscriminatory access to  
2           UNEs, it became clear that -- notwithstanding Section 9.1.2 and all other  
3           provisions of the ICA -- Qwest's position is that it may charge tariff rates for  
4           activities that have historically been provided at TELRIC rates without first  
5           obtaining Commission approval. Qwest did not raise this issue initially in a cost  
6           case. Eschelon first learned of this Qwest position through revised Qwest rate  
7           proposals, in which Qwest referred to the tariff instead of Commission approved  
8           rates for certain elements, including miscellaneous charges of the type listed in  
9           Eschelon's proposed language. Per Qwest, application of TELRIC rates is limited  
10          to the enumerated list of UNEs;<sup>246</sup> if not named on that list (*e.g.*, local loops),  
11          according to Qwest, it is not an activity for which TELRIC pricing applies -- even  
12          when these activities are performed on UNE orders.<sup>247</sup> This reasoning would  
13          vitiate the law on *access to* UNEs in lieu of a simplistic look at the enumerated  
14          UNEs. Although Eschelon believes that such an approach is inconsistent with the  
15          unmodified language of Section 9.1.2, Qwest's position shows that more explicit  
16          contract language is needed.

---

<sup>246</sup> See §51.319; *see also* FCC First Report and Order ¶ 27 ["The minimum set of network elements the Commission identifies are: local loops, local and tandem switches (including all vertical switching features provided by such switches), interoffice transmission facilities, network interface devices, signalling and call-related database facilities, operations support systems functions, and operator and directory assistance facilities.]"

<sup>247</sup> *See, e.g.*, Colorado arbitration, Albersheim Direct, p. 52, line 17 ("expedites are not UNEs"); Colorado arbitration, Million Rebuttal, p. 31, line 3 ("FCC's list of Section 251 elements"). *See also* Qwest (Senior Attorney Harisha Bastiampillai) letter to Eschelon (copied to Mr. Denney and Ms. Johnson) (April 5, 2006), pp. 4-5 ("Qwest will not process expedites for Eschelon unbundled loop orders without a duly executed amendment. The amendment for expedites will reflect Qwest's **tariffed rate** for expedites (along with applicable installation charges)" (emphasis added). Mr. Denney discusses Expedited Orders in his testimony regarding Issue 12-67.

1           On August 31, 2006, Qwest confirmed this position by issuing a non-CMP  
2           notification announcing that it intended to post a new “template” interconnection  
3           agreement on its website on September 1, 2006 (on one day’s notice). *See*  
4           Process Notification PROS.08.31.06.F.04159.Amendments.ComlAgree.SGAT.<sup>248</sup>  
5           This new Qwest negotiations template added a tariff reference for the following  
6           rate elements: Additional Dispatch, Trouble Isolation Charge, Design Charge,  
7           Expedite Charge, Cancellation Charge, and Maintenance of Service Charge.  
8           During negotiations on design changes (*see* Issue 4-5 discussed by Mr. Denney)  
9           Qwest also submitted a proposal that would have applied tariff rates to certain  
10          activities – much like its 8/31/06 non-CMP notice. Qwest later changed its  
11          position in negotiations, but indicated that Qwest’s change in position for  
12          negotiations should not be construed as Qwest giving up on its tariff rate proposal  
13          for design changes, and that Qwest fully intended to pursue this proposal outside  
14          of negotiations. By changing its position in negotiations with Eschelon while  
15          maintaining its tariff position outside of arbitration, Qwest is attempting to leave  
16          the door open for Qwest to ultimately impose its tariff proposal on Eschelon  
17          (despite the considerable time and resources expended to arbitrate this issue).

18          The activities that Qwest listed in its notice as activities for which tariff rates will  
19          apply are the same activities in Eschelon’s proposed language for Issue 9-31 (to  
20          be included as necessary to access to UNEs). Eschelon’s language for Issue 9-31  
21          puts this issue squarely before the Commission, and a Commission ruling is

---

<sup>248</sup> Eschelon/28, Denney.

1 needed to ensure that CLECs receive the nondiscriminatory access to UNEs to  
2 which they are entitled and avoid future disputes.

3 **Q. ARE YOU AWARE OF OTHER EXAMPLES DEMONSTRATING THE**  
4 **NEED FOR ESCHELON’S LANGUAGE?**

5 A. Yes. One example is Qwest’s 12/9/05 CMP notice, which introduced as a CMP  
6 change<sup>249</sup> that added language to the DS1 Loop product description that stated  
7 that, “Unbundled Loops are not available for telecommunications services  
8 provided directly to you or for your own administrative purposes *nor are they*  
9 *available to serve another CLEC, IXC, or other Telecommunications Provider.*”  
10 (Emphasis added.) Since Qwest introduced this change in CMP, it was not  
11 required to show how its proposed changes that prohibit CLECs from using UNE  
12 loops to serve another telecommunications carriers comport with 47 C.F.R  
13 §51.309, which provides that subject to certain limited restrictions, the ILEC  
14 “shall not impose limitations, restrictions, or requirements on requests for, or the  
15 use of, unbundled network elements for the service a requesting  
16 telecommunications carrier seeks to offer.”<sup>250</sup> None of the restrictions on the use

---

<sup>249</sup> CMP Document No. PROD.12.09.05.F.03543.EEL\_and\_LMC\_MTE.

<sup>250</sup> 47 CFR § 51.309 provides:

- (a) Except as provided in §51.318, an incumbent LEC shall not impose limitations, restrictions, or requirements on requests for, or the use of, unbundled network elements for the service a requesting telecommunications carrier seeks to offer.
- (b) A requesting telecommunications carrier may not access an unbundled network element for the exclusive provision of mobile wireless services or interexchange services.
- (c) A telecommunications carrier purchasing access to an unbundled network facility is entitled to exclusive use of that facility for a period of time, or when purchasing access to a feature, function, or capability of a facility, a telecommunications carrier is entitled to use of that

1 of UNEs prohibits a CLEC from using a UNE to provide service to another  
2 CLEC, IXC or Telecommunications Provider.

3 Since the ICA does not include Qwest's PCAT restriction and says, to the  
4 contrary, that no other limitations on the use of UNEs shall be imposed,<sup>251</sup>  
5 Eschelon believes that the ICA language controls and that this clause would not  
6 apply to Eschelon. Qwest had every opportunity to propose this language during  
7 this arbitration, but did not. All of this notwithstanding, based on the manner in  
8 which Qwest has chosen issues that it has and has not addressed in CMP to its  
9 advantage, Eschelon is concerned that it could get through this entire case without  
10 this language found anywhere in the contract, yet Qwest would still apply the  
11 restriction to Eschelon (perhaps by claiming that the contract is silent on the  
12 matter, which it is not).<sup>252</sup>

13 **Q. HAS QWEST ISSUED ADDITIONAL CMP NOTICES THAT FURTHER**  
14 **RESTRICT ACCESS TO UNES SINCE THEN?**

---

feature, function, or capability for a period of time. A telecommunications carrier's purchase of access to an unbundled network element does not relieve the incumbent LEC of the duty to maintain, repair, or replace the unbundled network element.

(d) A requesting telecommunications carrier that accesses and uses an unbundled network element consistent with paragraph (b) of this section may provide any telecommunications services over the same unbundled network element.

<sup>251</sup> "9.1.1.2.1: Except as provided in this Section 9.1.1.2.1 and in Section 9.23.4.1, Qwest shall not impose limitations, restrictions, or requirements on requests for, or the use of, Unbundled Network Elements for the service CLEC seeks to offer."

<sup>252</sup> The operative language makes clear that no other limitations on UNEs will be imposed (beyond those in the contract) and the restriction on using UNEs to serve other carriers is not in the ICA.

1 A. Yes. On September 11, 2006, Qwest issued a Level 3 CMP notice<sup>253</sup> that revised  
2 its Provisioning and Installation Overview and changed the verbal supplement for  
3 CFA slot change on the due date. Qwest added the following language:

4 NOTE: For CFA or slot changes, it is the CLEC's responsibility to  
5 provide Qwest with a new CFA that will work. Qwest will only  
6 accept one verbal CFA change on the due date. If that CFA fails to  
7 work, Qwest will place the order in jeopardy (customer jeopardy).  
8 No further action will be taken on Qwest's part until Qwest  
9 receives a valid supplemental request to change the due date and  
10 the CFA (if applicable). Additional charges may apply.

11 This language restricts the availability of CFA changes,<sup>254</sup> unnecessarily  
12 complicates the provisioning process and leaves the door open for Qwest to assess  
13 "additional charges" – which, coupled with Qwest's 8/31/06 notice (discussed  
14 below in the next example), means that Qwest will apply tariff charges. As  
15 indicated in Eschelon's proposed language for Issue 9-31, design changes are  
16 activities that are necessary for nondiscriminatory access to UNEs, and this type  
17 of arbitrary restriction on this access is concerning to Eschelon. While Qwest  
18 later retracted this CMP notice,<sup>255</sup> on October 26, 2006, Qwest issued an internal  
19 notification (MCC) that it distributed to CLECs which again limits CFA changes  
20 to one per circuit on the day of the cut, but directs Qwest testers to "determine if it  
21 is reasonable to expect the next CFA change to resolve the issue" and if Qwest's  
22 tester decides that this expectation is not reasonable, the "CFA change should be

---

<sup>253</sup> PROS.09.11.06.F.04161.P\_&\_I\_Overview\_v91.

<sup>254</sup> Design changes, and more specifically CFA changes, are addressed in Issue 4-5 (Design Changes) in the testimony of Mr. Denney.

<sup>255</sup> Qwest filed a notice on 10/20/06 (PROS.10.20.06.F.04281.Retract\_CFA\_P&I\_OvrvwV91) to retract PROS.09.11.06.F.04161.P\_&\_I\_Overview\_v91.

1 refused and the CLEC should be pointed to the supplemental process.” Qwest’s  
2 10/26/06 document also states that “If Qwest receives frequent attempts from a  
3 CLEC to verbally request numerous changes on DD before a good CFA is found,  
4 the Tester should post a Customer Jeopardy to the order and contact the CLEC’s  
5 Service Manager to inform them of the situation.” Qwest claims (incorrectly) that  
6 it has always been Qwest’s intent to limit CFA changes to one per circuit on the  
7 day to the cut, and that this MCC notice only reiterates the current practice.  
8 Eschelon has asked Qwest to retract this MCC notice, explaining that this is a  
9 change in process and should be issued as a Level 4 CMP change request, and that  
10 limiting CFA changes on the day of the cut to one per circuit was not Qwest’s  
11 intent and that Qwest has been performing multiple CFA changes for four  
12 years.<sup>256</sup> The intent to apply to multiple CFA changes is evident on the face of  
13 the change request. It provides examples to illustrate the request, and one of those  
14 examples includes multiple changes to one CFA. Nevertheless, Qwest’s actions  
15 with regard to its CFA change notices is further proof that Qwest’s promises  
16 regarding nondiscriminatory access to UNEs and its actions are two different  
17 things and that the Commission should remedy this situation by making Qwest’s  
18 obligations clear in the contract under Issue 9-31.

19 **Q. WHAT IS ESCHELON’S PROPOSAL ON ISSUE 9-31?**

20 A. Eschelon has two alternative proposals for Section 9.1.2:

21 **Proposal #1:**

---

<sup>256</sup> Mr. Denney provides a CFA Change Chronology as Eschelon/27. This exhibit includes Qwest’s CFA change notices and Eschelon’s request for Qwest to retract its 10/26/06 MCC notice.

1            ~~Access to Activities Available for~~ Unbundled Network Elements  
2 includes moving, adding to, repairing and changing the UNE  
3 (through *e.g.*, design changes, maintenance of service including  
4 trouble isolation, additional dispatches, and cancellation of orders)  
5 ~~at the applicable rates.~~

6  
7            **Proposal #2:**

8            9.1.2    ..... ~~Access to Activities available for~~ Unbundled Network  
9 Elements includes moving, adding to, repairing and changing the  
10 UNE (through, *e.g.*, design changes, maintenance of service  
11 including trouble isolation, additional dispatches, and cancellation  
12 of orders)~~at the applicable rates~~ and will be provided at TELRIC  
13 rates....

14            Because Section 9.1.2 deals only with Section 251 access to unbundled network  
15 elements,<sup>257</sup> TELRIC rates apply. Therefore, if any reference to rates is made in  
16 this section, it should specify TELRIC rates, as shown in Eschelon's proposal #2.  
17 If Qwest later challenges use of TELRIC rates and succeeds in obtaining a ruling  
18 allowing it to charge tariff rates in one or more of these cases, the ICA has change  
19 of law provisions for use in such situations.

20            **Q.    WHAT IS QWEST'S PROPOSAL ON ISSUE 9-31?**

21            A.    Qwest originally proposed to omit Eschelon's language and provided no  
22 competing language. In support of this position, Qwest states that Eschelon's  
23 language would require Qwest to provide a "superior network" and may be an  
24 attempt by Eschelon to get modifications to UNEs without paying for them.<sup>258</sup>

25            Qwest has since modified its proposal as follows:

---

<sup>257</sup> See definition of Unbundled Network Element in Section 4.0 of the proposed ICA.

<sup>258</sup> Qwest Response, p. 23.

1                    Activities available for Access to Unbundled  
2                    Network Elements includes moving, adding to, repairing and  
3                    changing the UNE (through *e.g.*, design changes, maintenance of  
4                    service including trouble isolation, additional dispatches, and  
5                    cancellation of orders) at the applicable rates.

6    **Q.    WHY HAS ESCHELON PROPOSED TO INCLUDE MOVES, ADDS,**  
7                    **REPAIRS AND CHANGES TO UNES IN THE DESCRIPTION OF**  
8                    **ACCESS TO UNES?**

9    A.    It is crucial to include these items to ensure that CLECs get nondiscriminatory  
10                    access to UNEs, as Qwest’s attack on TELRIC pricing for these activities clearly  
11                    demonstrates. The importance of making this clear in the ICA is evident in both  
12                    the existing ICA between Eschelon and Qwest as well as FCC rules and orders.  
13                    As both companies’ proposals now include the phrase “Unbundled Access to  
14                    Unbundled Network Elements includes moving, adding to, repairing and  
15                    changing the UNE (through *e.g.*, design changes, maintenance of service  
16                    including trouble isolation, additional dispatches, and cancellation of orders),” the  
17                    remaining open issue is whether these activities – which under both companies’  
18                    proposals apply to “the UNE” – are provided at TELRIC rates (subject to the  
19                    change in law provisions of the ICA should a later decision change the status  
20                    quo). Eschelon’s position is that TELRIC rates apply not only to the enumerated  
21                    UNEs but also to “access to” those UNEs.

22   **Q.    PLEASE ELABORATE ON HOW THE FCC ADDRESSED “ACCESS TO**  
23                    **UNES” IN ITS ORDERS.**

1 A. In its *First Report and Order* at ¶ 268, the FCC found that the requirement to  
2 provide “access to UNEs” must be read broadly, concluding that the Act requires  
3 that UNEs “be provisioned in a way that would make them useful” and “[t]he  
4 ability of other carriers to obtain access to a network element for some period of  
5 time does not relieve the incumbent LEC of the duty to maintain, repair, or  
6 replace the unbundled network element.”

7 **Q. WHAT OTHER FCC ORDERS OR RULES GOVERNING NON-**  
8 **DISCRIMINATION FOR UNES APPLY HERE?**

9 A. Section 251(c)(3) of the Telecommunications Act requires that Qwest provide  
10 access to unbundled network elements, including unbundled local loops, on rates,  
11 terms and conditions that are just, reasonable and non-discriminatory. The FCC  
12 *First Report and Order*<sup>259</sup> further defined the meaning of “just, reasonable and  
13 non-discriminatory,” which was included in 47 CFR §51.313. Specifically, the  
14 Order stated that at the minimum, the obligation of “just, reasonable and non-  
15 discriminatory” includes two conditions: First, the ILECs should provide  
16 unbundled network elements to requesting carriers under terms and conditions  
17 that are equal to the terms and conditions under which the ILEC provides the  
18 service to itself.<sup>260</sup> Second, the ILECs should offer equal terms and conditions to

---

<sup>259</sup> First Report and Order, *Implementation of the Local Competition Provisions in the Telecommunications Act of 1996; Interconnection between Local Exchange Carriers and Commercial Mobile Radio Service Providers*, CC Docket Nos. 96-98, 95-185, 11 FCC Rcd 15499 (1996) FCC Dockets CC Nos. 96-98 and 95-185, (“*Local Competition Order*”) adopted on August 1, 1996.

<sup>260</sup> 47 CFR §51.313(b).

1 all carriers requesting unbundled network elements.<sup>261</sup> Further, the Order noted  
2 that the obligation of “just, reasonable and non-discriminatory” terms and  
3 conditions are conditions that provide the requesting carriers a meaningful  
4 opportunity to compete:

5 The duty to provide unbundled network elements on "terms, and  
6 conditions that are just, reasonable, and nondiscriminatory" means,  
7 at a minimum, that whatever those terms and conditions are, they  
8 must be offered equally to all requesting carriers, and where  
9 applicable, they must be equal to the terms and conditions under  
10 which the incumbent LEC provisions such elements to itself. We  
11 also conclude that, because section 251(c)(3) includes the terms  
12 "just" and "reasonable," this duty encompasses more than the  
13 obligation to treat carriers equally. Interpreting these terms in light  
14 of the 1996 Act's goal of promoting local exchange competition,  
15 and the benefits inherent in such competition, we conclude that  
16 these terms require incumbent LECs to provide unbundled  
17 elements under terms and conditions that would provide an  
18 efficient competitor with a meaningful opportunity to compete.  
19 Such terms and conditions should serve to promote fair and  
20 efficient competition. This means, for example, that incumbent  
21 LECs may not provision unbundled elements that are inferior in  
22 quality to what the incumbent provides itself because this would  
23 likely deny an efficient competitor a meaningful opportunity to  
24 compete.<sup>262</sup>

25 In addition, the Order stated that the provision of unbundled network elements  
26 does not relieve the ILEC from the duty to maintain and repair the unbundled  
27 network element:

28 We conclude that we should adopt our proposed interpretation that  
29 the terms "access" to network elements "on an unbundled basis"  
30 mean that incumbent LECs must provide the facility or  
31 functionality of a particular element to requesting carriers, separate  
32 from the facility or functionality of other elements, for a separate

---

<sup>261</sup> 47 CFR §51.313(a).

<sup>262</sup> *Local Competition Order* at ¶ 315 (emphasis added; footnotes omitted).

1 fee. We further conclude that a telecommunications carrier  
2 purchasing access to an unbundled network facility is entitled to  
3 exclusive use of that facility for a period of time, or when  
4 purchasing access to a feature, function, or capability of a facility,  
5 a telecommunications carrier is entitled to use of that feature,  
6 function, or capability for a period of time. The specified period  
7 may vary depending on the terms of the agreement between the  
8 incumbent LEC and the requesting carrier. The ability of other  
9 carriers to obtain access to a network element for some period of  
10 time does not relieve the incumbent LEC of the duty to maintain,  
11 repair, or replace the unbundled network element.<sup>263</sup>

12 The final rules defining the meaning of “just, reasonable and nondiscriminatory”  
13 access to UNEs prescribed that an ILEC must provide a carrier purchasing UNEs  
14 with the pre-ordering, ordering, provisioning, maintenance and repair, and billing  
15 functions of the incumbent LEC's operations support systems.<sup>264</sup>

16 **Q. HOW DOES THE EXISTING ESCHELON AND QWEST ICA ADDRESS**  
17 **THIS ISSUE?**

18 A. Section 5.1 to Attachment 8 of the ICA states, in part:

19 5.1.1 USWC shall provide repair, maintenance, testing, and  
20 surveillance for all local services and unbundled Network  
21 Elements and Combinations in accordance with the terms  
22 and conditions of this Agreement and at least to that which  
23 USWC provides for itself or any other Person.  
24

25 5.1.2 During the term of this Agreement, USWC shall provide  
26 necessary maintenance business process support as well as  
27 those technical and systems interfaces required to enable  
28 CO-PROVIDER to provide at least the same level and  
29 quality of service for all services for resale, functions,  
30 features, capabilities and unbundled Network Elements or  
31 Combinations of Network Elements as USWC provides

---

<sup>263</sup> *Local Competition Order* at ¶ 268 (emphasis added; footnotes omitted).

<sup>264</sup> 47 CFR §51.313(c).

1                   itself, its subscribers, any of its Affiliates or subsidiaries or  
2                   any other Person. At a minimum, USWC shall provide  
3                   CO-PROVIDER with the same level of maintenance  
4                   support as USWC provides itself in accordance with  
5                   standards and performance measurements that are at least  
6                   equal to the highest level of standards and/or performance  
7                   measurements that USWC uses and/or which are required  
8                   by law, regulatory agency, or by USWC's own internal  
9                   procedures, whichever are the most rigorous. These  
10                  standards shall apply to the quality of the technology,  
11                  equipment, facilities, processes, and techniques (including,  
12                  but not limited to, such new architecture, equipment,  
13                  facilities, and interfaces as USWC may deploy) that USWC  
14                  provides to CO-PROVIDER under this Agreement.

15  
16                  5.1.3 USWC shall provide a SPOC (Single Point of Contact) for  
17                  CO-PROVIDER to report maintenance issues and trouble  
18                  reports via real-time electronic interfaces twenty four  
19                  (24)hours a day, seven (7) days a week. The SPOC  
20                  Residence 800 number, and SPOC Business 800 number,  
21                  will be the numbers used for all of USWC's 14 states.

22  
23                  5.1.4 USWC shall provide CO-PROVIDER maintenance dispatch  
24                  personnel on the same schedule that it provides for its own  
25                  end users.

26   **Q.    BASED ON THE EXISTING ICA AND APPLICABLE FCC RULES AND**  
27           **ORDERS, WHY IS IT CRUCIAL FOR THE ITEMS IDENTIFIED IN**  
28           **ESCHELON'S LANGUAGE TO BE SPECIFICALLY IDENTIFIED IN**  
29           **THE ICA AS "ACCESS" TO UNES?**

30    A.    Because without the nondiscriminatory access to UNES that would result from  
31            Eschelon's proposed language (and which would not be preserved under Qwest's  
32            proposal), Eschelon would not have a meaningful opportunity to compete.  
33            Eschelon has an expectation, as supported by governing rules and orders, that it  
34            will continue to have access to the same maintenance and repair procedures and

1 level of quality available to Qwest’s other customers – whether retail, resale or  
2 QPP – under terms and conditions that are nondiscriminatory.

3 **Q. WHY IS THE MODIFIED LANGUAGE THAT QWEST RECENTLY**  
4 **PROPOSED NOT SUFFICIENT TO CLOSE THIS ISSUE?**

5 A. Qwest opposes Eschelon’s language because, according to Qwest, it  
6 impermissibly expands Qwest’s obligations and would prevent Qwest from  
7 recovering its costs.<sup>265</sup> Qwest originally recommended striking all of Eschelon’s  
8 language, but has since modified its language proposal for Section 9.1.2, and  
9 Qwest’s modified proposal misses the point. The Commission needs to decide  
10 that moving, adding to, and repairing the UNE are part of nondiscriminatory  
11 access to UNEs. Qwest's language states that these activities are “available for”  
12 UNEs, and strikes the key word “access.” Qwest's choice of "available for"  
13 suggests that the activities are not UNE activities but rather are non-UNE  
14 activities that Qwest may make in some manner "available for" UNEs, a concept  
15 with which, as noted, the FCC disagrees. Qwest’s modified language does  
16 nothing to address Eschelon’s concern that the ICA clarify that these activities are  
17 part of Qwest’s obligation to provide nondiscriminatory access to UNEs at  
18 TELRIC-based rates. Further, Qwest’s language leaves the door open for Qwest  
19 to charge expensive, non-cost based charges (potentially tariff rates) for these  
20 activities that Qwest would argue are not under the Commission’s purview. The  
21 fact that Qwest had agreed to make these activities “available for” UNEs would

---

<sup>265</sup> Qwest Response, p. 23.

1 be of little comfort to Eschelon if the prices Qwest assesses for these activities are  
2 set at expensive, non-cost based levels, providing Qwest a significant cost  
3 advantage when serving its customers.

4 **Q. DID THE MINNESOTA COMMISSION AGREE WITH QWEST THAT**  
5 **ESCHELON’S PROPOSAL FOR THIS ISSUE IMPERMISSABLY**  
6 **EXPANDS QWEST’S OBLIGATIONS AND WOULD KEEP QWEST**  
7 **FROM RECOVERING ITS COSTS FOR THESE ACTIVITIES?**

8 A. No, the Minnesota Commission disagreed with Qwest’s arguments. The  
9 Minnesota Arbitrators, as affirmed by the Minnesota Commission found:

10 It is difficult to understand Qwest’s position that Eschelon’s  
11 language might require Qwest to provide access to an “as yet  
12 unbuilt, superior network” or that it might mean Qwest would be  
13 unable to charge at all for making such changes. It is a real stretch  
14 to find this kind of ambiguity in Eschelon’s language. Qwest has  
15 pointed to nothing in the language that would require it to perform  
16 an activity that is obviously outside of its existing § 251  
17 obligations.<sup>266</sup>

18 The Minnesota Commission also recognized the problem with Qwest’s proposed  
19 “applicable rate” language as follows:

20 Qwest’s proposed language is in fact more ambiguous than  
21 Eschelon’s, because it would leave unanswered the question  
22 whether routine changes in the provision of a UNE would be  
23 priced at TELRIC or at some other “applicable rate.”

24 Federal law requires that when a CLEC leases a UNE, the ILEC  
25 remains obligated to maintain, repair, or replace it. Unless and  
26 until the Commission or other authority determines to the contrary,  
27 these types of routine changes to UNES should be provided at

---

<sup>266</sup> Eschelon/29, MN Arbitrators’ Report, ¶130, affirmed in relevant part in the MN PUC Arbitration Order.

1 TELRIC rates. Eschelon's language should be adopted for this  
2 section.<sup>267</sup>

3 The Minnesota Commission adopted Eschelon's proposed language for Issue 9-  
4 31.<sup>268</sup>

5 **Q. PLEASE SUMMARIZE ISSUE 9-31**

6 A It is critical that the ICA language make clear that Qwest must continue to provide  
7 nondiscriminatory access to UNEs, including activities performed to make the  
8 UNE useful and allow Eschelon a meaningful opportunity to compete. This is  
9 supported by FCC rules and orders as well as the current Eschelon/Qwest ICA.  
10 For all of the reasons described in Eschelon's business need and in these  
11 responses, the Commission should adopt Eschelon's language for Issue 9-31.

12 **VII. SUBJECT MATTER NO. 15. DELAYED ORDERS WHEN FACILITIES**  
13 **ARE NOT AVAILABLE**

14 Issue No. 9-32 and Subparts (a) – (c): ICA Sections 9.1.2.1.3.2.1; 9.1.2.1.3.2.2;  
15 9.2.2.3.2; and 9.2.2.16

16 **Q. IS SUBJECT MATTER NO. 15 (ISSUES 9-32 AND SUBPARTS (A) – (C))**  
17 **NOW CLOSED?**

18 A. Yes. Since Eschelon's Petition for Arbitration was filed, the parties have closed  
19 Subject Matter No. 15 (Issues 9-32 and subparts (a) through (c)) based on the 90  
20 day held order policy provided as Eschelon's Option #2 (Issue 9-32(a)) shown at

---

<sup>267</sup> Eschelon/29, MN Arbitrators' Report, ¶¶131-132, affirmed in relevant part in the MN PUC Arbitration Order.

<sup>268</sup> Eschelon/29, MN Arbitrators' Report, ¶132, affirmed in relevant part in the MN PUC Arbitration Order.

1 pages 80-83 of the Disputed Issues List (Exhibit 3 to Eschelon's Petition for  
2 Arbitration). By agreement of the parties, Section 9.2.2.3.2 was slightly amended  
3 from what is shown in the Disputed Issues List, and the closed Section 9.2.2.3.2  
4 reads as follows:

5 9.2.2.3.2 If CLEC orders a 2/4 wire non loaded or ADSL  
6 compatible Unbundled Loop for an End User Customer served by  
7 a Digital Loop Carrier System Qwest will conduct an assignment  
8 process which considers the potential for a LST or alternative  
9 copper facility. If a LST is not available, Qwest may also seek  
10 alternatives such as Integrated Network Access (INA), hair  
11 pinning, or placement of a Central Office terminal, to permit  
12 CLEC to obtain an Unbundled Loop. If no such facilities are  
13 available, Qwest will make every feasible effort to unbundle the  
14 IDLC in order to provide the Unbundled Loop for CLEC. Qwest  
15 will hold the order for ninety (90) Days. If, after 90 Days, no  
16 copper facility capable of supporting the requested service is  
17 available, then Qwest will reject the order.

18 **VIII. SUBJECT MATTER NO. 16. NETWORK MAINTENANCE AND**  
19 **MODERNIZATION**

20 *Issue Nos. 9-33, 9-33(a), 9-34, 9-35 and 9-36: ICA Sections 9.1.9 and 9.1.9.1<sup>269</sup>*

21 **Q. HAVE SOME OF THE NETWORK MAINTENANCE AND**  
22 **MODERNIZATION ISSUES UNDER SUBJECT MATTER NO. 16**  
23 **CLOSED?**

24 **A. Yes. Issues 9-33(a), 9-35 and 9-36 have closed. The closed language is shown**  
25 **below.**

---

<sup>269</sup> The ICA language shown below for these issues may differ from what is shown in the exhibits to the Petition for Arbitration. See Exhibit 3 to Eschelon's Petition for Arbitration (Disputed Issues Matrix) and Exhibit 4 to Eschelon's Petition (redlined copy of ICA). Qwest and Eschelon have modified some of their proposals since the Petition and Response were filed.

1 **Q. PLEASE DESCRIBE THE REMAINING NETWORK MAINTENANCE**  
2 **AND MODERNIZATION ISSUES (9-33 AND 9-34) AND EXPLAIN THE**  
3 **BUSINESS NEEDS BEHIND ESCHELON’S LANGUAGE PROPOSALS.**

4 A. The two network maintenance and modernization issues are (1) whether minor  
5 changes in transmission parameters include changes that adversely affect the End  
6 User Customer’s service on more than a temporary or emergency basis [Issue 9-  
7 33]; and (2) whether, in situations when Qwest makes changes that are specific to  
8 an End User Customer, Qwest should include the circuit identification and End  
9 User Customer address information in the notice [Issue 9-34].

10 First, regarding Issue 9-33, Qwest has refused to provide any commitment in the  
11 ICA that network maintenance and modernization activities that the companies  
12 have agreed will involve only “minor changes to transmission parameters” will  
13 not adversely affect service to Eschelon’s End User Customers on more than a  
14 temporary or emergency basis. Adversely affect is a known term in the industry,  
15 as it has been used by the FCC in its rules. This issue concerns Eschelon  
16 customers who have a working circuit and are up and running without any service  
17 problems. Qwest then makes changes to the UNEs in its network that were not  
18 requested by Eschelon or Eschelon’s Customer. Resulting customer disruption  
19 would be unexpected from the End User Customer’s perspective because the  
20 problem was caused by a Qwest-initiated maintenance or modernization activity –  
21 not an Eschelon-initiated or customer-initiated request. Sometimes, however,  
22 temporary customer disruption is unavoidable, and Eschelon is not attempting to

1 hold Qwest to a zero outage standard for maintenance and modernization  
2 activities. Eschelon's proposed language clearly anticipates and addresses  
3 reasonably anticipated temporary service interruptions and emergencies.<sup>270</sup> The  
4 expectation in Section 9.1.9 should be that once any anticipated, temporary  
5 disruption (such as a brief outage during non-working hours needed to perform  
6 the work) or any emergency (such as when a brief anticipated outage develops  
7 into an unanticipated extended outage) *has ended*, the End User Customer's  
8 service will work without any adverse affect to that service. This is different, for  
9 example, from situations in which copper is retired and replaced with fiber  
10 pursuant to Section 9.2.1.2.3. In those copper retirement situations, the  
11 expectation is that the End User Customers' service *will* be adversely affected (so  
12 Qwest must provide 91 Days notice, CLECs are allowed to object, *etc.*).<sup>271</sup> In  
13 contrast, for Section 9.1.9 activities, Eschelon's proposed language appropriately  
14 provides that, after those modifications and changes to the UNEs in Qwest's  
15 network that result in minor changes to transmission parameters, the End User  
16 Customer's service will be restored (if a temporary interruption or emergency  
17 occurs) and will continue to work within the transmission limits of the UNE

---

<sup>270</sup> Former Issues 9-35 and 9-36 are closed. Therefore, the terms relating to emergencies in Section 9.1.9.1 are agreed upon and closed. Although the language of Section 9.1.9.1 is now closed, Qwest has not agreed to Eschelon's proposal to include a cross reference in Section 9.1.9 to Section 9.1.9.1, even though a primary purpose of the cross reference is to assure Qwest that the "adversely affect" language is not a zero outage standard, as Eschelon's proposed language clearly recognizes that emergencies will occur.

<sup>271</sup> See Section 9.2.1.2.3 of the proposed ICA (closed language).

1 ordered by Eschelon.<sup>272</sup> Eschelon needs this commitment in the ICA to ensure  
2 that it may continue to provide working service, using the UNEs for which it has  
3 compensated Qwest, to its Customers.

4 Regarding Issue 9-34, Eschelon's proposed language provides that, in the limited  
5 scenario when changes are specific to an End User Customer, the notice of the  
6 change will contain the circuit identification and End User Customer address  
7 information. Qwest's technicians will need this information in order to perform  
8 changes that are specific to an End User Customer and Qwest should also provide  
9 this information to Eschelon. Eschelon needs this information to be prepared to  
10 address any temporary service interruptions and to communicate with its  
11 Customer.

12 **Q. WHAT IS ESCHELON'S PROPOSAL TO ADDRESS ISSUES 9-33 AND 9-**  
13 **34?**

14 A. Eschelon proposes the following language:

15 **Issue 9-33 (Option #1)**

16 9.1.9 .....Such changes may result in minor changes to  
17 transmission parameters but the changes to transmission  
18 parameters will not adversely affect service to any CLEC End User  
19 Customers (other than a reasonably anticipated temporary service  
20 interruption, if any, needed to perform the work). (In addition, in  
21 the event of emergency, see Section 9.1.9.1).<sup>273</sup>

---

<sup>272</sup> Closed language in Section 9.1.9 provides: "Network maintenance and modernization activities will result in UNE transmission parameters that are within transmission limits of the UNE ordered by CLEC."

<sup>273</sup> Eschelon also continues to offer in the alternative: "but will not adversely affect service to any End User Customers. (In the event of emergency, however, see Section 9.1.9.1)."

1

2

**Issue 9-33 (Option #2)**

3

. . . If such changes result in the CLEC’s End User Customer experiencing unacceptable changes in the transmission of voice or data, Qwest will assist the CLEC in determining the source and will take the necessary corrective action to restore the transmission quality to an acceptable level if it was caused by the network changes....

4

5

6

7

8

9

**Issue 9-34 (Option #1)**

10

9.1.9.....Such notices will contain the location(s) at which the changes will occur including, if the changes are specific to an End User Customer, the circuit identification and End User Customer address information, and any other information required by applicable FCC rules. . . .

11

12

13

14

15

**Issue 9-34 (Option #2)**

16

.....Such notices will contain the location(s) at which the changes will occur including, if the changes are specific to an End User Customer,<sup>274</sup> circuit identification, if readily available, and any other information required by applicable FCC rules.

17

18

19

20

**Issue 9-33(a) is now closed with the following language:**

21

This Section 9.1.9 does not address retirement of copper Loops or Subloops, which are addressed in Sections 9.2.1.2.2 (and subparts), 9.2.1.2.2.3, 9.2.1.2.3 (and subparts), and 9.2.2.3.3.

22

23

24

**Issues 9-35 and 9-36 are now closed with the following language:**

25

9.1.9.1 In the event that Qwest intends to dispatch personnel to the Premises of a CLEC End User Customer, for the purpose of maintaining or modernizing the Qwest network, Qwest shall provide CLEC with email notification no less than three (3) business days in advance of the Qwest dispatch and within three (3) business days after completing the maintenance or modernization activity. In the event of an emergency (e.g., no dial tone), Qwest need not provide CLEC with advance email notification but shall notify CLEC by email within three (3) business days after completing the emergency maintenance or

<sup>274</sup> Note: Eschelon will accept “End User Customer” or “CLEC End User Customer” here.

1 modernizing activity. In such emergencies, once Qwest personnel  
2 involved in the maintenance or modernization activities are aware  
3 of an emergency affecting multiple End User Customers, Qwest  
4 shall ensure its repair center personnel are informed of the network  
5 maintenance and modernization activities issue and their status so  
6 that CLEC may obtain information from Qwest so that CLEC may,  
7 for example, communicate with its End User Customer(s). CLEC  
8 may also contact its Service Manager to request additional  
9 information so that CLEC may, for example, communicate with its  
10 End User Customer(s). In no event, however, shall Qwest be  
11 required to provide status on emergency maintenance or  
12 modernization activity greater than that provided to itself, its End  
13 User Customers, its Affiliates or any other party. To the extent  
14 that the activities described in Sections 9.1.9 and 9.1.9.1 include  
15 dispatches, no charges apply.

16 **Q. WHAT IS QWEST’S PROPOSAL TO ADDRESS THESE ISSUES?**

17 A. Qwest proposes the following language:

18 **Issue 9-33**

19 9.1.9 .....Such changes may result in minor changes to  
20 transmission parameters ~~but will not adversely affect service to any~~  
21 ~~End User Customers (other than a reasonably anticipated~~  
22 ~~temporary service interruption, if any, needed to perform the~~  
23 ~~work). (In addition, in the event of emergency, see Section~~  
24 ~~9.1.9.1).~~

25 **Issue 9-34**

26 9.1.9.....Such notices will contain the location(s) at which the  
27 changes will occur ~~including, if the changes are specific to an End~~  
28 ~~User Customer, the circuit identification and End User Customer~~  
29 ~~address information,~~ and any other information required by  
30 applicable FCC rules. . . .

31 Qwest’s proposal for Issue 9-33 omits the “adversely affect” and “unacceptable  
32 changes” language in Eschelon’s Proposals #1 and #2, suggesting that under  
33 Qwest’s proposal, “minor” changes can have an adverse effect on Customers’  
34 service and result in unacceptable changes to the transmission of voice and data  
35 and Qwest need not take corrective action to fix the problem. Qwest argues that

1 Eschelon’s language is vague, not tied to industry standards, inappropriately  
2 focuses on service provided to Eschelon’s end users, and would lead to future  
3 disagreements.<sup>275</sup> It bears noting that the Minnesota Commission adopted  
4 Eschelon’s Proposal #2, which is based on the proposal of the Minnesota  
5 Department of Commerce, to resolve Issue 9-33 and rejected the same concerns  
6 Qwest raises here. The Arbitrators found (at paragraph 142), as affirmed by the  
7 Minnesota Commission, that “The Department’s recommended language should  
8 be adopted. It appears to balance the reasonable needs of both parties in an even-  
9 handed manner...The reference to correcting transmission quality to ‘an  
10 acceptable level’ does not, as Qwest argues, make this language unacceptably  
11 vague. The language merely commits Qwest to taking action to restore  
12 transmission quality to that which existed before the network change.”<sup>276</sup>

13 For Issue 9-34, Qwest omits the language that would require inclusion of circuit  
14 ID and customer address information in network change notices for changes that  
15 are specific to End User Customers in Eschelon’s Proposal #1. Qwest also  
16 recommends omitting Eschelon’s language for Proposal #2 which simply requires  
17 Qwest to provide the circuit i.d. information “if readily available” for changes that  
18 are specific to an End User Customer (or “CLEC End User Customer”). Qwest  
19 contends that the information that it currently provides CLECs through its  
20 network change notifications is compliant with FCC rules and provides Eschelon

---

<sup>275</sup> Qwest Response, p. 24. See also, Qwest’s Position Statement in the Disputed Issues Matrix (10/10/06), pp. 90-91.

<sup>276</sup> MN Arbitrators’ Report, ¶ 142, affirmed in relevant part by the MN PUC Arbitration Order.

1 with sufficient information to determine if the change will affect its End User  
2 Customers.<sup>277</sup> When examining this same issue in Minnesota, the Minnesota  
3 Commission adopted Eschelon’s proposal #2 for Issue 9-34, finding that “if this  
4 information is readily available, Qwest should provide it.”<sup>278</sup> In response to  
5 Qwest’s stated concern that the term “End User Customer” was an attempt by  
6 Eschelon to extend the requirement beyond its own customers to customers of  
7 other carriers, Eschelon offered to accept “CLEC End User Customer” instead of  
8 “End User Customer.”

9 **Issue 9-33: Affect on End User Customers - Section 9.1.9**

10 **Q. IS ESCHELON’S LANGUAGE FOR ISSUE 9-33, WHICH STATES THAT**  
11 **“MINOR” CHANGES IN TRANSMISSION PARAMETERS WILL NOT**  
12 **ADVERSELY AFFECT ESCHELON END USER CUSTOMERS,**  
13 **GROUNDING IN FCC RULES AND ORDERS?**

14 **A.** Yes. 47 CFR § 51.319(a)(8) states:

15 (8) *Engineering policies, practices, and procedures.* An incumbent  
16 LEC shall not engineer the transmission capabilities of its network  
17 in a manner, or engage in any policy, practice, or procedure, that  
18 *disrupts or degrades* access to a local loop...

19 The FCC’s rule prohibits Qwest from making changes to transmission parameters  
20 that “disrupts” or “degrades” access to the loop over which a CLEC provides  
21 service to its End User Customer. Though Qwest complains that Eschelon’s

---

<sup>277</sup> Qwest Response, p. 25, lines 8-9. See also, Qwest’s Position Statement in the Disputed Issues Matrix (10/10/06), p. 94.

<sup>278</sup> MN Arbitrators’ Report, ¶153, as affirmed by the MN PUC Arbitration Order.

1 “adversely affect” language is not tied to industry standards and is vague,<sup>279</sup> the  
2 FCC rule is not tied to an industry standard and does not delineate the degree of  
3 degradation that would be prohibited – it just prohibits degradation and  
4 disruption. Eschelon’s proposal for Issue 9-33 requires the same standard.

5 **Q. ARE THERE OTHER FCC RULES THAT SUPPORT ESCHELON’S**  
6 **LANGUAGE FOR ISSUE 9-33?**

7 A. Yes. 47 CFR § 51.316(b), entitled “conversion of unbundled network elements  
8 and services,” states:

9 (b) An incumbent LEC shall perform any conversion from a  
10 wholesale service or group of wholesale services to an unbundled  
11 network element or combination of unbundled network elements  
12 without *adversely affecting* the service quality perceived by the  
13 requesting telecommunications carrier's end-user customer.  
14 (emphasis added)

15 The FCC uses the term “adversely affecting” in FCC Rule 51.316(b) to describe  
16 the ILECs’ obligations regarding performing conversions the same way  
17 Eschelon’s proposal uses the term to describe Qwest’s obligation regarding  
18 network maintenance and modernization activities. Again, the FCC’s rule does  
19 not define an industry standard, nor does it define a specific level of degradation  
20 that would be allowed. The FCC has used the same term (*i.e.*, “adversely affect”) as  
21 Eschelon’s proposal and for the same purpose (*i.e.*, requiring the activities to be  
22 performed by the ILEC in a manner that is seamless from the perspective of the  
23 End User Customer). The above FCC rules show that any criticism by Qwest that

---

<sup>279</sup> Qwest Response, p. 24.

1 Eschelon’s “adversely affect” language is vague, ambiguous or not tied to  
2 industry standards<sup>280</sup> is misplaced and is really a collateral attack on the FCC’s  
3 rules and orders.

4 In addition, it is entirely proper for Eschelon’s language to focus on the service  
5 quality perceived by Eschelon’s End User Customer, just as FCC Rule 51.316(b)  
6 does.<sup>281</sup> Eschelon’s Customers rely on Eschelon’s service for their service  
7 including dial tone and 911 service, and Eschelon, in turn, relies on the service  
8 Qwest provides to Eschelon to serve its Customers. Therefore, it is impossible to  
9 separate Eschelon’s service needs from the service needs of Eschelon’s End User  
10 Customers in terms of service quality.

11 **Q. REGARDING THE EFFECT OF QWEST’S NETWORK MAINTENANCE**  
12 **OR MODERNIZATION ACTIVITIES ON END USER CUSTOMERS,**  
13 **PLEASE EXPLAIN WHY THE COMMISSION SHOULD ADOPT**  
14 **ESCHELON’S PROPOSAL.**

15 A. The Commission should either adopt Eschelon’s Option #1 or Option #2 for Issue  
16 9-33 primarily because “minor changes to transmission facilities” should not  
17 adversely affect the service of End User Customers (aside from temporary  
18 interruptions needed to perform the work and emergencies, both of which will be

---

<sup>280</sup> See, e.g., Qwest Response, p. 24, lines 10-15 (“Eschelon’s proposed requirement...is flawed because it is not tied to industry standards and is too vague...”; “Eschelon’s failure to tie the phrase ‘adversely affect service’ to any measurable standard creates ambiguity...”)

<sup>281</sup> Qwest ignores the FCC’s focus on the service quality perceived by the End User Customer when it criticizes Eschelon’s proposal for Issue 9-33 for focusing on the End User Customer. Qwest Response, p. 24, lines 8-9 (“Eschelon’s proposed standard improperly focuses on the service Eschelon provides to its customers, not on the service Qwest provides to Eschelon.”).

1 remedied). In other words, if the Customer's service worked before Qwest makes  
2 changes to the UNEs in its network, the service should work afterward. Eschelon  
3 has also offered Proposal #2 which states that if these changes do result in the  
4 CLEC End User Customer experiencing unacceptable changes in the transmission  
5 of voice or data, Qwest will assist the CLEC in identifying the source of the  
6 problem and fixing it. As shown by Eschelon's Proposal #1 and Proposal #2, the  
7 overarching purpose of Eschelon's language is to ensure that maintenance or  
8 modernization activities do not disable Eschelon's reliable, working circuit and to  
9 protect its End User Customers from such service-affecting problems, while at the  
10 same time allowing Qwest to perform "necessary"<sup>282</sup> maintenance and  
11 modernization activities as needed.

12 Eschelon's language does not hold Qwest to a strict or extreme standard under  
13 which service will never be adversely affected. In fact, Eschelon's language  
14 specifically carves out reasonably anticipated temporary service interruptions  
15 necessary to perform the work, emergencies, and copper loop retirement as  
16 described in Section 9.2.1.2.3 as three instances in which adverse effects on  
17 customer service may result. In the two situations governed by Section 9.1.9  
18 under Eschelon's proposal (temporary service interruptions and emergency  
19 situations), the End User Customer's service should be restored. In the third  
20 (cooper loop retirement), Section 9.2.1.2.3 governs. Eschelon's proposal

---

<sup>282</sup> As shown above in Eschelon's proposed language for Issue 9-33, a sentence preceding the disputed language states, in closed language, "Qwest may make *necessary* modifications and changes to the UNEs in its network on an as needed basis." (emphasis added)

1 documents the expectation that service which worked before Qwest performed a  
2 change not requested by Eschelon or its Customer will also work after Qwest  
3 completes that change.

4 In contrast, Qwest is taking the position that a network modification, and resulting  
5 change in transmission parameters of a UNE, may be considered “minor” even if  
6 the change results in a loss of service to End User Customers. As improbable as  
7 that sounds, Eschelon added the “adversely affect” language to its proposal for  
8 Section 9.1.9 after Qwest actually took this position while discussing a customer-  
9 affecting situation involving dB levels, which I discuss further in response to the  
10 next question. A service outage is not “minor,” especially from the perspective of  
11 the Customer whose working service was unexpectedly disabled when it is due,  
12 not to a request by Eschelon or the Customer, but to Qwest’s network changes.

13 **Q. IN ADDITION TO PROVIDING THAT CHANGES TO TRANSMISSION**  
14 **PARAMETERS WILL BE “MINOR,” CLOSED LANGUAGE IN**  
15 **SECTION 9.1.9 PROVIDES THAT QWEST’S ACTIVITIES WILL**  
16 **RESULT IN UNE TRANSMISSION PARAMETERS THAT ARE WITHIN**  
17 **THE TRANSMISSION LIMITS OF THE UNE ORDERED BY**  
18 **ESCHELON. WHY DOESN’T THIS CLOSED LANGUAGE**  
19 **ADEQUATELY ADDRESS ESCHELON’S CONCERNS?**

20 A. Qwest has previously taken the position that it meets its obligations under this  
21 language if it provides a UNE within transmission parameters, even though the  
22 circuit is *not operational* and there is a way to provision an operational circuit

1 that is within transmission parameters. Eschelon, in the past, had a situation in  
2 which Qwest was claiming that it met the industry standards regarding decibel  
3 (dB)<sup>283</sup> loss for DS1s, but Qwest did not provide an operational circuit to  
4 Eschelon. I will refer to this as the dB loss example. An email exchange and  
5 supporting documentation on this example is provided by Ms. Johnson as  
6 Eschelon/86. When Eschelon provided the facts of this example in ICA  
7 negotiations, Qwest confirmed that it interpreted the language of Section 9.1.9 as  
8 proposed by Qwest to allow Qwest to render an End User Customer's circuit non-  
9 operational if such a situation arose under the ICA as a result of Qwest network  
10 maintenance and modernization activities. Eschelon's proposed language for  
11 Issue 9-33 is needed, therefore, to avoid that result.

12 **Q. PLEASE ELABORATE ON THE DB LOSS EXAMPLE.**

13 A. In the 2004 timeframe, Qwest provisioned certain DS1 circuits to Eschelon that  
14 did not work. These DS1 circuits required a repair immediately after Qwest  
15 provisioned them because the dB settings were set at levels that did not work for  
16 the service requested. The standard for dB loss is a range between 0 and -16.5  
17 dBs.<sup>284</sup> When Qwest sets the dB level within this range (including at a level of -  
18 7.5 dBs), often the service works. In some cases, however, Eschelon encounters  
19 situations in which Qwest has set the dBs at a level that, although it is within this

---

<sup>283</sup> A decibel is a unit of measure of signal strength, usually the relationship between a transmitted signal and a standard signal source, known as a reference. Newton's Telecom Dictionary, 20<sup>th</sup> edition at 233.

<sup>284</sup> It is undisputed that the relevant industry standard in this example provides a *range* from 0 to -16.5 for dB loss. See, Eschelon/86, Johnson/1 (Qwest said: "As you know the ANSI range is -16.5 as the lowest setting and "0" as the highest setting for dB levels.")

1 range, the circuit is not operational. In such situations, Eschelon asks Qwest to  
2 adjust the dB level to another point *within the standard range* to make the circuit  
3 operational (such as an adjustment from -7.5 dBs to -1.0 dBs). For example, if  
4 the circuit does not work at the Network Interface Unit (“NIU”) (this means that  
5 the trouble is not in Eschelon’s equipment, which may not even be connected  
6 yet), an adjustment in the dB level may be needed to obtain an operational circuit.  
7 A simple adjustment at either the Qwest central office card or the NIU or both  
8 often will correct the problem.

9 For a period of time, Qwest began to deny requests for an adjustment in the dB  
10 level even though, with the adjustment, the level would still be within the  
11 standard range of 0 and -16.5 dBs. Eschelon escalated this issue and spent quite a  
12 bit of time attempting to resolve this issue with Qwest. When examples of Qwest  
13 denials continued to occur despite Eschelon’s efforts, Eschelon even requested  
14 and received the participation of staff from the Minnesota Department of  
15 Commerce in its attempts to resolve the issue. During Eschelon’s efforts to  
16 resolve this problem, Eschelon learned that Qwest had unilaterally implemented a  
17 network maintenance plan to set the dB levels at a specific level (-7.5) as a  
18 default, even though the industry standard was not -7.5, but rather a dB range of  
19 between 0 and -16.5. Qwest claimed that it was appropriately delivering the  
20 circuit within the industry standard, even though the circuit was not  
21 operational.<sup>285</sup> Eschelon received no notice of Qwest’s maintenance and

---

<sup>285</sup> See Eschelon/86, Johnson/1 & 9.

1 modernization plan. Instead, it was revealed in an email from Qwest to Eschelon  
2 dated 10/12/04<sup>286</sup> as follows (see, Eschelon/86, Johnson/1):

3           ...techs were instructed to reset the db at -7.5 whenever they did a  
4           repair. This was first given as an instruction four years ago and  
5           has been repeated over time. Thus, in order to allow for proper  
6           performance of end-user equipment, Qwest has been moving the  
7           network over time to a default setting of -7.5.

8           Qwest's admission in this email shows that Qwest instructed its technicians that,  
9           whenever performing work needed for repairs, to also reset the dB level at -7.5  
10          (not as part of the repair but rather as part of its move to a different default  
11          setting). It stands to reason, however, that if Eschelon had to obtain an  
12          adjustment in the dB level during installation to obtain an operational circuit, that  
13          a later action to return the dB setting back to the former level would likely once  
14          again cause the circuit to become non-operational. Because Qwest provided no  
15          advance notice to Eschelon of the instruction that Qwest provided to its  
16          technicians in this regard, however, Eschelon would not have known when  
17          troubles or repeat troubles occurred that changes made per this instruction had  
18          been the cause.

19          Qwest said that it was making this change for the purposes of "moving the  
20          network over time to a default setting of -7.5." This Qwest statement is indicative  
21          of a network maintenance or modernization policy that Qwest established to, over  
22          time, move its network to a new default dB setting – a setting that results in DS1s

---

<sup>286</sup> Email from Qwest – Senior Attorney (Joan Peterson) to Eschelon (including Ms. Johnson) dated 10/12/04. Eschelon/86, Johnson/1.

1 that do not work in some instances (*i.e.*, causes a previously working circuit to not  
2 work for the customer). Though the particular problems Eschelon brought to  
3 Qwest’s attention at that time arose during installation,<sup>287</sup> in the course of  
4 investigating the cause of this problem, Qwest revealed its *maintenance and*  
5 *modernization policy* to proactively reset dB settings at a default of -7.5 during  
6 repairs. This maintenance and modernization policy could cause some customers  
7 to lose service – service that had been up and working fine.

8 When Eschelon provided the facts of this example in ICA negotiations as a basis  
9 for its proposed language for Section 9.1.9, Qwest confirmed that its position is  
10 that Qwest may appropriately deliver a circuit anywhere within the industry  
11 standard, even if the circuit is not operational and a different setting also within  
12 the ANSI standard range would make the circuit operational. This example  
13 demonstrates that Qwest will defend a non-working circuit (that previously  
14 worked just fine for the Customer) as being acceptable, within transmission  
15 limits, and meeting the ICA if it can conceivably be described as within those  
16 limits, even though it *does not work*, when another setting – also within  
17 transmission limits – would both meet the standard and *work*. Therefore, while it  
18 may have seemed obvious (given use of the word “minor” in the ICA) before this  
19 example arose that the service should work as it did before Qwest performed its  
20 network maintenance and modernization activities, it is now clear that the ICA  
21 needs to expressly address this point.

---

<sup>287</sup> Qwest delivered DS1s of such poor quality that they needed an immediate repair.

1 **Q. IS ESCHELON ASKING QWEST TO PROVIDE SERVICE OUTSIDE OF**  
2 **INDUSTRY STANDARDS?**

3 A. No. If a setting of -7.5 always resulted in working service, the industry standard  
4 would logically be -7.5. Instead, the industry standard is a range (-16.5 to 0)  
5 because, logically, the service may or may not work at all the settings in the range  
6 but should work somewhere within that range depending on other factors (such as  
7 Qwest cards in the central office or at the NIU – which the standard allows for).  
8 In the dB loss example, Eschelon’s request was simply for Qwest to provide  
9 working service *within this range* (i.e., within industry standard transmission  
10 limits), including near the top of the range if necessary to make the service work  
11 (or work *again* in the case of network maintenance and modernization). Eschelon  
12 is not asking Qwest to set the dB levels outside the range. Eschelon is not even  
13 asking Qwest to re-set the default level, so long as Qwest adjusts the level within  
14 the range when needed. Eschelon is paying Qwest for these circuits and, when  
15 working service is obtainable somewhere within the applicable standard, Eschelon  
16 should be able to expect that these circuits for which Qwest is being compensated  
17 will be operational. With its proposed language, Eschelon is asking the  
18 Commission to recognize a key purpose of industry standards – to ensure working  
19 service for End User Customers.

20 **Issue 9-34: Notices - Location at Which Changes Occur - Sections 9.1.9**

21 **Q. DO THE FCC RULES ADDRESS THE INFORMATION ILECS MUST**

1           **PROVIDE ON THEIR NETWORK CHANGE NOTICES?**

2    A.    Yes. In 47 CFR § 51.327, the FCC provides a list of items that a public notice of  
3           network changes must include, one of which is the location at which the changes  
4           will occur. The FCC described this list as “minimum” requirements. Therefore,  
5           the FCC anticipated the potential for this list being supplemented – just as  
6           Eschelon’s proposal for Issue 9-34 does.

7    **Q.    ARE THERE OTHER FCC RULES THAT SUPPORT ESCHELON’S**  
8           **PROPOSAL?**

9    A.    Yes. The term “location” in the rule must be considered in the context of 47 CFR  
10           § 51.325(a), which states that the public notice must include notice regarding any  
11           network change that “will affect a competing service provider’s performance or  
12           ability to provide service.” Unlike Qwest’s proposal, Eschelon’s proposal is  
13           consistent with 47 CFR §51.327 *and* 47 CFR §51.325 taken together, in that it  
14           provides that Qwest’s customer-specific network notices will provide the location  
15           of the customer for whom the CLEC’s performance will be affected. Eschelon’s  
16           language (Proposal #1) calls for the circuit ID and customer address information,  
17           which are necessary in this regard.<sup>288</sup> Eschelon’s Proposal #2, which is based on  
18           a proposal made by the Minnesota Department of Commerce in the Minnesota  
19           arbitration and adopted by the Minnesota Commission, states that Qwest will  
20           provide the circuit i.d. information to Eschelon for changes that are specific to an  
21           End User Customer (or “CLEC End User Customer”) “if readily available.”

---

<sup>288</sup> Circuit ID is the generally accepted locator within the network and the customer address is the locator within the CLEC’s list of customers.

1 Without this information, the notice provided by Qwest would not achieve the  
2 intent of the FCC's notice rules.

3 **Q. ESCHELON'S PROPOSAL FOR ISSUE 9-34 INCLUDES CIRCUIT ID**  
4 **AND CUSTOMER ADDRESS INFORMATION IN THE QWEST**  
5 **NETWORK CHANGE NOTICE FOR CHANGES THAT ARE SPECIFIC**  
6 **TO AN END USER CUSTOMER. WHY IS THIS INFORMATION**  
7 **NEEDED?**

8 A. Eschelon's proposal is designed to make Qwest's notices of network changes that  
9 are specific to an End User Customer meaningful. Circuit ID and customer  
10 address information is needed for network changes that are customer specific so  
11 that Eschelon can determine if a network change will affect Eschelon's End User  
12 Customers. Circuit ID is the generally accepted locator within the network and  
13 the customer address is the locator within the CLEC's list of customers. This  
14 information identifies particular customers in the network, and with this  
15 information, Eschelon can cross reference its records to determine which  
16 customers Qwest's network change will affect. Eschelon can then inform and  
17 assist these customers, as necessary. Furthermore, Eschelon is less likely to  
18 contact Qwest's repair department if Qwest's notices provide adequate  
19 information to determine whether Eschelon's customers will be affected by a  
20 change, which would reduce the amount of work for both Qwest and Eschelon.

21 **Q. DOES EVIDENCE EXIST DEMONSTRATING THAT QWEST CAN**  
22 **IDENTIFY CHANGES THAT ARE SPECIFIC TO AN END USER**

1           **CUSTOMER AND PROVIDE CIRCUIT ID AND CUSTOMER ADDRESS**  
2           **INFORMATION TO ESCHELON?**

3    A.    Yes. Agreed upon language in Section 9.2.1.2.3 provides that, although notices of  
4           copper retirement will generally be posted on its website, Qwest will provide  
5           direct notice to Eschelon of any planned replacement of copper with fiber “when  
6           CLEC or its End User Customers will be affected.” This shows that, when  
7           making a change, Qwest can distinguish between changes that will affect  
8           Eschelon’s End User Customers and those that will not. Qwest has not provided  
9           any reason why this would not also be true for network maintenance and  
10          modernization activities. Also, to perform changes that are specific to an End  
11          User Customer, the Qwest technician logically needs this type of customer  
12          identifying information to perform the work. Qwest should share this information  
13          with Eschelon.

14          Furthermore, I have attached, as Eschelon/4, a document that Qwest’s new service  
15          manager recently provided to Eschelon about a network change – a change  
16          resulting in a different dB level (the very type of change used as an illustration in  
17          negotiations when describing the facts of the dB loss example). The document is  
18          a Qwest form (with a date of October 27, 2005 for the form itself) for copper  
19          retirements and Impacted CLEC circuits. The form provides for one of two  
20          “Foreseeable Impacts to the CLEC Community”: (1) “Copper to Fiber (Hybrid)”;  
21          or (2) “Negative impact on Loop Make-up (Length or Gauge Change).” By its  
22          terms, the first impact is when the copper is moved to fiber (hybrid) and the

1 second is when the copper is replaced with copper but the length or gauge  
2 changes. In the particular example shown in Eschelon/4, which is dated October  
3 17, 2006, Qwest checked the second box (for replacement of copper with copper).  
4 When Eschelon inquired about the anticipated impact of this change, Qwest  
5 indicated that the change may result in a greater dB loss but, with the length or  
6 gauge change, service should continue to work just fine.

7 Significantly, on Eschelon/4, Starkey/1 Qwest provides the “circuit ID” and  
8 “Impacted Address” (as well as other information) for the Eschelon circuits that  
9 will be impacted by the change. This is clear evidence that Qwest already  
10 possesses and processes this information on impacted circuits for network  
11 changes and, therefore, adopting Eschelon’s language for Issue 9-34 would not  
12 result in a unique process for Eschelon or costly modifications to Qwest’s systems  
13 or processes. Qwest’s own form shows that this falls within the “Impacted CLEC  
14 Circuits” portion of the form and is not a copper retirement job involving  
15 replacement with Fiber to the Home (“FTTH”) or Fiber to the Curb (“FTTC”)  
16 Loops because it contains an effective date only 10 days after the announcement  
17 date,<sup>289</sup> when such copper retirement notices must be issued at least 90 days in  
18 advance of the retirement.<sup>290</sup> Therefore, what Eschelon/4 shows is that Qwest can  
19 already provide the precise information that Eschelon is requesting under Issue 9-  
20 34 for End User Customer specific changes.

---

<sup>289</sup> The form is dated 10/17/06 with an effective date of 10/27/06.

<sup>290</sup> 47 CFR § 51.333(b)(2).

1           When Eschelon inquired further about this notice, Qwest told Eschelon that it sent  
2           the notice to Eschelon “in error” and that it “should not have been sent to  
3           Eschelon.”<sup>291</sup> Qwest referred Eschelon instead to the “generic network disclosure  
4           concerning the copper retirement posted to the Qwest website.”<sup>292</sup> Eschelon has  
5           not been able to discern which generic notice that would be. As Qwest obviously  
6           has this more specific information, including circuit identification and End User  
7           Customer address, it should be required to provide this information to Eschelon as  
8           well.

9   **Q.   IS QWEST OBLIGATED TO PROVIDE THIS INFORMATION TO**  
10 **ESCHELON?**

11   A.   Yes. To comply with the nondiscrimination requirements of Section 251 of the  
12   Act, Qwest must provide CLECs service that is “at least equal in quality to that  
13   provided by the local exchange carrier to *itself* or to any subsidiary, affiliate, or  
14   any other party to which the carrier provides interconnection.”<sup>293</sup> *See also* 47  
15   CFR § 51.313(b).<sup>294</sup> Eschelon/4 shows that Qwest generates and provides circuit  
16   ID and customer address information to itself for changes made to circuits, and  
17   therefore, Qwest must provide it to Eschelon.

---

<sup>291</sup> Eschelon/4, Starkey/3.

<sup>292</sup> Eschelon/4, Starkey/3.

<sup>293</sup> Section 251(c)(2)(C) emphasis added.

<sup>294</sup> Rule 51.313(b): “Where applicable, the terms and conditions pursuant to which an incumbent LEC offers to provide access to unbundled network elements, including but not limited to, the time within which the incumbent LEC provisions such access to unbundled network elements, shall, at a minimum, be no less favorable to the requesting carrier than the terms and conditions under which the incumbent LEC provides such elements to itself.”

1 **Q. ESCHELON’S LANGUAGE FOR ISSUE 9-34 ADDRESSES SITUATIONS**  
2 **THAT ARE SPECIFIC TO AN END USER CUSTOMER, OR IN THE**  
3 **ALTERNATIVE “CLEC END USER CUSTOMER.” PLEASE**  
4 **ELABORATE ON WHAT AN “END USER CUSTOMER SPECIFIC”**  
5 **CHANGE IS, AND THE TYPES OF CHANGES THAT WOULD BE END**  
6 **USER CUSTOMER SPECIFIC.**

7 A. A change that is specific to an end user customer is a change that is made to the  
8 service of a customer at an address and not a change made that affects a  
9 geographic area (or many customers). The dB loss example discussed above and  
10 referenced in Eschelon/86 is an example of a change specific to an end user  
11 customer at a particular address. Qwest has attempted to confuse this issue by  
12 claiming that Eschelon’s language is vague and not practical. In support of these  
13 criticisms, Qwest claims that it would be required to provide circuit ID and  
14 customer address information in the case of a change to local dialing from 7 to 10  
15 digits or a switch upgrade. However, these changes are made for all customers in  
16 a geographic area, and are therefore not specific to End User Customers and  
17 would not be addressed under Eschelon’s proposal for Issue 9-34.

18 **Q. PLEASE SUMMARIZE THE NETWORK MAINTENANCE AND**  
19 **MODERNIZATION ISSUES (ISSUES 9-33 AND 9-34).**

20 A. First, minor changes to transmission parameters should not disrupt service for End  
21 User Customers. Eschelon’s Customers’ service should not be adversely affected  
22 by Qwest’s maintenance and modernization activities, especially when there are

1 special exceptions when service may be disrupted, with disruptions that may not  
2 be temporary being addressed separately in Section 9.2.1.2.3 relating to copper  
3 retirement. If these changes do result in unacceptable changes to the transmission  
4 of voice or data service, however, Qwest should work with the CLEC to identify  
5 and fix the problem, as Eschelon's Proposal #2 reasonably requires. Second,  
6 when Qwest makes changes that are specific to an End User Customer or a CLEC  
7 End User Customer, Qwest should be required to provide information sufficient to  
8 allow Eschelon to identify and provide quality service to the affected  
9 Customer(s). Qwest provides this information to itself and should provide this  
10 information to Eschelon. For all of the reasons discussed with respect to  
11 Eschelon's business need and in these responses, the Commission should adopt  
12 Eschelon's language for Issues 9-33 and 9-34.

13 **IX. SUBJECT MATTER NO. 18: CONVERSIONS**

14 Issue Nos. 9-43 and 9-44 and subparts: ICA Sections 9.1.15.2.3; 9.1.15.3 and  
15 subparts; 9.1.15.3.1; 9.1.15.3.1.1; 9.1.15.3.1.2

16 **Q. WHAT IS ESCHELON'S BUSINESS ISSUE REGARDING**  
17 **CONVERSIONS (ISSUES 9-43 AND 9-44 AND (A)-(C))?**

18 A. A conversion happens when a circuit that was formerly available as a UNE must  
19 be converted to a non-UNE alternative arrangement, as the result of a finding of  
20 "non-impairment." By definition, conversions will take place on live circuits that  
21 are up and running and currently supporting service to End User Customers.  
22 Therefore, a seamless and error free conversion is crucial because if problems

1 arise during the conversion, the likelihood that an Eschelon customer will be  
2 placed “out of service” is high.

3 Further, it is important to note the “conversions” discussed in this testimony  
4 involve only changing the rate charged for the facility and, in the vast majority of  
5 circumstances, the CLEC and its End User Customer should be using the same  
6 facility that was used prior to the conversion. These conversions are required  
7 solely for purposes of implementing a regulatory construct and have nothing to do  
8 with improving or otherwise managing the customer’s service – in essence, the  
9 conversion is intended to re-label as something different what was before a UNE.  
10 These facts reinforce the need for conversions to be transparent to Eschelon’s End  
11 User Customers, as any disruption in service would be completely unexpected and  
12 difficult to explain. In other words, even though these conversions are being  
13 undertaken to effectuate Qwest’s reduced legal obligations relative to UNEs, it is  
14 Eschelon who bears all the risk of failure. Furthermore, the FCC has found that  
15 CLECs should not be assessed conversion charges associated with serving a  
16 customer for the first time because the CLEC is already serving the customer and  
17 service is working fine. Eschelon, therefore, is highly motivated to ensure that  
18 conversions can be accomplished seamlessly, reliably, efficiently and cost-  
19 effectively, and Eschelon is concerned that Qwest will not abide by its obligation  
20 in this regard.

21 **Q. IS THERE GOOD REASON FOR ESCHELON’S CONCERN THAT**  
22 **QWEST WILL MAKE THE CONVERSION PROCESS**

1           **UNNECESSARILY CUMBERSOME AND POTENTIALLY DISRUPT**  
2           **SERVICE TO ESCHELON’S END USER CUSTOMERS?**

3    A.    Yes. In my discussion of the ICA and need for contractual certainty above, I  
4           explained that Qwest has issued several non-CMP “secret PCATs” used to advise  
5           CLECs of Qwest’s view of how its obligations regarding UNEs has changed due  
6           to the *TRO/TRRO*. These notices are password protected, and since they do not  
7           go through CMP, there is no opportunity for CLEC comment about the changes.  
8           Qwest issued one of these password-protected, non-CMP secret PCAT notices on  
9           7/21/06<sup>295</sup> entitled “TRRO – Reclassification of Terminations for Unbundled  
10          Network Element (UNE) Conversions – V1.0,” with an effective date of  
11          7/28/2006 – just one week from the 7/21/06 date of announcement. This notice  
12          announced a “procedure that is needed when you [CLECs] are converting UNE  
13          Services to Finished Services in Non-Impaired Central Offices as required by the  
14          TRRO.” Or, in other words, Qwest announced in a non-CMP PCAT that CLECs  
15          would need to go through a “procedure” to effectuate the same type of  
16          conversions that are the subject of Issues 9-43 and 9-44.

17          This procedure, as explained in Qwest’s notice, requires the CLEC to submit a  
18          collocation application for each central office to “reclassify UNE terminations,”  
19          which is explained as having “Qwest reclassify your UNE Collocation  
20          terminations to a Finished Service Interconnection Tie Pair (ITP) with the  
21          DEMARC outside the collocation as required by the TRRO.” Qwest went on to

---

<sup>295</sup> Document No. PROS.07.21.06.F.04074.TRRO\_Reclass\_Termin\_V1 (Qwest Wholesale Notification – not CMP notice). See, Eschelon/64.

1 explain that DS1s would be reclassified in blocks of 28 DS1s as part of  
2 reclassification and must reside in the same cable sheath,<sup>296</sup> with DS3  
3 terminations being reclassified on an ICB basis. According to Qwest's notice,  
4 when Qwest completes all of this work, it will send the CLEC a revised  
5 Alternative Point of Termination ("APOT"), and the CLEC will then have the  
6 responsibility to update its databases to reflect the new cabling arrangement.

7 In sum, Qwest's notice indicates that Qwest intends to require a significant  
8 amount of work to convert a UNE to an alternative service – work that could  
9 potentially put Eschelon's customers out of service. Qwest's procedure is also  
10 very time consuming – 45 day and ICB intervals, depending on whether the  
11 circuit is a DS1 or DS3 – and Qwest indicates that unless CLECs "reclassify" or  
12 "convert" their UNE circuits that are no longer impaired pursuant to Qwest's new  
13 procedure, it will stop accepting the CLEC's connect, change and disconnect  
14 orders. Worse yet, Qwest's procedure requires the CLEC to either complete or  
15 cancel all work in progress related to the cables being reclassified, which would  
16 put a "freeze" on these cables and customers for a minimum of 15 calendar

---

<sup>296</sup> In a document Qwest provided to Eschelon on August 11, 2006, in response to the question, "Under Qwest's "TRRO PCAT," can the UNE EELs and the non-UNE converted alternative arrangements reside on the same block of 28?," Qwest said: "Yes, when the same cable is being redesignated . . . . In this example, Qwest will allow UNE EELs and non-UNE converted alternative arrangements to reside **on the same cable being reclassified**" (emphasis added). In other words, collocation and UNEs are both addressed by this Secret TRRO PCAT. The entire block (including UNEs) will be frozen.

1 days.<sup>297</sup> This “freeze” is certainly not indicative of the seamless conversions  
2 required by the FCC.

3 Qwest’s procedure conflicts with the FCC’s view of conversions in other ways as  
4 well. Qwest’s notice indicates that there is a potential for Qwest to assess non-  
5 recurring charges on CLECs for these conversion activities. Qwest states that,  
6 CLECs “will not be charged a nonrecurring charge to perform this reclassification  
7 of terminations from UNE to Finished Service *when the activity is associated*  
8 *with TRRO.*” (emphasis added) And then Qwest indicates that  
9 “Tariffs/Catalogs/Price Lists” may apply. This ambiguity on Qwest’s part about  
10 applicable charges for conversion instills little confidence in Eschelon that Qwest  
11 intends to abide by the very clear FCC rule regarding conversion charges.<sup>298</sup>  
12 Further, Qwest’s reference to Tariffs/Catalogs/Price Lists for conversions of  
13 UNEs to alternative service arrangements conflicts with the Oregon PUC’s  
14 finding in the Wire Center docket that “non-recurring UNE-to-private-line service  
15 conversion charge shall be based on costs.”<sup>299</sup>

---

<sup>297</sup> Qwest’s PCAT states: “To eliminate CFA mismatches on orders, it is recommended that all work in progress related to the cable being reclassified either be completed or cancelled by the CLEC prior to quote acceptance. Submission of new connect, change, and disconnect orders on the cable being reclassified will be restricted 15 calendar days prior to the Ready for Service (RFS) date of the reclassification order. The restriction of orders is necessary to enable Qwest to change the designated name of the cable and provide that revised APOT information to the CLEC prior to issuance of orders against that cable.”

<sup>298</sup> 47 CFR § 51.316(c). See also, *TRO*, ¶ 587. The FCC’s rules and orders on conversion charges are discussed in more detail below.

<sup>299</sup> See, Eschelon/40, Denney 20.

1 This conversion procedure announced in Qwest’s non-CMP PCAT flies in the  
2 face of the FCC’s determinations on conversions and Qwest never once raised this  
3 issue in CMP or in the Eschelon arbitration cases – despite Issues 9-43 and 9-44  
4 (conversions) being negotiated for quite some time.<sup>300</sup> Since Qwest’s notice was  
5 slim on details, Eschelon issued questions to Qwest on 8/3/06 inquiring about  
6 several aspects of Qwest’s notice – primarily, why the extensive work described  
7 in the non-CMP secret TRRO PCAT is necessary to simply convert a facility  
8 from UNE pricing to non-UNE pricing. In Qwest’s responses to Eschelon’s  
9 questions, Qwest indicated that “[t]his is a records change, no CLEC or Qwest  
10 physical modifications can be made to the facility as a part of the reclassification”  
11 – though this record change, according to Qwest’s PCAT, would take 45 days to  
12 execute for the first five applications per week per state, and an ICB interval  
13 would apply to any applications exceeding this amount.<sup>301</sup> Eschelon should be  
14 clear that it does not believe that this non-CMP notice applies to Eschelon  
15 because this language is not in Eschelon’s ICA with Qwest and Qwest has not  
16 proposed this language for negotiation/arbitration. However, Eschelon is  
17 concerned, based on Qwest’s past conduct and Qwest’s testimony in other  
18 arbitration proceedings, that if there are not clear terms and conditions in the

---

<sup>300</sup> Qwest also never raised the APOT issue in any of the wire center proceedings, which discussed conversions.

<sup>301</sup> <http://www.qwest.com/wholesale/pcat/trroreclassuneterm.html> “Qwest will complete the reclassification request within 45 days of receipt of a valid application. The 45-day interval for Reclassification applies to the first five (5) Collocation Applications per CLEC per week per state. If six (6) or more Collocation Applications are submitted by CLEC in a one (1) week period in the state, intervals for the Collocation Applications in excess of the first five (5) shall be individually negotiated.”

1 companies' ICA that track the FCC's requirements on conversions, Eschelon will  
2 get through this arbitration and Qwest will attempt to apply the terms of this  
3 notice to Eschelon. Eschelon's proposals on Issues 9-43 and 9-44 will provide  
4 these clear terms and conditions and avoid future disputes.

5 **Q. HAS QWEST REFUSED TO NEGOTIATE THIS APOT ISSUE?**

6 A. Yes. On September 6, 2006, Qwest responded to Eschelon's questions about this  
7 notice indicating that Qwest is refusing to negotiate the APOT issue because  
8 according to Qwest, "the level of process Eschelon is seeking is best managed  
9 through CMP."<sup>302</sup> This response is ironic and highly objectionable given that the  
10 APOT notice was a *non*-CMP notice - meaning that Qwest itself refuses to use  
11 CMP for this issue.<sup>303</sup> Again, this is a prime example of Qwest using the CMP  
12 process as a sword or shield depending on what benefits Qwest. It refuses to  
13 negotiate the APOT issue in state commission arbitrations, and also refused to  
14 address this issue in CMP (though Qwest admits that it is "best served by CMP").  
15 Eschelon is gravely concerned that the ultimate outcome of Qwest's strategy is to  
16 attempt to omit language addressing conversions in Eschelon's ICA, implement  
17 its troublesome, potentially customer-affecting conversion procedure outside of  
18 CMP (avoiding the participation afforded CLECs in CMP), and then ultimately  
19 impose this procedure on Eschelon (arguing that the ICA does not address

---

<sup>302</sup> Email from Kathleen Salverda (Qwest), dated 9/6/06. Eschelon/64. *See also*, Qwest Response, p. 27, lines 9-11 ("Eschelon's demand involves processes that affect all CLECs, not just Eschelon, and it therefore should be addressed through the CMP, not through an arbitration involving a single CLEC.")

<sup>303</sup> Qwest issued a follow-up non-CMP notice on August 31, 2006, effective September 7, 2006 entitled "TRRO Reclassification of Terminations V2.0"

1 conversions). Qwest will then argue that any proposed changes to this “existing”  
2 process – a process that Qwest established unilaterally outside of ICA  
3 negotiations/arbitrations and outside CMP and which does not comply with the  
4 FCC’s requirements – should be rejected because changes would impose costs on  
5 Qwest that would go unrecovered. This underscores the importance of the  
6 Commission rendering a decision on conversions in this arbitration and  
7 maintaining consistency with the FCC’s findings regarding seamless conversions.

8 **Q. WHAT ARE ESCHELON’S PROPOSALS FOR CONVERSIONS (ISSUES**  
9 **9-43 AND 9-44 AND (A)-(C))?**

10 A. Eschelon proposes the following language:

11 **Issue 9-43**

12 9.1.15.2.3 The circuit identification (“circuit ID”) will not change.  
13 After the conversion, the Qwest alternative service  
14 arrangement will have the same circuit ID as formerly  
15 assigned to the high capacity UNE.

16 **Issue 9-44**

17 9.1.15.3 If Qwest converts a facility to an analogous or alternative  
18 service arrangement pursuant to Section 9.1.15, the  
19 conversion will be in the manner of a price change on the  
20 existing records and not a physical conversion. Qwest  
21 will re-price the facility by application of a new rate.

22 **Issue 9-44(a)**

23 9.1.15.3.1 Qwest may perform the re-pricing through use of an  
24 “adder” or “surcharge” used for Billing the difference  
25 between the previous UNE rate and the new rate for the  
26 analogous or alternative service arrangement, much as  
27 Qwest currently does to take advantage of the annual  
28 price increases in its commercial Qwest Platform Plus  
29 product.

1 **Issue 9-44(b)**

2 9.1.15.3.1.1 Qwest may add a new Universal Service Ordering  
3 Code (“USOC”) for this purpose and assign the  
4 “adder” or “surcharge” rate to that USOC.

5 **Issue 9-44(c)**

6 9.1.15.3.1.2 For any facility converted to an analogous or  
7 alternative service arrangement pursuant to Section  
8 9.1.15.3, Qwest will either use the same USOC or the  
9 USOC will be deemed to be the same as the USOC  
10 for the analogous or alternative service arrangement  
11 for pricing purposes, such as for the purpose of  
12 calculating volumes and discounts for a regional  
13 commitment plan.

14 Taken together, Eschelon’s proposals for Issues 9-43 and 9-44 explain how the  
15 conversions from UNEs to alternative service arrangements will be conducted.  
16 For Issue 9-43, Eschelon proposes language that states that the circuit ID for the  
17 facility that is being converted will not change during the conversion. For Issue  
18 9-44, Eschelon proposes language that reflects the FCC’s language regarding the  
19 billing changes involved in conversions, and Eschelon’s language for Issues 9-  
20 44(a) and 9-44(b) sets out an efficient option for implementing the re-pricing of  
21 converted facilities – an adder or surcharge to the original rate – that Qwest  
22 already uses for re-pricing services. Eschelon’s language for Issue 9-44(c) states  
23 that the USOC associated with the converted circuit will remain the same for  
24 calculating volume discounts.

25 **Q. WHAT IS QWEST’S PROPOSAL FOR CONVERSIONS?**

26 A. Qwest proposes to omit all of the Eschelon language shown above, and provides  
27 no competing language. As it has with respect to a number of other issues, Qwest

1 claims that Eschelon's proposals for Issues 9-43 and 9-44 would circumvent the  
2 CMP and require costly, unique processes that affect all CLECs.<sup>304</sup> This is  
3 despite Qwest's refusal to address this issue in CMP.

4 **Q. WHAT TYPE OF CONVERSIONS ARE ADDRESSED IN ISSUES 9-43**  
5 **AND 9-44?**

6 A. These issues apply to conversions from a UNE facility to an analogous or  
7 alternative service arrangement (*see*, Section 9.1.15 of the ICA). These  
8 conversions would occur when there is agreement, or it is determined in dispute  
9 resolution, that the UNE is impacted by a finding of non-impairment. Analogous  
10 or alternative service arrangements include access products purchased from  
11 Qwest's access tariff. For instance, a UNE DS1 loop could be converted to a DS1  
12 special access circuit if it is determined that the applicable non-impairment  
13 thresholds are met for a particular wire center (*see* 47 CFR § 51.319(a)(4)).

14 **Q. IS THIS TRANSITION AWAY FROM UNES WITHIN THE SCOPE OF**  
15 **SECTIONS 251 AND 252 OF THE ACT?**

16 A. Yes. The FCC found that "as contemplated in the Act, individual carriers will  
17 have the opportunity to negotiate specific terms and conditions necessary to  
18 translate our rules into the commercial environment, and to resolve disputes over  
19 any new contract language arising from differing interpretations of our rules."<sup>305</sup>

---

<sup>304</sup> Qwest Position Statement on Issue 9-43 in Disputed Issues Matrix, pp. 102-103. See also, Qwest Response, p. 27.

<sup>305</sup> TRO, ¶ 7.

1 Similarly, the Washington Utilities and Transportation Commission found that  
2 this transition away from UNEs is within the scope of 251/252 of the Act.<sup>306</sup>

3 **Q. SHOULD ANY CHANGES BE MADE BY QWEST DURING A**  
4 **CONVERSION THAT COULD RESULT IN SERVICE DISRUPTION FOR**  
5 **ESCHELON'S END USERS?**

6 A. No. When it has been determined that a UNE facility needs to be converted to an  
7 analogous or alternative service arrangement, Eschelon and its End User  
8 Customer should continue to use the same physical facility. Therefore, the  
9 change required to effectuate the FCC's regulatory requirements can be  
10 accomplished with a record-only change (*i.e.*, changing the price of the UNE  
11 facility being converted to a non-UNE).

12 **Q. PLEASE ELABORATE ON WHY CONVERSIONS SHOULD NOT**  
13 **ENTAIL WORK THAT WOULD PUT ESCHELON'S CUSTOMERS OUT**  
14 **OF SERVICE?**

15 A. The conversions at issue are conversions from UNE to non-Section 251  
16 alternative/analogous service (*e.g.*, access product). The "conversion" in this  
17 instance is really a conversion from cost-based UNE prices (*i.e.*, TELRIC based  
18 prices) to special access prices (*e.g.*, conversion from UNE rates for DS1 loop to  
19 access rates for DS1 special access circuit). However, since the physical facility  
20 otherwise remains unchanged – indeed, the end user should not even know that it  
21 has been "converted" – no other changes should be required for conversion.

---

<sup>306</sup> Washington ALJ Report (Order No. 17 in Verizon/CLEC arbitration), ¶ 150.

1           Given that this re-pricing should not affect the operation of the facility itself,  
2           Qwest should not be allowed to change the facility currently being provided.

3   **Q.   DOES THE FCC AGREE THAT CONVERSIONS SHOULD INVOLVE**  
4   **RECORD CHANGES AND AVOID NETWORK-RELATED CHANGES**  
5   **THAT COULD PUT ESCHELON'S END USER CUSTOMERS OUT OF**  
6   **SERVICE?**

7   A.   Yes. The FCC addressed the issue of conversions in the *TRO*<sup>307</sup> and found that  
8        conversions should be seamless from the end user's perspective, and should  
9        involve only billing changes from Qwest's perspective. At paragraph 586 of the  
10       *TRO*, the FCC discussed the seamlessness of conversions:

11                    Converting between wholesale services and UNEs or UNE  
12                    combinations should be a seamless process that does not affect the  
13                    customer's perception of service quality.

14        The FCC codified the requirement that conversions should be seamless from the  
15        perspective of the CLEC's end user in 47 CFR §51.316(a) as follows:

16                    (b) An incumbent LEC shall perform any conversion from a  
17                    wholesale service or group of wholesale services to an unbundled  
18                    network element or combination of unbundled network elements  
19                    without adversely affecting the service quality perceived by the  
20                    requesting telecommunications carrier's end-user customer.

21        And at paragraph 588 of the *TRO*, the FCC addressed the notion that conversions  
22        are billing changes:

23                    588. We conclude that conversions should be performed in an  
24                    expeditious manner **in order to minimize the risk of incorrect**

---

<sup>307</sup> The *TRO* addressed conversions from UNEs to wholesale services *and* from wholesale services to UNEs.

1           payments. We expect carriers to establish any necessary  
2 timeframes to perform conversions in their interconnection  
3 agreements or other contracts. We decline to adopt ALTS's  
4 suggestion to require the completion of all necessary billing  
5 changes within ten days of a request to perform a conversion  
6 because such time frames are better established through  
7 negotiations between incumbent LECs and requesting carriers. **We**  
8 **recognize, however, that converting between wholesale services**  
9 **and UNEs (or UNE combinations) is largely a billing function.**  
10 **We therefore expect carriers to establish appropriate**  
11 **mechanisms to remit the correct payment after the conversion**  
12 **request,** such as providing that any pricing changes start the next  
13 billing cycle following the conversion request.

14           It is clear from the language above that the FCC's concern was directed at  
15 ensuring proper payment for the facility, depending on whether it is a Section 251  
16 UNE or a wholesale service (*e.g.*, access product), and did not envision work or  
17 physical changes on the ILEC's part leading to the potential for customer  
18 disruption.<sup>308</sup>

19           *Issue No. 9-43: Conversions – Circuit ID, Section 9.1.15.2.3*

20   **Q.    WHAT IS A CIRCUIT ID AND WHAT IS ITS PURPOSE?**

21    A.    The term is somewhat self-explanatory. A circuit ID is just that, a number or  
22 code that identifies a specific circuit, generally by defining its two end points –  
23 referred to as the “A” and “Z” location. Both CLEC and Qwest use this circuit ID

---

<sup>308</sup> The FCC did mention in paragraph 586 of the *TRO* that there may be an increase in the risk of customer disruption caused by CLECs grooming inter-exchange traffic in order to comply with the eligibility criteria. However, this potential for disruption stems from decisions made by the CLECs, not Qwest. The fact that the FCC mentioned the potential for End User Customer disruption caused by CLEC grooming, yet did not mention the possibility for disruption caused by Qwest (and indeed requires conversions to be seamless), indicates that the FCC never envisioned the potential for Qwest-caused customer disruption because from Qwest's perspective, the conversion involves simply changing the rate that applies to the facility.

1 throughout their operational support systems to identify that circuit for numerous  
2 activities including billing and repair matters.

3 **Q. SHOULD A CIRCUIT ID CHANGE DURING A CONVERSION?**

4 A. No. As described above, in the vast majority of circumstances in which Eschelon  
5 will be required to convert an existing circuit from a UNE to an alternative service  
6 arrangement, the physical facility need not (and should not) change. As such, the  
7 circuit ID need not (and should not) change either. This is important from  
8 Eschelon's perspective because Eschelon specifically tracks that particular facility  
9 and the customer it serves via the circuit ID. Numerous Eschelon systems rely on  
10 that circuit ID in providing ongoing billing and customer service to the customer.  
11 To the extent Qwest is allowed to (a) unnecessarily change the underlying facility  
12 simply to effectuate what should be accomplished by a billing change and then (b)  
13 assign a new circuit ID to the same arrangement, Eschelon's systems will be  
14 substantially, adversely, and unnecessarily affected. This will be accompanied by  
15 notable cost and inconvenience. Likewise, unnecessarily re-arranging facilities  
16 puts the customer at risk of losing service – a customer who never asked to be  
17 converted and should not even realize that it happened.

18 **Q. PLEASE EXPLAIN HOW CHANGING CIRCUIT IDS DURING**  
19 **CONVERSIONS COULD AFFECT ESCHELON'S END USER**  
20 **CUSTOMERS.**

21 A. Changing the circuit ID for a circuit that is already in place and working well for a  
22 customer in connection with "converting" the circuit from a UNE to an alternative

1 arrangement, significantly increases the risk of customer disruption. For instance,  
2 Qwest processes circuit ID changes using “disconnect” and “new” service orders.  
3 A simple typing error in an order could send the order to Qwest facilities  
4 assignment with a “disconnect” on the order, and the customer will be  
5 erroneously disconnected and put out of service. In addition, if records are not  
6 correctly and timely updated to show new circuit IDs in either Qwest or Eschelon  
7 systems, problems are likely to arise in the areas of maintenance and repair. For  
8 example, if six months after the conversion, the end user notifies Eschelon that its  
9 circuit is in need of repair, but the circuit ID is incorrectly stored in either the  
10 Eschelon or Qwest systems as a result of an unnecessary physical conversion, it is  
11 likely that Eschelon and Qwest will be unable to effectively open a trouble-ticket.  
12 As a result, the repair function will be delayed and is likely to require substantial  
13 additional resources to resolve, as compared to a normal repair ticket. All of this  
14 can be avoided by adopting Eschelon’s proposal and making sure that Qwest does  
15 not change circuit IDs for conversions.

16 **Q. HAS QWEST ALREADY PROCESSED CONVERSIONS WITHOUT**  
17 **CHANGING CIRCUIT IDS?**

18 A. Yes. When Qwest first converted special access circuits to UNEs, the original  
19 circuit IDs did not change. Issue 9-43 deals with the reverse situation – *i.e.*,  
20 conversion of UNEs to special access. To date Qwest has been unable to explain  
21 why the circuit ID must be changed in the current situation when no such change  
22 was required in previous conversions.

1 **Q. WILL CHANGING CIRCUIT IDS FOR CONVERSIONS IMPOSE COSTS**  
2 **ON ESCHELON?**

3 A. Yes. If Qwest changes circuit IDs for conversions, Eschelon will be forced to  
4 modify its systems and its records to account for the new circuit ID. Qwest  
5 complains about purported costs that it would incur to leave the circuit ID  
6 unchanged, but ignores the costs imposed on Eschelon by changing the circuit ID  
7 for the same facility.

8 **Q. SHOULD ESCHELON BEAR THE COSTS ASSOCIATED WITH**  
9 **CIRCUIT ID CHANGES?**

10 A. No. The physical circuit already exists and Eschelon paid substantial non-  
11 recurring charges to establish that circuit. There is no technical need to change  
12 that circuit just to convert it from one service-type (UNE) to another (special  
13 access). It is Qwest's decision to make a physical change (or change  
14 unnecessarily the ID for that circuit), and it is Qwest who should bear the costs.  
15 Otherwise, there will be no economic discipline associated with Qwest's decision.  
16 In a circumstance in which Qwest can foist additional costs on its competitors like  
17 Eschelon, while at the same time endangering the service provided by its  
18 competitors by requiring a physical conversion, all the while garnering additional  
19 fees for unnecessary non-recurring charges, why wouldn't Qwest require an  
20 unnecessary physical change in every circumstance? Unfortunately, all of these  
21 additional fees and expenses will have to ultimately be paid by Qwest's  
22 competitors and/or their End User Customers and, therefore, the Commission

1 should adopt the process which is most efficient and least likely to disrupt  
2 customer services. That approach is the one advocated by Eschelon.

3 **Q. YOU DESCRIBED THE RISK OF DISRUPTION FACING ESCHELON'S**  
4 **CUSTOMERS IF QWEST CHANGES THE CIRCUIT IDS FOR**  
5 **CONVERSIONS. WOULD QWEST'S RETAIL CUSTOMERS FACE**  
6 **THIS SAME RISK?**

7 A. No, and this is a very important point. Conversions only apply to the facilities  
8 used by CLECs, and not facilities used by Qwest, and therefore, Qwest's retail  
9 customers would face none of the risks that are inherent in Qwest's proposal to  
10 change circuit IDs during conversions. The FCC recognized this very point when  
11 addressing conversion charges in paragraph 587 of the TRO:

12 Because incumbent LECs are never required to perform a  
13 conversion in order to continue serving their own customers, we  
14 conclude that such charges are inconsistent with an incumbent  
15 LEC's duty to provide nondiscriminatory access to UNEs and  
16 UNE combinations on just, reasonable, and nondiscriminatory  
17 rates, terms, and conditions.

18 The FCC was speaking to conversion charges that ILECs may attempt to assess,  
19 but the same reasoning holds true with respect to circuit ID changes. Qwest is  
20 never required to perform a conversion in order to continue serving its own  
21 customers, and therefore, Qwest's proposal to change circuit IDs for conversions  
22 to CLEC circuits: increases the risk for CLEC customer (not Qwest customer)  
23 disruption; undermines the FCC's requirements for seamless conversions; and

1 fails to comply with Qwest's obligation to provide access to UNEs on just,  
2 reasonable, and nondiscriminatory rates, terms and conditions.

3 Issue No. 9-44 – Manner of Conversion – Section 9.1.15.3

4 **Q. IS ESCHELON'S PROPOSAL FOR ISSUE 9-44, WHICH RECOGNIZES**  
5 **THAT CONVERSIONS CAN BE ACCOMPLISHED THROUGH A**  
6 **BILLING CHANGE, SUPPORTED BY THE FCC'S FINDINGS ON**  
7 **CONVERSIONS?**

8 A. Yes. As explained above, the FCC has found in paragraph 588 of the *TRO* that  
9 conversions affect the billing of rates – not physical changes in the facilities.  
10 Eschelon's proposed Section 9.1.15.3 simply memorializes the FCC's findings.

11 **Q. WHY IS IT CRITICAL TO ENSURE SEAMLESS CONVERSIONS?**

12 A. For starters, seamless conversions are required by the FCC (see, *TRO*, ¶ 586). In  
13 addition, a conversion is a regulatory construct and not a change requested by  
14 Eschelon or its customer, and because only the price of a facility is changing,  
15 service to end users should not be put at risk. Eschelon's proposed Section  
16 9.1.15.3 prohibits Qwest from putting Eschelon's customers at risk by performing  
17 unnecessary physical rearrangements. Furthermore, since Qwest's customers will  
18 not face any of the same risks (because ILECs do not need to perform conversions  
19 to continue to serve their customers), Eschelon's End User Customers will face a  
20 higher likelihood of service outage problems than will Qwest's customers. These  
21 problems will be directly attributable to Qwest's insistence on making physical

1 facility changes when the FCC has already found that record-only changes are  
2 required.

3 **Q. ARE THERE OTHER REASONS WHY ESCHELON'S LANGUAGE IS**  
4 **NECESSARY?**

5 A. Yes. Agreed upon language in Section 9.1.15 states that, if a CLEC has not  
6 converted a UNE at the end of a transition period, Qwest "will convert" it to  
7 month-to-month service arrangements under its tariff. Without Eschelon's  
8 language in Section 9.1.15.3, the ICA does not describe what "convert" means or  
9 the terms and conditions under which this conversion will take place. As a result,  
10 absent Eschelon's proposed Section 9.1.15.3, Qwest could interpret the contract to  
11 be open-ended with respect to the changes Qwest can make during conversions  
12 that could harm Eschelon's customers' service quality.

13 **Q. HAS THE FCC ADDRESSED THE CHARGES THAT CAN AND**  
14 **CANNOT BE ASSESSED BY THE ILEC FOR CONVERSIONS?**

15 A. Yes. The FCC's rules and orders determine the charges that the ILEC can and  
16 cannot apply on a CLEC for a conversion. The FCC spoke to charges related to  
17 conversions at paragraph 587 of the *TRO* as follows:

18 587. ... We recognize, however, that once a competitive LEC  
19 starts serving a customer, there exists a risk of wasteful and  
20 unnecessary charges, such as termination charges, re-connect and  
21 disconnect fees, or non-recurring charges associated with  
22 establishing a service for the first time. We agree that such  
23 charges could deter legitimate conversions from wholesale services  
24 to UNEs or UNE combinations, or could unjustly enrich an  
25 incumbent LEC as a result of converting a UNE or UNE  
26 combination to a wholesale service. Because incumbent LECs are

1 never required to perform a conversion in order to continue serving  
2 their own customers, we conclude that such charges are  
3 inconsistent with an incumbent LEC's duty to provide  
4 nondiscriminatory access to UNEs and UNE combinations on just,  
5 reasonable, and nondiscriminatory rates, terms, and conditions.  
6 Moreover, we conclude that such charges are inconsistent with  
7 section 202 of the Act, which prohibits carriers from subjecting  
8 any person or class of persons (*e.g.*, competitive LECs purchasing  
9 UNEs or UNE combinations) to any undue or unreasonable  
10 prejudice or disadvantage.

11 The FCC promulgated a rule related to conversion charges in 47 CFR §51.316(c)  
12 as follows:

13 51.316 (c) Except as agreed to by the parties, an incumbent LEC  
14 shall not impose any untariffed termination charges, or any  
15 disconnect fees, re-connect fees, or charges associated with  
16 establishing a service for the first time, in connection with any  
17 conversion between a wholesale service or group of wholesale  
18 services and an unbundled network element or combination of  
19 unbundled network elements.

20 The FCC's rules and orders on conversion charges prohibit Qwest from assessing  
21 termination charges, re-connect fees, connect fees and other charges associated  
22 with establishing a circuit for the first time. That is because the circuit is already  
23 established and working properly, and the requesting carrier has already paid non-  
24 recurring charges to originally establish the circuit. Given that no physical work  
25 is needed to convert the circuit, no charges for physical work to establish the  
26 circuit are allowed for conversions. Furthermore, the FCC unambiguously  
27 rejected the notion of conversion charges: it found them to be not only  
28 "inconsistent with an incumbent LEC's duty to provide nondiscriminatory access  
29 to UNEs and UNE combinations on just, reasonable, and nondiscriminatory rates,

1 terms, and conditions,” but it also found them to be “inconsistent with section 202  
2 of the Act, which prohibits carriers from subjecting any person or class of persons  
3 [e.g., competitive LECs purchasing UNEs or UNE combinations] to any undue or  
4 unreasonable prejudice or disadvantage.” It is my understanding that the Oregon  
5 Commission in its Order No. 07-109 in UM 1251 allowed Qwest to submit cost  
6 studies for a TELRIC-based rate element for UNE-to-private-line conversions.  
7 Eschelon’s language for Issue 9-40 (addressed by Mr. Denney) agrees to abide by  
8 the TELRIC rate set by the Commission in the Wire Center Docket, but objects to  
9 Qwest’s open-ended language regarding charges for these conversions. Qwest’s  
10 proposal conflicts with the FCC’s pronouncements on conversion charges  
11 explained above. Therefore, any claim by Qwest that Eschelon’s proposal  
12 inappropriately limits Qwest’s ability to recover its costs for conversions, should  
13 be seen for what it is – Qwest ignoring Eschelon’s proposals in their entirety and  
14 a collateral attack on the FCC’s findings regarding conversion charges.

15 Issue No. 9-44(a): Manner of Conversion – Use of adder or surcharge – Section  
16 9.1.15.3.1

17 **Q. YOU HAVE EXPLAINED ABOVE THAT CONVERSIONS INVOLVE A**  
18 **BILLING CHANGE AND NOT A CHANGE IN PHYSICAL FACILITY. IS**  
19 **THERE A SIMPLE, TECHNICALLY FEASIBLE WAY IN WHICH**  
20 **QWEST COULD EFFECTUATE THIS BILLING CHANGE AND**  
21 **IMPLEMENT THE CONVERSION?**

1 A. Yes. Providing such an option to Qwest is the purpose of Eschelon's proposed  
2 language under Issue 9-44(a). Eschelon's proposal would allow Qwest to  
3 accomplish this conversion (or re-pricing) through the application of an adder or  
4 surcharge to bill the difference between the old rate and new rate (*i.e.*, pre and  
5 post conversion rates). For instance, if a DS1 UNE loop was converted to a DS1  
6 special access circuit, the adder or surcharge would reflect the difference between  
7 the UNE rate and the special access rate.

8 **Q. DOES QWEST ALREADY USE SUCH AN ADDER/SURCHARGE**  
9 **APPROACH TO REFLECT PRICE CHANGES?**

10 A. Yes. Qwest has already demonstrated this with its implementation of the Qwest  
11 Platform Plus ("QPP") agreements. Under those agreements, QPP circuits are  
12 subject to annual rate increases. Qwest does not physically convert the circuits to  
13 convert to the new rates. Instead, Qwest re-prices the circuits by using an "adder"  
14 or "surcharge" for billing the difference between the previous rate and the new  
15 rate. Eschelon's proposed language in Section 9.1.15.3.1 merely makes clear that  
16 Qwest may use this same approach for the conversions described in Section  
17 9.1.15.

18 **Q. IS THE USE OF ADDERS UNDER THE QPP AGREEMENTS STRONG**  
19 **EVIDENCE THAT SUCH A RE-PRICING METHODOLOGY COULD BE**  
20 **USED TO IMPLEMENT CONVERSIONS?**

21 A. Yes. The rate changes involved with QPP are significantly more complex than  
22 rate changes involved in converting UNE rates to analogous/alternative service

1 rates. That is, QPP rates differ depending on whether the End User Customer is a  
2 residential or a business customer, and depend upon whether the CLEC has met  
3 certain volume quotas. Implementing such a re-pricing methodology should be  
4 easier to implement for conversion adders, which would not vary based on these  
5 factors.

6 Issue No. 9-44(b): Manner of Conversion – Use of USOC – Section 9.1.15.3.1.1

7 **Q. IS THE DISAGREEMENT UNDER ISSUE 9-44(B) AN EXTENSION OF**  
8 **ISSUE 9-44(A) ABOVE?**

9 A. Yes. As explained above, Eschelon’s proposal under Issue 9-44(a) would permit  
10 Qwest to implement the re-pricing involved in a conversion through the use of an  
11 “adder” or “surcharge” reflecting the difference between the old and new rate, just  
12 as Qwest does when re-pricing under the QPP agreements. It is possible that  
13 Qwest may need to add new USOC codes to identify the conversion adders.  
14 Eschelon’s language for Section 9.1.15.3.1.1 is designed to allow Qwest to  
15 introduce new USOC(s) if needed to implement the same re-pricing methodology  
16 for conversions as Qwest uses for QPP.

17 Issue No. 9-44(c): Manner of Conversion – Same USOC – Section 9.1.15.3.1.1

18 **Q. WHAT CONCERN IS ESCHELON ATTEMPTING TO ADDRESS**  
19 **THROUGH ITS PROPOSED LANGUAGE FOR ISSUE 9-44(C)?**

20 A. Eschelon’s proposals under Issues 9-44(a) and 9-44(b) would permit Qwest to  
21 perform the re-pricing involved in a conversion by way of an adder, similar to the

1 way in which Qwest re-prices under its QPP Agreements. The USOCs that are  
2 used to represent rate elements are used for other pricing purposes, such as  
3 calculating volumes and discounts for a regional commitment plant. For example,  
4 a CLEC may have a volume commitment with Qwest to purchase a certain dollar  
5 value worth of services over a particular state or region in order to receive a  
6 percentage discount on the services it purchases from Qwest. The services that  
7 contribute to that volume commitment, and in turn, the associated discount may  
8 be identified by USOC. Eschelon is concerned that Qwest may change or add  
9 USOCs to accomplish a conversion and then remove the revenue associated with  
10 the facility from the calculated volume commitments, making it more difficult for  
11 Eschelon to meet its volume commitments and obtain a discount, which would in  
12 turn lead to more wholesale revenues for Qwest. Eschelon's language for this  
13 issue was designed to ensure that any USOC changes involved in a conversion do  
14 not change the way in which the USOCs are used for pricing purposes (*e.g.*,  
15 calculating volume commitments and discounts).

16 **Q. PLEASE ELABORATE ON WHY A USOC CHANGE USED TO**  
17 **ACCOMPLISH A CONVERSION SHOULD NOT AFFECT THE WAY IN**  
18 **WHICH THE USOC IS USED FOR PRICING PURPOSES.**

19 A. The facility is the exact same facility after the conversion as it was before the  
20 conversion, and this would hold true even if Qwest assigned a new USOC to the  
21 circuit to reflect the post-conversion pricing. Qwest should not be allowed to  
22 manipulate its USOCs in such a way as to allow Qwest to recover higher charges

1 from CLECs. This would be particularly unfair since the USOC methodology of  
2 implementing conversions makes the conversions efficient for Qwest, and in light  
3 of the FCC's strong emphasis on nondiscriminatory, just and reasonable treatment  
4 by Qwest for conversions (given that conversions apply only to CLECs and not  
5 Qwest).

6 **Q. PLEASE SUMMARIZE ISSUES 9-43 AND 9-44.**

7 A. Conversions should be seamless to the CLEC End User Customer. A conversion  
8 involves re-pricing a facility – a facility that is operational and serving an End  
9 User Customer – from UNE prices to the price of the alternative/analogous  
10 service, and it should not involve any work that would result in service disruption  
11 for the End User Customer. Qwest and its customers do not bear any risk of  
12 disruption or costs from conversions because Qwest does not convert its circuits.  
13 Eschelon's proposed language would ensure that conversions are implemented  
14 just as the FCC required them to be – seamlessly. Eschelon's proposal of  
15 implementing conversions through a billing change is specifically discussed by  
16 the FCC and the billing change option included in Eschelon's ICA language is  
17 already used by Qwest to re-price services. Qwest, on the other hand, attempts to  
18 remain silent on conversions in the ICA so that it can, after the conclusion of this  
19 arbitration, impose the potentially disruptive and costly conversion “procedure”  
20 that it unilaterally develops. Qwest's position and proposed “procedure” flies in  
21 the face of the FCC's rules and orders. For all of the reasons described in

1 Eschelon’s business need and in these responses, the Commission should adopt  
2 Eschelon’s language for Issues 9-43 and 9-44.

3 **X. SUBJECT MATTER NO. 19: INTERFERING BRIDGE TAP**

4 Issue No. 9-46: ICA Section 9.2.2.9.6

5 **Q. PLEASE PROVIDE A BRIEF SUMMARY OF ISSUE 9-46.**

6 A. A fundamental underpinning of Qwest’s position on a number of issues in this  
7 arbitration is that there should be no overlap between a CLEC’s ICA and the  
8 PCAT. With respect to Issue 9-46, Qwest originally took a different approach,  
9 however.<sup>309</sup> After rejecting five different language options proposed by Eschelon  
10 to address every objection Qwest expressed about this subject, Qwest finally  
11 agreed to one of those options, with a one-word modification. Eschelon and  
12 Qwest therefore will have the contractual certainty of contract language that  
13 Qwest opposes on a number of other issues when it seeks to exclude language  
14 from the ICA. Eschelon and Qwest have agreed to the following language,  
15 subject to Commission approval, to close Issue 9-46:

16 “Interfering Bridged Tap is defined as any amount of Bridged Tap  
17 that would interfere with proper performance parameters as  
18 defined in this Section 9.2.2.9.6 and applicable industry  
19 standards.”

---

<sup>309</sup> Compare Linse Minnesota Direct, p. 8, lines 20-21 (Qwest’s language should be adopted because it “is consistent with the PCAT”) with Linse Minnesota Direct, p. 9, lines 17-19 (Eschelon’s language should be rejected it “attempts to inappropriately incorporate information from Qwest’s product catalog (“PCAT”) into the party’s interconnection agreement”).

1 **XI. SUBJECT MATTER NO. 24: LOOP-TRANSPORT COMBINATIONS**

2 Issue No. 9-55: ICA Sections 9.23.4; 9.23.4.4; 9.23.4.4.1; 9.23.4.5; 9.23.4.6;  
3 9.23.4.5.4

4 **Q. WHAT IS ESCHELON’S BUSINESS ISSUE REGARDING LOOP-**  
5 **TRANSPORT COMBINATIONS?**

6 A. Eschelon is entitled to receive from Qwest UNEs that are combined, or  
7 “commingled,” with non-UNEs. Commingling does not mean that the UNE  
8 component is no longer a UNE and Qwest remains responsible for providing the  
9 UNE in a commingled arrangement, subject to the same requirements that apply  
10 to non-commingled UNEs.

11 When Qwest’s proposals are closely scrutinized, it becomes clear that Qwest is  
12 attempting to position one type of loop transport combination – a commingled  
13 EEL – so that the terms governing the non-UNE (or the “facilities or services that  
14 a requesting telecommunications carrier has obtained at wholesale from an  
15 incumbent LEC”) will dictate how the UNE portion of the combination is  
16 ordered, provisioned, and repaired. Qwest’s proposal is a thinly-veiled attempt to  
17 remove the terms regarding these UNEs from Commission purview by dictating  
18 the terms and conditions over the entire offering through its tariffs. At least one  
19 component of these offerings is a Section 251 UNE, and the Commission should,  
20 at a minimum, retain its jurisdiction over the UNE component of Loop-Transport  
21 Combinations, including the UNE in a Commingled EEL, and ensure that terms  
22 that affect the UNE are included in the filed and approved ICA. The

1 nondiscrimination requirements of Section 251 of the Act are not contained in  
2 Qwest’s tariffs and, therefore, tariffs should not be used to govern UNEs.

3 **Q. WHAT IS ESCHELON’S PROPOSAL ON ISSUE 9-55?**

4 A. Eschelon proposes the following language for Section 9.23.4:<sup>310</sup>

5 **9.23.4 Loop-Transport Combinations: Enhanced Extended Links**  
6 **(EELs), Commingled EELs, and High Capacity EELs**

7  
8 Loop-Transport Combination –For purposes of this Agreement,  
9 “Loop-Transport Combination” is a Loop in combination, or  
10 Commingled, with a Dedicated Transport facility or service (with  
11 or without multiplexing capabilities), together with any facilities,  
12 equipment, or functions necessary to combine those facilities. At  
13 least as of the Effective Date of this Agreement “Loop-Transport  
14 Combination” is not the name of a particular Qwest product.  
15 “Loop-Transport Combination” includes Enhanced Extended  
16 Links (“EELs”), Commingled EELs, and High Capacity EELs. If  
17 no component of the Loop-transport Combination is a UNE,  
18 however, the Loop-Transport Combination is not addressed in this  
19 Agreement. The UNE components of any Loop-Transport  
20 Combinations are governed by this Agreement and the other  
21 component(s) of any Loop-Transport Combinations are governed  
22 by the terms of an alternative service arrangement, as further  
23 described in Section 24.1.2.1.<sup>311</sup>

---

<sup>310</sup> Eschelon also capitalizes the term “Loop-Transport” in its language to indicate that it is a defined term in the ICA.

<sup>311</sup> This language differs from that filed with the Petition for Arbitration. A sentence clearly explaining that a non-UNE is governed by the an alternative service arrangement – not the ICA. (“and the other component(s) of any Loop-Transport Combinations are governed by the terms of an alternative service arrangement, as further described in Section 24.1.2.1). This additional language including a reference to Section 24.1.2.1 was added to dispel Qwest’s notion that Eschelon’s language was attempting to govern non-UNEs by the ICA (though Eschelon believes that its original language – as filed with the Petition – is perfectly clear on this point). Section 24.1.2.1 provides (in closed language): “The UNE component(s) of any Commingled arrangement is governed by the applicable terms of this Agreement. The other component(s) of any Commingled arrangement is governed by the terms of the alternative service arrangement pursuant to which that component is offered (e.g., Qwest’s applicable Tariffs, price lists, catalogs, or commercial agreements). Performance measurements and/or remedies under this Agreement apply only to the UNE component(s) of any Commingled arrangement. Qwest is not relieved from those measurements and remedies by virtue of the fact that the UNE is part of a Commingled arrangement.”

1 Commingled EEL – If CLEC obtains at UNE pricing part (but not  
2 all) of a Loop-Transport Combination, the arrangement is a  
3 Commingled EEL. (Regarding Commingling, see Section 24.)  
4

5 High Capacity EEL – “High Capacity EEL” is a Loop-Transport  
6 Combination (either EEL or Commingled EEL) when the Loop or  
7 transport is of DS1 or DS3 capacity. High Capacity EELs may  
8 also be referred to as “DS1 EEL” or “DS3 EEL,” depending on  
9 capacity level.  
10

11 **9.23.4.4 Additional Terms for UNE Components of Loop Transport**  
12 **Combinations ~~EELs~~**

13 . . .  
14 9.23.4.4.1 EELs and Commingled EELs may consist of loops and  
15 interoffice transport of the same bandwidth (Point-to-Point).  
16 When multiplexing is requested, EELs and Commingled EELs  
17 may consist of loops and interoffice transport of different  
18 bandwidths (Multiplexed). CLEC may also order combinations of  
19 interoffice transport, concentration capability and DS0 loops.  
20

21 **9.23.4.5 Ordering Process for UNE Components of Loop Transport**  
22 **Combinations ~~EELs~~**

23 . . .  
24 9.23.4.5.4 . . . Qwest may require two (2) service requests when  
25 CLEC orders Multiplexed Loop Transport Combinations (which  
26 are not Point-to-Point) and EEL loops (as part of a multiplexed  
27 EEL). Regarding Commingling see Section 24.  
28

29 **9.23.4.6 Rate Elements for UNE Components of Loop Transport**  
30 **Combinations ~~EELs~~**

31  
32 Eschelon’s proposed language defines the term Loop-Transport Combination and  
33 includes language in the contract to make clear that the UNE component of a  
34 Loop-Transport combination is governed by the ICA. Eschelon’s language,  
35 however, does not attempt to dictate the terms of the non-UNE piece of a Loop-  
36 Transport combination.

1 Q. WHAT IS QWEST'S PROPOSAL ON ISSUE 9-55?

2 A. Qwest proposes the following language (with Qwest language underlined and  
3 Eschelon language in strikeout):

4 **9.23.4 ~~Loop-Transport Combinations:~~ Enhanced Extended**  
5 **Links (EELs), Commingled EELs, and High Capacity**  
6 **EELs**

7 ~~Loop Transport Combination~~ For purposes of this  
8 Agreement, ~~“Loop Transport Combination”~~ is a Loop in  
9 combination, or Commingled, with a Dedicated Transport  
10 facility or service (with or without multiplexing  
11 capabilities), together with any facilities, equipment, or  
12 functions necessary to combine those facilities. At least as  
13 of the Effective Date of this Agreement ~~“Loop Transport~~  
14 ~~Combination”~~ is not the name of a particular Qwest  
15 product. ~~“Loop Transport Combination”~~ includes  
16 ~~Enhanced Extended Links (“EELs”), Commingled EELs,~~  
17 ~~and High Capacity EELs.~~ If no component of the Loop-  
18 transport Combination is a UNE, however, the Loop-  
19 Transport Combination is not addressed in this Agreement.  
20 The UNE components of any Loop Transport  
21 Combinations are governed by this Agreement, as further  
22 described in Section 24.1.2.1.  
23

24 Commingled EEL – If CLEC obtains at UNE pricing part (but not all) of a  
25 ~~Loop-Transport Combination~~, the arrangement is a Commingled EEL.  
26 (Regarding Commingling, see Section 24.)  
27

28 High Capacity EEL – “High Capacity EEL” is a ~~Loop-Transport~~  
29 ~~Combination~~ (either EEL or Commingled EEL) when the Loop or  
30 transport is of DS1 or DS3 capacity. High Capacity EELs may  
31 also be referred to as “DS1 EEL” or “DS3 EEL,” depending on  
32 capacity level.  
33

34 **9.23.4.4 Additional Terms for EELs ~~UNE Components of Loop~~**  
35 **~~Transport Combinations~~**  
36

37 9.23.4.4.1 ~~EELs and Commingled EELs~~ may consist of loops and  
38 interoffice transport of the same bandwidth (Point-to-Point).  
39 When multiplexing is requested, ~~EELs and Commingled EELs~~  
40 may consist of loops and interoffice transport of different

1 bandwidths (Multiplexed). CLEC may also order combinations of  
2 interoffice transport, concentration capability and DS0 loops.

3  
4 **9.23.4.5 Ordering Process for EELs~~UNE Components of Loop-~~**  
5 **~~Transport Combinations~~**  
6

7 9.23.4.5.4 Qwest may require two (2) service requests when  
8 CLEC orders Multiplexed EELs ~~Loop-Transport Combinations~~  
9 (which are not Point-to-Point) and EEL loops (as part of a  
10 multiplexed EEL). Regarding Commingling see Section 24.

11  
12 **9.23.4.6 Rate Elements for EELs~~UNE Components of Loop-~~**  
13 **~~Transport Combinations~~**

14 Qwest disagrees that the term Loop-Transport should be defined in the ICA, and  
15 uses the term “EEL” instead. Qwest also proposes to omit the term “commingled  
16 EEL” from these sections of the ICA. Qwest, in support of its proposal, states  
17 that Loop Transport is not a separate Qwest product and complains that  
18 Eschelon’s use of the term Loop Transport is different than the way in which the  
19 FCC uses the term.<sup>312</sup>

20 **Q. WHAT IS THE PRIMARY DISAGREEMENT BETWEEN ESCHELON**  
21 **AND QWEST ON ISSUE 9-55?**

22 **A.** The crux of the issue is how Loop-Transport Combinations will be treated under  
23 the ICA, particularly if they involve commingling. The FCC defines  
24 Commingling in 47 CFR §51.5 as follows:

25 Commingling. Commingling means the connecting, attaching, or  
26 otherwise linking of an unbundled network element, or a  
27 combination of unbundled network elements, to one or more  
28 facilities or services that a requesting telecommunications carrier  
29 has obtained at wholesale from an incumbent LEC, or the

---

<sup>312</sup> Qwest Response, p. 31.

1 combining of an unbundled network element, or a combination of  
2 unbundled network elements, with one or more such facilities or  
3 services. Commingle means the act of commingling.

4 **Q. DOES ESCHELON’S LANGUAGE USE THE TERM “LOOP**  
5 **TRANSPORT COMBINATION” IN THE SAME WAY AS THE FCC HAS**  
6 **USED THE TERM IN ITS ORDERS?**

7 A. Yes. Eschelon’s proposed definition of “Loop-Transport Combination” mirrors  
8 the way the FCC has used that term to define any combination of loop and  
9 transport. For example, when discussing EELs in paragraph 575 of the *TRO*, the  
10 FCC states as follows:

11 575. As noted above, our rules currently require incumbent LECs  
12 to make UNE combinations, including *loop-transport*  
13 *combinations*, available in all areas where the underlying UNEs  
14 are available and in all instances where the requesting carrier meets  
15 the eligibility requirements... (emphasis added)

16 Again, at paragraph 576 of the *TRO*, the FCC states: “We further agree that the  
17 availability of EELs and other UNE combinations promotes innovation because  
18 competitive LECs can provide advanced switching capabilities in conjunction  
19 with *loop-transport combinations*.” (emphasis added)

20 The FCC goes on in paragraph 584 of the *TRO* to state that “as we explain in  
21 detail below, we obviate the risk identified by the court by applying service  
22 eligibility criteria to *commingled loop-transport combinations*.” Indeed,  
23 paragraph 593 of the *TRO* specifically refers to a high capacity loop transport  
24 combinations as a commingled EEL [“...to obtain at UNE pricing part of a high-

1 capacity loop-transport combination (commingled EEL)"] and paragraph 594 of  
2 the *TRO* again refers to “commingled loop-transport combinations.”

3 **Q. HOW ARE THESE EXCERPTS FROM THE FCC’S ORDER**  
4 **CONSISTENT WITH ESCHELON’S DEFINITION OF LOOP**  
5 **TRANSPORT COMBINATION?**

6 A. Eschelon’s language defines the Loop-Transport combination to include: (1)  
7 Enhanced Extended Links (“EELs”), (2) Commingled EELs, and (3) High  
8 Capacity EELs. The excerpts from the FCC’s *TRO* above show that the FCC has  
9 referred to loop transport combinations as (1) EELs (*e.g.*, *TRO*, ¶¶ 575 and 576),  
10 (2) commingled EELs (*e.g.*, *TRO*, ¶¶ 584, 593 and 594), and (3) high capacity  
11 EELs (*e.g.*, *TRO*, ¶ 593) – just as Eschelon’s proposed section 9.23.4 does.

12 **Q. WHAT ARE THE ADVANTAGES OF DEFINING THE TERM LOOP-**  
13 **TRANSPORT COMBINATION IN THE ICA?**

14 A. The use of this defined term is efficient because it provides an umbrella that  
15 includes all three types of Loop-Transport Combinations that currently exists –  
16 EELs, Commingled EELs, and High Capacity EELs – thus avoiding having to  
17 repeat all three terms throughout the document.

18 In addition, Eschelon’s language ties the various sections of the ICA together  
19 better than Qwest’s language. Because at least one component of the loop  
20 transport combination is a UNE, the terms and conditions belong in Section 9,  
21 which is entitled “Unbundled Network Elements.” Although there is also a

1 section on Commingling (Section 24), that section contains general terms and not  
2 the type of terms and conditions that Eschelon and Qwest otherwise agree belong  
3 in Section 9.23, such as Service Eligibility Criteria for High Capacity EELs.  
4 Qwest's proposal to place only these terms (Service Eligibility Criteria) of  
5 Commingled EELs in Section 9 while placing others in Section 24 does not make  
6 sense from an organizational or ease-of-use perspective. Commingled EELs have  
7 a UNE component and that UNE component should be addressed in Section 9,  
8 and at the same time, Eschelon's proposed language in Section 9 expressly  
9 references and restates the terms of Section 24 on Commingling so that the user of  
10 the ICA will know even without having to reference Section 24 the Commingling  
11 terms and how non-UNEs will be treated under the ICA.

12 **Q. DOES ESCHELON'S LANGUAGE COVER NON-UNES NOT**  
13 **GOVERNED BY SECTION 251 OF THE ACT?**

14 A. No. Eschelon's proposed definition makes clear that only the UNE components  
15 of a Loop-Transport Combination are subject to the ICA, and that, if no  
16 component is a UNE, the combination is not governed by the ICA. Eschelon  
17 specifically added to its proposal (*see*, Section 9.23.4) a reference to Section  
18 24.1.2.1 which explains how non-UNE portions of a commingled arrangement are  
19 treated. This language should eliminate any suggestion on Qwest's part that the  
20 terminology is some kind of attempt to govern non-UNEs in the ICA. Eschelon  
21 further clarifies this point by capitalizing the term in the headings (*see*, Sections

1 9.23.4; 9.23.4.4; 9.23.4.5; 9.23.4.6) to indicate it is a defined term and referring to  
2 the UNE components of Loop-Transport Combinations.

3 **Q. PLEASE SUMMARIZE ISSUE 9-55.**

4 A. Eschelon is entitled to commingle UNEs with non-UNEs. The UNEs in these  
5 commingled arrangements are still UNEs and must be provided in a non-  
6 discriminatory manner pursuant to Section 251 of the Act and should be governed  
7 by Section 9 (UNEs) of the ICA. Eschelon's language makes these requirements  
8 clear and defines and uses the term "Loop-Transport Combinations" precisely as  
9 the FCC has used it. For all of the reasons described in Eschelon's business need  
10 and in these responses, the Commission should adopt Eschelon's language for  
11 Issue 9-55.

12 **XII. SUBJECT MATTER NO. 27: MULTIPLEXING (LOOP-MUX**  
13 **COMBINATIONS)**

14 Issue No. 9-61 and subparts: ICA Sections 9.23.9 and subparts; 24.4 and  
15 subparts; 9.23.2; 9.23.4.4.3; 9.23.6.2; 9.23.9.4.3; 9.23.4.4.3; 9.23.6.2; Exhibit C;  
16 24.4.4.3; Exhibit A; Section 9.23.6.6 and subparts

17 **Q. WHAT IS ESCHELON'S BUSINESS CONCERN REGARDING**  
18 **MULTIPLEXING (LOOP MUX COMBINATIONS) (ISSUES 9-61 AND**  
19 **SUBPARTS (A)-(C))?**

20 A. This issue concerns Eschelon's continued access to multiplexing when  
21 multiplexing is combined with an unbundled loop. Qwest currently provides  
22 unbundled access to multiplexing at TELRIC rates and has for some time. Qwest

1 has provided multiplexing in various forms, including as part of a UNE  
2 combination as well as on a stand alone basis, and the Commission has approved  
3 TELRIC rates for the LMC product. The FCC has made it very clear that  
4 multiplexing must be provided in conjunction with UNEs and UNE combinations.  
5 Despite all of this, Qwest has decided that it will stop providing multiplexing at  
6 TELRIC rates and relegate the terms, conditions and rates for multiplexing to its  
7 access tariff.

8 Eschelon is not asking for stand-alone multiplexing or unlimited access to  
9 multiplexing at TELRIC rates. Rather Eschelon's proposal is narrowly-tailored to  
10 treat multiplexing the same way that a reasonable reading of the FCC's order  
11 treats multiplexing – *i.e.*, that unbundled access to multiplexers must be provided  
12 when combined with UNEs. In these instances, multiplexing should be governed  
13 by the ICA and priced at TELRIC.<sup>313</sup>

14 **Q. WHAT IS ESCHELON'S PROPOSAL FOR ISSUES 9-61 AND SUBPARTS**  
15 **(A)-(C)?**

16 A. Eschelon proposes the following language in Section 9:  
17

18 **ISSUE 9-61**

19 **9.23.2 UNE Combinations Description and General Terms**

20  
21 UNE Combinations are available in, but not limited to, the  
22 following products: EELs (subject to the limitations set  
23 forth below) and Loop Mux Combinations. If CLEC

---

<sup>313</sup> Regardless of the status of multiplexing, the UNE loop is a component of a Loop Mux Combination and, therefore, LMC should be in Section 9 (UNEs) of the ICA.

1 desires access to a different UNE Combination, CLEC may  
2 request access through the Special Request Process set  
3 forth in this Agreement. . . .

4 **ISSUE 9-61(a)**

5 9.23.9.1.1 Loop-Mux combination (LMC) is an unbundled Loop as  
6 defined in Section 9.2 of this Agreement (referred to in  
7 this Section as an LMC Loop) combined ~~combined~~  
8 with a ~~private line (PLT), or with a special access (SA),~~  
9 ~~Tariffed~~ DS1 or DS3 multiplexed facility with no  
10 interoffice transport. The ~~PLT/SA~~ multiplexed facility  
11 is provided as ~~either~~ an Interconnection Tie Pair (ITP)  
12 or ~~Expanded Interconnection Termination (EICT)~~ from  
13 the high side of the multiplexer to CLEC's Collocation.  
14 The multiplexer and the Collocation must be located in  
15 the same Qwest Wire Center.

16  
17 9.23.9.1.2 LMC provides CLEC with the ability to access End  
18 User Customers and aggregate DS1 or DS0 unbundled  
19 Loops to a higher bandwidth via a ~~PLT/SA~~ DS1 or DS3  
20 multiplexer. There is no interoffice transport between  
21 the multiplexer and CLEC's Collocation.  
22

23 9.23.9.1.3 Qwest offers the LMC ~~Loop~~ as a Billing conversion or  
24 as new Provisioning.  
25

26 9.23.9.2.1 ~~A~~ UNE Extended Enhanced Loop (EEL) may be  
27 combined ~~combined~~ with the ~~PLT/SA~~ multiplexed  
28 facility.  
29

30 9.23.9.2.2 LMC ~~Loops~~ will be provisioned where existing facilities  
31 are available or pursuant to the provisions of Section  
32 9.1.2.1 of the Agreement.  
33

34 9.23.9.2.3 The ~~PLT/SA~~ DS1 or DS3 multiplexed facility must  
35 terminate in a Collocation.  
36

37 9.23.9.2.4 Intentionally Left Blank. ~~The multiplexed facility is~~  
38 ~~subject to all terms and conditions (ordering, provisioning, and~~  
39 ~~billing) of the appropriate tariff.~~  
40

1 9.23.9.2.6 Rearrangements may be requested for work to be  
2 performed by Qwest on an existing LMC-Loop, or on  
3 some private line/special access circuits, when coupled  
4 with a conversion-as-specified request to convert to  
5 LMC-Loop.  
6

7 9.23.9.3.2 LMC multiplexing is offered in DS3 to DS1 and DS1 to  
8 DS0 configurations. LMC multiplexing is ordered  
9 with LMC Loops. The recurring and nonrecurring rates  
10 in Exhibit A apply.  
11

12 9.23.9.3.2.1 3/1 multiplexing rates are contained in Exhibit A of  
13 this Agreement, and include the following:

14 a) Recurring Multiplexing Charge. The DS3 Central Office  
15 Multiplexer provides de-multiplexing of one DS3 44.736  
16 Mbps to 28 1.544 Mbps channels.

17 b) Non-recurring Multiplexing Charge. One-time charges  
18 apply for a specific work activity associated with  
19 installation of the multiplexing service.  
20

21 9.23.9.3.2.2 1/0 multiplexing rates are contained in Exhibit A of  
22 this Agreement, and include the following charges:

23 a) Recurring Multiplexing Charge. The DS0 Central Office  
24 multiplexer provides de-multiplexing of one DS1 1.544  
25 Mbps to 24 64 Kbps channels.

26 b) Non-recurring Multiplexing Charge. One-time charges  
27 apply for a specific work activity associated with  
28 installation of the multiplexing service, including low side  
29 channelization of all 24 channels.  
30

31 9.23.9.3.4 Nonrecurring charges for Billing conversions to LMC  
32 Loop are set forth in Exhibit A.  
33

34 9.23.9.3.5 A rearrangement nonrecurring charge as described in  
35 Exhibit A may be assessed on some requests for work to be  
36 performed by Qwest on an existing LMC-Loop, or on some  
37 private line/special access circuits, when coupled with a  
38 conversion-as-specified request to convert to LMC-Loop.  
39

40 9.23.9.4.1 Ordering processes for LMC-Loop(s) are contained  
41 below and in Section 12 of this Agreement. Qwest will

1 document its ordering processes in Qwest's Product  
2 Catalog (PCAT). The following is a high-level description  
3 of the ordering process:  
4

5 9.23.9.4.1.1 Step 1: Complete product questionnaire for LMC  
6 ~~Loop~~(s) with account team representative.  
7

8 9.23.9.4.1.4 Step 4: After account team notification, place LMC  
9 ~~Loop~~-orders via an LSR.  
10

11 9.23.9.4.3 For UNE Combinations with appropriate retail  
12 analogues, the Provisioning interval will be no longer than  
13 the interval for the equivalent retail service. CLEC and  
14 Qwest can separately agree to Due Dates other than the  
15 interval.  
16

17 9.23.9.4.4 Due date intervals are established when Qwest receives  
18 a complete and accurate LSR made through the IMA, EDI  
19 or Exact interfaces or through facsimile. For LMC-~~Loops~~,  
20 the date the LSR is received is considered the start of the  
21 service interval if the order is received on a business Day  
22 prior to 3:00 p.m. For LMC-~~Loops~~, the service interval will  
23 begin on the next business Day for service requests  
24 received on a non-business day or after 3:00 p.m. on a  
25 business day. Business Days exclude Saturdays, Sundays,  
26 New Year's Day, Memorial Day, Independence Day (4<sup>th</sup> of  
27 July), Labor Day, Thanksgiving Day and Christmas Day.  
28

29 9.23.9.4.5 Out of Hours Project Coordinated Installations: CLEC  
30 may request an out of hours Project Coordinated  
31 Installation. This permits CLEC to obtain a coordinated  
32 installation for LMC ~~Loops~~—with installation work  
33 performed by Qwest outside of Qwest's standard  
34 installation hours. For purposes of this Section, Qwest's  
35 standard installation hours are 8:00 a.m. to 5:00 p.m.  
36 (local time), Monday through Friday, except holidays.  
37 Installations commencing outside of these hours are  
38 considered to be out of hours Project Coordinated  
39 Installations.  
40

1 9.23.9.6.1 Qwest will maintain facilities and equipment for LMC  
2 ~~Loops~~ provided under this Agreement. ~~Qwest will~~  
3 ~~maintain the multiplexed facility pursuant to the Tariff.~~  
4 CLEC or its End User Customers may not rearrange, move,  
5 disconnect or attempt to repair Qwest facilities or  
6 equipment, other than by connection or disconnection to  
7 any interface between Qwest and the End User Customer,  
8 without the prior written consent of Qwest.  
9

10 **ISSUE 9-61(b)**

11 9.23.9.4.3 ~~Standard~~ Service intervals for LMC(s) ~~Loops~~ are set  
12 forth in Exhibit C in the ~~Service Interval Guide (SIG)~~  
13 ~~available at [www.qwest.com/wholesale](http://www.qwest.com/wholesale).~~ For UNE  
14 Combinations with appropriate retail analogues, the  
15 Provisioning interval will be no longer than the interval  
16 for the equivalent retail service. CLEC and Qwest can  
17 separately agree to Due Dates other than the interval.  
18

19 9.23.4.4.3 Installation intervals for UNE Combinations are set  
20 forth in Exhibit C but will be no longer than the  
21 respective Private Line Transport Service that Qwest  
22 will maintain on the following web-site address:  
23 <http://www.qwest.com/carrier/guides/sig/index.html>

24  
25 9.23.6.2 Service intervals for each UNE Combination ~~EEL~~ are set  
26 forth in Exhibit C. For UNE Combinations with  
27 appropriate retail analogues, the Provisioning interval  
28 will be no longer than the interval for the equivalent retail  
29 service. CLEC and Qwest can separately agree to Due  
30 Dates other than the interval.

31  
32 Exhibit C:  
33 Loop Mux Combo (LMC)

26 Eschelon’s proposal would put terms, conditions and rates for Loop Mux  
 27 Combinations in Section 9 (UNEs) of the ICA. Eschelon’s language for Issue 9-  
 28 61 includes the Loop Mux Combination in the description of UNE combinations  
 29 (along with EELs); its language for Issue 9-61(a) defines the Loop Mux  
 30 Combination; its language for Issue 9-61(b) ensures that service intervals for  
 31 UNE combinations, including Loop Mux Combinations, are included in Exhibit C  
 32 to the ICA; and its language for Issue 9-61(c) includes Commission-approved  
 33 rates for the LMC product.

34 **Q. WHAT IS QWEST’S PROPOSAL FOR ISSUES 9-61 AND (A)-(C)?**

35 A. Qwest’s proposals on these issues are as follows:

1

2

**ISSUE 9-61**

3

**9.23.2 UNE Combinations Description and General Terms**

4

5

UNE Combinations are available in, but not limited to, the following products: EELs (subject to the limitations set forth below) ~~and Loop Mux Combinations.~~ If CLEC desires access to a different UNE Combination, CLEC may request access through the Special Request Process set forth in this Agreement. . . .

6

7

8

9

10

11

12

**ISSUE 9-61(a)**: Section 24.4.1 contains Qwest's corresponding language:

13

14

[24.4.1.1] Loop-Mux combination (LMC) is an unbundled Loop as defined in Section 9.2 of this Agreement (referred to in this Section as an LMC Loop) ~~Commingled~~ ~~combined~~ with a private line (PLT), or with a special access (SA), Tariffed DS1 or DS3 multiplexed facility with no interoffice transport. The PLT/SA multiplexed facility is provided as either an Interconnection Tie Pair (ITP) or Expanded Interconnection Termination (EICT) from the high side of the multiplexer to CLEC's Collocation. The multiplexer and the Collocation must be located in the same Qwest Wire Center.

15

16

17

18

19

20

21

22

23

24

25

26

[24.4.1.2] LMC provides CLEC with the ability to access End User Customers and aggregate DS1 or DS0 unbundled Loops to a higher bandwidth via a PLT/SA DS1 or DS3 multiplexer. There is no interoffice transport between the multiplexer and CLEC's Collocation.

27

28

29

30

31

32

[24.4.1.3] Qwest offers the LMC Loop as a Billing conversion or as new Provisioning.

33

34

35

[24.4.2.1] An ~~UNE~~-Extended Enhanced Loop (EEL) may be ~~combined~~ ~~commingled~~ with the PLT/SA multiplexed facility.

36

37

38

1 [24.4.2.2] LMC Loops will be provisioned where existing facilities  
2 are available or pursuant to the provisions of Section  
3 9.1.2.1 of the Agreement.  
4

5 [24.4.2.3] The PLT/SA DS1 or DS3 multiplexed facility must  
6 terminate in a Collocation.  
7

8 [24.4.2.4] The multiplexed facility is subject to all terms and  
9 conditions (ordering, provisioning, and billing) of the  
10 appropriate Tariff.  
11

12 [24.4.2.6] Rearrangements may be requested for work to be  
13 performed by Qwest on an existing LMC Loop, or on  
14 some private line/special access circuits, when coupled  
15 with a conversion-as-specified request to convert to LMC  
16 Loop.  
17

18 [24.4.3.4] Nonrecurring charges for Billing conversions to LMC  
19 Loop are set forth in Exhibit A.  
20

21 [24.4.3.5] A rearrangement nonrecurring charge as described in  
22 Exhibit A may be assessed on some requests for work to  
23 be performed by Qwest on an existing LMC Loop, or on  
24 some private line/special access circuits, when coupled  
25 with a conversion-as-specified request to convert to LMC  
26 Loop.  
27

28 [24.4.4.1] Ordering processes for LMC Loop (s) are contained  
29 below and in Section 12 of this Agreement. Qwest will  
30 document its ordering processes in Qwest's Product  
31 Catalog (PCAT). The following is a high-level  
32 description of the ordering process:  
33

34 [24.4.4.1] Step 1: Complete product questionnaire for LMC  
35 Loop(s) with account team representative.  
36

37 [24.4.4.1] Step 4: After account team notification, place LMC  
38 Loop orders via an LSR.  
39

40 [24.4.4.4] Due date intervals are established when Qwest receives  
41 a complete and accurate LSR made through the IMA,  
42 EDI or Exact interfaces or through facsimile. For LMC  
43 Loops, the date the LSR is received is considered the start  
44 of the service interval if the order is received on a

1 business Day prior to 3:00 p.m. For LMC Loops, the  
2 service interval will begin on the next business Day for  
3 service requests received on a non-business day or after  
4 3:00 p.m. on a business day. Business Days exclude  
5 Saturdays, Sundays, New Year's Day, Memorial Day,  
6 Independence Day (4<sup>th</sup> of July), Labor Day, Thanksgiving  
7 Day and Christmas Day.  
8

9 [24.4.4.5] Out of Hours Project Coordinated Installations: CLEC  
10 may request an out of hours Project Coordinated  
11 Installation. This permits CLEC to obtain a coordinated  
12 installation for LMC Loops with installation work  
13 performed by Qwest outside of Qwest's standard  
14 installation hours. For purposes of this Section, Qwest's  
15 standard installation hours are 8:00 a.m. to 5:00 p.m.  
16 (local time), Monday through Friday, except holidays.  
17 Installations commencing outside of these hours are  
18 considered to be out of hours Project Coordinated  
19 Installations.  
20

21 [24.4.6.1] Qwest will maintain facilities and equipment for LMC  
22 Loops provided under this Agreement. Qwest will  
23 maintain the multiplexed facility pursuant to the Tariff.  
24 CLEC or its End User Customers may not rearrange,  
25 move, disconnect or attempt to repair Qwest facilities  
26 or equipment, other than by connection or  
27 disconnection to any interface between Qwest and the  
28 End User Customer, without the prior written consent  
29 of Qwest.  
30

31 **ISSUE 9-61(b)**

32 24.4.4.3 Standard service intervals for LMC(s) Loops are set forth  
33 in Exhibit C in the Service Interval Guide (SIG)  
34 available at [www.qwest.com/wholesale](http://www.qwest.com/wholesale). ~~For UNE~~  
35 ~~Combinations with appropriate retail analogues, the~~  
36 ~~Provisioning interval will be no longer than the interval~~  
37 ~~for the equivalent retail service. CLEC and Qwest can~~  
38 ~~separately agree to Due Dates other than the interval.~~  
39

40 9.23.4.4.3 Installation intervals for EELs ~~UNE Combinations~~ are  
41 set forth in Exhibit C but will be no longer than the  
42 respective Private Line Transport Service that Qwest

1 will maintain on the following web-site address:  
2 <http://www.qwest.com/carrier/guides/sig/index.html>

3  
4 9.23.6.2 Service intervals for each ~~UNE Combination-EEL~~ are set  
5 forth in Exhibit C. For UNE Combinations with  
6 appropriate retail analogues, the Provisioning interval  
7 will be no longer than the interval for the equivalent retail  
8 service. CLEC and Qwest can separately agree to Due  
9 Dates other than the interval.

10  
11 Exhibit C:  
12 ~~Loop Mux Combo (LMC)~~  
13

14 **ISSUE 9-61(c)**

15 9.23.6.1 Intentionally Left Blank.

16 9.23.6.2 Loop Mux, 2-Wire Analog, DS0

17 9.23.6.2.1.1 First \$235.86 1,5

18 9.23.6.2.1.2 Each Additional \$153.93 1,5

19 ~~9.23.6.2.1.3 Disconnect \$5.98 1~~

20 9.23.6.3 Loop Mux, 4-Wire Analog, DS0

27 ~~9.23.6.4.1.3 Disconnect \$6.56 1~~

28 9.23.6.6 Intentionally Left Blank

29 9.23.6.8 LMC Rearrangement

30 9.23.6.8.1 DS0 \$135.44 1

31 9.23.6.8.2 High Capacity \$153.74 1

32 Qwest proposes to locate language on Loop Mux Combinations in Section 24  
33 (Commingling) instead of Section 9 (UNEs). Qwest's language for Issue 9-61

1 excludes the Loop Mux Combination from UNE combinations; Qwest’s language  
2 for Issue 9-61(a) states that multiplexing will be provided pursuant to special  
3 access as opposed to TELRIC rates, and utilizes the term “LMC Loop” instead of  
4 Loop Mux Combinations; Qwest’s language for Issue 9-61(b) states that intervals  
5 for LMC Loops (or Loop Mux Combinations, as Eschelon calls them) will be  
6 determined in the non-contractual SIG instead of the ICA, and uses the term EELs  
7 instead of UNE combinations;<sup>314</sup> and Qwest’s proposal for Issue 9-61(c) is that  
8 tariff rates should apply to multiplexing. In support of its position, Qwest states  
9 that it is under no obligation to provide stand-alone multiplexing and that  
10 multiplexing is not a feature or functionality of a loop.<sup>315</sup>

11 Issue No. 9-61: Loop-Mux Combination (“LMC”) – Placement – Section 9 and  
12 Section 24

13 **Q. PLEASE DESCRIBE THE DISAGREEMENT UNDER ISSUE 9-61.**

14 A. There are actually two disagreements under Issue 9-61: (1) whether Loop-Mux  
15 Combinations language belongs in Section 9 (UNEs), as Eschelon proposes, or  
16 solely in Section 24 (Commingling) as Qwest proposes; and (2) whether Section  
17 9.23 should be limited only to discussing one UNE combination – the EEL – as  
18 Qwest proposes, or whether Section 9.32 should also discuss other UNE  
19 combinations, as Eschelon proposes.<sup>316</sup>

---

<sup>314</sup> Qwest uses EELs instead of UNE combinations because it does not acknowledge a Loop Mux Combination as a UNE combination.

<sup>315</sup> Qwest Response, p. 37.

<sup>316</sup> Eschelon’s proposed language for Section 9.23.2 is as follows: “9.23.2 UNE Combinations

1 **Q. PLEASE EXPLAIN THE FIRST DISAGREEMENT – PLACEMENT.**

2 A. It is unquestionable that the UNE loop is a component of the Loop-Mux  
3 Combination, and therefore, Eschelon’s language belongs in Section 9 (UNEs).  
4 As explained above in Issue 9-55, Eschelon’s proposed contract language makes  
5 clear that Eschelon is not attempting to broaden Section 9 to cover non-UNEs.

6 **Q. AND THE SECOND DISAGREEMENT?**

7 A. Qwest’s proposed language would result in Section 9.23 discussing only one UNE  
8 combination – the EEL. However, a Loop-Mux Combination is also a UNE  
9 Combination and should therefore be identified in Section 9.23.2 along with  
10 EELs. The issue of whether a Loop-Mux Combination is a UNE Combination is  
11 addressed under Issue 9-61(a).

12 Issue No. 9-61(a): Loop-Mux Combination (LMC) – LMC Loop versus LMC,  
13 Sections 9.23.9 and subparts, 24.4 and subparts, and 9.23.2

14 **Q. IN YOUR IMMEDIATELY PRECEDING DISCUSSION, YOU**  
15 **MENTIONED THAT ESCHELON AND QWEST DISAGREE ON**  
16 **WHETHER A LOOP MUX COMBINATION IS A UNE COMBINATION.**  
17 **IS THAT DISAGREEMENT ADDRESSED UNDER ISSUE 9-61(A)?**

18 A. Yes. Eschelon contends that there are numerous indications that Qwest must  
19 provide access to multiplexing at TELRIC rates as a feature, function or

---

Description and General Terms UNE Combinations are available in, but not limited to, the following products: EELs (subject to the limitations set forth below) and Loop Mux Combinations. If CLEC desires access to a different UNE Combination, CLEC may request access through the Special Request Process set forth in this Agreement. . . .”

1 capability of the UNE, while Qwest argues that there is no legal requirement for  
2 Qwest to provide access to multiplexing.

3 **Q. PLEASE ELABORATE ON THE FACTORS THAT SUPPORT**  
4 **ESCHELON'S POSITION REGARDING MULTIPLEXING.**

5 A. First, multiplexing is a “feature, function, or capability” associated with both  
6 unbundled loops and transport and, pursuant to the FCC’s unbundling rules,  
7 Eschelon is entitled to use that feature, function, or capability. 47 CFR §51.307  
8 states as follows (emphasis added):

9 (a) An incumbent LEC shall provide, to a requesting  
10 telecommunications carrier for the provision of a  
11 telecommunications service, *nondiscriminatory access to network*  
12 *elements on an unbundled basis* at any technically feasible point  
13 on terms and conditions that are just, reasonable, and  
14 nondiscriminatory in accordance with the terms and conditions of  
15 any agreement, the requirements of sections 251 and 252 of the  
16 Act, and the Commission's rules.

17 \*\*\*

18 (c) An incumbent LEC shall provide a requesting  
19 telecommunications carrier access to an unbundled network  
20 element, *along with all of the unbundled network element's*  
21 *features, functions, and capabilities*, in a manner that allows the  
22 requesting telecommunications carrier to provide any  
23 telecommunications service that can be offered by means of that  
24 network element.

25 Eschelon’s language would call for multiplexing to be provided at UNE rates  
26 when it is provided in connection with multiplexed EELs – a combination of loop  
27 and transport in which the loop and transport components have different  
28 bandwidths and multiplexing is necessary to connect the facilities – and as part of

1 a Loop-Mux Combination – when unbundled loops are connected to the  
2 multiplexer and the multiplexer is connected to Eschelon’s collocation, with no  
3 transport provided. In each of these instances, nondiscriminatory access to  
4 unbundled network elements requires access to multiplexing, and that  
5 multiplexing is a feature, function and capability of the UNE loop and/or UNE  
6 transport to which the UNE is connected.

7 **Q. HAS QWEST AGREED TO LANGUAGE IN ANY OTHER SECTIONS OF**  
8 **THE ICA THAT SUPPORTS ESCHELON’S POINT ON**  
9 **MULTIPLEXERS?**

10 A. Yes. Eschelon and Qwest have agreed to the definition of “routine network  
11 modifications” as “those activities of the type that Qwest regularly undertakes for  
12 its own End User Customers.” This definition also lists activities that are  
13 considered routine network modifications – or activities that Qwest routinely  
14 provides for its own retail customers – and those activities include “deploying a  
15 new multiplexer” and “reconfiguring an existing multiplexer.” If Qwest regularly  
16 deploys new multiplexers and reconfigures existing multiplexers for its own retail  
17 customers, it should not be allowed to argue here that it need not provide access to  
18 multiplexers to CLECs.

19 **Q. ARE THERE OTHER INDICATIONS FROM THE FCC THAT ACCESS**  
20 **TO MULTIPLEXERS SHOULD BE PROVIDED AT TELRIC RATES?**

21 A. Yes. When discussing UNE loops at paragraph 214 of the *TRO*, the FCC states:

1           214. At its most basic level, a local loop that serves the mass  
2 market consists of a transmission medium, which almost always  
3 includes copper wires of various gauges. ***The loop may include***  
4 ***additional components*** (e.g., load coils, bridge taps, repeaters,  
5 ***multiplexing equipment***) that are usually intended to facilitate the  
6 provision of narrowband voice service. (emphasis added)

7           The FCC further clarified this point at footnote 1921 of the *TRO*, in which it  
8 states: “Verizon cannot refuse to provision a particular loop by claiming that  
9 multiplexing equipment is absent from the facility. In that case, Verizon must  
10 provide the multiplexing equipment, because the requesting carrier is entitled to a  
11 fully functioning loop.” And at paragraph 571 of the *TRO*, the FCC makes clear  
12 that multiplexing is a component of a UNE combination (see also, paragraph  
13 575):

14           571. In the *Notice*, the Commission sought comment on issues  
15 related to the EEL, which is a UNE combination consisting of an  
16 unbundled loop and dedicated transport and may sometimes  
17 include additional electronics (e.g., multiplexing equipment).

18 **Q. IS THERE MORE SUPPORT FOR ESCHELON’S POSITION?**

19 A. Yes. Qwest has offered unbundled multiplexing in three ways: (1) as part of a  
20 multiplexed EEL, (2) as part of a Loop-Mux Combination, and (3) as a stand  
21 alone UNE. Furthermore, the Commission has set TELRIC rates the LMC  
22 product, and the UNE rates established for loops and transport include the cost of  
23 multiplexing where appropriate.

1 **Q. IS ESCHELON REQUESTING THAT QWEST PROVIDE UNLIMITED**  
2 **ACCESS TO UNBUNDLED MULTIPLEXING OR MULTIPLEXING AS A**  
3 **STAND ALONE UNE?**

4 A. No, and I believe this point deserves special emphasis. Eschelon's position in this  
5 arbitration only requires Qwest to provide multiplexing at UNE rates when the  
6 loops and/or transport to which the multiplexer is connected are UNEs. This  
7 would include providing multiplexing at UNE rates in connection with  
8 multiplexed EELs and as part of a Loop-Mux Combination.

9 Issue No. 9-61(b): LMC Multiplexing – Intervals - Sections 9.23.9.4.3, 9.23.4.4.3,  
10 9.23.6.2, Exhibit C, and 24.4.4.3

11 **Q. DOES ISSUE 9-61(B) CONSIST OF TWO DISAGREEMENTS THAT ARE**  
12 **LARGELY EXTENSIONS OF THE DISAGREEMENTS DESCRIBED**  
13 **ABOVE?**

14 A. Yes. As I explained under Issue 1-1, it is critical for the ICA to contain applicable  
15 intervals and require ICA amendment and Commission approval when intervals  
16 are modified. That is precisely what Eschelon's language for Section 9.23.9.4.3 is  
17 designed to achieve:

18 9.23.9.4.3 Service intervals for LMC(s) are set forth in Exhibit  
19 C. For UNE Combinations with appropriate retail  
20 analogues, the Provisioning interval will be no  
21 longer than the interval for the equivalent retail  
22 service. CLEC and Qwest can separately agree to  
23 Due Dates other than the interval.

1 Remaining true to its position under Issue 1-1, Qwest proposes language in  
2 Section 24.4.4.3 that would allow Qwest to have unilateral control over changes  
3 to intervals [“Standard service intervals for LMC Loops in the Service Interval  
4 Guide (SIG) available at [www.qwest.com/wholesale](http://www.qwest.com/wholesale)”] For the reasons explained  
5 under Issue 1-1, intervals should be contained in the agreement and should be  
6 modified by Commission-approved ICA amendment.

7 **Q. WHAT IS THE SECOND DISAGREEMENT UNDER ISSUE 9-61(B)?**

8 A. As described under Issue 9-61(a), Eschelon and Qwest disagree on whether Loop-  
9 Mux should be identified as a UNE combination along with an EEL. For the  
10 reasons explained above, it is Eschelon’s position that it should be. This  
11 disagreement serves as the difference between Eschelon’s Sections 9.23.4.4.3 and  
12 9.23.6, in which Eschelon proposes to use the term “UNE Combinations” and  
13 Qwest proposes to use the term “EEL.” Eschelon’s proposal for Sections  
14 9.23.4.4.3 and 9.23.6.2 address UNE combinations the same way the  
15 Commission-approved AT&T ICA addresses UNE combinations, and Qwest  
16 wants to limit that term to EELs for Eschelon.

17 Issue No. 9-61(c): LMC Multiplexing - Exhibit A Section 9.23.6.6 and subparts

18 **Q. ISSUE 9-61(C) ADDRESSES LMC MULTIPLEXING RATES. IS**  
19 **RESOLUTION OF THIS ISSUE RELATED TO THE ISSUES ABOVE?**

20 A. Yes. As explained above (primarily under Issue 9-61(a)), a primary disagreement  
21 between Eschelon and Qwest in Section 9.23.9 is whether the contract should

1 reference UNE combinations – both EELs and Loop-Mux Combinations – or  
2 whether it should exclude Loop-Mux Combinations and reference only EELs. If  
3 Eschelon prevails on this issue, then multiplexing rates should be contained in the  
4 agreement in Exhibit A Section 9.23.6.6 – just as they are today. Eschelon  
5 proposes charges for multiplexing that have been approved by the Commission.

6 **Q. PLEASE SUMMARIZE ISSUES 9-61 AND (A)-(C).**

7 A. Access to multiplexing should be provided at TELRIC rates when combined with  
8 a UNE loop. Qwest has provided access to multiplexing in this manner in the past  
9 and currently has Commission-approved TELRIC rates for multiplexing.  
10 Accordingly, terms, conditions and rates for Loop Mux Combinations should be  
11 included in the ICA. For all of the reasons described in Eschelon’s business need  
12 and in these responses, the Commission should adopt Eschelon’s language for  
13 Issues 9-61 and (a) – (c).

14 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

15 A. Yes.

**BEFORE THE PUBLIC UTILITY COMMISSION OF OREGON**

**In the Matter of the Petition of Eschelon                    )**  
**Telecom of Oregon, Inc. for Arbitration with            )** **Docket No. ARB 775**

### Biography

Mr. Starkey currently serves as the President and Founding Partner of QSI Consulting, Inc. QSI is a consulting firm concentrating primarily on regulated markets including the telecommunications industry. QSI assists its clients in the areas of regulatory policy, business strategy, financial and econometric analysis and inter-carrier issues involving rates and charges assessed by incumbent carriers. Prior to founding QSI Mr. Starkey served as the Senior Vice President of Telecommunications Services at Competitive Strategies Group, Ltd. in Chicago, Illinois.

Mr. Starkey's consulting career began in 1996 shortly before the passage of the Telecommunications Act of 1996. Since that time, Mr. Starkey has advised some of the world's largest companies (e.g., AT&T, MCI, Time Warner, Covad Communications, Comcast, Siemens Corporation, etc.) on a broad spectrum of issues including the most effective manner by which to interconnect competing networks. Mr. Starkey's experience spans the landscape of competitive telephony including interconnection agreement negotiations, mediation, arbitration, and strategies aimed at maximizing new technology. Mr. Starkey's experience is often called upon as an expert witness. Mr. Starkey has since 1991 provided testimony in greater than 150 proceedings before approximately 40 state commissions, the FCC and courts of varying jurisdiction.

Mr. Starkey's expertise with competitive communications issues is rooted not only in his consulting experience, but also in his previous employment. Mr. Starkey has worked for the Missouri, Illinois and Maryland public utility commissions, including his most recent position as Director of the Maryland Commission's Telecommunications Division (and as the Senior Policy Analyst for the Illinois Commission's Office of Policy and Planning and Senior Economist with the Missouri Public Service Commission).

### Educational Background

Bachelor of Science, Economics, International Marketing  
Missouri State University, Cum Laude Honor Graduate

Graduate Coursework, Finance  
Lincoln University

Numerous telecommunications industry training courses

1996 – 1999  
Senior Vice President  
Managing Director of Telecommunications  
Services

#### Maryland Public Service Commission

1994-1995  
Director  
Telecommunications Division

#### Illinois Commerce Commission

1993 – 1994  
Senior Policy Analyst  
Office of Policy and Planning

#### Missouri Public Service Commission

1991-1993  
Senior Economist  
Utility Operations Division –  
Telecommunications

### Professional Activities

#### Missouri Universal Service Fund

Serve as the Co-Administrator chosen by the Missouri Public Service Commission to administer its intra-state Universal Service Fund (“USF”). Interact with Missouri’s telecommunications carriers and the Missouri Universal Service Board (i.e., the Commission and Public Counsel) to collect payments, fund requested disbursements and establish the overarching collection percentage applied to all Missouri, intra-state telecommunications revenues.

Facilitator, *C<sup>3</sup> Coalition* (Competitive Carrier Coalition - Ameritech Region). Facilitate industry organization representing 10-15 competitive carriers seeking to share information and “best practices” with respect to obtaining effective interconnection, UNEs and resold services from SBC/Ameritech.

Former member of the Missouri Public Service Commission’s Task Force on FCC Docket Nos. 91-141 and 91-213 regarding expanded interconnection, collocation, and access transport restructure

Former member of the AT&T / Missouri Commission Staff, *Total Quality Management Forum* responsible for improving and streamlining the regulatory process for competitive carriers

Former member of the Missouri, Oklahoma, Kansas, Texas, and Arkansas five state Southwestern Bell Open Network Architecture (ONA) Oversight Conference

Former delegate to the Illinois, Michigan, Indiana, Ohio, and Wisconsin Ameritech Regional Regulatory Conference (ARRC) charged with the responsibility of analyzing Ameritech’s “Customers First” local exchange competitive framework for formulation of recommendations to the FCC and the U.S. Department of Justice

Former Co-Chairman of the Maryland Local Number Portability Industry Consortium responsible for developing and implementing a permanent database number portability solution

## Michael Starkey

Former member of the Illinois Local Number Portability Industry Consortium responsible for developing and implementing a permanent database number portability solution

### **Expert Testimony – Profile**

**BEFORE THE PUBLIC UTILITY COMMISSION OF OREGON**

**In the Matter of the Petition of Eschelon                    )**  
**Telecom of Oregon, Inc. for Arbitration with            )** **Docket No. ARB 775**  
**Qwest Corporation, Pursuant to 47 U.S.C.                )**  
**Section 252 of the Federal                                    )**  
**Telecommunications Act of 1996                            )**

---

**EXHIBIT 3**

**ISSUES BY SUBJECT MATTER – OREGON [Annotated]<sup>1</sup>**  
**Prepared by Eschelon**  
**Updated May 3, 2007**

**I. OVERVIEW AND INTRODUCTION – Starkey Direct**

**II. CHRONOLOGIES AND ADDITIONAL FACTUAL SUPPORT – Johnson Direct**

**III. ISSUES GROUPED BY SUBJECT MATTER:**

**1. INTERVAL CHANGES AND PLACEMENT<sup>2</sup> – ISSUE 1-1 and (a)-(e) - Starkey Direct**

**Issue 1-1 (2 options- Two Eschelon Proposals and one Qwest Proposal for same issue): Changes to Intervals --** Section 1.7.2 and Exhibits N and O

**Issue 1-1 (a): Interconnection trunks --** Section 7.4.7

**Issue 1-1 (b): UDIT Rearrangements --** Exhibit C, Group 2.0

**Issue 1-1 (c): LIS Trunking --** Exhibit C, Group 9.0

**Issue 1-1 (d): ICB Provisioning Intervals --** Exhibit I, Section 3

**Issue 1-1 (e): Intervals for Loop-Mux Combination (LMC) --** Section 9.23.9.4.3 (Eschelon)/Section 24.4.4.3(Qwest), 1<sup>st</sup> provision/sentence only  
The section numbers differ, because Eschelon proposes placement in Section 9 (UNEs) and Qwest proposes placement in Section 24 (Commingling). [Regarding placement of LMC, and for the open issue in the remainder of this paragraph, *see* Issue 9-61.]

**2. RATE APPLICATION – ISSUE 2-3 – Denney Direct**

**Issue 2-3: Application of Rates in Exhibit A --** Section 2.2 (1 of 2 issues); *see also* Section 22 (1 of 2 Options)

**3. EFFECTIVE DATE OF LEGALLY BINDING CHANGES – ISSUE 2-4 – Denney Direct**

---

<sup>1</sup> This Issues by Subject Matter List contains annotations to show where each issue is primarily addressed in Eschelon’s direct testimony. For example, “Starkey Direct” indicates that the issue is addressed in Eschelon witness Michael Starkey’s direct testimony. Other annotations include “Denney Direct” and “Johnson Direct,” indicating issues addressed in the direct testimonies of Eschelon witnesses Douglas Denney and Bonnie Johnson, respectively.

<sup>2</sup> *Excludes* Length of Intervals for Commingled Arrangements and Intervals for Loop-Mux combinations. *See* Issue 9-61.

**Issue 2-4: Effective Date of Legally Binding Changes** -- Section 2.2 (2 of 2 issues) (1 of 2 Options) and (2 of 2 options – Proposal #2 is for entire section 2.2, and has a related component in 22.4.1.2)

#### **4. DESIGN CHANGES – ISSUE 4-5 and (a)-(c) – Denney Direct**

**Issue 4-5: Design Changes for Loops** – Section 9.2.3.8

**Issue 4-5 (a): CFA Change** – Section 9.2.3.9

**Issue 4-5(b): Intentionally Left Blank**

**Issue 4-5(c): Design Change Charge** – Exhibit A, Section 9.20.11 and subparts

➤ *5-7 COLLECTIVELY: “PAYMENT AND DEPOSIT”*

#### **5. DISCONTINUATION OF ORDER PROCESSING AND DISCONNECTION – ISSUES 5-6 and 5-7 and subpart – Denney Direct**

**Issue 5-6 (2 options - Two Eschelon Proposals and one Qwest Proposal for same issue): Discontinuation of Order Processing for failure to make payment** - Section 5.4.2

**Issue 5-7: Commission approval prior to disconnection (cross reference)** – Section 5.4.3

**Issue 5-7(a): Commission approval prior to disconnection** – Section 5.1.13.1

#### **6. DEPOSITS – ISSUES 5-8, 5-9, 5-11 and 5-12 – Denney Direct**

**Issue 5-8: De Minimus Amount** – Section 5.4.5 (1 of 3 sub-issues in 5.4.5; same language for this issue appears in the first two of Eschelon’s proposals for 5.4.5)

**Issue 5-9 (2 options - Two Eschelon Proposals and one Qwest Proposal for same issue): Definition of Repeatedly Delinquent** – Section 5.4.5 (2 of 3 sub-issues in 5.4.5)

**Issue 5-11: Disputes Before Commission** – Section 5.4.5 (3 of 3 sub-issues in 5.4.5; same language in first two of Eschelon’s proposals)

**Issue 5-12 (Alternative Approach to Deposits): Commission Determines Right to Deposit based on Relevant Circumstances** –Section 5.4.5 (all)

Eschelon offers the language shown in Issue 5-12 (Eschelon’s Proposal #3) as an alternative to the other two Eschelon versions of 5.4.5. If this

provision (Proposal #3) were adopted, there would be no de minimus or repeatedly delinquent language. This entire paragraph, if adopted, would replace all other Eschelon proposals for all of Section 5.4.5. Qwest's counter is the same for all proposals.

**7. REVIEW OF CREDIT STANDING – ISSUE 5-13 – Denney Direct**

**Issue 5-13 (2 options - Two Eschelon Proposals and one Qwest Proposal for same issue): Review of Credit Standing – Section 5.4.7**

**8. COPY OF NON-DISCLOSURE AGREEMENT – ISSUE 5-16 – Denney Direct**

**Issue 5-16: Non-disclosure Agreement -- Section 5.16.9.1**

**9. TRANSIT RECORD CHARGE AND BILL VALIDATION – ISSUES 7-18 and 7-19 – Denney Direct**

**Issue 7-18: Application of Transit Record Charge -- Section 7.6.3.1**

**Issue 7-19: Transit Record Bill Validation Detail -- Section 7.6.4**

**10. INTENTIONALLY LEFT BLANK ( FORMERLY COLLOCATION AVAILABLE INVENTORY – ISSUES 8-20 and (a)) – Closed language shown in Denney Direct.**

**11. POWER – ISSUES 8-21 and (a) – (f), 8-22, 8-23 – Starkey Direct (Issues 8-21 and subparts); Closed language for Issue 8-22 shown in Denney Direct.**

**Issue 8-21: 48V Power Measurement - 8.2.1.29.2.1**

**Issue 8-21(a): 48V Power Measurement - 8.2.1.29.2.2**

**Issue 8-21(b): 48V Power Measurement – 8.3.1.6**

**Issue 8-21(c): 48V Power Measurement – 8.3.1.6.1**

**Issue 8-21(d): 48V Power Measurement – 8.3.1.6.2 and subparts a & b**

**Issue 8-21(e): 48V Power Measurement – Exhibit A, Section 8.1.4.1 and subparts**

**Issue 8-21(f): Intentionally Left Blank**

**Issue 8-22: QPF – 8.3.9.1.3, 8.3.9.2.3**

**Issue 8-23: Intentionally Left Blank**

**12. INTENTIONALLY LEFT BLANK ( FORMERLY NEBS STANDARDS – ISSUE 8-24) – Closed language shown in Starkey Direct.**

**13. INTENTIONALLY LEFT BLANK**

**14. NONDISCRIMINATORY ACCESS TO UNES – ISSUE 9-31 – Starkey Direct**

**Issue 9-31: Nondiscriminatory Access to UNEs – Section 9.1.2 (Two Eschelon proposals and one Qwest proposal for the same issue)**

**15. INTENTIONALLY LEFT BLANK ( FORMERLY DELAYED ORDERS WHEN FACILITIES ARE NOT AVAILABLE –ISSUE 9-32 and (a)–(c)) – Closed language shown in Starkey Direct.**

**16. NETWORK MAINTENANCE AND MODERNIZATION – ISSUES 9-33, 9-34 – Starkey Direct; Closed language for Issues 9-33(a), 9-34 and 9-35 shown in Starkey Direct.**

**Issue 9-33: Affect on End User Customers -- Section 9.1.9; Section 9.1.9.1**

**Issue 9-34: Location at Which Changes Occur -- Sections 9.1.9, 9.1.9.1**

**17. WIRE CENTER – ISSUES 9-37; 9-37(a); 9-37(b); 9-38; 9-39 (except CAPS); 9-40; 9-41 and 9-42 – Denney Direct**

**Issue 9-37: Wire center List – Section 9.1.13.3 & Section 4.0 Definitions of Commission-Approved Wire Center List and Wire Center Docket.**

**Issue 9-37(a): WIRE CENTER LIST – ADDITIONAL NON-IMPAIRED WIRE CENTERS – Sections 9.1.14.4 & 9.1.14.4.3 and subparts**

**Issue 9-37(b): WIRE CENTER LIST – CHANGE IN UNE STATUS – Section 9.1.13.4.1.2**

**Issue 9-38: PROCESSING OF HIGH CAPACITY LOOP AND TRANSPORT REQUESTS – Section 9.1.13.4 & 9.1.13.4.2**

**Issue 9-39 (except CAPS): WIRE CENTER LIST – REVIEW OF WIRE CENTER LIST – Sections 9.1.13.4.1.2.1 & 9.1.14.4.2**

**Issue 9-40: NRCs FOR CONVERSION – Sections 9.1.13.5.2, 9.1.14.6 & 9.1.15.2.1**

**Issue 9-41: LENGTH OF TIME PERIOD – Sections 9.1.14.4.1 & 9.1.14.4.2**

**Issue 9-42: RATE DURING TIME PERIOD** – Sections 9.1.14.4.1 & 9.1.14.4.2 (Qwest counter in one sentence in 9.1.14.4)

**18. CONVERSION – ISSUES 9-43 and 9-44 and (a)-(c) – Starkey Direct**

**Issue 9-43: Conversions - Circuit ID** -- Section 9.1.15.2.3

**Issue 9-44: Manner of Conversion** -- Section 9.1.15.3 and subparts

**Issue 9-44(a): Manner of Conversion – Use of Adder or Surcharge** -- Section 9.1.15.3.1

**Issue 9-44(b): Manner of Conversion – Use of USOC** -- Section 9.1.15.3.1.1

**Issue 9-44(c): Manner of Conversion – Same USOC** -- Section 9.1.15.3.1.2

**19. INTENTIONALLY LEFT BLANK**

➤ PHASE OUT OF PRODUCTS/SERVICES ( 22)

**20. INTENTIONALLY LEFT BLANK ( FORMERLY SUBLOOPS – QWEST CROSS CONNECT/WIRE WORK – ISSUE 9-50) – Closed language shown in Denney Direct.**

➤ *Issue 9-51 – see Subject Matter 22A below*

**21. INTENTIONALLY LEFT BLANK**

**22. UNBUNDLED CUSTOMER CONTROLLED REARRANGEMENT ELEMENT (UCCRE) – ISSUE 9-53 – Denney Direct**

**Issue 9-53: Unbundled Customer Controlled Rearrangement Element (UCCRE) – 9.9.1**

**22A.<sup>3</sup> APPLICATION OF UDF-IOF TERMINATION (FIXED) RATE ELEMENT – ISSUE 9-51 – Denney Direct**

**Issue 9-51: Application of UDF-IOF Termination (Fixed) Rate Element (Two Eschelon Proposals and one Qwest Proposal for same issue) – Section 9.7.5.2.1.a**

---

<sup>3</sup> Issue 9-51 was not assigned a Subject Matter number in Minnesota. To carry the numbering from state-to-state, for ease of reference for witnesses for all parties testifying in multiple states, an “A” is used here, rather than renumbering the remaining Subject Matters listed. Issue 9-51 is also slightly out of order, since Issues 9-50 and 9-53 may sometimes be discussed together.

**23. INTENTIONALLY LEFT BLANK ( FORMERLY DIFFERENT UNE COMBINATIONS – ISSUES 9-54 and (a)) – Closed language shown in Denney Direct.**

**24. LOOP-TRANSPORT COMBINATIONS – ISSUE 9-55 – Starkey Direct**

**Issue 9-55: Combinations of Loops and Transport – Terminology** -- Sections 9.23.4, 9.23.4.4; 9.23.4.4.1; 9.23.4.5; 9.23.4.6; 9.23.4.5.4. *See* subparts to Issue 9-58 for related issues in 9.23.4.5.1

**25. SERVICE ELIGIBILITY CRITERIA – AUDITS - ISSUE 9-56 – Denney Direct**

**Issue 9-56: Audits - Concern** -- Sections 9.23.4.3.1.1

**Issue 9-56(a): Audits - Notice** – Section 9.23.43.1.1.1.1

**26. COMMINGLED EELS/ARRANGEMENTS – ISSUE 9-58 and (a)-(e) and ISSUE 59 – Denney Direct**

**Issue 9-58: ORDERING for Commingled Arrangements** –Sections 9.23.4.5.1, 9.23.4.5.1.1

**Issue 9-58 (a) and Issue 9-59 (Eschelon’s *Alternate Proposal for same issue*): CIRCUIT ID for Commingled Arrangements** –Section 9.23.4.5.4 or, in the alternative, Section 9.23.4.7

**Issue 9-58 (b) and 9-58(c) (Eschelon’s *Alternate Proposal for same issue*): BILLING for Commingled Arrangements** -- Section 9.23.4.6.6 (and subparts)

**Issue 9-58 (d): OTHER COMMINGLED ARRANGEMENTS - Ordering, Billing, and Circuit ID** – Section 9.1.1.1.1 & 9.1.1.1.2

**Issue 9-58(e): INTERVAL for Commingled Arrangements** -- Sections 9.23.4.4.3.1 & 24.3.2; 9.1.1.1.1 & 9.1.1.1.1

*Issue 9-59 (Eschelon alternate proposal): See 9-58(a) above, Section 9.23.4.7*

**Subject:** Copper Retirement Notification

Kim,

The Copper Retirement notice that was received concerning Issaquah, WA, job #62W3584, CLLI ISQHWAEX, was sent to Eschelon in error. This should have not been sent to Eschelon and has no impacts on any of Eschelon's circuits. There is a generic network disclosure concerning the copper retirement posted to the Qwest website.

Please ignore the notice you received in error.

In the Matter of a Request by Eschelon  
Telecom for an Investigation Regarding  
Customer Conversion by Qwest and Regulatory  
Procedures

ISSUE DATE: November 12, 2003

DOCKET NO. P-421/C-03-616

ORDER FINDING COMPLIANCE FILING  
INADEQUATE AND REQUIRING  
FURTHER FILINGS

**PROCEDURAL HISTORY**

**I. The Original Order**

On July 30, 2003 the Commission issued an Order in this case finding that Qwest had failed to provide adequate service at several key points in the process of transferring a customer to Eschelon Telecom, Inc. and that these service inadequacies reflected systemic failures that must be addressed. The Commission identified four key failures:

- (1) Qwest failed to adopt operational procedures to ensure the seamless transfer of customers to competitive carriers.
- (2) Qwest failed to adopt operational procedures to prevent its retail division from interfering with Eschelon's ability to serve its customer and to prevent its retail division from providing misleading characterizations of Eschelon's conduct.
- (3) Qwest failed to adopt operational procedures to prevent its retail service representatives from canceling or otherwise modifying wholesale orders.
- (4) Qwest failed to adopt operational procedures to promptly acknowledge and take responsibility for mistakes in processing wholesale orders.

The Order required Qwest to make a compliance filing detailing its proposal for remedying these service inadequacies. The proposal was to include at least the following items:

- (1) Procedures for ensuring that retail service representatives are properly separated from the Company's wholesale operations, including a report on the feasibility of installing computer software to alert retail service representatives when they are dealing with wholesale orders or accounts and computer software to disable retail service representatives' ability to make changes in wholesale orders or accounts.
- (2) Procedures for promptly acknowledging and taking responsibility for mistakes in processing wholesale orders.
- (3) Procedures for reducing errors in processing wholesale orders, including a report on the feasibility of maximizing reliance on electronic processing, with an explanation of the necessity for each manual operation required for wholesale order processing.

## II. The Compliance Filing; Parties' Comments

On August 29, 2003, Qwest made the compliance filing required under the July 30 Order.

On September 12, 2003, Eschelon filed comments claiming that Qwest's filing was not in full compliance with the Order, alleging the following deficiencies:

- (1) The procedures proposed for alerting retail service representatives that certain orders were wholesale orders that should not be changed or cancelled were limited to "porting" orders, excluding many if not most of the wholesale orders processed by Qwest.
- (2) The proposal to install computer software to block retail service representatives' ability to make changes in wholesale orders did not include all retail service representatives, did not clearly identify which retail service representatives were included and which were excluded, and did not explain Qwest's rationale for deciding which retail service representatives to include and which to exclude.
- (3) The proposals for reducing errors in processing wholesale orders did not address errors in orders that were manually processed.
- (4) The proposal for complying with the Order's directive to develop "procedures for promptly acknowledging and taking responsibility for mistakes in processing wholesale orders" was limited to addressing typographical errors.
- (5) The filing provided insufficient detail on how Qwest monitors contacts between its wholesale and retail employees, how often it detects improper contacts, and how it deals with those contacts.

On September 25 and October 9 Eschelon filed supplemental comments alleging another incident of inappropriate contact between Qwest's wholesale and retail divisions and questioning the propriety of a Qwest advertising campaign highlighting alleged disparities between Qwest's quality of service and that of its competitors.

On September 15, 2003, the Minnesota Department of Commerce (the Department) filed comments stating that Qwest's compliance filing was not in full compliance with the July 30 Order, alleging the following deficiencies:

- (1) The proposals for reducing errors in processing wholesale orders did not address errors in orders that were manually processed.
- (2) It was not clear that the procedures proposed for alerting retail service representatives that certain orders were wholesale orders that should not be changed or cancelled would apply to all wholesale orders.
- (3) It was not clear that Qwest's proposal to block selected retail service representatives' ability to make changes in wholesale orders would apply to all types of wholesale orders.

### III. Commission Proceedings

On October 30, 2003, the compliance filing came before the Commission. The following persons appeared: Qwest, Eschelon, the Department, and McLeod USA Telecommunications, Inc. and U S Link, Inc., appearing jointly in support of Eschelon.

### FINDINGS AND CONCLUSIONS

The Commission has examined the compliance filing and concurs with Eschelon and the Department that it does not fully comply with the terms of the July 30 Order.

The filing fails to propose procedures for reducing errors in processing wholesale orders that must be manually processed. It fails to propose procedures for acknowledging any mistakes in processing wholesale orders other than typographical errors. It fails to propose effective procedures to alert retail service representatives when they are dealing with wholesale orders, except for a subset of wholesale orders representing approximately 50% of the total. It fails to provide adequate detail about the scope, rationale, and timing of its plan to block selected retail service representatives' ability to make changes in wholesale orders. It fails to provide adequate detail about how the Company monitors contacts between its wholesale and retail divisions, how it handles inappropriate contacts, and how frequently it finds that inappropriate contacts have occurred.

The Commission will require additional filings to remedy these deficiencies.

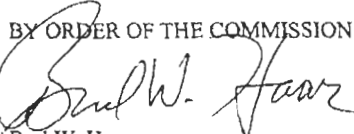

### ORDER

- I. Within 30 days of the date of this Order, Qwest shall make a compliance filing further detailing processes and procedures for remedying the service inadequacies identified in the Commission's July 30 Order. This filing shall include at least the following items:

- (a) Procedures for extending to all wholesale orders notice procedures alerting retail service representatives when they are dealing with wholesale orders, eliminating references to "porting" orders and "LNP [Local Number Portability] orders in the original compliance filing.
- (b) Modification of the content of the notice alerting retail service representatives when they are dealing with wholesale orders to advise them to refer the customer to the new carrier and take no further action.
- (c) A detailed explanation of which retail service representatives will be blocked from making changes in wholesale orders, which retail service representatives will not be blocked from making changes in wholesale orders, and the reasons for distinguishing between these two groups of retail service representatives.
- (d) A feasibility report justifying any decision that it is not feasible to block all retail service representatives from making changes in wholesale orders.
- (e) Procedures for ensuring that Qwest acknowledges mistakes in processing wholesale orders using the following language: "Qwest acknowledges its mistake in processing this wholesale order. The error was not made by the new service provider."
- (f) Procedures for extending the error acknowledgment procedures set forth in part (e) to all Qwest errors in processing wholesale orders.
- (g) Procedures for communicating to line staff that time is of the essence both for identifying errors in processing wholesale orders and for providing the acknowledgment set forth in part (e) and procedures for requiring the acknowledgment as soon as practicable after the cause of the error has been identified.
- (h) Procedures for ensuring that acknowledgments appear on Qwest letterhead or other indicia to show that it is Qwest making the acknowledgment.
- (i) Procedures for providing the acknowledgment to the competitive local exchange carrier, who in turn may provide it to the end use customer, to prevent improper contacts with the other carrier's customer.
- (j) Procedures for preventing use of a confidentiality designation in acknowledgments, to ensure that the competitive local exchange carrier can provide the acknowledgment to its end user customer.
- (k) Procedures for making the acknowledgment process readily accessible to competitive local exchange carriers, including procedures for identifying clearly the person(s) to whom requests for acknowledgments should be directed.

- (l) Procedures for ensuring that persons designated to provide acknowledgments have been appropriately trained and have the authority to provide acknowledgments.
  - (m) A proposal for including performance measures for Centrex 21 and linesharing services in performance measure PO-2 in the Long Term PID process, including submission of a proposal for such performance measures to the Long Term PID Administration Forum by the next filing deadline of November 6, 2003.
  - (n) A proposal for reducing errors in processing manual wholesale orders, such as additional proof reading.
2. The compliance filing required in paragraph 1 shall include time lines for implementing each item.
  3. Qwest shall file quarterly reports with the Department of Commerce on how many disciplinary actions and training sessions have occurred as a result of improper contacts or activities between the Company's wholesale and retail divisions.
  4. This Order shall become effective immediately.

In the Matter of a Request by Eschelon  
Telecom for an Investigation Regarding  
Customer Conversion by Qwest and Regulatory  
Procedures

ISSUE DATE: July 30, 2003

DOCKET NO. P-421/C-03-616

ORDER FINDING SERVICE INADEQUATE  
AND REQUIRING COMPLIANCE FILING

**PROCEDURAL HISTORY**

On April 21, 2003, Eschelon Telecom, Inc. filed a petition that did the following things:

- (a) asked the Commission to investigate the reasonableness and adequacy of Qwest Corporation's procedures for processing wholesale orders, stating that Eschelon had recently lost a major customer when Qwest's wholesale division erroneously disconnected the customer while processing the order that would have transferred the customer from Qwest to Eschelon;
- (b) asked the Commission to investigate the nature and appropriateness of the separation between Qwest's wholesale and retail divisions, stating that Qwest's retail division used the wholesale division's erroneous disconnection to win back the customer and used computer capabilities that should have been off-limits to retail personnel to cancel Eschelon's wholesale order;
- (c) asked the Commission to establish an informal intervention or mediation process by which telecommunications carriers could get regulatory assistance in resolving inter-carrier, time-critical issues affecting customers.

On April 25, 2003, the Commission issued a notice requesting comments on Eschelon's petition.

Covad Communications Company and MCI filed comments supporting the request to establish an informal regulatory intervention-mediation process. AT&T Communications of the Midwest, Inc. filed comments supporting the request for an investigation into the operational relationship between Qwest's retail and wholesale divisions.

The Department of Commerce filed comments recommending that the Commission order Qwest to reconfigure its wholesale service ordering system to give competitive local exchange carriers as much control over the processing of their wholesale orders as Qwest's retail service representatives have.

Qwest filed comments in which it (a) supported an informal regulatory intervention-mediation process; (b) expressed regret for the errors that led to Eschelon's loss of the customer; (c) contended that the incident was a one-time occurrence adequately addressed internally and requiring no regulatory response; and (d) argued that the issue of information-sharing between Qwest's retail and wholesale divisions was hotly contested and would be thoroughly addressed in the ongoing interconnection arbitration between Qwest and AT&T, making further examination here unnecessary and inefficient.<sup>1</sup>

On July 17, 2003, the matter came before the Commission.

## FINDINGS AND CONCLUSIONS

### **I. Factual Background**

The basic facts of this case are not disputed. One of Qwest's large business customers, a financial services firm with hundreds of telephone lines and combined local and long distance billings of approximately \$463,655 per year, decided to transfer its service from Qwest to Eschelon. Eschelon followed Qwest's procedures to complete the service transfer, electronically submitting a wholesale order form on March 27. That form listed April 9 as the date on which service should be transferred to Eschelon.

Qwest's procedures for processing wholesale orders are not totally automated, and the date of the service transfer had to be manually entered into Qwest's system in five separate work orders, since the service transfer involved multiple lines and specialized services. The Qwest employee who entered the data inadvertently entered that day's date, March 27, on two of these five work orders. That error resulted in Qwest taking approximately 80 of the customer's lines out of service that night, two weeks before Eschelon was prepared to serve them, with no notice to Eschelon or the customer.

When the customer found the lines disconnected the next morning, the customer called Qwest's retail division, which, instead of referring the call to Qwest's wholesale division or to Eschelon, tried to resolve the problem itself. Here the undisputed facts become sketchier, and the parties

---

<sup>1</sup> *In the Matter of the Petition of AT&T Communications of the Midwest, Inc. for Arbitration of an Interconnection Agreement with Qwest Corporation Pursuant to 47 U.S.C. § 252(b)*, Docket No. P-442, 421/IC-03-759.

disagree on what the uncontested facts mean. Eschelon claims that Qwest used the disconnection as an opportunity to win back the customer, nurturing, if not creating, the impression that the disconnection was the result of Eschelon's negligence. Qwest claims that its retail service representative misread the situation, thought she was dealing with retail orders, and appropriately ended her contact with the customer once she knew she was dealing with a service transfer situation.

Interpretations aside, the following facts are not disputed. Service to the customer was not restored until the afternoon of March 28. By that time the customer had reversed its decision to transfer service to Eschelon, and Qwest retains the customer to this day.

When the customer told Eschelon it no longer wished to transfer its service to Eschelon, Eschelon tried to cancel the service transfer, submitting an electronic cancellation order in compliance with Qwest's procedures. Qwest rejected the cancellation order, however, because its system is programmed to reject such orders once any of the work orders effecting a service transfer have been implemented. Here, of course, two of the five work orders had been erroneously implemented. Eschelon was therefore unable to honor its customer's request and contacted Qwest's wholesale division for help in canceling the service transfer.

When Eschelon reached the appropriate wholesale service representative, however, Eschelon learned that the three remaining work orders had been canceled by the Qwest retail service representative working with the customer, at the customer's request. This was a serious breach of Qwest's company policies, which require strict separation between Qwest's retail and wholesale divisions. Supervisory staff informed the retail service representative that she was not supposed to "touch" wholesale orders and that the remaining work orders would be reinstated and implemented unless Eschelon canceled them.

The retail service representative then sent the following e-mail to the customer:

Hi [Customer Name Redacted],

Just to let you know, I was contacted by our wholesale group and they advised that due to the fact that they have an ASR that has not been cancelled by Eschelon that they have to reissue those Orders due on 4-09. Eschelon HAS to cancel the ASR with our wholesale group or these orders will process.

If you could get the information to [Customer Name Redacted] I'd really appreciate it because I know it's a big issue if the lines go down.

Thanks!  
[Qwest Name Redacted]

Eschelon argues that this e-mail unfairly damaged its relationship with its customer in the following ways:

- (a) It did nothing to correct and in fact reinforced the customer's impression that Eschelon was to blame for the service outage.
- (b) It implied that Eschelon was failing to comply with the customer's request to stop the service transfer, when in fact Eschelon was powerless to stop the transfer and was working with Qwest's wholesale division to get them to stop the transfer.
- (c) It alarmed the customer by suggesting that there was a serious possibility that Eschelon would fail to cooperate with Qwest in canceling the service transfer and that another disconnection would result.

Qwest argues that the e-mail merely informed the customer that the transaction at issue was a wholesale transaction, that the retail service representative's cancellation of the remaining service orders had been or would be rescinded, and that the customer must deal with Eschelon if it wished to reverse its earlier decision to transfer service to Eschelon.

Eschelon did work with Qwest's wholesale division to cancel the remaining service orders and ensure that the customer's lines did not go down again. The work orders remained canceled; the lines did not go down; and the customer continues to receive service from Qwest to this day.

Eschelon states that it had difficulty convincing the customer that Eschelon bore no responsibility for the service outage, that the customer requested a written statement from Qwest explaining the cause of the outage, and that Qwest delayed and obfuscated in response to this request. The record does show that Qwest's first explanation, a "root cause" analysis of the outage, was written in technical jargon and that a written explanation in lay terms was not provided until April 16, 2003, nearly three weeks after the outage.

## **II. The Legal Standard**

Eschelon is seeking an investigation to determine how Qwest's procedures for processing wholesale orders could be changed to prevent a recurrence of the kinds of events that led to the loss of this major customer. Eschelon emphasizes that it could have brought this case as a complaint under Minn. Stat. § 237.462, the competitive enforcement statute, but that it chose a less formal route in the hope of a speedier resolution.

Eschelon's filing obviously raises issues that could be developed and examined in a full-blown competitive enforcement proceeding. Eschelon has instead chosen a problem-solving approach, asking the Commission to undertake whatever investigation is necessary to improve Qwest's procedures for processing wholesale orders from competitive carriers. The Commission will therefore examine Eschelon's claims and request for relief under the statute giving it general investigatory and remedial powers, Minn. Stat. § 237.081, reserving judgment on whether Qwest's conduct was discriminatory or anti-competitive under the competitive enforcement statute.

The Commission's general authority to require telephone companies to provide adequate service on just reasonable and reasonable terms is codified at Minn. Stat. § 237.081. That statute authorizes the Commission to conduct an investigation whenever it believes, or whenever any provider of telephone service alleges, that any "practice, act, or omission affecting or relating to the production, transmission, delivery, or furnishing of telephone service or any service in connection with telephone service is in any respect unreasonable, insufficient, or unjustly discriminatory, or that any service is inadequate or cannot be obtained."

Subdivision 2 of that statute authorizes the Commission to conduct any necessary investigation, including contested case proceedings if the Commission finds that a significant factual issue has not been resolved to its satisfaction. Subdivision 4 authorizes relief at the end of the investigation:

At the end of its investigation if the Commission finds that "(1) a service that can be reasonably demanded cannot be obtained, (2) that any rate, toll, tariff, charge, or schedule, or any regulation, measurement, practice, act, or omission affecting or relating to the production, transmission, delivery, or furnishing of telephone service or any service in connection with telephone service, is in any respect unreasonable, insufficient, or unjustly discriminatory, or (3) that any service is inadequate, the commission shall make an order respecting the tariff, regulation, act, omission, practice, or service that is just and reasonable and, if applicable, shall establish just and reasonable rates and prices.

The Commission finds that there are no significant factual issues that have not been resolved to its satisfaction for purposes of determining the adequacy of Qwest's procedures for processing wholesale orders.

### **III. Commission Action**

#### **A. Inadequate Service Found**

The Commission finds that the uncontested facts in this case demonstrate that Qwest failed to provide adequate service at several key points in the customer transfer process and that these inadequacies reflect systemic failures that must be addressed.

The key points at which Qwest provided inadequate service are set forth below.

##### **1. Qwest failed to adopt operational procedures to ensure the seamless transfer of customers to competitive carriers.**

Qwest made data entry errors when it processed Eschelon's properly submitted wholesale customer transfer order. These errors caused Eschelon's new customer to lose service to some 80 phone lines for much of a business day, which in turn caused the customer to reverse its decision to transfer its service to Eschelon.

The customer's decision was foreseeable. Telecommunications services are essential services, and customers are unlikely to transfer their service to competitive carriers if they perceive a significant risk that the transfer will disrupt their service. Seamless service transfers are therefore a critical part of providing adequate wholesale service.

Qwest failed to establish and maintain effective procedures to ensure the seamless transfer of customers between telecommunications carriers. The company did not have adequate proofreading procedures in place, nor did it have the electronic processing capability required to protect migrating customers from wrongful disconnection. This lack of effective procedures constitutes inadequate service, and the Commission will require the Company to file a plan to remedy the inadequacy.

The Company should examine with special care the possibility of relying more heavily on automated procedures, which would both reduce the opportunities for data entry errors and give competitive carriers greater access to and control over their wholesale orders.

**2. Qwest failed to adopt operational procedures to prevent its retail division from interfering with Eschelon's ability to serve its customer and to prevent its retail division from providing misleading characterizations of Eschelon's conduct.**

Qwest's retail division interfered with Eschelon's ability to serve its customer by failing to refer the customer to Eschelon when it called to report the service outage. Instead, Qwest's retail service representative dealt with the customer, who decided in the course of those dealings to reverse its decision to transfer its service to Eschelon.

The only reasonable inference from these facts is that the service outage, coupled with the customer's dealings with Qwest's retail service representative, convinced the customer that it would be in better hands with Qwest than with Eschelon. The customer would have been less likely to reach this conclusion if Qwest had referred the customer to Eschelon from the start.

If Eschelon had been allowed to handle the situation from the start, the customer probably would have understood much earlier that the service outage was entirely due to Qwest's error. Eschelon had every incentive to make this clear. Qwest, on the other hand, had every incentive to obfuscate and to divert the customer's attention from the cause of the outage to other issues. Similarly, if Eschelon had been allowed to handle the situation from the start, the customer would have witnessed Eschelon's efforts to restore service instead of Qwest's. This might have prevented the loss of confidence that led the customer to reverse its decision to transfer its service to Eschelon.

Finally, if Qwest had referred the customer to Eschelon from the start, the customer would not have received the misleading e-mail from Qwest's retail service representative discussed in section I. That e-mail, which warned the customer that it would lose service again unless Eschelon took specific action to cancel its service transfer order, was misleading in at least two ways. First,

Eschelon could not take the specific action mentioned in the e-mail because the configuration of Qwest's automated system made it impossible. Second, there was no reasonable basis for fear that the service would go down again due to Eschelon, since Eschelon was already doing everything within its power to cancel the service transfer order.

As a provider of monopoly and bottleneck wholesale services, as well as the best-known provider of retail services, Qwest has unparalleled opportunities to manipulate the wholesale service transfer process to its benefit. For this reason, ensuring that calls from other carriers' customers are immediately referred to them and preventing misleading characterizations of other carriers' conduct are critical to providing adequate wholesale service.

Qwest failed to establish and maintain effective operating procedures to prevent inappropriate contacts with Eschelon's customer and to prevent misleading communications in the course of those contacts. This failure constitutes inadequate service, and the Commission will require the Company to file a plan to remedy the inadequacy.

**3. Qwest failed to adopt operational procedures to prevent its retail service representatives from canceling or otherwise modifying wholesale orders.**

Qwest granted its retail service representative (and apparently grants all its retail service representatives) access to the computer software that implements wholesale service transfer orders. She used that access to deactivate the work orders that would have finished transferring the customer to Eschelon, without authorization from Eschelon.

This was a serious breach of Qwest's company policies, and the retail service representative was informed by supervisory staff that she was not supposed to "touch" wholesale orders. It was also a serious breach of industry standards for ensuring that wholesale service transfers are not derailed at the point of implementation by collusion or other improper contact between Qwest's wholesale and retail divisions. It was also inadequate wholesale service.

While Qwest recognized the seriousness of this conduct after the fact, it did not have effective operating procedures or structural safeguards in place to prevent it. The absence of such procedures and safeguards constitutes inadequate service. Both Eschelon and the Department of Commerce have recommended that Qwest reconfigure its computer system to deny retail personnel access to wholesale orders and to provide an unmistakable systems message, such as a "pop-up" message, telling retail personnel when they are dealing with a wholesale account.

The Commission will require the Company to file a plan to remedy this service inadequacy, giving special consideration of the possibility of using the "pop-up" message discussed above.

**4. Qwest failed to adopt operational procedures to promptly acknowledge and take responsibility for mistakes in processing wholesale orders.**

Eschelon reports that the disconnected customer asked Eschelon to document its claim that Qwest's errors had caused the service outage; the company also reports that Qwest was dilatory and uncooperative in helping to provide this documentation. Eschelon submitted into the record its April 3 e-mail to Qwest urgently seeking a written statement explaining that Qwest's errors had caused the service outage. Qwest did not provide a comprehensible statement taking responsibility until April 16, in an e-mail to Eschelon. This is inadequate service.

Providing adequate wholesale service includes taking responsibility when the wholesale provider's actions harm customers who could reasonably conclude that a competing carrier was at fault. Without this kind of accountability and transparency, retail competition cannot thrive. Telecommunications service is an essential service, and few customers will transfer their service to a competitive carrier whose service quality appears to be inferior to the incumbent's.

The Commission will require the Company to file a plan to remedy this service inadequacy and to promptly acknowledge and take responsibility for mistakes in processing wholesale orders.

**B. Compliance Filing Required**

At hearing Qwest did not concede service inadequacy, but it did express openness to seeking cost-effective ways to improve its wholesale order processing procedures. Qwest, too, is clearly concerned that there be no repetition of the kinds of events that led to this filing. It seems clear, then, that the most promising way to proceed is to require Qwest to develop and submit proposals for remedying the service inadequacies identified in this case and to permit the parties to comment on those proposals.

The Commission will so order.

**C. Intervention-Mediation Process Issue Not Reached**

In its comments the Department of Commerce stated that it is always available to respond to inquiries from competitive carriers or from Qwest and that it is willing to work with the parties to establish a more defined mediation process if necessary. The parties stated that this adequately addresses their concerns, and the Commission concurs that no formal action is necessary at this time.

ORDER

1. Within 30 days of the date of this Order, Qwest shall make a compliance filing detailing its proposal for remedying the service inadequacies identified in this Order. This proposal shall include
  - (a) procedures for ensuring that retail service representatives are properly separated from the Company's wholesale operations, including a report on the feasibility of installing computer software to alert retail service representatives when they are dealing with wholesale orders or accounts and computer software to disable retail service representatives' ability to make changes in wholesale orders or accounts;
  - (b) procedures for promptly acknowledging and taking responsibility for mistakes in processing wholesale orders;
  - (c) procedures for reducing errors in processing wholesale orders, including a report on the feasibility of maximizing reliance on electronic processing, with an explanation of the necessity for each manual operation required for wholesale order processing.
2. Comments on the compliance filing shall be filed with 15 days of the date the compliance filing is made.
3. This Order shall become effective immediately.

BY ORDER OF THE COMMISSION

Burl W. Haar  
Executive Secretary

(S E A L)

1 (Whereupon, Exhibits 1 through 4 were  
 2 marked for identification by the court  
 3 reporter.)  
 4 JUDGE SHEEHY: Okay. Good morning,  
 5 everyone.  
 6 We are here this morning to start the  
 7 hearing in the Matter of Eschelon's Petition for  
 8 Arbitration with Qwest Corporation of an  
 9 Interconnection Agreement Pursuant to 47 U.S.C.  
 10 Section 252(b) of the Telecommunications Act of  
 11 1996.  
 12 I'm Kathleen Sheehy, I'm one of the ALJs  
 13 who's been assigned to work on this matter, and with  
 14 me is Judge Steve Mihalchick, who will also be  
 15 working on it.  
 16 And we can start off by noting  
 17 appearances of the parties. Mr. Topp.  
 18 MR. TOPP: Jason Topp, from Qwest, and  
 19 with me is Melissa Thompson, also from Qwest.  
 20 JUDGE SHEEHY: Do you have the same  
 21 address, Ms. Thompson, or a different one?  
 22 MS. THOMPSON: Yes, I have a different  
 23 address. It's 1801 California Street, 10th Floor,  
 24 Denver, Colorado 80202.  
 25 JUDGE SHEEHY: Okay. Mr. Merz.

Page 14

1 its mistakes other than in the context of wholesale  
2 service order processing?  
3 A I'd have to see the order before I could answer.  
4 Q You don't know?  
5 A I don't know without looking at the order. My  
6 reading of the order was that our obligation was on  
7 wholesale order process.  
8 Q And do you recall that the Commission just didn't  
9 address other kinds of mistakes that Qwest might  
10 make?  
11 A Again, I'd have to look at the order. I don't think  
12 so, I'd have to look at the order.  
13 Q You don't think the Commission did address other  
14 types of mistakes?  
15 A I'm not sure.  
16 Q The process for requesting an acknowledgment of  
17 mistakes that Qwest has agreed to that should be  
18 included in the ICA, that's not something that Qwest  
19 has put through its CMP to be included in the PCAT;  
20 is that right?  
21 A Not in this form, no.  
22 Q And Qwest hasn't agreed to the closed language that  
23 we have at 12.1.4 and the subparts, Qwest hasn't  
24 agreed to that language in any other state other  
25 than Minnesota; is that right?

Page 15

1 A That's correct.  
2 Q Now, in your rebuttal, at page 40, line 10.  
3 A Yes. Under Qwest technical publications?  
4 Q Your rebuttal.  
5 A Oh, my rebuttal.  
6 Q Reply, rebuttal, it's the second round of testimony.  
7 You're discussing here on page 40 the Commission  
8 order that we've been talking about; is that right?  
9 A Yes.  
10 Q And at line 10 you say, The settlement was between  
11 Qwest and Eschelon; do you see that?  
12 A Yes.  
13 Q Now, it was not a settlement, it was actually a  
14 Commission order that required Qwest to acknowledge  
15 its mistakes; correct?  
16 A Yes.  
17 Q Now, the acknowledgment of mistakes process that  
18 Qwest is agreeable to having included in the ICA is  
19 one that would only be available to Eschelon and to  
20 CLECs that opted into the Eschelon contract; is that  
21 right?  
22 A Yes.  
23 Q And it's a process that would only be available in  
24 Minnesota; is that right?  
25 A Yes.

Page 16

1 Q Would you describe that as a one-off process, as  
2 you've used that phrase in your testimony?  
3 A In this case, yes, I would.  
4 Q And that's a one-off process that Qwest is agreeable  
5 to; correct?  
6 A We agree because of the results of the case, yes.  
7 Q Go to your surrebuttal at page 18. And I'm focusing  
8 on the testimony that begins at line 24 and then  
9 goes over to page 19 through line 7.  
10 A Okay. My surreply, page 18, starting where?  
11 Q Starting at line 24.  
12 A Okay.  
13 Q And then carrying onto the next page through line 7.  
14 So that question and answer there.  
15 A Okay.  
16 Q You are there responding to an example that was  
17 provided by Mr. Webber regarding what he described  
18 as an improper communication between Qwest and one  
19 of Eschelon's customers; is that right?  
20 A Yes.  
21 Q And you say there in your answer that begins  
22 on page -- I'm sorry, line 5 of page 19, Because  
23 Qwest provides services to this customer as well as  
24 Eschelon, Qwest has a right to communicate with its  
25 customer; do you see that?

Page 17

1 A Yes.  
2 Q Now, you understand that the concern that Mr. Webber  
3 was raising, that you were responding to, was not  
4 just a fact in communication, but what Qwest told  
5 Eschelon's customer. You understand that, don't  
6 you?  
7 A Yes, I do.  
8 Q Now, what Qwest told Eschelon's customer that was of  
9 concern was that the customer's service was being  
10 disconnected at Eschelon's request; correct?  
11 A I'd have to go back and look at the exhibit for the  
12 specifics.  
13 Q You would acknowledge that the letter that  
14 Mr. Webber refers to in his testimony was in fact a  
15 mistake on the part of Qwest; correct?  
16 A Without reviewing the exhibit I'd say I think so.  
17 I'd have to look at the exhibit.  
18 Q Why don't you go to, actually, Ms. Johnson's  
19 testimony, it's Exhibit BJJ-21.  
20 A All right.  
21 Q And I could tell you which -- and BJJ-21 is part of  
22 Ms. Johnson's rebuttal testimony?  
23 A Yes.  
24 Q That exhibit is the text of an e-mail from Jean  
25 Novak; correct?

Page 22	<p>1 Q Now, this was in your surreply, you were aware at</p> <p>2 the time you did your surreply that Eschelon had</p> <p>3 revised its language for 12.1.5.5; correct?</p> <p>4 A I'm not sure.</p> <p>5 Q If you could go to Mr. Webber's direct testimony.</p> <p>6 A Okay.</p> <p>7 Q And I'm looking at page 69.</p> <p>8 A Okay.</p> <p>9 Q And you see there at lines 16 through 23 of</p> <p>10 Mr. Webber's direct testimony at page 69 Eschelon's</p> <p>11 revised proposal for 12.1.5.5; correct?</p> <p>12 A Yes.</p> <p>13 Q And he has added to that provision, or otherwise to</p> <p>14 initiate discussions of its products and services</p> <p>15 with CLEC's end user customer; correct?</p> <p>16 A Yes.</p> <p>17 Q You say in your surrebuttal at page 21, lines 19</p> <p>18 through 21, if a customer asks a Qwest</p> <p>19 representative directly and on his or her own</p> <p>20 initiative about Qwest's products and services, the</p> <p>21 representative has a right to answer; correct?</p> <p>22 A Yes.</p> <p>23 Q And Eschelon's proposal, as reflected in</p> <p>24 Mr. Webber's direct testimony, would allow a Qwest</p> <p>25 employee to answer a communication initiated by the</p>	Page 24	<p>1 of Qwest's business; correct?</p> <p>2 A Yes.</p> <p>3 Q And Qwest's tariff includes expedite terms; is that</p> <p>4 right?</p> <p>5 A Yes.</p> <p>6 Q Now, in your surrebuttal at page 23, lines 10</p> <p>7 through 23, the discussion there involves a</p> <p>8 comparison of Qwest's retail expedite service to the</p> <p>9 expedite service that Qwest offers to CLECs; is that</p> <p>10 right?</p> <p>11 A Yes.</p> <p>12 Q And you conclude there that because retail customers</p> <p>13 would pay more than CLECs to receive service in the</p> <p>14 same time frame, that the service that Qwest</p> <p>15 provides to CLECs is superior; is that right?</p> <p>16 A Yes, that's one basis for superior service, yes.</p> <p>17 Q And because it's in your view superior service, you</p> <p>18 believe that expedite service is not an unbundled</p> <p>19 network element, or access to unbundled network</p> <p>20 elements; is that correct?</p> <p>21 A And both because we have examples of shorter</p> <p>22 intervals for CLECs versus retail customers, but</p> <p>23 also because what we are measured on for the</p> <p>24 provisioning of a UNE, giving a CLEC a meaningful</p> <p>25 opportunity to compete is based on our standard</p>
Page 23	<p>1 customer; correct?</p> <p>2 A Well, that's sort of the reverse of what the</p> <p>3 language says. The language says the Qwest</p> <p>4 technician can't initiate the discussion.</p> <p>5 Q And you don't understand that to mean, then, that if</p> <p>6 the customer does initiate a discussion, the Qwest</p> <p>7 customer -- the Qwest technician can have the</p> <p>8 communication?</p> <p>9 A That should be the result.</p> <p>10 Q Now to jump to a different issue. It's expedites,</p> <p>11 issue 12-67. The issue here concerns the terms</p> <p>12 under which Qwest will provide Eschelon with</p> <p>13 expedited service; is that right?</p> <p>14 A Yes.</p> <p>15 Q And expedited service concerns providing service</p> <p>16 more quickly than would ordinarily be the case under</p> <p>17 the regular interval; is that right?</p> <p>18 A Yes.</p> <p>19 Q Now, in your surrebuttal at page 23, and I'm looking</p> <p>20 in particular at lines 6 through 8, you characterize</p> <p>21 expedited service as a superior service; is that</p> <p>22 right?</p> <p>23 A Yes.</p> <p>24 Q Now, expedited service is a service that Qwest</p> <p>25 provides to its retail customers as a routine part</p>	Page 25	<p>1 intervals, that's what we're measured on, and</p> <p>2 expedite shortens the standard interval. That makes</p> <p>3 it superior to what we're measured on for giving a</p> <p>4 meaningful opportunity to compete.</p> <p>5 Q So if I understand, there are two reasons. The</p> <p>6 price difference; is that right?</p> <p>7 A The price difference resulting from the shorter</p> <p>8 interval in the first place, yes.</p> <p>9 Q Now, I want to focus now on that first thing, the</p> <p>10 price difference, just for a minute. You would</p> <p>11 agree that the tariffed rate for DS1 private line</p> <p>12 service, not expedited, is higher than the</p> <p>13 Commission-approved rate for a DS1 UNE loop; right?</p> <p>14 A I imagine it is, I don't know that for sure.</p> <p>15 Q You would not conclude, based on the fact that the</p> <p>16 price is higher for the private line than it is for</p> <p>17 the loop, that a private line -- a DS1 private line</p> <p>18 isn't -- I'm sorry, let me start again.</p> <p>19 You would not conclude based on that</p> <p>20 price difference that the DS1-capable loop isn't a</p> <p>21 UNE; would you?</p> <p>22 A It's not based on the price that we're claiming it's</p> <p>23 not a UNE, so that doesn't follow.</p> <p>24 Q And I understood you to say that there were two</p> <p>25 reasons, one was the price difference, and then the</p>

Page 26	<p>1 fact that you're measured on installation intervals?</p> <p>2 A We're measured on installation intervals for UNEs as</p> <p>3 a basis for whether the CLEC is given a meaningful</p> <p>4 opportunity to compete. On the price difference</p> <p>5 we're claiming that CLECs are actually getting this</p> <p>6 superior service, which we also offer to our retail</p> <p>7 customers, more cheaply than our retail customers</p> <p>8 because their intervals are shorter, yes.</p> <p>9 Q So the price difference is what makes it a superior</p> <p>10 service?</p> <p>11 A That's part of it, but it's not really because of</p> <p>12 the price difference, it's because of a shorter</p> <p>13 interval that results in a lower price.</p> <p>14 Q You would not claim that the fact that there's a</p> <p>15 difference in price means that the lower priced</p> <p>16 service is a superior service for purposes of</p> <p>17 whether that service is a UNE?</p> <p>18 A No. That's not what I'm saying.</p> <p>19 Q Okay. Now, Qwest modified its expedite service</p> <p>20 through CMP; is that correct?</p> <p>21 A Yes. Several times.</p> <p>22 Q And one way that it was modified was that the no</p> <p>23 additional fee expedite that was available under</p> <p>24 emergency circumstances was no longer available for</p> <p>25 expediting the loop order; is that right?</p>	Page 28	<p>1 Q Can you explain why?</p> <p>2 A Well, I would defer to Ms. Million to explain how</p> <p>3 these costs are done.</p> <p>4 Q Okay. So that's her issue, I should ask her about</p> <p>5 that?</p> <p>6 A Yes.</p> <p>7 Q Fair enough. I'm going to talk with you now about</p> <p>8 the PSON, that's the pending service order</p> <p>9 notification, and it's issue 12-70, ICA sections</p> <p>10 12.2.7.2.3.</p> <p>11 The PSON is a notice that Qwest provides</p> <p>12 to Eschelon that Eschelon can use to confirm that</p> <p>13 Qwest's internal order complies with the order that</p> <p>14 Eschelon has made; is that right?</p> <p>15 A To Eschelon and any other CLEC that has subscribed,</p> <p>16 yes.</p> <p>17 Q And the reason -- that kind of verification, the</p> <p>18 reason Eschelon does that kind of verification is</p> <p>19 because if there is an error in the Qwest internal</p> <p>20 order, Eschelon and Eschelon's customer won't get</p> <p>21 what they want; correct?</p> <p>22 A That may be one reason, yes.</p> <p>23 Q And in fact an error may even result in a customer</p> <p>24 losing service altogether; correct?</p> <p>25 A That's a possibility. It would depend on how the</p>
Page 27	<p>1 A For designed services a loop is one, yes.</p> <p>2 Q No CLEC supported that change; is that right?</p> <p>3 A I don't think I would agree with that.</p> <p>4 Q Was there any CLEC that said we want to pay a charge</p> <p>5 for something that we used to be getting for free?</p> <p>6 A No, I wouldn't put it that way, no.</p> <p>7 Q But Qwest did it anyway, even though no CLEC was</p> <p>8 asking for that?</p> <p>9 A No, but Qwest found that it had to do that so that</p> <p>10 all orders wouldn't be expedited because the system</p> <p>11 was being abused.</p> <p>12 Q And not only did no CLEC ask for that change, no</p> <p>13 CLEC was in favor of that change; correct?</p> <p>14 A I would say that if there was a CLEC in favor they</p> <p>15 didn't speak up.</p> <p>16 Q And the ones that did speak up objected to the</p> <p>17 change?</p> <p>18 A Yes, I would agree with that.</p> <p>19 Q You agree with me that a \$200 per day expedite rate</p> <p>20 is not a cost-based rate; correct?</p> <p>21 A It's not intended to be.</p> <p>22 Q You agree that it doesn't cost Qwest any more to</p> <p>23 expedite the service by four days than it does by</p> <p>24 two days; would you agree with that?</p> <p>25 A No, I wouldn't.</p>	Page 29	<p>1 order was written.</p> <p>2 Q Now, Eschelon's proposal relating to the PSON is</p> <p>3 that Qwest continue to provide at least the data in</p> <p>4 its service and equipment and listings sections; is</p> <p>5 that right? Continuing to provide the data it's</p> <p>6 providing now in those sections?</p> <p>7 A From those sections, yes.</p> <p>8 Q Eschelon's proposal doesn't require Qwest to provide</p> <p>9 anything more than it's providing now; correct?</p> <p>10 A The current proposal doesn't, that's correct.</p> <p>11 Q And Eschelon in fact revised its proposal to make</p> <p>12 that crystal clear; isn't that right?</p> <p>13 A Yes.</p> <p>14 Q Eschelon's proposal also doesn't permit Qwest from</p> <p>15 providing information in addition to the information</p> <p>16 that it provides now; correct?</p> <p>17 A Correct.</p> <p>18 Q And it doesn't require the PSON to be in any</p> <p>19 particular format; does it?</p> <p>20 A I'm not sure I would agree with that.</p> <p>21 Q Well, if you'd turn to section 12.2.7.2.3.</p> <p>22 A Yes.</p> <p>23 Q And if you could tell me what language there you</p> <p>24 believe requires the PSON to be provided in some</p> <p>25 particular format?</p>

Page 34

1 your testimony; correct?  
 2 A Yes, you're right.  
 3 Q Was that testimony just in error?  
 4 A Not well worded. It goes into detail on the  
 5 processing or handling of a fatal rejection notice.  
 6 Q It goes into detail about what will happen when  
 7 Qwest makes a mistake in issuing a fatal rejection  
 8 notice?  
 9 A Yes.  
 10 Q 12.2.7.2.6.1, that's the provision just above the  
 11 provision we've been talking about; do you see that?  
 12 A Yes.  
 13 Q The black line there is agreed upon closed language;  
 14 correct?  
 15 A Yes.  
 16 Q And that describes what happens if a CLEC receives a  
 17 fatal rejection notice?  
 18 A Yes.  
 19 Q It talks about what the CLEC has to do?  
 20 A Yes.  
 21 Q Would you agree with me that 12.2.7.2.6.2 is  
 22 effectively the counterpart of the preceding  
 23 provision that talks about what the CLEC has to do?  
 24 A Yes.  
 25 Q Now, Eschelon's proposal, 12.2.7.2.6.2, Qwest has

Page 36

1 reflect the reason why the due date might be missed;  
 2 is that right?  
 3 A Yes.  
 4 Q Now, a jeopardy might be the fault of Qwest or it  
 5 might be the fault of the CLEC or it might be the  
 6 fault of the CLEC customer; is that right?  
 7 A Or it might be because facilities aren't available.  
 8 There's a list of reasons.  
 9 Q A jeopardy that's caused by the CLEC or the CLEC's  
 10 customer is classified as a customer not ready  
 11 jeopardy; is that right?  
 12 A Generically, I would say, yes.  
 13 Q And those are sometimes referred to as CNR  
 14 jeopardies; is that right?  
 15 A Yes.  
 16 Q Now, one consequence of a CNR jeopardy is that  
 17 Eschelon has to supplement its order in order to  
 18 request a later due date; is that right?  
 19 A Yes.  
 20 Q Okay. And the minimum due date is three days from  
 21 the date the supplemental order is placed; is that  
 22 right?  
 23 A I think that's only under specific circumstances, I  
 24 don't believe that's always true. I think that's  
 25 for designed orders.

Page 35

1 not proposed any alternative language for that  
 2 provision; is that correct?  
 3 A That's correct. Although I would point out the  
 4 entire proposal was Eschelon's proposal, both  
 5 paragraphs.  
 6 Q And you were agreeable to the part that said what  
 7 CLECs had to do, but not agreeable to the part that  
 8 said what Qwest had to do?  
 9 A Well, we were trying to come to agreement on some of  
 10 these paragraphs, we didn't want this kind of  
 11 processing detail in the first place.  
 12 Q And so your proposal with respect to what Qwest will  
 13 do when it rejects an order in error is to send that  
 14 off to the PCAT; is that right?  
 15 A Yes. That's where the processing details are dealt  
 16 with.  
 17 Q I'm going to shift gears again now and talk about  
 18 jeopardy notices, and those are sections 12-71, 72,  
 19 and 73. I'm sorry, issues 12-71, 72, and 73, it's  
 20 section of the ICA 12.2.7.2.4.4 and its subparts.  
 21 Qwest gives a jeopardy notice when a due  
 22 date for an order is in danger of being missed; is  
 23 that right?  
 24 A Yes.  
 25 Q And there are various kinds of jeopardies that

Page 37

1 Q Loops would be a designed order?  
 2 A Loops, yes.  
 3 Q And FOC is a firm order confirmation; is that right?  
 4 A Yes.  
 5 Q And that is a notice to the CLEC of the due date for  
 6 an order; correct?  
 7 A Among other things, yes.  
 8 Q Looking at your surreply testimony at page 33, lines  
 9 8 through 13 -- 12, I guess.  
 10 A Yes.  
 11 Q You say there that Eschelon's proposal does not  
 12 reflect Qwest's current practice because it adds the  
 13 phrase at least a day to when Qwest will provide a  
 14 FOC following a Qwest jeopardy?  
 15 A At least a day before, yes.  
 16 Q Other than that phrase, at least a day before, is  
 17 Eschelon's proposal consistent with Qwest's  
 18 practice?  
 19 A Current practice, yes, except for that sentence.  
 20 Q So you agree with me that Qwest's current practice  
 21 is to provide the CLEC with an FOC after a Qwest  
 22 facilities jeopardy has been cleared; is that right?  
 23 A Yes.  
 24 Q And the reason for that is you want to let the CLEC  
 25 know that the CLEC should be expecting to receive

Page 38

1 the circuit; right?  
 2 A Yes.  
 3 Q And the CLEC needs to have personnel available and  
 4 it needs to also perhaps make arrangements with the  
 5 customer to have the premises available; right?  
 6 A Yes.  
 7 Q Now, you would agree with me that if Qwest doesn't  
 8 provide an FOC, it can't reasonably expect that  
 9 Eschelon would be ready to accept the circuit; is  
 10 that right?  
 11 A Unless Qwest is already in contact with the  
 12 technician on site.  
 13 Q Well, the FOC is the agreed upon process on which --  
 14 A Yes, it is.  
 15 Q You have to let me finish my question.  
 16 A Sure.  
 17 Q The FOC is the agreed upon process by which Qwest  
 18 informs Eschelon of the due date for a circuit?  
 19 A Yes.  
 20 Q Now, you are aware that Eschelon has complained  
 21 about Qwest's failure to follow its process and  
 22 provide an FOC prior to trying to deliver the  
 23 circuit; is that right?  
 24 A I'm aware that has happened in this testimony, yes.  
 25 Q You weren't aware of any complaints that Eschelon

Page 40

1 some additional narrative that you believe explains  
 2 the situation; is that right?  
 3 A It was additional narrative available on these  
 4 orders through our systems, yes.  
 5 Q Now, you would agree with me that of the 23  
 6 instances identified by Ms. Johnson in her  
 7 testimony, 15 of those instances involved Qwest  
 8 failing to provide any FOC at all; correct? And I  
 9 mean following the original jeopardy notice.  
 10 A I'm not sure. I'd have to count how many of those  
 11 that would apply to.  
 12 Q Well, you can go ahead and do that.  
 13 A Thank you. I would say that's definitely true for  
 14 eight, for five it's not clear.  
 15 JUDGE SHEEHY: Okay. Can I just note for  
 16 the record that to answer that question  
 17 Ms. Albersheim --  
 18 THE WITNESS: I did mark the exhibit.  
 19 JUDGE SHEEHY: -- looked at the exhibit  
 20 and made some checkmarks and doodles, so if any ink  
 21 marks are on the exhibit those are hers.  
 22 THE WITNESS: Sorry about that.  
 23 JUDGE SHEEHY: That's all right, just so  
 24 it's clear where it came from. So you're saying  
 25 eight?

Page 39

1 had raised in the past regarding that issue?  
 2 A If you mean a formal complaint to a commission, no.  
 3 Q And I didn't necessarily mean that. I meant  
 4 Eschelon has approached Qwest to say you're not  
 5 complying with your process regarding an FOC, you're  
 6 aware that those kinds of communications have taken  
 7 place?  
 8 A Yes.  
 9 Q Go to your Exhibit RA-30, which I think is probably  
 10 part of your reply testimony in the second round.  
 11 A Do you mean the trade secret version?  
 12 Q Yes, I do. And I don't think I'll be asking any  
 13 trade secret questions so I think we'll be fine.  
 14 A Okay.  
 15 Q You prepared this exhibit to respond to an exhibit  
 16 that was included in Ms. Johnson's testimony; is  
 17 that right?  
 18 A Yes.  
 19 Q And in Ms. Johnson's testimony she provided 23  
 20 examples of instances where an FOC either wasn't  
 21 provided at all or wasn't provided at least a day  
 22 before Qwest tried to deliver the circuit; is that  
 23 right?  
 24 A Right.  
 25 Q And what you're doing in RA-30 is you're providing

Page 41

1 THE WITNESS: Eight.  
 2 JUDGE SHEEHY: Eight of 23, no FOC  
 3 provided.  
 4 BY MR. MERZ:  
 5 Q And you say five aren't clear?  
 6 A Five aren't clear.  
 7 Q What about the other two?  
 8 A Well, this is my tally.  
 9 Q All right, fair enough.  
 10 A What I found were notes in these that indicated  
 11 whether or not an FOC was sent. To be definitive  
 12 about it we'd have to go back to our systems and  
 13 look for the FOC messages in our archives.  
 14 Q And so you're looking at your notes to figure out  
 15 whether or not an FOC was sent?  
 16 A Yes.  
 17 Q Now, when you went back and prepared this chart, you  
 18 didn't go back to whatever you had to look at to  
 19 figure out whether an FOC had been sent?  
 20 A We didn't go back to the FOC archives, we went to  
 21 the technician's notes about what happened in these  
 22 instances.  
 23 JUDGE SHEEHY: Okay. And that's  
 24 Exhibit 30?  
 25 MR. MERZ: RA-30.

Page 42

1 JUDGE SHEEHY: To your -- is it reply or  
2 rebuttal, what are we calling it?  
3 THE WITNESS: Reply.  
4 JUDGE SHEEHY: Reply? Okay.  
5 THE WITNESS: Yes.  
6 BY MR. MERZ:  
7 Q Now, one of the things that you say is that  
8 Eschelon's language regarding jeopardy notices is  
9 unnecessary because the issue is already  
10 sufficiently covered by the PIDs; is that right?  
11 A Well, that's part of it. It's also because these  
12 procedures are handled through our PCATs.  
13 Q One of the PIDs that you say addresses this issue is  
14 PID OP-4 regarding installation intervals; is that  
15 right? And if you want to refer to something, you  
16 identify it in your direct testimony at page 68.  
17 A Okay.  
18 Q If that helps.  
19 A Yes.  
20 Q Now, PID OP-4 -- you've actually attached the PIDs  
21 to your testimony as Exhibit RA-14; is that right?  
22 To your direct testimony?  
23 A Yes.  
24 Q PID OP-4 excludes from its coverage orders with  
25 customer requested due dates greater than a current

Page 43

1 standard interval; is that right? And I'm looking  
2 at Exhibit RA-14, page 39.  
3 A And what was your question?  
4 Q My question is whether PID OP-4 excludes orders with  
5 customer requested due dates greater than the  
6 current standard interval?  
7 A Yes.  
8 Q Now, in the case of the CNR jeopardy Eschelon has to  
9 supplement its order to request a new due date;  
10 isn't that right?  
11 A Yes.  
12 Q So any time there is a CNR jeopardy, the due date is  
13 always going to be longer than the standard  
14 interval; isn't that right?  
15 A I wouldn't say always. I'd say probably.  
16 Q Almost always?  
17 A Yeah.  
18 Q Unless the initial due date was expedited pretty  
19 significantly?  
20 A The initial -- I'm not sure I'd agree with that.  
21 Q Well, suffice it to say that OP-4 is going to  
22 exclude almost all of the instances where there's a  
23 CNR jeopardy; correct?  
24 A That's likely, yes.  
25 Q Okay. And then in your surrebuttal at page 34 you

Page 44

1 identify another PID, PO-5; is that right?  
2 A Yes, in a different context.  
3 Q Okay. And this one you're saying is a PID that  
4 provides Qwest with an incentive to provide firm  
5 order confirmation on time; is that right?  
6 A Yes.  
7 Q Now, PO-5 measures the time between the order and  
8 the FOC, not the time between the FOC and when --  
9 how far in advance of the delivery date that FOC is  
10 provided; is that right?  
11 A Right.  
12 Q Let me ask it again. My question was terrible.  
13 PID PO-5 measures the time between the  
14 order and the FOC; correct?  
15 A Yes.  
16 Q What Eschelon is concerned about with these jeopardy  
17 notice provisions is that it gets enough notice in  
18 advance of when Qwest attempts to deliver the due  
19 date -- deliver the service; correct?  
20 A Yes.  
21 Q PID PO-5 wouldn't address that issue at all; would  
22 it?  
23 A I wouldn't say at all. It is a measure of whether  
24 or not an FOC is delivered on time. It can include  
25 whether or not it's delivered on time for a jeopardy

Page 45

1 order.  
2 Q But it doesn't measure that, it doesn't measure --  
3 A Not specifically, no, it's part of -- it's a subset.  
4 Q And it doesn't measure whether the FOC provides the  
5 CLEC with notice in advance of when the circuit is  
6 delivered?  
7 A That's not its intent, its intent is to measure the  
8 delivery of the FOC.  
9 Q Now I want to talk with you about loss of completion  
10 reports, which is issue 12-76, and it's ICA sections  
11 12.3.7.1.1 and 12.3.7.1.2. And it might be helpful  
12 if you just turn to those sections, 12.3.7.1.1.  
13 A I'm there.  
14 Q Okay. Eschelon's proposal describes the minimum  
15 amount of information that must be contained in the  
16 loss of completion reports; is that right?  
17 A For Eschelon's request, yes.  
18 Q And it doesn't prevent Qwest from providing  
19 information in addition to the minimum amount of  
20 information that's described there; is that right?  
21 A That's correct.  
22 Q And Eschelon's proposal doesn't require the loss of  
23 completion report to be in any particular format;  
24 does it?  
25 A No, but it does require those reports with that

Page 54

1 A Yes.  
 2 Q The time that you're referring to is the time of the  
 3 one-word change; right?  
 4 A The timing is coincidental, yes. And as I said up  
 5 above, Mr. Hubbard explains that there were  
 6 differences -- first of all, in the word  
 7 conditioning and what that meant, but also other  
 8 events took place at the same time. And in fact  
 9 when he showed me that e-mail I believe that even  
 10 Qwest employees were a bit confused as to cause and  
 11 effect.  
 12 Q Did you talk with Ms. Dubuque about her e-mail?  
 13 A No. I'm not sure she's still employed at Qwest.  
 14 Q Did you talk to anybody that was involved in  
 15 investigating Eschelon's held orders in the mid-2003  
 16 time frame?  
 17 A Yes.  
 18 Q Who did you talk to?  
 19 A Well, several different people. There were a number  
 20 of meetings discussing this to find out exactly what  
 21 happened.  
 22 Q You refer in your testimony to construction being  
 23 outside of process; is that right?  
 24 A Yes. And I can't get more specific, it would have  
 25 to be Mr. Hubbard.

Page 55

1 Q So Qwest changed its PCAT in order to conform to its  
 2 process? Do you know whether that's the case?  
 3 A The CRUNEC PCAT?  
 4 Q Yeah.  
 5 A I don't think that's correct. I believe what Qwest  
 6 corrected was its process itself.  
 7 Q There was a one-word change made to the CRUNEC PCAT?  
 8 A Yes.  
 9 Q And the reason for the change was because Qwest was  
 10 constructing out of process; is that right?  
 11 A I believe it was intended to be a clarification.  
 12 The out of process was a different issue. That's  
 13 what I'm saying, several things were happening at  
 14 the same time.  
 15 Q When you say at the same time, what do you mean by  
 16 that? In the mid-2003?  
 17 A Yes.  
 18 Q In your reply testimony at page 24, lines 8 through  
 19 9, you say this whole issue was the result of the  
 20 fact that Qwest was receiving conflicting feedback  
 21 from its CLEC customers; correct?  
 22 A Yes.  
 23 Q And in support of that claim you cite a comment by  
 24 Eschelon that was made in CMP; is that right?  
 25 A Yes. But we've changed issues a little bit. This

Page 56

1 is a discussion about whether or not rates are dealt  
 2 with in ASCENT, not just about CRUNEC.  
 3 Q Well, in the preceding question and answer you're  
 4 talking about a percentage decline in Eschelon's  
 5 held orders in response to Mr. Starkey saying that  
 6 held orders went up; correct?  
 7 A Yes.  
 8 Q And then in the next question and answer you're  
 9 saying this whole issue was the result of the fact  
 10 that Qwest was receiving conflicting feedback?  
 11 A Yes, that answer is in response to my question, in  
 12 which Mr. Starkey states on page 56 of his testimony  
 13 that rates are outside the scope of CMP. So in this  
 14 discussion I'm speaking about rates.  
 15 Q The particular comment that you reference in your  
 16 testimony on page 24 is a comment that was made in  
 17 September of 2004; correct? And it's attached as  
 18 Exhibit RA-25, if you'd like to look at it.  
 19 A Yeah, let me look. Yes.  
 20 Q You would agree with me that a change that Qwest  
 21 noticed and Eschelon commented on in September of  
 22 2004 did not have the effect of causing Eschelon to  
 23 experience an increase in held orders in July of  
 24 2003?  
 25 A That's not what this -- this response in my question

Page 57

1 and response was about.  
 2 Q That just wasn't what you were intending?  
 3 A That's not what I was speaking about, no.  
 4 MR. MERZ: If I could have just a minute.  
 5 I don't have any further questions for the witness.  
 6 Thank you.  
 7 JUDGE SHEEHY: Ms. Anderson.  
 8 MS. ANDERSON: Thank you.  
 9 CROSS-EXAMINATION  
 10 BY MS. ANDERSON:  
 11 Q Good morning, Ms. Albersheim.  
 12 A Good morning.  
 13 Q Let me refer you to your direct testimony at page 3,  
 14 please. I'm looking specifically at lines 10  
 15 through 12. You state, do you not, that in this  
 16 testimony, meaning your direct testimony, you state,  
 17 quote, I will demonstrate that the underlying theme  
 18 of these issues is an attempt by Eschelon to freeze  
 19 Qwest's process and procedures in the parties'  
 20 contract, thus undermining the change management  
 21 process, or CMP. Did I read that correctly?  
 22 A Yes.  
 23 Q I have several questions just to explore your view  
 24 with respect to the effect of Eschelon's proposed  
 25 language on several issues. All right?

Page 90

1 compared to this language and would likely be  
 2 rejected if they conflict with the way we do it  
 3 today.  
 4 Q Ms. Anderson mentioned, or she asked you, you know,  
 5 do other CLECs want this same language, you know,  
 6 would they be willing to accept the same language  
 7 since it's Qwest current practice. Is that true for  
 8 all of these issues, including, for example, we did  
 9 touch on jeopardies, would that be true for  
 10 jeopardies, for example?  
 11 A Well, first of all, what Eschelon proposes for  
 12 jeopardies is not our current practice. And I am  
 13 not certain that CLECs would all agree to hold  
 14 the -- require that an FOC be sent at least a day  
 15 before the new due date because that could cause an  
 16 order to be delivered late.  
 17 Q With respect to the exhibit that Mr. Merz -- and I  
 18 think it was Mr. Merz referred to, that was  
 19 submitted by Bonnie Johnson, I think it was BJJ-23.  
 20 Maybe -- I think I'm off on the 23. This has to do  
 21 with the 23 examples in her exhibit with respect to  
 22 jeopardies and FOCs.  
 23 A Yes.  
 24 Q I think Mr. Merz had you look at that exhibit.  
 25 A Yes.

Page 92

1 issue; correct?  
 2 A Partly. We're also talking about a procedure for  
 3 delivering an FOC in response to a jeopardy.  
 4 Q Isn't it the case that under Eschelon's language the  
 5 issue is, if Qwest fails to provide the FOC at least  
 6 a day before delivery, it won't classify the  
 7 jeopardy as a CNR jeopardy if the CLEC isn't able to  
 8 take the circuit? Isn't that the issue that the  
 9 Eschelon language is designed to deal with?  
 10 A No, I disagree. Because the classification of the  
 11 jeopardy happens at the time that the jeopardy is  
 12 issued, and we're talking about when an FOC is  
 13 delivered in response to a jeopardy, so these are  
 14 two different things.  
 15 Q Just to make sure we understand the sequence of  
 16 events. Qwest gives an initial jeopardy notice  
 17 saying we don't have facilities, we don't believe  
 18 we're going to be able to deliver on the due date.  
 19 A Okay.  
 20 Q That's the first thing that happens. The second  
 21 thing that happens is Qwest then discovers it has  
 22 facilities, it is going to be able to deliver, and  
 23 the Qwest process at that point is to provide an  
 24 FOC; correct?  
 25 A I think we're missing some steps, but I would say

Page 91

1 Q So what would the ramification be, even with respect  
 2 to those examples, if the Commission adopted  
 3 Eschelon's proposed language?  
 4 A Well, depending on the date in which the service was  
 5 delivered, if it was delivered on time, in this case  
 6 on the due date, it would have been forced to be  
 7 late, it would be delivered a day after the due  
 8 date, and I can't imagine that all CLECs would want  
 9 that kind of delay built in because that then forces  
 10 them to be late with delivering service to their end  
 11 user customers. And the ultimate goal is to be on  
 12 time with delivery. And what seems to have been  
 13 missed in reviewing these examples is that there was  
 14 communication ongoing between Qwest and the CLEC  
 15 technicians and that helped get the service  
 16 delivered.  
 17 MS. THOMPSON: That's all I have. Thank  
 18 you.  
 19 JUDGE SHEEHY: Mr. Merz.  
 20 MR. MERZ: Thank you, Your Honor.  
 21 RECROSS-EXAMINATION  
 22 BY MR. MERZ:  
 23 Q We were just talking about the jeopardy issue.  
 24 Really we're not talking about a jeopardy issue,  
 25 we're talking about a classification of jeopardy

Page 93

1 yes. The process includes an FOC, yes.  
 2 Q And the reason the process includes an FOC is  
 3 because Qwest needs to tell the CLEC to be ready to  
 4 expect the circuit?  
 5 A Yes, that's the formal way of notification, yes.  
 6 Q And what Eschelon's language is doing, at least in  
 7 part, is saying if you don't give that FOC at least  
 8 a day before you're ready to deliver the circuit,  
 9 and then we're not able to take the circuit, you're  
 10 not going to call that a CNR; correct?  
 11 A No.  
 12 Q That's not correct?  
 13 A No, because that would require a change in the  
 14 jeopardy status later. The jeopardy is classified  
 15 when the jeopardy is issued.  
 16 Q There's not a separate jeopardy if Qwest then tries  
 17 to deliver the circuit, it doesn't treat that as a  
 18 CNR jeopardy?  
 19 A Oh, I see. If you're talking about a subsequent  
 20 jeopardy, yes, that would be a CNR jeopardy.  
 21 Q Well, and if Qwest clears the jeopardy and tries to  
 22 deliver the circuit and the CLEC is not ready, Qwest  
 23 is going to treat that as a CNR jeopardy; correct?  
 24 A Yes.  
 25 Q And what Eschelon is saying is, look, if you haven't

Page 94

1 told us the circuit is coming, you can't treat that  
 2 as a CNR jeopardy; right?  
 3 A Yes.  
 4 Q And Qwest disagrees with that; is that correct?  
 5 A We don't disagree with the notion that a CNR  
 6 jeopardy should be assigned appropriately.  
 7 Q And if the CLEC doesn't have adequate notice that  
 8 the circuit is being delivered, adequate notice  
 9 consisting of an FOC, then you would agree that a  
 10 CNR jeopardy is not appropriate; correct?  
 11 A Yes.  
 12 Q And you would also agree that not only do you need  
 13 the FOC, but you need the FOC in enough time to be  
 14 able to act on it; correct?  
 15 A I would agree with that. I would submit, though,  
 16 that in the examples provided we only found three  
 17 cases where we classified a subsequent jeopardy as a  
 18 CNR, in error, and that is mostly because the  
 19 service was delivered. And communication was  
 20 happening between Qwest and the CLEC technicians.  
 21 Q In all of the examples identified by Ms. Johnson,  
 22 the 23 examples that you reviewed, all of those were  
 23 instances that Qwest classified as CNR jeopardies;  
 24 correct?  
 25 A Are you talking about jeopardies in the first

Page 96

1 FOC nine minutes before attempting to deliver a  
 2 circuit that that wouldn't be adequate notice;  
 3 correct?  
 4 A I don't think we're looking at all the  
 5 circumstances, because in those situations in that  
 6 Exhibit --  
 7 Q Are you able to answer my question?  
 8 A It might be adequate notice if we're in  
 9 communication and on site with the technician, which  
 10 was the case in some of these circumstances.  
 11 Q Are you saying that the CLEC ought to be relying on  
 12 something other than the official notice, the FOC  
 13 that it receives from Qwest, as the indication of  
 14 when the circuit is going to be delivered?  
 15 A For a formal process, no. But it also doesn't make  
 16 sense if we're in communication with each other and  
 17 the circuit can be accepted not to install the  
 18 circuit and have it done on time.  
 19 Q You understand Eschelon is not saying you should  
 20 delay the circuit in order to give us an FOC, what  
 21 they're saying is if you don't give us an FOC don't  
 22 treat it as a CNR jeopardy?  
 23 A That's not spelled out in these terms.  
 24 Q So we disagree about that?  
 25 A Yes, we do disagree.

Page 95

1 instance or subsequent jeopardies?  
 2 Q At any point.  
 3 A I'm not certain on that. I'd have to go back and  
 4 look at the data. I understood that a little bit  
 5 differently.  
 6 Q Would you agree that if Qwest didn't provide an FOC  
 7 following an initial jeopardy, that it would be  
 8 improper to subsequently categorize the CLEC's  
 9 inability to take the circuit as a CNR jeopardy?  
 10 A If you're speaking of in a subsequent jeopardy, yes.  
 11 Q And if Qwest comes to deliver the circuit and the  
 12 CLEC can't take it, that's a subsequent jeopardy;  
 13 correct? That's the way Qwest treats it?  
 14 A Yes.  
 15 Q And if the CLEC doesn't have notice and isn't able  
 16 to take the circuit, Qwest treats that as a CNR  
 17 jeopardy under its current process; correct?  
 18 A The second jeopardy, yes.  
 19 Q And you would agree that that's not proper, if the  
 20 CLEC hasn't received an FOC in adequate time to be  
 21 able to act on it; correct?  
 22 A According to procedure, yes.  
 23 Q That's Qwest's procedure?  
 24 A Yes.  
 25 Q Now, you would agree with me that if you provided an

Page 97

1 Q That's not your reading. Why don't you refer to  
 2 section 12.2.7.2.4.4.1.  
 3 A You're going to have to say that again.  
 4 Q Yeah, I thought I would. 12.2.7.2.4.4.1.  
 5 A Okay.  
 6 Q That section describes two specific types of  
 7 jeopardies; correct?  
 8 A Yes.  
 9 Q And what this language is saying is that for these  
 10 two types of jeopardies Qwest will not characterize  
 11 a jeopardy as a CNR or send a CNR jeopardy to a CLEC  
 12 if a Qwest jeopardy exists, Qwest attempts to  
 13 deliver the circuit and Qwest does not send an FOC  
 14 to the CLEC after the Qwest jeopardy occurs but  
 15 before Qwest attempts to deliver the circuit; do you  
 16 see that?  
 17 A Yes.  
 18 Q And what that says is if you don't give us our FOC  
 19 you're not going to treat it as a CNR jeopardy?  
 20 A That's what that says.  
 21 Q And you understand that there's additional language  
 22 that has been proposed that says we need to have the  
 23 FOC at least a day before?  
 24 A Right. And that additional language is not our  
 25 current process. This language reflects our current

Page 98

1 process.  
 2 Q And then it goes on to say that if Qwest does try to  
 3 deliver the circuit, the CLEC will nonetheless use  
 4 its best efforts to accept the circuit; correct?  
 5 A And that's what happened in most of the examples  
 6 that you provided, yes.  
 7 Q And so those are instances where the circuit was  
 8 delivered on time, but Qwest treated it as a CNR  
 9 jeopardy; is that right?  
 10 A No. We only found three instances where we  
 11 inappropriately treated it as a CNR jeopardy.  
 12 Q When you say inappropriately, what --  
 13 A Not according to our current procedure. Part of the  
 14 problem with that exhibit is that it includes the at  
 15 least a day before provision as a part of its  
 16 assessment of whether or not things were  
 17 appropriately categorized, and in only three cases,  
 18 according to our current procedure, did we err.  
 19 Q Would you agree with me that if Qwest didn't provide  
 20 an FOC following a jeopardy prior to delivering the  
 21 circuit that that should not be treated as a CNR  
 22 jeopardy?  
 23 A A subsequent jeopardy should not be treated as a CNR  
 24 jeopardy. And in that exhibit we found three cases  
 25 where we did that.

Page 99

1 Q You had testified previously regarding the oversight  
 2 review process?  
 3 A Um-hum.  
 4 Q If you would refer to your Exhibit RA-1, page 115.  
 5 This describes the oversight review process?  
 6 A Um-hum.  
 7 Q Yes?  
 8 A Yes.  
 9 Q And under the bullet points it says the oversight  
 10 review process is optional; is that right?  
 11 A Yes.  
 12 Q And then it goes on to say it will not be used when  
 13 one or more processes documented in this CMP are  
 14 available to obtain the resolution the submitter  
 15 desires; do you see that?  
 16 A Yes.  
 17 Q And you understand that to be a limitation on how  
 18 the oversight review process works; is that right?  
 19 A Well, not really a limitation, it means that there  
 20 are alternatives available to meet the CLEC's needs.  
 21 Q Well, it is a limitation on the use of the oversight  
 22 review process; correct?  
 23 A Yes.  
 24 Q It says it won't be used for processes documented in  
 25 the CMP?

Page 100

1 A When they are available to obtain the resolution  
 2 desired. So if there's another way to get the same  
 3 result, the CLEC doesn't need to go to oversight.  
 4 But if that doesn't meet the CLEC's needs, then they  
 5 can come to oversight.  
 6 Q The oversight review -- was it called committee?  
 7 A Yes.  
 8 Q It makes a recommendation; is that right?  
 9 A Yes.  
 10 Q Who does it make the recommendation to?  
 11 A To Qwest.  
 12 Q And then Qwest is free to accept that  
 13 recommendation; correct?  
 14 A Yes.  
 15 Q Or it can reject the recommendation; correct?  
 16 A Yes, it can.  
 17 MR. MERZ: I don't have anything further.  
 18 Thank you.  
 19 JUDGE SHEEHY: Ms. Anderson?  
 20 MS. ANDERSON: Nothing, thank you.  
 21 JUDGE SHEEHY: Anything further,  
 22 Ms. Thompson?  
 23 MS. THOMPSON: No, thank you.  
 24 JUDGE SHEEHY: Any questions?  
 25 JUDGE MIHALCHICK: Yeah, I have a couple

Page 101

1 questions.  
 2 EXAMINATION  
 3 BY JUDGE MIHALCHICK:  
 4 Q This is Steve Mihalchick. What is your job title?  
 5 A Staff witnessing representative.  
 6 Q And that means you're a witness, I guess?  
 7 A Yes, it does.  
 8 Q And you're paid to be a witness by Qwest?  
 9 A Yes. I'm an employee of Qwest.  
 10 Q How do you gather the information you provide in  
 11 your testimony?  
 12 A In multiple ways. Research I do through the record.  
 13 For example, there's an extensive public record for  
 14 the CMP so I can get a lot of information there. I  
 15 also contact various employees at Qwest when I need  
 16 further information.  
 17 Q Okay. Regarding the CMP, then, you made several  
 18 statements in your prefiled testimony and here today  
 19 that the CMP was intended to do this or to do that  
 20 or the purpose of it was such and such or it was  
 21 created to do such and such. How did you determine  
 22 those sorts of general intention of the document?  
 23 A Well, first of all, I've dealt with the CMP for some  
 24 time and worked with the CMP team, but also I  
 25 reviewed legal rulings with regard to the CMP, the

Page 114

1 issues an order causing a change in law and that  
 2 order does not include a specific implementation  
 3 date, a party may provide notice to the other party  
 4 within 30 days of the effective date of that order  
 5 and any, and then the language picks up at line 3.  
 6 JUDGE SHEEHY: Is there a comma before  
 7 and?  
 8 THE WITNESS: No.  
 9 JUDGE SHEEHY: Okay.  
 10 MR. TOPP: Qwest would offer Exhibits 6,  
 11 7, 8 and 9.  
 12 JUDGE SHEEHY: Any objection?  
 13 MR. MERZ: No objection.  
 14 MS. ANDERSON: None.  
 15 JUDGE SHEEHY: Exhibits 6, 7 and 8 are  
 16 received.  
 17 MR. TOPP: There's also an Exhibit 9.  
 18 JUDGE SHEEHY: 6, 7, 8 and 9 are  
 19 received.  
 20 (Exhibits 6, 7, 8 and 9 offered and  
 21 received.)  
 22 MR. TOPP: Mr. Easton is available for  
 23 cross.  
 24 JUDGE SHEEHY: Mr. Merz.  
 25 MR. MERZ: Thank you, Your Honor.

Page 116

1 Qwest should be able to discontinue processing  
 2 Eschelon's order on 10 days' notice without approval  
 3 of the Commission; is that correct?  
 4 A That's correct. I would note that based on the  
 5 proposed language Qwest would be notifying the  
 6 Commission at the same time it notifies Eschelon.  
 7 Q But it wouldn't have to wait for any Commission  
 8 approval?  
 9 A That is correct.  
 10 Q And it could proceed to then begin discontinuing  
 11 accepting any new orders from Eschelon in 10 days  
 12 after that notice?  
 13 A That's correct. Again, this is the same language  
 14 that appears in the SGATs in all Qwest states, it's  
 15 been in place for many years.  
 16 Q And you agree with me that if this provision were in  
 17 place today in Eschelon's ICA, it would be Qwest's  
 18 position that it could today give its notice that it  
 19 was going to discontinue order processing; right?  
 20 A Yes.  
 21 Q Qwest believes today that Eschelon is more than 30  
 22 days past due on its payments; is that right?  
 23 A I'm not sure where we stand as of today. I do know  
 24 that in the past there have been a number of billing  
 25 issues between the parties, and Eschelon in fact had

Page 115

1 CROSS-EXAMINATION  
 2 BY MR. MERZ:  
 3 Q Good afternoon, Mr. Easton.  
 4 A Good afternoon.  
 5 Q I want to focus with you first on issue 5-6, which  
 6 concerns discontinuation of order processing, and  
 7 that relates to ICA section 5.4.2.  
 8 The issue here is a contract provision  
 9 that describes the circumstances under which Qwest  
 10 can discontinue processing Eschelon's orders; is  
 11 that right?  
 12 A That's correct.  
 13 Q And discontinuing order processing means that Qwest  
 14 will not accept any new orders for service from  
 15 Eschelon; is that right?  
 16 A That's correct.  
 17 Q And it won't accept any changes in any existing  
 18 services; is that right?  
 19 A That's correct as well.  
 20 Q And you would agree with me that if that were to  
 21 happen that would be a very significant consequence;  
 22 correct?  
 23 A Yes, it would.  
 24 Q Now, it's Qwest's position that if Eschelon fails to  
 25 pay an undisputed amount 30 days after the due date,

Page 117

1 considerably more than 30 days in outstanding  
 2 billing.  
 3 Q And you are aware as well that Eschelon disagrees  
 4 with that position of Qwest, it disagrees that it  
 5 has any outstanding amounts due more than 30 days  
 6 past due?  
 7 A I don't know that that's my understanding. In the  
 8 billing issue discussed in Mr. Denney's testimony  
 9 that I reply to in my rebuttal testimony, the issue  
 10 had to do with the amount that was at dispute. This  
 11 language specifically excludes disputed amounts.  
 12 Q Under Qwest's proposed language Qwest would take the  
 13 position that it is the one that gets to decide  
 14 whether there are any past due amounts; correct?  
 15 A I believe that is correct. However, the parties  
 16 would decide on the disputed amount. And I would  
 17 cite, for example, that \$3 million example we had  
 18 that occurred here earlier in the year, Qwest  
 19 demanded payment and they suggested to Eschelon, if  
 20 you disagree with the amounts you feel are at  
 21 dispute, you subtract those amounts out, but please  
 22 pay us the rest of it which you're not disputing.  
 23 Q Based on Qwest's determination, Qwest could, under  
 24 its proposed language, proceed to discontinue order  
 25 processing on 10 days' notice; correct?

Page 118	<p>1 A For nonpayment of undisputed amounts, that's 2 correct.</p> <p>3 Q And that would be true even if Eschelon disagreed 4 about whether there was some past due amount?</p> <p>5 A Well, I think certainly our past practice would 6 indicate that that would not happen.</p> <p>7 Q And I'm really focusing on what the language that 8 Qwest is proposing would permit, and what that 9 language would permit is even if Eschelon disagreed 10 about whether there are undisputed amounts due, 11 Qwest could still proceed to give notice and 12 discontinue order processing; correct?</p> <p>13 A Well, it says less any disputed amount, it doesn't 14 say who is disputing that amount.</p> <p>15 Q And my point would be, sir, that Qwest is the one 16 that reserves to itself the ability to decide 17 whether an amount is in dispute; correct?</p> <p>18 A That is correct. I would point out that there is in 19 fact a dispute process that was developed through 20 change management by Qwest and participating CLECs 21 that lays out how disputes are to be handled and 22 makes very clear the amounts that are at dispute.</p> <p>23 Q And I need you to try to focus a little more closely 24 I think on my question. And what I mean to be 25 asking you is it is possible that the parties might</p>	Page 120	<p>1 Q And you don't dispute that; do you, sir?</p> <p>2 A I don't dispute that. I would say the flip side of 3 that, certainly, is by Qwest not being able to have 4 a security deposit it would put a certain level of 5 risk or burden on Qwest.</p> <p>6 Q And you understand, don't you, that Eschelon has 7 proposed language for section 5.4.5 that would allow 8 Qwest to get a security deposit?</p> <p>9 A They have a number of different options, Eschelon 10 does, for this section. Some of those options do 11 allow that, yes.</p> <p>12 Q Don't they all allow for Qwest to get a security 13 deposit?</p> <p>14 A I don't believe you're correct. Some it would be, 15 rather than triggered by an action of the two 16 parties, it would be a decision of the Commission.</p> <p>17 Q But what we're really disagreeing about here is not 18 whether Qwest can get a security deposit, but what 19 circumstances should trigger that ability?</p> <p>20 A I would agree.</p> <p>21 Q And you would agree with me that one of the points 22 of dispute between the parties is how do you define 23 the phrase repeatedly delinquent; correct?</p> <p>24 A That's correct.</p> <p>25 Q And you would agree with me as well that the</p>
Page 119	<p>1 disagree about whether or not there is an undisputed 2 amount?</p> <p>3 A It is possible, yes.</p> <p>4 Q In fact that is something that has happened in the 5 past in the relationship between Eschelon and Qwest?</p> <p>6 A And that has happened in the past, and as I 7 mentioned, it's been Qwest's practice, certainly as 8 evidenced by this most recent case, that Qwest 9 accepted the disputed amount provided by Eschelon.</p> <p>10 Q And Qwest is here today seeking to have the contract 11 right to decide whether an amount is disputed and 12 then based on that determination proceed to 13 discontinue order processing?</p> <p>14 A That's correct.</p> <p>15 Q I want to focus with you now on the deposit 16 requirements, which are issues 5-8, 5-9, 5-11, 5-12, 17 and they all relate to the ICA section 5.4.5. 18 And the issue here is the circumstances 19 under which Qwest can require Eschelon to pay a 20 security deposit; is that right?</p> <p>21 A That's correct.</p> <p>22 Q And you would agree with me that having to pay a 23 security deposit could impose a significant burden 24 on Eschelon; is that right?</p> <p>25 A That is Mr. Denney's testimony.</p>	Page 121	<p>1 definition of repeatedly delinquent is one that 2 differs from ICA to ICA that Qwest has with various 3 CLECs and others; is that right?</p> <p>4 A There are some older ICAs that have a different 5 definition of repeatedly delinquent. As Mr. Denney 6 has pointed out in his testimony, all of the most 7 recent ICAs, all of the SGATs, all of the SGAT 8 language developed during the 271 workshops, 9 contains the definition of repeatedly delinquent 10 that Qwest is using here.</p> <p>11 Q The older ICAs, the ones that you've characterized 12 as older, those are contracts that remain in effect 13 today?</p> <p>14 A That's correct.</p> <p>15 Q And those are binding on Qwest today?</p> <p>16 A That's correct.</p> <p>17 Q I want to focus you now on the issue of credit 18 standing, which is issue 5-13, and that's in the ICA 19 section 5.4.7?</p> <p>20 A Yes.</p> <p>21 Q This issue involves language proposed by Qwest that 22 would allow it to increase a deposit amount based on 23 its review of Eschelon's credit standing; is that 24 right?</p> <p>25 A That's correct.</p>

Page 122

1 Q And it's Qwest's position that this provision would  
2 allow an increase from zero; is that right?  
3 A That is correct.  
4 Q So even if no deposit was otherwise required under  
5 the ICA, Qwest believes it could rely on this  
6 provision 5.4.7 to demand the full amount of deposit  
7 that the section 5.4.5 would allow; is that correct?  
8 A Yes. What section 5.4.7 is intended to do is to  
9 address situations where there's a change in  
10 circumstances. We've experienced a number of  
11 bankruptcies in the past where right up until the  
12 time the company went bankrupt, they may have been  
13 making their payments in a timely manner and were a  
14 good credit risk at one point, but circumstances  
15 change, and it's appropriate to have language in the  
16 interconnection agreement that allows deposit  
17 requirements to change as those circumstances  
18 change.  
19 Q Does Qwest's proposed language for 5.4.7 require  
20 that there be any change in circumstances before  
21 Qwest demands a deposit?  
22 A Well, it would be based upon a credit review that  
23 would indicate that a deposit would be necessary.  
24 Q I'm not certain you answered my question. Does  
25 Qwest's language proposed for 5.4.7 require as a

Page 124

1 A No, it's not spelled out any further than we have  
2 there.  
3 Q And it's not limited to any particular type of data  
4 regarding credit standing?  
5 A It would be based on financial data.  
6 Q Where does it say that?  
7 A It does not say that. But it talks about credit  
8 standing, when you're looking at a party's credit  
9 standing I would submit that you would be looking at  
10 financial data.  
11 Q Well, there's certainly nothing in this language  
12 that would limit that to financial data; correct?  
13 A Well, when you're talking about, again, reviewing  
14 the party's credit standing, I don't know what  
15 nonfinancial data you would be looking at to make  
16 that determination.  
17 Q The review that's referred to in Qwest's proposed  
18 5.4.7 doesn't have to be based on credible or  
19 verifiable evidence; does it?  
20 A The language says what it says.  
21 Q So review can be nothing more than a Qwest employee  
22 getting up in the morning and reading an article in  
23 the Star Tribune about Eschelon?  
24 A Well, that is not in fact the process that Qwest  
25 would follow.

Page 123

1 condition of demanding a deposit under that section  
2 that there be changed circumstances?  
3 A It was Qwest's understanding previously, or it was  
4 Qwest's view previously that no deposit was  
5 necessary, then based upon this review decided that  
6 a deposit was necessary. I would argue that, yes,  
7 there was a change in circumstances.  
8 Q So the changed circumstance that you're talking  
9 about is Qwest's belief about whether a deposit is  
10 necessary?  
11 A Yes, based on certain criteria Qwest would use to  
12 evaluate the creditworthiness of the other party.  
13 Q Now, section 5.4.7 as proposed by Qwest doesn't  
14 describe any criteria to be used in evaluating  
15 creditworthiness; does it?  
16 A No, it does not.  
17 Q And it talks generally about the billing party, and  
18 I assume that's referring generally to Qwest, may  
19 review the other party's credit standing; is that  
20 right?  
21 A That's correct.  
22 Q Now, review is not any further defined anywhere in  
23 the ICA; is it?  
24 A No, it is not.  
25 Q It doesn't require any particular kind of review?

Page 125

1 Q But that is the process that 5.4.7 would allow;  
2 correct?  
3 A Well, that is certainly not the intent of the  
4 language. I don't think it would be appropriate to  
5 spell out exactly the credit review process that  
6 would be followed. There are a number of factors  
7 that go into it, it's not, you know, necessarily a  
8 black and white decision, but there is a fair amount  
9 of quantitative analysis that would fall behind  
10 that.  
11 Q 5.4.5 does specify the credit review that's going to  
12 take place if the parties have been doing business,  
13 and that requires a determination of repeatedly  
14 delinquent in order to get a deposit; is that right?  
15 A That's correct.  
16 Q Qwest could claim a deposit in 5.4.7 if a party had  
17 never been repeatedly delinquent; correct?  
18 A That is correct. As I mentioned, there are  
19 circumstances where parties, right up until the day  
20 they went bankrupt, were not repeatedly delinquent.  
21 Q I'm going to ask you now about nondisclosure  
22 agreements in section -- I'm sorry, issue 5-16,  
23 that's ICA 5.16.9.1. The issue here is that Qwest  
24 employees who have access to Eschelon's forecasting  
25 information are required to sign a nondisclosure

Page 126

1 agreement; is that right?  
 2 A That's correct.  
 3 Q And that's something the parties have agreed on;  
 4 correct?  
 5 A Yes.  
 6 Q The information that we're talking about,  
 7 forecasting data, is a highly competitive -- is a  
 8 highly competitively sensitive nature; is that  
 9 right?  
 10 A That is correct.  
 11 Q The issue here is that Eschelon, after the  
 12 nondisclosure agreement has been signed by the Qwest  
 13 employee, wants to be provided with a copy and Qwest  
 14 doesn't want to provide a copy; is that it in a  
 15 nutshell?  
 16 A That's it in a nutshell.  
 17 Q At any one time how many Qwest employees have access  
 18 to Eschelon's forecasting information?  
 19 A That I can't tell you.  
 20 Q Do you know if there are more than five?  
 21 A I would believe there are more than five.  
 22 Q Do you know if there are more than 10?  
 23 A I would believe there are more than 10.  
 24 Q Do you know how frequently those employees turn  
 25 over?

Page 127

1 A That I can't tell you either. There is turnover in  
 2 those groups.  
 3 Q You don't know how frequent?  
 4 A No. I'm sure it varies from time to time.  
 5 Q Is there some person who is responsible for getting  
 6 the nondisclosure agreement signed?  
 7 A I'm sure there is.  
 8 Q Are they maintained in a file?  
 9 A I'm sure they are.  
 10 Q Now, you talk in your direct testimony about the  
 11 unnecessary administrative burden that would be  
 12 imposed by Eschelon's proposed language; do you  
 13 recall that?  
 14 A Yes, I do.  
 15 Q Now, the unnecessary administrative burden that  
 16 you're talking about consists of having the person  
 17 that gets the nondisclosure agreement signed put it  
 18 in the mail to Eschelon; is that the burden that  
 19 we're dealing with here?  
 20 A That would be the case, because people, there was  
 21 churn in the jobs, the other concern would be of  
 22 course anybody who opted into this contract, should  
 23 the Eschelon language be approved, Qwest would be in  
 24 a position of mailing these things out on an ongoing  
 25 basis, and I just don't know that the administrative

Page 128

1 burden is worth it.  
 2 Q It may not be worth it to Qwest, are you -- are you  
 3 testifying regarding whether it might be worth it to  
 4 Eschelon?  
 5 A Well, I think Eschelon is provided sufficient  
 6 protection with the language in 5.16.9.1 that has  
 7 very strict requirements on how this information is  
 8 to be handled.  
 9 In addition, there's an audit provision  
 10 under section 18, I believe it's 18.3.1, that allows  
 11 Eschelon to come in and audit the handling of this  
 12 confidential forecast information. And I would  
 13 submit that between those two sections that provides  
 14 adequate protection to Eschelon.  
 15 In fact that's the protection that's been  
 16 provided to all CLECs in operating under the SGAT,  
 17 that is language that was specifically addressed  
 18 during the 271 workshops. I'm not aware of that  
 19 having imposed any problems for the other parties.  
 20 MR. MERZ: No further questions. Thank  
 21 you, sir.  
 22 JUDGE SHEEHY: Ms. Anderson.  
 23 MS. ANDERSON: Thank you.  
 24 CROSS-EXAMINATION  
 25 BY MS. ANDERSON:

Page 129

1 Q Good afternoon, Mr. Easton. I'm Julia Anderson, on  
 2 behalf of the Minnesota Department of Commerce. I  
 3 just have a few questions for you.  
 4 Following up on this last topic by  
 5 Mr. Merz, do you recall the last series of questions  
 6 with respect to Eschelon's proposal to be provided a  
 7 signed copy of each nondisclosure agreement?  
 8 A Yes.  
 9 Q How lengthy are these agreements, in your view?  
 10 A You know, they are one to two pages.  
 11 Q How many such agreements did Qwest sign say in the  
 12 past year?  
 13 A That I can't tell you.  
 14 Q Do you have any kind of range that you can give or  
 15 you have no idea?  
 16 A I have no idea whatsoever. There are a number of  
 17 individuals who would have access to this  
 18 information and sign the agreement at the time they  
 19 have access. As they would move to new jobs and new  
 20 people would come in those new people would be  
 21 required to sign those agreements as well. So  
 22 depending on the total number of people who have  
 23 access and how those jobs change, that number could  
 24 vary.  
 25 Q So when you state that Qwest would have some sort of

Page 150

1 Q Is it your opinion that the function of the deposit  
2 is to provide an incentive for timely payment or is  
3 the function of the deposit to protect Qwest in the  
4 event of nonpayment?  
5 A It's a little bit of both, but it's probably more  
6 the latter, it's to provide protection for  
7 nonpayment.  
8 Q And you would agree with me that there is agreed to  
9 language regarding late payment fees; is that right?  
10 A That's correct.  
11 Q And the purpose of that agreed to language is to  
12 provide an incentive for timely payment; correct?  
13 A Yes.  
14 MR. MERZ: I don't have anything further.  
15 MS. ANDERSON: Nothing. Thank you.  
16 JUDGE SHEEHY: Mr. Topp?  
17 REDIRECT EXAMINATION  
18 BY MR. TOPP:  
19 Q Do late payment fees adequately -- or do those  
20 address the situation where Eschelon is potentially  
21 unable to pay?  
22 A No, they do not address that situation.  
23 MR. TOPP: No further questions.  
24 JUDGE SHEEHY: Mr. Merz? Ms. Anderson,  
25 anything further?

Page 152

1 15 is the trade secret rebuttal.  
2 MR. MERZ: Thank you.  
3 JUDGE SHEEHY: Any objection,  
4 Ms. Anderson?  
5 MS. ANDERSON: None, thank you.  
6 JUDGE SHEEHY: Okay. 14 and 15 are  
7 received.  
8 (Exhibits 14 and 15 offered and received.)  
9 MR. ROSELLI: Thank you. And before  
10 beginning questioning of the witness and for the  
11 benefit of the record and for those I have not  
12 introduced myself to, my name is Philip Roselli, I  
13 am at attorney with the Kamlet, Shepherd law firm in  
14 Denver, Colorado, and I represent Qwest on selected  
15 matters in this hearing.  
16 DIRECT EXAMINATION  
17 BY MR. ROSELLI:  
18 Q Mr. Linse, could you please state for the record  
19 your full name?  
20 A My name is Philip Linse.  
21 Q And who is your employer, please?  
22 A My employer is Qwest.  
23 Q And have you filed testimony in this case?  
24 A Yes, I have.  
25 Q And is that testimony in front of you?

Page 151

1 MS. ANDERSON: No, thank you.  
2 JUDGE SHEEHY: Okay. Thank you,  
3 Mr. Easton.  
4 THE WITNESS: Thank you.  
5 (Witness excused.)  
6 JUDGE SHEEHY: Let's take a break for 10  
7 to 15 minutes.  
8 (Break taken from 2:03 to 2:19.)  
9 (Whereupon, Exhibits 10 through 15 were  
10 marked for identification by the court  
11 reporter.)  
12 PHILIP LINSE,  
13 after having been first duly sworn, was  
14 examined and testified on his oath as follows:  
15 MR. TOPP: Your Honor, before we have  
16 Mr. Linse testify, there has been a stipulation.  
17 We've had marked as Exhibits 14 and 15 the trade  
18 secret and public versions of Robert Brigham's  
19 testimony, the parties have stipulated that they  
20 have no need to cross Mr. Brigham and have agreed to  
21 admission of that testimony, and so I would offer  
22 Exhibits 14 and 15.  
23 MR. MERZ: I don't have any objection,  
24 but which one is 14 and which one is 15?  
25 JUDGE SHEEHY: 14 is the public rebuttal,

Page 153

1 A Yes, it is. I believe it is.  
2 Q I hope it is.  
3 A There's a lot of it.  
4 Q Can you identify that testimony, please, for the  
5 record?  
6 A Qwest Corporation, Direct Testimony of Philip  
7 Linse --  
8 JUDGE SHEEHY: Is 10.  
9 THE WITNESS: Is 10.  
10 JUDGE SHEEHY: How about I read it and  
11 you tell me if it's right. The reply testimony is  
12 11?  
13 THE WITNESS: Correct.  
14 JUDGE SHEEHY: The public surreply is 12?  
15 THE WITNESS: That is correct.  
16 JUDGE SHEEHY: And the highly sensitive  
17 trade secret surreply is 13?  
18 THE WITNESS: That is correct.  
19 MR. ROSELLI: Thank you.  
20 BY MR. ROSELLI:  
21 Q Mr. Linse, did you also file any errata with your  
22 testimony?  
23 A Yes, I filed an errata for my direct and rebuttal.  
24 Q And is it your understanding that that errata is  
25 incorporated in those respective exhibits?

1 (Whereupon, Exhibits 16, 17, and  
 2 18 were marked for identification by the  
 3 court reporter.)  
 4 JUDGE SHEEHY: All right. Everyone, good  
 5 morning. It's my understanding that Mr. Linse has  
 6 some negotiation responsibilities this morning, and  
 7 so Qwest is going to interrupt his testimony to  
 8 offer the testimony of Mr. Hubbard. I assume  
 9 everyone was aware of that.  
 10 All right. So anything else we need to  
 11 talk about before we get going?  
 12 MR. MERZ: I don't believe so.  
 13 JUDGE SHEEHY: All right. Please  
 14 proceed.  
 15 MR. ROSELLI: With that we'd call  
 16 Mr. Hubbard to the stand.  
 17 ROBERT J. HUBBARD,  
 18 After having been first duly sworn, was  
 19 examined and testified on his oath as follows:  
 20 JUDGE SHEEHY: Mr. Hubbard's direct  
 21 testimony has been marked as Exhibit 16, his  
 22 rebuttal as 17, and his surrebuttal as 18.  
 23 MR. ROSELLI: Thank you.  
 24 DIRECT EXAMINATION  
 25 BY MR. ROSELLI:

Page 6

1 Q Could you please state your full name for the  
2 record?  
3 A My name is Robert J. Hubbard.  
4 Q And who is your employer, please?  
5 A Qwest.  
6 Q And your business address?  
7 A 700 West Mineral Avenue, Littleton, Colorado 8013 --  
8 80120.  
9 Q Thank you, Mr. Hubbard.  
10 A I tried to get my home. I'm sorry.  
11 Q And did you prepare prefiled testimony in this  
12 matter?  
13 A Yes, I did.  
14 Q And is that testimony marked in front of you?  
15 A Yes, it is.  
16 Q Can you please identify what's been placed in front  
17 of you?  
18 A Absolutely. My direct testimony that I filed is  
19 Exhibit 16. I also filed rebuttal testimony, which  
20 is Exhibit 17. And I filed surrebuttal testimony,  
21 which is Exhibit 18.  
22 Q And is that testimony true and accurate to the best  
23 of your knowledge?  
24 A Yes, it is.  
25 Q And if I were to ask you the same questions here

Page 8

1 A Okay.  
2 Q -- which is issue 8-20, and it concerns ICA Section  
3 8.1.1.10.1.1. And just to lay some of the  
4 groundwork here, collocation available inventory are  
5 used collocation sites that have been returned to  
6 Qwest; is that correct?  
7 A That is correct.  
8 Q And the issue here is that when Qwest prepares a  
9 quote for a collocation site and that collocation  
10 site has been returned to Qwest, the parties have a  
11 dispute about whether Qwest's quote for the initial  
12 collocation site should be posted along with the  
13 inventory list of what's in that site; correct?  
14 A That's what is at issue here, yes.  
15 Q And Eschelon believes that the quote should be  
16 posted, and Qwest believes that it shouldn't; is  
17 that correct?  
18 A That's -- That's fair, yeah.  
19 Q Qwest's reason for opposing the requirement that the  
20 price be posted is that the information regarding  
21 the -- regarding the initial quote would not be  
22 relevant to a CLEC that might be considering  
23 purchasing that site; is that correct?  
24 A Yes, that's correct.  
25 Q And the reason for that is it's rare that a CLEC

Page 7

1 today live that we've addressed in the testimony,  
2 would you give me the same responses?  
3 A Yes.  
4 MR. ROSELLI: Okay. With that I would  
5 move the admission of Exhibits 16, 17, and 18.  
6 MR. MERZ: No objection.  
7 MS. ANDERSON: No objection.  
8 JUDGE SHEEHY: 16, 17, and 18 are  
9 received.  
10 (Whereupon, Exhibits 16, 17, and 18  
11 were offered and received.)  
12 BY MR. ROSELLI:  
13 Q And just to be sure, no other corrections to your  
14 testimony?  
15 A That is correct.  
16 MR. ROSELLI: With that I would make  
17 Mr. Hubbard available for cross-examination.  
18 JUDGE SHEEHY: All right. Mr. Merz.  
19 MR. MERZ: Thank you, Your Honor.  
20 CROSS-EXAMINATION  
21 BY MR. MERZ:  
22 Q Good morning, Mr. Hubbard.  
23 A Good morning.  
24 Q I'd like to talk with you first about collocation  
25 available inventory --

Page 9

1 orders a collocation available site as is; is that  
2 accurate?  
3 A I think that's pretty accurate, yes.  
4 Q It's rare, but it's something that has, in fact,  
5 happened; is that right?  
6 A Well, I believe it has happened. But then you have  
7 to consider that prices do change, circumstances do  
8 change. So a posted price may not be actually the  
9 current price.  
10 Q If you'd turn to -- The white binder there in front  
11 of you is the ICA, the proposed ICA. If you'd turn  
12 to 8.1.1.10.1.1.  
13 A 8.1.1.10.1?  
14 Q .1.  
15 A Oh, I left off -- Okay. Got it.  
16 Q Actually, there are even three 1s on the disputed  
17 provision; correct? It's 8.1.1.10.1.1.1?  
18 A Yes. That's the proposed, yes.  
19 Q And you see there that Eschelon's proposal includes  
20 at the very end of that section the qualifier,  
21 Unless Qwest establishes a change in circumstances  
22 affecting the quoted price. You see that; correct?  
23 A Of that paragraph, 8.1.1.10.1.1.1, you're saying the  
24 end of it, unless -- okay, the last part of that  
25 sentence, Unless Qwest establishes a change in

Page 14

1 A There is, you know, planning and administration fees  
2 that do go on with that. So there is work that is  
3 done; and I believe that we're, you know, allowed to  
4 recover those costs.  
5 Q But your testimony is if the CLEC -- the second CLEC  
6 orders a collocation available site exactly as it  
7 is, there's a need for Qwest to prepare a new quote  
8 for that site?  
9 A We would prepare a new quote, yes.  
10 Q The question is not whether you would do it, but  
11 whether it's necessary for you to do it?  
12 A You know, I do believe that it would be necessary  
13 under our current procedures and --  
14 Q And I understand that you're saying under your  
15 current procedures it would be necessary. The  
16 question is whether you would need a new quote if  
17 the second CLEC was ordering a collocation available  
18 site exactly as is?  
19 A It may not be entirely necessary. But we don't have  
20 the information from the previous quote, so we would  
21 prepare a new one, yes.  
22 Q Wait a second. You don't have the information from  
23 the previous quote. What does that mean?  
24 A I mean it's not -- The prices aren't posted and  
25 stuff. So we relook at it.

Page 16

1 Q But the question of whether Qwest will post a quote  
2 isn't part of the cost docket, is it?  
3 A No, that would not be part.  
4 Q In your surrebuttal at page 3, lines 19 through 20,  
5 you say there, Reviewing a different CLEC's quote  
6 would not give Eschelon any information not already  
7 available to it. Do you see that there?  
8 A Yes, I do.  
9 Q Okay. What Eschelon does not have available to it  
10 with respect to a collocation available inventory  
11 site is what the price is that Qwest previously  
12 quoted for that site; right?  
13 A No. I think you have that information that could be  
14 obtained through your own engineering, if you will.  
15 You have what you want. You have all the equipment  
16 that's there. You have the prices in your Exhibit  
17 A, I believe. And you would be able to figure up  
18 for yourself what that's going to be, and you know  
19 the appropriate discounts that are being applied.  
20 So you could figure up the price that you'd be  
21 paying yourself.  
22 Q You would agree with me that Eschelon, if it's going  
23 to order a collocation available inventory site,  
24 does not have the price previously quoted for that  
25 site; is that true?

Page 15

1 Q Qwest has its previous quotes?  
2 A True.  
3 Q That's something that it retains?  
4 A True.  
5 Q And so if it has that -- Let me just do an example.  
6 I mean, today a collocation available site is  
7 returned. Qwest has the quote for that site.  
8 Tomorrow Eschelon wants to purchase that site.  
9 Qwest would, under its existing process, turn around  
10 and do a new quote even though it already has one on  
11 hand; is that your testimony?  
12 A That's my testimony.  
13 Q And wouldn't that be -- In your testimony you use  
14 the phrase make work. Wouldn't that just be make  
15 work on the part of Qwest?  
16 A It would be work involved. I believe, you know,  
17 that you're getting into some section here that's  
18 probably closely related to the cost docket. And I  
19 believe this issue is teed up in the cost docket for  
20 just this situation.  
21 Q The issue of whether Qwest is going to post a quote  
22 for collocation available inventory is in the cost  
23 docket; is that your testimony?  
24 A I believe the costs associated with that are in the  
25 cost docket.

Page 17

1 A You don't have the price previously quoted.  
2 Q Now, when Qwest provides a quote, that is the price  
3 at which Qwest is willing to sell; correct?  
4 A That's correct.  
5 Q It's not an estimate; isn't that right?  
6 A That's correct.  
7 Q The quote is the price?  
8 A When we give you the quote, that is the price.  
9 Q And Qwest requires that the CLEC get the quote;  
10 correct?  
11 A Correct.  
12 Q The CLEC can't just say we figured out what the  
13 price ought to be and here's the check; it has to  
14 rely on Qwest to tell it what the price is?  
15 A Yeah. But you should be able to figure out what the  
16 cost is going to be yourself.  
17 Q And the CLEC has to pay Qwest for the quote; isn't  
18 that right?  
19 A That's correct.  
20 Q Now, it's the case, is it not, that the information  
21 that the CLEC has available to it is enough for the  
22 CLEC to estimate the price?  
23 A Is enough for the CLEC to estimate the price?  
24 Q Yes.  
25 A I believe that, yes.

Page 18

1 Q But whatever the CLEC can do, that is an estimate;  
2 correct?  
3 A I -- It should be the -- It should be the price of  
4 the collocation, yes.  
5 Q Well, if you go to your direct testimony at page 11,  
6 and I'm looking in particular at line 13 where it  
7 says, Accordingly, CLEC B is in the best position,  
8 really the only position, to estimate the  
9 nonrecurring charge it would pay based upon its  
10 desired circuit termination; correct?  
11 A Correct.  
12 Q So the number that the CLEC can come up with is an  
13 estimate; correct?  
14 A I suppose that is correct. It's going to be -- I  
15 mean, the prices are the same -- that you're looking  
16 at that we're looking at, it should be the same  
17 quote.  
18 Q You describe it in your direct testimony as an  
19 estimate; correct?  
20 A It -- The word says estimate.  
21 Q Okay. And in your rebuttal testimony at page 6...  
22 A Okay. I'm on it.  
23 Q And I'm looking at line 4 where you say, Further, as  
24 I explained in my direct testimony, Eschelon will  
25 have every data point it needs to estimate what it

Page 20

1 A That's what we're talking about here, yeah. And  
2 what section again that you're looking at? Just  
3 from --  
4 Q The special site description is at 8.2.10.4.1.  
5 A Got it. Okay.  
6 Q And that just describes what a special site is;  
7 correct?  
8 A Correct.  
9 Q And 8.3.11.3 describes the rate elements that relate  
10 to a special site; is that right?  
11 A 8.3.11...  
12 Q 3.  
13 A Oh. Let me read it.  
14 Q Sure.  
15 A Without reading it all the way through, yes, that  
16 describes this section, the rates.  
17 Q And 8.3.11.3.2 describes the special site planning  
18 and engineering fee; is that right?  
19 A Yes, that's correct.  
20 Q And then finally if you'd turn to 8.2.10.4.3.  
21 JUDGE SHEEHY: You know, I don't have  
22 what's marked as page 113 of the contract, just if  
23 anyone wants to give me a copy of it at some point.  
24 MR. MERZ: That's the next page I'm going  
25 to ask about. So...

Page 19

1 will be required to pay. Do you see that?  
2 A I see that.  
3 Q And there you use the word estimate again, that  
4 Eschelon can come up with an estimate; correct?  
5 A That's the word I used.  
6 Q I want to talk with you now about special site  
7 assessment fees --  
8 A Okay.  
9 Q -- which is issue 20 -- I'm sorry, 8-20A, and it's  
10 ICA Section 8.2.10.4.3. And, again, just to orient  
11 ourselves on some of the language here, a special  
12 site is a collocation site that has been returned to  
13 Qwest as a result of a CLEC bankruptcy or a CLEC  
14 abandoning the site; isn't that right?  
15 A That's correct. It still has power and circuits in  
16 it. It's still kind of hot. We'd call it a hot  
17 cage.  
18 Q A hot cake?  
19 A Hot cage.  
20 Q Hot cage.  
21 A Still fired up and working.  
22 Q All right. And the issue here is the fee that  
23 Eschelon must pay for a quote when it purchases a  
24 special site and requests changes to that site;  
25 correct?

Page 21

1 JUDGE SHEEHY: I know, and I don't have  
2 it.  
3 JUDGE MIHALCHICK: Nor do I.  
4 JUDGE SHEEHY: It goes from 112 to 114.  
5 BY MR. MERZ:  
6 Q Do you have page 113 in your --  
7 A Yes, I do.  
8 MR. MERZ: We'll see if we can round one  
9 up for you.  
10 JUDGE SHEEHY: It's a hot page. It's  
11 stuck to the copying machine. I mean, we can look  
12 at the matrix for the language if that's --  
13 MR. MERZ: Okay. And that's really what  
14 I'm going to --  
15 JUDGE SHEEHY: Yeah.  
16 MR. MERZ: -- get to. So we'll make sure  
17 and get that page for you.  
18 JUDGE SHEEHY: Yeah.  
19 BY MR. MERZ:  
20 Q All right. So here we are at 8.2.10.4.3. And you  
21 see the disputed language there about two-thirds of  
22 the way down in that section; correct?  
23 A In red, yes.  
24 Q Yeah. And that is Qwest's proposal. If CLEC  
25 requests an augment application, then CLEC will be

Page 22

1 charged a planning and engineering fee instead of  
 2 the special site assessment fee; is that right?  
 3 A That's correct.  
 4 Q Now, Exhibit A is the section of the ICA that sets  
 5 out the prices for different elements; is that  
 6 right?  
 7 A That's correct.  
 8 Q And Exhibit A doesn't have on it anything called a  
 9 special site assessment fee; is that right?  
 10 A I'm not sure about that.  
 11 Q Well, if you go to -- You have in front of you there  
 12 I think the exhibits to the ICA, and I think Exhibit  
 13 A will probably be the very first one.  
 14 A These loose ones here?  
 15 Q I believe that's right. Oh, I'm sorry, it's in the  
 16 binder, sir.  
 17 A Oh, I'm sorry.  
 18 Q No, I --  
 19 A The black binder?  
 20 Q -- wasn't clear. Yes.  
 21 A They are, it looks like, exhibits to the  
 22 interconnection agreement. That's what this --  
 23 Q Okay. If you go --  
 24 A -- tab here --  
 25 Q -- to Exhibit A, and it's the line number 8.15.2.1.

Page 23

1 A Did you say 8.2?  
 2 Q 8.15.2.1.  
 3 A That's what I thought. I hadn't got there.  
 4 8.15.2...  
 5 Q 1.  
 6 A Yes.  
 7 Q And that is the special site planning and  
 8 engineering fee; is that correct?  
 9 A That's what it says here on Exhibit A, yes.  
 10 Q Okay. And it's Eschelon's position that that is the  
 11 fee that should apply when Eschelon purchases  
 12 special site whether or not there's an augment to  
 13 that site; correct?  
 14 A I think that's what's in contention, but with an  
 15 augment that requires work from an engineering  
 16 requirement to be done by Qwest.  
 17 Q I understand. And really what I just want to make  
 18 sure we have on the table is what the parties'  
 19 competing positions are. It's Eschelon's position  
 20 that the special site planning and engineering fee  
 21 is the fee that should apply; correct?  
 22 A I believe so, yes.  
 23 Q And it's Qwest's position that what should apply is  
 24 the standard site planning and engineering fee if  
 25 there's an augment?

Page 24

1 A If there's an augment, yes.  
 2 Q All right. And for a caged physical collocation you  
 3 can find that rate at 8.4.1; is that right?  
 4 A Caged physical collocation planning and engineering  
 5 fee, yes, 8.4.1.  
 6 Q And so if Eschelon -- If a special site were a caged  
 7 physical collocation and Eschelon requested an  
 8 augment, the rate at 8.4.1 is the one that Qwest  
 9 believes would apply?  
 10 A Yes.  
 11 Q Now go to your surrebuttal testimony at page 7.  
 12 A I'm there.  
 13 Q And I'm looking at lines -- beginning at line 6  
 14 where you say, Nowhere does the description of the  
 15 special site assessment fee indicate that this fee  
 16 applies when modifications are requested. Do you  
 17 see that?  
 18 A I see that.  
 19 Q Okay. Now I want to make sure I understand the  
 20 sequence of events when a CLEC orders a special  
 21 site. And so the first thing that would happen is  
 22 the CLEC would request the special site; is that  
 23 right?  
 24 A That would be correct.  
 25 Q Okay. And then the next thing that would happen is

Page 25

1 Qwest would do a feasibility study to see if the  
 2 site is still available; is that right?  
 3 A That's correct.  
 4 Q And then Qwest would prepare a quote based on the  
 5 site inventory and any requested modifications; is  
 6 that right?  
 7 A That sounds correct, yes.  
 8 Q And that -- You actually find that in 8.2.10.4.3; is  
 9 that right? I'm looking at I think it's the fourth  
 10 sentence of that section.  
 11 A Correct.  
 12 Q And requested modifications as used in that sentence  
 13 is referring to modifications requested by the CLEC  
 14 requesting the site; correct?  
 15 A By the CLEC, yes, that they request.  
 16 Q And then -- I apologize -- later on in Section  
 17 8.2.10.4.3 it goes on to say, The CLEC will be  
 18 charged a special site assessment fee for work  
 19 performed up to the point of the expiration or  
 20 nonacceptance of the quote. Do you see that?  
 21 A I see that.  
 22 Q And the work that's referred to in that sentence is  
 23 the work of preparing the quote; is that correct?  
 24 A Correct.  
 25 Q I want to talk with you now about NEBS compliance,

Page 38

1 the engineer factors is not only the power  
2 requirements of Qwest's equipment, but also  
3 collocators, CLECs, within that central office. And  
4 you go through an example of the factors that you  
5 look at.  
6 My question to you is how does Qwest  
7 assess its own power requirements? What's the  
8 basic -- What are the basic steps to assess the  
9 power requirements of Qwest's equipment?  
10 A We utilize the -- basically the power usage on an  
11 existing central office plus our forecasted list one  
12 drain and then we also throw -- you know, not throw  
13 in, but then we calculate in a collocator's request.  
14 Q When you say that you have some forecasted figures,  
15 what kind of forecast period do you use? What are  
16 your basic parameters when you're saying you factor  
17 in a forecast of your power needs?  
18 A We have -- Equipment draws -- You know, different  
19 equipment draws different power. What we forecast  
20 in is through our planning department forecasted  
21 usage; how we think the area's going to grow that  
22 it's feeding; you know, forecast of lines coming in  
23 there, which equates back to how we're going to card  
24 up the equipment. How long that forecast period I  
25 believe is a little dependent on the engineer

Page 40

1 pretty quick, we may be monitoring that more closely  
2 than an area that's not growing as quickly.  
3 Q How does Qwest forecast future -- likely future CLEC  
4 power needs in an area?  
5 A We -- We don't know a CLEC's business plan or their  
6 marketing plan. So we basically don't forecast for  
7 a CLEC.  
8 Q Now, on page 13 of your rebuttal, line 7, you state,  
9 the second sentence, Since Eschelon cannot forecast  
10 its own usage. And I'll stop there. Why do you  
11 believe Eschelon cannot forecast its own usage?  
12 A What the CLEC gives us is we assume their total  
13 demand. If they didn't -- And we have to build to  
14 that because we don't know when they're going to  
15 have that demand hit us. So my opinion there is  
16 that if they knew, you know, what their usage was  
17 going to be, then they would not need to order the  
18 power that they do.  
19 Q Well, let me go back. I understand your testimony  
20 when you said that Qwest can't forecast the CLEC's  
21 power needs. Did I understand that testimony  
22 correctly?  
23 A Yes, that's correct.  
24 Q Now my question is how do you know that CLECs can't  
25 forecast their own power usage requirements?

Page 39

1 knowing the area. It takes quite awhile to build  
2 additional power plant. So the forecast period  
3 would be, you know, longer, of course, than what it  
4 would take to augment a power plant.  
5 Q So you want to build in some room to grow; is  
6 that --  
7 A Absolutely.  
8 Q How often then does Qwest reassess its power needs  
9 or power studies once a power plant is built?  
10 A The -- I believe and I -- I believe that the  
11 engineers, they can -- I don't know how often they  
12 do this. Fairly often I would assume that they  
13 monitor the usage in the power plant for the whole  
14 total office.  
15 Q When you're using forecasted figures to design a  
16 power plant, it appears from your testimony, again  
17 page 12 of your rebuttal, that Qwest looks on a  
18 central-office-by-central-office basis; am I  
19 correct?  
20 A Correct.  
21 Q So that with respect to some central offices, Qwest  
22 may be assessing power needs and forecasting  
23 accuracy on a more regular basis than other central  
24 offices?  
25 A If you've got a high-growth area that's growing

Page 41

1 A Well, looking at their collocation orders,  
2 they design everything, not only power but their DS0  
3 connections, DS1 connections, to an ultimate size  
4 that they're -- that they want. They're not -- I  
5 mean, if they were forecasting five, ten years out,  
6 they would not be paying for all this connection in  
7 the first go-round. They would be adding them as  
8 they grow. So...  
9 Q So are you saying then it's not so much a matter  
10 that CLECs aren't forecasting their power usage  
11 requirements but that they are not doing so on a  
12 long-term horizon; is that more accurate?  
13 A I think that's accurate.  
14 Q Does Qwest ever ask CLECs for a forecast of their  
15 power needs for a central office?  
16 A We ask CLECs, I believe, for their -- a forecast of  
17 their, you know, lines they're going to hook up and  
18 stuff, which then drives, of course, the power.  
19 Q But when you say that you ask what kinds and types  
20 of lines they're going to hook up, are you then  
21 looking at the total capacity of those lines and the  
22 power that would need to be provided to power those  
23 lines at maximum capacity; is that what you're --  
24 A Yes.  
25 Q So it's not on a -- You're not building your power

Page 54

1 docket.  
 2 Q There was some discussion before about this NEBS  
 3 list. Do you know the name Mary Ann Wyborg?  
 4 A I saw your exhibit, if you will, and did look at the  
 5 name, and I did look it up. I don't know her.  
 6 Q I think the name in the exhibit wasn't Mary Ann  
 7 Wyborg. Do you know that name Mary Ann Wyborg?  
 8 A Like I said, I looked up her name, I believe. I  
 9 don't know her.  
 10 Q Okay. That's fair. You don't know the name  
 11 Mary Ann Wyborg or who that person is?  
 12 A No.  
 13 Q Okay. 8-23. You talked about 8-23 at page 14 of  
 14 your surrebuttal. And the issue in 8-23 is the  
 15 price for power restoration with reservation; is  
 16 that correct?  
 17 A I believe that's -- I believe that's the issue, yes.  
 18 Q And Qwest had formerly proposed an ICB nonrecurring  
 19 price but has now agreed with Eschelon on a  
 20 specified price; is that right?  
 21 A That issue is closed.  
 22 Q Okay. And Qwest is still proposing to charge a  
 23 quote preparation fee in connection with a request  
 24 for power restoration with reservation; is that  
 25 right?

Page 56

1 this week. Okay? So it's down the road.  
 2 Q In all events, that resolution won't tell us what  
 3 fee would apply to Eschelon's purchase of a special  
 4 site in the meantime, before the cost docket reaches  
 5 a resolution?  
 6 A You have existing rates that are posted.  
 7 Q My question is whether the cost docket resolution  
 8 will determine the issue in this case before that  
 9 resolution actually happens? We've got a period --  
 10 We have a period of time before the cost docket  
 11 resolves; correct?  
 12 A Correct.  
 13 Q And whatever happens in the cost docket will not  
 14 resolve in the meantime what fees should be  
 15 changed -- should be charged for a special site; is  
 16 that correct?  
 17 A I -- Yeah, that's correct.  
 18 MR. MERZ: I don't have anything further.  
 19 JUDGE SHEEHY: Ms. Anderson.  
 20 MS. ANDERSON: Briefly.  
 21 RECROSS-EXAMINATION  
 22 BY MS. ANDERSON:  
 23 Q Mr. Hubbard, you testified essentially that Qwest  
 24 does not ask the CLEC to provide its -- the CLEC's  
 25 power forecast; is that right?

Page 55

1 A We're going to charge a fee, yes. I believe that's  
 2 still -- That one's in the cost docket also.  
 3 Q The fee is the quote --  
 4 A Quote.  
 5 Q -- preparation fee?  
 6 A Yes.  
 7 Q Now, with respect to the cost docket, you had said  
 8 that the issue of the site assessment fee was one  
 9 that was being considered in the cost docket. Do  
 10 you recall that?  
 11 A Yes.  
 12 Q Are you aware that Qwest brought a motion to have  
 13 that issue stayed pending the resolution of the  
 14 issues in the cost docket?  
 15 A You know, I don't know if I'm aware of that.  
 16 Q Would you agree with me that whatever decision is  
 17 made in the cost docket, that won't resolve the  
 18 immediate issue; it won't tell us now what fee ought  
 19 to apply when a special site is purchased by  
 20 Eschelon?  
 21 A I -- And I apologize. I had trouble following that  
 22 a little bit.  
 23 Q The resolution of the cost docket is down the road  
 24 somewhere?  
 25 A I don't know when it's scheduled for, but it's not

Page 57

1 A That's correct.  
 2 Q Why doesn't Qwest do that? I mean, Qwest -- Qwest  
 3 forecasts its own power needs. Why doesn't Qwest  
 4 ask a CLEC to provide Qwest's -- the CLEC's  
 5 forecasted power needs?  
 6 A Because the CLEC is the one that -- they know -- I  
 7 mean, they've got a marketing plan. We don't know  
 8 their marketing plan. We -- We don't know when  
 9 they're going to have, you know, an ultimate demand  
 10 for that power. If you start asking for forecasts,  
 11 you get -- kind of gets back into the early days of  
 12 collocation where we ask for forecasts and  
 13 everything. Then you've got to get, you know,  
 14 penalties and other language on this; if you don't  
 15 build, if you don't build to your forecast, or if  
 16 you overbuild your forecast. I think that that  
 17 complicates all this issue way too much.  
 18 MS. ANDERSON: Thank you.  
 19 JUDGE SHEEHY: Okay. Mr. Roselli, any  
 20 further redirect?  
 21 MR. ROSELLI: No. Thank you.  
 22 JUDGE SHEEHY: Okay.  
 23 JUDGE MIHALCHICK: I have a couple.  
 24 JUDGE SHEEHY: Okay.  
 25 JUDGE MIHALCHICK: Sorry.

Page 58

1 EXAMINATION  
 2 BY JUDGE MIHALCHICK:  
 3 Q Ms. Anderson asked one of the questions I had, but  
 4 so -- regarding the power forecasting by the CLEC.  
 5 So at this point they couldn't give it to you if  
 6 they wanted to; is that right? You don't have the  
 7 space on your form for it?  
 8 A No, there's not a space on the form.  
 9 Q And you said that in the early days of collocation  
 10 you had power forecasting, but it was too much of a  
 11 hassle. So I take it from that it's no longer an  
 12 option that Qwest accepts power forecasts?  
 13 A Well, it was -- And it wasn't really power  
 14 forecasting. It was forecasting of how many lines  
 15 they were going to hook up, which would, you know,  
 16 drive how many cards they were going to card in  
 17 their equipment and what time that, you know, the  
 18 power usage would increase to serve that equipment.  
 19 Q So what started out as CLECs can't forecast became  
 20 CLECs don't give us a forecast, and now they  
 21 really -- we won't let them give us a forecast; is  
 22 that what the situation is?  
 23 A I don't -- I don't say won't let them. I don't  
 24 think we require them.  
 25 Q On the NEBS compliance how does a CLEC engineer or

Page 60

1 A Like I said, we will -- Okay. I said earlier that,  
 2 you know, we don't -- we wouldn't necessarily, you  
 3 know, look in their cage unless we saw something was  
 4 wrong, like a piece of equipment smoking or  
 5 something. And then we might get with the CLEC and,  
 6 you know, try to determine if it was NEBS compliant  
 7 or why this piece of equipment was causing concern  
 8 and then determine if it had been NEBS compliant.  
 9 Q Okay. Assuming that in a normal course it would  
 10 have been a NEBS-compliant piece of equipment that  
 11 somehow malfunctioned and started smoking or giving  
 12 off gases or whatever it is that affected the  
 13 safety. But to me that doesn't sound like it's no  
 14 longer NEBS compliant; it sounds like it's  
 15 malfunctioning.  
 16 A In that situation if it's, you know, NEBS compliant  
 17 and it's malfunctioning, I would think that the CLEC  
 18 would go back to their manufacturer and say, hey,  
 19 you've got a faulty piece of equipment.  
 20 Q Would that trigger the right of Qwest to call it not  
 21 compliant with NEBS and close it?  
 22 A No, I don't think it would require us to say it's  
 23 not NEBS compliant. We're saying that, you know,  
 24 we've got a problem here. And I think the CLEC  
 25 would want to, you know, get back with the

Page 59

1 whoever is designing the collocation space and  
 2 equipment determine if equipment or installation is  
 3 NEBS compliant?  
 4 A They would be working with their manufacturer. The  
 5 manufacturer is the one that basically has to  
 6 give -- make sure the equipment is NEBS compliant.  
 7 Q So they can ask their manufacturer or specify when  
 8 they're buying the equipment that it be NEBS  
 9 compliant?  
 10 A Yes.  
 11 Q And that's the normal thing to do?  
 12 A I don't know what -- You know, I don't know what  
 13 Eschelon does or a CLEC does, but I would think that  
 14 would be normal for them to do when they purchase  
 15 equipment is to have the manufacturer they're  
 16 purchasing it from certify to them that it's NEBS  
 17 compliant.  
 18 Q And how would Qwest determine that something is not  
 19 compliant?  
 20 A The -- Like I just said, the equipment that we  
 21 purchase, we have the manufacturer either provide  
 22 the NEBS --  
 23 Q I'm sorry. My question was how would Qwest  
 24 determine that a CLEC's equipment was not NEBS  
 25 compliant?

Page 61

1 manufacturer and get a good piece of equipment.  
 2 Safety is all of our concerns in the central office,  
 3 CLECs and Qwest.  
 4 Q I had a quest -- or question on the quote  
 5 preparation fee for available collocation spaces.  
 6 Is the fee charged by Qwest for a subsequent quote  
 7 preparation the same fee? Is there only one quote  
 8 preparation fee?  
 9 A I believe there's one quote preparation fee.  
 10 Q And that's a fixed fee in Exhibit A rather than some  
 11 sort of time and material fee?  
 12 A Yes, I think it's a fixed fee, yes.  
 13 Q So that even though it would be a whole lot easier I  
 14 take it to fix that -- or to prepare that subsequent  
 15 quote, because you only have to update some  
 16 information I take it, it would be the same fee as  
 17 the first time around?  
 18 A It would be the fee that's posted right now. Like I  
 19 said, we're -- you know, we've got that teed up in  
 20 the cost docket. If there's concerns, I'm sure that  
 21 they'll be addressed at that time. We have -- You  
 22 know, in the cost model you have all the engineering  
 23 assumptions and everything that goes into developing  
 24 that cost.  
 25 JUDGE MIHALCHICK: That's all I have.

<p style="text-align: right;">Page 70</p> <p>1 Eschelon's proposed language; correct?                  2 A Yes.                  3 Q And there's no counter language that is reflected as                  4 Qwest's proposal for that section, is there?                  5 A No, that's correct.                  6 Q And then if you look at Section 9.1.15.3 and the                  7 subparts that follow, that as well is Eschelon's                  8 proposed language; correct?                  9 A Yes, that's correct.                  10 Q And Qwest has not proposed any counter language                  11 responding to those sections, has it?                  12 A No, it has not.                  13 Q Now, the circuits that we're talking about needing                  14 to be converted are circuits that are presently                  15 being used by Eschelon to serve end user customers;                  16 is that right?                  17 A That's correct. Those are UNE circuits today. And                  18 once the TRRO issues are settled, they will be                  19 private line circuits going forward.                  20 Q Now, there's no reason why the same physical                  21 facilities can't be used before and after the                  22 conversion; is that right?                  23 A That's absolutely true. It's the same physical                  24 facilities. However, it's two different products.                  25 One is an unbundled network element, and the other</p>	<p style="text-align: right;">Page 72</p> <p>1 that are involved in converting a circuit; is that                  2 right?                  3 A That's correct.                  4 Q And then carrying on at line 27 and then over to the                  5 next page, page 7, line 2, you say that the work                  6 done in these three functional areas is to assure                  7 that the data for a converted circuit is accurately                  8 recorded in the appropriate systems. Do you see                  9 that?                  10 A Yes, that's correct. That's because private lines                  11 are served out of one set of call centers and repair                  12 centers and maintenance centers and unbundled loops                  13 are provisioned and cared for out of other centers.                  14 And in order to make sure that you're provisioning                  15 the right service out of the right center, you have                  16 the data accurately recorded in the system.                  17 Q And, again, if you're able to just focus a little                  18 more closely on my question. I know that your                  19 attorney will have a chance to ask some questions                  20 when I'm done.                  21 The tasks performed in these three                  22 functional areas that we've been talking about do                  23 not involve making physical changes to the circuit;                  24 is that right?                  25 A That's correct.</p>
<p style="text-align: right;">Page 71</p> <p>1 is a -- what's effectively a retail analog, the                  2 special access or private line circuits. And those                  3 two products are provisioned and maintained and                  4 repaired out of different centers for -- in Qwest's                  5 network; and, therefore, the circuit ID is the                  6 identifier that shows whether one is an unbundled                  7 loop or whether it's a private line circuit.                  8 Q And I will be getting to those issues. But maybe if                  9 I could get you to focus a little more specifically                  10 on my question. From a functional perspective, a                  11 UNE and a private line do the same thing; correct?                  12 A That's my understanding, yes.                  13 Q They are two names essentially for the same thing;                  14 isn't that fair?                  15 A Well, I don't think they're two names for the same                  16 thing necessarily. They are -- One is a retail                  17 product, and one is a wholesale or unbundled network                  18 element product.                  19 Q The retail product, the private line, is more                  20 expensive than the UNE product; is that right?                  21 A Yes, that's correct.                  22 Q Now, in your rebuttal testimony -- and I'm looking                  23 at page 6, lines 22 through 26.                  24 A Yes, I have that.                  25 Q There you identify three different functional areas</p>	<p style="text-align: right;">Page 73</p> <p>1 Q And as I look at the language that you use to                  2 describe what these three areas do and I look at the                  3 verbs, I see a lot of reviewing and assuring and                  4 confirming and validating and verifying various                  5 pieces of data. Is that generally reflective of                  6 what these three functional areas do?                  7 A Well, I don't know that that's what these three                  8 areas do. That is part of the work tasks or                  9 functions that they're performing in the conversion                  10 process, certainly.                  11 Q That's what those three areas do in the context of                  12 converting a UNE to a private line; they do things                  13 like review data, they assure the data is accurate,                  14 they confirm the accuracy of data, they validate,                  15 they verify; correct?                  16 A And they make sure that the circuit identifiers are                  17 appropriately recorded in the appropriate systems,                  18 and they follow the flow of the order to ensure that                  19 there's no disruption to the CLEC's end user                  20 customer.                  21 Q Now, the reason why all this reviewing and                  22 confirming and validating is necessary is because                  23 Qwest has designed its systems such that a different                  24 circuit ID is assigned to a private line after the                  25 circuit's converted; correct?</p>

Page 78

1 A The end user service will not be disrupted in any  
2 way, that's true.  
3 Q And if I'm an end user and I'm on a phone line  
4 that's being converted from a UNE to a nonUNE, at  
5 the moment of the conversion I won't know it;  
6 correct?  
7 A No, because you are the CLEC's customer. You're not  
8 Qwest's customer. The CLEC is Qwest's customer, and  
9 the CLEC is changing product from an unbundled  
10 element to a private line circuit.  
11 Q If you go to page 7 of your testimony, lines 16  
12 through 18, you talk about the designer --  
13 A Yes.  
14 Q -- you see there? And you say that the designer  
15 reviews and validates the circuit design and it  
16 assures that the design records for the converted  
17 circuit match the current UNE circuit as well as  
18 that no visual changes to the circuit are needed.  
19 Do you see that?  
20 A That's correct.  
21 Q You don't say there that the designer actually  
22 designs anything. Is there anything that gets  
23 designed in connection with converting a UNE to a  
24 nonUNE?  
25 A No. What happens though is that the unbundled

Page 80

1 all of that work would not be necessary if the  
2 circuit ID didn't change; am I right about that?  
3 A If the circuit ID didn't change, you wouldn't be  
4 able to identify whether you had an unbundled loop  
5 or a private line circuit.  
6 Q Are you able to answer my question? Do you recall  
7 my question? My question --  
8 A Would you restate it?  
9 Q -- is all of that work that you've been describing,  
10 none of it would be necessary if the circuit ID  
11 didn't change; isn't that true?  
12 A It's true. That's a supposition that can't happen  
13 though in -- and properly identify the products.  
14 Q Another thing that you don't say that the designer  
15 does is you don't say that the designer engineers  
16 anything. In connection with a conversion from a  
17 UNE to a nonUNE, there's no engineering that goes  
18 on; isn't that right?  
19 A That's true, there's no engineering.  
20 Q And that's because there's already a functioning  
21 circuit, so there's no need for any designing or  
22 engineering or physical changes of any kind; isn't  
23 that right?  
24 A That's correct.  
25 Q So when the designer reviews and validates the

Page 79

1 element comes through as a disconnect. And because  
2 of all of the mechanization that's -- that happens  
3 in our systems, some mechanization that's been there  
4 for a very long time, some of it that we've been  
5 working on for the last 10 years to get in place, an  
6 order for a disconnect flows through certain  
7 systems, and then we've got essentially -- it's  
8 called an add-over disconnect. It's an add that's  
9 also happening at the same time for the private line  
10 circuit to establish that service for the CLEC.  
11 Well, what happens in those mechanized systems is  
12 that things flow along; and if you don't check and  
13 take care to make sure that the disconnect doesn't  
14 actually happen, then you could theoretically  
15 disrupt the end user customer's service. We don't  
16 want to have that happen. And so what we do is we  
17 have steps along the way that our people take to  
18 check that flow and make sure that the order is  
19 processing so that -- so that those mechanized steps  
20 don't happen. The automated steps that we've put in  
21 place to try to speed up provisioning of disconnects  
22 and installs and so forth have to be monitored so  
23 that some of those things don't happen so that the  
24 end user customer is not disconnected.  
25 Q All of those steps that you've just been describing,

Page 81

1 circuit design and assures the design records for  
2 the converted circuit match the UNE circuit, the  
3 only reason it wouldn't match is if the records were  
4 not correct in the first place; isn't that right?  
5 A No, that's not correct. The reason that they might  
6 not match is that when the disconnect is put into  
7 the system for the UNE circuit, the process, the way  
8 that it works now, allows that to flow through; and  
9 theoretically you could actually disconnect that  
10 circuit. The designer is there to make sure that  
11 that hasn't happened, that the information has  
12 remained the same, and that when the circuit ID  
13 converts to the private line that all of that is  
14 still in place. It's -- It's a matter of checking  
15 that it hasn't changed as a result of the disconnect  
16 order that has to happen to disable the unbundled  
17 network product in the systems.  
18 Q At page 8 of your rebuttal, lines 7 through 8, you  
19 talk about the service delivery implementer having  
20 overall control for the order provisioning. Do you  
21 see that?  
22 A Yes, that's correct.  
23 Q And the service delivery implementer verifies the  
24 record in and record out orders; is that correct?  
25 A Yes.

Page 82

1 Q And then in the footnote you describe what that  
2 means, the record in and record out orders; and you  
3 say that those are in and out service orders that  
4 establish the, quote, new, closed quote, private  
5 line service for the CLEC and disconnect the  
6 existing UNE by moving the circuit data from one  
7 billing system to another; correct?  
8 A That's correct.  
9 Q Now, I see that you've got the word new in quotes;  
10 is that right?  
11 A Yes.  
12 Q And the reason you've got quotation marks around the  
13 word new is because this is a service that's new in  
14 name only; isn't that correct?  
15 A It's a new product for the CLEC. It certainly does  
16 not change the existing circuit for the end user --  
17 CLEC's end user customer.  
18 Q Nor is the service actually disconnected; is that  
19 right?  
20 A That's correct. And that's why all these people do  
21 all of this work is to make sure that that doesn't  
22 happen.  
23 Q Now, the reason that all of this work has to be done  
24 is because of the policies that Qwest has adopted  
25 and set out in its nonCMP TRRO PCATs; isn't that

Page 84

1 Q You just don't know anything about any TRRO PCATs?  
2 A I don't.  
3 Q Okay. And the various policies that Qwest has in  
4 place regarding how circuits are going to be  
5 converted from UNE to nonUNE, you don't know where  
6 those policies are written down or how they got  
7 there?  
8 A No, I do not.  
9 Q Now, you say in your rebuttal at page 11, lines 19  
10 through 22, that for a limited period of time Qwest  
11 permitted CLECs to convert from private line  
12 circuits to UNEs without changing the circuit ID; is  
13 that right?  
14 A Yes.  
15 Q And here we're talking about really the mirror image  
16 of the conversion from UNE to nonUNE; is that right?  
17 A Yes, that's correct.  
18 Q And this is something that would have taken place  
19 back when UNEs came into being and it was necessary  
20 for those circuits to now be treated differently  
21 from a pricing perspective; is that correct?  
22 A That's correct.  
23 Q Now, when Qwest implemented the policy related to  
24 converting from private line circuits to UNEs, was  
25 there any separate conversion charge associated with

Page 83

1 right?  
2 JUDGE SHEEHY: NonTRRO --  
3 MR. MERZ: I'm sorry --  
4 JUDGE SHEEHY: -- PCATs?  
5 MR. MERZ: NonCMP TRRO PCATs.  
6 THE WITNESS: I would disagree with that.  
7 BY MR. MERZ:  
8 Q Well, let me ask you this: Has Qwest agreed to  
9 negotiate with any CLECs in connection with ICA  
10 arbitrations about the process by which UNEs would  
11 be converted to nonUNEs?  
12 A I don't know.  
13 Q Do you know whether Qwest has in connection with CMP  
14 adopted any processes relating to the conversion of  
15 UNEs to nonUNEs?  
16 A I don't know.  
17 Q Do you know whether Qwest has addressed the issue of  
18 conversion from UNEs to nonUNEs in any commission  
19 proceeding?  
20 A We're talking about the conversion in the TRRO  
21 proceedings that are going on, yes.  
22 Q You're aware that Qwest has implemented TRRO PCATs;  
23 correct?  
24 A I'm -- That's not my part of the business, so I'm  
25 not familiar with the PCATs.

Page 85

1 that conversion?  
2 A I'm not aware.  
3 Q You don't know either way?  
4 A I believe that -- Let me think about that. There is  
5 a TELRIC charge that has been established in most of  
6 our states. I don't know that it's been through a  
7 cost docket in all of the states. But there is a  
8 TELRIC charge for conversions of private lines to  
9 UNEs that was established I -- I would say starting  
10 around the 2001, 2002 time frame.  
11 Q And do you know whether a TELRIC charge for  
12 conversion of a private line to a UNE has been  
13 approved in Minnesota?  
14 A I believe that there is a charge, yes.  
15 Q The various functions that you described of the  
16 service delivery coordinator, the designer, the  
17 service delivery implementer, were those functions  
18 performed in connection with converting from a  
19 private line to a UNE circuit?  
20 A No, they were not.  
21 Q How -- When a private line was converted to a UNE  
22 circuit, how was the price difference reflected?  
23 A When we establish the cost for the private line to  
24 UNE conversion, at that point in time we thought we  
25 could do it without doing a circuit ID change. And

Page 86

1 so the process that was established or the work  
 2 tasks that went into the cost for that didn't  
 3 anticipate doing that circuit ID change. Actually  
 4 the private line to UNE conversion cost that I have  
 5 proposed now for the Minnesota cost docket does  
 6 anticipate that and does include those steps.  
 7 The reason that we didn't anticipate  
 8 those steps initially is because we thought we could  
 9 make the conversions without changing the circuit  
 10 IDs. When we did that, we found that -- and I  
 11 believe that I've addressed that in response to some  
 12 interrogatories that were submitted, and I've also  
 13 included some explanation of that in this testimony  
 14 I think -- that what happened was we were having  
 15 tremendous difficulty tracking those services as  
 16 UNEs and private lines if we didn't identify those  
 17 circuits in our systems. And so it created a  
 18 tremendous amount of manual effort and work for us  
 19 to do that. We were having to individually track  
 20 all of those circuits manually outside of the  
 21 systems that we established for doing that. And as  
 22 a result of that, in April of 2005 we cut off the  
 23 ability for CLECs to convert from private lines to  
 24 UNEs without going through a circuit ID change  
 25 process. And so our new cost study for that, the

Page 88

1 elements for loops and DS1s and DS3s, yes.  
 2 Q And a USOC is a what, uniform service...  
 3 A Universal service order code.  
 4 Q And it's a little piece of computer code that tells  
 5 the system what price is to be charged for a  
 6 particular element; is that right?  
 7 A It's a code that we receive from Telcordia for a  
 8 particular product. Private lines have USOCs  
 9 associated with them and so do unbundled -- some of  
 10 the unbundled network elements.  
 11 Q Now, you mentioned the fact that Qwest cut off the  
 12 ability to convert from a nonUNE to UNE and keep the  
 13 same circuit ID, Qwest cut that off in April 2005;  
 14 is that right?  
 15 A That's correct.  
 16 Q And that was about the time that Qwest was also  
 17 looking at how to implement the TRRO; is that right?  
 18 A I don't know when Qwest started to look at that.  
 19 Q I want to talk with you now about the power  
 20 reduction quote preparation fee. And it's  
 21 section -- I'm sorry, issue 8-22 and ICA Sections  
 22 8.3.9.1.3 and 8.3.9.2.3. And the issue here is  
 23 whether Eschelon should have to pay a quote  
 24 preparation fee when it requests either a reduction  
 25 or a restoration of power with reservation; is that

Page 87

1 one that we've submitted in Minnesota, reflects the  
 2 process and is essentially the same process in  
 3 reverse that we're using for the conversions of UNEs  
 4 back to private lines.  
 5 Q If your -- If your question -- If your answer  
 6 answered my question somewhere, I lost it. So I'm  
 7 just going to ask it again. When Qwest did the  
 8 conversion from private line to UNEs and didn't  
 9 change the circuit ID, how did Qwest go about  
 10 reflecting the price difference? Because UNEs are  
 11 cheaper than private line. How did you do that?  
 12 A How did we reflect the price difference?  
 13 Q How was the price difference accounted for? Was it  
 14 an adder on the bill? Was it a new USOC? How as a  
 15 matter of process did you implement the difference  
 16 in price when you did a conversion?  
 17 A And that's what I was trying to explain. It was a  
 18 very heavily manual process. It was changing the --  
 19 certainly the USOC, but it was also not changing the  
 20 circuit ID initially. And that's what caused all of  
 21 the manual processing.  
 22 Q If I understand what you're saying is you  
 23 implemented a new USOC to reflect the price change;  
 24 is that accurate?  
 25 A There was a USOC in existence for unbundled network

Page 89

1 correct?  
 2 A Yes.  
 3 Q QPF is a quote preparation fee; is that right?  
 4 A QPF is a quote preparation fee, yes.  
 5 Q And, I mean, just like what it sounds like, a quote  
 6 preparation fee is a charge that Qwest assesses for  
 7 preparing a quote; is that right?  
 8 A It's a charge that Qwest assesses for doing the work  
 9 associated with establishing an order and -- and  
 10 determining what the rate will be or determining  
 11 what work will be involved.  
 12 Q If you would go to the ICA, Section 8.3.9.1.3. Do  
 13 you have it there?  
 14 A Could you read me that section again, please?  
 15 Q Sure. 8.3.9.1.3.  
 16 A I have that.  
 17 Q That's language that Qwest has proposed that defines  
 18 what the power reduction QPF is?  
 19 A Yes.  
 20 Q And Qwest's language proposes that the QPF include  
 21 the cost of performing a feasibility study and  
 22 producing the quote for fulfilling the DC power  
 23 reduction request; is that right?  
 24 A That's correct.  
 25 Q And then 8.3.9.2.3 is Qwest's proposed language

Page 94

1 established; correct?  
 2 A That's correct.  
 3 Q I'm going to move now to expedites, issue 12-67. In  
 4 your rebuttal testimony at page 18 you discuss why  
 5 you believe TELRIC pricing is not appropriate for  
 6 expedites; is that right?  
 7 A That's correct.  
 8 Q And you believe that TELRIC pricing is not  
 9 appropriate for expedites because expedites are a  
 10 superior service; is that correct?  
 11 A That's correct.  
 12 Q Would you agree with me that if expedites are not a  
 13 superior service, then TELRIC pricing is  
 14 appropriate?  
 15 MR. TOPP: I'll object that that's  
 16 calling for a legal conclusion.  
 17 JUDGE SHEEHY: I'd say overruled. I  
 18 mean, you answered the first question, but you're  
 19 objecting to the second one?  
 20 Okay. You can answer it.  
 21 THE WITNESS: Could you repeat the  
 22 question?  
 23 BY MR. MERZ:  
 24 Q Sure. Will you agree with me that if expedites are  
 25 not a superior service that TELRIC pricing is

Page 96

1 A Well, I believe that the Minnesota commission has  
 2 established a retail expedite charge or has allowed  
 3 a retail expedite charge to go into place, and this  
 4 TSLRIC study would have supported that charge.  
 5 Q That study shows that an expedite rate of \$200 per  
 6 day is above cost, as computed by the TSLRIC study;  
 7 is that right?  
 8 A Yes, that's correct.  
 9 Q What did that study show Qwest's TSLRIC costs were  
 10 for expedites?  
 11 A I don't have that off the top of my head.  
 12 Q Do you have like a ball park?  
 13 A I don't know.  
 14 Q Was it a per-day number?  
 15 A Yes, it was a per-day number.  
 16 Q If you would go to your rebuttal at page 22, lines  
 17 17 through 18. You say there -- and I'm  
 18 paraphrasing -- but the price for expedites was set  
 19 at a level that Qwest believes reflects the value of  
 20 a premium service; is that right?  
 21 A Well, that's a paraphrase; but, yes, that's --  
 22 Q In setting the price at \$200 a day, how did Qwest go  
 23 about determining that that was a number that  
 24 reflected the value of the service?  
 25 A Well, I think that that's something that's

Page 95

1 appropriate?  
 2 A I would agree.  
 3 Q Now, at page 21 of your rebuttal you talk about a  
 4 TSLRIC study, T-S-L-R-I-C study; is that right?  
 5 A Yes, that's correct.  
 6 Q Now, that study has not been produced in this case,  
 7 has it?  
 8 A I'm not aware of whether it's been produced or not.  
 9 Q You don't know?  
 10 A No.  
 11 Q And it's a TSLRIC study that relates to the cost of  
 12 providing expedited service; is that right?  
 13 A Well, what I'm explaining here is that a TSLRIC is  
 14 what you would use to establish a price floor for a  
 15 service like an expedite.  
 16 Q And the specific study that you are talking about is  
 17 one that was done in connection with expedited  
 18 service; is that right?  
 19 A I do have an expedite study that's a TSLRIC study,  
 20 yes.  
 21 Q Do you know whether that study, the one that you're  
 22 just referring to, has been reviewed by the  
 23 Minnesota commission?  
 24 A Reviewed in what context?  
 25 Q In any context.

Page 97

1 accomplished by the product organization, when  
 2 they're looking at a service that they have a  
 3 particular cost for and they analyze what that --  
 4 what the value of that service is. It's not  
 5 something that's performed by me or by my  
 6 organization. It's performed in the product  
 7 organization to assess what that value is.  
 8 Q Is the answer to my question I don't know?  
 9 A I guess in particular how they came up with \$200,  
 10 yes, I would have to say I don't know.  
 11 Q Okay. Do you know what activities Qwest performs  
 12 when it expedites delivery of a loop that it doesn't  
 13 perform when it delivers that loop on the regular  
 14 interval?  
 15 A The activities that it performs is that it moves the  
 16 requesting party to the head of the line.  
 17 Q And I'm thinking about the act -- the provisioning  
 18 activities. Are there activities that Qwest does  
 19 when it expedites that it doesn't do when it  
 20 delivers a loop on the normal regular interval?  
 21 A There are not activities that are different, but the  
 22 activities are performed on different days than they  
 23 would normally be done.  
 24 Q You do the same thing; you just do it faster?  
 25 A That's correct.

Page 134

1 Qwest, the black -- the boldfaced and underlined  
2 language; is that right?  
3 A That is correct.  
4 Q And Qwest is proposing striking out the phrase  
5 access to; is that correct?  
6 A Correct.  
7 Q Now, your reason for striking the words access to is  
8 that typically you say when you discuss access to a  
9 UNE it is in the context of a CLEC paying a  
10 nonrecurring rate to be able to use the UNE; is that  
11 correct?  
12 A I hope and believe I say a recurring rate, that  
13 access to usually means use.  
14 Q Ah.  
15 A In common understanding of when you say someone's  
16 going to access a UNE, what you're really saying is  
17 they're going to use a UNE. And so what we were  
18 trying to indicate is that when you use a UNE, you  
19 pay the recurring rate to access it. That does not  
20 necessarily mean all of the other items that you  
21 have discussed here would be available as part of  
22 that recurring use rate. They would probably result  
23 in a different -- or additional charges.  
24 Q You understand that Qwest is required under Section  
25 251 of the telecom act to provide access to UNEs at

Page 135

1 cost-based rates; is that right?  
2 A Yes.  
3 Q And you understood that Eschelon's reason for  
4 including the phrase access to unbundled network  
5 elements in this section was to confirm that moving,  
6 adding to, repairing, and changing UNEs would be  
7 included within the scope of 251; is that right?  
8 A My understanding was that your request was that it  
9 would be part of access to UNEs. And that was --  
10 Again, the concern that we had, since access  
11 typically means use, we did not agree that the use  
12 of a UNE includes these activities. If you wanted  
13 to acknowledge within the interconnection agreement  
14 that you would have these additional activities  
15 available to you, we were fine with that.  
16 Q You understood though that Eschelon's reason for  
17 using the phrase access to UNEs in connection with  
18 these activities was to confirm that they fell  
19 within the scope of 251?  
20 A I'm going to defer to your understanding. Once  
21 again, we were trying to clarify that access to in  
22 the context of use, these would not be included.  
23 Q Well, let me ask you this: You understood, did you  
24 not, that by striking the words access to you were  
25 really defeating the purpose for which Eschelon had

Page 136

1 proposed this language in the first place?  
2 A No, I did not think that. My understanding was  
3 Eschelon wanted some assurances that the kind of  
4 activities here would be available for unbundled  
5 network elements, and we were agreeing those  
6 activities would be available to you. We were just  
7 disagreeing that they were available as part of you  
8 paying to access the UNE.  
9 Q At line 8 of page 5 you say that those activities  
10 will be available, quote, at the applicable rate.  
11 Do you see that?  
12 A Yes, I do.  
13 Q Now, by the applicable rate did you mean to be  
14 referring to a cost-based rate for those activities  
15 that are identified there?  
16 A I meant simply whatever proceeding would establish  
17 those rates, that's the applicable rate. And I was  
18 not predetermining what proceeding that would be.  
19 Q And is it your understanding that the fundamental  
20 dispute relating to this provision is, in fact, at  
21 what rate these activities will be provided?  
22 A I know that there is a rate dispute, and we  
23 understand that and believe that rate disputes need  
24 to obviously be resolved between the parties. But  
25 we didn't feel that a rate dispute could be resolved

Page 137

1 with this generic term of access to.  
2 Q And the specific rate dispute we're talking about is  
3 a dispute about whether those activities are  
4 required to be performed at cost-based rates or not;  
5 correct?  
6 A That is one of the disputes, yes.  
7 Q I'm going to talk with you now about network  
8 modernization and maintenance, which is issues 9-33,  
9 34, 35, and 36. And it concerns Section 9.1.9 and  
10 9.1.9.1 of the ICA.  
11 Issue 9-33 concerns Eschelon's addition  
12 of the phrase adversely affect to Section 9.1.9; is  
13 that right?  
14 A Correct. Well, that's my understanding from memory.  
15 If you want to -- If you're referring to part of my  
16 testimony, that would be helpful.  
17 Q And the ICA is in front of you there I think in a  
18 white binder.  
19 A Thank you.  
20 Q And if you want to refer to 9.1.9, please feel free  
21 to do that.  
22 A Yes.  
23 Q Now, agreed-upon language in Section 9.1.9 provides  
24 that modifications to maintain and modernize Qwest's  
25 network may result in minor changes to transmission

Page 138

1 parameters; is that right?  
 2 A Yes.  
 3 Q And Eschelon has proposed language that provides  
 4 that such changes will not adversely affect service  
 5 to end users; is that correct?  
 6 A Yes.  
 7 Q And you would agree with me, would you not, that a  
 8 change that results in a circuit not working should  
 9 not be considered a minor change?  
 10 A In a vacuum not in context, it would appear to me  
 11 that something that isn't working would not have  
 12 been minor.  
 13 Q I mean --  
 14 A That's out of context, the discussion.  
 15 Q If a circuit worked before Qwest undertook a network  
 16 maintenance or modernization activity and then after  
 17 that activity was completed the circuit didn't work,  
 18 you wouldn't regard the change resulting from that  
 19 activity as a minor change, would you?  
 20 A Assuming the circuit was being used appropriately  
 21 within ANSI standards for that circuit, yes.  
 22 Q And would you also agree with me that a change that  
 23 reduces the quality of a customer's service such  
 24 that it's something the customer notices, that that  
 25 kind of change would not be a minor change?

Page 139

1 A There are changes in transmission parameters that --  
 2 Or what I really should say is up above there are  
 3 added needed changes that people can arguably  
 4 disagree whether or not they are an adverse affect.  
 5 So, for example, Qwest believes that when it's  
 6 required to do an area code split and introduce a  
 7 new area code, that would be a necessary change that  
 8 would be appropriately noticed. However, some end  
 9 user may think that's an adverse affect. So, yes,  
 10 changes can be perceived differently, depending on  
 11 where you're at in the continuum.  
 12 Q And you provided an example of a change that -- like  
 13 an area code change that would result in an -- a  
 14 customer might perceive as being an adverse affect.  
 15 Do you have any other examples in mind?  
 16 A Going from 7 to 10-digit dialing, there are some  
 17 customers who believe that's an adverse affect.  
 18 It's a little dated, but in the past there used to  
 19 be services available with our step-by-step central  
 20 offices that were not available when we went to  
 21 electronic or digital central offices. And so a  
 22 customer might have thought that was an adverse  
 23 affect. So if what happens changes how you're  
 24 currently doing your service, you think it's adverse  
 25 to you, even if to the rest of the world it seems

Page 140

1 like a necessary change.  
 2 Q Let's focus now on the quality of the transmission  
 3 of the service. Would you agree with me that a  
 4 change that Qwest makes as part of its network and  
 5 modernization activities that results in a  
 6 degradation of the transmission quality of  
 7 customer's service such that the customer notices  
 8 it, for example, static on the line, too faint, any  
 9 other kind of change that you might think of, would  
 10 you agree that that kind of change that the customer  
 11 notices would be not a minor change?  
 12 A Once again, it's hard to talk in general terms and  
 13 make specific statements. What Qwest believes is  
 14 when it does maintenance and modernization  
 15 activities, it typically undertakes those to  
 16 increase or improve the service for all customers.  
 17 And if that improvement or change the service is  
 18 still being delivered within ANSI standards, that  
 19 would be a minor modification. Whether an  
 20 individual customer, again as we already discussed,  
 21 thinks that change has an adverse affect or not is a  
 22 subjective issue.  
 23 Q And my question I think is different than the one  
 24 you answered. My question is if the customer  
 25 notices a degradation in the transmission quality,

Page 141

1 the way the voice sounds in the receiver, would you  
 2 agree with me that when the customer notices  
 3 something like that, the change that causes that  
 4 degradation would not be a minor change?  
 5 A If the customer notices from that customer's  
 6 perception, yes, it would probably be an adverse  
 7 affect from that customer's perception.  
 8 Q And it wouldn't be a minor change; correct?  
 9 A Once again, we're talking theoretically in the  
 10 abstract. And I'm assuming if a customer from their  
 11 perspective thinks it's adverse, then they might  
 12 think it's not minor. But it's all within the  
 13 perception of the customer, which is why with the  
 14 Qwest language we believe that the appropriate  
 15 standard is ANSI standards.  
 16 Q Would you agree with me that it could be the case  
 17 that a service might be within ANSI standards but  
 18 still result in a circuit that doesn't work?  
 19 A Typically it would be because the service that's  
 20 being provided over that facility is not being  
 21 provided commensurate with those ANSI standards. If  
 22 the service worked within the same range -- Because,  
 23 once again, one is an underlying network element or  
 24 facility; the second one is the service that you're  
 25 providing. Different services are provided over

Page 154

1 A Correct.

2 Q Is Qwest saying that the notice requirements of this

3 Section 9.1.9 also apply to copper loops?

4 A There may be situations where notice requirements

5 would apply, but you would not have a copper loop

6 retirement. That is correct. So, for example, on

7 our -- If I could provide an example. On our

8 website let's suppose we have some copper facilities

9 and they are -- real life one -- it was trying to go

10 under a lake, and they kept getting wet. So now

11 we're going to take out the part from under the lake

12 and run them around the lake. That meant that the

13 loop would be longer then for customers; and,

14 therefore, there may have been some affect. So we

15 would notice onto our copper retirement notice

16 website that we've got some copper loops that used

17 to be 5,000 feet in length, and now they're going to

18 be 9,000 feet in length. So we notice other than

19 copper retirements changes to copper that could

20 affect the customer.

21 And the two things that we notice most

22 commonly is the loop would become longer for some

23 reason, because that could affect a service to an

24 end user customer; and secondly would be if we

25 change the gauge of the copper. So, for example, if

Page 155

1 we have some copper and the gauge is 24 but we're

2 going to put in new copper and it's 26, then we

3 would notice that change in gauge because there are

4 services that are affected by changes in gauge of

5 copper. So that's why we didn't want to defer all

6 copper notices to the section in your language,

7 because we felt like it didn't cover those

8 scenarios, and you would still want notice in those

9 scenarios.

10 Q I think I understand. But I just want to clarify.

11 Section 9.2.1.2.3 contains the notice provisions

12 relating to copper loops; is --

13 A For retirement.

14 Q -- that right? For retirement of copper loops?

15 A Correct.

16 Q And Section 9.1.9 contains notice provisions other

17 than those relating to retirement of copper loops?

18 A Correct. There are still other loop notices that

19 would be required.

20 Q And you understand that Eschelon's proposal with

21 respect to 9.1.9 is that the provisions of 9.1.9

22 would not apply to retirement of copper loops?

23 A My understanding was you were trying to clarify that

24 you were not disputing retirement of copper loops,

25 and that was your language to attempt to say that

Page 156

1 you understand that copper loops are discovered in

2 this other section. But, once again, by making that

3 reference, it implied that that was the only

4 provisions that would apply to copper loops, and we

5 didn't feel that was appropriate.

6 Q You understand that Eschelon's proposal is that

7 retirement of copper loops is dealt with in

8 9.2.1.2.3?

9 A Correct.

10 Q And Qwest agrees with that?

11 A Yes.

12 Q All right. There we go. I think that's it.

13 A But there's other notices that may apply.

14 Q You say there are other notices that may apply?

15 A Correct, other than copper retirements. And I just

16 indicated two notices that could easily happen to a

17 copper facility, lengthening the copper or changing

18 the gauge in the copper, and it particularly affects

19 DSL-related services.

20 Q And those notices that are not related to retirement

21 of copper loops are to be dealt with in 9.1.9?

22 A Correct.

23 Q And that's what Eschelon proposes; correct?

24 A Well, I think -- Now I understand that that's what

25 you're attempting to propose also; that we would

Page 157

1 continue to do appropriate notices regarding copper

2 other than just the retirement ones.

3 JUDGE SHEEHY: Can I just ask you, the

4 Eschelon language refers specifically to retirement

5 of copper loops being addressed in 9.2.1.2.3.

6 THE WITNESS: Correct.

7 JUDGE SHEEHY: Whereas your language is

8 more general. And it says, Details regarding copper

9 loops may be found at 9.2.1.2.3, which seems to be a

10 little more vague as to -- What section governs the

11 notices you were just talking about involving copper

12 loops that are not retirements?

13 THE WITNESS: If --

14 JUDGE SHEEHY: Do you understand what I'm

15 saying?

16 THE WITNESS: Yes, I think I do.

17 JUDGE SHEEHY: So is it -- I mean, do you

18 think your language is better or is there something

19 different that you're trying to address?

20 THE WITNESS: We were trying to be more

21 broad in our language that the total requirements

22 for copper loop retirement are not in that section.

23 Part of the issue is is that that section is very

24 much detailed under I believe fiber to the home. So

25 you are sort of setting up a scenario where you have

Page 166

1 any discussion of caps.  
 2 BY MR. MERZ:  
 3 Q Is it Qwest's intent to deny an Eschelon order based  
 4 on Qwest's belief that the order exceeds the caps in  
 5 a situation where Eschelon has provided  
 6 self-certification that the order is consistent with  
 7 the TRRO requirements?  
 8 A Again, at the risk of not repeating that, Qwest  
 9 believes that if the CLEC self-certifies that it  
 10 meets all the service eligibility criteria, then  
 11 Qwest would not reject that order. However,  
 12 Qwest -- or at least I do not believe that the TRRO  
 13 states that if you exceed caps, we still cannot  
 14 reject the order. So our plan would be if we knew  
 15 for a fact that an order would exceed the caps, we  
 16 would reject the order and give you the rationale of  
 17 why we believe it exceeded the caps.  
 18 Q And that would be true even if Eschelon certifies  
 19 that the order doesn't exceed the caps, that it is  
 20 consistent with the TRRO requirement?  
 21 A Yes.  
 22 Q Yes. All right. I'm going to ask you now a few  
 23 questions about cross-connects, which is issue 9-50.  
 24 A Yes.  
 25 Q And it's ICA Section 9.3.3.8.3. And the issue here

Page 168

1 Qwest's obligations to provide cross-connects; Qwest  
 2 is claiming that it just -- there's no demand for  
 3 that element; is that correct?  
 4 A That is correct.  
 5 Q Now, UCCRE, U-C-C-R-E, which is a similar issue,  
 6 issue 9-53, ICA Sections 9.1 and 9.1 -- I'm sorry,  
 7 9.9 and 9.9.1. And here the issue is Qwest's  
 8 obligations to provide the UCCRE element; is that  
 9 right?  
 10 A Yes.  
 11 Q And similar to the last one, Qwest's position here  
 12 is that there's no demand for that element?  
 13 A They are different factual situations. We  
 14 acknowledge that there is not an explicit removal of  
 15 cross-connects in the issue to do with the  
 16 cross-connect subloops. That is a service we were  
 17 voluntarily providing. We are not required to  
 18 provided it, and there's no demand, And we would  
 19 like to remove it.  
 20 With UCCRE we believe indeed that with  
 21 the TRO that there is no longer a requirement that  
 22 we provide UCCRE. So it is a fact -- There's  
 23 factual differences between the two scenarios.  
 24 Q Do you know whether AT&T has UCCRE in its contract?  
 25 A No, I do not.

Page 167

1 is Qwest's obligation to provide subloop  
 2 cross-connects; is that right?  
 3 A Yes.  
 4 Q Qwest's position on this issue is that there's no  
 5 CLEC demand for this product and that it desires to  
 6 phase the product out; is that right?  
 7 A Yes.  
 8 Q Now, you would agree with me that both AT&T and  
 9 Covad have cross-connects available in their ICAs?  
 10 A You know, I'm -- I have to apologize. I don't have  
 11 that memorized.  
 12 Q You just don't know?  
 13 A I don't know as I sit here.  
 14 Q Assuming that AT&T does have cross-connects in its  
 15 ICA, would you agree with me that if AT&T ordered  
 16 subloop cross-connects Qwest would be obligated to  
 17 provide those cross-connects pursuant to the ICA?  
 18 A If they were in the ICA and they ordered it, yes, we  
 19 would provide them pursuant to the ICA.  
 20 Q Would you also agree with me that if Eschelon orders  
 21 subloop cross-connects and Eschelon doesn't have  
 22 that in its ICA, Qwest would not provide those to  
 23 Eschelon?  
 24 A Yes, correct.  
 25 Q And Qwest is not claiming here that the TRO removed

Page 169

1 Q Do you know whether UCCRE is something that Qwest  
 2 makes available under its Minnesota SGAT?  
 3 A My understanding is it is in the Minnesota SGAT.  
 4 Q Assuming that AT&T ordered UCCRE today, if it does  
 5 in fact have it in its contract, Qwest would be  
 6 obligated to provide it; correct?  
 7 A Yes, except for there could be the pos -- with the  
 8 caveat that if the interconnection agreement that  
 9 they're operating on that has it is not completely  
 10 appropriate with TRO and TRRO, then there may be an  
 11 amendment situation there to bring that  
 12 interconnection agreement current because, as we all  
 13 know, there's different various ages of  
 14 interconnection agreements.  
 15 Q Well, in all events, so long as it's in the  
 16 agreement, AT&T would be entitled to it; correct?  
 17 A Subject to it being removed from the interconnection  
 18 agreement, yes.  
 19 Q Do you know whether Qwest has put out a TRO template  
 20 agreement?  
 21 A Yes.  
 22 Q And that template agreement is something that it  
 23 uses as the basis for negotiating amendments to make  
 24 ICAs consistent with the TRO; is that right?  
 25 A Yes.

Page 178

1 this issue. I would need to confirm it with the  
2 powers that be with inside Qwest. But, yes, it is  
3 a -- combined with the cost recovery language would  
4 be a significant movement.  
5 Q And if we took the BFR out of that provision, can  
6 you think of any other issues that you would have  
7 with that section?  
8 A There are some outlines in the special request  
9 process that do talk about if there are UNE costs  
10 that they would be identified. But the special  
11 request process starts with a premise that the UNEs  
12 are available and that the UNEs are in the ICA. So  
13 if the UNE wasn't in the ICA -- It's either in there  
14 or you would easily amend to add it. So it is a  
15 different scenario than the bona fide request.  
16 Q So if we took out the BFR, at least as you sit here  
17 now you can't think of any issues that you would  
18 have with Mr. Denney's -- proposal that's set forth  
19 in Mr. Denney's surrebuttal at lines -- page 78,  
20 lines 15, through page 79, line 1?  
21 A I do not. But, as I indicated, I'm not the final  
22 Qwest decision maker on that issue.  
23 Q Commingling. We're going to talk a little bit about  
24 commingling now, which is issue 9-58 and its  
25 subparts. The issue here concerns terms relating to

Page 180

1 A There are definitely private line scenarios that  
2 include loop and transport, yes.  
3 Q And that kind of circuit is also order -- a single  
4 ordering as of a single circuit ID; is that right?  
5 A It depends on the service that's being ordered. If  
6 it is a multiplex facility, there's, once again, a  
7 multiplexer in the combination. Then, no, they are  
8 not ordered on the same order. It's -- Private line  
9 has lots of variations, and you'd have to be private  
10 line specific to answer the question.  
11 Q A commingled EEL is an EEL where either the loop or  
12 the transport is not a UNE; is that right?  
13 A Yes.  
14 Q Would you agree with me that a UNE EEL and a  
15 commingled EEL are functionally the same thing, they  
16 do the same thing?  
17 A They could be doing the same thing, yes.  
18 Q And would you also agree with me that there are EELs  
19 that were before the TRRO UNE EELs, but since the  
20 TRO -- TRRO are now commingled EELs?  
21 A The ability to commingle a UNE and a nonUNE was put  
22 in place with the TRO/TRRO.  
23 Q And my question is there are things out there that  
24 before the TRRO both the loop and transport were  
25 UNEs, and so they were UNE EELs?

Page 179

1 the provisioning of commingled arrangements; is that  
2 right?  
3 A Yes.  
4 Q Commingling means the combination of a UNE with a  
5 nonUNE; is that right?  
6 A Yes.  
7 Q An EEL -- I'm just going to go through some language  
8 here. An EEL is a combination of loop and  
9 transport; correct?  
10 A Correct. There are different types of EELs, but  
11 they are generically.  
12 Q A UNE EEL is a combination of loop and transport  
13 where both the loop and the transport are UNEs;  
14 correct?  
15 A Yes.  
16 Q A UNE EEL is ordered on a single order and as a  
17 single circuit ID; is that correct?  
18 A A UNE EEL that's a single bandwidth UNE EEL is  
19 ordered on a single LSR. If it's a multiplexed EEL,  
20 so that there is a multiplexer in the UNE  
21 combination, then, no, they are not ordered on a  
22 single LSR.  
23 Q There is -- Well, is there a special access  
24 counterpart of a UNE EEL where both the loop and  
25 transport is special access?

Page 181

1 A Yes.  
2 Q And some of those things out there that were  
3 formerly UNE EELs are now commingled EELs because  
4 either the loop or the transport portion has been  
5 reclassified as a nonUNE?  
6 A Yes. But it's not the reclassification that created  
7 commingled EELs. Commingled EELs were created  
8 because the FCC specifically removed a prohibition  
9 on commingling. So your example with the  
10 paired/nonpaired wire centers lead to CLECs maybe  
11 needing more commingled EELs. But the fact that you  
12 could commingle a UNE and a nonUNE was a separate --  
13 specific issue separate and apart from the wire  
14 center proceeding -- or section.  
15 Q I want you to think of a hypothetical circuit that  
16 before the TRRO was a UNE EEL and after the TRRO is  
17 a commingled EEL.  
18 A Yes.  
19 Q The difference between those two things is the  
20 price; is that correct?  
21 A Typically, yes.  
22 Q Now, you in your testimony describe various changes  
23 to Qwest's process regarding commingling; is that  
24 right?  
25 A Yes.

Page 182

1 Q Now, those changes were not negotiated as part of  
2 any ICA negotiation, were they?  
3 A No.  
4 Q And you're aware that Eschelon and other CLECs, in  
5 fact, requested to have an opportunity to negotiate  
6 regarding those processes as part of their ICA  
7 negotiation?  
8 A That's my understanding of what you've requested  
9 here, yes.  
10 Q And the changes relating to Qwest's process for  
11 commingling, those changes were not addressed in  
12 CMP, were they?  
13 A Qwest had a CR put out to discuss those in CMP; and  
14 at the time it was discussed, it was mutually agreed  
15 by the individuals on -- I wasn't one of them, but  
16 the individuals who were on the CMP call regarding  
17 that CR that they would be held in abeyance until  
18 the TRRO-related dockets were completed at the state  
19 level.  
20 Q When you say it was agreed, who agreed to that?  
21 A It was whatever CLECs were on the call when that  
22 issue was discussed.  
23 Q Are you able to identify even one CLEC that agreed  
24 that the TRRO issue should not be dealt with in CMP?  
25 A I've not looked at a list of the CLECs. So, no, I

Page 183

1 cannot confirm one.  
2 Q Qwest's changes to its process relating to  
3 commingling have not been approved by any state  
4 commission, have they?  
5 A No.  
6 Q The policies that Qwest now has in place relating to  
7 commingling have been implemented by Qwest without  
8 any input from CLECs; isn't that right?  
9 A I don't know that I could go as far as to say that  
10 there's been no input. But back to your original  
11 question, no, they have not gone through CMP because  
12 it was agreed that the CMP would be put in abeyance  
13 until such time as the state proceedings had been  
14 completed.  
15 Q Was another aspect of that abeyance that the changes  
16 wouldn't be addressed until the SGATs had been  
17 revised to reflect the TRRO?  
18 A I believe at one time that statement was made, that  
19 the changing of the SGAT would be the trigger to do  
20 the changes in CMP.  
21 Q And Qwest has now apparently decided it's not going  
22 to be changing SGATs anymore; is that correct?  
23 A Qwest has determined that, given the changes that  
24 have happened in the marketplace since the 2003 time  
25 frame, that it's not an effective use of our time or

Page 184

1 resources or the time and resources of the  
2 commissions or other CLECs to update the SGAT since  
3 CLECs have elected to have more tailored agreements  
4 and there is no longer CLECs who are truly adopting  
5 something in its entirety such as the SGAT.  
6 Q Now, I've been asking you specifically about Qwest's  
7 policies relating to commingling, but I could ask  
8 the same questions regarding conversions. I mean,  
9 the policies that Qwest has put in place regarding  
10 converting UNEs to nonUNEs also have not gone  
11 through the CMP process?  
12 A I'm not the witness on conversion. That was Terri  
13 Million. So I don't feel comfortable speaking to  
14 conversions.  
15 Q Just don't know?  
16 A Don't know.  
17 Q All right. I want to talk with you now about  
18 loop-MUX combinations, which is issue 9-61.  
19 A Yes.  
20 Q And the issue here is whether Qwest must provide  
21 multiplexing at UNE rates when multiplexing is  
22 combined with a UNE loop; is that right?  
23 A Yes.  
24 Q Now, looking at your testimony, page 39, lines 1  
25 through 3, you say that Qwest will provide --

Page 185

1 MR. DEVANEY: Is this direct, Mr. Merz?  
2 BY MR. MERZ:  
3 Q I'm sorry, your surrebuttal testimony.  
4 A Surrebuttal.  
5 Q Page 39, lines 1 through 3. I'll just wait till you  
6 get there.  
7 A Yes.  
8 Q You say that Qwest will provide multiplexing  
9 pursuant to UNE rates, terms, and conditions when  
10 it's used for combination of UNE transport with a  
11 UNE loop or when it's used with transport alone; is  
12 that right?  
13 A Yes.  
14 Q Now, when multiplexing is provided with UNE  
15 transport alone, the multiplexing connects the  
16 transport to the CLEC's collocation; is that right?  
17 A Not nec -- Well, it would depend on the  
18 configuration. What I was attempting to say there  
19 is that if you ordered unbundled dedicated  
20 interoffice transport, or UDIT as it's called  
21 typically in the ICA, when you order UDIT, one of  
22 the feature functionalities of UDIT is multiplexing.  
23 So, yes, you could put that order in with  
24 multiplexing, and they would both be UNE rates.  
25 Q And then what would the multiplexing connect the

Page 186

1 transport to?

2 A The multiplexing could either connect to UNE loops

3 that were brought to it; and that would be the

4 combination we talked about before, UNE transport

5 with a UNE loop. They could connect to private line

6 facilities. There may be a CLEC who currently has

7 an interconnection agreement -- excuse me, has an

8 agreement with Qwest with volume discounts and

9 et cetera, so they don't want to disconnect maybe a

10 private line channel termination that they have; but

11 they now need to combine it with services and send

12 it over this transport. Then they could potentially

13 make that type of combination.

14 Q Now, I had understood your testimony to be saying

15 that multiplexing couldn't be used to do

16 commingling; is that -- Did I miss something there?

17 A What -- Hopefully what my testimony was talking

18 about is that multiplexing goes with the transport.

19 So if it's private line transport, then the

20 multiplexer would be at private line rates. The

21 multiplexing is ordered and put in place with the

22 higher bandwidth facility. So whenever you order

23 transport, if you order UNE transport, you can get

24 UNE multiplexing. If you order private line or

25 special access -- private line or special access

Page 188

1 transport to the collocation cage, it's your view

2 that would be a commingled arrangement?

3 A I think the part that's confusing is putting the

4 transport in there. Because it's that clear; if you

5 have transport, the multiplexing follows the

6 transport. So if you used UNE transport to connect

7 to a distant collocation cage, you would get UNE

8 multiplexer. If you were using private line or some

9 other termination to connect to collo other than UNE

10 transport, we don't have to provide stand-alone

11 unbundled UNE multiplexing. It's not a separate

12 element, its own UNE. So, therefore, you would have

13 to purchase stand-alone multiplexing from private

14 line or special access.

15 MR. MERZ: Could I have just one second

16 here?

17 (Off-the-record discussion.)

18 BY MR. MERZ:

19 Q Do you believe that the way that you've described

20 how multiplexing can be used is covered by the Qwest

21 proposals in the ICA?

22 A Qwest has proposals for multiplexing in its ICA.

23 One is with UNE transport. If you order UNE

24 transport, then you can get UNE multiplexing, yes, I

25 believe -- as I indicated, that is contemplated in

Page 187

1 transport and you want multiplexing, the

2 multiplexing is put in with that facility. And

3 that's how it's contemplated and identified by the

4 FCC, as we've talked about in my testimony.

5 Q Now, is one possible use of multiplexing and

6 transport that the multiplexing could connect the

7 UDIT transport to the CLEC's collocation cage?

8 A Yes. You could use multiplexing to go into a

9 collocation cage, use a connection into a

10 collocation cage, yes.

11 Q And in that instance it would not be a commingled

12 arrangement; is that correct?

13 A Well, it would be a commingled arrangement from the

14 perspective that you had to have something put in

15 the transport, because transport is not available as

16 a stand-alone UNE. So, therefore, you couldn't have

17 installed the transport as a stand-alone UNE. Qwest

18 is not required to provide transport as a

19 stand-alone UNE. So the only way you would get

20 transport -- commingling is through a private line

21 or access arrangement if you were not purchasing

22 transport. So it does become a commingled

23 arrangement at that point in the scenario that

24 you've just listed.

25 Q So if the CLEC were to use multiplexing to connect

Page 189

1 the ICA. If you are doing a commingled arrangement

2 with private line transport and you need

3 multiplexing, you would purchase the multiplexing

4 from that private line or access tariff, and I

5 believe that is contemplated in the ICA. If you

6 were purchasing stand-alone multiplexing, that would

7 have to be ordered from a private line or access

8 tariff because Qwest does not have to provide

9 stand-alone multiplexing as a UNE; and, therefore,

10 to use that, because it would be private line, it

11 would be a commingled arrangement. And in 9 --

12 excuse me, in Section 24 of --

13 JUDGE SHEEHY: To use it --

14 THE WITNESS: -- the ICA to have --

15 JUDGE SHEEHY: To use it with what?

16 THE WITNESS: -- it commingled. To use

17 it with what you would be using it with other than

18 transport. So, for example, such as a loop, if you

19 wanted a UNE loop and private line multiplexing,

20 that would be a commingled arrangement; and that

21 would be in Section 24 of the ICA.

22 BY MR. MERZ:

23 Q If you -- If Eschelon were to buy UDIT transport and

24 multiplexing and go to the collocation cage and then

25 connect to a private line, that would be an

Page 190

1 arrangement that would be permissible under Qwest's  
 2 view; correct?  
 3 A You could have UNE tran -- UNE -- let me think  
 4 through that. UNE transport, UNE multiplexing, but  
 5 then you had a private line hooked to it, then  
 6 you're correct, and I actually -- If I said that,  
 7 I'm going to -- I'm going to have to retrack if I  
 8 misspoke earlier.  
 9 How it works is if you have a UNE -- a  
 10 UNE can ride a private line facility, but a private  
 11 line cannot ride a UNE facility. So if you take and  
 12 put a private line onto a UNE facility, you no  
 13 longer have the UNE rate; you would have the private  
 14 line rate.  
 15 Q Yeah, I'll ask to see if I'm understanding. What I  
 16 understood you to be telling me before is if you had  
 17 an unbundled transport, UNE transport --  
 18 A Correct.  
 19 Q -- you could get multiplexing as a UNE?  
 20 A Correct.  
 21 Q And then that multiplexing could go to Eschelon's  
 22 collocation cage?  
 23 A Correct.  
 24 Q And Eschelon could connect to a private line?  
 25 A Correct --

1 Q And under those --  
 2 A -- in their collocation cage.  
 3 Q In their collocation cage.  
 4 A Yes.  
 5 Q Under those circumstances, multiplexing would be  
 6 provided by Qwest at TELRIC rates?  
 7 A Because there was UNE transport hooked to the  
 8 multiplexing, and then the multiplexing went into  
 9 the collocation cage, yes.  
 10 MR. MERZ: Could we have just a short  
 11 break to figure out --  
 12 JUDGE SHEEHY: Yes. In fact, why don't  
 13 we just break for the day.  
 14 MR. MERZ: That would be fine.  
 15 JUDGE SHEEHY: And then you can figure  
 16 everything out.-  
 17 MR. MERZ: Well, I don't know about  
 18 everything. Let's not be too crazy here. We'll  
 19 just take what we can get.

Page 5

1 JUDGE SHEEHY: All right. Good morning,  
 2 everyone. Any further news?  
 3 MR. DEVANEY: Good morning, Your Honor.  
 4 Yes, we do have some further news.  
 5 With respect to issue 9-54(A) --  
 6 JUDGE SHEEHY: Recurring rates for  
 7 different UNE combinations?  
 8 MR. DEVANEY: That's correct. And the  
 9 parties have agreed to resolve that issue for  
 10 Minnesota only, and do so -- and I'm now referring  
 11 to page 29 of the revised Issues matrix. I'll wait  
 12 until you get there.  
 13 Under the Eschelon-proposed language  
 14 column, the parties have agreed to resolve this  
 15 issue for Minnesota by removing the reference to BFR  
 16 in that first sentence, and with that change the  
 17 issue is resolved and closed for purposes of  
 18 Minnesota.  
 19 JUDGE SHEEHY: Okay. And that's your  
 20 understanding as well, Mr. Merz?  
 21 MR. MERZ: Yes, it is, Your Honor.  
 22 JUDGE SHEEHY: Okay. All right. Then  
 23 anything else?  
 24 MR. MERZ: I did have just a couple  
 25 questions left of my cross.

Page 14

1 proposed by Eschelon is such changes may result in  
 2 minor changes to transmission parameters, but will  
 3 not adversely affect service to any end user  
 4 customers, parens, in the event of emergency,  
 5 however, see section 9.1.9.1 and, parens, for  
 6 retirement of copper loops see section 9.2.1.2.3; do  
 7 you see that?  
 8 A Yes, I do.  
 9 Q And the parenthetical for retirement of copper  
 10 loops, see section 9.2.1.2.3, that's agreed upon  
 11 language; correct?  
 12 A The version I'm looking at, yes.  
 13 Q And so you would agree with me that to the extent  
 14 that the retirement of a copper loop might result in  
 15 a change to transmission parameters that affect an  
 16 end user customer, the provisions relating to such a  
 17 retirement are set forth exclusively in 9.2.1.2.3?  
 18 A I'm struggling with exclusively again because, as we  
 19 indicated below, the discussion of possible planned  
 20 dispatches and how we're committing there would be  
 21 no charge and that you would also have advance  
 22 three-day notice. So to send everything at that  
 23 point to that section I'm not sure would give you  
 24 all of the additional commitments that we've made in  
 25 this section.

Page 16

1 A Yes.  
 2 Q And that is the language that would apply to any  
 3 network maintenance and modernization activities  
 4 that concern or involve retirement of copper loops?  
 5 A Yes, except for, as I have indicated, in 9.1.9, we  
 6 make a commitment that if we have a planned dispatch  
 7 to your end user premise we'll give you notice of  
 8 three days in advance. Because typically you know  
 9 when we're going out to the customer premise because  
 10 you've either ordered service or you've called for  
 11 repair so you know we're going to contact them.  
 12 We're just making a commitment in 9.1.9  
 13 that if we have a planned modernization, we know  
 14 we're going to be out there, you don't know about  
 15 it, we're going to give you the three-day notice.  
 16 So I guess I'm failing to understand why that would  
 17 not be a good thing in the context of a copper  
 18 retirement.  
 19 Q Well, I want to make sure that we understand what  
 20 provisions Qwest believes will apply when it retires  
 21 copper loops. And my question concerns how 9.2.1.2  
 22 relates to 9.1.9, and Eschelon -- the parties have  
 23 agreed that retirement of copper loops would be  
 24 covered by 9.2.1.2.3. Is that not your  
 25 understanding?

Page 15

1 Q When Qwest retires a copper loop it's required to  
 2 work jointly with Eschelon; isn't that right?  
 3 A Typically we do when we have a retirement of copper  
 4 loop.  
 5 Q And that's agreed upon language in the ICA; correct?  
 6 MR. DEVANEY: Is there a particular  
 7 section, Mr. Merz?  
 8 THE WITNESS: Yeah.  
 9 BY MR. MERZ:  
 10 Q 9.2.1.2.3.1.  
 11 A Yes. It does speak of working jointly.  
 12 Q And it says, the last sentence of that section says,  
 13 should retired copper facilities be replaced by like  
 14 copper facilities, Qwest and CLEC will jointly  
 15 coordinate the transition of current working copper  
 16 and subloops; like copper facilities so that  
 17 service interruption is held to a minimum; correct?  
 18 A Yes.  
 19 Q And that's agreed upon language?  
 20 A Yes.  
 21 Q And then 9.2.1.2.3.2 also requires that Qwest and  
 22 CLEC will jointly coordinate transition when copper  
 23 loops are being retired; correct?  
 24 A Yes.  
 25 Q And that's closed language?

Page 17

1 A It is my understanding, and to explain it more  
 2 fully, is 9.1.9 is general provisions that apply to  
 3 all maintenance and modernization activities.  
 4 Inside those maintenance and modernization  
 5 activities copper retirement is one of the more --  
 6 one of the more important activities between a CLEC  
 7 and Qwest, and it deserves and has some special  
 8 notification requirements to have more spelled-out  
 9 detail. So we've referred to that section so that  
 10 you can get the more spelled-out detail. But in  
 11 referring to that section for more detail, we were  
 12 not attempting to say that we wouldn't have to live  
 13 by any general requirements here in 9.1.9. We're  
 14 trying to be inclusive.  
 15 Q You would agree with me that the retirement of a  
 16 copper loop would result in something more than a  
 17 minor change in transmission parameters; correct?  
 18 A Yes.  
 19 Q And 9.1.9 concerns network modernization and  
 20 maintenance work that may result in minor changes to  
 21 transmission parameters; correct?  
 22 A Yes.  
 23 Q And that's closed language as well?  
 24 A Yes.  
 25 Q Okay. Then we had some discussion yesterday toward

Page 54

1 A Yes, I do.  
2 Q I think you said you didn't know. But do you know  
3 if AT&T or Covad ever ordered either service?  
4 A No, they have not.  
5 Q Turning to the issue of commingling, which is issue  
6 9-58. Mr. Merz asked you during his cross yesterday  
7 whether Qwest can use a single LSR, local service  
8 request, for a single band billing account number,  
9 and a single circuit I.D. for UNE EELs; do you  
10 recall that line of questioning?  
11 A Yes, I do.  
12 Q And I think the inference from his question was, if  
13 Qwest can use single LSRs and single circuit I.D.s  
14 for UNE EELs, for example, shouldn't it be able to  
15 use single LSRs and single circuit I.D.s for  
16 commingled EELs. Is that a fair inference?  
17 A No, it is not. Because a commingled arrangement is  
18 a UNE circuit that would then be part of an  
19 arrangement with a non-UNE circuit, typically that  
20 would be private line, and today our UNEs are  
21 ordered via an LSR in our CRIS system, and private  
22 line are ordered via an ASR in our IAB system.  
23 So to have a single circuit with a single  
24 bill, first of all, commingling is two individual  
25 things that are put together, and the two individual

Page 55

1 things have different terms and conditions,  
2 different billing, different procedures and  
3 processes. So to attempt to treat it as if it was  
4 one circuit when it's really not, it's two different  
5 circuits that's being interconnected together, we  
6 would need to move one or the other to the same  
7 billing system.  
8 We would either need to move all of our  
9 ordering, USOCs, procedures, flow through, pricing  
10 of private line into UNE, or we would need to move  
11 UNE into IABs, and in either case it would be  
12 extensive system work between the two systems.  
13 Q Can you elaborate on what you mean by extensive  
14 systems work?  
15 A Well, you'd have to redesign the whole ordering and  
16 billing system for one of the services to put it  
17 into the alternate system. I believe in the Covad  
18 information, that I believe they had wanted to move  
19 private line from IABs into using an LSR, so that  
20 was the service I think that would have to be moved  
21 to effectuate that. And, again, it would be similar  
22 to the work that Qwest would be required to do if  
23 Qwest was ever required to do ratcheting.  
24 And as I said in my testimony, when Qwest  
25 even began to look at what kind of work that would

Page 56

1 take, it was just thousands of hours of programming  
2 time, and the complexity is such that it would take  
3 a long time just to even figure out, and cost a lot  
4 of money, to figure out how you would do it. So  
5 even to be able to size the job within our ordering  
6 systems would be significant.  
7 Q Can you provide some sense of the magnitude of  
8 dollars that would be involved in figuring out how  
9 to do it and then actually implementing that merging  
10 of the billing systems? I'm not asking for a  
11 specific. Are we talking hundreds of thousands of  
12 dollars or millions of dollars?  
13 A In a ratcheting case in, I believe, 2002, in New  
14 Mexico, where we were potentially going to be  
15 ordered to ratchet, even though that's prohibited  
16 per the FCC rules, in that proceeding it was about  
17 \$5 million, they thought, to be able to move one to  
18 the other in the systems. But, again, they had not  
19 done extensive -- it would be an extensive amount of  
20 work just to get the software, you know, to build  
21 the parameters of what you would need to do. But in  
22 that case that was an estimate that was given to the  
23 New Mexico Commission, \$5 million.  
24 Q Are you aware of whether Eschelon is proposing or  
25 has agreed to compensate Qwest for costs that would

Page 57

1 be incurred to merge the billing systems as you have  
2 described?  
3 A No, I'm not aware that Eschelon has made any offer  
4 to pay for any additional costs.  
5 Q Mr. Merz asked you during his cross yesterday  
6 whether CLECs have been consulted with respect to  
7 Qwest's provisioning processes relating to  
8 commingled EELs and arrangements; do you recall  
9 that?  
10 A Yes, I do.  
11 Q And do you have an update on where that stands?  
12 A As I indicated in my testimony, what we would  
13 typically call the PCATs, the product guide  
14 catalogs, had not gone through CMP, Qwest believed  
15 that at the time that CR was introduced a mutual  
16 agreement had been made to delay reviewing the PCATs  
17 until all of the TRRO-related dockets had been  
18 completed within the states. However, Qwest has  
19 relooked at that as we continue to relook at lots of  
20 items as this case has gone on, and Qwest is willing  
21 and would be agreeable to bringing those PCATs  
22 forward for review in CMP as soon as possible.  
23 We've missed the window, there are some  
24 very specific notice requirements, and so we would  
25 estimate it would take about 60 days, given all the

Page 58

1 normal notice requirements, to get that properly  
2 teed up, and then we would be at that point taking  
3 the -- all of the TRRO-related ordering and  
4 provisioning systems for a review through CMP.  
5 Q Thank you, Ms. Stewart.  
6 MR. DEVANEY: Your Honor, I'm done with  
7 my redirect with the exception of the loop MUX issue  
8 we discussed earlier.  
9 JUDGE SHEEHY: Mr. Merz, anything  
10 further?  
11 MR. MERZ: Yes, Your Honor, just a few  
12 things here.  
13 RE-CROSS-EXAMINATION  
14 BY MR. MERZ:  
15 Q You had some discussion with Mr. Devaney regarding  
16 noticing customers of an area code split?  
17 A Yes.  
18 Q Would you regard an area code split as a change that  
19 is end user specific?  
20 A Yes.  
21 Q Would not an area code split affect all end users  
22 the same?  
23 A Yes. I mean, all end users, of course, that are  
24 impacted by the area code split.  
25 Q So how would you consider an area code split to be

Page 59

1 an end user specific change?  
2 A Because that specific end user would now have to  
3 dial a different area code. They would have to give  
4 a different telephone number to people. So that  
5 while it would affect multiple end users, definitely  
6 each individual end user would think they were  
7 affected.  
8 Q So in your view any change in Qwest's network is an  
9 end user specific change; is that correct?  
10 A No. There could be changes within our network where  
11 it would be seamless to the end user customer so  
12 that the end user customer would not perceive that  
13 they were being impacted. The area code wouldn't be  
14 one of them, but --  
15 Q But you're talking about two different things,  
16 you're talking about whether a customer perceives it  
17 as opposed to whether the change is end user  
18 specific. Even if the change is not perceptible to  
19 the customer, wouldn't it be your view that the  
20 change is end user specific?  
21 A It could be. An example of we put a new tandem in  
22 the network and currently their network is being  
23 routed in a certain manner, and the end user  
24 customer, they don't know and they're indifferent,  
25 but a CLEC who is providing service to that customer

Page 60

1 would need to know what's going on with the routing  
2 and the fact that the tandem is changing. So we  
3 would notify CLECs via our website that, oh, by the  
4 way, there's going to be a tandem change, so you may  
5 have to change some links between your network and  
6 our network at that tandem.  
7 So it would ultimately be end user  
8 affecting, but you're right, the end user would  
9 never know because the routing is going to be  
10 happening. To them, they're not going to perceive a  
11 change, because that's a behind-the-scenes routing  
12 where that would be a change to the CLEC.  
13 Q And just to get back, then, to my original question,  
14 would it be your view that any change that Qwest  
15 makes to its network is an end user specific change?  
16 A I don't know that I would say that any change that  
17 Qwest would make to their network is end user  
18 specific.  
19 Q What would be one that wouldn't?  
20 A Let's see. If you were changing SS7 links between  
21 two systems where nothing has changed for the  
22 customer, I guess if I want to be real specific, if  
23 you had redundant links and you only changed one of  
24 them and not the other. I guess I'm struggling to  
25 understand the difference that you're trying to --

Page 61

1 Q Well, and the reason I asked is Eschelon's proposed  
2 language for 9.1.9 that would limit certain notice  
3 obligations to changes that are end user customer  
4 specific, and what I'm understanding you to be  
5 saying is you don't regard that as any limitation.  
6 Is that Qwest's interpretation of Eschelon's  
7 proposed language?  
8 A That is one of our concerns, definitely, about your  
9 language.  
10 Q And what I'm understanding you to be saying is if an  
11 area code split is end user specific, it seems like  
12 any kind of change that Qwest might possibly make is  
13 going to, by definition, affect some end user or  
14 group of end users and are therefore end user  
15 specific?  
16 A That is definitely one of our concerns with the  
17 language.  
18 Q Ms. Anderson had asked you some questions about  
19 emergency notification and you referred to the  
20 problem of identifying Eschelon's end users; do you  
21 recall that?  
22 A Yes, I do.  
23 Q Now, the term end user is actually a defined term in  
24 the ICA; isn't that right?  
25 A Yes.

Page 86

1 idea.

2 Q What would happen if Qwest filled the order and it

3 turned out that it exceeded the cap by two, is that

4 those two loops would be moved to special access and

5 Qwest would be fully compensated; isn't that right?

6 A Well, that was your decision. I guess what you're

7 saying is is that part of your proposal is is that

8 any costs that occur because of this order going

9 through that you would pay and make Qwest whole,

10 even if it was a total cancellation and you never

11 put facilities in. See, I don't know that it's a

12 given if a UNE wasn't available, that that's the way

13 you would do something.

14 You may choose, oh, I exceeded the cap at

15 10 DS1s, I'm just going to order one DS3, so you

16 would order a totally different type of facility.

17 Because that's why there is a cap, because if there

18 wasn't a cap on DS1s then you could exceed the

19 capacity of a DS3.

20 That's what I would do, if I had 12 DS1s

21 and I knew the cap was 10 but I could order a DS3

22 loop, I would cancel those orders in their entirety

23 and order a new facility of a DS3, the higher

24 bandwidth, because obviously I need it. So I would

25 have wanted those orders rejected because that's not

Page 87

1 ultimately what I'm going to install.

2 Q The parties have agreed on the terms of how Qwest

3 will be compensated in 9.1.13.5, if you'd look at

4 that, please?

5 A Yes, I will. 9.1 -- I'm sorry.

6 Q 9.1.13.5.

7 A Can I take a minute to read it?

8 Q Yes.

9 A I've read it.

10 Q And what I understand this to be saying is if it is

11 determined following dispute resolution that a

12 particular UNE is not a UNE, that Qwest will be

13 compensated; is that right?

14 A Yes. It does talk in terms of alternative service

15 arrangements.

16 Q And it provides for back billing for the difference

17 between UNE rates and the rates for Qwest

18 alternative services; is that right?

19 A Yes, it does.

20 Q And that's agreed upon language?

21 A Yes, it is.

22 Q We were talking about commingling and Qwest's

23 proposal to now bring its PCATs forward through CMP;

24 do you recall that?

25 A Yes, I do.

Page 88

1 Q Now, that's a proposal that Eschelon was advised of

2 on Monday; is that your understanding?

3 A It's very recent, Monday, yes.

4 Q Do you have any prediction of how long that CMP

5 process is likely to take?

6 A No, I do not.

7 Q Could it take more than a couple months?

8 A I don't know. I'm not -- I mean, I believe the

9 level of the notice would be such that it would at

10 minimum be a month or two, but I do not know about

11 beyond that.

12 Q You don't know if it might take as many as 18

13 months?

14 A I do not know that. I believe there are windows to

15 try and resolve issues.

16 MR. MERZ: I don't have anything further.

17 Thank you.

18 THE WITNESS: Thank you.

19 JUDGE SHEEHY: Ms. Anderson.

20 RECROSS-EXAMINATION

21 BY MS. ANDERSON:

22 Q Ms. Stewart, just following up briefly on Mr. Merz's

23 last question to you concerning taking certain

24 issues, including the commingling issue, to CMP.

25 And the commingling issue is 9-58; is that right?

Page 89

1 A Yes, it is.

2 Q What other issues is Qwest proposing to take to CMP

3 in addition to 9-58?

4 A Well, when you took the -- I would need to check and

5 confirm what the total list of the PCATs or products

6 that would be impacted, but it would be all the

7 products and services, so I believe that would

8 include loop-MUX combo also would be going to CMP,

9 as far as disputed issues here between the parties.

10 Q You made a reference earlier to taking the

11 commingling issue to CMP, including TRO-related

12 provisioning and ordering issues. So would that

13 include the conversion issues? For instance, the

14 9-43, 9-44, 9-44 a through c?

15 A I'm not representing conversion, but that would make

16 sense to me, because that would be part of

17 TRRO-related. In fact, even caps and policies and

18 rules around caps, so you're right, I haven't

19 thought through this as you're indicating it, but

20 once you free up every PCAT or process or procedure,

21 all of them would be then going through CMP.

22 MS. ANDERSON: Thank you very much.

23 JUDGE SHEEHY: Are you through,

24 Ms. Anderson?

25 MS. ANDERSON: I am. Thank you.

Page 130

1 Q Resale?  
 2 A I know it's in their agreement. Frankly, I haven't  
 3 asked them whether they use them or not because I  
 4 don't think any of the issues in this case deal with  
 5 that.  
 6 Q I want to ask you questions on issue 9-31, which is  
 7 access to UNEs.  
 8 A Okay.  
 9 Q And I'm going to focus on the disputed language with  
 10 respect to that issue, which I find easy reference  
 11 at page 125 of your direct testimony.  
 12 A Okay.  
 13 Q And I hope our pagination is the same.  
 14 A It must be, that's where my contract language is  
 15 found as well.  
 16 Q Okay. Would you agree with me that the primary  
 17 dispute with respect to this issue is Eschelon's  
 18 proposed language that says access to unbundled  
 19 network elements includes moving, adding to,  
 20 repairing, and changing the UNE, and then there's a  
 21 continuation with some language in parentheses; is  
 22 that where the crux of the dispute is?  
 23 A Well, that's our proposed language, and my  
 24 understanding is that Qwest doesn't want that  
 25 language in the agreement.

Page 131

1 Q Right. And let me ask you, the terms moving,  
 2 adding, and changing as used in Eschelon's proposed  
 3 language, they are not defined terms in the  
 4 interconnection agreement; is that correct?  
 5 A Not that I'm aware of, and they're not capitalized  
 6 here so I would think they are not.  
 7 Q Okay. And then for further clarification, in  
 8 parentheses you'll see that it says through e.g.,  
 9 meaning for example, design changes, maintenance of  
 10 service including trouble isolation, additional  
 11 dispatches, and cancellation of orders. Is it a  
 12 fair reading of that language that that is a  
 13 nonexclusive list, but rather just a list of  
 14 examples?  
 15 A That's fair.  
 16 Q Okay. With respect to the terms moving, adding to,  
 17 or changing, do you know, is that language intended,  
 18 for example, to require that Qwest would install new  
 19 wires and cables?  
 20 A And what I'm looking for in the agreement as I  
 21 answer that question is the routine network  
 22 modification language that is agreed upon language  
 23 in the contract. I'll try to answer your question  
 24 directly.  
 25 Maybe, maybe not. I mean, in the routine

Page 132

1 network modifications section of the contract that  
 2 is agreed upon language, the overarching principle  
 3 is that Qwest will undertake activities to provision  
 4 UNEs to the same extent it undertakes those  
 5 activities for its own customers. So there's a  
 6 parity standard, if you will.  
 7 So, and all of that emanates from the  
 8 Triennial Review Order and its discussion of routine  
 9 network modifications. So to the extent that Qwest  
 10 will, in a certain circumstance, undertake to place  
 11 cable for its own retail customers, under that same  
 12 circumstance it would be required to do so for  
 13 Eschelon. Now, that's the exception to the rule.  
 14 The FCC, when it described routine  
 15 network modifications, suggested that placing cable  
 16 was one of those exceptions that did not fall  
 17 underneath that rubric, per se.  
 18 Q Okay. So the intent of this language, though, that  
 19 we're disputing, is that in certain circumstances  
 20 Qwest could be required to install new cables, dig  
 21 trenches; is that correct?  
 22 A I think it's unlikely.  
 23 Q Well, I'm just trying to find out what the language  
 24 that Eschelon is proposing means. And the  
 25 fundamental question is is that type of activity

Page 133

1 encompassed by these terms, moving and adding to or  
 2 changing?  
 3 A And the only thing I can say is it's unlikely.  
 4 Because this section of the agreement, as all  
 5 sections of the agreement, have to be read with the  
 6 agreement as a whole. And if you look at the  
 7 section that deals with routine network  
 8 modifications, it deals with that parity standard.  
 9 What this particular section in 9.1.2 is  
 10 meant to do is simply notice that access to an  
 11 unbundled network element doesn't just mean we hand  
 12 you the element and you're on your own. It means  
 13 that it must be supported in the same manner you  
 14 would support the same facility for your retail  
 15 customers.  
 16 Q And wouldn't it be clearer to simply say that rather  
 17 than using the terms moving, adding to, or changing?  
 18 A No, it wouldn't be clearer, because I think the  
 19 examples are provided because primarily there are  
 20 specific problems that have existed with Eschelon in  
 21 the past where it's attempted to get Qwest to  
 22 undertake these activities for unbundled network  
 23 elements and Qwest has suggested that it does not  
 24 fall within the realm of their responsibilities to  
 25 provide UNEs.

Page 202

1 JUDGE SHEEHY: So how would you propose  
2 to correct your testimony?  
3 THE WITNESS: There would be two  
4 corrections. One would be on page 94 of my rebuttal  
5 testimony. And it says, I'll start the sentence, In  
6 addition, Eschelon will have unbundled access to  
7 multiplexing when ordering unbundled dedicated  
8 interoffice transport, paren, UDIT, close paren, and  
9 then we have, whether alone or in a UNE combination.  
10 I would strike whether alone or, because as I just  
11 said, when we went back to find out how that process  
12 would work, I discovered indeed the company does not  
13 currently have a product of transport with a  
14 dangling MUX. And this would imply, I'm afraid,  
15 that we are saying we did. So I wanted to correct  
16 it and correct it in such a manner to be available  
17 to answer questions.  
18 MR. MERZ: Could I voir dire on that? My  
19 question, I guess, is when she learned of this?  
20 Because this seems like not only a pretty big change  
21 from her written testimony, but a pretty big change  
22 from what she was saying yesterday, when I recall  
23 Ms. Stewart telling us that MUXing was available  
24 with a UDIT combination or with a UDIT alone. I  
25 mean, I thought she used those exact words

Page 203

1 yesterday, and so I'm wondering how this comes up  
2 this afternoon.  
3 JUDGE SHEEHY: Well, I think this is  
4 actually more accurately described as a change to  
5 her testimony as opposed to a mistake in assembling  
6 it at the get-go. And I don't mean that in any  
7 pejorative way. I mean, in terms of how you want to  
8 reflect the correction, I think we should leave your  
9 originally filed testimony the way it is and you  
10 should clarify on the record now how it should be  
11 accurate. I mean, you have. If anyone else wants  
12 to --  
13 JUDGE MIHALCHICK: Where is the other  
14 location?  
15 THE WITNESS: The other location is in  
16 the surrebuttal testimony, at page 39, a similar  
17 sentence. Qwest will provide -- I'm kind of  
18 starting at the part where we had scratched off.  
19 Qwest will provide multiplexing pursuant to UNE  
20 rates, terms, and conditions when it is used for a  
21 combination of UNE transport with a UNE loop or with  
22 UNE transport alone, so you would scratch, or UNE  
23 transport alone.  
24 JUDGE MIHALCHICK: What line?  
25 THE WITNESS: Page 39 in my pagination.

Page 204

1 JUDGE MIHALCHICK: Line 3?  
2 THE WITNESS: Line 3, I'm sorry. Yes,  
3 line 3, page 39.  
4 MR. DEVANEY: Your Honor, may I proceed?  
5 JUDGE SHEEHY: You may. I'm sorry.  
6 BY MR. DEVANEY:  
7 Q Ms. Stewart, with that clarification, can you  
8 explain different scenarios that are shown in  
9 Exhibit 32?  
10 A Yes, I can. What the various scenarios are trying  
11 to show is commingled arrangements of where you  
12 would have loop and transport and trying to  
13 demonstrate kind of how they would be put in. And I  
14 don't know if we wanted to go diagram by diagram or  
15 just look at a few of them.  
16 For example, the first diagram on the  
17 first page has a EEL loop commingled with a private  
18 line transport circuit, and I would clarify that  
19 this is same bandwidth so there is no multiplexor in  
20 this arrangement. And in this commingled  
21 arrangement, the example that is shown is that a  
22 private line circuit would go from a collo in one  
23 Qwest central office, terminate in another Qwest  
24 central office, then it would be cross-connected via  
25 a COCC and go out to another -- be cross-connected

Page 205

1 with an EEL loop that had been ordered on an LSR.  
2 And in this case a same bandwidth  
3 commingled arrangement would be put into place. And  
4 the actual -- the two individual circuits would  
5 actually be cross-connected in the one central  
6 office with a COCC. And same bandwidth means  
7 there's no multiplexing. So if it started off as a  
8 DS1 from the end user, it would be a DS1 all the way  
9 to the remote collocation.  
10 Q Would you like to describe one other scenario just  
11 for illustrative purposes?  
12 A Maybe the last diagram on the second page. This is  
13 a multiplexing example.  
14 The first one, the lower one shows a  
15 Qwest collo location and it shows that there would  
16 be a DS1 or a DS0 UDIT, which would be UNE unbundled  
17 transport. It goes into the Qwest wire center,  
18 terminates in the Qwest wire center on a Qwest  
19 private line MUX, onto the same MUX could be  
20 terminated a tariff service or private line service  
21 that went out to the end user customer at that point  
22 from the MUX. So for illustrative, if these were  
23 both DS1 facilities, they would be basically  
24 combined within the MUX and then transported over  
25 the private line facilities to the distant CLEC

Page 218

1 discussing, you have a DS1 or a DS0 UDIT, that would  
2 be unbundled UNE transport, coming into a MUX, you  
3 also have a tariffed private line service coming  
4 into the MUX, and I think they're trying to say it  
5 could be several different items there, so that  
6 could be private line transport.  
7 The way this is listed and it shows it  
8 going to like an end user, that would be potentially  
9 the DS1 channel term that we just discussed, you  
10 come onto the MUX, they're MUXed up, and then they  
11 go from the MUX to the second location, and this  
12 gives a couple examples, one of which is collo.  
13 So the first part, the DS0, UDIT, UNE,  
14 that would stay at UNE rates, the private line would  
15 stay at private line, but in this scenario the MUX,  
16 because it has a mix of private line and UNE, would  
17 go up to the private line rate, and then you would  
18 have private line transport at that point.  
19 Q All right. Well, let's take that bottom example but  
20 ignore the private line transport multiplex facility  
21 and the box to the left of that. And so we're just  
22 talking about a DS1, DS0, UDIT.  
23 A Okay. We're talking just the UDIT.  
24 Q Just the UDIT. And the connection between the MUX  
25 and the end user is a private line, a tariffed

Page 219

1 service?  
2 A Correct.  
3 Q What is the rate that applies to the MUX? Is it a  
4 private line rate or is it a TELRIC rate?  
5 A Let me make sure I've got the scenario. We have one  
6 part as a UNE, one part as a private line, then the  
7 MUX would become a private line MUX.  
8 Q Why?  
9 A Because you are putting the private line -- the  
10 private line service would be commingled or put into  
11 the MUX so the two would be working together, and at  
12 that point you go up to the highest rate because we  
13 don't have to commingle or -- excuse me, correct  
14 that, we do have to commingle, we don't have to  
15 ratchet or try to say part of this MUX is being used  
16 by a UNE, so part of the MUX is at a UNE rate, part  
17 of the MUX is being used by a private line, and so  
18 part of the MUX is at private line rates. We don't  
19 have to and cannot do some type of blended rate or  
20 some type of proportional rate within the MUX.  
21 Q But what you can do is charge the TELRIC rate for  
22 the MUX, that's not prohibited by the TRRO or  
23 anything else; is it?  
24 A I don't believe it's prohibited, but it is  
25 contemplated by the TRRO, I believe, that talks

Page 220

1 about in commingling it's not an intent to have  
2 CLECs having to avoid paying the appropriate access  
3 charges, and that we don't have to do any type of  
4 ratcheting. And once again, part of the UDIT is  
5 using the MUX and part of the private line is using  
6 the MUX. Because we don't have to ratchet we don't  
7 have to take that multiplexer and somehow figure out  
8 that 50 percent of it is being used as a UDIT and 50  
9 percent is being used as private line and have a  
10 blended rate, you go up to the highest rate, which  
11 would be the private line rate.  
12 Q In the example where there is no private line  
13 transport involved, so we just have a DS1 UDIT and  
14 the MUX and the private line to the end user, would  
15 the DS1 UDIT still be an unbundled network element  
16 available at TELRIC rates?  
17 A And so what you're saying is that the UDIT has come  
18 into the MUX, the tariffed private line service is  
19 coming to the MUX, but there's no transport. I'm  
20 not quite sure how that would work. But the MUX  
21 would still be in private line. I got a little  
22 confused there, we have two low sides and no high  
23 side on the channel.  
24 Q We're talking about a transport of DS1.  
25 A Right. Got that.

Page 221

1 Q And that's the UDIT, that's the one that if you're  
2 looking at your box it goes down into the lower  
3 right-hand corner?  
4 A Correct.  
5 Q And then you've got your MUX?  
6 A Correct.  
7 Q And then you've got your tariffed service to the end  
8 user?  
9 A Correct.  
10 Q In that scenario, as I understand what you're saying  
11 is, well, we don't have to do ratcheting, so the MUX  
12 has to go up to private line?  
13 A Oh, okay.  
14 Q Is that correct?  
15 A Correct.  
16 Q Why wouldn't you then say the same thing and take  
17 another step back and say, well, if that's the case,  
18 the DS1 has to be a private line too, because we  
19 don't have to ratchet for that either?  
20 A You are correct. I misunderstood your scenario here  
21 that we were doing so I'm glad you clarified for me.  
22 Because what you would be doing in that scenario is  
23 the transport, the way it's laid out here, both the  
24 transport and the UNE transport and the private line  
25 tariffed facility are coming in on the low side of

Page 222

1 the MUX, not the high side of the MUX where they're  
 2 being combined. So that's where it sounds like  
 3 you're changing the scenario where now the UDIT  
 4 would be the high frequency bandwidth, I mean, it  
 5 wouldn't be going low to low, so I'm trying to  
 6 figure out when you redo the diagram.  
 7 Q Assuming it's a DS3.  
 8 A The UDIT is a DS3, it's coming into the high side of  
 9 the MUX?  
 10 Q Yes.  
 11 A Okay. So it's almost coming in visually to where  
 12 the other one is. And then you bring various  
 13 private lines on the low side into that? Then, yes,  
 14 that would turn that MUX into a private line MUX  
 15 because it would now be blending the two and turn  
 16 the UDIT into a private line, because you would be  
 17 blending the --  
 18 JUDGE SHEEHY: So the UDIT is not a UDIT?  
 19 THE WITNESS: Would not be a UDIT because  
 20 you basically change the scenario of what we've got  
 21 in this diagram.  
 22 BY MR. MERZ:  
 23 Q Isn't that what commingling is, is the ability to  
 24 use a UDIT with a non-UDIT?  
 25 A Commingling is being able to attach two different

Page 224

1 but once you use a multiplexer and you multiplex up  
 2 multiple things onto a single circuit, the  
 3 multiplexer would go to private line rates.  
 4 Q Then what I understand you to be saying is if  
 5 multiplexing is involved you can't do --  
 6 A No, because you could have UNE loops or UNE  
 7 transport on the private line MUX, that is  
 8 commingling.  
 9 JUDGE SHEEHY: What?  
 10 THE WITNESS: If we did not change the  
 11 diagram --  
 12 JUDGE SHEEHY: Wait, wait. I don't  
 13 understand why his example changes the diagram.  
 14 THE WITNESS: Because he changed the UDIT  
 15 from being low side one of the channels coming into  
 16 the MUX to being the high side interoffice facility  
 17 of the arrangement.  
 18 JUDGE SHEEHY: Why does it matter which  
 19 is the low side and which is the high side?  
 20 THE WITNESS: Because when you --  
 21 JUDGE SHEEHY: You can do either one with  
 22 multiplexing --  
 23 THE WITNESS: The original document, if  
 24 you look at the original picture, it shows that the  
 25 UNE is -- the bottom one is the UNE UDIT, and it's

Page 223

1 services or facilities, but if you are going to  
 2 blend the two facilities onto a single facility,  
 3 that's where you don't have to do ratcheting. Can I  
 4 direct you maybe to the first two diagrams on the  
 5 document?  
 6 Q Well, actually, I want to make sure I understand  
 7 this last one. Because this one is of concern, if  
 8 I'm understanding correctly.  
 9 Would you agree with me, and I think we  
 10 talked about this yesterday, that commingling is the  
 11 combination of a UNE with a non-UNE?  
 12 A Correct.  
 13 Q And if we talk about the scenario that I just  
 14 described, where you have a DS3 UDIT, and MUXing,  
 15 and a private line to the end user, that is  
 16 commingling; correct?  
 17 A It's commingling, but you're commingling two types  
 18 of services onto the same facility. If we could,  
 19 please, go to the first diagram on the first page.  
 20 This I think is more what you are talking about.  
 21 This is a single bandwidth, so there's no  
 22 multiplexing. Half of the route, or the loop you  
 23 can get as a UNE, and half you can get as private  
 24 line. So you would totally install the one, then  
 25 totally install the second and then combine them,

Page 225

1 terminating on a private line MUX. That is  
 2 commingling, that's letting a UNE terminate on a  
 3 MUX. And then you take the private line and it is  
 4 separately working and terminates on the MUX, so you  
 5 have both the private line and a UNE terminated on  
 6 that MUX, that is commingling. They then both are  
 7 combined together and go over the higher bandwidth  
 8 facility, which in this case is a private line, as  
 9 is identified. So they were first independent and  
 10 separate, so now we take the two separate  
 11 independent things, we terminate them on the MUX,  
 12 now we're mixing them up, as it were, and they're  
 13 both going across that facility. And since we do  
 14 not have to ratchet, that facility would have to be  
 15 at private line rates, since there is a private  
 16 line, at this point traffic, being commingled or  
 17 combined onto the higher bandwidth.  
 18 BY MR. MERZ:  
 19 Q And so in the example that I referred to, if you had  
 20 a DS3 UDIT and MUXing and a private line, that's the  
 21 combination that in your view couldn't happen?  
 22 A Correct. That it would become a -- a ratcheting  
 23 scenario, I guess, would be, for lack of better  
 24 words, and it is a price difference. Not that it  
 25 would technically operate differently.

Page 226

1 Q And can you tell me why, if you have a DS3 UDIT and  
2 multiplexing in a private line, why that isn't just  
3 commingling?  
4 A Because commingling is combining or attaching two  
5 separate things that are separate. Now you've got a  
6 situation where you're taking the two separate  
7 things and you're putting them together to make a  
8 new third thing, as it were.  
9 Q What two separate things are you talking about?  
10 A You've got the UDIT, that's the separate, and then  
11 you've got the private line, that's separate, now  
12 you're combining the two onto a single facility.  
13 So --  
14 JUDGE MIHALCHICK: Which one? Which  
15 single facility?  
16 JUDGE SHEEHY: The MUX?  
17 THE WITNESS: Well, I'm down on this  
18 diagram, which I can tell is not a very popular  
19 diagram. The UDIT is coming into the MUX, the  
20 private line --  
21 JUDGE MIHALCHICK: From where? You've  
22 got three things there. The UDIT's coming from  
23 where to where?  
24 THE WITNESS: The UDIT is coming from, in  
25 this example, a collo from a Qwest wire center, a

Page 227

1 remote Qwest wire center. You now have UDIT, or UNE  
2 transport, to a distant Qwest wire center. At that  
3 point it is terminating on a Qwest private line MUX.  
4 That MUX also is bringing traffic that's coming in  
5 on a private line or a tariffed service, and because  
6 it's a triangle --  
7 JUDGE MIHALCHICK: And which line --  
8 okay, and you're talking about the triangle now?  
9 THE WITNESS: Right, the triangle.  
10 Triangle implies end user customer, which implies it  
11 would probably be a private line chan term, or CT,  
12 as the document calls it. And as we just discussed,  
13 the private line chan term is the equivalent of  
14 unbundled loop, unbundled loop at private line  
15 rates, so the private line now comes into the MUX  
16 that's in that Qwest wire center in the center, at  
17 that point the tariff service traffic and the UNE  
18 traffic are going to be combined within the MUX and  
19 then they're all going to be transported across that  
20 single facility, the private line facility.  
21 JUDGE MIHALCHICK: To the left?  
22 THE WITNESS: To the left.  
23 JUDGE MIHALCHICK: Not down to the one  
24 down in the bottom right-hand corner?  
25 THE WITNESS: Correct. And then at that

Page 228

1 point, when you get to that private line facility  
2 and that MUX where they're being commingled or  
3 combined, or combined traffic, because the  
4 commingling was actually the UDIT with the private  
5 line, now what we've got is they're both together  
6 into that private line circuit, and we do not have  
7 to ratchet or have that circuit be at multiple  
8 rates, some of it at UNE and some at private line,  
9 so that sends the whole facility to private line  
10 rates.  
11 JUDGE SHEEHY: Including what's on here  
12 as UDIT?  
13 THE WITNESS: No. In that scenario the  
14 UDIT would stay a UDIT. The UDIT is still going to  
15 stay a UDIT in this scenario. The private line is  
16 still going to stay a private line in this scenario.  
17 But the MUX, because it's being shared with both a  
18 UNE and a private line would go to private line  
19 rates, and then the transport between that and the  
20 next location would go to private line rates.  
21 BY MR. MERZ:  
22 Q Does the TRRO reflect all of these examples that you  
23 have here?  
24 A I do not believe that the TRRO reflects every single  
25 individual example, I think it broadly discusses

Page 229

1 combinations of loop and transport and then  
2 discusses that there is no need to ratcheting, and  
3 that commingling is not intended to avoid  
4 appropriate private line rates.  
5 Q Does the TRRO talk about MUXing?  
6 A In the context of commingling?  
7 Q In any context at all.  
8 MR. DEVANEY: Your Honor, I'm going to  
9 object. The TRRO is a several hundred page  
10 document, I don't think it's a fair question to ask.  
11 JUDGE SHEEHY: Yeah. I mean, you can  
12 give your understanding, it won't be a dispositive  
13 legal argument. But you've been testifying for, you  
14 know, 45 minutes on what the TRRO calls for, and  
15 this is Qwest's version of it.  
16 MR. DEVANEY: And just for the record,  
17 commingling is addressed in the TRO, it's not the  
18 TRRO.  
19 THE WITNESS: Thank you for the  
20 clarification. I have no memory on that. Because  
21 it's both.  
22 BY MR. MERZ:  
23 Q This is the TRRO PCAT; correct?  
24 A I believe it's reflective of both the TRRO and TRO.  
25 Q It doesn't say that.

Page 18

1 language regarding Qwest's obligation to tag the  
2 demarcation point between the Qwest network and the  
3 customer's network; is that right?  
4 A. Yes. Now, I really testified on that in a very  
5 limited basis. The details of tagging at the demarc were  
6 handled by a network witness.  
7 Q. And the testimony, the limited testimony that you  
8 made concerning that issue was that Eschelon's language  
9 would set certain processes in stone?  
10 A. Yes. It would require us to get an amendment  
11 from Eschelon before any change to that process could be  
12 made through the CMP.  
13 Q. In fact, I think you use the phrase in your  
14 testimony, "set in stone." Do you recall that?  
15 A. On that topic, I don't know if I did. It  
16 wouldn't surprise me if I did.  
17 Q. And you also said that Eschelon's proposal,  
18 because it would require Qwest to handle requests for  
19 tagging in a certain way, would create a one-off process.  
20 Do you recall that?  
21 A. I'm not so sure. It depends on if the proposal  
22 was different from our current process, and I don't recall  
23 if that one was.  
24 Q. Was it not part of your objection that Eschelon  
25 was trying to get some kind of special deal with respect

Page 19

1 to tagging at the demarc?  
2 A. I don't recall the details of that issue. Since  
3 it was closed, I'm not really prepared to discuss that.  
4 Q. You are aware that since you filed your testimony  
5 in Minnesota that issue has closed?  
6 A. Right.  
7 Q. And it has closed with the procedures and  
8 processes that Eschelon had proposed regarding tagging at  
9 the demarc; is that right?  
10 A. I believe that's correct, yes.  
11 Q. Now, do you believe that that resolution sets  
12 processes in stone?  
13 A. I do. I believe that if a change is proposed in  
14 the CMP counter to what was agreed to in that language, we  
15 will not be able to make that change in the CMP without  
16 first obtaining an amendment to the interconnection  
17 agreement. So yes, that's true.  
18 Q. That was something that was acceptable to Qwest  
19 with respect to that issue; correct?  
20 A. The management at Qwest decided that it was  
21 reasonable to settle that issue.  
22 Q. And was it your view that that process that was  
23 agreed to created a one-off process for Eschelon?  
24 A. Again, I don't believe that's the case, unless  
25 what Eschelon asked for is different than what we do

Page 20

1 today, and I don't recall that being the case with that  
2 particular issue. But, again, since it's settled, I did  
3 not go back and review that.  
4 Q. Well, let's talk about service order  
5 notifications. You're familiar with those? Pending  
6 service order notifications?  
7 A. Yes.  
8 Q. Sometimes referred to as PSONs?  
9 A. Yes.  
10 Q. That was an issue that you did address in your  
11 direct testimony; is that correct?  
12 A. Yes.  
13 Q. That's issue 12-70. Do you recall that?  
14 A. I assume that's the correct number.  
15 Q. Your testimony with respect to PSONs -- well, let  
16 me take a step back. Eschelon proposed that contract  
17 language be included in the interconnection agreement that  
18 would describe certain information that had to be  
19 contained in the PSON. Do you recall that?  
20 A. Right.  
21 Q. And your objection to Eschelon's proposal was  
22 that that language would set in stone what had to be  
23 contained in the PSON; is that right?  
24 A. That's correct.  
25 Q. And that is another issue that has since settled;

Page 21

1 is that right?  
2 A. That's correct.  
3 Q. And it is settled with Qwest agreeing to the  
4 language proposed by Eschelon; is that correct?  
5 A. I believe the language was modified some from its  
6 original proposal which went beyond what was contained in  
7 the PSON. Eschelon made a modification to the language,  
8 and ultimately we decided that we would agree to put that  
9 language in the contract. But, again, if a change comes  
10 into the CMP that is contrary to that language, we will  
11 not be able to make a change to the PSON now without  
12 Eschelon first amending its agreement.  
13 Q. So you still have the set in stone concern?  
14 A. Oh, yes.  
15 Q. But that was a concern that Qwest was apparently  
16 willing to put in the background in order to resolve that  
17 issue; correct?  
18 A. I don't know if I would phrase it that way, but  
19 it was settled, yes.  
20 Q. And it was settled with an agreement that certain  
21 language would be included in the contract that would  
22 require information to be contained in the PSON?  
23 A. Yes.  
24 Q. Now, fatal rejection notices is another systems  
25 notice that was at issue in this case; is that correct?

Page 22

1 A. Yes, it was.  
 2 Q. You filed direct testimony on that issue; is that  
 3 right?  
 4 A. Yes, I did.  
 5 Q. And it was your direct testimony that the  
 6 language that Eschelon was proposing was objectionable  
 7 because it would set in stone what had to be contained in  
 8 the fatal rejection notices; is that right?  
 9 A. I believe this was more about the procedures for  
 10 fatal rejection notices rather than the contents of the  
 11 notices, but yes. That was one of the issues, yes.  
 12 Q. You recall that Eschelon proposed language  
 13 relating to fatal rejection notices that described what  
 14 had to be contained in those notices?  
 15 A. I recall that the language was about procedures  
 16 for fatal rejection notices.  
 17 Q. In all events, the issue has settled?  
 18 A. Yes, it has.  
 19 Q. Now, did that settlement set in stone those  
 20 processes and procedures?  
 21 A. Yes, it does.  
 22 Q. And that was something that was acceptable to  
 23 Qwest?  
 24 A. For settlement purposes it was. But we are still  
 25 now going to have to pass any CMP changes through, compare

Page 23

1 to Eschelon's language, and if it is not consistent with  
 2 Eschelon's contract, we would have to seek an amendment  
 3 for that before that change could go through the CMP.  
 4 Q. I'm going to ask you now about loss and  
 5 completion reports. Do you recall that issue?  
 6 A. Yes, I do.  
 7 Q. And your direct testimony regarding loss and  
 8 completion reports was that Eschelon's language was  
 9 unacceptable because it would set in stone certain  
 10 processes relating to those reports; is that right?  
 11 A. In that case it set the fields to be contained in  
 12 the loss and completion reports, yes.  
 13 Q. And that issue has since been settled; correct?  
 14 A. Yes, it has.  
 15 Q. It's been settled with Qwest agreeing to  
 16 Eschelon's language?  
 17 A. Yes, it has.  
 18 Q. Closing trouble reports is another issue that you  
 19 discussed in your direct testimony; is that right?  
 20 A. Yes.  
 21 Q. And Qwest's proposal with respect to closing  
 22 trouble reports was that there should just be in the  
 23 contract a reference to Qwest's product catalog its PCAT;  
 24 is that right?  
 25 A. Yes.

Page 24

1 Q. And Eschelon actually had substantive language  
 2 that it had proposed for that provision?  
 3 A. Again, the detailed procedures for closing  
 4 trouble reports.  
 5 Q. And your concern as it was expressed in your  
 6 direct testimony was that the Eschelon language would set  
 7 in stone the processes that were described in Eschelon's  
 8 language?  
 9 A. Yes. And again, now, because that language has  
 10 been settled, if a change comes to the change management  
 11 process asking to change those processes and procedures,  
 12 we will not be able to without first going to Eschelon for  
 13 an amendment.  
 14 Q. Qwest agreed to Eschelon's language to resolve  
 15 that issue, closing trouble reports?  
 16 A. Yes, we did.  
 17 Q. If you turn to your surrebuttal.  
 18 A. Okay.  
 19 Q. At Page 12.  
 20 A. Now I need a copy.  
 21 That would be No. 4. I have it.  
 22 Q. Okay. I'm looking at Page 12, Lines 8 through  
 23 12. Actually, just 8 through 10.  
 24 A. Okay.  
 25 Q. You talk there about Eschelon talking about a few

Page 25

1 isolated examples and holding them out as the rule in the  
 2 CMP rather than the exception; is that right?  
 3 A. Yes. In Mr. Starkey's testimony, yes.  
 4 Q. Those are the examples you're talking about, the  
 5 ones in Mr. Starkey's testimony?  
 6 A. Yes.  
 7 Q. Now, you are familiar with the Minnesota ALJs'  
 8 report in the arbitration; correct?  
 9 A. Yes.  
 10 Q. And that report is something that you rely on  
 11 throughout your testimony in places where you believe that  
 12 report supports Qwest's position; correct?  
 13 A. Yes. I have quotes from that, yes.  
 14 MR. MERZ: And, Your Honor, this is already part  
 15 of Mr. Starkey's testimony, but I did have a couple of  
 16 questions I wanted to ask Ms. Albersheim, and I just have  
 17 a copy of the report if I could give that to her.  
 18 ARBITRATOR RODDA: Okay.  
 19 Q. (BY MR. MERZ) Ms. Albersheim, would you go to  
 20 Paragraph 22 of the arbitrator's report, please.  
 21 A. Okay.  
 22 Q. Paragraph 22. Are you there?  
 23 A. Yes.  
 24 Q. The conclusion of the Minnesota ALJs in  
 25 Paragraph 22 was that Eschelon has provided convincing

Page 26

1 evidence that the CMP process does not always provide  
 2 CLECs with adequate protection from Qwest making important  
 3 unilateral changes in the terms and conditions of  
 4 interconnection. Do you see that?  
 5 A. Yes.  
 6 Q. And that conclusion was one that was based on the  
 7 same, what you have characterized as isolated examples  
 8 described by Mr. Starkey; is that right?  
 9 A. Presumably, yes.  
 10 Q. Now, Qwest did not file any exceptions in the  
 11 Minnesota case to that conclusion of the Minnesota ALJs;  
 12 is that right?  
 13 A. We did file exceptions. I don't know that our  
 14 attorneys made an exception to this paragraph, but we did  
 15 file exceptions to this report.  
 16 Q. You don't know if those exceptions addressed this  
 17 particular conclusion of the Minnesota ALJs?  
 18 A. I don't know, but I would not agree with this  
 19 conclusion.  
 20 Q. I want to talk with you now about intervals,  
 21 which is Issue 1-1 and its subparts. That's an issue that  
 22 you talk about in your testimony; right?  
 23 A. Yes.  
 24 Q. An issue here is whether changes in provisioning  
 25 intervals should be reflected in an amendment to the ICA

Page 27

1 as Eschelon has proposed, or whether Qwest should be able  
 2 to change intervals through CMP without making any changes  
 3 in the contract.  
 4 A. Which is our current process.  
 5 Q. And I have generally described the issue  
 6 correctly?  
 7 A. Yes.  
 8 Q. Now, intervals are how long it takes for a CLEC  
 9 to get a particular product and service; is that right?  
 10 A. Generally, yes.  
 11 Q. And you would agree with me that an interval is  
 12 something that is particularly important to a CLEC in  
 13 terms of its ability to provide prompt service to its  
 14 customers?  
 15 A. Well, I would agree that it's important for CLECs  
 16 to know how much time it will take to provision a product,  
 17 yes.  
 18 Q. And you would agree with me that if an interval  
 19 is lengthened, that means that the CLEC's customer would  
 20 end up waiting longer for service; is that right?  
 21 A. That's correct. And we have the process through  
 22 the CMP which has been used once to lengthen an interval,  
 23 and that was done with no objection from any CLECs.  
 24 Q. I would like you to go to your surrebuttal at  
 25 Page 15. And then going over to Page 16, Page 15 begins

Page 28

1 at Line 23 through Page 16, Line 2. Just tell me when  
 2 you're there.  
 3 A. I'm there.  
 4 Q. And you say in your testimony there, "When  
 5 evaluating this issue..." And there you're referring to  
 6 the intervals issue; correct?  
 7 A. Yes.  
 8 Q. When evaluating this issue, the Commission should  
 9 weigh the relative benefits of locking intervals in place  
 10 as part of a proceeding involving Qwest and Eschelon  
 11 versus the value of having service intervals resolved  
 12 through the CMP. Do you see that?  
 13 A. Yes.  
 14 Q. Okay. Now, this is another issue where you're  
 15 making the set in stone and one-off arguments, as I  
 16 understand it; is that right?  
 17 A. Yes.  
 18 Q. Now, Eschelon has made two different proposals  
 19 relating to intervals. You're aware of that?  
 20 A. Yes.  
 21 Q. Now, one of Eschelon's proposals would allow  
 22 Qwest to shorten intervals through the CMP process;  
 23 correct?  
 24 A. Right. Without allowing Qwest to lengthen them,  
 25 so it's certainly to Eschelon's advantage.

Page 29

1 Q. Qwest has, since getting 271 approval, changed  
 2 intervals 40 times; is that right?  
 3 A. I think that's right, yes.  
 4 Q. And 39 times --  
 5 A. It shortened the interval.  
 6 Q. -- it shortened the interval; correct?  
 7 A. Yes. Through the industry forum, that is the  
 8 CMP, yes.  
 9 Q. And Eschelon's proposed language, the first  
 10 proposal that Eschelon has made with respect to intervals  
 11 would not have interfered with Qwest to shorten any of  
 12 those 39 intervals; is that right?  
 13 A. Not really. Because the way Eschelon proposes to  
 14 do this, we would have to have Eschelon's agreement first  
 15 essentially through this amendment that Eschelon proposes  
 16 to use.  
 17 Q. To shorten intervals?  
 18 A. To shorten intervals. That is in part of the  
 19 process today through the CMP.  
 20 MR. MERZ: And, Your Honor, I just had actually a  
 21 question of Ms. Albersheim about that issue, and if I  
 22 could just hand her the contract here.  
 23 Q. (BY MR. MERZ) And if you could refer, ma'am, to  
 24 Section 1.7.2.  
 25 A. Yeah, I'm there. Oh, you're speaking of the

Page 30

1 proposal where Eschelon would not have to do its advice  
2 adoption letter if it was a shortened interval.  
3 Q. Let's look at what is labeled as Eschelon  
4 Proposal No. 1. Do you see that?  
5 A. Yes.  
6 Q. And do you see and we're looking at the Arizona  
7 language? Do you have that there?  
8 A. Yeah. Arizona, Colorado, Utah, Oregon,  
9 Washington, okay.  
10 Q. And then if you look at Section 1.7.2.1. Do you  
11 have that?  
12 A. Yes.  
13 Q. And it says there, notwithstanding any other  
14 provision in this agreement, the intervals in Exhibit C  
15 those are the intervals we're talking about; right?  
16 A. Right.  
17 Q. The intervals in Exhibit C may be shortened  
18 pursuant to the change management process, paren, CMP,  
19 without requiring the execution or filing of any amendment  
20 to the agreement. Do you see that?  
21 A. That's right. Right, yes, I see that.  
22 Q. And that's your understanding of Eschelon's  
23 proposal; right?  
24 A. Yes. So we still have to use the advice adoption  
25 letters to increase an interval, yes.

Page 31

1 Q. But off of the 39 or 40 interval changes that  
2 Eschelon has or that Qwest has implemented since getting  
3 271 approval, if the Commission adopted this language at  
4 1.7.2.1, all of those changes could have gone through just  
5 as they did?  
6 A. Yes. Which makes the language from Eschelon in  
7 their contract unnecessary, because the change management  
8 process is working effectively.  
9 Q. Without that language, there's no -- well,  
10 actually let me talk about lengthening intervals.  
11 A. Yes.  
12 Q. You have talked about this advice adoption  
13 process.  
14 A. Eschelon's Exhibits N and O.  
15 Q. Yes. Now, one of the things that you say in your  
16 testimony, and I'm looking at your rebuttal, Page 35, Line  
17 6 through 9.  
18 A. The public or confidential?  
19 Q. You know, I don't know that it matters. Why  
20 don't you look at the confidential.  
21 A. Oh, okay. I need a copy of No. 2 or No. 3.  
22 Which page?  
23 Q. I'm looking at Page 35 of your rebuttal beginning  
24 at Line 6. The sentence that begins there.  
25 A. Okay.

Page 32

1 Q. You say there: But in addition to requiring the  
2 party to execute time and resource consuming amendments,  
3 Eschelon wants to require Qwest to use specific forms  
4 attached as Exhibit N and O to the ICA to implement  
5 service interval changes. Do you see that?  
6 A. Yes.  
7 Q. You understand, do you not, that those Exhibits N  
8 and O are to be used in lieu of a formal amendment, not in  
9 addition; correct?  
10 A. Yes.  
11 Q. So when you say that in addition, to require the  
12 parties to execute time and resource consuming amendments,  
13 Eschelon wants to also use these other exhibits?  
14 A. This presumes that Eschelon is going to agree to  
15 the interval change.  
16 Q. And if Eschelon doesn't agree, would it be  
17 Qwest's position that it ought to be able to just go to  
18 CMP and increase the interval without -- over Eschelon's  
19 objection?  
20 A. Eschelon should object through the standard  
21 process we've established in the CMP to allow input on  
22 interval changes. This intervenes in that process.  
23 Q. The Exhibits N and O are modeled on another  
24 couple of exhibits that are actually agreed upon as part  
25 of the contract; is that right?

Page 33

1 A. That is Eschelon's position.  
2 Q. You disagree with that?  
3 A. I agree they're modelled on them. I don't  
4 believe they function in the same way.  
5 Q. I mean, the language is almost identical between  
6 Exhibits L and N and M and O; isn't that right?  
7 A. And L and M are for allowing Eschelon to take  
8 advantage of new products offered by Qwest that were not  
9 available when the original contract was agreed to. And I  
10 believe that's a different function than whether or not a  
11 service interval should change.  
12 Q. Exhibits L and M are something called advice  
13 adoption letters; is that right?  
14 A. That sounds right, yes.  
15 Q. And that's a process that Qwest uses regularly to  
16 allow CLECs to obtain new products without formally  
17 amending their contract; is that right?  
18 A. That's correct.  
19 Q. Those are documents that Qwest came up with;  
20 isn't that right?  
21 A. I don't know their origin. I don't know if they  
22 were negotiated or completely established by Qwest.  
23 Q. Would you agree with me that the mechanisms that  
24 use those advice adoption letters were developed for the  
25 purpose of streamlining the process by which CLECs could

Page 34

1 obtain new products?  
 2 A. Yes. I agree.  
 3 Q. And?  
 4 A. But I don't agree that the same can be said if  
 5 you interject an additional process into the CMP for the  
 6 management for changing intervals.  
 7 Q. What additional process are you talking about?  
 8 A. This adoption letter which we would have to have  
 9 from Eschelon in order to proceed in the CMP with an  
 10 interval change. And the presumption is we would have  
 11 to -- you would have to presume that Eschelon would agree,  
 12 and if they do not, we have a contract issue impeding the  
 13 process of the CMP to make interval changes.  
 14 MR. TOPP: Your Honor, I have Exhibits N and O to  
 15 the contract. I wonder if I could just have them marked  
 16 as an exhibit, please.  
 17 ARBITRATOR RODDA: Okay. Did you have any  
 18 premarked so -- I don't know where we were.  
 19 MR. MERZ: This would be Eschelon 1.  
 20 ARBITRATOR RODDA: Okay.  
 21 Q. (BY MR. MERZ) Ms. Albersheim, you have there  
 22 what's been marked as Eschelon Exhibit 1; correct?  
 23 A. Yes.  
 24 Q. And what Eschelon Exhibit 1 is Exhibits N and  
 25 O to the proposed interconnection agreement; correct?

Page 35

1 A. Yes.  
 2 Q. And these are the things that Qwest is objecting  
 3 to as creating an unreasonable burden; is that right?  
 4 A. It creates interference with the normal operation  
 5 of the CMP. Without this signed letter from Eschelon, the  
 6 CMP cannot proceed, because then Qwest has the issue of  
 7 dealing with being in violation of Eschelon's contract.  
 8 Q. You mentioned there were 39 times when Qwest  
 9 shortened intervals?  
 10 A. Yes.  
 11 Q. There was one time when Qwest lengthened  
 12 intervals; correct?  
 13 A. Yes.  
 14 Q. And in that one time where Qwest lengthened  
 15 intervals, no CLEC apparently objected to that; is that  
 16 right?  
 17 A. That's correct.  
 18 Q. Would you agree about with me that if Eschelon  
 19 didn't object to lengthening an interval, it would sign  
 20 Exhibit N and it would adopt that lengthened interval?  
 21 A. If Eschelon did not object. But if Eschelon  
 22 objects, then we have an additional impediment to the  
 23 normal process of the CMP.  
 24 Q. But in the case of the one interval that was  
 25 lengthened Eschelon didn't object?

Page 36

1 A. No. Nobody objected.  
 2 Q. Okay. And presumably Eschelon would have signed  
 3 Exhibit N, and that would have been the end of the story;  
 4 right?  
 5 A. Possibly. I don't know for sure that that would  
 6 have happened, but we would have had to have that step  
 7 first.  
 8 Q. And the one time, there was one time when Qwest  
 9 proposed lengthening an interval that CLECs did object to;  
 10 correct?  
 11 A. Right. And the interval was not lengthened.  
 12 Q. Would you agree with me that it is generally in  
 13 the CLECs' interest to have shorter intervals rather than  
 14 longer ones?  
 15 A. That's probably true.  
 16 Q. Are you aware of any time when any CLEC has  
 17 requested a longer interval?  
 18 A. No, I'm not.  
 19 Q. Then go back to the ALJs' report, the Minnesota  
 20 report, paragraph 22 again.  
 21 A. I'm there.  
 22 Q. And looking at the middle of that paragraph, the  
 23 Minnesota ALJs concluded that Qwest has identified no  
 24 compelling reason why inclusion of the current intervals  
 25 in the ICA would harm the effectiveness of the CMP process

Page 37

1 or impair Qwest's ability to respond to industry changes.  
 2 Do you see that?  
 3 A. Yes, I see that.  
 4 Q. And do you know whether Qwest took an exception  
 5 to that conclusion by the Minnesota ALJs?  
 6 A. I don't recall if that was in our exceptions or  
 7 not.  
 8 Q. Do you know what the Minnesota Commission did  
 9 with this issue?  
 10 A. I haven't seen the Commission written order.  
 11 I've only heard there were oral arguments, so I don't know  
 12 the final conclusion on this.  
 13 Q. I want to talk with you now about the issue of  
 14 acknowledgement of mistakes and root cause analysis.  
 15 A. Okay.  
 16 Q. Those are Issues 12-64 and its subparts. Do you  
 17 recall that?  
 18 A. Yes.  
 19 Q. Now, the issue here is contract language  
 20 regarding Qwest's obligations to investigate and  
 21 acknowledge mistakes; is that right?  
 22 A. Yes.  
 23 Q. Now, this is another issue that the Minnesota  
 24 ALJs addressed; is that right?  
 25 A. I believe so.

Page 38	Page 40
<p>1 Q. And in your surrebuttal testimony at Page 20, 2 Line 1 -- 3 A. Okay. 4 Q. -- you criticized Mr. Starkey for inaccurately 5 reflecting the conclusion of the ALJs; is that right? 6 A. Yes. 7 Q. And so you have there in your testimony a quote 8 from the ALJs' conclusions; is that right? 9 A. Yes. I do. 10 Q. And that quote begins at Line 6 of Page 20 and 11 goes through Line 11; is that right? 12 A. Yes. 13 Q. And that is a quote, a partial quote from 14 Paragraph 208 of the order; is that right? 15 A. Yes. 16 Q. Would you turn to Paragraph 208. 17 A. Yes. 18 Q. Now, you begin your quote with the second 19 sentence of Paragraph 208; is that right? 20 A. Yes, I do. 21 Q. Your quote begins, "Eschelon's language," and 22 then you've got three ellipses. And then you go on to say 23 "does expand the scope from mistakes in processing 24 wholesale orders to mistakes relating to the products and 25 services provided under this agreement." Is that right?</p>	<p>1 Q. Now, focusing on the words that those three 2 ellipses stand for, is it your view that your partial 3 quote of the ALJs' report at Paragraph 208 accurately 4 reflects the sense of what the ALJs held? 5 A. I was responding to Mr. Starkey's testimony which 6 claimed that the result was completely consistent, and I 7 was pointing out that even the ALJ felt that Eschelon's 8 language expanded the original intent of the order. 9 Q. You characterize Mr. Starkey as inaccurately 10 reflecting the ALJs' decision; is that right? 11 A. I believe so on that account, too, because 12 Mr. Starkey went to the ALJs' first language, that is 13 Eschelon's language, and not his recommended language 14 which limited the scope to wholesale orders. 15 Q. Would you agree with me that one might also 16 criticize your testimony here at Line 6 through 11, 17 Page 20 of your surrebuttal as inaccurately characterizing 18 the ALJs' report? 19 A. I wasn't trying to accurately characterize the 20 entire ALJ report. I was pointing out that Mr. Starkey 21 did not acknowledge that the ALJ saw that Eschelon's 22 language went beyond the original order. That was my 23 whole intent. 24 Q. And you believe that your quotation then 25 accurately reflects the average's holding at Paragraph</p>
Page 39	Page 41
<p>1 A. Yes. 2 Q. I want to talk now about what is not in this 3 quote, what those ellipses stand for. 4 A. Uh-huh. 5 Q. The full quote says: Eschelon's language is not 6 vague or burdensome, parentheses, to acknowledge a mistake 7 Qwest has to determine that one was made and why, close 8 parentheses, and it is more consistent with the 9 Commission's order. 10 A. Yes. 11 Q. But it does expand the scope, and then it goes 12 on. 13 A. Yes. 14 Q. So the language I just read was the language that 15 you left out of your quote; is that right? 16 A. Yes. 17 Q. And the ALJs also conclude that either the 18 alternative proposed by Eschelon or one that focused 19 specifically on wholesale orders, either of those would be 20 consistent with the record in the public interest; is that 21 right? 22 A. Yes. 23 Q. And you leave that out of your quote as well; is 24 that right? 25 A. I believe I discuss that later, but --</p>	<p>1 208; is that right? 2 A. It accurately reflects that even the ALJ 3 acknowledged that Eschelon's language went beyond 4 wholesale orders. 5 Q. Okay. Now, one of your criticisms of Eschelon's 6 language is that it's based on a decision by the Minnesota 7 Public Utilities Commission in a complaint case brought by 8 Eschelon. Do you recall that? 9 A. Well, that's a bit generalizing my position a 10 bit. 11 Q. Well, maybe we'll get to it. That case I'll just 12 refer to as the 616 case. Is that the way you refer to 13 it? 14 A. I can. 15 Q. Okay. Now, one of your criticisms is that 16 Eschelon's language goes beyond what the Commission 17 intended in the 616 case; isn't that right? 18 A. Yes. 19 Q. And what you believe is that it goes beyond what 20 the Commission intended, because it goes beyond mistakes 21 that are made when relating to orders; is that right? 22 A. There's part of it yes. 23 Q. And you say at your rebuttal testimony Page 37 -- 24 A. My rebuttal? 25 Q. Yes. I think the public version will be just</p>

Page 42

1 fine. Will you look at Page 37?  
 2 A. Page 37. Okay. I'm there.  
 3 Q. And I'm looking at Lines 11 through 14.  
 4 A. Okay.  
 5 Q. You say there that Eschelon's proposed language  
 6 expands the scope of the Minnesota Commission's orders to  
 7 include mistakes in all circumstances, not just the  
 8 processing of wholesale orders and to require root cause  
 9 analyses in all circumstances; is that right?  
 10 A. Yes, that's what it says.  
 11 Q. You are aware, are you not, that the Minnesota  
 12 Commission documented Eschelon's position with respect to  
 13 these issues?  
 14 A. Well, again, we don't have a written order, so it  
 15 is not clear to me whether our acceptance of the ALJs'  
 16 alternative language was considered or not. I don't know.  
 17 Q. And I think that you answered my question, but I  
 18 just want to make sure. Are you aware of that the  
 19 Minnesota Commission has adopted Eschelon's proposed  
 20 language on this issue?  
 21 A. I'm not clear on that because we don't have a  
 22 written order.  
 23 Q. Do you know whether the Minnesota Commission has  
 24 defined the phrase "processing wholesale orders" to  
 25 include preorder, ordering, provisioning, maintenance or

Page 43

1 repair, and billing?  
 2 A. That I don't know.  
 3 Q. Now, you refer in your testimony in a number of  
 4 places to the 616 case as a settlement. Do you recall  
 5 that?  
 6 A. Well, ultimately it was essentially settled based  
 7 on compliance filings.  
 8 Q. So you refer to it as a settlement; is that  
 9 right?  
 10 A. Yes.  
 11 Q. You understand that -- well, let me ask you this:  
 12 The compliance filings were filings that Qwest made to  
 13 comply with the Commission's order that Qwest change  
 14 certain processes and procedures relating to root cause  
 15 analysis and acknowledgement of mistakes?  
 16 A. Right. Which Qwest did do.  
 17 Q. And it actually made three separate compliance  
 18 filings; isn't that right?  
 19 A. I think it's right, yes.  
 20 Q. The reason it did that is the first two were  
 21 rejected by the Minnesota Commission as inadequate;  
 22 correct?  
 23 A. Yes.  
 24 ARBITRATOR RODDA: I'm sorry, can you remind me  
 25 what the 616 case is?

Page 44

1 MR. MERZ: That was a complaint case actually  
 2 brought by Eschelon relating to a mistake that Qwest had  
 3 made in the handling of an order.  
 4 ARBITRATOR RODDA: Thank you.  
 5 Q. (BY MR. MERZ) now, you say in your surrebuttal  
 6 testimony well let me ask you this. You talk about the  
 7 616 case as a case involving a settlement; right?  
 8 A. Yes. The Commission accepted the compliance  
 9 filing as a settlement of the case. It closed the case.  
 10 Q. Well, are you saying that it was a settlement  
 11 because Qwest agreed to comply with what the Commission  
 12 ordered? Is that what made it a settlement?  
 13 A. Well, I think we're using a term of art that  
 14 could be interpreted in a different way. The point was  
 15 that the case was closed because of the Commission's  
 16 acceptance of Qwest's third compliance filing.  
 17 Q. Well, you're a lawyer; correct, ma'am?  
 18 A. Yes, I am a lawyer.  
 19 Q. And you know what a settlement is; correct?  
 20 A. Yes.  
 21 Q. Okay. In what sense did the Commission's orders  
 22 in the Minnesota 616 case reflect a settlement? How, in  
 23 what way was that a settlement?  
 24 A. The Commission was satisfied based on the  
 25 compliance filing that the situation was resolved and

Page 45

1 there were not going to be further issues of this kind.  
 2 Now, this wouldn't be like a settlement between  
 3 the parties, which is normally how you would use this  
 4 term, say, between Qwest and Eschelon. It was Qwest  
 5 settling with the Commission.  
 6 Q. Well, you know, that's a good point. Go to your  
 7 rebuttal testimony at Page 37, Lines 15 through 17.  
 8 A. Rebuttal, Page 37.  
 9 Line?  
 10 Q. 15 through 17. Yes.  
 11 The question there is: Are there other ways in  
 12 which Eschelon attempts to expand the settlement terms  
 13 beyond what was agreed to by the parties in the Minnesota  
 14 case?  
 15 A. Yes.  
 16 Q. And what I understood you to just tell me was  
 17 that this was not a settlement between the parties;  
 18 correct?  
 19 A. Well, actually, it was, if you think about it,  
 20 because not only did the Commission accept the compliance  
 21 filing, but Eschelon did not object. It agreed to the  
 22 compliance filing as resolving the case. This did not  
 23 continue. So it really was.  
 24 Q. If you go to Page 18 of your surrebuttal.  
 25 A. Page 18, surrebuttal. Okay.

Page 46

1 Q. You say there, Page 18, Lines 20 through 21. You  
2 say: This process is not one that requires Qwest to alter  
3 its procedures overall, nor does it apply to all CLECs.  
4 Do you see that?  
5 A. Yes.  
6 Q. Now, this process is the process that Qwest was  
7 ordered to implement by the Minnesota Commission in the  
8 616 case. That's the process that you're talked about  
9 there; correct?  
10 A. I'm talking about the requirement of a letter to  
11 Eschelon's customer if Qwest makes a mistake, yes.  
12 Q. And I think you answered a question that's  
13 different than the one I asked. When you talk about this  
14 process, you are referring, are you not, to the process  
15 that the Minnesota Commission ordered Qwest to put in  
16 place as a result of the 616 case?  
17 A. Well, actually there were several different  
18 things that were done as a result of the Commission order.  
19 Several processes and procedures that were undertaken by  
20 Qwest. Here I'm speaking of Eschelon's defining of the  
21 process for preparing a letter for its customers, so that  
22 it's a little bit different.  
23 Q. So you're talking about the process by which  
24 Qwest would prepare a later that acknowledged its  
25 mistakes?

Page 47

1 A. And this is defined in Eschelon's proposed  
2 language for the contract. So I'm not talking about all  
3 of the processes and procedures that Qwest undertook in  
4 response to the Commission order. Those were different.  
5 Q. But the process for acknowledging Qwest's  
6 mistakes is the one that you're referring to in the  
7 language that we just looked at; correct?  
8 A. I'm referring to Eschelon's proposed language.  
9 Q. Well, you say this process is not one that  
10 requires Qwest to alter its procedures overall, nor does  
11 it apply to all CLECs. Do you see that?  
12 A. Right.  
13 Q. I'm just trying to understand what do you mean by  
14 the phrase, this process?  
15 A. The requirement that we must provide a letter to  
16 Eschelon's customer if we make a mistake and acknowledge  
17 that we made the mistake.  
18 Q. All right.  
19 A. That.  
20 Q. So that's the process that you're talking about?  
21 A. Yes.  
22 Q. What is the basis, then, for the statement that  
23 we just read? This process is not one that requires Qwest  
24 to alter its procedures overall, nor does it apply to all  
25 CLECs?

Page 48

1 A. Because this order was specific to Eschelon and  
2 it impacts Eschelon's service manager, as I said in my  
3 testimony above. It's what you would call a one-off, but  
4 it was not required of us for all CLECs. It was only  
5 required in Eschelon.  
6 Q. Did it you look at Qwest's compliance filing  
7 either before or after you made that statement that we've  
8 been talking about in your testimony?  
9 A. Which compliance filing?  
10 Q. The compliance filing that Qwest made in order to  
11 comply with the Commission's order in the Minnesota 616  
12 case.  
13 A. I haven't looked at it in awhile, no. I have  
14 looked at it before.  
15 MR. MERZ: Your Honor, I would I want the mark  
16 the compliance filing as an exhibit. So this would be  
17 Eschelon 2.  
18 Before I get to Eschelon 2, I think I forgot to  
19 offer Eschelon 1, so I will do that at this time.  
20 MR. TOPP: No objection.  
21 ARBITRATOR RODDA: Then Eschelon-1 is admitted.  
22 (Exhibit No. Eschelon-1 was admitted into  
23 evidence.)  
24 Q. (BY MR. MERZ) You have now what has been marked  
25 as Eschelon Exhibit 2; correct?

Page 49

1 A. Yes.  
2 Q. And you recognize Eschelon Exhibit No. 2 as at  
3 least one of Qwest's compliance filings in the Minnesota  
4 616 case; correct?  
5 A. Yes.  
6 MR. MERZ: Your Honor, Eschelon offers Eschelon  
7 Exhibit No. 2.  
8 ARBITRATOR RODDA: Any objection to Eschelon 2?  
9 MR. TOPP: No objection.  
10 ARBITRATOR RODDA: All right. Then Eschelon 2 is  
11 admitted.  
12 Q. (BY MR. MERZ) I would like you to refer now to  
13 Page 3 of the compliance filing, Eschelon Exhibit No. 2.  
14 A. Yes.  
15 Q. Page 3, and I'm looking at the heading:  
16 Procedures for extending the error acknowledgement  
17 procedures set forth in Part E to all Qwest errors in  
18 processing wholesale orders.  
19 Do you see that?  
20 A. Yes.  
21 Q. And underneath there Qwest describes the error  
22 acknowledgement process that it's going to implement in  
23 order to comply with the Minnesota Commission's order;  
24 correct?  
25 A. Right.

Page 50

1 Q. And this process that's described here is the  
2 process by which Qwest is going to prepare a letter to  
3 acknowledge its mistakes.  
4 A. And actually, I believe Qwest has documented that  
5 process in the service manager's PCAT.  
6 Q. The process that's described in the Minnesota  
7 compliance filing that you have here is not a process  
8 that's limited to Eschelon?  
9 A. No. You're correct. And as I said, that is  
10 documented in the service manager's PCAT.  
11 Q. And it's not a process -- it is a process that  
12 requires Qwest to alter its procedures overall?  
13 A. That's already been done.  
14 Q. It has been done?  
15 A. That's already been done.  
16 Q. And this is what did it?  
17 A. Right.  
18 Q. This compliance filing is what altered Qwest's  
19 procedures overall relating to the acknowledgement of  
20 mistakes?  
21 A. Yes. And as I said, that was all done as a part  
22 of the compliance with the Minnesota order, yes. We  
23 changed quite a number of procedures.  
24 Q. Just to focus, though, the discussion that we're  
25 talking about on Page 3 under the heading F that we read,

Page 51

1 is the process by which Qwest is going to provide  
2 acknowledgement of error letters?  
3 A. And I think our confusion here that's -- yes.  
4 And I think our confusion here is that we're talking, I  
5 talked in my testimony about language in Eschelon's  
6 contract which Eschelon is requiring in its contract for  
7 itself.  
8 Q. Well, and I understood when we were talking about  
9 Page 18, Lines 20 through 21 of your surrebuttal testimony  
10 that the process that you were referring to is the process  
11 by which Qwest acknowledges its errors. Isn't that what  
12 you just told me?  
13 A. This is -- again, I was referring to the language  
14 proposed by Eschelon for inclusion in its contract.  
15 Q. And so your criticism is that Eschelon's language  
16 for its contract relates only to Eschelon? Is that what  
17 you're saying here in your testimony?  
18 A. Well, that is part of it. Again, what we're --  
19 what Eschelon is asking us to do is set in stone, if you  
20 will, in its contract, procedures we already have in our  
21 service manager PCATs, in our maintenance and repair  
22 PCATS, for dealing with mistakes, but asks for more than  
23 we already do, which we established in response to the  
24 Minnesota 616 case.  
25 Q. And I guess what I'm struggling with is, again,

Page 52

1 the sentence: This process is not one that requires Qwest  
2 to alter its procedures overall, nor does it apply to all  
3 CLECs.  
4 In what sense is that sentence accurate?  
5 A. It doesn't apply to all CLECs, because what  
6 Eschelon is proposing applies to Eschelon in its contract  
7 and then anybody who opts in, but not all other CLECs.  
8 Q. Well, aren't you talking about the Minnesota 616  
9 order when you're talking about this process?  
10 A. No. I'm talking about Eschelon's proposed  
11 language.  
12 Q. Well, I'm looking at two sentences before that  
13 beginning at Line 16. You say the settlement was between  
14 Qwest and Eschelon. So we're talking about the Minnesota  
15 616 case; right?  
16 A. Uh-huh.  
17 Q. Right?  
18 A. Yes. And it concerned one error in one order in  
19 one state.  
20 Q. And then you say -- and so all of that discussion  
21 is about the Minnesota 616 case?  
22 A. Uh-huh.  
23 Q. Yes?  
24 A. Yes.  
25 Q. And what Qwest had to do in order to comply with

Page 53

1 the Commission's order in the Minnesota 616 case?  
2 A. In terms of the settlement, yes.  
3 Q. Okay. And then the sentence that starts, "This  
4 process," you're no longer talking about the Minnesota 616  
5 case. You're talking about Eschelon's contract proposal.  
6 Is that your testimony?  
7 A. You're actually skipping a sentence here.  
8 Eschelon is the only CLEC to request this process, and it  
9 should have been expanded via contract language. And the  
10 account manager at Eschelon is charged with responding to  
11 a request from Eschelon to acknowledge a mistake. So  
12 Eschelon is taking the process we established, putting its  
13 language in its contract. That's my point. It could have  
14 been better phrased, certainly.  
15 Q. I mean, it seems to me that the way to better  
16 phrase it is to say this process is one that requires  
17 Qwest to alter its procedures overall and does apply to  
18 all CLECs. Would that be a better phrasing?  
19 A. No. I would not agree with that, because we  
20 already did. In response to the 616 case, we already did.  
21 Q. I'm going to talk with you now about expedites.  
22 So we'll change gears here.  
23 This is issue 12-67 and its subparts; is that  
24 right?  
25 A. That sounds right.

Page 54

1 Q. Expedites are when Qwest provides Eschelon with  
2 service more quickly than would otherwise be the case; is  
3 that right?  
4 A. Not just Eschelon, but any provider.  
5 Q. Okay. Now, one of the issues relating to --  
6 there are a lot of issues related to expedites; right?  
7 A. Yes.  
8 Q. One of the issues is whether Qwest is required to  
9 provide expedites at cost-based rates as Eschelon  
10 proposes, or a tariffed rate which is what Qwest has  
11 proposed; is that right?  
12 A. That's one of the issues.  
13 Q. And the reason why Qwest believes that it's not  
14 required to provide expedites at TELRIC rates is because  
15 Qwest believes that expedites are a superior service; is  
16 that right?  
17 A. Yes.  
18 Q. Now, in your rebuttal at Page 49, Lines 10  
19 through 12 --  
20 ARBITRATOR RODDA: I'm sorry. I missed the page  
21 number.  
22 MR. MERZ: It's rebuttal Page 49, Lines 10  
23 through 12.  
24 THE WITNESS: I'm there.  
25 Q. (BY MR. MERZ) You say there that providing a

Page 55

1 service in a shorter time frame than that set forth in a  
2 standard interval is a premium service. Do you see that?  
3 A. Yes.  
4 Q. Are you using premium there as synonymous with  
5 superior?  
6 A. Yes.  
7 Q. And so as I understand it, that's the basis for  
8 your claim that this is a superior service, that Eschelon  
9 is asking to be provided with service more quickly than  
10 the standard interval?  
11 A. That's part of it. There are two reasons we  
12 believe that this is a superior service. First of all,  
13 Qwest is measured on its performance based on standard  
14 intervals, and the standard intervals are whether or not  
15 Qwest provides service that allows a CLEC a meaningful  
16 opportunity to compete. And so when we're asked to  
17 provide the service faster than the standard interval,  
18 that is superior.  
19 Also, in some of our situations our standard  
20 intervals for retail customers are actually longer than  
21 the standard intervals for our wholesale customers. And I  
22 believe there it was an example that was in my testimony.  
23 Q. Okay. And that arises because a state commission  
24 has ordered that that interval be established in the way  
25 it is; correct?

Page 56

1 A. Either it was ordered or agreed to.  
2 ARBITRATOR RODDA: And when you say that, you  
3 meant the retail?  
4 THE WITNESS: Not wholesale.  
5 MR. MERZ: There's a discrepancy between the  
6 retail interval and the wholesale interval.  
7 ARBITRATOR RODDA: Right. I understood that  
8 part. And then you said and that interval, or I can't  
9 remember the words she used, and I didn't know which one  
10 you were referring to.  
11 MR. MERZ: The wholesale interval.  
12 Q. (BY MR. MERZ) Some commission has said to Qwest  
13 the wholesale interval needs to be shorter in order to  
14 give Eschelon a meaningful opportunity to compete. Is  
15 that your understanding?  
16 A. I don't know if all of them were ordered or if  
17 some of them were agreed to.  
18 Q. You would agree with me that whether a service is  
19 a superior is determined based on whether the ILEC  
20 provides that service to itself; is that right?  
21 A. I'm not sure I would phrase it quite that way.  
22 One of the measures is whether Qwest provides service to  
23 its CLEC customers in the manner, equivalent manner that  
24 it provides service to itself. Is that what you're  
25 saying?

Page 57

1 Q. Well, I'm not sure. The Eighth Circuit talked  
2 about superior service; is that right?  
3 A. I believe they did, yes.  
4 Q. And you talk about the Eighth Circuit's order, in  
5 fact, in your testimony?  
6 A. Yes.  
7 Q. And what the Eighth Circuit said is ILECs are not  
8 required to provide superior service.  
9 A. Correct.  
10 Q. What the Eighth Circuit said is ILECs are not  
11 required to provide service that is superior to the  
12 service they provide themselves?  
13 A. Yes.  
14 Q. And so the way you decide whether or not a  
15 service is superior is you have to figure out is that a  
16 service that the ILEC provides to itself. Fair enough?  
17 A. That is part of it, yes.  
18 Q. Well, that's the Eighth Circuit's definition of  
19 superior. Is that your understanding?  
20 A. Yeah, but I don't believe they were talking about  
21 intervals completely there. I think that that was whether  
22 or not we were required to provide services beyond  
23 services we already provide to ourselves. And part of my  
24 argument is that if we're being asked to provide service  
25 at an interval shorter than we even provide to our retail

Page 58

1 customers, that is superior.  
 2 Q. Go to your surrebuttal testimony, Page 20.  
 3 A. 20.  
 4 Q. And I'm looking at Line 19 right at the end of  
 5 that line where you say expedites are not UNEs. Do you  
 6 see that?  
 7 A. Line -- we're on Page 20?  
 8 Q. Page 20, Line 19 of your surrebuttal testimony.  
 9 A. Oh, yes, I see that.  
 10 Q. Expedites are not UNEs. Then you go on to say:  
 11 The United States Court of Appeals for the Eighth Circuit  
 12 made it clear that the Telecommunications Act does not  
 13 require ILECs to provide services superior in quality to  
 14 that which it provides itself?  
 15 A. Correct.  
 16 Q. Then you have a footnote and you cite the Iowa  
 17 Utilities Board decision of the Eighth Circuit; right?  
 18 A. Yes.  
 19 Q. Now, you would agree with me that Qwest provides  
 20 itself with expedites; correct?  
 21 A. Yes.  
 22 Q. It provides them to its customers; correct?  
 23 A. Yes.  
 24 Q. And it does that as a regular part of its  
 25 business; correct?

Page 59

1 A. When it is feasible, yes.  
 2 Q. You also testified in Eschelon's Arizona  
 3 expedites complaint case; correct?  
 4 A. Yes.  
 5 Q. And one of the issues in that case that the  
 6 Arizona Staff addressed was whether or not expedites are  
 7 required to be provided on a cost-based rates; correct?  
 8 A. That's one of the issues in the case.  
 9 Q. And you recall that this was the conclusion of  
 10 the Arizona Staff, that yes, in fact, Qwest is required to  
 11 provide expedites at cost-based rates?  
 12 A. There's one of their conclusions yes. The case  
 13 is still pending.  
 14 Q. Shifting gears now to jeopardies, and jeopardies  
 15 is Issues 12-71, 12-72 and 12-73; is that right?  
 16 A. Yes.  
 17 ARBITRATOR RODDA: This might be a good time for  
 18 a break.  
 19 MR. MERZ: Sure.  
 20 ARBITRATOR RODDA: Let's take 10 minutes.  
 21 (A recess was taken from 11:25 a.m. to  
 22 11:35 a.m.)  
 23 ARBITRATOR RODDA: Okay. Let's go back on the  
 24 record. And I forget what topic you were on.  
 25 MR. MERZ: We were going to start with

Page 60

1 jeopardies, which is Issues 12-71, 72 and 73.  
 2 Q. (BY MR. MERZ) And just to kind of get on the  
 3 same page with some terminology, Qwest gives a jeopardy  
 4 notice when a due date for an order is in danger of being  
 5 missed; is that right?  
 6 A. That's correct.  
 7 Q. The due date is the date that the CLEC is  
 8 supposed to expect delivery of the circuit; correct?  
 9 A. Correct.  
 10 Q. A jeopardy that is caused by Qwest is a Qwest  
 11 jeopardy; right?  
 12 A. Yes.  
 13 Q. And one kind of Qwest jeopardy might be a Qwest  
 14 facilities jeopardy; correct?  
 15 A. Yes.  
 16 Q. A Qwest facilities jeopardy is when there aren't  
 17 facilities sufficient there to provide the service that  
 18 the CLEC has ordered on the date that it's to be  
 19 delivered; is that correct?  
 20 A. Correct. There may not be -- the jeopardy isn't  
 21 a certainty from a miss. It is a warning that a miss is  
 22 possible.  
 23 Q. A jeopardy that is caused by a CLEC or the CLEC's  
 24 customers is classified as a customer-not-ready jeopardy;  
 25 is that right?

Page 61

1 A. Yes. On the due date for the order, if the CLEC  
 2 is not able to receive the circuit, that is considered a  
 3 customer-not-ready jeopardy.  
 4 Q. And a customer-not-ready jeopardy is sometimes  
 5 referred to as a CNR jeopardy; is that right?  
 6 A. Yes.  
 7 Q. Now, if the jeopardy is a CNR jeopardy, the CLEC  
 8 has to implement its order and request a new due date?  
 9 A. That's the normal procedure.  
 10 Q. And for a loop order, the earliest new due date  
 11 that the CLEC can get is three days from the date that the  
 12 supplemental order is placed; is that right?  
 13 A. As a result of the supplement, yes.  
 14 Q. And what that all means is that the CLEC is going  
 15 to be delayed in its ability to provide service to the  
 16 customer; is that right?  
 17 A. That is the potential. But Qwest still attempts  
 18 to deliver the service on the original due date, even in  
 19 the case of an order put in jeopardy.  
 20 Q. And with respect to the jeopardies issue, you  
 21 again are making your set-in-stone argument; correct?  
 22 A. That is part of it, but also we are objecting to  
 23 Eschelon's language because it does not reflect our  
 24 current jeopardy process.  
 25 Q. You're also making the one-off argument then;

Page 62

1 correct?

2 A. That is the potential. We either have to -- if

3 the language is adopted, we either have to handle

4 jeopardies for Eschelon differently, or potentially change

5 our jeopardy process for everybody.

6 Q. Qwest's proposal for these provisions that are

7 covered by issues 12-71, 72 and 73 is just to refer to

8 Qwest's website; is that right?

9 A. To our PCAT where the procedures are laid out,

10 yes.

11 Q. But Qwest's view is that the contract itself

12 shouldn't contain any substantive provisions; is that

13 right?

14 A. It should not contain the jeopardy procedures,

15 no.

16 Q. Now, look at your direct testimony, Page 73.

17 A. I'm going to need a copy of my direct. That

18 would be No. 1. Which page?

19 Q. Page 73.

20 A. I'm there.

21 Q. At Page 73 you set out there the language that

22 Eschelon has proposed for this provision with one

23 adjustment; is that right?

24 A. With one adjustment being that -- what do you

25 mean with one adjustment?

Page 63

1 Q. Well, what I was going to say is with respect to

2 12.2.7.2.4.4.1, where it says for these two types of

3 jeopardies, Qwest will not characterize a jeopardy as a

4 CNR or send -- I've got to get closer -- for these two

5 types of jeopardies. Qwest will not characterize the

6 jeopardies as CNR or send a CNR jeopardy to CLEC if a

7 Qwest jeopardy exists, Qwest attempts to deliver the

8 service, and Qwest has not sent an FOC to the CLEC at

9 least a day -- oh, here, I'm -- I have got to start over.

10 I apologize.

11 Let's pick up where it says Qwest will not

12 characterize a jeopardy as a CNR or send a CNR jeopardy to

13 CLEC if a Qwest jeopardy exists, Qwest attempts to deliver

14 the service, Qwest has not sent an FOC notice to CLEC

15 after the jeopardy occurs, but at least a day before Qwest

16 attempts to deliver the service.

17 A. Yes. And that should be in there now. I know

18 that there were some exchanges of language at this time

19 that the testimony was being prepared, and I did not have

20 the "at least the day before" language at that time.

21 Q. And I'm not necessarily faulting you for not

22 having that in your testimony. The point I just wanted to

23 make is you understand that "at least a day" is Eschelon's

24 proposal?

25 A. That's right. And that is not our current

Page 64

1 process.

2 Q. Let's look at the section that comes right before

3 that 12.2.7.2.4.4; is that right?

4 A. Yes.

5 Q. Eschelon's proposal there is a jeopardy caused by

6 Qwest will be classified as a Qwest jeopardy, and a

7 jeopardy caused by CLEC will be classified as customer not

8 ready, paren, CNR, close parens. Is that right?

9 A. Yes.

10 Q. That's Qwest's process; correct?

11 A. I believe that is.

12 Q. And can you imagine any circumstances under which

13 a CLEC might want something different than that?

14 A. No.

15 Q. Then go to -- let's skip the middle section

16 because we'll talk about that separately. But section

17 12.2.7.2.4.4.2. Do you have that?

18 A. Yes.

19 Q. Eschelon's proposal there is if CLEC establishes

20 to Qwest that a jeopardy was not caused by CLEC, Qwest

21 will correct the erroneous CNR classification and treat

22 the jeopardy as a Qwest jeopardy. Do you see that?

23 A. Yes.

24 Q. That's Qwest's process as well; correct?

25 A. Yes.

Page 65

1 Q. And can you imagine a circumstance under which a

2 CLEC might not want to have that?

3 A. No. And that is defined in our PCAT where our

4 jeopardy procedures are outlined.

5 Q. Let's go to your surrebuttal now at Page 28.

6 Okay?

7 A. Okay.

8 Q. There you set out a hypothetical series of facts;

9 correct?

10 A. A sequence of events.

11 Q. First, second, third, fourth, fifth, sixth;

12 correct?

13 A. Yes.

14 Q. Now I'm going to -- actually, before I get to

15 that, let's talk about the Section 12.2.7.2.4.4.1. As I

16 understand it, the triggering circumstances for the

17 language that Eschelon's proposed for that section are

18 there's a Qwest jeopardy, Qwest attempts to deliver

19 service, Qwest hasn't sent an FOC after the jeopardy

20 occurs, but at least a day before Qwest attempts to

21 deliver service. Those are the triggering events for

22 Eschelon's proposed language; correct?

23 A. I believe that's correct.

24 Q. Okay. Now, with that in mind, what I want to do

25 is change your hypothetical series of events just a little

Page 66

1 bit. So imagine a series of events where first Qwest --  
 2 first, Eschelon places an order for service; second, Qwest  
 3 sent an FOC indicating the due date for the order; third,  
 4 Qwest sends a jeopardy notice indicating a Qwest jeopardy  
 5 lack of facilities; fourth, Qwest clears the jeopardy and  
 6 tries to deliver the circuit but doesn't send an FOC;  
 7 fifth, Eschelon's not ready and can't accept delivery of  
 8 the circuit.  
 9 Would you agree that under those circumstances  
 10 that should not be treated as a CNR jeopardy?  
 11 A. Okay. I'm going to -- I'm presuming I have  
 12 remembered all of your steps here. I don't believe that  
 13 is completely true. The FOC is the formal system notice  
 14 that you get with a new due date after a jeopardy. The  
 15 original due date is still what everyone shoots for, and  
 16 Qwest technicians are in contact with Eschelon's  
 17 technicians at this time.  
 18 So if it is possible to deliver the service on  
 19 the original due date, which is what all of the parties  
 20 want, that is what should be accomplished whether or not  
 21 the FOC has been sent.  
 22 Q. Isn't it true that there are certain kinds of --  
 23 let me ask it this way. There are a number of different  
 24 types of jeopardies; correct?  
 25 A. Yes.

Page 67

1 Q. And those types are different causes for the  
 2 jeopardy; right?  
 3 A. Yes.  
 4 Q. And there are certain kinds of jeopardies that  
 5 Qwest has told CLECs if you get this kind of jeopardy  
 6 notice, don't expect us to be there on the due date  
 7 because we're not likely to do it?  
 8 A. Our jeopardies never say that you cannot expect  
 9 the service. They say that the due date is in jeopardy,  
 10 but they don't say absolutely that the service will not be  
 11 delivered the original due date.  
 12 Q. All right. And I'm asking a different question.  
 13 A. Okay.  
 14 Q. Isn't it the case that Qwest has told Eschelon  
 15 and other CLECs if you get certain kind of jeopardies, you  
 16 shouldn't expect that the circuit will be delivered on the  
 17 due date?  
 18 A. I don't believe that's how we have explained the  
 19 jeopardies, that you shouldn't expect. We always attempt  
 20 to deliver on the original due date whenever possible.  
 21 Sometimes jeopardies will prevent that.  
 22 Q. So if Eschelon gets a Qwest facilities jeopardy,  
 23 isn't it the case that what that jeopardy is telling  
 24 Eschelon is that don't expect us to be there for the due  
 25 date, don't schedule, don't plan to accept the circuit

Page 68

1 because we're likely miss that due date?  
 2 A. I wouldn't phrase it that way. I would say that  
 3 there is a potential for us to miss the due date. That's  
 4 what the purpose of jeopardies is. It isn't absolutely  
 5 we're not going to be there, no.  
 6 Q. So is the case that if Eschelon receives a Qwest  
 7 facilities jeopardy, it should expect Qwest to deliver the  
 8 circuit on that due date?  
 9 A. It should expect Qwest to try, yes.  
 10 Q. And so Eschelon --  
 11 A. But it has to understand that the potential is  
 12 there that the due date will be missed. That's the point  
 13 of jeopardies.  
 14 Q. But Eschelon should have personnel standing by  
 15 and available. It should complete everything it needs to  
 16 complete in order to accept the circuit, even though it  
 17 has received a Qwest facilities jeopardy?  
 18 A. I believe it should complete everything it needs  
 19 to complete by the due date. I don't know that its  
 20 personnel has to be standing by. That would depend on  
 21 what's been communicated from Qwest technicians. I do  
 22 believe that they should be ready to accept the circuit on  
 23 the original due date in case Qwest is able to provide the  
 24 circuit on the original due date.  
 25 Q. Well, you should assume that what's been

Page 69

1 communicated by the Qwest technicians is a Qwest facility  
 2 jeopardy.  
 3 A. And the Qwest technicians are trying to resolve  
 4 that jeopardy as quickly as possible. Yes.  
 5 Q. And so if Eschelon receives a Qwest facilities  
 6 jeopardy, does it need to have personnel standing by to  
 7 accept the circuit on the due date?  
 8 A. By personnel standing by, if you mean there at  
 9 the circuit, not necessarily. But the potential is still  
 10 there that Eschelon could receive the circuit on the  
 11 original due date, because that is what Qwest's goal is  
 12 all along. We have not said we won't provide it. We've  
 13 said it may not be provided.  
 14 Q. Well, I guess I'm trying to quantify, if it's  
 15 possible, what the level of likelihood is that a circuit  
 16 is going to be provided on the due date when a Qwest  
 17 facilities jeopardy has been provided.  
 18 A. Well, all right. Let's look at the data that was  
 19 in your exhibit BJJ-23. That was 100 orders with Qwest  
 20 facility jeopardies. 76 percent of those orders were  
 21 delivered on the original due date and accepted by  
 22 Eschelon on the original due date.  
 23 Q. And then on your hypothetical series of events,  
 24 just to make sure that I understand what you're talking  
 25 about here, you have a number of steps. And the fifth

Page 70

1 step is Qwest is supposed to send an FOC with a new due  
2 date?  
3 A. Yes.  
4 Q. Does that assume this Qwest has sent the FOC with  
5 a new due date or that it hasn't?  
6 A. Qwest is supposed to.  
7 Q. And let's assume that it doesn't.  
8 A. The formality is that Qwest is supposed to, but  
9 the technicians are in touch with each other. If it's  
10 possible to get the circuit in place on the service date,  
11 that is what should happen. It should not be dependent on  
12 whether or not that system notice has been sent.  
13 Q. The contract requires the FOC; correct?  
14 A. The PCAT requires the FOC. Your contract  
15 proposal requires the FOC.  
16 Q. And Qwest's current process is to provide the  
17 FOC?  
18 A. That is the process.  
19 Q. And that FOC is to be provided in advance of the  
20 due date; correct?  
21 A. In advance of delivery of the circuit.  
22 Q. Not in advance of the due date?  
23 A. Not in advance of the due date.  
24 Q. Is there any amount of time in advance of  
25 delivery of the circuit that you think is reasonable for

Page 71

1 Eschelon to expect?  
2 A. We have not set a specific time. I don't want to  
3 speculate on what that time should be.  
4 Q. The purpose of the FOC is to give the CLEC  
5 advanced notice; correct?  
6 A. The purpose of the FOC is a formal system notice.  
7 The CLEC also gets notice via communication with the Qwest  
8 technician who's installing the circuit.  
9 Q. The formal notice that Eschelon is supposed to  
10 rely on is the FOC; correct?  
11 A. It is the formal notice. I don't think it should  
12 be the only thing that Eschelon relies on, because there  
13 is communication between the technicians going on at the  
14 same time.  
15 Q. Do you know who within Eschelon receives the FOC?  
16 A. No, I don't.  
17 Q. You say that Eschelon's proposed language would  
18 prevent Qwest from -- I'm sorry -- that Eschelon's  
19 proposed language forces extra time into the process; is  
20 that right?  
21 A. If we adhere to the provision requiring an FOC at  
22 least a day before it can do that, yes.  
23 Q. Now, isn't it the case that Eschelon's language  
24 would provide that even when Qwest hasn't provided an FOC  
25 at least a day before delivery, that it will still use its

Page 72

1 best effort to accept the service when Qwest attempts to  
2 deliver?  
3 A. That's what the language says.  
4 Q. And you would agree with me that that language  
5 does not force additional time into the process; correct?  
6 A. That part of the language, no.  
7 Q. And you would agree with me that Eschelon's  
8 language doesn't say that if Qwest doesn't provide the  
9 FOC, what it should do is delay delivery in order to  
10 provide the FOC before delivery. That's not what Eschelon  
11 has proposed, is it?  
12 A. No. What it does do, though, is eliminate the  
13 categorization of a subsequent jeopardy on the basis of a  
14 customer not ready.  
15 Q. And Eschelon's language also provides that if  
16 necessary the parties will attempt to set a new  
17 appointment time on the same day; correct?  
18 A. Eschelon -- I think it says that. Yes, it does  
19 say that.  
20 Q. Again, that language would not force additional  
21 time into the process?  
22 A. No. That's not what your language does. That  
23 language simply says they will still try and meet the due  
24 date.  
25 Q. So what you're saying is Qwest always tries to

Page 73

1 make the due date if it can?  
2 A. It does.  
3 Q. And Eschelon's language is saying the parties  
4 should try to make the due date if they can; correct?  
5 A. It does.  
6 Q. And it also describes what will happen if that  
7 doesn't happen, notwithstanding the parties' best efforts,  
8 and Eschelon hasn't received the advanced notice that's  
9 provided by an FOC?  
10 A. And that's where we have a problem with the  
11 language. Because it is basing the requirement on an FOC,  
12 which isn't the only means of communications between the  
13 parties. And so it takes away one of the options for  
14 clarification of jeopardies as a result, when really FOCs  
15 and classification of jeopardies are not related topics.  
16 Q. Why have the FOCs if you can just rely on the  
17 technicians to be talking to one another and work this all  
18 out among themselves?  
19 A. I believe it's a recordkeeping device.  
20 Q. It doesn't serve any notice function?  
21 A. Well, that depends on how it's used.  
22 Q. Are you saying it shouldn't serve a notice  
23 function?  
24 A. I don't believe it should be the sole notice  
25 function, because it isn't. The technicians are calling

Page 74

1 each other.  
 2 Q. Let's talk a little bit about control  
 3 production --  
 4 A. Okay.  
 5 Q. -- which is issue 12-87. What control production  
 6 is is the testing of electronic interfaces that Eschelon  
 7 uses to order products and services from Qwest by placing  
 8 actual orders; is that right?  
 9 A. In parallel with Qwest's monitoring of those  
 10 orders, yes.  
 11 Q. You would agree with me that Eschelon has a  
 12 strong interest in having the electronic interfaces that  
 13 it uses to place orders work correctly?  
 14 A. Yes. As does Qwest.  
 15 Q. You would agree with me that Eschelon's proposed  
 16 language provides that control production is not required  
 17 for recertification unless the parties agree otherwise;  
 18 correct?  
 19 A. Correct.  
 20 Q. Recertification involves updating existing  
 21 systems; is that right?  
 22 A. Recertification involves a circumstance in  
 23 testing where the CLEC has already certified given product  
 24 and activity types, and they're moving to a new release  
 25 where Qwest has determined that control production testing

Page 75

1 is not required?  
 2 Q. Eschelon's proposed language defines  
 3 recertification as not including new implementations such  
 4 as new products and/or activity types; correct?  
 5 A. That's right.  
 6 Q. Now, Eschelon is not saying that it shouldn't  
 7 participate in recertification testing, is it?  
 8 A. No.  
 9 Q. There's a separate section of the contract that  
 10 specifically governs recertification testing; right?  
 11 A. Well, recertification is -- I think we're mixing  
 12 pieces of this language. Because recertification is a  
 13 type of testing, whereas control production is a phase of  
 14 testing. So it's confusing.  
 15 Q. Fair enough. Recertification is a type of  
 16 testing?  
 17 A. Yes.  
 18 Q. And the parties have agreed on language regarding  
 19 Eschelon's participation in recertification testing;  
 20 correct?  
 21 A. Yes.  
 22 Q. And what that language provides is that new  
 23 releases of the EDI interface may require recertification;  
 24 correct?  
 25 A. Yes.

Page 76

1 MR. MERZ: I don't have anything further.  
 2 ARBITRATOR RODDA: Okay. Let's go back to the  
 3 topic right before this which was -- I don't know.  
 4 THE WITNESS: Jeopardies.  
 5 ARBITRATOR RODDA: Jeopardies.  
 6  
 7 EXAMINATION  
 8  
 9 Q. (BY ARBITRATOR RODDA) So just so I'm clear, the  
 10 problem -- what is the problem that you have with  
 11 Eschelon's proposal? It had something to do with it takes  
 12 away the technician communications or it relies too much  
 13 on the FOC or --  
 14 A. Yes. They put in a stipulation on when the FOC  
 15 should be provided in a jeopardy situation that is not  
 16 consistent with our current process today in that it  
 17 requires the FOC be provided at least a day before. And  
 18 if it is not provided at least a day before, then we're  
 19 not able to perform a subsequent jeopardy if the customer  
 20 is not ready. That is their -- the consequence that they  
 21 establish there.  
 22 Q. Okay. And so going back to the change management  
 23 and the interval issue, can Qwest -- under the change  
 24 management process can Qwest increase intervals over CLEC  
 25 objections?

Page 77

1 A. A CLEC can object to an interval increase. Qwest  
 2 might decide to go forward, but the CMP process allows a  
 3 lot of mechanisms for objection. And with the one  
 4 increase where CLECs did object, Qwest did not go forward.  
 5 It would not be incumbent upon Qwest to ignore CLEC  
 6 objections to an interval increase.  
 7 Q. With the multitude of interconnection agreements  
 8 you must have existing in this world, are there different  
 9 intervals for different CLECs, or does it all sort of come  
 10 down to the smallest common denominator because that's  
 11 easier for Qwest?  
 12 A. I don't believe there are different intervals for  
 13 different CLECs because we established the service  
 14 interval guide as the common document, and it is an  
 15 exhibit to the interconnection agreements. And so it is  
 16 managed -- changes to that are managed through the CMP, so  
 17 I don't believe that we have different intervals for  
 18 different CLECs anymore. It probably did exist in the  
 19 past, but we have attempted standardize that process.  
 20 Q. So in an interconnection agreement could a CLEC  
 21 negotiate a specific interval or --  
 22 A. I believe we would object to that as inconsistent  
 23 with our service interval guide.  
 24 ARBITRATOR RODDA: Okay. All right. Did you  
 25 have any redirect?

Page 86

1                   RECCROSS-EXAMINATION

2

3       Q. (BY MR. MERZ) We were talking about tagging at

4 the demarc. My recollection is that was an issue that was

5 settled during the hearing itself. Is that not your

6 recollection?

7       A. Honestly, I can't recall.

8       Q. And it was issue 12-75, and 12-75 isn't in the

9 ALJs' --

10      A. Several issues were settled during the course of

11 the hearing, yes.

12      Q. And if that issue was settled during the course

13 of the hearing, you would agree with me, obviously, that

14 Qwest didn't make its decision about whether to set in

15 stone that process as a result of the ALJs' order?

16      A. In that case, if it was settled during the

17 hearing, Qwest came to that determination independently of

18 the arbitrator's report.

19      Q. Now, you have described Qwest's desire to have

20 uniform processes from state to state; is that right?

21      A. Yes.

22      Q. And as I understand it, however, Qwest does

23 not -- is not willing to implement the root cause analysis

24 requirement that's in place in Minnesota in Arizona, or in

25 any of the other states outside of the Minnesota; isn't

Page 87

1 that right?

2      A. That's correct. Because we believe we have

3 processes in place that cover these situations.

4      Q. And Qwest is also not willing to implement the

5 process in place in Minnesota for acknowledging errors in

6 any other state; correct?

7      A. Correct. We don't want that language in the

8 contract. Again, we already have processes in place

9 through our PCATs for dealing with errors.

10     Q. You had some questions from Mr. Topp regarding

11 intervals and what Qwest could or could not do. And as I

12 understand what you said is as the CMP document exists,

13 Qwest could implement an interval change over objections

14 from Qwest or, I'm sorry, from Eschelon and other CLECs;

15 correct?

16     A. What I said was we could. It would not be

17 incumbent on us to do so.

18     Q. The CMP document in all events would allow for

19 that to happen?

20     A. Ultimately. But there is recourse if we do that

21 for the CLECs.

22     Q. And as I understand it, one avenue of recourse is

23 Eschelon could bring a complaint to the Arizona

24 Commission?

25     A. Yes.

Page 88

1       Q. And in that complaint, Eschelon would be asking

2 the Commission to undo a longer interval than Qwest has

3 already implemented; correct?

4       A. That would presume that they bring the complaint

5 after the change has been implemented, but yes.

6       Q. If Qwest wanted to implement the change, there

7 would be nothing stopping it unless it got an order from

8 the Arizona Commission; correct?

9       A. I don't believe Qwest would behave in that manner

10 if there was sufficient objection to the increase in

11 interval. So Qwest would be making that decision

12 unwisely, I think, given, presumably, that the CLECs have

13 objected to the interval increase.

14      Q. And what I'm really focusing on is what Qwest

15 could do under the CMP process as it exists. Qwest could

16 implement that change, and then it would be Eschelon's

17 problem to go to the Commission to get that change undone;

18 correct?

19      A. That is the potential.

20      Q. We've talked about jeopardies, and I think you

21 have told us that the process as described by Eschelon's

22 proposed language is the same as Qwest's existing process

23 but with one exception, and that is it is, as I understand

24 your testimony, not Qwest's process to provide the FOC at

25 least a day before delivery?

Page 89

1       A. That's correct.

2      Q. Now, Qwest's existing process, then, doesn't rely

3 on these informal communications between technicians;

4 correct?

5      A. No. I would say it does.

6      Q. Well, if Qwest has a process that requires

7 providing the FOC, then that's a process that doesn't rely

8 on informal communications between technicians; correct?

9      A. The provisioning of the FOC is not dependent on

10 the communication between the technicians, but really

11 they're not related.

12      Q. You had answered some questions about your

13 Exhibit RAR-6. And if you just look at the first example,

14 the due date was January 11, 2005, and the circuit was

15 installed January 17, 2005; correct?

16      A. No. It was installed on January 12th.

17      Q. Oh, I'm sorry. I see it, yes.

18         Then, if you go to the next example, the due date

19 was February 9th, and Qwest installed on the 14th.

20      A. Correct.

21      Q. And we could look -- I'm not going to go through

22 each one, but we could look at each of these and figure

23 out when the circuit should have been installed according

24 to the original due date and when was it actually

25 installed?

Page 102

1 drain of the CLECs are. And even if we did know it,  
2 that's not how the rate is set up, and that's not how it's  
3 been ordered to be charged. And the usage that  
4 Mr. Starkey claims Eschelon wants to be charged on is not  
5 even a List 1 drain, which he claims is how we should  
6 build our power plant.  
7 And I think that sort of sums it up.  
8 MR. TOPP: Thank you. With that, we would make  
9 Mr. Ashton available for cross-examination.  
10 ARBITRATOR RODDA: Okay, Mr. Merz.  
11 MR. MERZ: Thank you, Your Honor.  
12  
13 CROSS-EXAMINATION  
14  
15 Q. (BY MR. MERZ) Good afternoon, Mr. Ashton.  
16 A. Good afternoon.  
17 Q. You have talked about this difference between  
18 power usage and power plant. It's your understanding that  
19 the parties have agreed upon language that would allow  
20 Eschelon to elect to be charged for power usage based on  
21 the measurement of its actual usage of power; correct?  
22 A. For orders of power larger than 60 amps, that's  
23 correct.  
24 Q. And under that option what happens is Qwest  
25 measures the power usage a maximum of four times a year

Page 103

1 and charges based on those measurements; is that right?  
2 A. Charges for electric usage, yes.  
3 Q. And so it's not like my electric meter at home  
4 which is always spinning. You're just measuring snapshots  
5 in time four times a year?  
6 A. That's correct. So from the point that we take  
7 the measurement until the next measurement, that's the  
8 amount that is used as the basis for the charges.  
9 Q. Okay. Now, the issue that we're grappling with  
10 here, which is issue 8-1 and its subparts, is whether  
11 there should be a similar measured charge option for the  
12 power plant charge; correct?  
13 A. That's the issue.  
14 Q. Now, you mention in your summary some  
15 terminology, List 1 drain, List 2 drain. I want to talk  
16 with you a little bit about that.  
17 List 1 drain is the amount of power drawn by the  
18 equipment during the busiest hour of the busiest day of  
19 the year; is that right?  
20 A. List 1 drain is specific to individual shelves of  
21 equipment that are fully carded during the busiest hour of  
22 the busiest day of the year at normal operating voltages.  
23 Q. Okay. And so that's sometimes referred to as the  
24 peak drain?  
25 A. Mr. Starkey referred to it as the peak drain. I

Page 104

1 would never refer to it as the peak drain, because the  
2 peak drain is the List 2 drain.  
3 Q. Okay. Fair enough.  
4 Usage under normal operating conditions  
5 fluctuates, and some days it's going to be higher and some  
6 days it's going to be lower.  
7 A. That's correct.  
8 Q. And that fluctuation may vary depending on the  
9 carrier; correct?  
10 A. That's correct.  
11 Q. And I think one of the things that you mention in  
12 your testimony is that Eschelon serves businesses, and so  
13 it may not have the same usage pattern as a company like  
14 Qwest that serves residential customers. Fair enough?  
15 A. That's fair.  
16 Q. Now, List 2 drain is the amount of power drawn by  
17 the equipment under worst case operating conditions; is  
18 that right?  
19 A. That's correct.  
20 Q. And List 2 drain is significantly higher than  
21 List 1 drain; isn't that right?  
22 A. Generally.  
23 Q. And because of manufacturers' requirements,  
24 cables that carry power to the collocated equipment are  
25 engineered to List 2 drain; is that right?

Page 105

1 A. At the minimum, yes.  
2 Q. Now, I want you to refer to your rebuttal  
3 testimony at Page 9.  
4 A. Okay.  
5 Q. And I'm looking at Line 17 through 21.  
6 A. Is that the one that starts with the question?  
7 Q. I'm looking at your -- let's see here, your  
8 rebuttal, Page 9, List 17, or Line 17, there's the  
9 sentence: Qwest designs and engineers power plant  
10 capacity.  
11 A. Maybe our page numbers don't match up.  
12 Q. I have a question. How does Qwest determine when  
13 to augment power plant at a central office? I have that  
14 question on Page 9 at Line 14.  
15 A. Okay. That's on my Page 10.  
16 Q. Okay.  
17 A. I'm with you.  
18 Q. Do you see the sentence then that says: Qwest  
19 designs and engineers power plant capacity sufficient to  
20 meet the total busy hour load of all equipment present in  
21 the central office, plus all CLEC ordered amounts of  
22 power, plus the anticipated busy hour drain of expected  
23 future Qwest equipment additions.  
24 Do you see that testimony?  
25 A. Yes, I do.

Page 106

1 Q. Now, when you're talking about the busy hour load  
2 of all of the equipment present in the central office,  
3 you're talking about both CLEC equipment and Qwest  
4 equipment; is that right?  
5 A. That's correct.  
6 Q. And is that the List 1 drain that we've been  
7 talking about?  
8 A. It's not. It's actually going to be somewhat  
9 less than the List 1 drain, because the List 1 drain is  
10 measured on an individual equipment shelf basis. Assuming  
11 the shelf is fully carded, which a lot of shelves in a  
12 building are not, or even in a CLEC cage.  
13 So it serves as a reasonable underestimate proxy  
14 of the List 1 drain, but it's not the List 1 drain.  
15 Because it would be nearly impossible to find out the  
16 List 1 drain for every shelf that's been put in over the  
17 last 100 years, it serves as a proxy.  
18 Q. You're talking about the busy hour load for the  
19 office in the aggregate?  
20 A. Yes.  
21 Q. And so for any particular office, there is an  
22 hour on a particular day when that busy load is expected;  
23 correct?  
24 A. I wouldn't say expected, because we don't  
25 necessarily know when to expect it. It might happen to be

Page 107

1 Mother's Day, depending on the usage profile of the  
2 office, it might not.  
3 Q. On that busy hour for that office, not all of the  
4 CLECs will be at their highest drain for that year. Do  
5 you understand what I mean?  
6 A. That's correct.  
7 Q. So if the busy hour for a particular office is  
8 10:00 a.m. on Mother's Day, for example, but that isn't  
9 the busy hour for Eschelon, then Eschelon's List 1 drain  
10 isn't really part of this calculation, is it?  
11 A. Eschelon's List 1 drain is never a part of the  
12 calculation for power plant capacity.  
13 Q. Let me ask it a different way. If the busy hour  
14 for a particular office is 10:00 a.m. on Mother's Day, and  
15 that isn't the busy hour for Eschelon, then Eschelon's  
16 peak drain, the highest drain they would experience during  
17 that year, wouldn't be part of that calculation?  
18 A. A portion of it would because they're still  
19 drawing power, but the overall peak that they would draw  
20 would not, no. However, what is part of the calculation  
21 is the amount that they've ordered so that we make sure  
22 that we have enough power.  
23 Q. I'm going to come to that in a second. What is  
24 used for purposes of engineering the size of the power  
25 plant -- I'm sorry. Let me ask this a different way.

Page 108

1 What is used for purposes of determining the size  
2 of the power plant is the draw by Eschelon's equipment on  
3 the busy hour for that office; right?  
4 A. No.  
5 Q. No. Why not?  
6 A. Because for a CLEC we have no idea what their  
7 List 1 drain is. We have no idea what their anticipated  
8 usage is. And because we want to be able to provide them  
9 with the power that they've ordered, we use the power that  
10 they've ordered that -- the ordered amount as the amount  
11 of capacity in the power plant that we provision.  
12 Q. But isn't it the case that you know how much your  
13 central office -- each of your central offices is drawing  
14 on that office's busy hour? I mean, that's something that  
15 you're able to measure; correct?  
16 A. Yes, but then I have to -- because I can't grow  
17 power plant as quickly as load can grow. Load can grow  
18 minute to minute as cards are added. I can't grow a power  
19 plant that quickly. I have to add rectifiers and  
20 batteries, which takes months and months, and engines and  
21 so forth. So I have to be ahead of the curve.  
22 Q. And that's why you add in the CLEC ordered  
23 amounts of power; is that correct?  
24 A. Correct.  
25 Q. And when you're talking about the CLEC ordered

Page 109

1 amounts of power, what you're really referring to is the  
2 size of the power cables that the CLEC orders. Is that  
3 how the amount of power is determined?  
4 A. No. It's the number that they put on their order  
5 form is the amount of power they want.  
6 Q. And what blank are they filling in when they put  
7 that down on their order form? What is the question  
8 they're answering?  
9 A. I don't have the order form in front of me, but I  
10 believe it's how much power do you want or what size  
11 feeders do you want. I don't know the exact wording.  
12 Q. Well, is it what size feeders or how much power,  
13 or do you not know?  
14 A. I don't know without the order form.  
15 Q. If the question were what size feeders do you  
16 want, what would that mean to you? The size of the power  
17 cables; correct?  
18 A. Yeah. But I doubt that we ask the question that  
19 way because we size the cables. So without looking at the  
20 order form, I couldn't say exactly how we ask the  
21 question.  
22 Q. And that's not something that you have attached  
23 to your testimony, the order form?  
24 A. I don't believe I have attached it to my  
25 testimony, no.

Page 110

1 Q. Now, if you're counting the busy hour load, which  
2 would include the drain of all of the CLECs, and you're  
3 also counting the List 2 drain of the CLEC equipment,  
4 aren't you counting that CLEC's drain twice?  
5 A. We're counting a small portion of the CLEC's  
6 drain twice. It's not all of the CLEC's drain twice.  
7 Q. Okay. And what do you mean by a small portion?  
8 A. Well, I mean, whatever the CLEC is drawing at the  
9 minute we take the busy hour reading, that portion, that  
10 is added, obviously, along as part of the aggregate along  
11 with their order.  
12 Q. And it could happen that the CLEC's busy hour  
13 drain happens at the same time as the central office's  
14 busy hour drain.  
15 A. That's theoretically possible.  
16 Q. And if that were the case, you would be counting  
17 all of the CLEC's busy hour drain twice, because the busy  
18 hour drain plus the List 2 drain is actually more than  
19 twice the busy hour drain; correct?  
20 A. Probably, depending on how the CLEC uses it.  
21 There are CLECs who actually use more power than what  
22 they've ordered.  
23 Q. Explain to me how that happens.  
24 A. Okay. There's -- in any order there's an -- and  
25 it states so right on the order form that if you order the

Page 111

1 quantify of one feeder set, you're going to get an A  
2 feeder set and a B feeder set. So if a CLEC orders 100  
3 amps, Qwest is going to use its sizing rules and the same  
4 rules that are you used in the National Electric Code to  
5 size the feed at least 125 percent of the order. That's  
6 the A feed. The B feed then becomes the redundant backup  
7 feed, so to speak, even though they normally share power.  
8 So in reality on a 100 amp order, the CLEC has the  
9 capability to draw at least 250 amps before they blow  
10 their fuses.  
11 Q. So the CLEC, at least in theory, can draw on both  
12 the A feed and the B feed simultaneously?  
13 A. Correct.  
14 Q. Up to the maximum of the size of the cable?  
15 A. Of the fuse.  
16 Q. Of the fuse.  
17 A. The cable is usually going to be much larger in  
18 terms of ampacity than the fuse size.  
19 Q. List 2 drain for Qwest equipment is not part of  
20 the calculation for sizing the power plant of a central  
21 office; is that right?  
22 A. Not for the power plant, no.  
23 Q. Why not?  
24 A. Because Qwest knows its List 1 drain for each  
25 piece of equipment that we're going to add to the office.

Page 112

1 Q. Does Qwest as part of its power ordering  
2 requirements ask CLECs to state what their List 1 drain  
3 is?  
4 A. No, we don't. Because even if we did, we would  
5 have no way of knowing how correct it is.  
6 Q. Well -- I'm sorry. I don't mean to cut you off.  
7 A. Even with our own equipment, we don't just take a  
8 manufacturer's word as to what the List 1 drain is. We  
9 have lab experience and field experience with it that  
10 shows us here is what the List 1 drain is, here is what it  
11 normally draws.  
12 Q. Well, do you assume that CLECs are not as able as  
13 Qwest to determine what their List 1 drain is?  
14 A. In my experience, most CLECs, yes, they're not as  
15 able.  
16 Q. Why do you say that?  
17 A. Because most CLECs don't have the power  
18 engineering expertise that Qwest does.  
19 Q. Going to your rebuttal at Page 3.  
20 A. Under which question is it? So I make I'm on the  
21 right page.  
22 Q. Sure. Good question. Let's see here. Page 3.  
23 How does Qwest design a power plant?  
24 A. Okay.  
25 Q. I'm looking at -- let's see here. For example,

Page 113

1 when a CLEC provides.  
2 A. Yes.  
3 Q. For example, when a CLEC provides Qwest with an  
4 order for power feed, paren, sometimes referred to as  
5 power distribution or power cables, Qwest provisions the  
6 feed at the requested amount and insures the power plant  
7 has sufficient spare capacity to provide that ordered  
8 amount of power.  
9 Do you see that?  
10 A. Yes.  
11 Q. And I had interpreted that to mean that what the  
12 CLEC is ordering is power cables, the size of the power  
13 cables. That's not what you intended, I take it?  
14 A. It's not really the size of the power cables,  
15 because the size of the power cables is not only amperage  
16 dependent, it's distance dependent. And so that's due to  
17 the low voltages at which telecommunications equipment  
18 operates.  
19 Q. Under what circumstances would CLEC equipment be  
20 expected to draw List 2 drain?  
21 A. Assuming that they actually sized based on List 1  
22 and List 2 drain, the List 2 event is going to occur after  
23 batteries have been fully discharged to the lowest  
24 possible voltage, operating voltage of each piece of  
25 equipment. As the equipment restarts, as power is brought

Page 114

1 back, as the equipment restarts, fans are going to start  
2 up, capacitors are going to draw extra power. So not only  
3 will the equipment be drawing its normal power, it will be  
4 drawing its normal power at a low voltage, which means  
5 higher current. And it will also be having start-up  
6 currents for capacitors and fans and things like that.  
7 Q. Under what circumstances are batteries fully  
8 discharged?  
9 A. Typically there's two different circumstances.  
10 And I've been involved with many, many outages. Although  
11 it doesn't happen that often, it happens.  
12 The two major circumstances in which it happens  
13 are, let's say, for example, a major natural disaster  
14 where I can't get fuel to a generator. AC power is out  
15 for days, my generator runs out of fuel, and the batteries  
16 eventually run out of voltage, so to speak.  
17 Q. And just to interrupt you a second, that's a  
18 circumstance that you're aware of having happened?  
19 A. Oh, yeah. Yes.  
20 Q. All right.  
21 A. The other circumstance that happens is there are  
22 times when accidents happen. Let's say, for example, that  
23 an electrician is putting some new lights and they have a  
24 run of conduit, metallic aluminum conduit, and they happen  
25 to get it across ground and a hot bus. The entire office

Page 115

1 at that point is going to go to zero volts, and it's going  
2 to take down most of the equipment, if not all. And as  
3 that equipment -- I still have power to the office, but  
4 because I had a temporary short, the equipment stopped  
5 working. The equipment is going to come back up with a  
6 List 2 drain.  
7 Q. How frequently does a List 2 drain happen? I  
8 mean, it's an unlikely event, is that fair to say?  
9 A. It is. I would say on average across, you know,  
10 a couple of thousand central offices, maybe five times a  
11 year.  
12 Q. Would you agree with me that it would be  
13 impossible for a CLEC's equipment to simultaneously draw  
14 List 1 drain and List 2 drain?  
15 A. Yes. They're mutually exclusive of each other.  
16 List 2 drain is -- List 1 drain is part of the List 2  
17 drain. The List 2 drain is just more.  
18 Q. Now, your rebuttal, Page 13 maybe. I'm looking  
19 at the question that says: Why can't Qwest just measure  
20 Eschelon's peak usage and bill for power plant on that  
21 basis?  
22 A. Okay.  
23 Q. And what I understand you to be saying is you  
24 can't charge for power plant based on measurement, because  
25 measurement at random times is unlikely to capture the

Page 116

1 peak usage; is that correct?  
2 A. It's unlikely to capture the busy hour usage.  
3 Q. That's because the measurement is just a snapshot  
4 in time?  
5 A. Correct.  
6 Q. Now, is the concern that the measurement might  
7 result in Qwest being undercompensated?  
8 A. I would say the primary concern is that we would  
9 not have enough power available to serve the CLEC as well  
10 as ourselves. Because the power plant, as Mr. Starkey  
11 pointed out, is a shared resource. So if I run out of  
12 capacity, everybody goes down. Not just the CLEC, but  
13 Qwest as well.  
14 Q. I'm not sure if you answered my question. I'm  
15 going to try it again.  
16 A. Okay.  
17 Q. When you talk about not measuring based on a  
18 snapshot in time, what I would assume is at least part of  
19 the issue was that if the measurement turns out to be less  
20 than average use during the period that that measurement  
21 is going to apply, Qwest ends up not being fully  
22 compensated. I thought you were going to say that was  
23 part of the issue. Is it not part of the issue?  
24 A. That's not really part of the issue, because if I  
25 take random measurements in time over time, randomly,

Page 117

1 they're going to average out. So yes, I may be  
2 undercompensated for a three-month or six-month period,  
3 but I may be slightly overcompensated for the next three-  
4 or six-month period.  
5 Q. The measured usage charge options available for  
6 power usage is one that happens based on a snapshot in  
7 time?  
8 A. That's correct.  
9 Q. And what I understand you to be saying is the  
10 concern is different, because here you're concerned with  
11 whether -- when you're talking about power plant, you're  
12 concerned whether the power plant is going to be  
13 adequately sized?  
14 A. Well, I was speaking -- in my previous answer I  
15 was speaking specifically of usage in terms of recovering  
16 costs for electricity. The power plant, we want to make  
17 sure that there's enough power plant there so if the CLEC  
18 ever draws the amount of power that they ordered, it would  
19 be available to them 24 hours a day, seven days a week.  
20 MR. MERZ: I don't have anything further.  
21 ARBITRATOR RODDA: Okay. I don't have any  
22 questions.  
23 MR. ROSELLI: Just very briefly.  
24  
25

Page 126

1 the cost docket, those steps were all laid out and  
 2 averages were given for all of those steps without regard  
 3 to which of the types of design changes were occurring.  
 4 And so I guess to answer your question, when we  
 5 proposed the rate for that, as I said before, it was  
 6 intended to address all of the different circumstances.  
 7 It's an average time for a task, receiving an order,  
 8 processing an order for a design change, or reinitializing  
 9 the information for the order that's already in process if  
 10 the design change happens during the days of provisioning,  
 11 and the average times for those tasks regardless of what  
 12 kind of design change comes through.  
 13 Q. The cost study that you are referring to has not  
 14 been filed in this case; is that right?  
 15 A. It hasn't been filed in this case. It's based on  
 16 an approved rate from the cost docket, the 0194 docket. I  
 17 can only remember the last four numbers, but it was the  
 18 generic cost case in this state.  
 19 MR. MERZ: Your Honor, I have an exhibit actually  
 20 for Mr. Denney's testimony that I wanted to ask  
 21 Ms. Million about. I don't need to number it separate  
 22 since it's already part of his testimony, but if it's all  
 23 right with you I'll just hand a copy to her.  
 24 ARBITRATOR RODDA: That's okay.  
 25 Q. (BY MR. MERZ) Ms. Million, I have handed you

Page 127

1 there Exhibit DD-23 to the surrebuttal testimony of  
 2 Douglas Denney. Do you recognize that document?  
 3 A. Well, I can identify it as steps out of an,  
 4 evidently, Washington study that was conducted. It looks  
 5 to me as though it was a compliance study that was done in  
 6 Part D of the Washington case. This is one of hundreds  
 7 and hundreds of pages, so I don't -- I can't say that -- I  
 8 mean, I recognize what it is. I can't say that I  
 9 recognize --  
 10 Q. These two pages --  
 11 A. -- the document.  
 12 Q. -- concern cost studies for design changes; is  
 13 that right?  
 14 A. This is a piece of a study, yes. It's not the  
 15 entire thing, because it only identifies the direct costs.  
 16 It doesn't provide for any of the loaded -- loadings on  
 17 that. So you can't look at this and see what the final  
 18 cost or -- excuse me. Well, yeah, the final cost or rate  
 19 is for this element. You can only see what the direct  
 20 costs are in this instance based on this compliance  
 21 filing.  
 22 Q. Now, when you say there are hundreds of pages,  
 23 are you saying that there are hundreds of pages relating  
 24 to design changes or --  
 25 A. No. I'm saying that a nonrecurring cost study

Page 128

1 can have many hundreds of elements in it, and each element  
 2 has several pages associated with it, and so a  
 3 nonrecurring cost study can be size of this binder here.  
 4 And what we've got is two pages that don't represent the  
 5 entire cost for either one of these identified services.  
 6 It's just a part of the cost.  
 7 Q. The first page says design change mechanized;  
 8 correct?  
 9 A. Yes, it does.  
 10 Q. Let me ask you this. Are these two pages similar  
 11 to part of what would have been the cost study that was  
 12 submitted in Arizona? Do you know?  
 13 A. The assumptions in this would be different,  
 14 because this is a compliance filing based on what we were  
 15 ordered to do by the State of Washington, the commission  
 16 in the State of Washington. So it includes assumptions  
 17 that they have imposed on us as a result of their order.  
 18 Q. The assumption that they have imposed is found in  
 19 Probability No. 4; is that right?  
 20 A. Yes. It's the .7 probability reflects a  
 21 30 percent reduction to work time estimates.  
 22 Q. And so what the Washington Commission was saying  
 23 is we're going to reduce the amount of time that you have  
 24 estimated by 30 percent, and the way you get to that is  
 25 this .7 adjustment; is that right?

Page 129

1 A. Yes, that's correct.  
 2 Q. The second page of the document is design change  
 3 manual; is that right?  
 4 A. Yes, it is.  
 5 Q. What do those two things mean, design change  
 6 manual and design change mechanized?  
 7 A. In Washington they make a distinction between  
 8 orders that will processed mechanically via some sort of  
 9 computer interface versus orders that they presume are  
 10 processed manually. In other words, they come to Qwest in  
 11 a fax format or something of that nature.  
 12 And they've made -- in that state they've made a  
 13 distinction between those to things. In the beginning  
 14 when we -- and you have to remember this is -- I think the  
 15 date on this study is 2001.  
 16 In the beginning when we first started receiving  
 17 orders from CLECs, we had a tremendous number of CLECs  
 18 that were still sending fax orders to us, and we were  
 19 calculating an average time. And in Washington they said  
 20 we would like to split this out between those you receive  
 21 manually and those you receive in a mechanized fashion.  
 22 That is true in Washington, New Mexico. I don't know that  
 23 there's any other state that's made that distinction, and  
 24 it certainly was not a part of the distinction that  
 25 determined the rate for design changes here in Arizona.

Page 134

1 on processing these for the CLECs as in the UNE world.  
 2 Q. And just to now finally bring this back to this  
 3 case. Was the same template used for the Washington study  
 4 and the study that was filed with the Arizona Commission?  
 5 A. It could well have been, yes. I would have to  
 6 look at that study to know for sure, but I would presume  
 7 that it probably was. Because I think the Arizona study  
 8 was developed at about the same time and would have been  
 9 based on that same assumption that we were going to use  
 10 the existing template for a design change and simply put  
 11 in the correct times for UNEs.  
 12 Q. When you say existing template, what do you mean  
 13 by that exactly?  
 14 A. Well, as I explained, these are a couple of pages  
 15 out of a normal nonrecurring study that can be as thick as  
 16 this binder or that binder, so many, many pages.  
 17 And this was a template of -- in other words, for  
 18 every single element that we do a nonrecurring study for,  
 19 the same process is gone through. You determine which of  
 20 the centers are going to be involved, you lay out times,  
 21 you lay out probabilities, and the costs, the labor rate  
 22 for that, and you determine a cost. And then there's  
 23 another part that's missing from here that gets you to a  
 24 final cost or a final rate that also includes the loadings  
 25 on that.

Page 135

1 And we already had this set of steps and  
 2 processes laid out for an existing design change charge  
 3 that we had on the private line side, and so that's what I  
 4 mean by template. It was simply already laid out in  
 5 another nonrecurring study someplace, and we pulled it  
 6 over to make use of it in the nonrecurring for the UNEs.  
 7 Q. Under service delivery coordinator, you have got  
 8 a bunch of lines: Validate exact, validate TIRKS, assign  
 9 new TSC, TGMR. Do you see those?  
 10 A. Uh-huh.  
 11 Q. Yes?  
 12 A. Excuse me. Yes.  
 13 Q. Those are the tasks, I take it, that the service  
 14 delivery coordinator performs when he or she does a design  
 15 change?  
 16 A. Yes. That's correct.  
 17 Q. Who identified these tasks?  
 18 A. The service delivery coordinator subject matter  
 19 expert, who is an employee in Qwest who works in this area  
 20 and has responsibility for the interconnect service center  
 21 or the service delivery coordinators, and who is someone  
 22 who's got a great deal of experience in the area.  
 23 Q. What was the question that person was asked?  
 24 A. Estimate the times for -- first of all, lay out  
 25 the tasks for us. When they were originally asked this,

Page 136

1 lay out the tasks for us that are involved in processing a  
 2 design change, and estimate the times for us that those  
 3 tasks take when any of those tasks have to be processed  
 4 manually, and estimate for us the probability that those  
 5 tasks are going to happen on a manual basis.  
 6 Q. And was that person at the time this study was  
 7 done asked to estimate design changes for what? Design  
 8 changes for what? I'll just leave it at that.  
 9 A. For UNEs. Design changes for any UNEs that were  
 10 going to require design changes, and under the various  
 11 circumstances of a design change.  
 12 I think if you read in the nonrecurring cost  
 13 study -- and I believe that I have information about that  
 14 perhaps in my rebuttal testimony -- what the executive  
 15 summary of the nonrecurring study says is design changes  
 16 of service that happens in these, and these, and these  
 17 circumstances. And it lists out several different things,  
 18 and it talks about the end user premises, and it talks  
 19 about channel terminations which are related to CFA  
 20 change, and it talks about transport circumstances.  
 21 And it lays out all of the different types of  
 22 design changes that were contemplated when these time  
 23 estimates were put together. And that was a part of the  
 24 record in the cost case where the rate for design changes  
 25 was ordered by the Commission.

Page 137

1 Q. How do we know that?  
 2 A. Well, because I tell you that in my testimony,  
 3 and I promise I'm not lying. And number two, you can go  
 4 to the cost docket and the record in the cost docket, and  
 5 you can see it it's all on file as part of the cost case  
 6 in this state.  
 7 Q. Is there anything on this piece of paper, either  
 8 of these pieces of paper that we have in front of us that  
 9 we can look at to conclude that this sort of averaging  
 10 that you have discussed actually happened?  
 11 A. There isn't anything that indicates that on the  
 12 paper itself, but that's why I have pointed out that I  
 13 believe that if there's concern about rates, that they  
 14 need to be discussed in a cost proceeding where you can go  
 15 through the studies and see the detail and discuss what  
 16 goes into them and understand all of that. And I have  
 17 certainly suggested that with respect to the unapproved  
 18 rates.  
 19 But this rate went through all of that process  
 20 and the rate for design change in Arizona has already been  
 21 through that process in a contested case where all of  
 22 those questions got asked and answered.  
 23 Q. These tasks that are under service delivery  
 24 coordinator all look to me like administrative kinds of  
 25 functions. Would that be a fair characterization?

Page 142

1 made for this, and that's the way the study was presented  
 2 and that's the way it was approved. And I'm presuming  
 3 that the person that made that average estimate was asked  
 4 to take into effect all of the different circumstances  
 5 under which a design change might occur, and these are the  
 6 numbers that they came up with.  
 7 Q. Now, you have talked about this study that I  
 8 assume was quite a lot of work to put together. Would  
 9 that be fair?  
 10 A. Yes.  
 11 Q. And at least in Arizona, the rate that was  
 12 developed for design changes took effect on June 12th of  
 13 2002. That's your rebuttal testimony; correct?  
 14 A. That's correct.  
 15 Q. And Qwest began charging the design change rate  
 16 for unbundled transport as soon as it was approved in June  
 17 of 2002; correct?  
 18 A. I don't know when they began charging for it.  
 19 Q. Well, you would expect that Qwest, as soon as it  
 20 got a rate approved, would then go about implementing that  
 21 rate so it could charge CLECs; correct?  
 22 A. You would presume that, but that does not always  
 23 happen. Sometimes Qwest has rates approved and they  
 24 don't, for whatever reason, get implemented right away.  
 25 Q. And, in fact, in this particular case, Qwest

Page 143

1 didn't begin charging for design changes for loops until  
 2 more than three years later, October 1, 2005; is that  
 3 right?  
 4 A. I believe that's what I have seen in the  
 5 testimony, yes.  
 6 Q. And so it's your testimony that even though Qwest  
 7 went to all of the trouble to do a cost study calculating  
 8 an average, getting a rate, getting the rate approved, it  
 9 just decided not to apply that rate to loops for, let's  
 10 see, three years?  
 11 A. It doesn't just decide not to charge a rate, but  
 12 there are circumstances under which because of our own  
 13 internal difficulties with billing processes and that sort  
 14 of thing, we don't always implement rates right away.  
 15 And I can give you an example that I'm intimately  
 16 familiar with, because I fought for this for several years  
 17 internally to get the OSS rates implemented. We had  
 18 approved rates dating back to 2001 and before in both  
 19 Washington and New Mexico, New Mexico's on an interim  
 20 basis. And it took several years to get the funds  
 21 internally.  
 22 You know, we can't -- we're like anybody else.  
 23 We have budgets and we have constraints. We can't do  
 24 everything that we want to do every single time it comes  
 25 across the desk for OSS kinds of updates, and billing

Page 144

1 updates are included in that. And for the OSS, it took us  
 2 four or five years of Ms. Albersheim and myself fighting  
 3 tooth and nail with the people internally to get them to  
 4 actually implement that rate, even though we had an  
 5 approved rate.  
 6 So I guess what I'm telling you is that there are  
 7 a number of different circumstances, including some like  
 8 that, where rates are approved and we don't begin charging  
 9 them because either we can't or because we've made a  
 10 determination internally not to charge for something.  
 11 And so I don't know what the circumstances are,  
 12 but I do know that we did not charge for the loops in the  
 13 CFA changes initially.  
 14 Q. And all of those things that you have described  
 15 relating to OSS and relating to fighting tooth and nail  
 16 and all of those things that you just talked about, you  
 17 don't know that any of those things have anything at all  
 18 to do with design changes; correct?  
 19 A. I do not. I just am giving you an example of why  
 20 sometimes a rate is approved and we don't implement it  
 21 right away.  
 22 Q. And you don't know why Qwest didn't begin  
 23 charging for design changes for loops?  
 24 A. I believe I just said I don't have any idea why  
 25 we didn't charge the design change for loop in CFA, but we

Page 145

1 did have an approved rate for those.  
 2 Q. Now, you have also testified that you believe  
 3 it's not necessary to develop separate charges for various  
 4 types of design changes; correct?  
 5 A. That's correct.  
 6 Q. And so what you're saying is it's okay to have an  
 7 average for loop transport and CFAs?  
 8 A. That's my belief. If we tried to have separate  
 9 rate elements for every single different nuance of every  
 10 single different thing that we provide the CLECs in terms  
 11 of provisioning, that hundreds of rates would expand to  
 12 probably more than a thousand rates.  
 13 So there are -- I'm sorry. There are averages  
 14 that are necessarily, then, a part of our provisioning  
 15 charges.  
 16 Q. Qwest has five different loop installation  
 17 options; correct?  
 18 A. That's correct.  
 19 Q. Each of those options has a separate rate?  
 20 A. Yes. That's correct.  
 21 Q. You don't have an average rate for all of your  
 22 installation options?  
 23 A. That's true.  
 24 Q. Qwest has still another installation rate for  
 25 UDIT; correct?

Page 146

1 A. Yes. That's correct.  
 2 ARBITRATOR RODDA: I'm sorry, what was that?  
 3 MR. MERZ: UDIT. Unbundled dedicated interoffice  
 4 transport.  
 5 ARBITRATOR RODDA: Thank you.  
 6 THE WITNESS: I've said there are several hundred  
 7 nonrecurring rates that we provide.  
 8 Q. (BY MR. MERZ) In your surrebuttal at Page 20,  
 9 Lines 1 through 4 -- actually, that's not the right place.  
 10 I'm sorry. I'm looking at your rebuttal, not your  
 11 surrebuttal. Page 20.  
 12 A. Give me just a moment to find that.  
 13 Q. Sure.  
 14 A. I have that.  
 15 Q. You say there beginning at Line 1: Nor would it  
 16 be appropriate to micromanage Qwest's product offerings by  
 17 requiring it to provide costs and processes to address  
 18 every possible "flavor" of provisioning activity in an  
 19 increasingly competitive environment.  
 20 Do you see that?  
 21 A. That's correct.  
 22 Q. Now, for unbundled loops and unbundled transport,  
 23 there is not competition; correct?  
 24 A. I wouldn't agree with you. We have the TRRO  
 25 proceedings that are determining right now that for some

Page 147

1 unbundled loops and some unbundled transport there's a  
 2 great deal of competition.  
 3 Q. For loops and transports for which Qwest is  
 4 required to provide those elements on an unbundled basis,  
 5 the FCC has made a determination that there's not  
 6 competition; correct?  
 7 A. That's correct.  
 8 Q. And that's the reason why Qwest is required to  
 9 provide unbundled loops and transport at cost-based rates;  
 10 correct?  
 11 A. That's correct.  
 12 Q. I want to talk with you now about collocation  
 13 availability inventory, which is issues 8-20 and 8-20(a).  
 14 A. Okay.  
 15 Q. And the issue here is whether Qwest should have  
 16 to pay a quote preparation -- I'm sorry. Whether Eschelon  
 17 should have to pay a quote preparation fee when it  
 18 requests a collocation available inventory site. Are you  
 19 familiar with that issue?  
 20 A. Yes.  
 21 Q. And just to get the terminology straight, a  
 22 collocation available inventory site is a site that's been  
 23 returned by a CLEC to Qwest, and it is then posted on  
 24 Qwest's website and is available for another CLEC to  
 25 purchase; correct?

Page 148

1 A. Yes. That's correct.  
 2 Q. Now, in those instances when Qwest gets back a  
 3 collocation site, a quote preparation fee has already been  
 4 paid in connection with the site at the time it was quoted  
 5 to the first CLEC; is that right?  
 6 A. For the collocation effort that that CLEC would  
 7 like to have Qwest undertake, yes.  
 8 Q. And it's Eschelon's position that Qwest has  
 9 already been paid, and so Qwest shouldn't be allowed to  
 10 recover another fee; is that right?  
 11 A. Well, that's Eschelon's position. Qwest's  
 12 position is that now a new CLEC is coming in, and it may  
 13 or may not have the same needs or different needs. And so  
 14 Qwest needs to manage the new collocation project and find  
 15 out what that CLEC needs and do the engineering and the  
 16 processing that are entailed in getting that CLEC into  
 17 that collocation space.  
 18 Q. At Page 19 of your surrebuttal, Lines 15 through  
 19 20, you describe a number of activities associated with  
 20 the QPF.  
 21 A. Could you tell me what lines you're talking about  
 22 again?  
 23 Q. I can. It's Page 19 of your surrebuttal,  
 24 beginning at Line 15 and following through the end of  
 25 Line 20.

Page 149

1 A. Yes. I have that.  
 2 Q. Okay. And my question is, those activities there  
 3 are activities that you say are associated with the QPF  
 4 for available inventory; correct?  
 5 A. Yes. That's correct. In this instance, you have  
 6 a new order coming in from the CLEC that's going to take  
 7 over the available inventory. And there is project  
 8 management and verification and inventory of the reusable  
 9 elements and so forth, a new design that may need to take  
 10 place as a part of provisioning that collocation site for  
 11 the new CLEC.  
 12 Q. The purpose of all of the activities that are  
 13 described there in your testimony is to verify space and  
 14 to develop a quote; isn't that right?  
 15 A. Well, there are a number of steps that I have  
 16 laid out here that are a part of that process.  
 17 Q. Those are the steps, but the purpose overall is  
 18 to verify space and to develop a quote; isn't that right?  
 19 A. Well, it's -- no. It also includes the project  
 20 management of bringing the new collocator into the space,  
 21 and all of that goes along with processing the order. And  
 22 I mean, it's the same -- it's not just developing a quote  
 23 and checking on the site. It's also the order processing  
 24 and everything that goes along with bringing a new  
 25 collocator into that space.

Page 162

1 charge, it's Qwest's position that that is an approved  
2 rate from the Commission?  
3 A. Oh, absolutely.  
4 Q. And in your testimony on Page 19, you give the  
5 specific cost study that supports Qwest's position?  
6 A. Yes, I do.  
7 Q. And in your testimony you describe some aspects  
8 of that cost study and the resulting rate that would lead  
9 one to conclude that that rate encompasses the issue we're  
10 dealing with here?  
11 A. Yes.  
12 Q. And you filed this testimony on February 9th of  
13 2007?  
14 A. Yes, I did.  
15 Q. Were you ever asked to provide this study to  
16 Eschelon between February 9th and now?  
17 A. No.  
18 Q. Were you ever advised -- well, no further  
19 questions on that.  
20 Changing to the collocation available issue,  
21 which is 8-20 and 8-20(a), you were asked a few questions  
22 about, you know, the relationship between a quote  
23 preparation fee for a new site as well as a quote  
24 preparation fee for an already existing site.  
25 Are there examples where there could be more work

Page 163

1 in a used site versus a new site?  
2 A. Well, as I explained to Mr. Merz, I'm certainly  
3 not an engineer and so I'm not involved in those, but I  
4 would certainly imagine that there are circumstances where  
5 there's more work involved. I know that there are changes  
6 that are made to the site: Old equipment that's taken  
7 out, new equipment that's needed, power that's different.  
8 But I don't know the specifics of any of that. But I  
9 would certainly think that there are circumstances where  
10 it could actually be more work to identify in an available  
11 inventory than in a new.  
12 MR. TOPP: Okay. No further questions.  
13 ARBITRATOR RODDA: Okay. Did you have anything  
14 further, Mr. Merz?  
15 MR. MERZ: Maybe just a couple.  
16  
17 **RE-CROSS-EXAMINATION**  
18  
19 Q. (BY MR. MERZ) You were aware, Ms. Million, when  
20 you filed your testimony in this case that there was an  
21 issue regarding design changes for loops and CFA changes;  
22 right?  
23 A. Yes. I was aware of that.  
24 Q. And you were aware that it was Eschelon's  
25 position that the rate that the Arizona Commission had

Page 164

1 approved did not cover loops and design changes?  
2 A. Yes. And that's why I filed the testimony that I  
3 did explaining that it was clearly laid out in what we  
4 filed in the cost docket, that it was, in fact,  
5 anticipated.  
6 Q. And because I misspoke, I actually have to ask  
7 the question again.  
8 You were aware that it was Eschelon's position  
9 that loops and CFA changes were not covered by the design  
10 change rate that had been previously approved by the  
11 Arizona Commission?  
12 A. Yes, that was Eschelon's position. And my  
13 position is that it is covered, and that's what my  
14 testimony says.  
15 MR. MERZ: Okay. Nothing further.  
16 ARBITRATOR RODDA: Okay. That's --  
17 MR. TOPP: Nothing further.  
18 ARBITRATOR RODDA: Okay. Just so you get the  
19 last shot at it, so you can beat that horse. All right.  
20 Thank you, Ms. Million.  
21 MR. TOPP: Your Honor, our next witness would be  
22 Karen Stewart. But as we talked at the beginning of the  
23 day, if we could start with her tomorrow morning, that  
24 would be ideal.  
25 ARBITRATOR RODDA: Okay. And that's your last

Page 165

1 witness; right?  
2 MR. TOPP: Yes.  
3 ARBITRATOR RODDA: So Mr. Merz, do you want  
4 to -- it's 4:00. I mean, we could stop for the day.  
5 MR. MERZ: I think that makes more sense.  
6 Mr. Starkey is our first witness, and he'll be here  
7 tomorrow to begin whenever we're done with Ms. Stewart. I  
8 mean, I think that we're going to be fine on time, so I  
9 don't think that would be a problem.  
10 ARBITRATOR RODDA: I am impressed with the time.  
11 I have to say, I was worried coming in, but you all have  
12 surprised me.  
13 All right. So we'll break for the day and pick  
14 up tomorrow with Ms. Stewart; right?  
15 MR. MERZ: This doesn't necessarily have to be on  
16 the record, or it could be, but I only shipped two copies  
17 of our witness testimony from Minnesota. They end up  
18 being two pretty big boxes. So I had one for the witness  
19 and one for me. I didn't necessarily anticipate that you  
20 would need another one.  
21 ARBITRATOR RODDA: I don't need one. So the  
22 witness one can be the one that we mark for the court  
23 reporter.  
24 MR. MERZ: Yeah. That's what I had in mind. I  
25 just wanted to make sure that you got what you needed.

Page 177

1 have some type of copper T1 where a single loop is  
 2 channelized up to 24 channels. Again, we would need to  
 3 MUX down and turn off a single channel to an end user  
 4 customer.  
 5 Once again, now, to the extent that the OC3 are  
 6 no longer unbundled loops, when they were and multiplexing  
 7 was required, you have got that -- you have got the remote  
 8 terminal here, and so the end user customer isn't using  
 9 this full capacity. The end user customer is just using  
 10 one single loop. So at the RT we're basically deMUXing  
 11 down to give them one loop. It's then going across high  
 12 frequency bandwidth to a multiplexer which then is  
 13 demultiplexing down to provide an unbundled loop or  
 14 equivalent. Eventually, then, we would provide that  
 15 unbundled loop into the CLEC's collocation.  
 16 So this, again, is just describing that  
 17 multiplexing function that when we MUX up to go high  
 18 capacity in the loop, we need to MUX back down and hand  
 19 off to the CLEC exactly what they ordered. And they can  
 20 order a variety of loops, DS1, DSO, two-wire, four-wire,  
 21 whatever. We need to take all of the steps necessary on  
 22 this side to hand that loop off to them.  
 23 The multiplexing that's involved with the  
 24 loop-MUX combination is multiplexing that is beyond the  
 25 MDF. And this is a multiplexing that would typically be

Page 178

1 seen as a transport multiplexer. So in this case, all of  
 2 the unbundled loops have totally been completed,  
 3 delivered, and handed off as a complete channelized loop.  
 4 The loops are then connected to the MUX, which then at  
 5 that point connect the MUX into the CLEC collocation.  
 6 So in this example, transport is not part of the  
 7 service offering or what we think of as traditional  
 8 transport. It's just the multiplexer. However, the  
 9 multiplexer as recognized in the Virginia arbitration, and  
 10 is not on any list as an unbundled network element with  
 11 the FCC, is that we are not required to provide a  
 12 stand-alone multiplexer as a UNE. So we have no  
 13 obligation to do this stand-alone multiplexer as a UNE.  
 14 And I think that's pretty clear that this is not an  
 15 unbundled network element when it's stand-alone with no  
 16 transport.  
 17 Because this is not a UNE, just because a UNE  
 18 loop is terminating into it, it does not make a UNE  
 19 combination. To have a UNE combination you have to put  
 20 two UNEs together, and in this case there's only one UNE.  
 21 So we believe it's very clear that an order for  
 22 stand-alone multiplexing would have to come out of Qwest's  
 23 access or private line tariff.  
 24 Therefore, the multiplexer is out of the access  
 25 private line tariff, and this is a UNE. When you put

Page 179

1 those two types of facilities together, that's a  
 2 commingled arrangement, and, therefore, it does not belong  
 3 in the UNE section of the ICA, Section 9. It belongs in  
 4 Section 24, the commingled section, that in negotiations  
 5 with Eschelon we agreed to include in the ICA.  
 6 Q. (BY MR. DEVANEY) Does that conclude your  
 7 summary, Ms. Stewart?  
 8 A. Yes, it does.  
 9 MR. DEVANEY: Your Honor, Ms. Stewart is  
 10 available for cross.  
 11 ARBITRATOR RODDA: Mr. Merz.  
 12 MR. MERZ: Thank you, Your Honor.  
 13  
 14 **CROSS-EXAMINATION**  
 15  
 16 Q. (BY MR. MERZ) Good morning, Ms. Stewart.  
 17 A. Good morning.  
 18 Q. I'm going to start this morning talking with you  
 19 a little bit about design changes, which is issue 4-5.  
 20 And I would refer you to your surrebuttal testimony  
 21 beginning at Page 4, Lines 21 through 22.  
 22 Do you have it there?  
 23 A. Yes, I do.  
 24 Q. You say there Eschelon should not be permitted to  
 25 obtain the benefits of design changes without paying for

Page 180

1 them, which is what Mr. Denney is effectively seeking  
 2 through his testimony. Do you see that?  
 3 A. Yes, I do.  
 4 Q. Now, you understand that Eschelon has proposed in  
 5 this case interim rates for design changes for loops and  
 6 for CFA changes; correct?  
 7 A. Yes. They have offered rates that are  
 8 substantially lower than the rates that have already been  
 9 approved in the Arizona cost docket.  
 10 Q. And Qwest believes that the rates that Eschelon  
 11 has proposed for design changes for loops and CFA changes  
 12 is too low?  
 13 A. Would not cover Qwest's costs. Correct.  
 14 Q. It's not the case, then, that Eschelon is asking  
 15 for design changes without paying for them, is it?  
 16 A. Qwest believes that the proposed rates that  
 17 Eschelon has put out -- and, again, we have existing  
 18 approved rates as Ms. Million has discussed in her  
 19 testimony -- that it would be inappropriate and Qwest  
 20 would not be recovering its costs for design changes.  
 21 Q. And my question is a different one. My question  
 22 is you understand that Eschelon is not proposing in this  
 23 case that Qwest provide it with design changes for loops  
 24 and CFA changes without charge. That's not Eschelon's  
 25 proposal in this case, is it?

Page 181

1 A. It is Eschelon's proposal that they would have  
2 the below cost rate of \$5 and \$30.  
3 Q. Now, you say -- again looking at your surrebuttal  
4 testimony at Page 6, Lines 3 through 4. Do you have that  
5 there?  
6 A. Yes, I do.  
7 Q. You say that any denial of cost recovery even for  
8 a limited period is unlawful and improper; correct?  
9 A. Yes.  
10 Q. And that is your view?  
11 A. Yes.  
12 Q. Would you also agree that to require Eschelon to  
13 pay a rate that exceeds Qwest's TELRIC costs even for a  
14 limited period of time is unlawful and improper?  
15 A. Qwest is not asking that Eschelon pay costs that  
16 exceed the TELRIC rate. A TELRIC rate for design changes  
17 has been established in an Arizona cost docket, as  
18 Ms. Million has testified. Therefore, that would not be  
19 the situation in design changes.  
20 Q. And Ms. Stewart, I really need you to focus on my  
21 questions. And I know that Mr. Devaney will have an  
22 opportunity to ask you questions.  
23 My question is would you agree with me that to  
24 require Eschelon to pay a rate that exceeds Qwest's TELRIC  
25 costs even for a limited period of time would be unlawful

Page 182

1 and improper? Would you agree with that statement?  
2 A. I do not believe so in Arizona where my  
3 understanding is that when there is -- if there was a rate  
4 dispute, which, arguably, we don't agree that there is one  
5 here -- that in Arizona that if there is a rate that  
6 there's some question or concern or an interim rate, that  
7 the rate is to be the Qwest rate and not to exceed the  
8 Qwest rate, and then that rate is interim subject to  
9 refund.  
10 So in Arizona, potentially it would be  
11 appropriate to have a rate that subsequently a lower rate  
12 would be established and a refund would be given back to  
13 the CLEC. So I do not believe it would be improper.  
14 Q. Okay. So as I understand your testimony, it  
15 would be improper for Qwest to be paid less than its costs  
16 for even a limited period of time, but it would be proper  
17 for Qwest to be paid for more than its costs?  
18 A. Well, you're putting a big assumption in there  
19 that the rate exceeds the TELRIC cost of doing the work.  
20 Q. And that's my assumption. My question is just  
21 would you agree with me that it's not proper for Qwest to  
22 be paid more than its TELRIC costs for doing the work?  
23 A. I think it's appropriate in Arizona, as I just  
24 discussed, that the Qwest rates be used to establish a  
25 rate subject to refund.

Page 183

1 Q. And you would agree with me as well that an  
2 interim rate might possibly remain in effect for an  
3 indefinite period of time?  
4 A. There's always that potential, yes.  
5 Q. And, in fact, that's a potential that you  
6 describe in your own testimony; isn't that right?  
7 A. Yes.  
8 Q. But you believe that even for an unlimited period  
9 of time it would be appropriate for Eschelon to pay a rate  
10 that exceeds TELRIC costs for design changes?  
11 A. I do not believe that the rate that Qwest is  
12 proposing for design changes exceeds the TELRIC cost.  
13 Q. But if it does, it would not be appropriate for  
14 Eschelon to have to pay that rate for an unlimited period  
15 of time?  
16 A. At this point in time, there is an approved rate  
17 for design changes of, I believe, approximately \$72.79.  
18 It is appropriate for Eschelon to pay that rate.  
19 Q. And that's true even if that rate exceeds Qwest's  
20 costs in your opinion?  
21 MR. DEVANEY: Your Honor, I think it's been asked  
22 and answered.  
23 ARBITRATOR RODDA: You can answer it. Did you  
24 answer it? I didn't hear it.  
25 THE WITNESS: I answered that I do not believe

Page 184

1 that the rate that Qwest is charging for design changes  
2 for unbundled loops and CFA changes exceeds our TELRIC  
3 costs because it's already been established in a cost  
4 docket.  
5 ARBITRATOR RODDA: I understood that. But then  
6 he asked -- I can't even remember what the question was.  
7 It wasn't quite that question.  
8 Q. (BY MR. MERZ) No. My question is it's  
9 Eschelon's position that that rate is not a cost-based  
10 rate for design changes for loops and CFA changes. You're  
11 aware of that?  
12 A. Yes.  
13 Q. Assuming that Eschelon is right and that that \$72  
14 rate is not a cost-based rate but is, in fact, well in  
15 excess of Qwest's cost for loop design changes and CFA  
16 changes, would you agree with me that it's not proper for  
17 Eschelon to have to pay that rate that is above Qwest's  
18 cost?  
19 A. When the Commission has established an order rate  
20 of the \$72.79, even if subsequent cost work should  
21 determine that the rate should be something different,  
22 it's appropriate for you to pay the rate that's been  
23 approved in a cost docket in this state.  
24 Q. Go to your rebuttal testimony. And I'm going to  
25 shift gears a little bit, and we're going to talk about

Page 185

1 connecting facility assignment changes, CFA changes. So  
 2 if you go to your rebuttal testimony at Page 4, and I'm  
 3 looking at the sentence that begins on Line 15 and ends on  
 4 Line 19.  
 5 A. Yes.  
 6 Q. And it says there in some cases the ICDF  
 7 locations that Eschelon gives Qwest are incorrect, which  
 8 require a Qwest technician to remove the loop from one  
 9 location on the ICDF and reconnect the loop to another  
 10 location on the ICDF or to another frame in the central  
 11 office; correct?  
 12 A. Yes.  
 13 Q. And you're describing there what a CFA change is;  
 14 correct?  
 15 A. It's one part of the work involved with the CFA  
 16 change. Correct.  
 17 Q. And the ICDF is the place where the loop is  
 18 connected. The connecting facility assignment is on the  
 19 ICDF; is that right?  
 20 A. That's my understanding, yes.  
 21 Q. Now, you understand that the CFA change charge  
 22 that Eschelon has proposed would only apply when there's a  
 23 coordinated cutover; correct?  
 24 A. Yes.  
 25 Q. And Eschelon pays a rate, a particular rate for a

Page 186

1 coordinated cutover; correct?  
 2 A. Yes.  
 3 Q. What Eschelon is paying for when it pays that  
 4 rate for a coordinated cutover is it's paying to have  
 5 Qwest working in a coordinated fashion with Eschelon  
 6 personnel, either physically present or on the phone at  
 7 the time of the loop installation; isn't that right?  
 8 A. Yes.  
 9 Q. So Eschelon is present, and the idea is that  
 10 working together the parties can fix any problems that  
 11 arise rather than, you know, the installation is done and  
 12 then it turns out that there's some problem that has to be  
 13 fixed later; is that right?  
 14 A. My understanding is that the goal of a  
 15 coordinated cut would be both parties would be there, you  
 16 would be able to test, and then right at that point in  
 17 time it would be known whether the circuit was working or  
 18 not, yes.  
 19 Q. And what might happen if you didn't have a  
 20 coordinated cutover is that in the case of a basic  
 21 installation, for example, the cutover might happen and  
 22 then it turns out that there's no dial tone, and that's  
 23 not discovered until some later point and it has to be  
 24 addressed then; correct?  
 25 A. In a noncoordinated cut, then there's a due date.

Page 187

1 And typically my understanding is then the due date would  
 2 be any time within that business day. For example, if  
 3 Qwest could cut it over at 8:00 in the morning, or Qwest  
 4 could turn it over or turn it up at 5:00 p.m. So in a  
 5 noncoordinated cut it's a large window of time in which  
 6 the cutover may occur.  
 7 MR. MERZ: Could you mark this as Eschelon  
 8 Exhibit 3.  
 9 Q. (BY MR. MERZ) Ms. Stewart, you have in front of  
 10 you there what has been marked as Eschelon Exhibit 3; is  
 11 that right?  
 12 ARBITRATOR RODDA: Do you have an extra copy?  
 13 MR. MERZ: I do. I'm sorry. I have all of these  
 14 copies and I forgot to hand you one.  
 15 ARBITRATOR RODDA: I know. It's so hard to get  
 16 over here, too.  
 17 Q. (BY MR. MERZ) You have Eschelon Exhibit 3 there?  
 18 A. Yes, I do.  
 19 Q. And you recognize Eschelon Exhibit 3 as Exhibit A  
 20 to the proposed ICA; correct?  
 21 A. Yes.  
 22 MR. MERZ: Eschelon offers Eschelon Exhibit 3.  
 23 ARBITRATOR RODDA: Any objection?  
 24 MR. DEVANEY: No objection.  
 25 ARBITRATOR RODDA: Then Eschelon-3 is admitted.

Page 188

1 (Exhibit No. Eschelon-3 was received into  
 2 evidence.)  
 3 Q. (BY MR. MERZ) Now, Exhibit A to the ICA sets out  
 4 the various rates; correct?  
 5 A. Yes.  
 6 Q. If you would look at the part of Exhibit A that  
 7 starts at 9.2.4.  
 8 A. Yes.  
 9 Q. And 9.2.4, 9.2.5, and 9.2.6 all involve different  
 10 installation options for different types of loops;  
 11 correct?  
 12 A. Yes.  
 13 Q. Now I would like you to look at 9.2.4.4.1. That  
 14 is the coordinated installation rate for an analog loop;  
 15 correct?  
 16 A. I'm sorry. 9.2.4.1?  
 17 Q. 9.2.4.4.1.  
 18 A. Excuse me. I see it.  
 19 Q. Okay. And so if you had one analog loop being  
 20 installed with the coordinated installation option, the  
 21 rate would be \$58.18; correct?  
 22 A. Yes.  
 23 Q. And additional loops installed as part of the  
 24 same installation would be then \$50.73 per loop; correct?  
 25 A. Yes.

Page 189

1 Q. Now, the design change rate that Qwest believes  
2 it ought to be able to charge for a CFA change is \$72.79;  
3 is that correct?  
4 A. Yes.  
5 Q. And so it's your testimony that the additional  
6 work to perform a CFA change charge costs Qwest more than  
7 it costs to perform the coordinated installation of a  
8 basic loop; is that right?  
9 A. The charge for design change covers several  
10 products, both UDIT and different --  
11 Q. Are you able to answer my question, ma'am?  
12 A. Yes. I am able to answer your question.  
13 Q. Do you have my question in mind?  
14 A. Yes. I have your question in mind.  
15 Q. All right.  
16 A. Your question was does the rate exceed the  
17 installation rate for loops. I was just pointing out that  
18 there are a variety of loops that have different  
19 installation intervals, and the design change covers  
20 those, plus UDIT and other products and services. And,  
21 again, Ms. Million is the expert on the cost aspect.  
22 Q. And my question wasn't whether the rate for  
23 design changes is higher than the rate for coordinated  
24 installation. My question is, is it your testimony that  
25 the additional work to perform a CFA change costs Qwest

Page 190

1 more than it costs Qwest to perform the coordinated  
2 installation of an analog loop?  
3 A. Once again, Ms. Million is the cost expert. And  
4 yes, when it was looked at as an entirety of all of the  
5 services that are covered with design changes, the rate  
6 was \$72.79, I believe.  
7 Q. So it's your testimony that it does cost more to  
8 do a CFA change than a coordinated installation of a basic  
9 -- a coordinated installation of an analog loop?  
10 A. That \$72.79 was what was determined in the cost  
11 docket, yes.  
12 Q. Now I want to ask you about your rebuttal,  
13 Page 7. I'm looking at Lines 8 through 10. And you say  
14 there there's no factual basis for Mr. Denney's assertion  
15 that the presence of a Qwest technician during a  
16 coordinated cutover reduces the costs of CFA changes.  
17 Do you see that?  
18 A. Yes, I do.  
19 Q. Now, what I understood a part of the work to  
20 perform a CFA change is taking the loop off of one CFA and  
21 putting it on another.  
22 A. I'm going to be stepping a little bit out here on  
23 a limb because, once again, Ms. Million is our cost  
24 expert. But my understanding is design change does not  
25 include the installation work of a technician actually

Page 191

1 doing the install piece.  
2 The work of a design change is the call that  
3 needs to be made back to the system design center to say  
4 there's going to be a change. If we go to this different  
5 location for the CFA, is that going to change the design  
6 of the circuit? Is it going to work? Oh, by the way, we  
7 need to update our downstream systems for purposes of  
8 repair and billing that there is a different tie-down  
9 location.  
10 So design change is really covering all of those  
11 work and activities, not the actual technician time of  
12 doing the install.  
13 Q. When we first started talking this morning, I had  
14 asked you whether the work of doing a design change  
15 involved a technician removing the loop from one location  
16 on the ICDF and reconnecting it to another location. And  
17 I understood you to be saying, yes, indeed, that was part  
18 of the work, at least, involved in a CFA change.  
19 Did I get that wrong?  
20 A. I may have misunderstood your question, and if I  
21 do I apologize. I was thinking you were asking whether  
22 doing a CFA change, which is the activity piece of it, is  
23 moving or putting it on a different termination, is that  
24 part of design changes? So I do apologize if I  
25 misunderstood your question.

Page 192

1 Q. And so I guess my point is that any time there's  
2 a CFA change there has to be a technician physically  
3 located at the ICDF; right?  
4 A. Yes. If you're going to do a change on an  
5 install, there would be a technician there.  
6 Q. So when you say there's no factual basis for  
7 Mr. Denney's assertion that the presence of a Qwest  
8 technician during a coordinated cutover reduces the cost  
9 of a CFA change, there's always a Qwest technician there  
10 if a CFA change is being done; isn't that right?  
11 A. Yes. But even if the technician is there, the  
12 technician still needs to go through all of the steps that  
13 I just described about going back to the design center,  
14 making sure that it's okay, it doesn't change the design,  
15 or something doesn't need to be done within the circuit,  
16 and then changing all the downstream systems.  
17 So whether the technician is there and an  
18 Eschelon technician is there or not, it doesn't change how  
19 much work is involved for the Qwest technician in  
20 confirming whether there needs to be any change to the  
21 design and, again, updating our downstream systems.  
22 Q. The charge that Eschelon is proposing for CFA  
23 changes is a charge that would be paid in addition to the  
24 coordinated installation charge; correct?  
25 A. Yes.

Page 193	Page 195
<p>1 Q. The coordinated installation charge pays for the</p> <p>2 Qwest technician to be there; correct?</p> <p>3 A. It pays for the Qwest technician to be there and</p> <p>4 to install the service as ordered.</p> <p>5 Q. And it also pays for the Qwest technician to</p> <p>6 interface with Eschelon either, you know, physically</p> <p>7 present or on the phone; correct?</p> <p>8 A. Yes.</p> <p>9 Q. And the Qwest technician, I assume the</p> <p>10 interfacing with the downstream systems that you have</p> <p>11 talked about, that's something that the technician would</p> <p>12 do by way of a phone call; is that right?</p> <p>13 A. Typically, my understanding is that it begins</p> <p>14 with a phone call if it occurs at the time of the cutover.</p> <p>15 Q. Now, would you agree with me that the tasks to</p> <p>16 complete a CFA change are different from the tasks</p> <p>17 necessary to perform a loop design change?</p> <p>18 A. There are different tasks involved, but perhaps a</p> <p>19 CFA change could lead to a complete redesign of the loop.</p> <p>20 And I'm thinking more on the higher bandwidth facilities</p> <p>21 such as a DS1 or DS3. Maybe a change means a redesign or</p> <p>22 sending the equipment to a different multiplexer or</p> <p>23 distribution fiber panel within the office.</p> <p>24 Q. Your understanding -- you understand, don't you,</p> <p>25 that Eschelon's proposal with respect to CFA change</p>	<p>1 A. Yes.</p> <p>2 Q. And you see there Eschelon's proposal for Section</p> <p>3 9.2.3.9?</p> <p>4 A. Yes, I do.</p> <p>5 Q. And you see that that talks specifically about</p> <p>6 CFA changes for coordinated installation options for</p> <p>7 two-wire and four-wire analog loops; correct?</p> <p>8 A. Yes, it does.</p> <p>9 Q. CFA changes are something that Qwest has been</p> <p>10 providing to CLECs for as long as Qwest has been providing</p> <p>11 unbundled loops; isn't that right?</p> <p>12 A. I believe so.</p> <p>13 Q. Qwest didn't begin charging for CFA changes until</p> <p>14 October of 2004; correct? I'm sorry. October of 2005.</p> <p>15 A. That is my understanding, yes.</p> <p>16 Q. And so up until October of 2005, there was no</p> <p>17 separate charge for a CFA change; correct?</p> <p>18 A. I believe there was a separate charge, but the</p> <p>19 processes were not in place to charge the charge.</p> <p>20 Q. Qwest didn't charge a separate charge for CFA</p> <p>21 changes before October of 2005?</p> <p>22 A. There was a design change in place in Exhibit A,</p> <p>23 but the processes were not in place to charge it for that</p> <p>24 activity.</p> <p>25 Q. I want to talk with you now about access to UNEs.</p>
Page 194	Page 196
<p>1 charges only is for two- and four-wire loops?</p> <p>2 A. I did not -- was not aware of that. I thought it</p> <p>3 was listed in Exhibit A as a CFA change for all loops.</p> <p>4 Q. And, I mean, if that's the case -- well, assume</p> <p>5 that that's the case. Would you then agree with me that a</p> <p>6 CFA change would be different -- relating to a two- or</p> <p>7 four-wire loop would be different than the tasks necessary</p> <p>8 to do a loop design change?</p> <p>9 A. There are various tasks depending on the</p> <p>10 products. Once again, the design change is covering a</p> <p>11 variety of products, including high capacity loops and</p> <p>12 two-wire and four-wire loops. Yes, the work is different</p> <p>13 depending on exactly what service, but again, as</p> <p>14 Ms. Million discussed, the design change covers all of</p> <p>15 these various products and work.</p> <p>16 Q. I think you have the ICA in front of you there?</p> <p>17 A. Yes, I do.</p> <p>18 Q. If you would go to Section 9.2.3.9.</p> <p>19 A. I'm sorry.</p> <p>20 ARBITRATOR RODDA: Again, do you have a page</p> <p>21 number?</p> <p>22 MR. MERZ: I do. It's Page 234, Section 9.2.3.9.</p> <p>23 Q. (BY MR. MERZ) And I'm looking at the state</p> <p>24 specific language for Arizona, Colorado, Oregon, Utah, and</p> <p>25 Washington.</p>	<p>1 And I'm looking at your surrebuttal testimony beginning at</p> <p>2 Page 16, Lines 18 through 23.</p> <p>3 A. I know 23 was the last line. What was the first?</p> <p>4 Q. You know, I think it's actually your rebuttal</p> <p>5 testimony. I better -- yeah. I'm sorry. I misspoke.</p> <p>6 I'm talking about your rebuttal testimony at Page 16,</p> <p>7 Lines 1 through 23.</p> <p>8 A. Yes.</p> <p>9 Q. Do you have that there?</p> <p>10 A. Yes, I do.</p> <p>11 Q. What you have set out here are Eschelon's</p> <p>12 proposal and Qwest's proposal with respect to Section</p> <p>13 9.1.2, which concerns access to UNEs, issue 9-31; is that</p> <p>14 right?</p> <p>15 A. Yes.</p> <p>16 Q. And just to make sure we understand what you have</p> <p>17 written here, it's Qwest's proposal that this section</p> <p>18 should read, "Additional activities available for</p> <p>19 unbundled network elements includes moving, adding to,</p> <p>20 repairing and changing the UNE," and then through the end;</p> <p>21 correct?</p> <p>22 A. Yes.</p> <p>23 Q. And then it also includes the phrase at the very</p> <p>24 end there, "at the applicable rate." Correct?</p> <p>25 A. Yes.</p>

Page 197

1 Q. Eschelon's proposal is that rather than  
2 additional activities available for unbundled network  
3 elements that the section should read, "access to  
4 unbundled network elements." Correct?  
5 A. Yes.  
6 Q. And then Eschelon doesn't add the last phrase "at  
7 the applicable rate" in its proposal; correct?  
8 A. Yes.  
9 Q. Now, you have in your testimony here underlined  
10 the phrase "moving, adding to, repairing and." Correct?  
11 A. Yes.  
12 Q. That language actually is not in dispute between  
13 the parties; correct?  
14 A. No. It is not.  
15 Q. Now, in your rebuttal at Page 15, Lines 7 through  
16 9, you say that Eschelon's language implies that access to  
17 or use of UNEs entitles it to moves, adds, and changes at  
18 no additional charge; is that right?  
19 A. Yes.  
20 Q. And then you also say that result would violate  
21 Qwest's right of cost recovery; correct?  
22 A. Correct.  
23 Q. Now, the right of cost recovery you're referring  
24 to there is the right that is provided under  
25 Section 252(d) of the Telecommunications Act; is that

Page 198

1 right?  
2 A. Yes.  
3 Q. So that the right of cost recovery you're  
4 referring to is the right for Qwest to recover its TELRIC  
5 costs for these activities, moving, adding to, repairing  
6 and changing the UNE; correct?  
7 A. It's whatever the appropriate rate is to recover  
8 the cost depending on the actual activity that is  
9 requested.  
10 Q. And if that's an activity that's governed by  
11 Section 252(d,) that would be a TELRIC rate; correct?  
12 A. If that activity is covered by that. But if the  
13 activity is covered by a different requirement, then  
14 whatever costs are appropriate in that scenario is the  
15 cost that would be recovered.  
16 Q. And I understood you to be saying that the right  
17 of cost recovery that you're referring to is the right  
18 that arises under Section 252(d) of the Act. Is that not  
19 correct?  
20 MR. DEVANEY: Your Honor, I think that  
21 misconstrues the testimony. She said that 252 can apply  
22 depending on the activity, but there's another -- but  
23 there's a different activity that might be outside of 252.  
24 So I object to the characterization of the testimony.  
25 ARBITRATOR RODDA: Okay. Could you either

Page 199

1 restate your question or have it read back?  
2 MR. MERZ: Sure.  
3 Q. (BY MR. MERZ) What I understood you to be  
4 telling me when we first started this line of questioning,  
5 that the right of cost recovery that you're referring to  
6 in your rebuttal testimony at Page 15, Line 9 is a right  
7 that arises under Section 252(d) of the Telecommunications  
8 Act.  
9 A. That is one of the areas. So, for example, in  
10 your scenario here, you have adding to a UNE. If you were  
11 saying that you wanted to add an additional identical UNE  
12 and put in a second UNE install, then yes, that's what  
13 would be covered.  
14 However, one of our concerns is this was so  
15 open-ended, and particularly the e.g., meaning that this  
16 is an example, not the definitive list, that what if what  
17 you asked for is we add to the UNE a private line? In  
18 that commingled arrangement, the private line rates would  
19 apply. Therefore, the applicable rate would be a private  
20 line rate.  
21 Q. The e.g. here that we have is also agreed upon  
22 language; correct?  
23 A. It is agreed upon language with the addition of  
24 "at applicable rates" as Qwest has proposed.  
25 Q. I mean, is it what -- is Qwest's goal here with

Page 200

1 this language, additional activities available for UNEs,  
2 to hold open the option to charge tariffed rates for  
3 moving, adding to, repairing and changing UNEs?  
4 A. In the example I just gave, it was a tariff rate,  
5 yes.  
6 Q. In your surrebuttal Page 14, and I'm looking at  
7 Lines 11 through 14 where you say "nor does he," and  
8 you're referring there to Mr. Denney; is that correct?  
9 I'm sorry. Mr. Starkey; is that correct?  
10 A. It appears to be Mr. Starkey, yes.  
11 Q. Nor does he show Eschelon's language would permit  
12 Qwest to charge TELRIC rates for these activities separate  
13 and apart from the monthly recurring rate for UNEs;  
14 correct?  
15 A. Yes.  
16 Q. Now, you agree with me that in order for Qwest to  
17 charge a separate rate, Qwest has to prove that the cost  
18 to perform that activity is not already recovered in  
19 another rate; correct?  
20 A. Generally, I think that's a true statement.  
21 Q. I want to shift gears now and talk about network  
22 modernization and maintenance, which is issues 9-33, 9-33a  
23 and 9-34. And I want to focus first on issue 9-33, and  
24 you understand that that issue involves modernizations  
25 that Qwest makes to its network that may result in minor

Page 201

1 changes to transmission parameters; correct?  
 2 A. Yes.  
 3 Q. And Eschelon has proposed language that would  
 4 apply if a modification has an adverse impact on service  
 5 to one of Eschelon's customers; correct?  
 6 A. Yes.  
 7 Q. And it's Qwest's position that so long as the  
 8 transmission parameters of the UNE fall within industry  
 9 standards, then the impact of the service on the customer  
 10 is irrelevant; is that right?  
 11 A. That's part of the Qwest position, yes.  
 12 Q. In your rebuttal, Page 22, Lines 5 through 10,  
 13 you have there language based on language that was ordered  
 14 in Minnesota by the Administrative Law Judges that says:  
 15 If such changes result in the CLEC's end user customer  
 16 experiencing unacceptable changes in the transmission of  
 17 voice or data, Qwest will assist the CLEC in determining  
 18 the source and will take the necessary corrective action  
 19 to restore the transmission quality to an acceptable level  
 20 if it was caused by the network changes.  
 21 Do you see that language?  
 22 A. Yes, I do.  
 23 Q. You understand that that is language that  
 24 Eschelon is proposing in this case?  
 25 A. Yes. That's my understanding.

Page 202

1 Q. That's language that was initially suggested by  
 2 the Minnesota Department of Commerce?  
 3 A. Yes.  
 4 Q. And recommended to be adopted by the Minnesota  
 5 ALJs?  
 6 A. Yes.  
 7 Q. Now, that language provides a consequence if a  
 8 change causes unacceptable changes in transmission  
 9 parameters; right?  
 10 A. Yes.  
 11 Q. That consequence is that Qwest will determine the  
 12 source and take necessary corrective action to restore the  
 13 transmission quality to its previous -- to an acceptable  
 14 level; correct?  
 15 A. Yes.  
 16 Q. Now, this proposal that we've been talking about  
 17 doesn't prohibit Qwest from making changes, does it?  
 18 A. No. It does not.  
 19 Q. And what it does is it establishes a remedy if  
 20 customers are adversely impacted; correct?  
 21 A. It does establish a remedy, but it's a situation  
 22 where Qwest may be put into a box where it's unable to  
 23 remedy it for the end user customer. And that is an issue  
 24 we'll have to deal with if this is actually ordered in the  
 25 state of Minnesota, because there can be network changes

Page 203

1 that are made.  
 2 Part of it is that it talks about the service  
 3 Eschelon is giving to its end user. Qwest doesn't know  
 4 exactly or typically what service Eschelon is providing to  
 5 the end user. Qwest is providing a service to the CLEC,  
 6 and Qwest believes the proper standard is between Qwest  
 7 and the CLEC. That Qwest should not have some  
 8 responsibility for whatever promises that Eschelon is  
 9 providing to its end user.  
 10 So, for example, and I think this example is in  
 11 the testimony, if the CLEC uses an analog to wire copper  
 12 facility to provide a digital service to the customer, it  
 13 will probably work. However, they're ordering an analog  
 14 loop. When Qwest modernizes its network, Qwest can put in  
 15 some type of hybrid loop, which is a combination of  
 16 electronics and copper.  
 17 And in that hybrid loop scenario, an analog loop  
 18 is still going to work and it's going to work within the  
 19 parameters, but because the CLEC -- not necessarily  
 20 Eschelon -- this hypothetical CLEC is giving the end user  
 21 a data service over it, the data service is not going to  
 22 work. And Qwest is really not in a position that it is  
 23 somehow going to remove all of the electronics which  
 24 typically have been put in for growth. When you have an  
 25 area and there's a higher demand for loops than was

Page 204

1 anticipated when the plant was put in maybe up to, you  
 2 know, 75, 100 years ago, and we've got to provide growth,  
 3 we're going to put those electronics in.  
 4 If the CLEC -- if the relationship on what  
 5 happened was between Qwest and the CLEC, then we would be  
 6 able to say, yes, you have ordered X service. Yes, it  
 7 still works.  
 8 Because we don't know that they inappropriately  
 9 used the wrong loop to deliver service to the end user  
 10 customer, it's going to put Qwest in a box, and I'm not  
 11 sure what the result of that would be. Once again, it  
 12 would become situational specific, and that's what Qwest  
 13 is trying to avoid by its language.  
 14 ARBITRATOR RODDA: Can I just ask under that  
 15 example you just gave, they were providing services --  
 16 they must have been providing services that worked over  
 17 that analog loop, and then when you modernized in the  
 18 hypothetical --  
 19 THE WITNESS: Correct. DSL would be the example.  
 20 They had a customer loop. It was all copper for whatever  
 21 reason, analog perhaps, and they knew it was going to work  
 22 because they're able to see the loop makeup tool, then  
 23 they would provide this digital service over the analog  
 24 loop.  
 25 But at the time Qwest goes to modernize its

Page 221

1 Q. Now, if there are adverse affects to the  
2 transmission parameters of the facility, that means that  
3 something unexpected has happened; correct?  
4 A. Either unexpected happened in the cut, or for  
5 whatever reason the prem equipment was not capable of  
6 working within the parameter, the true parameters of the  
7 technical publications.  
8 Q. I'm going to actually switch gears now to ask you  
9 some questions about subloop cross-connects, which is  
10 issue 9-50. The issue here is whether Qwest should be  
11 required by the ICA to perform subloop cross-connects for  
12 Eschelon; correct?  
13 A. Yes.  
14 Q. And as I understand it, it's Qwest's position  
15 that it never had any obligation to provide this service;  
16 correct?  
17 A. Yes.  
18 Q. That is a service that Qwest currently offers  
19 under its ICAs with certain other CLECs; correct?  
20 A. There are older ICAs that have that option in  
21 them, yes.  
22 Q. And it's also a service that Qwest offers under  
23 its SGAT; correct?  
24 A. I believe it is in the Arizona SGAT, yes.  
25 Q. But it's Qwest's position that it doesn't want to

Page 222

1 include subloop cross-connects in Eschelon's ICA because  
2 you're in the process of phasing that service out; is that  
3 right?  
4 A. Yes. And it's not just for Eschelon. At a  
5 certain point in time when Qwest made the decision to  
6 phase out the offering because there was no legal  
7 requirement, plus there was no demand, ever since it's  
8 been there no one has ever ordered the service, it isn't  
9 prudent to try to continue to maintain processes and  
10 procedures and billing arrangements for a service that no  
11 one has ordered that Qwest is phasing it out for all CLECs  
12 after a certain point in time.  
13 MR. MERZ: Could you mark this as Eschelon-4,  
14 please.  
15 Q. (BY MR. MERZ) You recognize Eschelon Exhibit  
16 No. 4 as Exhibit A to Qwest's Arizona SGAT; correct?  
17 A. Yes.  
18 Q. Now, would you look at 9.3, which is on Page 7.  
19 A. Yes.  
20 Q. 9.3 is titled subloops; is that right?  
21 A. Yes.  
22 Q. And 9.3.3 is intrabuilding cable loop per pair;  
23 is that right?  
24 A. Yes.  
25 Q. There are two no-dispatch options and two

Page 223

1 dispatch options; is that right?  
2 A. Yes.  
3 Q. And this intrabuilding cable loop, that's what  
4 we're talking about when we talk about the subloops that  
5 are part of the 9-50 dispute; right?  
6 A. Yes.  
7 Q. The dispatch option is the option under which  
8 Qwest goes out to do the cross-connect on the CLEC's  
9 behalf; is that right?  
10 A. Yes.  
11 Q. That's the service that Qwest wants to  
12 discontinue because it says there's no CLEC demand for  
13 that service?  
14 A. Yes.  
15 Q. Now, I see there's a note under NRC-5. And if  
16 you look at the next to the last page of the document,  
17 Footnote 5 indicates that rates are being proposed in the  
18 Arizona cost docket Phase III.  
19 Do you see that?  
20 A. Yes, I do.  
21 Q. Has Qwest proposed rates for this element as part  
22 of the Phase III cost docket?  
23 A. I do not know.  
24 Q. Do you know whether Qwest intends to?  
25 A. I do not know. I would guess not since we're

Page 224

1 phasing out the product, but I don't know. I don't know  
2 the timing on that cost docket.  
3 MR. MERZ: Mark this as Eschelon-5, please.  
4 Q. (BY MR. MERZ) You have in front of you there  
5 Eschelon Exhibit No. 5; is that right?  
6 A. Yes.  
7 Q. Is this a document that you have seen before?  
8 A. I don't know. I am aware of the Cox Arizona  
9 issue, but, you know, I don't know that I have seen this  
10 document or not.  
11 Q. Go to Paragraph 2. There's a reference there to  
12 on premises wire subloops, which is the issue that we're  
13 talking about here, the 9-50 issue; is that right?  
14 A. Yes.  
15 Q. A reference as well to dispatch and no dispatch  
16 circumstances; correct?  
17 A. Yes.  
18 Q. The dispatch circumstances would be when the CLEC  
19 is asking Qwest to go out and do the cross-connects for  
20 it?  
21 MR. DEVANEY: Your Honor, I'm going to object at  
22 this point. This is a brief filed by Cox Telecom.  
23 Ms. Stewart is not sure she's seen it before, and counsel  
24 is asking her substantive questions about the meaning of  
25 statements in Cox's brief. I don't think it's a fair

Page 225

1 question and there's no foundation for it.  
 2 ARBITRATOR RODDA: You know, I didn't hear your  
 3 question. Could you read it back or --  
 4 MR. MERZ: Sure. My question is whether  
 5 Paragraph 2 references the dispatch option, which is the  
 6 option to have Qwest go do the cross-connects for Cox.  
 7 ARBITRATOR RODDA: Okay. I'm going to allow her  
 8 to answer that question.  
 9 THE WITNESS: I can just read what is here. So  
 10 it is what it is.  
 11 Q. (BY MR. MERZ) And what it is is a request for  
 12 Cox to have the Arizona Commission establish a rate to  
 13 have Qwest provide cross-connects for subloops; right?  
 14 MR. DEVANEY: Same objection.  
 15 ARBITRATOR RODDA: Okay. But if you can  
 16 understand --  
 17 THE WITNESS: I understand the question. What I  
 18 don't know is, because I have not read all of the details,  
 19 is I just wouldn't want to get crossways and would  
 20 probably need to go back and reread the subloop section as  
 21 it related to intrabuilding connections, whether this is  
 22 the same component that we're attempting to not offer  
 23 anymore.  
 24 And the reason I have sort of a note of caution  
 25 here on that is that there are subloop connections that

Page 226

1 Qwest would need to make for intrabuilding cable, and then  
 2 there are connections which have never been ordered, and  
 3 we believe it's because CLECs always do it themselves,  
 4 and, therefore, there's no need to have a process.  
 5 Because these rates don't match the other rates,  
 6 I'm concerned they may be talking about a different  
 7 cross-connect portion. So I don't want to -- because with  
 8 an intrabuilding cable, I could draw a diagram if there  
 9 would be any interest in a diagram, but there are a couple  
 10 of different cross-connect scenarios with intrabuilding  
 11 cable, and it just -- I just wouldn't want to get  
 12 crossways when particularly the prices are so different.  
 13 Q. (BY MR. MERZ) Well, let me ask you this.  
 14 Exhibit A, the Arizona SGAT, if you look at 9.3.3 where it  
 15 says intrabuilding cable loop per pair.  
 16 A. Yes.  
 17 Q. It says there there's a recurring rate of  
 18 0.299 -- I'm sorry -- 2955; correct?  
 19 A. Right.  
 20 Q. And that's the same as the recurring rate that's  
 21 referenced in Paragraph 2 of the Cox petition; correct?  
 22 A. Correct.  
 23 Q. And wouldn't you conclude from that that the Cox  
 24 petition is talking about the same intrabuilding cable  
 25 loop that is referenced at 9.3.3 of Exhibit A to the

Page 227

1 Arizona SGAT?  
 2 A. But it says it did not address nonrecurring for  
 3 the on premise, and these other rates are nonrecurring  
 4 rates.  
 5 Q. That are not rates that the Commission has  
 6 established but rather are being proposed in Phase III of  
 7 the cost case; isn't that right?  
 8 A. That could be an explanation. I'm just saying  
 9 that I saw a mismatch between this saying that there were  
 10 no nonrecurring rates and then this document having  
 11 numerous nonrecurring rates.  
 12 ARBITRATOR RODDA: You're probably finished that  
 13 line of questioning.  
 14 MR. MERZ: Yeah, I have.  
 15 Q. (BY MR. MERZ) I'm going to go to a different  
 16 area of loop-MUX combo, which is issue 9-61.  
 17 ARBITRATOR RODDA: When you say MUX, is that the  
 18 same as -- did you say MUX?  
 19 MR. MERZ: Loop-MUX. Maybe I'm just not saying  
 20 it very well. It's a combination of both things.  
 21 ARBITRATOR RODDA: Okay. Is this going to be --  
 22 I think this might be a good time for a break.  
 23 MR. MERZ: That would be fine.  
 24 ARBITRATOR RODDA: Let's take 10.  
 25 (A recess was taken from 10:20 a.m. to 10:36 a.m.)

Page 228

1 ARBITRATOR RODDA: Okay. Since everyone is here,  
 2 let's go back on the record.  
 3 Mr. Merz.  
 4 MR. MERZ: Thank you, Your Honor. I was reminded  
 5 that I have not offered Eschelon Exhibit 3, which is  
 6 Exhibit A to the proposed ICA; Eschelon Exhibit 4, which  
 7 is Exhibit A to the Arizona SGAT; and Eschelon Exhibit 5,  
 8 which is the Cox petition. I would offer those three  
 9 exhibits at this time.  
 10 ARBITRATOR RODDA: Thank you. My records do show  
 11 that we admitted E-3, but any objection to E-4 and 5?  
 12 MR. DEVANEY: I do object to the Cox petition. I  
 13 don't think there's a foundation for putting in another  
 14 party's brief that's not even a party to this proceeding.  
 15 ARBITRATOR RODDA: Okay. Well, it speaks to the  
 16 issue of whether there's going to be a -- it says what it  
 17 says, and it talks about the potential Phase III, but --  
 18 so I'll admit it for what it's worth. So we'll admit E-4  
 19 and E-5.  
 20 (Exhibit Nos. Eschelon-4 and Eschelon-5 were  
 21 received into evidence.)  
 22 MR. MERZ: Thank you. When we broke, we were  
 23 starting loop-MUX combinations, and I actually think I can  
 24 be pretty brief about this.  
 25 Q. (BY MR. MERZ) You're aware that the Minnesota

Page 249

1 in its central office and it has access to measure. To  
 2 the extent that it wants to do an analysis of not only  
 3 Eschelon but, let's say, CLECs in general -- because I  
 4 can't imagine, frankly, that Eschelon's List 1 drain time  
 5 frame, its peak usage is going to be significantly  
 6 different than other sort of business-related CLECs, or  
 7 for that matter Qwest's own business-related equipment  
 8 that serves like customers.

9 Q. Okay. But the contract language you just looked  
 10 at and reviewed doesn't specify anything like what you're  
 11 describing, an ongoing monitoring or sampling of  
 12 Eschelon's power usage, does it?

13 A. It gives Qwest full discretion to choose how it  
 14 wants to measure the power.

15 Q. Well, now it says four times a year; right?

16 A. It says -- nothing as I understand from this  
 17 contract language limits the amount of time or effort that  
 18 Qwest can go to to measure power in its own central  
 19 office. For purposes of billing Eschelon with respect to  
 20 measurement, it limits it to four times a year such that  
 21 Eschelon doesn't get a different measurement every week,  
 22 or that it does not have to pay a different amount every  
 23 week based on a weekly measurement, for example.

24 Q. So what you're proposing is that Qwest could  
 25 measure every day, but only choose to share with Eschelon

Page 250

1 the measurements that most work to Qwest's favor when  
 2 Qwest hit a particularly high spike on Eschelon's usage?  
 3 Are you proposing Qwest could then say, here is your bill  
 4 for the next three months, Eschelon? Is that what you're  
 5 proposing?

6 A. If by spike you mean List 1 drain, because I  
 7 don't know what you mean by spike.

8 Q. A high moment of usage compared to -- you know,  
 9 let me ask you this question. Usage is not static. It  
 10 fluctuates; right?

11 A. That's true.

12 Q. So there's going to be peaks and valleys; right?

13 A. Yes.

14 Q. You're not proposing that -- let me back up and  
 15 strike that.

16 The language that you just read from the contract  
 17 sets forth -- and this is agreed language in the contract  
 18 -- that power measurement will happen no more than four  
 19 times a year; right?

20 A. You have to read the language again specific to  
 21 my summary. When you read the language, when it talks  
 22 about the maximum of four times per year, it says: Based  
 23 on these readings, if the CLEC is utilizing less than the  
 24 ordered amount of power, Qwest will reduce the monthly  
 25 power usage rate to the CLEC's actual usage. If CLEC is

Page 251

1 utilizing more, then Qwest -- then it will bill the actual  
 2 power usage request on a going-forward basis.

3 The point of the four measurements is how is  
 4 Qwest going to bill Eschelon for power consumption. It  
 5 has nothing to do with limiting Qwest's ability to manage  
 6 its power infrastructure and measure whatever it wants to  
 7 measure.

8 Q. But the language you just read from says that  
 9 Qwest can take a maximum -- that was your word -- of four  
 10 readings per year; right?

11 A. Well, it's in the contract. It's not my word.

12 Q. Fair enough. It's in the contract.

13 A. Right. And then it goes on to suggest that for  
 14 those four readings, it will dictate how it bills to  
 15 Eschelon.

16 If you're suggesting that something in here  
 17 limits Qwest's ability to manage its power plant and  
 18 measure its power in some other way for some other purpose  
 19 than billing to Eschelon, I would suggest that that's not  
 20 the intention.

21 Q. Okay. But I'm not suggesting that at all, and  
 22 I'm trying to get at what you're suggesting, or maybe not.  
 23 So let me try to clarify.

24 You aren't suggesting here today that it would be  
 25 appropriate under the contract for Qwest to measure

Page 252

1 Eschelon's usage every single day, perhaps multiple times  
 2 every single day, wait until it sees a particular peak of  
 3 usage, and take that moment in time and then go to  
 4 Eschelon and say, well, we took a measurement. Here is  
 5 what it was. This is how you're going to be billed under  
 6 the power measurement language for the next three months.

7 Are you suggesting that Qwest can do that or  
 8 should do that?

9 A. And, again, you say spike. I'm going to refer to  
 10 it as List 1 drain because I think that's really what it  
 11 is. If Qwest wants -- and I have said this in my  
 12 testimony. To the extent Qwest can take a reading at the  
 13 point of List 1 drain and charge us those rates, I don't  
 14 have a problem with that.

15 Q. But, again, Qwest can't know when that moment in  
 16 time, that snapshot in time to going to come unless it  
 17 monitors on an ongoing basis Eschelon's power usage;  
 18 correct?

19 A. I wouldn't disagree with on an ongoing basis. I  
 20 would disagree with sort of the instantaneous and 24/7  
 21 suggestion that you threw out earlier. I think there is a  
 22 process and analysis that could be done and a process that  
 23 could be put in place to try to discern what the List 1  
 24 drain for Eschelon is.

25 Q. And let me come at it this way. Because you and

Page 265

1 answer to the first question is yes. Qwest should have to  
 2 do it because it did it for its own retail customer, and  
 3 nondiscriminatory access requires that it likewise do it  
 4 for Eschelon.  
 5 Now, Eschelon, unlike the customer, has rights  
 6 under Section 251 and 252 of the Act which require that  
 7 when it pays for these unbundled network elements, it do  
 8 it at cost-based rates. And that's what we're suggesting  
 9 in this language.  
 10 Q. Well, then, here is my question. When we look at  
 11 those words moving, adding to, repairing, changing, what  
 12 specific activities -- I know you have given your  
 13 nondiscrimination spiel, and I agree with your statement  
 14 in law absolutely, but let's focus on activities.  
 15 What activities are covered by these terms? When  
 16 you say moving or adding, are we talking about digging a  
 17 ditch? What are we talking about?  
 18 A. Well, you raise digging a ditch, I think, for a  
 19 specific reason. When we look at Paragraph 634 --  
 20 Q. No, I don't. Actually, all I want to know is  
 21 what activities are covered by these terms?  
 22 A. Let's say we're digging a ditch, though. The FCC  
 23 described when it talked about routine network  
 24 modifications in the TRO, it refused, based on Verizon's  
 25 suggestion, that the Commission list every activity that

Page 266

1 might fall under a routine network modification. The FCC  
 2 said we're not going to do that, because what we're  
 3 setting is a standard. It's nondiscriminatory access, and  
 4 if you do it for your customers, do it for the person that  
 5 buys unbundled network elements.  
 6 So there isn't -- I mean, in fact, the FCC has  
 7 suggested the right way to do this is not to list every  
 8 particular activity that might accrue. The standard is  
 9 what is important, which is if you do it for yourself, you  
 10 do it for the UNE customer.  
 11 Q. Okay. But that's with respect to routine network  
 12 modifications that the FCC didn't list all of the specific  
 13 activities. Here we're talking about specific contract  
 14 language that is going to be imposed upon the parties, and  
 15 it includes an obligation for Qwest to move, add, repair,  
 16 change UNEs.  
 17 And my question for you as Eschelon's  
 18 representative on this issue is what activities are  
 19 encompassed by those terms? Can you name the activities  
 20 that are encompassed by them? That's my only question.  
 21 A. Are you asking me can I name them all?  
 22 Q. Just give me some idea of what your company has  
 23 in mind with respect to what is covered by these  
 24 activities. That's all I want to know.  
 25 A. And I assume by that you mean other than design

Page 267

1 changes, maintenance of service.  
 2 Q. I've already said we can exclude what is in the  
 3 parens, but tell me what else is covered. That's all I  
 4 want to know.  
 5 A. Well, I'm hesitant to do that because the FCC  
 6 said we shouldn't list them all. But I can probably think  
 7 off the top of my head to give you a couple of examples if  
 8 you give me a second.  
 9 Let me give you an example. Additional  
 10 dispatches is one of the specific activities that we list  
 11 under the for example.  
 12 Q. Right.  
 13 A. When you go to provisional loop, and let's say  
 14 we're talking about copper, from the 2001 to -- or,  
 15 actually, sort of the 1999 time frame to about 2004, all  
 16 across the country we had cases dealing with special  
 17 construction charges. I'm sure that's a term you've heard  
 18 before. And it was the Commission's -- the FCC's decision  
 19 in the TRO for routine network modifications that finally  
 20 decided that issue on a national basis so we didn't have  
 21 to fight it state by state.  
 22 The position of most of the RBOCs -- and I would  
 23 admit that I wasn't in the Qwest proceedings but I was  
 24 participating in the Verizon and the Ameritech and the SBC  
 25 proceedings -- was that there was a very refined and very

Page 268

1 sort of limited obligation that -- let's use SBC as an  
 2 example -- that SBC was undertaking for itself to  
 3 provision a loop.  
 4 If the loop was connected all the way through,  
 5 let's say, and by that they meant you had circuit  
 6 continuity all the way from the central office to the  
 7 customer premise, if you had circuit continuity, they  
 8 would provision the loop. But if they had to send a  
 9 person out -- dispatch a person to move a jumper at the  
 10 remote term from one peg to another so as to generate that  
 11 circuit continuity, special construction charges, tariffed  
 12 rates. All right?  
 13 What the FCC said, following on the heels of many  
 14 state commission decisions to the same extent, is if you  
 15 would send that -- if you would dispatch that person to  
 16 connect that jumper at the FTI for your retail customers,  
 17 and you do, then you must also prepare and do that same  
 18 activity for your unbundled network elements customers.  
 19 It's part and parcel of the nondiscriminatory access.  
 20 So there are a myriad of those types of issues  
 21 that come into play when you're provisioning service out  
 22 in the field. The FCC recognized that this isn't a  
 23 onesie, twosie. It might encompass three or four things.  
 24 It's a number of things.  
 25 Q. So what I hear you saying is that it's not really

Page 269

1 possible to list all of the activities that might be  
 2 covered by these terms; is that right?  
 3 A. Oh, I don't know what's possible or not. I would  
 4 say it's not practical and, in fact, that it flies in the  
 5 face of the way the FCC said we should handle things.  
 6 Q. But whatever activities are encompassed by these  
 7 terms, and we don't know exactly what they are, it's  
 8 Eschelon's position that they all have to be paid for at  
 9 TELRIC rates; correct?  
 10 A. Cost-based rates.  
 11 Q. Right. Even though we don't know what all of the  
 12 activities are?  
 13 A. Well, we know that they fit within the realm of  
 14 what Qwest would do for its retail customers in providing  
 15 these same network elements. So they're certainly limited  
 16 to that extent.  
 17 Q. But if Qwest is providing that to its retail  
 18 customers at tariffed rates, and it's not service within  
 19 251 or 252, isn't it possible that tariff rate could apply  
 20 to Eschelon?  
 21 A. My understanding is that Section 9 in total  
 22 applies to Qwest's obligations under Section 251 for  
 23 unbundled network elements. If you're suggesting that  
 24 this was some service or feature that fell outside of 251,  
 25 then I think you would have a good argument to say it

Page 270

1 doesn't apply here.  
 2 Q. Now, the activities that Eschelon believes are  
 3 encompassed by buying access to a UNE, whatever moving,  
 4 adding, and changing might include, do you have a position  
 5 on whether those activities are already included in the  
 6 recurring rates that Eschelon is paying for UNEs here in  
 7 Arizona?  
 8 A. Your question is do I have an opinion?  
 9 Q. Well, what is your position? Are these  
 10 activities that you have listed in your language already  
 11 included in the recurring rates that CLECs pay in Arizona  
 12 for UNE loops, UNE transport, other UNEs?  
 13 A. I'm going to answer that question two ways.  
 14 First I'm going to say moves, adds, and changes is a  
 15 vernacular in the telecom industry that doesn't bring  
 16 surprise to a technician's face. When you say we've got  
 17 moves, adds, and changes to deal with, they know what  
 18 you're talking about. That's a fairly established term in  
 19 the telecommunications business. It's not defined here in  
 20 the agreement. But if you ask any technician, they're  
 21 going to know what you're talking about.  
 22 With respect to whether those moves, adds, and  
 23 changes and these other types of -- or these sort of more  
 24 defined activities in the example are included in the  
 25 rates in Arizona, Mr. Denney is going to be better suited

Page 271

1 to talk to you about that. I have read his testimony and  
 2 heard his testimony other places and I can recount it, but  
 3 I think he's probably better to discuss that.  
 4 Q. So you don't know?  
 5 A. He's going to be a better witness to talk to you  
 6 about that.  
 7 Q. Do you have in front of you Eschelon Exhibit 3,  
 8 which is Exhibit A to the interconnection agreement, the  
 9 pricing exhibit?  
 10 A. I did not bring that to the stand with me.  
 11 Q. Could you take a look, please, at Section 9.6.11,  
 12 which is found on Page 16.  
 13 A. Yes.  
 14 Q. Do you see UDIT rearrangement?  
 15 A. I do.  
 16 Q. UDIT refers to transport; is that correct?  
 17 A. Yes. I think it stands for unbundled dedicated  
 18 interoffice transport.  
 19 Q. And you'll see that the Arizona Commission has  
 20 set a nonrecurring rate for various types of UDIT  
 21 rearrangements as reflected by this exhibit. Would you  
 22 agree with that?  
 23 A. Yes.  
 24 Q. Do you have an understanding of what a UDIT  
 25 rearrangement is?

Page 272

1 A. Generally, yes, but I don't think it's part of my  
 2 testimony.  
 3 Q. Well, here is my question for you. A UDIT  
 4 rearrangement is something that might fall within  
 5 Eschelon's proposed language of moving, adding, or  
 6 changing. Would you agree with that?  
 7 A. I would say, yes, generally a rearrangement would  
 8 fall within that category.  
 9 Q. And would you agree with me that pursuant to the  
 10 Arizona Commission's rate order from the past cost docket  
 11 that UDIT rearrangement would not be covered by the  
 12 monthly recurring rate, but instead Eschelon or another  
 13 CLEC would have to pay a separate nonrecurring charge for  
 14 that?  
 15 A. Now we're certainly in Mr. Denney's territory far  
 16 more than my own. I just don't know.  
 17 Q. Doesn't Exhibit A sort of reflect that because it  
 18 has a separate rate for UDIT rearrangements?  
 19 A. The cost study underlying this particular rate is  
 20 going to tell you the activities that are accounted for in  
 21 undertaking this arrangement. We're talking about  
 22 arrangements more generally, so I don't know whether the  
 23 arrangements we're talking about would be specific to what  
 24 is covered by that cost study or not. I just don't know.  
 25 Mr. Denney probably does.

Page 301

1 I think it's Section 9.1.9, which is that language  
2 adversely affect or unacceptable changes. I guess that's  
3 in connection with network modifications or upgrades.  
4 A. Yeah.  
5 Q. Just so I am clear or can understand, what is  
6 Eschelon intending to encompass by this adversely affect?  
7 Is there a measurement? A little bit or a lot, or does it  
8 matter, or --  
9 A. I think it's generally -- I mean, if you think  
10 about it from a practical, real-world perspective, it is  
11 that Qwest goes out to the field and it does this network  
12 modernization and maintenance; right? Prior to that time,  
13 Eschelon had a customer who was up and running and  
14 everything was good.  
15 After this network maintenance and modernization,  
16 Eschelon gets a call from its customer, and it either says  
17 my service is down or my service is so degraded that I'm  
18 not comfortable. I don't feel like I'm being provided  
19 what I ordered or asked for. So that's the level of  
20 unacceptable is when the customer no longer is accepted of  
21 what the service quality is.  
22 Q. So it's unacceptable from the end user's point of  
23 view?  
24 A. I think it's unacceptable from Eschelon's  
25 perspective, and I think that's the way I would read this

Page 302

1 language. Because obviously, either one of those  
2 circumstances, either the customer calling and saying my  
3 service is down or the customer calling and saying my  
4 service no longer works the way it should is unacceptable.  
5 It's an unacceptable change in the quality of the UNE that  
6 Eschelon is receiving from Qwest.  
7 Q. And so is it the same between adversely affect  
8 and unacceptable changes? There's two proposal, I guess.  
9 One uses adversely affect, and one uses the words  
10 unacceptable changes.  
11 A. And I think this is the way I'm going to answer  
12 this, and I hate to do this. I think I'm going to have to  
13 kick this maybe to Ms. Johnson who is probably going to  
14 describe what Eschelon really meant between those two  
15 particular differences. That's something that I should  
16 probably know, but I just don't.  
17 Q. But she's also going to be testifying on this  
18 section or --  
19 A. I'm not sure she will, but she may be able to  
20 answer questions about it. The only thing is, I just  
21 don't want to say Eschelon was trying for a particular  
22 thing here that I haven't talked with them about if,  
23 indeed, that's not what they mean.  
24 Q. I'm just trying to decide -- I'm just trying to  
25 understand what Eschelon wants to encompass by adversely

Page 303

1 affect. Because that could -- just from me reading it,  
2 that could just be a range of things. But you're talking  
3 about interrupted service or they can't -- I mean, but --  
4 A. Keep in mind there are other parts of the  
5 contract on agreed upon language where it talks about  
6 certain parameters within which -- there is a range here  
7 within which -- if they are in that range. I mean, we're  
8 not talking about something that is so minute that it  
9 falls outside of the range -- or it's so large that it  
10 falls outside of the range of these parameters of an  
11 acceptable UNE by the technical documents. We're talking  
12 about a customer is in service, something happens to where  
13 that customer is no longer being provided the service it  
14 was provided, and that service it was provided was within  
15 the parameters of the UNEs that the parties have agreed  
16 upon.  
17 Q. So did you just tell me -- so it talks about  
18 changes to transmission parameters in that same section.  
19 A. Yes.  
20 Q. That those transmission parameters are somewhere  
21 else defined in the agreement?  
22 A. There is closed language, and I would have to  
23 take a minute to find it, that talks about the provision  
24 of UNEs. It's probably back toward the beginning. Let me  
25 find it here real quick.

Page 304

1 I can't find it off the top of my head right now,  
2 but there certainly are agreed upon parameters with  
3 respect to how the unbundled network elements will be  
4 offered. And I guess I would point you back to an example  
5 that I included. I guess actually it was in Mr. Webber's  
6 testimony that I have now adopted, which is the dB loss  
7 example. I don't know if you're familiar with that or  
8 not. What happened was -- let me just use it as a  
9 hypothetical.  
10 The hypothetical was that Qwest has a parameter  
11 DS1 circuit. It has electronic signals going back and  
12 forth from the central office to the customer. Okay.  
13 Obviously the two pieces of electronics are talking.  
14 There's a range of settings by which they can still talk,  
15 and you adjust those. You can set those and tune them, if  
16 you will, so that they talk the best. There's a range of  
17 acceptable parameters that both of them are willing to  
18 accept.  
19 Qwest used to -- in the example, Qwest made a  
20 conscious effort to go in and tune those facilities, all  
21 facilities in its network, to a given setting. I believe  
22 it was 7.5 decibels. Okay. But the range is, let's say,  
23 0 to 16. So anywhere within that range is acceptable with  
24 respect to the parameter, but they set it at 7.5.  
25 Well, the 7.5 didn't work for some of Eschelon's

Page 305

1 customers. All right? So the service couldn't be  
2 provided. Qwest came back and said we're within our  
3 range. All right? We made a change and, yes, your  
4 customer now can't get service, but we're within a range  
5 that's acceptable, so too bad. I'm sure they didn't say  
6 too bad. There's a long chronology that's in  
7 Ms. Johnson's testimony, but when I read it that's what I  
8 read is they were saying too bad.

9 So what this language is specifically getting at  
10 is it might still be within the range, but the customer's  
11 service going down because it was set at 7.5 instead of  
12 retuning it to where it would work is unacceptable.

13 That's the example from which this language  
14 really springs that they're trying to avoid. Yes, it  
15 might still be in these parameters, but they changed  
16 something such that our service went down. They should be  
17 required to fix that within the parameters.

18 ARBITRATOR RODDA: I don't have any other  
19 questions.

20 Are you going to have significant redirect?  
21 MR. MERZ: I'll have -- I mean, a few. I don't  
22 know how to -- we should take a break.

23 ARBITRATOR RODDA: Let's take a break and go to  
24 lunch. It always helps Mr. Merz.

25 MR. ROSELLI: If I might, a quick matter. I

Page 306

1 marked but neglected to have admitted Qwest Exhibit 20.  
2 And if I could do that now just to take care of it, I  
3 would move the admission of Qwest-20.

4 ARBITRATOR RODDA: And that was the excerpt from  
5 the McLeod transcript?

6 MR. ROSELLI: Correct.

7 ARBITRATOR RODDA: Any objection?  
8 MR. MERZ: No objection.

9 ARBITRATOR RODDA: So Qwest-20 is admitted.  
10 (Exhibit No. Qwest-20 was admitted into evidence.)

11 ARBITRATOR RODDA: And we're going to take a  
12 break until 1:35. No. I'll give you until 1:45.

13 (A recess was taken from 12:25 p.m. to 1:45 p.m.)

14 ARBITRATOR RODDA: Back on the record. And I  
15 think we were going to start with redirect.

16 MR. MERZ: Yes. Thank you, Your Honor.

17

18 REDIRECT EXAMINATION

19

20 Q. (BY MR. MERZ) Mr. Starkey, first I want to ask  
21 you a couple of questions about loop-transport  
22 combinations, and I want to start by referring you to  
23 Section 9.23.4 of the contract.

24 A. Okay.

25 Q. You recall this morning that Mr. Devaney asked

Page 307

1 you about the three types of loop-transport combinations  
2 that are described here?

3 A. Yes. I recall that.

4 Q. Does Eschelon's language on this issue recognize  
5 that there are, in fact, three types of loop-transport  
6 combinations?

7 A. Yes, it does. It not only recognizes that there  
8 are three distinct types of loop-transport combinations,  
9 but it also recognizes that there are differences between  
10 how they may be impacted, depending on whether they are  
11 combinations of UNEs or whether they also include a  
12 combination of UNEs and other special arrangements.

13 Q. Then I want to ask you a question -- switching  
14 gears now -- about loop-MUX combo.

15 A. Okay.

16 Q. You had mentioned this morning that you had in  
17 mind an example of a situation where something might be a  
18 feature or function of the loop, but it exists on the CO  
19 side of the frame. Do you recall that?

20 A. I do.

21 Q. Would you describe the example that you had in  
22 mind?

23 A. I will. I was going to use the picture that  
24 Ms. Stewart used earlier today. I promise not to write on  
25 it if I can point to it.

Page 308

1 ARBITRATOR RODDA: It's attached to her --  
2 THE WITNESS: It's also included in her  
3 testimony.

4 MR. MERZ: And I can give you that.

5 THE WITNESS: And I think I may have that. It's  
6 in her testimony as Exhibit KAS-R1.

7 ARBITRATOR RODDA: I can't remember. Was that  
8 her direct?

9 MR. MERZ: It's her rebuttal.

10 THE WITNESS: And when I was describing the issue  
11 with Mr. Devaney, I believe Mr. Devaney was trying to  
12 discern the extent to which, because the FCC defines an  
13 unbundled loop as a transmission facility between the main  
14 distribution frame and the central office and the  
15 demarcation point at the customer's premise, if  
16 multiplexing doesn't somehow fit between those two pieces,  
17 can it be considered a functionality of the loop?

18 And I suggested that I thought it could because  
19 it's a part of the transmission facility itself that makes  
20 the whole loop work. And one specific and very common  
21 example of that is a T1 circuit. T1 is actually the  
22 analog -- there are two types of sort of DS1 or T1  
23 circuits. T1 is generally considered to be the analog  
24 copper loop driven sort of platform on which you provide a  
25 1.544 megabit per second channel. DS1 is sort of the

Page 309

1 digital service component of that, generally considered to  
2 be a fiber-based sort of product.  
3 There's still a lot of copper based T1 in the  
4 network. And when you provide a copper-based T1, the way  
5 it works -- and maybe using Ms. Stewart's example is the  
6 best way to do this. It's not depicted on here, but if  
7 you look at Page 1 where you see it's sort of the  
8 second -- where you sort of see a stop sign on the right  
9 side, and it says DS1 from the stop sign in through the  
10 main distribution frame, and then down to the CLEC collo.  
11 In the middle there you'll see a DSX-1.  
12 Well, she's left something off of her diagram,  
13 because the DSX-1 really is nothing more than sort of  
14 accepting the DS1 circuit for purposes of distributing it  
15 to the rest of the central office. There's actually a  
16 piece of equipment that's required to make the T1 work in  
17 that circumstance. And I would say -- actually, let's --  
18 if I changed her designation of a DS1 to T1 in that  
19 circumstance, I would then add on the central office side  
20 of the frame --  
21 ARBITRATOR RODDA: But there's a T1 right below  
22 it; right?  
23 THE WITNESS: But if you see the RT designation  
24 out there on that piece of equipment on the right side,  
25 that basically means that -- she's done it on copper. It

Page 310

1 doesn't necessary have to have an RT out at that point in  
2 the network. It could be straight home-run copper, which  
3 is sort of the example she's made on the one above it.  
4 But she's called it DS1. Let's call it T1. If  
5 we did that, we would have to add a box on the central  
6 office side of the frame on the CLEC collo side of the  
7 frame, and in there we would put something like a D4  
8 channel bank.  
9 A D4 channel bank is actually the multiplexer  
10 that makes that T1 work between the central office and the  
11 customer's premise. And what it does is it takes that  
12 copper facility and it channelizes it to 24 DS0. DS0 is a  
13 voice grade channel, 64 kilobits. A T1 is 1.544. So  
14 that multiplexer not only takes those DS0 circuits and  
15 makes them a T1, but it also completes the circuit such  
16 that it can carry transmission at all. That's just  
17 another way of saying it's a fundamental part of the loop  
18 itself, because without it it wouldn't work. That is  
19 multiplexing, and it does exist on the CO side of the  
20 frame, and it's a very common way to provide T1 service.  
21 So if Mr. Devaney were right that the FCC somehow  
22 meant to limit any features or functionalities to only  
23 those two points between the frame and the NID, then T1  
24 circuits provided over old T1 carrier, D4 channel bank  
25 carrier would not fall under the definition of a loop, and

Page 311

1 we know they do.  
2 So I don't agree at all with Mr. Devaney's  
3 suggestion that if it isn't between the frame and the NID  
4 or the frame and the demarc it can't be multiplexing as  
5 defined by the FCC.  
6 Q. (BY MR. MERZ) So when you talk about  
7 multiplexing being on the CO side of the frame, you mean  
8 to the left of the long rectangle that's marked MDF as we  
9 look at this picture?  
10 A. I do. And there's a specific reason for that.  
11 The frame actually provides all of the electrical  
12 protection. You've got a big copper wire out there in the  
13 ground or on a telephone pole or somewhere else. There's  
14 the potential for a lot of electrical transmission from  
15 outside sources, from third party sources, on that loop.  
16 The frame is your primary grounding. There are other  
17 grounding sources out in the network, but your frame is  
18 the primary grounding and protection source for that loop  
19 to protect the equipment in the central office from surges  
20 from electricity from lightning or something else.  
21 So the copper loop absolutely terminates to the  
22 frame and then is jumpered to the D4 channel bank for  
23 purposes of providing the T1. It has to be, in fact, on  
24 the CO side of the frame in order to function properly.  
25 Q. I want to again switch gears and ask you some

Page 312

1 questions about network modernization and maintenance, and  
2 I would have you turn in the contract to Section 9.1.9.  
3 A. Okay.  
4 Q. Mr. Devaney asked you a number of questions about  
5 Eschelon's first proposal. Eschelon actually has two  
6 proposals on this issue; correct?  
7 A. That's correct.  
8 Q. And I recall Devaney asking you a lot of  
9 questions about the first proposal and maybe one question  
10 about the second proposal.  
11 My first question about the second proposal would  
12 be do you know where this second proposal comes from?  
13 What is its origin?  
14 A. This was a proposal proffered by the Department  
15 of Commerce in Minnesota when this case was before the  
16 Minnesota Commission as sort of an alternative to the two  
17 parties' proposals related to this topic. So this is  
18 language actually proposed by the Department of Commerce,  
19 which Eschelon has accepted as one of its potential  
20 proposals.  
21 Q. Does the second proposal address concerns that  
22 Qwest has raised with respect to Eschelon's first  
23 proposal?  
24 A. It does, and that was the intention.  
25 Q. How does it do that?

Page 313

1 A. For example, one of the things Mr. Devaney asked  
2 about was what happens if this unacceptable -- this  
3 unacceptable disruption occurs? You know, what is the  
4 resolution of that?  
5 I think if you look at the language in the second  
6 proposal, it specifically says, -- and I'll just read you  
7 the language that's at issue. It says: If such changes  
8 result in the CLEC's end user customer -- and, again,  
9 that's another issue. Maybe we should stop right there.  
10 It says CLEC's end user customer.  
11 One of the things Mr. Devaney talked about was  
12 end user customer is defined in the agreement as being  
13 either Qwest's customer or the CLEC's customer or  
14 third-party customers.  
15 The second proposed language makes clear that  
16 what we're talking about here is the CLEC's customer. So  
17 it says: If such changes result in the CLEC's end user  
18 customer experiencing unacceptable changes in the  
19 transmission of voice or data, Qwest will assist the CLEC  
20 in determining the source and will take the necessary  
21 corrective action to restore the transmission quality to  
22 an acceptable level if it was caused by the network  
23 changes.  
24 So it provides what will then happen if this  
25 unacceptable level of disruption occurs. Qwest will help

Page 314

1 Eschelon identify it, and they'll help restore the  
2 service.  
3 One other thing that I might point out about this  
4 language is that if you read the next sentence, the next  
5 sentence that is agreed upon language, it reads as  
6 follows: Network maintenance and modernization activities  
7 will result in UNE transmission parameters that are within  
8 transmission limits of the UNE ordered by the CLEC.  
9 So I guess to another point that Mr. Devaney was  
10 talking about, which is how broad could this unacceptable  
11 transmission description be? I mean, could it just  
12 encompass nearly anything? In fact, we heard Ms. Stewart  
13 describe this morning the example of DSL, and I think her  
14 point was let's say Eschelon bought a straight copper,  
15 two-wire loop and used it for DSL service. Okay. What  
16 they should have done is bought a digital capable loop  
17 which is meant to support DSL service, but under  
18 Ms. Stewart's example we bought the wrong loop and then  
19 tried to make DSL work on it. And she was concerned this  
20 language would require them to restore the DSL capable  
21 nature of the loop even though that's not what we ordered.  
22 I think that particular example and many others  
23 are dispelled by the next sentence, which says: They're  
24 only meant to restore it to the transmission parameters of  
25 what we ordered, which in that case would be a straight

Page 315

1 copper loop not with DSL capabilities.  
2 Q. The first proposal uses the phrase there won't  
3 be -- changes won't adversely affect transmission  
4 parameters; correct?  
5 A. Yes.  
6 Q. And then the second proposal talks about  
7 unacceptable changes in transmission of voice or data.  
8 What is your understanding of the relationship between  
9 those two concepts, adversely affect or unacceptable  
10 changes?  
11 A. Well, I think -- I think they're certainly  
12 related. I think in the first proposal Eschelon was  
13 trying to get at what I described earlier, which is the  
14 adverse effect if their customer calls them and says  
15 something is wrong.  
16 When we look at the second proposal and we look  
17 at the unacceptable changes, I think what the Department  
18 of Commerce was after here was a little more discretion to  
19 say, okay, something changed, but isn't it an acceptable  
20 change? Is the customer -- or is Eschelon not able to  
21 provide the service it was previously providing?  
22 Either one of those terms, or, frankly, for that  
23 matter, any word you put in here is going to be subject to  
24 some amount of discretion. I think the point with this  
25 proposal is that it places the obligation on Qwest to --

Page 316

1 if there is a change that impacts Eschelon and its  
2 customers, that it will help them research the problem and  
3 restore it.  
4 And as I said earlier, if the parties -- if  
5 Eschelon -- in the real world, this is how it would  
6 work -- I'm almost certain -- is Eschelon would come back  
7 and say you did a network modernization. It impacted us;  
8 it impacted our customers; it's unacceptable. The two  
9 will talk about it. Right? Was it unacceptable or not?  
10 And if they can't come to agreement, just like every other  
11 term in the contract, then they'll follow the processes we  
12 described earlier, escalation and dispute resolution.  
13 The issue here is that the purpose is to provide  
14 the obligation. And in the real world, sure, you're going  
15 to have to put more meat around that by the two parties  
16 talking, but that's true of nearly any term in this  
17 contract that it isn't specifically defined. That's just  
18 the way contracts work.  
19 Q. And then, finally, I want to talk with you just  
20 briefly about power. Are you aware of any instance where  
21 an ILEC and a CLEC have agreed to some sort of usage-based  
22 charge for power plant?  
23 A. Yes, I am. I mean, I think that's what sort of  
24 stands out about this issue in my mind in the Qwest  
25 region, both in this case and then also in the McLeod

Page 317

1 cases, is that ILECs other than Qwest across the country  
2 have sort of gotten to the bottom of this issue and  
3 settled it.  
4 In fact, probably the most important in that  
5 regard is SBC Texas where they've sat down with CLECs,  
6 they've developed an amendment to the contract that  
7 actually allows the CLECs to self-certify how much they're  
8 using for power, and then SBC Texas charges the CLECs for  
9 that amount of usage. And that includes both the power  
10 usage and the power plant that we're talking about here.  
11 The same is -- that amendment is available in  
12 Texas. Something similar exists in Illinois. I mean,  
13 this problem -- this is a problem. Charging the CLECs for  
14 the amount of power plant consistent with the cable order  
15 is a problem, and it's been recognized by commissions  
16 across the country. Other ILECs are solving it with  
17 amendments like this, and we're not getting it solved in  
18 the Qwest region.  
19 MR. MERZ: I don't have anything further. Thank  
20 you, Mr. Starkey.  
21 ARBITRATOR RODDA: Either one of you?  
22 MR. ROSELLI: Nothing from me.  
23 MR. DEVANEY: Two quick ones. Thank you.  
24  
25

Page 318

1 RE-CROSS-EXAMINATION  
2  
3 Q. (BY MR. DEVANEY) Mr. Starkey, in the  
4 conversation you had with Mr. Merz, I think you said that  
5 there is a D4 channel bank that would be on the CO side of  
6 the MDF; is that right?  
7 A. Yes.  
8 Q. The FCC rule that we looked at earlier speaks of  
9 the loop running from the customer premise to either a  
10 distribution frame, or its equivalent is the words that  
11 the FCC uses. Is the DS4 channel bank the equivalent of a  
12 distribution frame in your view as used by the FCC?  
13 A. No, it's not. I mean, in the circumstance that I  
14 just described, it uses the frame and it uses the D4. If  
15 you took the D4 out, the loop wouldn't work. It's just  
16 that essential to the T1 circuit.  
17 Q. What do you think the FCC had in mind with the  
18 use of the word equivalent? Do you know?  
19 A. I do. Well, I obviously don't know what they  
20 meant, but I think I know what they mean and it's  
21 generally accepted is that if you take Ms. Stewart's  
22 example again and you go to -- well, what she has done in  
23 this example is because she's put the CLEC collo and then  
24 she has everything going to the CLEC collo, she's inserted  
25 the frame, the main frame, in situations where it wouldn't

Page 319

1 be inserted if that loop were then going somewhere to a  
2 Qwest location like to a multiplexer for transport.  
3 So when fiber comes in -- the only thing that  
4 terminates on the main distribution frame is copper. So  
5 when fiber comes in, it comes in generally to a terminal  
6 that takes the fiber, interprets the signaling, and then  
7 puts a circuit out the back end to wherever it has to go.  
8 Generally, because it's coming in fiber, it never goes to  
9 copper, so it never hits the main distribution frame.  
10 Instead, it comes out probably either coax or fiber out  
11 the back into a MUX or a DAX, or even directly into the  
12 switch in some circumstances.  
13 But in that circumstance you're not going to have  
14 a main frame. What you're going to have is a fiber  
15 distribution panel and a central office terminal. That's  
16 the situation I think the FCC is talking about when it  
17 says or its equivalent, because it's talking about fiber  
18 optic facilities.  
19 Q. Okay. My other question for you is you testified  
20 earlier that Qwest performance of network maintenance or  
21 modernization activity set someone's service at 7.5 dBs  
22 and it didn't work. Do you recall that?  
23 A. I do.  
24 Q. Are you sure that that happened as a network and  
25 maintenance activity on Qwest's part?

Page 320

1 A. Well, I understand there's some dispute about  
2 that issue as you look at the testimony.  
3 Q. All I want to know is on that particular point,  
4 was it a network maintenance activity or was it an  
5 installation? Do you know?  
6 A. Well, I don't think the two are mutually  
7 exclusive. I don't think I can answer the question with a  
8 yes or no as you would like me to. The issue, as I  
9 understand it, is as follows.  
10 Q. I don't want you to give a speech about this.  
11 What I want to know is was the service already working, up  
12 and working when the 7.5 dB change was made, or was the  
13 service not yet installed and working? Do you know?  
14 A. That's a different question. My understanding is  
15 that the service was not up and working at that particular  
16 point.  
17 MR. ROSELLI: That's all I wanted to know. Thank  
18 you.  
19 ARBITRATOR RODDA: Mr. Merz, anything further?  
20 MR. MERZ: Nothing further.  
21 ARBITRATOR RODDA: All right. Well. Thank you  
22 Mr. Starkey.  
23 THE WITNESS: Thank you.  
24  
25

Page 325

1 correct?  
 2 A. Correct.  
 3 Q. And it's no adverse effect resulting from network  
 4 maintenance or modernization activities; correct?  
 5 A. Correct.  
 6 Q. And isn't it correct that the 7.5 dB episode that  
 7 you describe in your exhibit involved an installation? It  
 8 did not involve a modernization or a maintenance activity?  
 9 MR. MERZ: Mr. Devaney, if you could just tell us  
 10 which exhibit you're referring to, that might be helpful.  
 11 MR. DEVANEY: I don't have the exhibit number.  
 12 THE WITNESS: If you look at my Exhibit BJJ-21.  
 13 Q. (BY MR. DEVANEY) And that's attached to which?  
 14 A. That's attached to my direct testimony --  
 15 Q. Okay.  
 16 A. -- Mr. Devaney, and Page 1 in that exhibit.  
 17 And the answer to your question is the issue  
 18 itself came up in relation to installation. However, if  
 19 you look at BJJ-21, the first page, the third paragraph  
 20 down about halfway through, Joan Peterson of Qwest, who is  
 21 a senior attorney, said: In addition, techs were  
 22 instructed to reset the dB at a neg 7.5 whenever they did  
 23 a repair.  
 24 So while the issue itself came up related to  
 25 installation and circuits that we couldn't turn up, the

Page 326

1 concern is that Qwest had confirmed that they were doing  
 2 modernization by resetting the dB to a 7.5 during repairs.  
 3 And it would stand to reason that if it wouldn't work at  
 4 7.5 at the time of installation, if they change it from  
 5 what it currently is back to 7.5, it's going to impact the  
 6 service.  
 7 Q. Okay. My understanding is that this particular  
 8 incident was resolved by a Qwest engineer going out to the  
 9 site, asking, okay, what dB level would you like it set  
 10 at? Eschelon told Qwest it was set at that level and  
 11 those circuits have been up and working since; isn't that  
 12 right?  
 13 A. Eventually, yes.  
 14 Q. And further, Qwest implemented a process with  
 15 Eschelon to avoid further problems like this at that point  
 16 in time; isn't that correct?  
 17 A. There is an existing process now, yes --  
 18 Q. Okay.  
 19 A. -- in maintenance and repair.  
 20 Q. Okay. Changing the subject. With respect to  
 21 issue 9.33, there are two proposals that Eschelon has put  
 22 forth. One is the no adverse affect proposal. Actually,  
 23 I guess we're still on the same issue. And then the  
 24 second proposal was no unacceptable changes.  
 25 I think Mr. Starkey said that you would be able

Page 327

1 to address the difference between those two terms. Are  
 2 you prepared to do that?  
 3 A. The two terms, the intent is the same. The  
 4 second proposal is what the Minnesota Department  
 5 recommended.  
 6 Q. What is your understanding of the meaning of no  
 7 adverse affect as proposed by Eschelon?  
 8 A. Well, if the customer's service was working, and  
 9 then the customer is impacted and isn't able to use the  
 10 service, that is adversely affecting the service.  
 11 Q. Would it be more accurate, then, to change the  
 12 language to say that?  
 13 A. I would have to refer to Mr. Starkey on that. Or  
 14 I guess my response to that would be that I'm certain that  
 15 if Qwest wanted to propose some type of language that  
 16 Eschelon would look at it.  
 17 Q. But your understanding is --  
 18 A. And consider it.  
 19 Q. -- Eschelon's proposal of no adverse affect means  
 20 you have a service that's working, Qwest performs a  
 21 network maintenance or modernization activity, and the  
 22 service stops working. That is a no adverse affect; is  
 23 that correct?  
 24 A. Right. The service stops -- either stops working  
 25 all together or it's impacted to a point where it can't be

Page 328

1 used anymore where it's degraded or --  
 2 Q. Okay. And is there any measurement that Eschelon  
 3 is proposing to determine where the unacceptable degrading  
 4 begins?  
 5 A. Once again, I'm going to have to defer that to  
 6 Mr. Starkey.  
 7 MR. DEVANEY: Thank you. That's all I have.  
 8 MR. TOPP: He warned me that would be quick.  
 9  
 10 CROSS-EXAMINATION  
 11  
 12 Q. (BY MR. TOPP) Ms. Johnson, I would like to speak  
 13 with you a little bit about the jeopardies issues which  
 14 are 12-71 to 12-73. And I would like to start by looking  
 15 at the exhibit you referenced in your summary, Exhibit  
 16 BJJ-5 to your direct testimony.  
 17 Do you have that in front of you?  
 18 A. I do.  
 19 Q. If you would go inside the cover to Page 1 of  
 20 that document. There's an event summary that is set forth  
 21 on that first page.  
 22 A. Uh-huh.  
 23 Q. And that's an event summary that you prepared; is  
 24 that correct?  
 25 A. That is correct.

Page 333

1 If you go to Page 37 of BJJ-5 under Action Item  
2 No. 1, when Qwest confirmed that it was their process to  
3 send the FOC the day before. And we took that as face  
4 value that that was Qwest's existing process.  
5 Q. Okay.  
6 A. So the compliance that I'm talking about here  
7 had -- there are several key points of the jeopardy  
8 process, one being whether or not Qwest provides an FOC  
9 after a Qwest jeopardy.  
10 Q. So one of the key points from your perspective is  
11 that Qwest would provide a jeopardy the day before it  
12 actually delivered the circuit. Is that what you're  
13 testimony is?  
14 A. My testimony is that Qwest told us that that was  
15 Qwest's process. And that when we pointed out examples  
16 where that didn't happen, they told us it was a Qwest  
17 compliance process.  
18 Q. Now, when this CR -- the notes on April 21st  
19 indicate that this -- proposed that this was going to  
20 close with the documentation changes that were sent out at  
21 that time; is that correct?  
22 MR. MERZ: What page are you referring to?  
23 MR. TOPP: I'm referring to Page 20 of BJJ-5.  
24 THE WITNESS: Well, the process -- let me try and  
25 explain. The process isn't -- you know, the documentation

Page 334

1 is just one of the things that may happen as a result of a  
2 change request. So in April, Qwest sent out updates to  
3 the product catalog, and it doesn't necessarily mean that  
4 there wouldn't have potentially been additional updates.  
5 So at the point in time in April of 2004, there was, as a  
6 result of this CR, really what equated to a complete  
7 overhaul of the jeopardy process.  
8 There were, you know, several changes that were  
9 made. Eschelon had submitted two separate CRs, and in  
10 reviewing those CRs there were -- you know, one of them  
11 was titled, you know, you can't, you know, put a customer  
12 not ready jep before 5:00 p.m. The other one was, you  
13 know, titled you have to send us an FOC. And there were  
14 multiple changes, both process and systems changes that  
15 were made to the process in its entirety.  
16 Q. (BY MR. TOPP) Yes, there were many changes to  
17 the jeopardy system made as a part of this process.  
18 That's the point that you're trying to make; correct?  
19 A. Right. But, you know, the -- at issue, my  
20 exhibit is directed at and limited to, you know, the  
21 changes in regards to getting an FOC after a Qwest  
22 jeopardy.  
23 Q. Okay. Let's take a -- could you take a look at  
24 what has been marked as Exhibit Qwest-22 and Exhibit  
25 Qwest-23. And the Qwest-22 is -- and I notice the dates

Page 335

1 don't precisely match up, but it sure looks like if you  
2 look at the CR number, that matches up with the CR number  
3 that you're discussing in BJJ-5. And within the text of  
4 this document, it discusses updates to the product  
5 catalog, including new revised documentation for  
6 provisioning and installation overview V42.0.  
7 Would it be fair to characterize this document as  
8 announcing the language changes that were being  
9 implemented as a result of this particular change request  
10 or proposing them?  
11 A. Can I just review it real quickly?  
12 Q. Sure.  
13 A. Thank you.  
14 And Mr. Topp, your question was that these  
15 changes are from this notice and a part of this CR?  
16 Q. Correct.  
17 A. And that is correct. This is a portion or subset  
18 of some of the changes that were made as a result of this  
19 CR. When we first started looking at the jeopardy  
20 process, Eschelon had expressed concern that in general  
21 Qwest was not sending FOCs after a jeopardy.  
22 And as Qwest was reviewing that process, they  
23 looked at all of the Qwest jeopardy types. You know, and  
24 if you look at the Qwest jeopardy codes, there are  
25 multiple types of Qwest jeopardies, which include Qwest

Page 336

1 facility jeopardies. And Qwest had told us that in review  
2 of all of those Qwest jeopardy types, that for everything  
3 except for a small portion, which included the Qwest  
4 facility jeopardy, Qwest was always meeting the due date  
5 on the jeopardies that started with B's, which were  
6 workforce.  
7 They had identified differences between what  
8 Qwest called its critical date jeopardies versus  
9 jeopardies that really impacted the due date. So the  
10 first step of trying to resolve the issue of not providing  
11 an FOC was for Qwest to identify which of those jeopardies  
12 we should ignore. And so they had identified in their  
13 jeopardy code, they had identified the types of jeopardies  
14 that they were always meeting the due date on.  
15 So they said for these particular jeopardies, and  
16 actually it is in my BJJ-5, the redline that they provided  
17 us regarding those types of jeopardies starts on Page 41  
18 of BJJ-5 as we were going through this process.  
19 And so what they told us -- and if you look at  
20 the changes that they made in Version 42, what they told  
21 us is for these certain jeopardies, expect us to come,  
22 we're coming anyway, even if you get one of these  
23 jeopardies. They later did some systems changes to  
24 prevent them from sending it to us, but first there was a  
25 process change where they just communicated to us, don't

Page 337

1 pay attention to these. These are internal goals for  
 2 Qwest. When we don't meet them, we've done analysis and  
 3 99.9 or 100 percent of the time we deliver the circuit on  
 4 the due date, so we want you to ignore these. And this  
 5 particular documentation in Exhibit BJJ-42 is documenting  
 6 that piece of it.  
 7 So if you go to Qwest-23, and it doesn't appear  
 8 that there are page numbers, but at the bottom of the page  
 9 there are actually page numbers from the PCAT. If you go  
 10 to Page 8 of 20, this is where the redlined language that  
 11 Qwest is adding in, and this is where they're telling us  
 12 that Qwest differentiates between due date jeopardies and  
 13 critical date jeopardies and we want you to ignore these  
 14 particular type of jeopardies.  
 15 And then this was the point in time, too, that we  
 16 had also expressed concern because the Qwest facility  
 17 jeopardy was rather just kind of a generic no facilities  
 18 available. And we had expressed concern saying we need to  
 19 determine if we need to, you know, work on alternate  
 20 solutions for our customers, so we need to have more  
 21 information. Do you have to clear an F2 pair, or do you  
 22 have to get a permit to dig up the street? Because it  
 23 makes a difference.  
 24 So this is also where Qwest committed that within  
 25 72 hours of the time they send the jeopardy that they

Page 338

1 would send us either an FOC or additional information on  
 2 what -- you know, more information on the jeopardy.  
 3 MR. TOPP: Yeah. And that's within 72 -- well,  
 4 first of all, could I offer Exhibits 22 and 23.  
 5 ARBITRATOR RODDA: First of all, let's  
 6 identify -- I think that you were trying to identify that.  
 7 MR. TOPP: Yeah. That's where I started.  
 8 ARBITRATOR RODDA: But I still don't understand.  
 9 I think we got a lot more information there than what this  
 10 document is. Can someone tell me concisely what 22 is?  
 11 Don't tell me what it does, just tell me what it is so I  
 12 can identify Qwest-22.  
 13 THE WITNESS: Oh, Qwest-22 is a Qwest  
 14 announcement -- do you want me to do that, Mr. Topp?  
 15 MR. TOPP: Yes.  
 16 THE WITNESS: It's a Qwest announcement saying,  
 17 you know, that they sent out on April 12th with proposed  
 18 changes to their provisioning and installation overview  
 19 PCAT. That their proposed effective date was May 27th.  
 20 And the body of the announcement itself identifies, you  
 21 know, the changes that Qwest is making, that it's related  
 22 to this CR. Because they did synergies, they kind of  
 23 combined the two CRs and did some other work in this.  
 24 And this is the document that they changed.  
 25 ARBITRATOR RODDA: Okay.

Page 339

1 THE WITNESS: 23 is the actually changes.  
 2 ARBITRATOR RODDA: Okay.  
 3 MR. TOPP: And I would offer Qwest-22 and 23.  
 4 MR. MERZ: No objection, Your Honor.  
 5 ARBITRATOR RODDA: Okay. Then Qwest-22 and  
 6 Qwest-23 are admitted.  
 7 (Exhibit Nos. Qwest-22 and Qwest-23 were admitted  
 8 into evidence.)  
 9 Q. (BY MR. TOPP) All right. Now, referring -- so  
 10 Qwest-23 reflects changes to the PCAT. And this other  
 11 stuff that you have mentioned such as the 72-hour update,  
 12 that is in the documentation at Page 8 of 20, is it not?  
 13 As well, is it not?  
 14 A. Page 8 of 20?  
 15 Q. Yeah. Referring to Exhibit 23.  
 16 A. Yes. Yes. That's part of the changes to it.  
 17 Also, if you go back to Page 20 of BJJ-5, it's also a  
 18 commitment that, you know, Qwest made in the March 17th  
 19 CMP meeting.  
 20 Q. And I'll ask you to focus on provisions I'm  
 21 asking you about.  
 22 A. Okay.  
 23 Q. Hopefully we can move through this a little bit  
 24 more quickly.  
 25 Now, and also there is information in here about

Page 340

1 the difference between a due date jeopardy and a critical  
 2 date jeopardy. That appears on the same page, does it  
 3 not?  
 4 A. On Page 8, yes.  
 5 Q. Yes. Now, in BJJ-5, you indicate that one of the  
 6 resolutions -- well, before we get to that, did Eschelon  
 7 file any objections to these language changes that appear  
 8 in Qwest Exhibit 22 or 23?  
 9 A. I don't recall if we filed any objections or not.  
 10 I'm not certain that we filed any comments. Most of this  
 11 was a collaborative effort so --  
 12 Q. And, in fact, on Page 20 of your exhibit BJJ-5,  
 13 it indicates that no comments came in for this CR.  
 14 A. Oh.  
 15 Q. And you don't have any basis to quarrel with that  
 16 sitting here today?  
 17 A. No, I don't.  
 18 Q. Okay. And in this CR, I can find no language  
 19 whatsoever that addresses whether, in fact -- let me look  
 20 at how you describe this.  
 21 That indicates that CLECs would receive an FOC  
 22 before. In other words, 24 hours before delivering the  
 23 facility. Does that exist in these process documents  
 24 anywhere?  
 25 A. I don't -- I'm not certain whether or not it

Page 341

1 exists in the process documents. I'll direct you once  
 2 again back to Page 37 of BJJ-5 where when we provided  
 3 examples, Phyllis -- it was actually Phyllis Susins at  
 4 Qwest said that their process was to provide an FOC the  
 5 day before after a Qwest facility jeopardy so that we knew  
 6 Qwest was going to deliver the service.  
 7 And also, if you go to Page 21 of BJJ-5, in a  
 8 meeting that took place -- the ad hoc meeting on  
 9 March 4th, if you look halfway down the page, it says:  
 10 Bonnie confirmed that the CLECs should always receive the  
 11 FOC before the due date. Phyllis agreed and confirmed  
 12 that Qwest cannot expect the CLEC to be ready for the  
 13 service if we haven't notified you. And then I asked  
 14 about when Qwest sends us a customer not ready, then Qwest  
 15 sends us a customer not ready jeopardy.  
 16 So Qwest confirmed at that particular meeting  
 17 that our understanding that Qwest would give us an FOC the  
 18 day before, Qwest confirmed that.  
 19 Q. Now, there were a number of issues that were  
 20 raised as a part of this CMP process. In fact, Eschelon's  
 21 original proposal was to receive notice in advance, an FOC  
 22 in advance of provisioning without any -- without this  
 23 24-hour time frame that you're claiming now; isn't that  
 24 correct?  
 25 A. Could you ask me that question again? I'm not

Page 342

1 sure just exactly -- in what forum are you talking about?  
 2 In CMP or --  
 3 Q. Yes, in CMP. Your initial request in this did  
 4 not include the day before language, did it?  
 5 A. It did not. And after -- if you, you know, look  
 6 at the title of this CR that starts on Page 17 -- give me  
 7 just a moment here.  
 8 I think we said it was 17, didn't we?  
 9 ARBITRATOR RODDA: I think something starts on 17.  
 10 THE WITNESS: It said -- and I had actually  
 11 specifically when we decided that there were synergies and  
 12 we would do more work related to jeopardies than just our  
 13 request, I had asked Qwest to keep the title, the old  
 14 title, so that we could, you know, make certain that we  
 15 captured that. And it says: Delayed order process  
 16 modified to allow the CLEC a designated time frame to  
 17 respond to a released delayed order after Qwest sends the  
 18 updated FOC.  
 19 And so that request with that title was  
 20 completed, and throughout the process as we talked in CMP  
 21 and at ad hoc meetings and provided examples, then Qwest  
 22 confirmed that actually we should be sending you an FOC  
 23 the day before.  
 24 Q. (BY MR. TOPP) But you were willing to close this  
 25 without any language in the product catalog obligating the

Page 343

1 FOC to be sent the day before?  
 2 A. You know, regardless of whether or not the  
 3 language is in the product catalog, Qwest had confirmed it  
 4 on several calls and said that that was their process.  
 5 Q. Now, is it your view that if Qwest resolves a  
 6 Qwest jeopardy on the due date that Qwest should still  
 7 send an FOC a day before it attempts to deliver the  
 8 service?  
 9 A. Our language that we are proposing in the  
 10 interconnection agreement allows Qwest to attempt to  
 11 deliver the service regardless of whether or not Qwest  
 12 sends any FOC at all, or a timely FOC. We want to get  
 13 service to our customer as much as Qwest wants to deliver  
 14 it.  
 15 Q. And, in fact, you attached to your testimony over  
 16 100 examples of situations in which Eschelon filled orders  
 17 without receiving an FOC beforehand; is that not correct?  
 18 A. That is correct. That is an attachment to --  
 19 it's an exhibit to my testimony which proves our language  
 20 says we are committed to attempt to accept the circuit  
 21 even if Qwest doesn't notify us.  
 22 Q. And if there's an obligation to provide an FOC a  
 23 day in advance, that's not going to make any difference  
 24 with respect to getting orders provisioned in a timely --  
 25 I mean, the FOC -- sorry. Let me clear that up.

Page 344

1 In those situations where Eschelon has gone ahead  
 2 and provisioned absent an FOC, how has Eschelon known that  
 3 it needs to do something?  
 4 A. Well, I think that every situation is different.  
 5 You know, perhaps on those particular days we -- you know,  
 6 the staff scrambled to be able to do that. You know, if  
 7 we don't know Qwest is going to deliver the circuit, then  
 8 we don't prepare internally for that to happen. But if we  
 9 are able to do that, we do, you know, make every effort  
 10 and every attempt to do that.  
 11 Q. Uh-huh.  
 12 A. And I think in response, you know, I believe --  
 13 and if you want to ask it again, you said that -- I think  
 14 you asked me how Qwest can deliver it on the due date if  
 15 they have to send an FOC the day before. And our language  
 16 doesn't require Qwest to send an FOC before they attempt  
 17 to deliver. It only says if Qwest hasn't, that we haven't  
 18 had an opportunity.  
 19 Qwest made it very clear through this CMP process  
 20 as this CR was going on that a Qwest facility jeopardy in  
 21 particular, the due date was in jeopardy. And we actually  
 22 talked a lot in CMP about the train. Should we stop the  
 23 train or do we keep the train going? And that's when they  
 24 looked at all of those Qwest jeopardy codes and determined  
 25 that I want you to ignore these, but the Qwest facility

Page 345

1 jeopardies you have to pay attention to and you have to  
 2 assume that the due date could be missed.  
 3 So Ms. Albersheim yesterday indicated that we  
 4 should still be ready, and that's not what they told us in  
 5 Qwest's CMP.  
 6 Q. Okay. When you -- but you would agree with me,  
 7 wouldn't you, that there are circumstances where Eschelon  
 8 can be ready to accept a circuit even when it has not  
 9 received an FOC?  
 10 A. I think that in the best interest of getting the  
 11 service provisioned, we have scrambled to accept these  
 12 circuits even when it wasn't on the workload, or there may  
 13 have been additional tasks that we needed to complete to  
 14 accept the circuit. My exhibit with the examples of those  
 15 where we didn't get an FOC but we accepted the circuit  
 16 anyway when Qwest contacted us to deliver it is proof  
 17 that, yeah.  
 18 Q. And that's, in fact, what you would want Qwest to  
 19 do is to try and deliver on time if they possibly can?  
 20 A. Yes.  
 21 MR. TOPP: I have no other questions.  
 22 ARBITRATOR RODDA: Okay. I don't have any  
 23 questions. Thank you very much.  
 24 MR. MERZ: Could I just -- maybe one or two  
 25 follow-up.

Page 346

REDIRECT EXAMINATION

1  
 2  
 3 Q. (BY MR. MERZ) If you go to BJJ-5, and I'm  
 4 looking particularly at Page 36. What is -- that's the  
 5 first page of a multipage document; correct?  
 6 A. Yes. It's an ad hoc call that occurred on  
 7 March 4, 2004, regarding jeopardies and this change  
 8 request.  
 9 Q. And the document itself is dated February 25th of  
 10 2004; is that right?  
 11 A. That is correct.  
 12 Q. And who prepared these materials that begin at  
 13 BJJ-5 Page 36?  
 14 A. Qwest prepared these materials, and they provided  
 15 it to CLECs in advance on February 25th, in advance of the  
 16 call that happened on March 4th, as a reference point.  
 17 Q. What was the purpose of the ad hoc call on  
 18 March 4th?  
 19 A. The purpose of the ad hoc call -- one of the  
 20 purposes was to review the examples that Eschelon had  
 21 provided to Qwest where we had a question regarding what  
 22 we believed to be noncompliance of the jeopardy process.  
 23 Q. And are you referring, then, to the examples that  
 24 you find on Page 37 and following?  
 25 A. That is correct.

Page 347

1 Q. And Qwest prepared Page 37 as well?  
 2 A. Yes.  
 3 Q. And Page 38, these are all part of the same  
 4 Qwest-prepared document?  
 5 A. Yes.  
 6 Q. Okay.  
 7 A. And 39, 40, and then also 41, actually, through  
 8 the end because we also -- you know, the red line that  
 9 starts on 41 that I referred to before, it was also a part  
 10 of the discussion that day when we talked about the  
 11 jeopardy codes. So that was a part of it also.  
 12 MR. MERZ: I don't have any further questions.  
 13 Thank you, Ms. Johnson.  
 14 ARBITRATOR RODDA: Thank you.  
 15 Okay. Anything else from Qwest?  
 16 MR. TOPP: No.  
 17 ARBITRATOR RODDA: I suggest we take a short  
 18 break between witnesses, and so 10 minutes or so.  
 19 (A recess was taken from 2:55 p.m. to 3:12 p.m.)  
 20  
 21 DOUGLAS DENNEY,  
 22 called as a witness on behalf of Eschelon, having been  
 23 first duly sworn by the Certified Reporter to speak the  
 24 truth and nothing but the truth, was examined and  
 25 testified as follows:

Page 348

DIRECT EXAMINATION

1  
 2  
 3 Q. (BY MR. MERZ) Good afternoon, Mr. Denney.  
 4 A. Good afternoon.  
 5 Q. Please state your name for the record.  
 6 A. Douglas Denney.  
 7 Q. By whom are you employed?  
 8 A. I'm employed by Eschelon Telecom, Inc.  
 9 Q. Have you prepared testimony that has been filed  
 10 in this case?  
 11 A. Yes, I have.  
 12 Q. And you have direct, rebuttal, and surrebuttal  
 13 testimony; is that right?  
 14 A. Yes.  
 15 Q. Your direct testimony has been marked as Eschelon  
 16 Exhibit 13; is that correct?  
 17 A. Yes.  
 18 Q. And the confidential exhibits to your direct  
 19 testimony have been marked as Eschelon Exhibit 14; is that  
 20 correct?  
 21 A. Yes.  
 22 Q. Your rebuttal testimony has been marked as  
 23 Eschelon Exhibit 15; is that correct?  
 24 A. Yes.  
 25 Q. Your surrebuttal testimony has been marked as

Page 365

1 Change in circumstances?  
 2 A. That would be a change. They're both a change of  
 3 one.  
 4 Q. And what if there were an intervening cost docket  
 5 such that some of the rate elements in the first quote had  
 6 changed. Change in circumstance?  
 7 A. Yes.  
 8 MR. ROSELLI: I have nothing further.  
 9 ARBITRATOR RODDA: But someone does; right?  
 10 MR. ROSELLI: Someone does, right. I'm sorry.  
 11 MR. DEVANEY: I do.  
 12  
 13 CROSS-EXAMINATION  
 14  
 15 Q. (BY MR. DEVANEY) Good afternoon, Mr. Denney.  
 16 A. Good afternoon.  
 17 Q. I have a few areas to touch upon with you. And  
 18 one is an area that you and I have spent a lot of time  
 19 together on, and it's rates.  
 20 You testified in your summary that one of your  
 21 areas that you were addressing is -- I think you said how  
 22 do you establish cost-based rates. Do you recall saying  
 23 something like that at the start of your testimony?  
 24 A. I don't know if I -- I think when I started my  
 25 testimony I said that a big theme of mine is having

Page 366

1 cost-based rates apply to the things that Eschelon is  
 2 purchasing out of this contract.  
 3 Q. Okay.  
 4 A. And there are provisions on establishing --  
 5 there's things about establishing rates for products that  
 6 Qwest doesn't, you know, currently offer, or how interim  
 7 rates apply. There's some provisions in my proposals  
 8 about that as well.  
 9 Q. Okay. Let me just ask you in general. Just sort  
 10 of pull back to the big picture.  
 11 With respect to nonrecurring rates and the method  
 12 for establishing them, tell me if you agree in general  
 13 that one should look at the time needed to perform -- or  
 14 first of all, I guess the activities that go into a  
 15 nonrecurring activity, the time needed to perform the  
 16 activity, the labor costs, the systems costs, are those  
 17 all factors that should be considered in establishing a  
 18 nonrecurring rate?  
 19 A. I mean, I would agree with that with the caveat  
 20 that there's, you know, the assumption that we're looking  
 21 in a -- what we call economic costs or forward-looking  
 22 economic costs. So there's often a dispute within that  
 23 about do we just look at the times that we have right now,  
 24 or should we be looking at what are the efficient times,  
 25 or is it the system -- the embedded systems that we have

Page 367

1 now, or should we be looking at how the efficient systems  
 2 would work.  
 3 Q. Right.  
 4 A. So I agree that you would look at these  
 5 activities, but you need to -- I mean, there is some  
 6 dispute on exactly how those get interpreted within the  
 7 concept of forward-looking economic costs.  
 8 Q. Okay. And I acknowledge that. So you get into  
 9 debates about what technologies to use, what times to use,  
 10 but in general would you agree that the factors that I  
 11 identified are sort of the framework for establishing  
 12 nonrecurring rates?  
 13 A. Well, I mean, I would add, I guess, one more  
 14 thing to that is that -- I mean, rates are either  
 15 explicitly identified or they're implicit, covered in  
 16 other rates. So when we establish nonrecurring rates,  
 17 usually the first thing we look for is are these costs  
 18 that we're trying to recover here already being recovered  
 19 somewhere else, maybe through cost factors or maybe  
 20 through, you know, installation pieces that would go into  
 21 a loop cost.  
 22 Q. But setting aside --  
 23 A. Right. So recognizing that, I mean, I agree the  
 24 things you're talking about for nonrecurring charges are  
 25 areas that you would look at, but not in a vacuum,

Page 368

1 obviously.  
 2 Q. Understood. And for a rate to comply with TELRIC  
 3 and to be cost-based, that is for a nonrecurring rate,  
 4 would you agree that you have to look at those factors  
 5 that you and I just discussed?  
 6 A. Right. The times, the activities that occur, the  
 7 probabilities that would occur around them, labor rates,  
 8 systems, yes.  
 9 Q. In this particular case, there's been discussion  
 10 of the design change rate of \$72 and change which was  
 11 established in the last cost proceeding that you and I  
 12 both participated in.  
 13 Did you analyze that study in that proceeding?  
 14 A. No. I did not.  
 15 Q. Have you ever analyzed that study?  
 16 A. I mean, I have looked at Qwest's design change  
 17 cost studies across some states where I can find them.  
 18 They're similar with minor differences across states. So  
 19 I have looked at that. I have not -- I do not have in my  
 20 possession the Arizona study. I know that we've asked  
 21 Qwest for that and it hasn't been provided.  
 22 Q. But in the cost proceeding you did not -- that  
 23 you participated in in which this study was presented, you  
 24 did not analyze it; correct?  
 25 A. Yeah. I mean, I'm hesitating because at the end

Page 369

1 of these -- I worked for AT&T at the time, and at the end  
 2 of these proceedings there were compliance filings, and I  
 3 probably had my hands in every compliance filing that  
 4 occurred in that docket. So I probably have seen that  
 5 study, but I didn't do an analysis of that study at the  
 6 time.  
 7 Q. Okay.  
 8 A. I didn't testify on that study in that case. I  
 9 testified on the HAI model in that case.  
 10 Q. I remember that. Okay. Now, in your testimony  
 11 related to CFA changes, I'm going to paraphrase a couple  
 12 of criticisms that you level at Qwest with respect to CFA  
 13 changes. And if you disagree with my paraphrasing, go  
 14 ahead and correct me, but I'm just trying to move things  
 15 along.  
 16 A. Okay.  
 17 Q. I think you criticized Qwest for assuming that  
 18 there's more time than -- we assume too much time for the  
 19 lift and lay of the CFA. That is, removing the circuit  
 20 from one connecting facility assignment and then moving it  
 21 to another one. You analogize that to unplugging and  
 22 plugging in a lamp, and you think that we go way beyond  
 23 that; right?  
 24 A. I mean, the design change study includes over an  
 25 hour of time for something that we know -- there's a

Page 370

1 30-minute installation window in these cases. We know  
 2 that Qwest has done these CFA changes multiple times in  
 3 that 30-minute window.  
 4 Q. What design change study are you referring to?  
 5 A. Well, that time there's a design -- there's a  
 6 study in Washington and there's a study in Oregon. And  
 7 both of those studies have over an hour of time involved  
 8 for looking at doing this design change.  
 9 Q. Right. But you haven't seen the study in  
 10 Arizona, or if you have you don't remember what's in it?  
 11 A. Right. Qwest has not provided me with a study in  
 12 Arizona, but their study is the same -- it's essentially  
 13 the same with a few tweaks in minutes across the states.  
 14 And the rate in Arizona is, I mean, it's similar to the  
 15 rate that's been established in other states.  
 16 Q. Are you aware that the design cost study in  
 17 Arizona does not include any technician time?  
 18 A. The design change studies that I have seen, they  
 19 have -- and I have to look at a copy of the study on  
 20 there, but there are these blocks of time for -- they're  
 21 nondescript of what is in that time, but there's a block  
 22 of time for this design change that's like a 35-minute  
 23 period for doing some engineering review, or something  
 24 like that. I don't know what is in that. I don't think  
 25 there's a separate broke out tech time, technician time

Page 371

1 listed in those studies. They're very nondescript, I  
 2 would say.  
 3 Q. Were you here yesterday when Ms. Million  
 4 testified about Qwest design studies?  
 5 A. Yes, I was.  
 6 Q. Did you hear her say that no technician time is  
 7 included in that study?  
 8 A. I heard her say that, but I don't think you can  
 9 tell that from the study. Their testimony in that case is  
 10 not clear. There isn't a separate line item for  
 11 technician time. There I agree with that, but there's a  
 12 block of time, over an hour of time in these studies for  
 13 processing this design change. And it's fairly -- for the  
 14 bulk of that time, it's fairly nondescript as to what is  
 15 happening during that time.  
 16 Q. Are you disagreeing with Ms. Million's sworn  
 17 testimony that there's no technician time included in  
 18 Qwest's cost study?  
 19 A. I'm saying you can't tell from looking at that  
 20 study. There's no descriptions in the case. You know,  
 21 there's no descriptions of what is exactly in there in  
 22 that study.  
 23 Q. And when you say that study, what study are you  
 24 referring to?  
 25 A. The design change study that Qwest has filed in

Page 372

1 multiple states across the region.  
 2 Q. When did they file that study?  
 3 A. Let's see. In Arizona it was filed as part of  
 4 the compliance -- I mean, the Washington study was filed  
 5 as part of the compliance filing, and that docket was  
 6 probably around the 2003, 2004 time frame.  
 7 Q. Okay.  
 8 A. There was a study in Oregon that Qwest had  
 9 provided maybe around 2002.  
 10 Q. Okay. And the Arizona docket in which the study  
 11 was filed was 2000; correct?  
 12 A. Right. Well, the Washington was the compliance,  
 13 so it probably started around that same time.  
 14 Q. With respect to issues 9-50 and 9-53, subloop and  
 15 UCCRE, U-C-C-R-E, all caps, am I correct that Eschelon has  
 16 never ordered either of those services from Qwest?  
 17 A. Right. That's correct. Eschelon has not ordered  
 18 those. These are things that are in the Qwest SGAT as  
 19 offerings, and Eschelon is opposed to them being just  
 20 removed on a wholesale basis from Eschelon.  
 21 Q. And am I correct to understand that Eschelon has  
 22 no current expectation of needing that in the near term,  
 23 either service?  
 24 A. That I can't answer. I mean, the use for these  
 25 change -- you know, can change every day. So I don't know

Page 373

1 of plans to order that, but I can't say. I'm not in that  
 2 group of people who does that.  
 3 Q. Are you aware of any CLEC who has ever ordered  
 4 either the subloop service of UCCRE service?  
 5 A. No. I'm not aware. What I am aware is that Cox  
 6 made a filing here recently in Arizona that asked for the  
 7 subloop cross-connect rates to be established for all of  
 8 those rates, including the ones that Qwest -- they are  
 9 interim rates right now -- asked for permanent rates to be  
 10 set in Phase III.  
 11 Q. Are you familiar with what led to that filing and  
 12 whether Cox has any intention of actually using that  
 13 service?  
 14 A. No. I do know that Cox asked for those rates to  
 15 be established. I have the filing. I haven't talked to  
 16 people at Cox, but I do know that they asked for rates for  
 17 these particular elements we're talking about for which  
 18 Qwest had testified that there's no evidence that there  
 19 will be any demand in the future. Cox asked for these  
 20 rates to be established.  
 21 Q. Are you aware of any past dispute between Cox and  
 22 Qwest that's being litigated now that might affect Cox's  
 23 request that was set forth in that brief?  
 24 A. No, I'm not.  
 25 Q. Could you please take a look at the proposed

Page 374

1 language of Eschelon's for both 9-50 and 9-53, in  
 2 particular Section 1.73.  
 3 ARBITRATOR RODDA: Are you looking at the joint  
 4 matrix?  
 5 MR. DEVANEY: Yes.  
 6 ARBITRATOR RODDA: Do you have a page number?  
 7 MR. DEVANEY: I do. Page 58.  
 8 ARBITRATOR RODDA: Thank you.  
 9 Q. (BY MR. DEVANEY) And under Eschelon's proposed  
 10 Section 9.3.3.8.3.1, it says: If Qwest performs or offers  
 11 to perform the cross-connect for any other CLEC during the  
 12 term of this agreement, Qwest will notify CLEC and offer  
 13 CLEC an amendment to this agreement that allows CLEC, at  
 14 its option, to request that Qwest run the jumper for  
 15 intrabuilding cable in MTEs on nondiscriminatory terms and  
 16 conditions.  
 17 Do I read this correctly that if Qwest performs  
 18 even just one cross-connect for another CLEC, that would  
 19 trigger a right for Eschelon to enter into an amendment to  
 20 the interconnection agreement?  
 21 A. I'm sorry. Because I'm going to -- I turned to  
 22 the Exhibit A at 1.7.3, and I know you read from 9. --  
 23 which is proposal No. 1 related to this issue. So I  
 24 wasn't in the right place when you were reading. So let  
 25 me -- I think I have that in the testimony, so let me find

Page 375

1 that issue.  
 2 Now what was your question?  
 3 Q. My question is let's assume hypothetically that a  
 4 CLEC comes to Qwest in an emergency and says, well, I need  
 5 you to form a cross-connect, just one cross-connect for  
 6 us. Can you do it? Qwest does it.  
 7 Is that going to trigger under your proposal,  
 8 that single incident, Qwest having to offer an amendment  
 9 to the interconnection agreement to Eschelon?  
 10 A. Well, to -- I mean, the language --  
 11 Q. If you can answer that, and then give whatever  
 12 explanation you have.  
 13 A. Yes, I think it would, but I think the language  
 14 says if Qwest performs or offers to perform. And right  
 15 now -- I mean, in my view Qwest is offering to perform  
 16 because they -- this is in their SGAT. It's out there in  
 17 other companies' contracts. So I believe that Qwest  
 18 should offer an amendment to Eschelon.  
 19 This was Eschelon's first proposal on this issue  
 20 because we said we didn't have an immediate plan to buy  
 21 this, so we won't put it in the contract right now. But  
 22 as long as you're offering to perform this for other  
 23 CLECs, then we should have the right, if we decide to use  
 24 it, to add an amendment to our contract in order to  
 25 utilize that product. So that's the intent here of this

Page 376

1 language.  
 2 Q. If Qwest has no demand for a product, no legal  
 3 obligation to provide it, no one is ordering it, do you  
 4 think Qwest ought to have the right to stop offering the  
 5 product?  
 6 A. Not necessarily. I think there's been  
 7 products -- there's been products in the past where demand  
 8 didn't exist immediately for that product. I think  
 9 there's an analysis that needs to be undertaken. I think  
 10 it's possible with this issue that if there is no interest  
 11 in this, no CLECs would object and Qwest could ask the  
 12 Commission and say, look, we've asked you to have rates  
 13 for this in the past. We would ask you not to have rates  
 14 for that in the future. And that's kind of our alternate  
 15 proposals here for this section.  
 16 So it would set up a process by which Qwest could  
 17 reasonably remove this from other CLECs. If no one was  
 18 interested, no one would object to having this removed  
 19 from the contracts. But if there's an interest and the  
 20 Commission has either proposed rates or indicated it  
 21 planned on proposing rates, and Qwest has put forth TELRIC  
 22 rate offers for this product, then I think Qwest should  
 23 offer that product until such time that the Commission has  
 24 made another determination.  
 25 Q. Do you know how many years Qwest has been

Page 381

1 apply that rate to multiple terminations within a central  
2 office; correct?  
3 A. I mean, if the rate is developed appropriately,  
4 then that's correct, and the rate is developed and  
5 approved. It's the application that you're changing here.  
6 Q. I understand. That's helpful. Thank you.  
7 Now I want to ask you some questions about issue  
8 9-58, commingled arrangements.  
9 A. Okay.  
10 Q. And one of Eschelon's requests with respect to  
11 commingled arrangements is that the same circuit ID, a  
12 single circuit ID be used for the UNE component of a  
13 commingled EEL and the tariff component of a commingled  
14 EEL; is that correct?  
15 A. That is one of the proposals. That's correct.  
16 Q. Okay.  
17 A. There are some alternatives that we've offered up  
18 to Qwest where that wouldn't have to be the case, but that  
19 is -- one of the proposals, the main proposal, is that the  
20 circuit ID should be the same as it is for an all-UNE EEL.  
21 Q. Okay. Is it your understanding that circuit IDs  
22 contain product specific information in them that are  
23 recognized by the systems, the provisioning and billing  
24 systems of ILECs like Qwest?  
25 A. I believe there's maybe a letter code that may --

Page 382

1 I'm not -- product specific information such as -- there  
2 is some of that information in there. I'm not sure  
3 exactly what your --  
4 Q. Well, here's what I'm getting at. Is it your  
5 understanding that Qwest and other ILECs provision UNEs  
6 out of one provisioning inventory database and bill UNEs  
7 out of one database, and by contrast provision and bill  
8 tariffed services out of other databases?  
9 A. Not entirely, because I believe the facilities  
10 and things are all in -- all in TIRKS, I believe, for both  
11 UNEs and special access facilities. And so we're talking  
12 about the same physical facilities. You may have a  
13 different -- it may go somewhere after that point, but the  
14 facility is the same for both of these. We're not talking  
15 about a set of special access inventory and a set of UNE  
16 inventory.  
17 Q. But for provisioning purposes, Qwest and other  
18 ILECs have different provisioning and billing systems for  
19 UNEs on the one hand and tariffed services on the other;  
20 isn't that correct?  
21 A. To some degree I think there's some crossover on,  
22 you know, some of these systems. For example, like, I  
23 think, UDITs are, you know, unbundled transports ordered  
24 via ASRs, you know, even though they're local service  
25 things. So I'm not sure there's a hard and fast rule in

Page 383

1 that regard.  
2 Q. But as a general rule, isn't it true that  
3 tariffed services are provisioned and billed out of  
4 databases separate from UNE provisioning and billing  
5 databases?  
6 A. I think that's been Qwest's practice. And I have  
7 pointed out there's been disputes going back in the first  
8 arbitration whether Qwest should even create these  
9 separate billings systems for these.  
10 Q. And part of the function of the circuit ID is  
11 when Qwest gets an order, it sees the circuit ID and it  
12 knows which system to send it to; correct? So it can be  
13 provisioned and billed.  
14 A. I mean, I don't know if I agree with that  
15 entirely. I mean, for billing the rates are what they  
16 are.  
17 Q. Well, the bills have to be generated  
18 electronically, don't they?  
19 A. Right.  
20 Q. And they have to be sent to a billing system, and  
21 to be sent to the correct system you have to have the  
22 right circuit ID; correct? To generate the right bill?  
23 A. I think you have to have the right rates  
24 associated with the circuit that's being purchased in  
25 order to bill the right bill. And how -- the system that

Page 384

1 you choose to bill that on is Qwest's -- in my view,  
2 that's Qwest's choice of how they choose to bill that.  
3 But the fact is that you just have to have the underlying  
4 rates right for the right facilities.  
5 Q. Okay. Well, have you looked into what it would  
6 cost -- first of all, have you looked into whether it's  
7 technically feasible for Qwest to begin using the same  
8 circuit ID for the UNE piece and the tariff piece as  
9 opposed to the UNE and UNE? Have you looked into whether  
10 that's technically feasible?  
11 A. I mean, I have looked into it to the extent that  
12 Qwest does it today for UNE to UNE. They do it for  
13 special access to special access. They have done changes  
14 in the past where things have moved from special access to  
15 UNE without changing circuit IDs, and they managed to do  
16 those, so I believe it's technically feasible. I haven't  
17 done anything beyond that.  
18 Q. Okay. Have you analyzed -- if you think it is  
19 technically feasible, have you done any analysis of what  
20 the cost would be to begin using the single circuit IDs  
21 for UNE services on the one hand and tariffed services on  
22 the other?  
23 A. I don't think the cost would be anything, because  
24 Qwest has single circuit IDs for these end-to-end circuits  
25 today. They do UNE loop and UNE transport on a single

Page 385

1 circuit ID.  
2 Q. But you're failing to discern my distinction.  
3 That's UNE to UNE. But we're talking about two different  
4 provisioning systems, UNE on the one hand and tariffed on  
5 the other.  
6 In that circumstance, have you analyzed what it  
7 would cost to use the same circuit ID to process orders  
8 and to provision orders?  
9 A. And I have already said that it's my opinion that  
10 there should not be a technical problem to doing that, so  
11 I don't see where there would be any cost, because you  
12 already are able to do that -- they are already able to do  
13 that today.  
14 Q. Have you studied that? Have you done any cost  
15 analysis at all?  
16 A. No, not other from what I have described to know  
17 that Qwest is able to do that today with the circuits.  
18 Q. If there is a cost, is that something that  
19 Eschelon is willing to compensate Qwest for?  
20 A. I mean, there's a process if there's a cost for  
21 Qwest to go to --  
22 Q. If Qwest has to engage some outside firm to, you  
23 know, spend millions of dollars perhaps to begin using  
24 single circuit ID for these orders, if that's technically  
25 feasible, is Eschelon willing to compensate Qwest for

Page 386

1 whatever that cost is?  
2 A. I mean, Eschelon is not going to write a blank  
3 check to Qwest. In my experience, whenever Qwest doesn't  
4 want to do something, it's very expensive for them to do.  
5 So I'm not going to say Eschelon is going to write Qwest a  
6 blank check. There are processes set up for Qwest to  
7 collect rates when they believe --  
8 Q. We don't have to agree on the amount. But in  
9 principle you have made this demand on us to have a single  
10 circuit ID. Are you willing to pay for it? That's my  
11 question.  
12 A. I mean, Eschelon's -- Eschelon is willing to pay  
13 cost-based rates that are ordered by a commission's  
14 forward-looking economic costs. So to the extent that  
15 Qwest, you know, develops cost-based rates, if there are  
16 any additional costs for having to do this and there are  
17 cost-based rates associated with that, then Eschelon would  
18 abide by Commission orders and pay those rates.  
19 Q. Okay. Part of your proposal here with commingled  
20 arrangements is not just the single circuit ID, but also  
21 that Qwest change its processes and systems to have a  
22 single billing account number, a single circuit ID, to use  
23 just one form of service order form, the LSR you want  
24 used, not just the --  
25 A. Any form. We're not stuck to the LSR. A single

Page 387

1 order.  
2 Q. Okay. So let's -- you obviously won't agree with  
3 me on this, but let's assume that it costs a lot of money  
4 to make all of those systems and provisioning changes.  
5 Would you be willing to insert language into this  
6 contract that says Eschelon is making these requests, and  
7 Eschelon will be willing to pay a reasonable, forward-  
8 looking cost for whatever changes -- whatever costs are  
9 incurred with these changes? Is that something that you  
10 would be willing to do?  
11 A. Is that a Qwest language proposal offer that I  
12 should be taking back to our negotiations team?  
13 Q. I'm asking you today. Are you willing to agree  
14 to pay the costs of those systems changes?  
15 A. I'm not willing to agree to that today. But if  
16 Qwest has specific language that it is proposing in the  
17 contract, then that would go back to our negotiations team  
18 to look at. But I wouldn't agree to that today, because  
19 that's like writing a blank check by saying we're just  
20 going to agree to pay Qwest with something that you're  
21 going to -- I don't --  
22 Q. I'm not talking about amounts but in principle.  
23 Is Eschelon willing to pay for the costs of the changes  
24 that it's demanding Qwest make to its systems?  
25 A. No, because I don't think you need -- we don't

Page 388

1 believe you need to make the changes you're making. We've  
2 had a lot of discussion on this in negotiation, and we  
3 don't believe Qwest has provided, you know, reasonable  
4 evidence that it needs to make all of these changes.  
5 We don't understand why this isn't just a billing  
6 change or taking something that was a UNE, that wasn't a  
7 UNE, that is no longer a UNE, why it's not just a rate  
8 change.  
9 Q. So the answer is, no, you're not willing to pay?  
10 A. That's right.  
11 MR. DEVANEY: Thank you.  
12 Your Honor, would it be possible to take just a  
13 three or four-minute break? There's an exhibit that was  
14 introduced yesterday that I don't have with me that I  
15 would like to get from the court reporter and ask a few  
16 questions about.  
17 ARBITRATOR RODDA: Certainly.  
18 (A recess was taken from 4:04 p.m. to 4:14 p.m.)  
19 ARBITRATOR RODDA: Let's go back on the record  
20 then. I think we found the exhibit.  
21 MR. DEVANEY: We did. Thank you for that break.  
22 Q. (BY MR. DEVANEY) Mr. Denney, could you please  
23 look, and maybe you have it, DD-23?  
24 A. Right. And I thought you said the Cox exhibit,  
25 not the cost exhibit. That's why I didn't think I had it

**BEFORE THE PUBLIC UTILITY COMMISSION OF OREGON**

**In the Matter of the Petition of Eschelon                    )**  
**Telecom of Oregon, Inc. for Arbitration with            )** **Docket No. ARB 775**  
**Qwest Corporation, Pursuant to 47 U.S.C.                )**  
**Section 252 of the Federal                                    )**  
**Telecommunications Act of 1996                            )**

---

**EXHIBIT 8**

**DC Power Measuring Amendment  
to the Interconnection Agreement between  
Qwest Corporation and**

**for the State of \_\_\_\_\_**

This is an Amendment ("Amendment") for DC Power Measuring to the Interconnection Agreement between Qwest Corporation ("Qwest"), a Colorado corporation, and \_\_\_\_\_ ("CLEC"). CLEC and Qwest shall be known jointly as the "Parties".

**RECITALS**

WHEREAS, CLEC and Qwest entered into an Interconnection Agreement ("Agreement") for service in the state of \_\_\_\_\_ which was approved by the \_\_\_\_\_ Commission ("Commission"); and

WHEREAS, the Parties wish to amend the Agreement further under the terms and conditions contained herein.

**AGREEMENT**

NOW THEREFORE, in consideration of the mutual terms, covenants and conditions contained in this Amendment and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

**Amendment Terms**

The Agreement is hereby amended by adding terms, conditions and rates for DC Power Measuring as set forth in Attachment 1 and Exhibit A to this Amendment, attached hereto and incorporated herein by this reference.

Rates in Exhibit A will reflect legally binding decisions of the Commission and shall be applied on a prospective basis from the effective date of the legally binding Commission decision, unless otherwise ordered by the Commission.

**Effective Date**

This Amendment shall be deemed effective upon approval by the Commission; however, the Parties may agree to implement the provisions of this Amendment upon execution. To accommodate this need, CLEC must generate, if necessary, an updated Customer Questionnaire. In addition to the Questionnaire, all system updates will need to be completed by Qwest. CLEC will be notified when all system changes have been made. Actual order processing may begin once these requirements have been met.

**Further Amendments**

Amendments; Waivers. The provisions of this Agreement, including the provisions of this sentence, may not be amended, modified or supplemented, and waivers or consents to departures from the provisions of this Agreement may not be given without the written consent thereto by both Parties' authorized representative. No waiver by any party of any default, misrepresentation, or breach of warranty or covenant hereunder, whether intentional or not, will be deemed to extend to any prior or subsequent default, misrepresentation, or breach of

warranty or covenant hereunder or affect in any way any rights arising by virtue of any prior or subsequent such occurrence.

**Entire Agreement.**

This Agreement (including the documents referred to herein) constitutes the full and entire understanding and agreement between the parties with regard to the subjects of this Agreement and supersedes any prior understandings, agreements, or representations by or between the parties, written or oral, to the extent they relate in any way to the subjects of this Agreement.

## **ATTACHMENT 1**

### **1. Monitoring**

**1.1** CLEC orders DC power in increments of twenty (20) amps whenever possible. If CLEC orders an increment larger than sixty (60) amps, engineering practice normally terminates such feed on a power board. IF CLEC orders an increment smaller than or equal to sixty (60) amps, the terminations will normally appear on a Battery Distribution Fuse Board (BDFB).

**1.2** If CLEC orders sixty (60) amps or less, it will normally be placed on a BDFB where no monitoring will occur since the power usage rate reflects a discount from the rates for those feeds greater than sixty (60) amps. If CLEC orders more than sixty (60) amps of power, it normally will be placed on the power board. Qwest will monitor usage at the power board on a semi-annual basis. However, Qwest also agrees to take a reading within thirty (30) Days of a written CLEC request, after CLEC's installation of new equipment. Qwest will perform a maximum of four (4) readings per year on a particular collocation site. Based on these readings, if CLEC is utilizing less than the ordered amount of power, Qwest will reduce the monthly usage rate to CLEC's actual use. If CLEC is utilizing more than the ordered amount, Qwest will increase the monthly usage rate to the CLEC's actual use. Until such time that CLEC places equipment and a request is received from CLEC to monitor, Qwest will bill CLEC based on the amount of power ordered. Once Qwest receives a CLEC monitoring request, it will bill the actual power usage rate from the date of the CLEC's monitoring request until the next reading. The next reading date may be generated as a result of the CLEC request or a Qwest routine reading and Billing will be adjusted on whichever date comes first.

### **2.0 Rate Elements - All Collocation**

**2.1** -48 Volt DC Power Usage and AC Usage Charges. Provide -48 volt DC power to CLEC collocated equipment and is fused at one hundred twenty-five percent (125%) of request. The DC Power Usage Charge is for the capacity of the power plant available for CLEC's use. The AC Usage Charge is for the power used by CLEC. Both the DC Power Usage Charge and the AC Usage Charge are applied on a per ampere basis.

**2.2** The -48 Volt DC Power Usage Charge is specified in Exhibit A and applies to the quantity of -48 Volt Capacity specified by the CLEC in its order.

**2.2.1** -48Volt DC Power Usage Charge – Applies on a per amp basis to all orders of greater than sixty (60) amps. Qwest will initially apply the -48 Volt DC Power Usage Charge from Exhibit A to the quantity of power ordered by CLEC. Qwest will determine the actual usage at the power board as described in Section 1.2 There is a one (1) amp minimum charge for -48 Volt DC Power Usage.

**2.3** CLEC rates for Collocation must be included in the CLEC existing Interconnection Agreement with Qwest prior to amending with DC Power Monitoring Amendment.

    SUBJECT MATTER NO. 23. DIFFERENT UNE COMBINATIONS .....165

*Issue Nos. 9-54 and 9-54(a): ICA Sections 9.23.2 (1 of 2 issues) and 9.23.5.1.3*..... 165

    SUBJECT MATTER NO. 25. SERVICE ELIGIBILITY CRITERIA.....166

*Issue Nos. 9-56 and 9-56(a): ICA Sections 9.23.4.3.1.1 and 9.23.4.3.1.1.1*..... 166

    SUBJECT MATTER NO. 26. COMMINGLED EELS/ARRANGEMENTS .....169

*Issue No. 9-58: ICA Sections 9.23.4.5.1, 9.23.4.5.1.1; 9.23.4.5.4 - Ordering, Billing, and Circuit ID for Commingled Arrangements – ORDERING*..... 184

*Issue No. 9-58 (a): ICA Sections - 9.23.4.5.4 - Ordering, Billing, and Circuit ID for Commingled Arrangements – CIRCUIT ID [2 of 2 issues in ICA Section 9.23.4.5.4; For 1st issue (terminology), see Issue No. 9-58 above]* ..... 186

*Issue No. 9-58 (b): ICA Sections - 9.23.4.6.6 (and subparts), Ordering, Billing, and Circuit ID for Commingled Arrangements – BILLING*..... 189

*Issue No. 9-58 (c): ICA Sections - 9.23.4.6.6 (and subparts) Ordering, Billing, and Circuit ID for Commingled Arrangements – BILLING - (Alternate proposal to 9.23.4.6.6)* ..... 190

*Issue No. 9-58 (d): ICA Section 9.1.1.1.1 & 9.1.1.1.2 Ordering, Billing, and Circuit ID for Commingled Arrangements – OTHER ARRANGEMENTS* ..... 191

	<i>Issue No. 9-58(e) - ICA Sections 9.23.4.4.3.1 &amp; 24.3.2; 9.1.1.1.1 &amp; 9.1.1.1.1 INTERVAL for Commingled Arrangements</i> .....	192
	<i>Issue No. 9-59 (alternate): ICA Sections 9.23.4.7 and subparts Ordering, Billing, and Circuit ID for Commingled Arrangements– CIRCUIT ID - (Alternate proposal to 9.23.4.5.4)</i> .....	195
	SUBJECT MATTER NO. 28. MICRODUCT RATE .....	200
	<i>Issue No. 10-63: ICA Section 10.8.2.29</i> .....	200
VIII.	EXPEDITED ORDERS .....	200
	SUBJECT MATTER NO. 31. EXPEDITED ORDERS .....	200
	<i>Issues Nos. 12-67 and 12-67(a)-(g)</i> .....	200
IX.	RATES FOR SERVICES, UNAPPROVED RATES AND INTERCONNECTION ENTRANCE FACILITIES (SUBJECT MATTER NOS. 44, 45 AND 46) .....	241
	SUBJECT MATTER NO. 44. RATES FOR SERVICES .....	241
	<i>Issues 22-88, 22-88(a) and 22-89: ICA Sections 22.1.1 and 22.4.1.3, and Exhibit A, Section 7.11</i> .....	241
	SUBJECT MATTER NO. 45. UNAPPROVED RATES .....	254
	<i>Issue No. 22-90 and Subparts (a)-(ae): ICA Sections 22.6, 22.6.1, 22.4.1.1 and Exhibit A Sections 8.1.1.2, 8.1.2.2, 8.1.2.3, 8.1.2.4, 8.1.5 and subparts, 8.1.8 and subparts, 8.1.9.2, 8.1.12, 8.1.14, 8.1.16, 8.2.1.1, 8.3.1.1, 8.4.1.1, 8.15.4.1, 8.15.4.2, 8.4.2.4.1, 8.4.2.4.2, 8.4.2.4.3, 8.4.2.4.4, 8.15.1.2.2, 8.6.1.2, 8.6.1.3.1, 8.6.2.2.2, 8.6.2.2.3.1, 8.6.2.2.3.2, 8.7.2.1, 8.7.2.2, 8.7.2.3, 8.7.3.1, 8.7.3.2, 8.7.3.3, 8.7.4, 8.8 and subparts, 8.12 and subparts, 8.13 and subparts, 8.15.2 and subparts, 8.16 and subparts, 8.17.1, 8.17.2, 9.2.5.5.1.2, 9.2.5.5.2.2, 9.2.6.5.1.2, 9.2.6.5.2.2, 9.2.8, 9.3.3.1.1, 9.3.3.2, 9.3.3.3 and subparts, 9.3.3.4 and subparts, 9.6.11 and subparts, 9.6.12, 9.7 and subparts, 9.20 and subparts, 9.23.7, 9.23.7.11.1, 9.23.7.11.2 and subparts, 10.7.12, and 10.7.12.1</i> .....	254
	SUBJECT MATTER NO. 46. INTERCONNECTION ENTRANCE FACILITY .....	288
	<i>Issue No. 24-92: Section 24.1.2.2</i> .....	288
X.	CONCLUSION .....	288

1 **I. INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 A. My name is Douglas Denney. I work at 730 2<sup>nd</sup> Avenue South, Suite 900, in  
4 Minneapolis, Minnesota.

5 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

6 A. I am employed by Eschelon Telecom, Inc., as Director of Costs and Policy. My  
7 responsibilities include negotiating interconnection agreements, monitoring,  
8 reviewing and analyzing the wholesale costs Eschelon pays to carriers such as  
9 Qwest, and representing Eschelon on regulatory issues.

10 **Q. PLEASE DESCRIBE ESCHELON'S HISTORY AND BUSINESS.**

11 A. Eschelon Telecom, Inc. was founded in 1996 and owes its existence to the 1996  
12 Telecommunications Act. The Act allowed companies to enter the local exchange  
13 service market and compete with the incumbent monopoly.

14 Originally named Advanced Telecommunications, Inc., Eschelon is headquartered  
15 in Minneapolis and serves small and medium business customers in Arizona,  
16 California, Colorado, Minnesota, Oregon, Nevada, Utah and Washington.  
17 Eschelon provides telecommunications services, internet access, and business  
18 telephone systems to over 66,000 customers region wide using over 600,000  
19 access lines. In Oregon, Eschelon serves over 18,000 customers with over  
20 140,000 access lines. Eschelon provides its services and products individually or

1 in customized packages to serve customers with a fully-outsourced voice and data  
2 network solution.

3 Eschelon's voice and data traffic is switched through its six Nortel DMS 500  
4 voice switches, six Lucent 5ESS voice switches, six Cisco BPX data switches and  
5 seven Nortel Passport ATM switches. Eschelon's investment in facilities also  
6 includes building collocations in over 180 ILEC central offices, 39 of which are in  
7 Oregon. Eschelon accesses its end user customers via "last mile" facilities or  
8 UNE loops purchased from Qwest, AT&T, or Verizon.

9 Eschelon's growth has been achieved through a combination of its own direct  
10 sales force of over 200 employees and through acquisitions of other companies  
11 also focused on serving small and medium business customers. In April, 2006  
12 Eschelon acquired Oregon Telecom, Inc. Most recently on October 2, 2006  
13 Eschelon completed the acquisition of OneEighty Communications, a CLEC  
14 based in Billings, Montana,<sup>1</sup> and on November 1, 2006 Eschelon completed its  
15 acquisition of Mountain Communications, Inc., a CLEC based in Tempe,  
16 Arizona.<sup>2</sup>

17 In 2005, Eschelon was the first CLEC in the five years since the telecom bust of  
18 2000 to complete an Initial Public Offering of its common stock. Eschelon's  
19 bonds are also publicly traded.

1 On March 20, 2007 Eschelon signed a definitive agreement to be acquired by  
2 Portland, Oregon-based Integra Telecom, Inc.<sup>3</sup> The transaction is subject  
3 regulatory approvals and the approval of Eschelon's shareholders.

4 **Q. PLEASE DESCRIBE YOUR EDUCATION AND PROFESSIONAL**  
5 **BACKGROUND.**

6 A. I received a B.S. degree in Business Management from Phillips University in  
7 1988. I spent three years doing graduate work at the University of Arizona in  
8 Economics, and then I transferred to Oregon State University where I have  
9 completed all the requirements for a Ph.D. except my dissertation. My field of  
10 study was Industrial Organization, and I focused on cost models and the  
11 measurement of market power. I taught a variety of economics courses at the  
12 University of Arizona and Oregon State University. I was hired by AT&T in  
13 December 1996 and spent most of my time with AT&T analyzing cost models. In  
14 December 2004, I was hired by Eschelon Telecom, Inc., where I am presently  
15 employed.

16 I have participated in over 30 proceedings in the 14-state Qwest region. Much of  
17 my prior testimony involved cost models — including the HAI Model, BCPM,  
18 GTE's ICM, U S WEST's UNE cost models, and the FCC's Synthesis Model. I  
19 have also testified about issues relating to the wholesale cost of local service —  
20 including universal service funding, unbundled network element pricing,

<sup>3</sup> See

[http://investors.eschelon.com/phoenix.zhtml?c=121503&p=irol-newsArticle&ID=975597&highlight=.](http://investors.eschelon.com/phoenix.zhtml?c=121503&p=irol-newsArticle&ID=975597&highlight=)

1 geographic de-averaging, and competitive local exchange carrier access rates. In  
2 addition to the Eschelon / Qwest arbitrations,<sup>4</sup> most recently I have filed  
3 testimony regarding Qwest's "non-impaired" wire center lists and related issues in  
4 dockets in Utah, Oregon, Colorado, Minnesota and Arizona.

5 **Q. HAVE YOU PREVIOUSLY TESTIFIED IN OREGON?**

6 A. Yes, I have participated in numerous dockets in Oregon. When with AT&T, I  
7 testified in multiple phases of docket UM 731 regarding universal service, UT  
8 148 regarding Qwest's unbundled loop rate, and UT 138/139 regarding the  
9 mapping of building blocks to Unbundled Network Elements. I also participated  
10 in numerous workshops regarding Qwest's unbundled network element rates as  
11 part of UM 1025 and filed testimony in UM 1100, the original Triennial Review  
12 Order ("TRO") docket, which was stopped after the D.C. Circuit Court remanded  
13 parts of the TRO to the FCC. While with Eschelon I have participated in two  
14 Oregon dockets, besides this docket – (1) UX 29 regarding Qwest's petition for  
15 deregulation of business services and, (2) UM 1251 regarding Commission  
16 approval of Qwest's non-impaired wire center list.

17 **Q. PLEASE DESCRIBE HOW YOUR TESTIMONY IS ORGANIZED.**

---

<sup>4</sup> The docket numbers for the Qwest-Eschelon ICA arbitrations are, for Arizona, T-03406A-06-0572; T-01051B-06-0572 ("Arizona arbitration"); for Colorado, 06B-497T ("Colorado arbitration"); for Minnesota, P-5340, 421/IC-06-768 ("Minnesota arbitration"); for Oregon, ARB 775 ("Oregon arbitration"); for Utah, 07-2263-03; petition filed but no testimony yet ("Utah arbitration"); and for Washington, UT-063061 ("Washington arbitration"). Transcript ("Tr.") pages from the arbitration hearings in Minnesota are included as Eschelon/6 and in Arizona as Eschelon/7 to the testimony of Mr. Starkey.

1 A. My testimony is organized by subject matter number.<sup>5</sup> Each subject matter  
2 heading may contain one or more disputed issues from the interconnection  
3 agreement. For each subject matter, I explain Eschelon's business need relating  
4 to this issue. In addition, I contrast Eschelon's proposed language with Qwest's  
5 language and explain why Eschelon's language is more reasonable and  
6 appropriate. I also explain the flaws in Qwest's proposal. For issues that have  
7 closed since Eschelon filed its Petition for Arbitration in this case, I provide the  
8 closed language.

9 **Q. ARE THERE ANY EXHIBITS TO YOUR TESTIMONY?**

10 A. Yes. Eschelon/10 through Eschelon/42 are exhibits associated with my  
11 testimony. These exhibits are described below:

12 **Eschelon/10:** Qwest's September 1, 2005 notice to Eschelon indicating  
13 that Qwest would begin to apply Design Change charges to unbundled  
14 loops. This exhibit is related to Subject Matter No. 4.

15 **Escehlon/11:** Eschelon's escalation of Qwest's proposal to  
16 inappropriately apply the Design Change charge to unbundled loops  
17 ("PROS.09.01.05F.03204.Design\_Chgs\_Unbundld\_Loop"). This exhibit  
18 is related to Subject Matter No. 4.

19 **Eschelon/12:** (Confidential) Chronology of Qwest's threat to disconnect  
20 Eschelon's UNE circuits and stop processing Eschelon orders. This  
21 exhibit is related to Payment and Deposit provisions contained in Subject  
22 Matter Nos. 5, 6 and 7 and helps demonstrate why Qwest should not have  
23 unilateral authority to require deposits, disconnect Eschelon's circuits, or  
24 to stop processing Eschelon's orders.

25 **Eschelon/13:** (Confidential) A exchange of emails between Eschelon and  
26 Qwest showing that Qwest's past due records are not always accurate.

---

<sup>5</sup> The subject matter numbers correspond to those in the Issues by Subject Matter List that is attached to the testimony of Mr. Starkey as Eschelon/3.

1           **Eschelon/14:** Email exchange showing that Qwest threatens to disconnect  
2           Eschelon’s circuits and stop processing Eschelon’s orders even when  
3           Eschelon has already paid the bill Qwest claims is delinquent.

4           **Eschelon/15:** (Confidential) An exchange of emails between Eschelon and  
5           Qwest demonstrating that Qwest incorrectly classified amounts as past  
6           due.

7           **Eschelon/16:** (Confidential) An email from Qwest showing that  
8           sometimes Eschelon’s payment disputes fall into the “black hole.”

9           **Eschelon/17:** (Confidential) An email exchange showing that Qwest  
10          sometimes applies payments to incorrect accounts causing accounts to  
11          appear past due when they are not.

12          **Eschelon/18:** (Confidential) Eschelon email to Qwest demonstrating that  
13          Qwest does not always follow its own process and does not properly send  
14          notification to appropriate Eschelon personnel, creating unnecessary  
15          disputes regarding balances.

16          **Eschelon/19:** A copy of the Qwest bill dispute resolution PCAT.

17          **Eschelon/20:** An email from Eschelon to Qwest making clear to Qwest  
18          that Eschelon does not agree to the bill dispute resolution process  
19          developed over Eschelon’s objections in CMP and that, consistent with the  
20          CMP document, Eschelon’s contract will govern billing disputes.

21          **Eschelon/21:** (Confidential) A calculation of the discrepancies between  
22          Qwest and Eschelon in the amount of disputed payments.

23          **Eschelon/22:** “Three Consecutive Months” standard. This exhibit is  
24          related to Payment and Deposit provisions contained in Subject Matter  
25          Nos. 5, 6 and 7. It contains pages of various carriers’ ICAs/service  
26          agreements with Qwest showing that Qwest has agreed to the three  
27          consecutive month standard with numerous CLECs, CMRS providers and  
28          paging companies.

29          **Eschelon/23:** Excerpts from Commission Order 98-444 and Commission  
30          Order 03-085 regarding non-recurring costs in docket UT 138/UT 139.

31          **Eschelon/24:** Section 9.3.3.8.3 from the 11/28/05 Multistate ICA draft.

32          **Eschelon/25:** A description of support for Eschelon’s UNE rate proposals  
33          for UNE rates that have not been approved by the Commission.

1           **Eschelon/26:** Intentionally Left Blank<sup>6</sup>

2           **Eschelon/27:** A chronology of Qwest’s recent attempts to limit the  
3           number of Connecting Facility Assignment (“CFA”) changes to one on the  
4           installation due date, with related documentation.

5           **Eschelon/28:** August 31, 2006 Process Notice from Qwest Regarding  
6           Changes to Qwest’s Negotiations Template, and Excerpts from Oregon  
7           Negotiations Template Exhibit A.

8           **Eschelon/29:** A copy of the Arbitrators’ Report in the interconnection  
9           agreement (“ICA”) arbitration between Qwest and Eschelon in Minnesota.  
10          As it is cited in testimony, a copy is provided for the Commission’s  
11          convenience. The Minnesota Commission order adopting the MN  
12          Arbitrators’ Report, in part, and modifying it in part, is provided as  
13          Eschelon/30.

14          **Eschelon/30:** “Order Resolving Arbitration Issues, Requiring Filed  
15          Interconnection Agreement, Opening Investigations and Referring Issue to  
16          Contested Case Proceeding” dated March 30, 2007 in the Qwest-Eschelon  
17          interconnection agreement (ICA) arbitration in Minnesota.

18          **Eschelon/31:** Intentionally Left Blank

19          **Eschelon/32:** A chart regarding expedite capability for unbundled loops.

20          **Eschelon/33:** Executive Summary from the Direct Testimony of Pamela  
21          Genung (in which Arizona Staff concludes regarding expedites that  
22          “Qwest did not adhere to the terms and conditions of the current Qwest-  
23          Eschelon Interconnection Agreement”), *In re. Complaint of Eschelon*  
24          *Telecom of Arizona, Inc. Against Qwest Corporation*, ACC Docket No. T-  
25          01051B-06-0257, T-03406A-06-0257 (Jan. 30, 2007) [“Arizona  
26          Complaint Docket”].

27          **Eschelon/34:** Documentation regarding Qwest’s refusal to provide  
28          requested cost support.

29          **Eschelon/35:** Excerpts from the Direct Testimony of Robert F. Kennedy,  
30          Qwest Corporation in Docket No. UT-003013, Part D, November 7, 2001  
31          in Washington and Docket No. T0000A-00-0194, Phase II, March 15,  
32          2001 in Arizona on expedites as UNEs.

---

<sup>6</sup> Certain issues have closed since the beginning of the preparation of this testimony. In order to preserve Exhibit numbering, these exhibits have been removed and replaced with “Intentionally Left Blank.”

1           **Eschelon/36:** contains the current and historical tariff pages from Qwest’s  
2           tariff FCC #1 regarding expedites (FCC tariff documents includes Qwest’s  
3           transmittal to the FCC explaining its change in the expedite rate) and  
4           Qwest’s Oregon state access tariff.

5           **Eschelon/37:** Commission-Approved Qwest-Eschelon “Bridge Agreement  
6           Until New Interconnection Agreements Are Approved.”

7           **Eschelon/38:** Washington Commission Order 06 in docket UT-053025  
8           regarding Qwest’s designation of wire centers as non-impaired, or  
9           ineligible for access to high-capacity loops and transport by competitors.  
10          Documents related to this order, including the order are available at:  
11          [http://www.wutc.wa.gov/rms2.nsf/vw2005OpenDocket/E015F404192DD](http://www.wutc.wa.gov/rms2.nsf/vw2005OpenDocket/E015F404192DD32388257245007F4CEC)  
12          [32388257245007F4CEC](http://www.wutc.wa.gov/rms2.nsf/vw2005OpenDocket/E015F404192DD32388257245007F4CEC)

13          **Eschelon/39:** Utah Commission Orders dated November 3, 2006 and  
14          September 11, 2006 in docket 06-049-40, *In the Matter of the*  
15          *Investigation into Qwest Wire Center Data* addressing Qwest’s wire center  
16          designations and a process for future additions to the wire center list.  
17          Documents related to this order, including the order are available at:  
18          <http://www.psc.state.ut.us/telecom/Indexes/0604940Indx.htm>

19          **Eschelon/40:** Oregon Commission Order dated March 20, 2007 in docket  
20          UM 1251, *In the Matter of COVAD COMMUNICATIONS COMPANY;*  
21          *ESCHELON TELECOM OF OREGON, INC.; INTEGRA TELECOM OF*  
22          *OREGON, INC.; MCLEODUSA TELECOMMUNICATIONS SERVICES,*  
23          *INC.; and XO COMMUNICATIONS SERVICES, INC. Request for*  
24          *Commission Approval of Non-Impairment Wire Center List*, addressing  
25          Qwest’s wire center designations and a process for future additions to the  
26          wire center list. Documents related to this order, including the order are  
27          available at:  
28          <http://apps.puc.state.or.us/edockets/docket.asp?DocketID=13173>

29          **Eschelon/41:** Eschelon dispute resolution letters regarding expedited  
30          orders.

31          **Eschelon/42:** Oregon Expedite Amendment.

1 **II. CHANGE IN LAW (SUBJECT MATTER NOS. 2 AND 3)**

2 **SUBJECT MATTER NO. 2. RATE APPLICATION & SUBJECT MATTER NO. 3.**  
3 **EFFECTIVE DATE OF LEGALLY BINDING CHANGES**

4 **Issue Nos. 2-3 and 2-4: ICA Section 2.2 (two issues in Section 2.2) & 22.4.1.2**

5 **Q. PLEASE DESCRIBE THE BUSINESS NEED REGARDING RATE**  
6 **APPLICATION IN ISSUE NO. 2-3 AND EFFECTIVE DATE OF**  
7 **LEGALLY BINDING CHANGES IN ISSUE NO. 2-4 (COLLECTIVELY**  
8 **“CHANGE IN LAW”).**

9 A. Section 2.2 of the ICA addresses changes in law. When a change in law takes  
10 effect is a question that can have very significant financial and other  
11 consequences. Qwest proposes two additions to Section 2.2 that relate to when  
12 certain changes of law will take effect. Qwest’s additions are not contained in the  
13 SGAT and rather than add clarity to this section of the contract, Qwest’s language  
14 provides an opportunity for a company to delay the effect of a change in law and  
15 supersede the authority of the relevant regulatory body.

16 Issue No. 2-3 (Rate Application), which is the first of the two disputed issues  
17 arising from Section 2.2, is more specific to rates and concerns language  
18 regarding when rate changes resulting from a Commission order will take effect.  
19 Issue No. 2-4 (Effective Date of Legally Binding Changes), which is the second  
20 of two disputed issues in Section 2.2, concerns when legally binding changes in  
21 the law will take effect.

1           Because of the potential for future disputes, it is important that the ICA language  
2           on this issue: 1) provide the companies with clear guidance on when a change of  
3           law will take effect, so that they can plan accordingly; 2) not provide an  
4           opportunity for any company to delay the effect of a change in the law; 3)  
5           preserve the authority of the relevant regulatory body – e.g., the Commission, the  
6           FCC, or Congress – to determine when changes in the law will be given effect.

7           **Q.    WHAT ARE ESCHELON’S PROPOSALS FOR ISSUES 2-3 AND 2-4?**

8           A.    Eschelon has two proposals that encompass Issues 2-3 and 2-4. Eschelon offers  
9           either proposal for adoption by the Commission. For both proposals, the entire  
10          provision in this section of the ICA (Section 2.2) is shown, with underlining and  
11          strikeouts to show the differences in the companies’ positions. Eschelon’s  
12          proposal #2 also has a component in ICA Section 22.4 (“Interim Pricing”), shown  
13          below.<sup>7</sup>

14          Proposal #1 (Issue Nos. 2-3 and 2-4)

15          2.2    The provisions in this Agreement are intended to be in compliance  
16               with and based on the existing state of the law, rules, regulations  
17               and interpretations thereof, including but not limited to state rules,  
18               regulations, and laws, as of March 11, 2005 (the Existing Rules).  
19               Nothing in this Agreement shall be deemed an admission by Qwest  
20               or CLEC concerning the interpretation or effect of the Existing  
21               Rules or an admission by Qwest or CLEC that the Existing Rules  
22               should not be changed, vacated, dismissed, stayed or modified.  
23               Nothing in this Agreement shall preclude or stop Qwest or CLEC  
24               from taking any position in any forum concerning the proper  
25               interpretation or effect of the Existing Rules or concerning whether

---

<sup>7</sup> Because of the potential confusion between Section “2.2” and Section “22” as a result of the similar numbering, I will refer to the separate, later Section of the ICA as Section “22.0” for clarity. Section 22.4, which deals specifically with interim rates, is a sub-section of Section 22.0

1 the Existing Rules should be changed, vacated, dismissed, stayed  
2 or modified. To the extent that the Existing Rules are vacated,  
3 dismissed, stayed or materially changed or modified, then this  
4 Agreement shall be amended to reflect such legally binding  
5 modification or change of the Existing Rules. Where the Parties  
6 fail to agree upon such an amendment within sixty (60) Days after  
7 notification from a Party seeking amendment due to a modification  
8 or change of the Existing Rules or if any time during such sixty  
9 (60) Day period the Parties shall have ceased to negotiate such new  
10 terms for a continuous period of fifteen (15) Days, it shall be  
11 resolved in accordance with the Dispute resolution provision of  
12 this Agreement. It is expressly understood that this Agreement  
13 will be amended as set forth in this Section 2.2, to reflect the  
14 outcome of generic proceedings by the Commission for pricing,  
15 service standards, or other matters covered by this Agreement,  
16 except where CLEC notifies Qwest in writing that an amendment  
17 is not required. The rates in Exhibit A and when they apply are  
18 addressed in Section 22.<sup>8</sup> ~~Rates in Exhibit A include legally~~  
19 ~~binding decisions of the Commission and shall be applied on a~~  
20 ~~prospective basis from the effective date of the legally binding~~  
21 ~~Commission decision, unless otherwise ordered by the~~  
22 ~~Commission. When a regulatory body or court issues an order~~  
23 ~~causing a change in law and that order does not include a specific~~  
24 ~~implementation date, a Party may provide notice to the other Party~~  
25 ~~within thirty (30) Days of the effective date of that order and any~~  
26 ~~resulting~~ Any amendment shall be deemed effective on the  
27 effective date of the legally binding change or modification of the  
28 Existing Rules for rates, and to the extent practicable for other  
29 terms and conditions, unless otherwise ordered. ~~In the event~~  
30 ~~neither Party provides notice within thirty (30) Days, the effective~~  
31 ~~date of the legally binding change shall be the effective date of the~~  
32 ~~amendment unless the Parties agree to a different date.~~ While any  
33 negotiation or Dispute resolution is pending for an amendment  
34 pursuant to this Section 2.2 the Parties shall continue to perform  
35 their obligations in accordance with the terms and conditions of  
36 this Agreement. For purposes of this Section, "legally binding"  
37 means that the legal ruling has not been stayed, no request for a  
38 stay is pending, and any deadline for requesting a stay designated  
39 by statute or regulation, has passed.

---

<sup>8</sup> As indicated in Eschelon's position statement for Issue 2-3, "Eschelon proposes to either remain silent on this issue in Section 2.2 (by deleting Qwest's proposed insertion) or, as an option, to include Eschelon's proposed sentence that simply refers the reader to Section 22.0, where the issue is dealt with more completely." See Exhibit 3 to Petition (Joint Disputed Issues Matrix), Eschelon position statement, p. 12.

1           Proposal #2 (Issue Nos. 2-3 and 2-4)

2           2.2       The provisions in this Agreement are intended to be in  
3           compliance with and based on the existing state of the law, rules,  
4           regulations and interpretations thereof, including but not limited to  
5           state rules, regulations, and laws, as of March 11, 2005 (the  
6           Existing Rules). Nothing in this Agreement shall be deemed an  
7           admission by Qwest or CLEC concerning the interpretation or  
8           effect of the Existing Rules or an admission by Qwest or CLEC that  
9           the Existing Rules should not be changed, vacated, dismissed,  
10          stayed or modified. Nothing in this Agreement shall preclude or  
11          estop Qwest or CLEC from taking any position in any forum  
12          concerning the proper interpretation or effect of the Existing Rules  
13          or concerning whether the Existing Rules should be changed,  
14          vacated, dismissed, stayed or modified. To the extent that the  
15          Existing Rules are vacated, dismissed, stayed or materially changed  
16          or modified, then this Agreement shall be amended to reflect such  
17          legally binding modification or change of the Existing Rules. Each  
18          Party has an obligation to ensure that the Agreement is amended  
19          accordingly. Where the Parties fail to agree upon such an  
20          amendment within sixty (60) Days after notification from a Party  
21          seeking amendment due to a modification or change of the Existing  
22          Rules or if any time during such sixty (60) Day period the Parties  
23          shall have ceased to negotiate such new terms for a continuous  
24          period of fifteen (15) Days, it shall be resolved in accordance with  
25          the Dispute resolution provision of this Agreement. It is expressly  
26          understood that this Agreement will be amended as set forth in this  
27          Section 2.2, to reflect the outcome of generic proceedings by the  
28          Commission for pricing, service standards, or other matters covered  
29          by this Agreement, except where CLEC notifies Qwest in writing  
30          that an amendment is not required. The rates in Exhibit A and  
31          when they apply are further addressed in Section 22. Generally,  
32          with respect to rates, this Section 2.2 addresses changes to rates that  
33          have been previously approved by the Commission, and Section 22  
34          (Pricing) also addresses rates that have not been previously  
35          approved by the Commission (Unapproved Rates). Rates in Exhibit  
36          A will reflect ~~include~~ legally binding decisions of the Commission.  
37          Each Party reserves its rights with respect to the effective date of a  
38          legally binding modification or change of the Existing Rules and, if  
39          different, other dates for implementation or application of an order,  
40          if any. If a Party desires a particular deadline or time period for  
41          application or implementation of any aspect of a proposed order, the  
42          Party may request under the Commission's regularly established  
43          rules that the Commission establish a specific implementation date,

1 stay the order, or provide other such relief as applicable. If,  
2 however, the Commission enters an order that is silent on the issue,  
3 the order shall be implemented and applied on a prospective basis  
4 from the date that the order is effective either by operation of law or  
5 as otherwise stated in the order (such as “effective immediately” or  
6 a specific date), unless subsequently otherwise ordered by the  
7 Commission or, if allowed by the order, agreed upon by the Parties.  
8 ~~When a regulatory body or court issues an order causing a change~~  
9 ~~in law and that order does not include a specific implementation~~  
10 ~~date, a Party may provide notice to the other Party within thirty (30)~~  
11 ~~Days of the effective date of that order and any resulting~~  
12 ~~amendment shall be deemed effective on the effective date of the~~  
13 ~~legally binding change or modification of the Existing Rules for~~  
14 ~~rates, and to the extent practicable for other terms and conditions,~~  
15 ~~unless otherwise ordered.<sup>9</sup>—While any negotiation or Dispute~~  
16 ~~resolution is pending for an amendment pursuant to this Section 2.2~~  
17 ~~the Parties shall continue to perform their obligations in accordance~~  
18 ~~with the terms and conditions of this Agreement. For purposes of~~  
19 ~~this Section, “legally binding” means that the legal ruling has not~~  
20 ~~been stayed, no request for a stay is pending, and any deadline for~~  
21 ~~requesting a stay designated by statute or regulation, has passed.~~

22 Following is the component of Eschelon’s proposal #2 in Section 22.4:

23 22.4.1.2 If the Interim Rates are reviewed and changed by the  
24 Commission, the Parties shall incorporate the rates established by  
25 the Commission into this Agreement pursuant to Section 2.2 of this  
26 Agreement. Such Commission-approved rates shall be effective as  
27 of the date required by a legally binding order of the Commission.  
28 Each Party reserves its rights with respect to whether Interim Rates  
29 are subject to true-up. If, however, the Commission issues an order  
30 with respect to rates that is silent on the issue of a true-up, the rates  
31 shall be implemented and applied on a prospective basis from the  
32 effective date of the legally binding Commission decision as  
33 described in Section 2.2.

---

<sup>9</sup> As discussed under Proposal #1, the following sentence is from the SGAT: “Any amendment shall be deemed effective on the effective date of the legally binding change or modification of the Existing Rules for rates, and to the extent practicable for other terms and conditions, unless otherwise ordered.” Eschelon offers Proposal #2 either with or without this sentence. As it ends with “unless otherwise ordered,” it allows for a different date to be set.

1 **Q. PLEASE BRIEFLY DESCRIBE ESCHELON'S TWO PROPOSALS**  
2 **REGARDING CHANGE IN LAW (ISSUES 2-3 AND 2-4**  
3 **COLLECTIVELY).**

4 A. Eschelon's first proposal for ICA Section 2.2 is to leave the closed portion of the  
5 language of Section 2.2 unchanged by deleting Qwest's two proposed insertions.<sup>10</sup>  
6 Eschelon's first proposal would leave in place as closed language the following  
7 SGAT sentence<sup>11</sup> in Section 2.2 and the following approved Qwest-AT&T ICA  
8 language<sup>12</sup> in Section 22.4:

9 2.2 . . . Any amendment shall be deemed effective on the effective  
10 date of the legally binding change or modification of the Existing  
11 Rules for rates, and to the extent practicable for other terms and  
12 conditions, unless otherwise ordered. . . .<sup>13</sup>

13 22.4.1.2 If the Interim Rates are reviewed and changed by the  
14 Commission, the Parties shall incorporate the rates established by  
15 the Commission into this Agreement pursuant to Section 2.2 of this  
16 Agreement. Such Commission-approved rates shall be effective as  
17 of the date required by a legally binding order of the Commission.

18 The SGAT provision will assure that the ICA properly reflects any changes in the  
19 law, including any direction given in any applicable order regarding when the

---

<sup>10</sup> Eschelon has also offered, as an option, to add one sentence cross referencing Section 22 ("Pricing"), where the issue of rates is dealt with more completely, if desired for clarity. As shown above, the optional proposed cross reference in Section 2.2 states: "The rates in Exhibit A and when they apply are further addressed in Section 22."

<sup>11</sup> In addition to being in the SGAT, this sentence is also the same sentence as in the October 14, 2004 Qwest-AT&T ICA that was approved by the Oregon Commission. See Oregon Docket No. ARB 527B.

<sup>12</sup> The Qwest-AT&T ICA was approved by the Oregon Commission on October 14, 2004 ("Qwest-AT&T ICA"). See Oregon Docket No. ARB 527B. This Qwest-AT&T ICA was used by the companies in part as a basis for negotiations. See, e.g., Eschelon/43, Johnson/14-15; see also Eschelon/46, Johnson/1.

<sup>13</sup> This portion of the sentence is closed, except the first word ("Any"), which Qwest proposes to change to "any resulting" after its inserted clause. Eschelon recommends deletion of Qwest's proposed insertion.

1 ordered change shall be given effect. The agreed upon sentence from the  
2 approved Qwest-AT&T ICA will assure that the Commission will dictate when  
3 Commission-approved rates become effective. These provisions, using agreed  
4 upon language from the SGAT and the Qwest-AT&T ICA, are neutral as to the  
5 effective date to be adopted ultimately by the appropriate regulatory body.

6 As discussed, except for Eschelon's optional proposal to add one sentence (with a  
7 cross-reference to Section 22.0), Eschelon's first proposal is the Qwest-AT&T  
8 ICA language that was approved by the Oregon Commission on October 14,  
9 2004,<sup>14</sup> with certain agreed upon modifications.<sup>15</sup> The Qwest-AT&T ICA  
10 language with the mutually agreed upon modifications was closed in the Qwest-  
11 Eschelon proposed ICA in negotiations for some time. When Qwest re-opened  
12 the language by proposing two new insertions to Section 2.2, Eschelon countered  
13 with its second proposal. As a general matter, Eschelon's second proposal  
14 (Proposal #2, shown above) is different from that modified Qwest-AT&T  
15 language in three ways. First, this option affirms the companies' obligations to  
16 keep their ICA up to date in an additional sentence. Second, this option provides  
17 additional clarification regarding when rates changes will take effect. Third, this  
18 option provides additional clarification regarding the effective date of ICA  
19 amendments to the ICA that are entered into to reflect legally binding changes in  
20 the law. These differences will be explained below.

---

<sup>14</sup> See Oregon Docket No. ARB 527B.

<sup>15</sup> For example, the companies agreed to change the identified date for Existing Rules from August 15, 2003 in the Qwest-AT&T ICA to March 11, 2005 in the proposed Qwest-Eschelon ICA.

1 **Q. WHAT IS QWEST'S PROPOSAL REGARDING CHANGE IN LAW**  
2 **(ISSUES 2-3 AND 2-4 COLLECTIVELY)?**

3 A. Qwest has one proposal for change in law (Issues 2-3 and 2-4). It consists of two  
4 language insertions in Section 2.2 and one language insertion in Section 22.4.  
5 Regarding application of rates (Issue 2-3), Qwest proposes deletion of Eschelon's  
6 proposed optional sentence in Section 2.2 and insertion of the following  
7 underlined language:

8 The rates in Exhibit A and when they apply are addressed  
9 in Section 22. Rates in Exhibit A include legally binding  
10 decisions of the Commission and shall be applied on a  
11 prospective basis from the effective date of the legally  
12 binding Commission decision, unless otherwise ordered by  
13 the Commission.

14 Qwest's proposed sentence does not appear in the SGAT or the approved Qwest-  
15 AT&T ICA language used in negotiations.<sup>16</sup>

16 Regarding effective date of legally binding changes (Issue 2-4), Qwest proposes  
17 to add the following two underlined sentences to Section 2.2 (which do not appear  
18 in the SGAT or the Qwest-AT&T ICA):

19 When a regulatory body or court issues an order causing a change  
20 in law and that order does not include a specific implementation  
21 date, a Party may provide notice to the other Party within thirty  
22 (30) Days of the effective date of that order and any resulting...  
23 Any amendment shall be deemed effective on the effective date of  
24 the legally binding change or modification of the Existing Rules  
25 for rates, and to the extent practicable for other terms and  
26 conditions, unless otherwise ordered. In the event neither Party  
27 provides notice within thirty (30) Days, the effective date of the

---

<sup>16</sup> Eschelon's suggested insertion of the cross reference to Section 22.0 is also not in either document. As discussed, addition of this sentence is optional, if desired for clarity.

1                   legally binding change shall be the effective date of the  
2                   amendment unless the Parties agree to a different date.

3                   Qwest proposes that when an order that changes the law “does not include a  
4                   specific implementation date,” the effective date of such a change will depend on  
5                   whether one party gives the other notice of the order. When one party gives  
6                   notice of the order within thirty days of the effective date of the order, Qwest  
7                   proposes that the amendment of the ICA reflecting the change in the law will be  
8                   “deemed effective on the date of that order.” When one party does not give notice  
9                   of the order within thirty days, Qwest proposes that the legal change will take  
10                  effect on the effective date of the ICA amendment that reflects that change, unless  
11                  the parties agree otherwise. Regarding Section 22.4.1.2, Qwest’s proposal is to  
12                  repeat its proposed sentence from Section 2.2 (regarding a prospective basis) in  
13                  Section 22.0:

14                   22.4.1.2 If the Interim Rates are reviewed and changed by the  
15                   Commission, the Parties shall incorporate the rates established by  
16                   the Commission into this Agreement pursuant to Section 2.2 of this  
17                   Agreement. Such Commission-approved rates shall be effective as  
18                   of the date required by a legally binding order of the Commission.  
19                   Rates in Exhibit A include legally binding decisions of the  
20                   Commission and shall be applied on a prospective basis from the  
21                   effective date of the legally binding Commission decision, unless  
22                   otherwise ordered by the Commission.

23  
24                  Eschelon disagrees with this proposal for the same reasons that it disagrees with  
25                  this language in Section 2.2 (regardless of whether the language is placed in  
26                  Section 2.2, 22.0, or both).

1 **Q. WHY IS ESCHELON'S FIRST PROPOSAL (PROPOSAL #1) FOR ISSUES**  
2 **2-3 AND 2-4 APPROPRIATE?**

3 A. Change in law provisions generally, and Section 2.2 specifically, are designed to  
4 apply when the law changes *at a later time*. Eschelon's proposal does not pre-  
5 judge (by, at this time, establishing a presumption one way or the other) the issue  
6 of when rates approved by the Commission or other orders will take effect at a  
7 later time. It defers to the authority of the relevant regulatory body if and when a  
8 change in law occurs. This is appropriate not only because the appropriate  
9 regulatory body has that authority but also because more will be known at that  
10 time about the nature of the change in law and when it should take effect.

11 Regarding the application of rates, Section 22.0 ("Pricing") already deals with the  
12 application of rates in Exhibit A and does so more thoroughly and clearly than  
13 Qwest's proposed single sentence in Section 2.2.<sup>17</sup> Most of Section 22.0 is agreed  
14 upon and closed. The issues that remain open will be decided in this arbitration  
15 with respect to Section 22.0 and need not also be litigated with respect to Section  
16 2.2. With respect to when rate changes will take effect, Section 22.4.1, which the  
17 companies have agreed upon in large part, states:

18 22.4.1 The Parties acknowledge that only some of the  
19 prices contained in Exhibit A have been approved by the  
20 Commission in a cost case. Prices that have not been approved by  
21 the Commission shall be considered interim and subject to the  
22 following provisions.

---

<sup>17</sup> Therefore, if additional language is desired, it makes sense to add Eschelon's optional proposed sentence to Section 2.2: "The rates in Exhibit A and when they apply are further addressed in Section 22."

1                   22.4.1.2       If the Interim Rates are reviewed and  
2                   changed by the Commission, the Parties shall incorporate  
3                   the rates established by the Commission into this  
4                   Agreement pursuant to Section 2.2 of this Agreement.  
5                   Such Commission-approved rates shall be effective as of  
6                   the date required by a legally binding order of the  
7                   Commission.<sup>18</sup>

8                   As shown, Section 22.4.1.2 specifically states: “Such Commission-approved  
9                   rates shall be effective as of the date required by a legally binding order of the  
10                  Commission.” Therefore, Section 22.4.1.2 leaves the issue of whether rates will  
11                  be applied on a prospective basis to the discretion of the Commission to decide at  
12                  the appropriate time. Because this closed language in Section 22.4.1.2 applies to  
13                  any date required by an order of the Commission – including either an earlier  
14                  effective date (*e.g.*, a true-up) or a prospective date (*e.g.*, no true-up), whichever is  
15                  ordered by the Commission – Qwest is incorrect when it claims that “Section 22  
16                  is silent as to what is to occur when a Commission order does not specify a true-  
17                  up of past billing.”<sup>19</sup> This closed language in Section 22 expressly states that the  
18                  effective date required by the order will apply.

19                  The Commission has, in some cases, determined that the circumstances warranted  
20                  the establishment of an interim rate that would be subject to true up when the final  
21                  rate was determined and some, as reflected in the closed language of Section  
22                  22.4.1.2, that would not be subject to true up. The agreed upon language of

---

<sup>18</sup> Note, as discussed above, both companies have proposed additional language in 22.4.1.2, which is disputed.

<sup>19</sup> See Arizona arbitration, Easton Rebuttal, p. 2, lines 17-18. In any event, Eschelon’s Proposal #2 even more explicitly addresses what is to occur when a Commission order does not specify a true-up of past billing, as discussed below.

1 Section 22.4.1 and 22.4.1.2 is consistent with the range of the Commission’s past  
2 practice, because it reflects the Commission’s cost docket rulings and, for other  
3 issues, leaves it to the Commission to decide when a rate change will take effect.  
4 Qwest’s new proposal in Section 2.2, in contrast, attempts to create an  
5 unnecessary default that rate changes will be applied prospectively. The  
6 ambiguity created by Qwest’s proposal is likely to lead to additional litigation.

7 **Q. HOW DOES ESCHELON’S SECOND PROPOSAL (PROPOSAL #2) FOR**  
8 **ISSUES 2-3 AND 2-4 ADDRESS QWEST’S STATED CONCERNS ABOUT**  
9 **THE LANGUAGE IN SECTION 2.2?**

10 A. Eschelon’s second, alternative proposal for Issues 2-3 and 2-4 is to add three  
11 provisions to Section 2.2 to clean up the distinction that Qwest appears to desire  
12 between an “implementation” date and an “effective” date, as well as to add  
13 language to Section 22.4.1.2. The first provision of Eschelon’s alternate proposal  
14 confirms that each company has an obligation to ensure the agreement is  
15 amended. As I explain below, Eschelon is concerned that Qwest’s proposal  
16 provides a means that would allow a company to delay the effect of an adverse  
17 change in the law by not giving the other company notice of the order giving rise  
18 to the change. The existing agreed upon language already provides that the  
19 Agreement “shall” be amended to reflect a legally binding modification or change  
20 of the Existing Rules.<sup>20</sup> The additional sentence that Eschelon proposes

---

<sup>20</sup> The SGAT, Qwest-AT&T ICA, and closed language in the proposed Qwest-Eschelon ICA all state:  
“To the extent that the Existing Rules are vacated, dismissed, stayed or materially changed or

1 (immediately after that closed sentence) confirms that there will be no delay in  
2 doing so, by stating that “Each Party has an obligation to ensure that the  
3 Agreement is amended accordingly.” Eschelon added this sentence to attempt to  
4 address Qwest’s stated concern that the SGAT and Qwest-AT&T language  
5 required amendment without addressing who had the obligation to ensure that it  
6 was amended.

7 **Q. PLEASE EXPLAIN ESCHELON’S SECOND CHANGE TO THE**  
8 **LANGUAGE REFLECTED IN ESCHELON’S SECOND PROPOSAL FOR**  
9 **SECTION 2.2, WHICH CONCERNS WHEN RATE CHANGES WILL BE**  
10 **GIVEN EFFECT.**

11 A. Testimony on behalf of the Minnesota Department of Commerce in the Minnesota  
12 arbitration revealed the utility of distinguishing between changes to prices that  
13 had been previously approved by the Commission and changes to prices not  
14 previously approved. To address this issue, Eschelon’s alternative proposal  
15 includes language specifying that Section 2.2 is intended to govern changes to  
16 existing rates that have been previously approved and that Section 22.0 also  
17 addresses rates that have not been previously approved.

18 **Q. PLEASE EXPLAIN ESCHELON’S THIRD CHANGE TO THE**  
19 **LANGUAGE REFLECTED IN ESCHELON’S SECOND PROPOSAL FOR**

---

modified, then this Agreement shall be amended to reflect such legally binding modification or change of the Existing Rules.”

1           **SECTION 2.2, WHICH CONCERNS THE EFFECTIVE DATE OF ICA**  
2           **AMENDMENTS THAT REFLECT CHANGES OF LAW.**

3    A.    Eschelon’s proposed alternative permits a company to seek a particular time  
4           period for application or implementation of an order that results in a legally  
5           binding change in the law, including changes to previously-approved rates. It  
6           clarifies that, if the order is silent on the issue of its implementation date, the  
7           order will be implemented prospectively from the date the order becomes  
8           effective according to the order’s term or by operation of law. Thus, this  
9           language expressly confirms that the “implementation date” of an order that is  
10          “effective immediately” is the date of the order.

11          Qwest’s new proposal in Section 2.2, in contrast, attempts to create an  
12          unnecessary default that rate changes will be applied prospectively. The  
13          ambiguity created by Qwest’s proposal is likely to lead to additional litigation.

14    **Q.    WHAT CHANGES DOES ESCHELON PROPOSE TO SECTION 22.0 IN**  
15          **ITS SECOND, ALTERNATIVE PROPOSAL RELATED TO THESE**  
16          **ISSUES?**

17    A.    Eschelon’s second, alternative proposal for Issues 2-3 and 2-4 also includes  
18          addition of two sentences to Section 22.4.1.2. Section 22.4 is entitled “Interim  
19          Rates.” Although agreed upon language in Section 22.4.1.2 already provides that  
20          interim rates “shall be effective as of the date required by a legally binding order

1 of the Commission,”<sup>21</sup> Eschelon has proposed two sentences in response to  
2 Qwest’s proposal which expressly state the companies reserve their rights with  
3 respect to a true-up. If an order is silent as to a true-up, Qwest gets the default  
4 provision it seeks (except for new products, which are addressed in Section  
5 1.7.1.1), indicating rates will be applied and implemented on a prospective basis.  
6 However, Eschelon’s language also clarifies that “Each Party reserves its rights  
7 with respect to whether Interim Rates are subject to true-up.”

8 **Q. YOU EXPLAINED ABOVE THAT QWEST’S PROPOSED**  
9 **“PROSPECTIVE” RATE APPLICATION DEFAULT IN 2.2 IS**  
10 **UNNECESSARY AND AMBIGUOUS. WHAT PROBLEMS DOES**  
11 **QWEST’S PROPOSAL PRESENT FOR ESCHELON?**

12 A. Eschelon has three general concerns. First, the language is ambiguous, which is  
13 likely to lead to disputes in the future. Second, the language creates an  
14 opportunity for Qwest to delay the effect of a legal change that is not in its favor.  
15 Third, the language intrudes on the province of the relevant regulatory authority  
16 to determine when the legal change will take effect.

17 **Q. HOW IS QWEST’S PROPOSAL AMBIGUOUS?**

18 A. The proposal would govern what happens when an order “does not include a  
19 specific implementation date.” Qwest’s language also provides, however, that  
20 when a party gives notice of an order within thirty days, the legal change resulting

---

<sup>21</sup> As discussed, because this closed language could refer to establishing either an earlier effective date (*i.e.*, a true-up) or a prospective date (*i.e.*, no true-up), it is applicable in either case.

1 from that order will take effect on “the effective date of that order.” What this  
2 tells me is that Qwest believes a “specific implementation date” of an order is  
3 something different from an order’s effective date (consistent with the Arizona  
4 example described below). Under Qwest’s proposal, it appears that an order that  
5 the Commission states is to be “effective immediately” would not be one that has  
6 a “specific implementation date” and would, therefore, be one that Eschelon  
7 would have to give Qwest notice of within thirty days for the order to actually  
8 have immediate effect.

9 In addition, what constitutes “notice” is also unclear. For example, Qwest’s  
10 language would appear to require Eschelon to give Qwest “notice” even when  
11 Qwest is an active party to the proceeding that results in the change of law.

12 **Q. HOW DOES QWEST’S PROPOSAL CREATE AN OPPORTUNITY FOR**  
13 **DELAY?**

14 A. By proposing that the effective date of a change in the law will depend on  
15 whether one party gives the other notice of the order giving rise to the change,  
16 Qwest creates an opportunity for itself to delay implementation of adverse rulings.  
17 If, for example, Qwest is a party to a proceeding and Eschelon (or another CLEC  
18 that has opted into the ICA) is not, and Qwest receives an adverse result, Qwest’s  
19 language would allow Qwest to delay the effect of that adverse ruling by simply  
20 not notifying CLECs of the order. Because CLECs have much more limited  
21 resources than Qwest to participate in regulatory proceedings and Qwest is likely  
22 to have more complete knowledge regarding the proceedings and any changes in

1 the law that result, Qwest’s proposed “notice” requirement heavily favors Qwest  
2 to the disadvantage of CLECs.

3 **Q. HOW DOES QWEST’S PROPOSAL INTRUDE ON THE AUTHORITY**  
4 **OF REGULATORY BODIES TO DETERMINE WHEN LEGAL**  
5 **CHANGES WILL TAKE EFFECT?**

6 A. Qwest is proposing to change the effective date to either the date of an ICA  
7 amendment or a date agreed upon by the parties, even in cases when the  
8 Commission has ordered a different effective date. For example, if the  
9 Commission issues an order in a generic proceeding that has been properly  
10 noticed and the order states that it is effective immediately, Qwest’s language  
11 would allow Qwest to implement that ruling at a later date if neither party gave  
12 the other notice of the ruling (even if one or both parties were party to the  
13 proceeding). Qwest should not be allowed to unilaterally alter a Commission-  
14 ordered effective date in this manner. Eschelon’s proposed language is consistent  
15 with the notion that the effective date of an ICA amendment incorporating a  
16 change in law should be determined by the Commission in light of sound public  
17 policy, not by the procedural maneuverings of the parties.

18 **Q. HAS QWEST’S PREVIOUS CONDUCT RAISED A CONCERN THAT,**  
19 **UNDER QWEST’S PROPOSAL, AN ORDER THAT IS “EFFECTIVE**  
20 **IMMEDIATELY” COULD BE CONSIDERED TO LACK A “SPECIFIC**  
21 **IMPLEMENTATION DATE”?**

22 A. Yes. Qwest’s conduct in an Arizona cost case suggested that Qwest considered

1 the effective date of an order to be different from a specific implementation date  
2 even though the order identified no separate date. In that case, the Commission  
3 staff brought a complaint regarding Qwest's failure to implement rate changes.<sup>22</sup>  
4 Although the rate changes had been ordered by the Commission to be "effective  
5 immediately" (*i.e.*, on June 12, 2002), and although Qwest had not sought a stay  
6 of the order despite a specific inquiry from the Commission as to whether a stay  
7 would be sought, Qwest still had not implemented the rates months later.<sup>23</sup> The  
8 Arizona Staff investigated<sup>24</sup> and the matter came before the Arizona Commission  
9 on an order to show cause. At the open meeting, the Commission indicated that it  
10 believed it was reasonable to conclude that an order indicating that it was  
11 effective "immediately" means "fairly soon"<sup>25</sup> and that, in any event, "any  
12 definition of immediately is not five months later."<sup>26</sup> The Commission then asked  
13 Qwest to define immediately, and Qwest responded:

14 I think *Qwest's definition of immediately is consistent with the*  
15 *approach that has been taken in the implementation of orders*  
16 *previously* by this Commission with respect to the 1986 record,  
17 which was the last major order with wholesale rates. It took Qwest --

<sup>23</sup> Transcript of 12/2/02 Special Open Meeting, AZ Show Cause Case, p. 9, lines 4-11 & p. 10, lines 2-3.

<sup>24</sup> Staff said it believed that "Qwest intentionally delayed implementation" of the cost case order "until Qwest could complete rate changes in nine other states for which it had 271 applications pending at the federal level." See Transcript of 12/2/02 Special Open Meeting, AZ Show Cause Case, p. 5, lines 19-23.

<sup>25</sup> See Transcript of 12/2/02 Special Open Meeting, AZ Show Cause Case, p. 9, lines 12-15.

<sup>26</sup> See Transcript of 12/2/02 Special Open Meeting, AZ Show Cause Case, p. 10, lines 6-7.

1 and we have discussed this with Staff -- it took Qwest *about a year*  
2 to implement those rates.<sup>27</sup>

3 Eschelon's proposed language would prevent a re-occurrence of such a situation,  
4 by requiring a company that needs additional time to implement an order to raise  
5 that issue with the Commission and obtain an implementation schedule, rather  
6 than Qwest's engaging in self-help after the fact and taking additional time, with  
7 no stay in place, to implement the order on Qwest's own schedule.

8 **Q. PLEASE SUMMARIZE ISSUES 2-3 AND 2-4 REGARDING CHANGES IN  
9 LAW.**

10 A. Either of Eschelon's proposals regarding changes in law (Issues 2-3 and 2-4) are  
11 better than Qwest's proposal for determining when changes to application of rates  
12 and changes in law should take effect. Qwest's language is ambiguous, creates  
13 the opportunity for delay, and intrudes upon the Commission's authority.  
14 Eschelon's Proposal #1 or Proposal #2 should be adopted for these issues.

15 **III. DESIGN CHANGES (SUBJECT MATTER NO. 4)**

16 **SUBJECT MATTER NO. 4. DESIGN CHANGES**

17 **Issue Nos. 4-5, 4-5(a), 4-5(b) and 4-5(c): ICA Sections 9.2.3.8, 9.2.3.9 and**  
18 **Section 9.20.13 of Exhibit A**

19 **Q. PLEASE IDENTIFY THE BUSINESS NEED UNDERLYING**  
20 **ESCHELON'S PROPOSALS FOR DESIGN CHANGES (ISSUE NOS. 4-5**

---

<sup>27</sup> See Transcript of 12/2/02 Special Open Meeting, AZ Show Cause Case, p. 10, line 25 – p. 11, line 8 (emphasis added).

1           **AND SUBPARTS) AND SUMMARIZE THE ISSUES.**

2       A.     A design change allows a CLEC to change a service previously requested without  
3           the unnecessary delay and cost involved in canceling and re-submitting the  
4           request. Qwest provides Eschelon design changes today, and has since 2000  
5           under its Commission-approved ICA. Eschelon needs a ruling that provides  
6           certainty that Qwest will continue to provide design changes at TELRIC rates.  
7           The Agreement must contain language that makes Qwest's obligation clear in this  
8           regard so that Qwest does not refuse to provide design changes for loops at  
9           TRILIC rates (or even quit providing design changes for loops altogether),  
10          severely restrict access to design changes.

11          There are three open issues for resolution: (1) whether Qwest may charge a  
12          separate charge for design changes for unbundled loops even though Qwest has  
13          not done so in the past (ICA Section 9.2.3.8; Issue 4-5); (2) if so, whether Qwest  
14          may charge the same rate that it charges to perform design changes for UDITs for  
15          design changes for loops and certain Connecting Facility Assignment ("CFA")  
16          changes that are relatively common, require very little time, and can be performed  
17          on the day of cut during the loop installation process when Eschelon is already  
18          paying for coordination (ICA Section 9.2.3.9; Issue 4-5(a)); and (3) what is the  
19          appropriate rate (Exhibit A Section 9.20.13; Issue 4-5(c)). Specifically with  
20          respect to the rate, if Qwest may charge separately for design changes for  
21          unbundled loops: (a) what rate Qwest may charge for design changes for loops  
22          (Exhibit A Section 9.20.11.2); (b) what rate Qwest may charge for certain CFA

1 changes (Exhibit A Section 9.20.11.3); and (c) the appropriate footnote to assign  
2 to the interim for rates.<sup>28</sup>

3 Issue 4-5 and its subparts also relate to both Issue 9-31 (Nondiscriminatory  
4 Access to UNEs)<sup>29</sup> and Issue 22-90 (Unapproved Rates). Design changes is one  
5 of the examples provided in the closed portion of the language in Section 9.1.2  
6 (Issue 9-31) which Eschelon's proposal describes as examples of "Access to"  
7 UNEs and Qwest's proposal describes as examples of "Activities Available for"  
8 UNEs. The difference between the companies' proposals for Issue 9-31 revolves  
9 largely around whether the rate for UNE-related activities will be priced at  
10 TELRIC rates. If the rate is to be TELRIC, as proposed by Eschelon, the timing  
11 of when Qwest may charge the rate in situations for which it has not previously  
12 separately charged for the same activity is a subject of Section 22.6 (Issue 22-90).  
13 As discussed below, until recently, Qwest did not charge CLECs separately for  
14 design changes for unbundled loops (including CFA changes). Of the six Qwest  
15 states in which Eschelon historically does business, the only state in which Qwest  
16 did not unilaterally start charging Eschelon for design changes for loops was  
17 Minnesota. Eschelon's proposal for Section 22.6 reflects the Minnesota process  
18 (under which Qwest must obtain Commission approval before charging for  
19 activities Qwest previously performed without charge). If Eschelon's proposal  
20 for Issue 22-90 had been in place, Qwest would have needed to obtain

---

<sup>28</sup> The issue of the footnote will be resolved by the Commission's decision with respect to the appropriate interim rate for Design Changes for Loops and CFA changes.

<sup>29</sup> Issue 9-31 is addressed in the testimony of Mr. Starkey.

1 Commission approval before charging for design changes for loops in Oregon as  
2 well, instead of simply sending a letter to Eschelon. Particularly given that one  
3 day Qwest just started charging for design change charges for loops with no  
4 approval or change in the ICA in Oregon – even though it has admitted there is no  
5 design change charge for loop in the current Commission-approved Qwest-  
6 Eschelon ICA (or the SGAT)<sup>30</sup> – the Commission needs to require Qwest to  
7 obtain Commission approval before imposing such charges. Eschelon’s proposals  
8 for Issue 4-5 and subparts allow Qwest, upon Commission approval of the ICA, to  
9 assess interim rates. Nothing in Eschelon’s proposals for Issues 4-5, 9-31, or 22-  
10 90 would prevent Qwest from coming to the Commission to propose different  
11 rates for design changes and substantiate its costs.

12 **Q. WHAT IS ESCHELON’S PROPOSAL FOR ISSUE NO. 4-5 RELATING**  
13 **TO DESIGN CHANGES FOR LOOPS?**

14 A. Eschelon offers a contingent proposal under which, if an interim rate is negotiated  
15 by the companies or set by the Commission for design changes for loops,  
16 Eschelon will agree to Qwest’s proposed language for Section 9.2.3.8. Section  
17 9.2.3 (Unbundled Loop Rate Elements) states: “The following rates for  
18 Unbundled Loops are set forth in Exhibit A of this Agreement.” This sentence is  
19 followed by a list of rate elements. Qwest’s proposal is to add the following  
20 language to the list:

---

<sup>30</sup> In the Minnesota arbitration proceeding, Qwest witness Karen Stewart testified that "Mr. Denney is correct in stating that neither Qwest's SGAT nor the parties' current ICA includes a design change charge for loops." Stewart MN Rebuttal, p. 6, lines 27-28 (9/22/06).

1                   **Issue 4-5**

2                   Section 9.2.3.8 Design Change rates for Unbundled Loops (unless  
3                   the need for such change is caused by Qwest, in which case this  
4                   rate does not apply).

5                   If an interim rate is negotiated by the companies or set by the Commission for  
6                   design changes for loops, then this provision will be accurate, because Exhibit A  
7                   will contain such a rate for unbundled loops. Therefore, with such a rate in place,  
8                   Eschelon would withdraw its objection to this language.

9                   As provided by Eschelon’s proposals for Issues 9-31 and 22-90, Qwest should  
10                  have to continue to provide design changes for loops without an additional charge  
11                  (as it did, until recently, for years under the existing ICA) until Qwest  
12                  substantiates its costs and obtains Commission approval for a charge. If  
13                  Eschelon’s proposals for Issues 9-31 and 22-90 are adopted (even if an interim  
14                  rate is not set, as in Minnesota), then Eschelon will also agree to Qwest’s  
15                  proposed language for Section 9.2.3.8, because those proposals will prevent  
16                  Qwest from unilaterally charging an unapproved non-negotiated rate. In  
17                  Minnesota, for example, Eschelon and Qwest have agreed to the above language  
18                  for Section 9.2.3.8 with no rate in Exhibit A for design changes, because the  
19                  Minnesota cost order requires Qwest to “obtain Commission approval before  
20                  charging for a UNE or process that it has previously offered without a charge.”<sup>31</sup>

---

<sup>31</sup> October 2, 2002 Order in MN PUC Docket CI-01-1375 (“MN 271 Cost Order”). The language for Section 22.6 is somewhat different in Minnesota, but to the extent Qwest argues it has a different meaning than the language proposed by Eschelon for Section 22.6 in this case, the Minnesota requirements are laid out in the MN 271 Cost Order, which explains why Eschelon could agree to the language in Minnesota but not here until those same requirements apply in Colorado. As I

1 If there is no interim rate and Eschelon's language is not adopted for Issue 22-90,  
2 then Qwest's proposed language for Section 9.2.3.8 should be deleted, just as in  
3 the SGAT and the current Qwest-Eschelon ICA there is no rate for design  
4 changes for unbundled loops<sup>32</sup> and no associated language allowing Qwest to  
5 charge for design changes for unbundled loops.<sup>33</sup> The absence of language should  
6 not be interpreted to mean, however, that Qwest does not have to provide design  
7 changes for unbundled loops as discussed with respect to Issue 9-31.<sup>34</sup>

8 **Q. WHAT LANGUAGE DO THE COMPANIES PROPOSE FOR ISSUE NO.**  
9 **4-5(A) RELATING TO DESIGN CHANGES FOR CONNECTING**  
10 **FACILITY ASSIGNMENT ("CFA") CHANGES?**

11 A. The companies' proposals for design changes for CFA changes are as follows:

12 **Eschelon's Proposal for Issue 4-5(a)**

13 9.2.3.9 CFA Change – 2/4 Wire Loop Cutovers. Connecting  
14 Facility Assignment (CFA) changes for Coordinated Installation  
15 Options for 2-Wire and 4-Wire analog (voice grade) Loops  
16 (excluding the Batch Hot Cut Process) on the day of the cut, during  
17 test and turn up. When this charge applies, the Design Change rate  
18 for Unbundled Loops does not apply.

19 **Qwest's Proposal for Issue 4-5(a)**  
20

---

discuss below, Eschelon has consistently said that its proposal for Section 22.6 (Issue 22-90) is to use the Minnesota approach in the other states and only recently had to modify its language when it became clear that Qwest was going to attempt to construe the language in other states more narrowly.

<sup>32</sup> See Stewart MN Rebuttal, p. 6, lines 27-28 (9/22/06).

<sup>33</sup> The SGAT authorizes Qwest to charge Design Change charges for dedicated transport but not loops. (*Compare* SGAT Section 9.6.4.1.4(c) *with* SGAT Section 9.2.4.)

<sup>34</sup> See Mr. Starkey's testimony for discussion of Issue 9-31.

1                   9.2.3.9 Rates for CFA changes are set forth in Exhibit A (unless  
2                   the need for such change is caused by Qwest, in which case this  
3                   rate does not apply).

4                   As I discuss below, design changes associated with CFA changes during the  
5                   installation of a loop should have a separate rate, as this activity is relatively  
6                   common, requires very little time and can be performed day of cut during the loop  
7                   installation process. As with Eschelon’s proposal for Section 9.2.3.8 (Issue 4-5),  
8                   for Issue 4-5(a), Eschelon offers a contingent proposal under which, if an interim  
9                   rate is negotiated by the companies or set by the Commission for design changes  
10                  for loops, Eschelon will agree to Qwest’s proposed language for Section 9.2.3.9.  
11                  If Eschelon’s proposals for Issues 9-31 and 22-90 are adopted (even if an interim  
12                  rate is not set, as in Minnesota), then Eschelon will also agree to Qwest’s  
13                  proposed language for Section 9.2.3.9, because those proposals will prevent  
14                  Qwest from unilaterally charging an unapproved non-negotiated rate, for the  
15                  reasons discussed.

16   **Q.    WHAT LANGUAGE DO THE COMPANIES PROPOSE FOR ISSUE NO.**  
17   **4-5(c) RELATING TO CHARGES FOR DESIGN CHANGES?**

18   A.    The companies’ proposals for charges for design changes for CFA changes are as  
19   follows:

20                   **Eschelon’s Proposal for Issue No. 4-5(c) (Sections in Exhibit A):**

21                   9.20.11 Design Change	\$103.10	<del>A</del>
22 <u>9.20.11.1 Design Change (Transport)</u>	<u>\$58.27</u>	<u>1</u> <sup>35</sup>
23 <u>9.20.11.2 (Loop)</u>	<u>\$30.00</u>	<u>1</u>

---

<sup>35</sup> Note “1” to Exhibit A provides in agreed upon language: “Rates not approved in cost docket.”

1                    9.20.11.3 CFA – 2/4 Wire Loop cutovers    \$5.00            1

2

3                    **Qwest’s Proposal for Issue No. 4-5(c) (Sections in Exhibit A):**

4                    9.20.11 Design Change                    \$103.10            12<sup>36</sup>

5                    9.20.11.1 Design Change (Transport)            \$58.27            1

6                    9.20.11.2 (Loop)                                    \$30.00            1

7                    9.20.11.3 CFA – 2/4 Wire Loop cutovers    \$5.00            1

8                    **Q.    WHAT IS THE EFFECT OF ESCHELON’S PROPOSED LANGUAGE?**

9                    A.    Eschelon’s language makes two things clear: (1) Qwest must continue to provide  
10                    design changes to Eschelon pursuant to the ICA and (2) Qwest can assess a cost-  
11                    based rate for design changes. Eschelon’s language actually benefits Qwest by  
12                    providing the opportunity for Qwest to charge Commission-approved cost-based  
13                    rates for design changes for loops and CFAs (and interim rates until Commission-  
14                    approved rates are established) – something that Qwest has never been able to do  
15                    under the existing Qwest/Eschelon ICA, while at the same time maintaining the  
16                    status quo with regard to UDIT design changes.

17                    Under Eschelon’s proposal, there is no need for the Commission to set permanent  
18                    rates at this time. For UDIT, loops and CFA changes, Eschelon’s proposal allows  
19                    Qwest to assess an interim rate that Qwest could charge unless and until the  
20                    Commission approved a different rate for these design changes (*see* Issue 4-5(c)).

21                    Nothing in Eschelon’s proposal would prevent Qwest from coming to the

---

<sup>36</sup> Note “12” to Exhibit A provides in agreed upon language: “Rates proposed in UM 1025. Rates not approved in cost docket.”

1 Commission to propose different rates for Design Changes and substantiate its  
2 costs.

3 **Q. WHAT IS THE EFFECT OF QWEST'S PROPOSED LANGUAGE?**

4 A. The effective result would allow Qwest to assess the very same design change  
5 charge for all three types of design changes discussed under Issue No. 4-5 (*i.e.*,  
6 loops, CFAs and UDIT). Further, as indicated by Qwest during negotiations and  
7 evidenced by Qwest's 8/31/06 non-CMP notice (which is discussed below),  
8 Qwest's ultimate objective is to apply tariff rates for design changes. Despite the  
9 interim rates that Qwest would be allowed to charge for design changes under  
10 Eschelon's proposal for Issue 4-5(c), Qwest argues that Eschelon's proposal  
11 would improperly limit Qwest's ability to assess charges for design changes and  
12 would prevent Qwest from recovering the costs.<sup>37</sup>

13 **Q. CAN YOU PROVIDE EXAMPLES THAT SUBSTANTIATE**  
14 **ESCHELON'S CONCERNS AS REAL BUSINESS CONCERNS?**

15 A. Yes. During negotiations on design changes, Qwest submitted a proposal that  
16 would have applied tariff rates to design changes. Qwest later changed its  
17 position in negotiations, but indicated in meetings between the two companies  
18 that Qwest's change in position for negotiations should not be construed as  
19 Qwest's giving up on its tariff rate proposal for design changes, and that Qwest  
20 fully intended to pursue this proposal outside of negotiations. Qwest confirmed  
21 its previously stated strategy of pursuing tariff rates for design changes in its

---

<sup>37</sup> Qwest Response, p. 12.

1 August 31, 2006 non-CMP notice (Process Notification  
2 PROS.08.31.06.F.04159.Amendments.ComlAgree.SGAT),<sup>38</sup> effective on one  
3 day's notice, which announced that Qwest was posting a new "template"  
4 interconnection agreement on its website on September 1, 2006.<sup>39</sup> This new  
5 negotiations template added a tariff reference for the following rate elements:  
6 Additional Dispatch, Trouble Isolation Charge, Design Charge, Expedite Charge,  
7 Cancellation Charge, and Maintenance of Service Charge. Qwest's position is  
8 that design changes are "not UNEs" and therefore do not need to adhere to the  
9 federal TELRIC pricing rules. This new revelation was made by Qwest despite  
10 all of the work that was done in the 271 proceedings relating to nondiscriminatory  
11 access to UNEs and regardless of whether or not a state commission already has a  
12 cost-based rate for that activity in place.

13 What is concerning to Eschelon about this recent non-CMP notice is that Qwest  
14 has already indicated to Eschelon that Qwest's ultimate objective is to apply tariff  
15 rates to Eschelon (*i.e.*, the same changes that Qwest announced in its 8/31/06 non-  
16 CMP notice), even though Qwest is not currently pursuing that proposal in  
17 negotiations/arbitrations with Eschelon (or CMP, for that matter). This means  
18 that Qwest could refuse to negotiate its tariff proposal (by pursuing a different

---

<sup>38</sup> Qwest's 8/31/06 non-CMP notice is Eschelon/28 to my direct testimony.

<sup>39</sup> Mr. Starkey explains that Qwest's position stands in stark contrast to the FCC's rules and orders that require Qwest to provide nondiscriminatory access not only to UNEs themselves, but also nondiscriminatory *access* to those UNEs that provide a CLEC with a meaningful opportunity to compete. *See* Issue 9-31.

1 proposal in arbitrations), yet ultimately apply that tariff proposal to Eschelon once  
2 the arbitrations are finished.

3 **Q. WHAT SHOULD BE TAKEN FROM THIS EXAMPLE?**

4 A. Both of Qwest's positions on design change charges (*i.e.*, that all design change  
5 charges should be priced at the same unapproved rate for UDIT and that tariff  
6 rates should apply to design changes) stand in stark contrast to the stance Qwest  
7 took between 1999 and late 2005, during which time Qwest provided design  
8 change charges in Oregon for loops (including CFA changes) without additional  
9 charge. Qwest announced both of these misguided proposals with no  
10 corresponding change in the ICA or other Commission approval. This highlights  
11 the need for certainty and Commission oversight related to design changes for  
12 UNEs so that Eschelon is not subjected to Qwest's continual efforts to charge  
13 non-cost based rates for design changes. This arbitration is the appropriate forum  
14 for addressing the ICA language and ensuring that the Commission maintains  
15 jurisdiction over UNE-based rates; adopting Eschelon's language will establish  
16 equitable contract language and avoid future disputes.

17 **Q. ARE THERE OTHER EXAMPLES DEMONSTRATING THAT**  
18 **ESCHELON'S CONCERNS ARE REAL?**

1 A. Yes. On September 11, 2006, Qwest issued a Level 3 CMP notice<sup>40</sup> that revised  
2 its Provisioning and Installation Overview to change the verbal supplement for  
3 CFA slot change on the due date. Qwest added the following language:

4 NOTE: For CFA or slot changes, it is the CLEC's responsibility to  
5 provide Qwest with a new CFA that will work. Qwest will only  
6 accept one verbal CFA change on the due date. If that CFA fails to  
7 work, Qwest will place the order in jeopardy (customer jeopardy).  
8 No further action will be taken on Qwest's part until Qwest  
9 receives a valid supplemental request to change the due date and  
10 the CFA (if applicable). Additional charges may apply.

11 This language clearly restricts the availability of CFA changes (CFA changes are  
12 discussed in more detail below), unnecessarily complicates the provisioning  
13 process and leaves the door open for Qwest to assess "additional charges" –  
14 which, coupled with Qwest's 8/31/06 non-CMP notice, means that Qwest will  
15 apply tariff rates. While Qwest later retracted this CMP notice,<sup>41</sup> Mr. Starkey  
16 explains in his direct testimony that Qwest subsequently issued a MCC notice that  
17 again limited CFA changes to one on the day of the cut and now Qwest claims  
18 (erroneously) that it has always been Qwest's intent to limit these CFA changes to  
19 one.<sup>42</sup> Qwest's recent CMP notice and Qwest's subsequent MCC notice only  
20 confirms the concern I expressed above that, without the specific language  
21 Eschelon is proposing for Issue 4-5 and subparts, Qwest may attempt to quit

---

<sup>40</sup> PROS.09.11.06.F.04161.P\_&I\_Overview\_v91.

<sup>41</sup> Qwest filed a notice on 10/20/06 (PROS.10.20.06.F.04281.Retract\_CFA\_P&I\_OvrvwV91) to retract PROS.09.11.06.F.04161.P\_&I\_Overview\_v91.

<sup>42</sup> I have attached a chronology of Qwest's attempts to limit the number of CFA changes to one on the installation due date as Eschelon/27. This exhibit includes a chronology, Qwest's notices, Eschelon's escalations, and excerpts from the minutes of the 10/18/06 and 11/15/06 CMP meetings.

1 providing design changes altogether (or severely restrict access to design  
2 changes).

3 **Q. HAVE SOME ISSUES RELATING TO DESIGN CHANGES CLOSED?**

4 A. Yes. The companies have agreed upon a definition for design changes in Section  
5 4.0,<sup>43</sup> and it is reflected in the proposed ICA that Eschelon filed with its Petition.  
6 In addition, the parties agreed to delete language that had been placed in Sections  
7 9.2.4 and 9.6.4 (Ordering Processes)<sup>44</sup> and deal with the rate element issues more  
8 logically in Section 9.2.3 and 9.6.3 (Rate Elements). This resulted in the deletion  
9 of Section 9.2.4.4.2 (formerly a part of Issue 4-5) in its entirety and closure of  
10 Section 9.6.4.1.4 with the following language:

11 9.6.4.1.4 Subsequent changes to the quantity of services on an  
12 existing order will require a revised order.

13 In addition, as there is an interim rate for design changes *for UDITs* in Exhibit A,  
14 Section 9.6.3.6 (formerly Issue 4-5(b)) closed with the following language:

15 9.6.3.6 Design Change rates for UDITs are contained in Exhibit A  
16 of this Agreement. This rate does not apply when the need for  
17 such change is caused by Qwest.

18 **Q. YOU'VE SAID THAT THE PARTIES HAVE REACHED AGREEMENT**  
19 **ON THE DEFINITION OF "DESIGN CHANGES." WHAT IS THE**  
20 **AGREED UPON DEFINITION?**

---

<sup>43</sup> See Eschelon/45 to Ms. Johnson's direct testimony.

<sup>44</sup> For some reason, the SGAT has language authorizing Qwest to charge Design Change charges for dedicated transport in the ordering rather than rate element section. (See SGAT Section 9.6.4.1.4(c).)

1 A. The term “Design Change” is defined in Section 4 of the Agreement as follows:

2 “Design Change” is a change in circuit design after Engineering  
3 Review required by a CLEC supplemental request to change a  
4 service previously requested by CLEC. An Engineering Review is  
5 a review by Qwest personnel of the service ordered and the  
6 requested changes to determine what change in the design, if any,  
7 is necessary to meet the changes requested by CLEC. Design  
8 Changes may include a change in the type of Network Channel  
9 Interface (NCI code) on pending orders and changes in End User  
10 Customer address within the same Serving Wire Center requiring  
11 changes to facilities or terminations. Design Change does not  
12 include modifications to records without physical changes to  
13 facilities or services, such as changes in the circuit reference  
14 (CKR) (i.e., the circuit number assigned by CLEC) or Service  
15 Name (SN) (i.e., the name of the End User Customer at a circuit  
16 location).

17 **Q. IS THE DESIGN CHANGE ISSUE AN EXAMPLE OF QWEST USING**  
18 **THE CMP PROCESS TO ITS OWN ADVANTAGE – AND THE**  
19 **DISADVANTAGE OF CLECS?**

20 A. Yes. Qwest provided design changes from 1999 – 2005 without any additional  
21 charges to Eschelon. On September 1, 2005, Qwest sent an unexpected letter to  
22 CLECs stating that “Qwest will commence billing CLECs non-recurring charges  
23 for design changes to Unbundled Loop circuits” beginning on Oct. 1, 2005.<sup>45</sup> In  
24 that letter, Qwest also included a definition of “design change.”<sup>46</sup> Qwest notified  
25 CLECs of these changes and new charges for design changes without using the  
26 CMP and without obtaining Commission approval for the charges. When

---

<sup>45</sup> Eschelon/10, September 1, 2005 letter from Qwest with the subject line “Billing for design changes on Unbundled Loop.” Document No. PROS.09.01.05.F.03204.Design\_Chgs\_Unbundld\_Loop.

<sup>46</sup> In its September 1, 2005 letter, Qwest stated that design changes include the following activities: Connecting Facility Assignments (CFA) change, Circuit Reference (CKR) change, CKL 2 end user address change on a pending LSR, Service Name (SN) change, and NC/NCI Code change on a pending LSR.

1 Eschelon inquired about this change,<sup>47</sup> Qwest CMP personnel responded that “this  
2 item is outside the scope of CMP.”<sup>48</sup> Qwest will likely argue that addressing the  
3 change regarding rates for design changes outside CMP was correct because CMP  
4 does not deal with rates or rate application, but Qwest chose not to address the  
5 definition of design changes (a non-rate or rate application issue) in the CMP, and  
6 also chose not to seek Commission approval for its rates.

7 However, Qwest changed its tune when it developed its position on design  
8 changes for its arbitrations with Eschelon. In its position statement for the Issues  
9 Matrix in Minnesota (the first state in which the arbitration was filed), Qwest  
10 provided the following position on the definition of Design Change (an issue that  
11 has since been closed in these arbitrations):

12 Qwest agrees that there needs to be a common understanding of  
13 this definition, but this definition concerns a process that affects all  
14 CLECs, not just Eschelon. The entire purpose of CMP was to  
15 ensure that the industry (not just Qwest or one CLEC) is involved  
16 in creating and approving processes so that processes are uniform  
17 among all CLECs. Processes that affect all CLECs should be  
18 addressed through CMP, not through an arbitration involving a  
19 single CLEC. Further, implementing a unique process for Eschelon  
20 that Qwest does not follow for other CLECs would require Qwest  
21 to modify its systems or processes and would cause Qwest to incur  
22 costs it is entitled to recover under the Act.

23 Qwest had every opportunity to address the definition of design change in the  
24 CMP, but instead introduced a definitional change that affected all CLECs in a

---

<sup>47</sup> Eschelon escalated this item on September 26, 2005 (escalation no. 092605-1E35). I have provided as Eschelon/11 an email exchange between Eschelon and Qwest detailing Eschelon’s escalation, Qwest’s confirmation and Qwest’s response.

<sup>48</sup> See, Eschelon/11, page 3.

1 non-CMP announcement. But when Eschelon raised the issue in arbitration,  
2 Qwest stated that the definition of design change is properly addressed in CMP  
3 because it affects all CLECs.

4 Furthermore, the definition of design change was closed, with Qwest agreeing to a  
5 definition of “design change” that differs from the definition that it introduced in  
6 its September 2005 letter to all CLECs.<sup>49</sup> Qwest made the determination to close  
7 on the definition of design change, agreeing to Eschelon’s proposed definition,  
8 outside the CMP, although its original position was that the ICA should not  
9 include Eschelon’s definition because it was an issue that affected all CLECs and  
10 should be addressed in CMP.<sup>50</sup> Qwest’s continued inconsistency on this issue  
11 underscores the need for the Commission to deal with the issue of design changes  
12 now in this ICA arbitration, which is the proper forum for resolution of these  
13 issues between Qwest and Eschelon, in order to provide Eschelon with the  
14 certainty that it needs to run its business and serve its customers.

---

<sup>49</sup> The closed definition of Design Changes states that, “Design change *does not include* modifications to records without physical changes to facilities or services, such as changes in the circuit reference (CKR)... or Service Name (NM)...” (emphasis added) Yet, Qwest’s September 1, 2005 letter states as follows: “Among the charges for the design change that will be billed, the following activities will generate a non-recurring design change charge per occurrence:...”Circuit Reference (CKR) change”...”Service Name (SN) change...” Despite Qwest’s agreement to language in the Eschelon ICA that excludes CKR and SN changes from design change charges, Qwest is still charging design change charges for these activities. And Qwest is applying a design change charge designed for dedicated transport, though the agreed to language identifies these activities as modifications without physical changes to facilities or services.

<sup>50</sup> There are numerous other examples of Qwest cherry picking issues to address in CMP because they allegedly affect all CLECs, and then agreeing to issues in bilateral negotiations that affect all CLECs when Qwest likes the terms. See the testimony of Michael Starkey and Bonnie Johnson.

1 **Q. DOES THE SGAT OR THE COMPANIES' CURRENT ICA HAVE ANY**  
2 **LANGUAGE AUTHORIZING CHARGES FOR DESIGN CHANGES FOR**  
3 **LOOPS OR CFA CHANGES?**

4 A. No, there is no basis in the SGAT or current ICA for a design change charge for  
5 loops or CFA changes. The only mention of design change charges anywhere is  
6 Section 9.6 of the SGAT entitled "Unbundled Dedicated Interoffice Transport,"  
7 which states (Section 9.6.4.1.4) that: "additional charges apply for the following  
8 modifications to existing orders unless the need for such change is caused by  
9 Qwest...c) Design change..." However, no similar language is included under  
10 the UNE loops section (Section 9.2), and indeed, the words "design change" do  
11 not appear anywhere else in the ICA.

12 **Q. HAS QWEST AGREED THAT DESIGN CHANGE CHARGES FOR UNE**  
13 **LOOPS AND CFAS ARE NOT IN QWEST'S SGAT OR THE CURRENT**  
14 **ICA?**

15 A. Yes. As I mentioned, on September 1, 2005, Qwest sent an unexpected letter to  
16 CLECs stating that "Qwest will commence billing CLECs non-recurring charges  
17 for design changes to Unbundled Loop circuits" beginning on Oct. 1, 2005. In  
18 that notice, Qwest stated no basis for the charges, but indicated that it would bill  
19 CLECs, including Eschelon, "at the rate found in the miscellaneous elements of  
20 Exhibit A or the specific rate sheet in your Interconnection agreement." Qwest's  
21 reference to the ICA in the letter suggested, therefore, that Qwest was claiming it  
22 had some contractual right to bill these rates. In the Minnesota arbitration

1 proceeding, however, Qwest witness Karen Stewart testified that "neither Qwest's  
2 SGAT nor the parties' current ICA includes a design change charge for loops."<sup>51</sup>  
3 Based on this admission, Qwest should credit CLECs, including Eschelon, for the  
4 rates it has billed to date and not bill additional charges for design charges for  
5 loops (including CFA changes) unless and until it obtains an ICA that allows it to  
6 charge for design changes.

7 **ISSUE 4-5 AND 4-5(a)**

8 **Q. HAS ESCHELON UNCONDITIONALLY AGREED TO PAY QWEST**  
9 **FOR DESIGN CHANGES?**

10 A. No. Between 1999 and 2005, Qwest performed design changes for loops without  
11 separate explicit charges, and the only support for any separate design change  
12 charge found anywhere is in the UDIT section of the SGAT. Qwest unilaterally  
13 changed this policy when it issued its September 2005 letter indicating that Qwest  
14 would begin assessing design charges for UNE loops. To make sure that Qwest  
15 does not refuse to provide design changes to Eschelon altogether, Eschelon  
16 conditionally agreed as a concession in these negotiations to add language in the  
17 Loops section dealing with design change charges and agreed to pay interim rates.  
18 One aspect of Eschelon's conditional concession was that Qwest would  
19 substantiate design change charges at the Commission (with the rate being located  
20 in the Agreement) and Eschelon could argue for a \$0.00 rate if Qwest was already  
21 recovering design change charges in other rates. A reasonable rate for design

---

<sup>51</sup> Stewart MN Rebuttal, p. 6, lines 27-28 (9/22/06).

1 changes would also require them to be TELRIC rates. Eschelon conditionally  
2 agreed to compensate Qwest based on these conditions because they provide the  
3 certainty Eschelon needs to be able to reasonably compete in the market (*i.e.*,  
4 ensures that Qwest does not have unilateral control over establishing and  
5 changing the rates for design changes) and ensure that Qwest is not double-  
6 recovering costs.

7 **Q. PLEASE DESCRIBE HOW QWEST'S PROPOSALS REGARDING**  
8 **DESIGN CHANGES WILL INCREASE ESCHELON'S COSTS.**

9 A. One of the sub-issues under Issue No. 4-5 – CFA change – brings to life the  
10 impact the lack of certainty and Commission oversight could have on Eschelon's  
11 business. Qwest applies the same expensive charge it developed for design  
12 changes for unbundled dedicated transport (UDIT) – a charge that is higher than  
13 the original installation charge in many Qwest states including Oregon – to all  
14 design changes, including CFA changes. However, the CFA change involves a  
15 simple “lift and lay” activity by the Qwest central office technician who is already  
16 at the frame and in contact with the CLEC representative and the Qwest personnel  
17 coordinating the process. As a result, this activity takes only a few seconds or  
18 perhaps minutes, yet Qwest assesses a design change charge that exceeds the  
19 original installation charge for the entire loop. Given that the CFA change is  
20 comprised of one of a number of activities involved in installation (*i.e.*, lift and  
21 lay), a rate for a CFA change that exceeds (or even comes close) to the installation  
22 rate for a loop is much too high. Since the CFA change described in Eschelon's

1 language is the most frequent design change to occur and the least expensive to  
2 perform, Eschelon needs the certainty of Commission oversight over any attempt  
3 by Qwest to impose expensive, non-cost based charges for CFA (or other) design  
4 changes that greatly increases Eschelon's costs (whether that be Qwest's proposal  
5 to apply the UDIT design change charge to all design changes or Qwest's  
6 proposal to apply tariff rates to design changes). Eschelon would otherwise be  
7 unable to adequately budget and plan its business with this type of uncertainty  
8 looming over its cost of doing business.

9 **Q. CAN YOU QUANTIFY, IN DOLLAR TERMS, HOW ESCHELON'S**  
10 **BUSINESS IS AFFECTED BY QWEST'S DESIGN CHANGE CHARGE**  
11 **PROPOSALS?**

12 A. Yes. I have provided below a number of examples in which the CFA change  
13 described above – an activity that takes a matter of seconds or minutes – has  
14 significantly increased Eschelon's costs:

- 15 1. In Oregon, on Qwest Order Number N47554579, PON OR648868JAS, with a  
16 completion date of 3/14/06, Qwest billed non-recurring charges of \$634.00. The  
17 one time charge for installation (coordinated installation without cooperative  
18 testing) was \$15.40 but because the CFA changed 6 times, at the rate of \$103.10  
19 per Design Change charge, the final installation cost \$634.00.
- 20 2. In Oregon, on Qwest Order Number N55606983, PON OR690001JXY, with a  
21 completion date of 6/19/06, Qwest billed non-recurring charges of \$427.80. The  
22 one time charge for installation (coordinated installation without cooperative  
23 testing) was \$15.40 but because the CFA changed 4 times, at the rate of \$103.10  
24 per Design Change charge, the final installation cost \$427.80.
- 25 3. In Oregon, on Qwest Order Number N56303135, PON OR702166LSR, with a  
26 completion date of 6/20/06, Qwest billed non-recurring charges of \$216.95. The  
27 one time charge for installation (coordinated installation without cooperative

1 testing) was \$10.75 but because the CFA changed twice, at the rate of \$103.10 per  
2 Design Change charge, the final installation cost \$216.95.

3 4. In Washington, on Qwest Order Number N55909589, with a completion date of  
4 7/3/06, Qwest billed non-recurring charges of \$160.71. The one time charge for  
5 installation (coordinated installation without cooperative testing) was \$59.81 but  
6 because the CFA changed twice, at the rate of \$50.45 per Design Change charge,  
7 the final installation cost \$160.71.

8 5. In Arizona, on Qwest Order Number N53397956, PON AZ684385JKY, with a  
9 completion date of 5/11/06, Qwest billed non-recurring charges of \$191.50. The  
10 one time charge for installation (coordinated installation without cooperative  
11 testing) was \$45.92 but because the CFA changed twice, at the rate of \$72.79 per  
12 Design Change charge, the final installation cost \$191.50.

13 **Q. WHY SHOULD DESIGN CHANGE CHARGES BE PRICED AT TELRIC?**

14 A. The design change charges discussed in my testimony pertain to design changes  
15 for UNEs (*e.g.*, UNE loop and UDIT). UNEs are required to be priced according  
16 to the federal TELRIC pricing rules, and the design changes are part and parcel of  
17 Qwest's obligation under Section 251(c)(3) of the Telecommunications Act to  
18 provide "nondiscriminatory access to network elements on an unbundled  
19 basis...on rates, terms, and conditions that are just, reasonable, and  
20 nondiscriminatory..." The Telecommunications Act requires Qwest to provide  
21 UNEs as well as functions necessary to ready those UNEs for CLECs' use in a  
22 nondiscriminatory manner and at cost-based rates. This TELRIC-based pricing  
23 requirement ensures that Eschelon does not pay more than Qwest "pays" for using  
24 the same facilities.

25 **Q. ARE QWEST'S DESIGN CHANGE CHARGES AS THEY RELATE TO**  
26 **UNE LOOPS AND CFA CHANGES IN LINE WITH THEIR**

1           **UNDERLYING COSTS?**

2    A.    No. A comparison of Qwest's design change charges to its installation charges  
3           across the Qwest region shows that Qwest assesses a design change charge that  
4           exceeds the charge for Coordinated Installation Without Cooperative Testing for  
5           Analog loops in Arizona, Colorado, Iowa, Idaho, Montana, Nebraska, North  
6           Dakota, Oregon, South Dakota, Utah, and Wyoming.<sup>52</sup> Qwest's proposed interim  
7           design change rate in Oregon (\$103.10)<sup>53</sup> exceeds the installation charge for a 2/4  
8           wire analog loop (\$10.75)<sup>54</sup> by 859% and also exceeds the rate for Coordinated  
9           Installation Without Cooperative Testing (\$15.40)<sup>55</sup> by 569%. This defies logic,  
10          as design change charges, especially as applied to CFA changes, should be less  
11          than the installation charge for initially establishing the circuit. The fact that  
12          Qwest is charging more for CFA changes than for installation and the effect this  
13          has on Eschelon's cost to acquire customers (particularly with regard to loop and  
14          CFA design changes) demonstrates the need for Commission oversight for design  
15          changes.

16    **Q.    WHY WOULD CFA CHANGE CHARGES BE LESS THAN LOOP**  
17    **INSTALLATION CHARGES?**

---

<sup>52</sup> Qwest's SGAT Exhibit As, containing the rates mentioned, can be downloaded from the following website: <http://www.qwest.com/wholesale/clecs/sgatswireline.html>. As explained by Mr. Starkey, Qwest no longer makes SGATs available for opt in and has provided SGATs in its website for reference purposes only. See Eschelon/65, Eschelon/66, and Eschelon/67.

<sup>53</sup> Exhibit A, 9.20.11.1.

<sup>54</sup> Exhibit A, 9.2.4.1.1.1 (Mechanized).

<sup>55</sup> Exhibit A, 9.2.4.4.1.1 (Mechanized).

1 A. Because connecting to the CFA is one component (or a subset of components) of  
2 installation, the work (and cost) involved in performing a CFA change will be less  
3 than the work (and cost) of performing the installation.

4 CFA (“Connecting Facility Assignment”) is part of the physical provisioning  
5 process that allows Eschelon to transfer a customer’s loop from the Qwest’s  
6 switch to Eschelon’s switch. As part of the transfer process, Eschelon  
7 electronically assigns the customer’s loop (i) to specific facilities in Eschelon’s  
8 switch, (ii) to equipment located in Eschelon-owned collocation space, (iii) and to  
9 a Connecting Facility Assignment (“CFA”) on the ICDF Frame that will be used  
10 by the Qwest technician to connect the customer’s loop to Eschelon’s collocated  
11 equipment. On the day of cut (*i.e.*, installation) Qwest removes the old cross  
12 connection jumper that connected the customer’s loop to the Qwest’s switch and  
13 terminates the pre-wired cross connection from Eschelon’s CFA to the customer’s  
14 loop. Occasionally, the CFA assigned to the customer is bad, and Eschelon and  
15 Qwest can not complete the cutover.<sup>56</sup> In this instance, Eschelon assigns a new  
16 CFA to the customer and the Qwest central office technician reconnects the cross  
17 connect to the newly assigned CFA on the ICDF Frame. A CFA design change is  
18 needed to reassign the customer from the CFA to which the customer was  
19 originally assigned (which was bad) to the new CFA. This is also referred to as a

---

<sup>56</sup> The need for a CFA change in these instances can be Eschelon-caused and Qwest-caused.

1 “same day pair change” because the customer’s pair is changed from one CFA to  
2 another on the day of the cut.<sup>57</sup>

3 In this scenario, Qwest and Eschelon are already in contact and coordinating the  
4 cutover, and the Qwest central office technician is already standing at the frame.  
5 Once it is determined that a CFA change is necessary, the Qwest central office  
6 technician simply removes the jumper from the bad CFA and reattaches to the  
7 new CFA. Depending on where the new CFA resides on the frame in relation to  
8 the old, Qwest’s technician may have to move a few steps (or may not have to  
9 move at all) to attach to the new CFA. In these situations, the Qwest CO  
10 technician is already available and working on the cutover, and it requires little, if  
11 any, additional time to switch CFAs. This activity is a simple “lift and lay”  
12 activity that can be performed in matter of seconds or minutes. By comparison,  
13 this would be akin to plugging a lamp into an outlet, realizing that the outlet does  
14 not work, and plugging the lamp into a different outlet somewhere in the room  
15 (the new outlet may be the one directly above or below the bad outlet or you may  
16 use an outlet across the room that requires you to walk a few steps). And all the  
17 while, Eschelon is paying for coordination, or for Qwest’s central office  
18 technician to remain in contact with personnel in Qwest’s test center so that the  
19 technician has real time access to information during the cutover. Therefore, if it

---

<sup>57</sup> The type of CFA change addressed in my testimony (same day pair change) is the CFA change addressed in Eschelon’s proposal for Issue 4-5(a), which is a very limited type: *i.e.*, a CFA change to a 2/4 wire analog loop, on the day of a coordinated cut, during test and turn up, excluding batch hot cuts.

1 is discovered that a CFA change is needed, the central office technician can  
2 immediately perform another “lift and lay” to another CFA.<sup>58</sup>

3 Obviously, the work and costs involved in this design change, to the extent they  
4 are not already recovered in other rates, would be very minimal, reflecting, at  
5 most a few minutes of the central office technician’s time. It is these types of  
6 design changes, however, that can drive up Eschelon’s cost of installation by  
7 hundreds of dollars per install.

8 Qwest’s current practice of billing multiple times more for CFA changes than the  
9 Commission-approved installation rate (*i.e.*, for a new install and not just a later  
10 change in design) shows that Commission oversight is needed with regard to CFA  
11 change charges.<sup>59</sup> There is no evidence to suggest that the cost of CFA changes  
12 associated with loops exceeds the initial cost of installing a loop, and indeed,  
13 everything points to the contrary. Design changes associated with CFA changes  
14 during the installation of a loop should have a separate rate, as this activity is  
15 relatively common, requires very little time and can be performed day of cut  
16 during the loop installation process. That is why Eschelon has proposed separate

---

<sup>58</sup> During a coordinated cut, the Qwest central office technician is in constant contact with personnel in Qwest’s CLEC Coordination Center (QCCC), who is, in turn, in contact with Eschelon personnel responsible for test and turn up. If after the central office technician performs the “lift and lay” and Eschelon’s testing determines there is a problem and a CFA change is needed, the central office technician will have real time access to this information through the QCCC and will be able to immediately perform another “lift and lay.” Eschelon pays for the coordination of this cut (or the involvement of QCCC) separately.

<sup>59</sup> For example in the following states Qwest charges a design change charge that exceeds the SGAT rates for Coordinated Installation Without Cooperative Testing for Analog loops: Arizona, Colorado, Iowa, Idaho, Montana, Nebraska, North Dakota, Oregon, South Dakota, Utah, and Wyoming.

1 ICA language addressing design changes for loops and CFAs and separate rates  
2 for those activities in Exhibit A.

3 **Q. ARE THE COSTS INVOLVED IN A DESIGN CHANGE FOR UDIT SO**  
4 **SIMILAR TO THAT OF LOOPS THAT THE UDIT RATE COULD**  
5 **REASONABLY BE USED AS A PROXY FOR THE LOOP DESIGN**  
6 **CHANGE RATE OR EVEN A LOOP CFA CHANGE RATE?**

7 A. No. Loop and transport are separate and distinct services and involve different  
8 processes and work – with transport typically being more complex (and higher  
9 cost) than loops. I explained above why the UDIT Design Change charge should  
10 not apply to a CFA change. Likewise, this is the case with regard to the UDIT  
11 design change rate Qwest is applying to loop design changes. As a result,  
12 applying a rate designed for UDIT to loops will result in Qwest over-recovering  
13 its costs related to design changes for loops.

14 **Q. HOW DO YOU KNOW THE MANNER IN WHICH QWEST**  
15 **STRUCTURES IT'S DESIGN CHANGE CHARGES FOR UDIT?**

16 A. Qwest filed a non-proprietary non-recurring cost study for a design change charge  
17 for unbundled dedicated interoffice transport in the Oregon UNE case 1025. This  
18 cost study shows that Qwest's design change costs for transport are based on cost  
19 assumptions associated with Access Service Requests (ASRs) for dedicated  
20 transport and not Local Service Requests (LSRs) (which are used for loops). I  
21 have provided an excerpt from the Oregon cost study for design changes below  
22 from the "Design" tab:

2 Lines 1 through 3 indicate that the design change charge is based on ASRs that  
3 are used for dedicated transport, not LSRs which are used for UNE loops.

4 **Q. DOES THIS MEAN THAT QWEST INAPPROPRIATELY INFLATES**  
5 **THE COSTS OF LOOP DESIGN CHANGES WHEN IT APPLIES A RATE**  
6 **DESIGNED FOR UDOT TO UNE LOOPS?**

7 **A.** Yes, because processes associated with Access Service Requests (ASRs) are more  
8 manually-intensive than are Local Service Requests (LSRs), ASR will result in

1 higher costs than will LSR. And the cost study above assumes the use of order  
2 processing systems and billing systems for transport services<sup>60</sup> (see line numbers  
3 3, 6, 7, 9, 11, 12, 13, 18-21 above), rather than the order processing system and  
4 billing system that are used for UNE loops.<sup>61</sup> Since the systems for loops  
5 generally have a higher flow-through rate than do systems for dedicated transport,  
6 these are further indicia that the design change costs developed for UDIT are too  
7 high for loops.

8 **Q. HAS QWEST ACKNOWLEDGED THAT ASRS ASSOCIATED WITH**  
9 **TRANSPORT ARE MORE MANUALLY-INTENSIVE THAN LSRS**  
10 **ASSOCIATED WITH LOOPS?**

11 A. Yes, on numerous occasions. For instance, in the meeting minutes from the  
12 Change Management Process meeting that occurred on November 12, 2004,  
13 Qwest<sup>62</sup> stated that “the ASR is not as mechanized as the LSR process.” Qwest  
14 provided a specific jeopardy (jep) notice example that showed that the “LSR jep  
15 is generated by a system” and “the ASR jep would be generated manually and  
16 sent via email” and that “the process becomes much more manual as the systems  
17 are not mechanized [and] more time consuming...”<sup>63</sup> Qwest also confirmed this  
18 point in data request responses from Utah Docket No. 06-049-40. In that docket,  
19 a group of CLECs asked Qwest to confirm that an LSR has a higher electronic

---

<sup>60</sup> EXACT order processing system and IABS billing system.

<sup>61</sup> IMA order processing systems and CRIS billing systems.

<sup>62</sup> Qwest employee Phyllis Sunins made this statement.

<sup>63</sup> Change Management Process meeting minutes for the following Change Request (CR) PC070804-1 ASR Jeopardy Process Ad Hoc Meeting November 12, 2004.

1 flow through than an ASR. Qwest responded in the affirmative and explained the  
2 differences between ASRs and LSRs. Qwest's response follows:

3 While it may be true that *LSRs have a higher level of electronic*  
4 *flow-through than ASRs*, it is irrelevant to the inquiry of the  
5 appropriate vehicle for processing a conversion order. As  
6 discussed in response to data request 01-009, ASRs are designed  
7 for use with the billing and downstream systems that support  
8 Access Services products, such as Private Line services, and LSRs  
9 are designed to be used with the systems that support Local  
10 Service products.<sup>64</sup> (emphasis added)

11 Higher levels of electronic flow-through result in lower levels of manual work  
12 and lower costs.

13 **Q. DOES ESCHELON'S LANGUAGE IN SECTION 9.2.3.9 APPLY TO ALL**  
14 **CFA CHANGES?**

15 A. No, Eschelon's language is very limited in scope and is designed to address a very  
16 narrow circumstance. Eschelon's language is limited by the following qualifiers:  
17 (1) applies only to 2/4 wire analog voice grade loops cutovers, (2) applies only to  
18 coordinated cutovers (3) excludes batch hot cuts, (4) must be on the day of the  
19 cut, and (5) must be during test and turn-up. In other words, Eschelon's language  
20 only applies in a situation in which both Eschelon and Qwest personnel are  
21 already working the cutover for a 2 wire/4wire analog loop and there is a need for  
22 a design change to resolve a bad CFA. Applying the expensive charges<sup>65</sup> that are  
23 designed for UDIT (or worse yet, applying tariff rates) in these instances results in

---

<sup>64</sup> Qwest's cost expert Ms. Terri Million is identified as the respondent.

<sup>65</sup> The design change charges in other states ranges from \$35.89 (Utah) to \$105.34 (South Dakota).

1 charges for this activity that significantly exceed its underlying costs and a  
2 windfall for Qwest.

3 **ISSUE 4-5(c)**

4 **Q. PLEASE EXPLAIN ESCHELON'S RATE PROPOSAL UNDER ISSUE 4-**  
5 **5(C).**

6 A. Eschelon proposes separate interim rates for design changes for UDIT, CFA and  
7 CFAs and has proposed language to the title of 9.20.11.1 to clarify this  
8 application. Qwest proposes a single interim rate that would apply to all three  
9 rate elements. Other state commissions have approved a design change charge for  
10 UDIT (not loops or CFAs) in the past, though there is no Commission approved  
11 rate for design changes in Oregon for any UNEs. Because Qwest's proposal for  
12 UDIT design changes is significantly higher than the rates approved by other state  
13 Commissions, Eschelon proposes as an interim rate for UDIT design changes the  
14 average of approved rates for design change charges for UDIT from the other five  
15 large states in Qwest's territory where Eschelon is currently arbitrating its  
16 interconnection agreement.<sup>66</sup> There is no reason why the rate for UDIT design  
17 changes should be higher in Oregon than it is in other states in Qwest's region.  
18 Regarding design change charges for loops, Eschelon agrees to pay a  
19 Commission-approved cost based rate if one is established in the future. In the  
20 interim, Eschelon has proposed a rate of \$30.00, which is appropriately less than

---

<sup>66</sup> The rates for the UDIT Design Change charge in the other five states are: Arizona \$72.79, Colorado \$73.93, Minnesota \$0.00, Utah \$35.89, Washington \$50.45. In calculating the average I did not include the zero rate in Minnesota.

1 Eschelon's proposed rate for UDIT of \$58.27 because of the cost differences  
2 between UDIT and loops. Given that the Commission-approved rate for basic  
3 installation is \$10.75, an interim rate of \$30.00 for loop design change is very  
4 reasonable. Likewise, Eschelon agrees to pay a cost-based Commission-approved  
5 rate for CFA design change, and has, in the interim, proposed a rate of \$5.00.  
6 This interim rate is reasonable in light of the minimal work that is required in  
7 these instances.<sup>67</sup>

8 **Q. IS AN AVERAGE OF COMMISSION APPROVED RATES IN THE FIVE**  
9 **LARGEST QWEST STATES AN APPROPRIATE METHOD FOR**  
10 **ESTABLISHING AN INTERIM RATE FOR DESIGN CHANGE**  
11 **CHARGES FOR UDITS IN OREGON?**

12 A. Yes. First, it is important to recognize that both companies have proposed interim  
13 rates for design change charges for UDITs, and the Commission will establish  
14 appropriate interim rates in this proceeding. Permanent rates will be established  
15 by the Commission in a generic cost docket.

16 Second, Qwest has acknowledged the reasonableness of the five large state  
17 averaging approach by agreeing to this approach for the rate 9.20.2.1 and 9.20.2.2

---

<sup>67</sup> As described above, if an interim rate is established, Eschelon's proposal is to allow Qwest to assess interim rates for design changes for UDIT, loops and same day pair changes until a different rate is approved by the Commission. This proposal does not prevent or otherwise limit Qwest from recovering its costs for design changes. Furthermore, it is not Eschelon's responsibility to submit and defend a cost study for an interim charge that Qwest will ultimately assess on CLECs (see Qwest Response, p. 12, line 14, stating that Eschelon's proposed interim rates are not supported by cost studies). First, that burden lies with Qwest, and Qwest has submitted no cost support for any design change in this proceeding (or in negotiations, although Eschelon requested cost studies for Qwest's rates in negotiations). Second, Eschelon's proposed interim rates are just that – i.e., interim – and therefore such cost support information is unnecessary.

1 -- Additional Labor Installation, per Half Hour or fraction thereof, overtime and  
 2 premium in the Minnesota Exhibit A as part of the Eschelon / Qwest arbitration in  
 3 Minnesota. The table below is an excerpt from the Exhibit A in the Minnesota  
 4 Eschelon / Qwest arbitration.

		Recurring	Nonrecurring	REC	NRC
<b>9.20</b>	<b>Miscellaneous Charges</b>				
9.20.1	Intentionally Left Blank				
9.20.2	Additional Labor Installation, Per Half Hour or fraction thereof				
9.20.2.1	Additional Labor installation - Overtime		\$8.79		++
9.20.2.2	Additional Labor installation - Premium		\$17.57		++
<b>Notes:</b>					
++	Negotiated rate until Commission approves a rate.				

5  
 6 The negotiated rates in this table were the average of Commission approved rates  
 7 in Arizona, Colorado, Utah and Washington. Oregon was not used because there  
 8 are no Commission approved rates for this rate element. The table below shows  
 9 the rates in the four states mentioned above.

		AZ	CO	UT	WA	AVG
<b>9.20</b>	<b>Miscellaneous Charges</b>					
9.20.2	Additional Labor Installation, per Half Hour or fraction thereof					
9.20.2.1	Additional Labor Installation - Overtime	\$8.89	\$9.03	\$8.28	\$8.94	<b>\$8.79</b>
9.20.2.2	Additional Labor Installation - Premium	\$17.78	\$18.06	\$16.55	\$17.89	<b>\$17.57</b>

10  
 11 The six large states in Qwest's region are similar in that these states are most  
 12 likely to have closely scrutinized contested cost cases involving the largest  
 13 CLECs in Qwest's region.

1 Third, Qwest's cost support is based on its filings in UM 1025.<sup>68</sup> That docket was  
2 closed by the Commission on March 16, 2007.<sup>69</sup> Qwest's cost study represents its  
3 advocacy regarding appropriate rates and does not incorporate prior Commission  
4 decisions regarding labor times, flow through, separation of mechanical and  
5 manual ordering, and overhead factors.<sup>70</sup> Interim rates should incorporate prior  
6 Commission decisions until such time that permanent rates are established by the  
7 Commission. The Commission found in its 98-444 order in docket UT 138 / UT  
8 139, that "work times and probabilities shall remain in effect until such time as  
9 USWC and GTE file revised analyses that are approved by the Commission."<sup>71</sup>  
10 This conclusion makes sense; otherwise Qwest would have no incentive ever to  
11 establish permanent rates, since it could charge its "wish" rate indefinitely.  
12 Making three simple adjustments<sup>72</sup> to Qwest's UDIT design change cost study to  
13 be consistent with prior Commission rulings would result in a UDIT design  
14 change rate of \$57.87 which demonstrates that Eschelon's proposed interim rate  
15 of \$58.27 is reasonable. The three adjustments do not represent all of the  
16 adjustments ordered by the Commission in their UT 138 / UT 139 orders. For

---

<sup>68</sup> Qwest filed cost studies in UM 1025 in September 2002, March 2003 and September 2003.

<sup>69</sup> See <http://apps.puc.state.or.us/orders/2007ords/07-101.pdf>.

<sup>70</sup> The Commission's orders in UT 138/UT 139 established a set of inputs that should apply to Qwest's non-recurring cost studies. This includes separation of manual and mechanical ordering costs (Order No. 98-444, p. 71) a flow through rate of 98% in the ordering process (Order No. 03-085, page 3 and Order No. 98-444, p. 71), a reduction to labor times and probabilities (Order No. 03-085, page 11 and Order No. 98-444, p. 82), and updates to Qwest's overhead factors (Order No. 98-444, p. 101). (See Eschelon/23.)

<sup>71</sup> Order No. 98-444, p. 82. (See Eschelon/23.)

<sup>72</sup> The adjustments are as follows: (1) Calculate the study for mechanized orders instead of a blend of mechanized and manual orders; (2) use the Commission ordered flow through rate of 98% for the ordering process; and (3) incorporate the overhead factors used in the compliance filings in UT 138 / UT 139.

1 example, Eschelon does not have the information available to it in order to  
2 implement the adjustments to labor times and probabilities. If the Commission  
3 finds that Eschelon's proposed interim rate for the design change for UDIT of  
4 \$58.27 is not reasonable, the Commission should order that the interim rate utilize  
5 the Commission's findings in docket UT 138 / UT 139 until such time that  
6 permanent rates are established.

7 **Q. DOES ESCHELON'S LANGUAGE PROHIBIT QWEST FROM**  
8 **REQUESTING COMMISSION APPROVAL OF DIFFERENT RATES?**

9 A. No. To the extent that Qwest believes that the interim rates Eschelon has  
10 proposed for loop and CFA design changes do not allow Qwest to recover its  
11 costs, Eschelon's proposal provides the opportunity for Qwest to propose a cost  
12 based rate for these design changes and substantiate its charges before the  
13 Commission. If Qwest truly believes that all design changes should be the same  
14 charge, all it has to do is make a filing to get the issue before the Commission.

15 **Q. PLEASE SUMMARIZE ISSUE NOS. 4-5, 4-5(A), AND 4-5(C)**  
16 **REGARDING DESIGN CHANGES.**

17 A. Eschelon's language requires Qwest to provide design changes to Eschelon,  
18 something that is an obligation of Qwest's and that has been provided for years.  
19 Eschelon's proposal provides Qwest with the opportunity to recover its costs by  
20 allowing Qwest to apply interim rates until the Commission approves rates for  
21 design changes. This is all despite the facts that (i) there is no language in the  
22 Eschelon/Qwest ICA or Qwest's SGAT that would permit Qwest to assess

1 charges for design changes for loops or CFAs, (ii) Qwest has consistently  
2 provided design changes for loops in Oregon without additional charges in the  
3 past, and (iii) Qwest's failure to seek separate cost recovery for design changes  
4 for loops suggests that they may be recovered in other rates. For all of the reasons  
5 described in Eschelon's business need and in these responses, the Commission  
6 should adopt Eschelon's language for Issues 4-5 and subpart (a). The  
7 Commission should also adopt Eschelon's three distinct rate proposals in subpart  
8 (c) for UDIT design changes, Loop design changes, and CFA changes specific to  
9 changes on the day of the cut for 2/4 wire loop coordinated cuts.

10 **IV. PAYMENT AND DEPOSITS (SUBJECT MATTER NOS. 5, 6 AND 7)**

11 **Q. ARE YOU ADDRESSING A NUMBER OF ISSUES FROM SECTION 5.4**  
12 **OF THE ICA?**

13 A. Yes. I am addressing Issue Nos. 5-6, 5-7, 5-8, 5-9, 5-11, 5-12 and 5-13, all of  
14 which pertain to Section 5.4 of the ICA "Payment and Deposit."<sup>73</sup> Issue Nos. 5-6,  
15 5-7 and 5-7(a) are addressed under Subject Matter No. 5 (Discontinuation of  
16 Order Processing and Disconnection); Issue Nos. 5-8, 5-9, 5-11, and 5-12 are  
17 addressed under Subject Matter No. 6 (Deposits); and Issue No. 5-13 is addressed  
18 under Subject Matter No. 7 (Review of Credit Standing).

19 **Q. PLEASE DESCRIBE ESCHELON'S BUSINESS REASONS FOR ITS**  
20 **PROPOSALS REGARDING THE "PAYMENT AND DEPOSIT" ISSUES**

---

<sup>73</sup> I also address Issue 5-7(a), which addresses Section 5.1.13.1.

1           **(ISSUE NOS. 5-6, 5-7, 5-7(A), 5-8, 5-9, 5-11, 5-12 AND 5-13).**

2    A.    The Payment and Deposits issues pertain to the ability of Qwest to disconnect  
3           Eschelon's circuits, discontinue processing Eschelon's orders, and demand a  
4           deposit (or increased deposit amount) from Eschelon, due to an alleged concern  
5           about Qwest's ability to get paid, when Eschelon disagrees with the basis for  
6           Qwest's actions.<sup>74</sup> To fully appreciate the importance of these issues from a  
7           business perspective, it is important to understand the breadth of the provisions in  
8           question. The ability to disconnect circuits or discontinue processing orders –  
9           remedies in the Payment and Deposit provisions – are very serious steps that  
10          would be very disruptive for Eschelon's customers and should only be used as a  
11          last resort. The effects are not limited to particular orders or customers, but could  
12          lead to disruption for large groups of customers. Unjustified disconnection or  
13          disruption of service order processing would be devastating to Eschelon's  
14          operations and might leave current and potential Oregon customers who currently  
15          have working service, or were initiating or changing service, without  
16          telecommunications service on the planned date of service. For instance,  
17          Eschelon's End User Customers could pick up the telephone one day to discover  
18          that they do not have dial tone because Qwest has decided to disconnect  
19          Eschelon's circuits. This would not only be service-affecting but would also be  
20          potentially dangerous for Eschelon's customers as they would unexpectedly be

---

<sup>74</sup> The party that would be disconnecting circuits, discontinuing orders or demanding deposits or deposit increases would be Qwest and the party facing these actions would be Eschelon in a vast majority, if not all, instances because Eschelon, in most instances, is the purchaser of services under the ICA.

1 left without access to emergency services, not to mention the potential lost  
2 revenue and expended resources that Eschelon's customers would incur as  
3 Eschelon and its customers scramble to get them up and running again. With  
4 regard to order processing discontinuation, Eschelon may have an order pending  
5 for a business customer who is planning a big grand opening at a new location  
6 and needs phone service, but Eschelon is unable to serve the customer in time for  
7 the opening because Qwest has decided to stop processing Eschelon's orders.  
8 This would lead to significant financial losses for the customer and harm to  
9 Eschelon's reputation. Another example is a new medical facility that is opening  
10 and has chosen Eschelon as its service provider. This facility could be left  
11 without the vital emergency services they need if Qwest stops processing  
12 Eschelon's orders.

13 Eschelon does not object to the inclusion of the Payment and Deposit provisions  
14 and remedies in the ICA because it agrees that Qwest (and Eschelon) should have  
15 the ability to protect its financial interests when there is a legitimate concern  
16 about future payment. After all, the intent of the payment and deposit provisions  
17 is to address situations when legitimate concerns exist in this regard. However, if  
18 Qwest is able to disconnect Eschelon's circuits or stop processing Eschelon's  
19 orders in cases where no legitimate concern about ability to pay exists, it would  
20 cause significant harm to Eschelon and to customers. Given the seriousness of  
21 these steps, and the effects they would have on Eschelon and its End User

1 Customers (not Qwest or Qwest's customers), Commission oversight should be  
2 available before these steps are taken.

3 Similarly, if Qwest decided to demand a deposit (or deposit increase) from  
4 Eschelon when no legitimate concern about ability to pay exists, Qwest could  
5 affect the financial resources available to Eschelon for other uses such as facilities  
6 needed to compete with Qwest. Eschelon is a relatively small facilities-based  
7 carrier that does not have the resources that Qwest has,<sup>75</sup> and cannot have its  
8 financial resources tied up in frivolous deposits. The deposit amounts required of  
9 Eschelon, under the ICA, could be an amount equal to two months' worth of  
10 Qwest charges on Eschelon, which across Qwest's region could be around \$10  
11 million. This amount of money may be a drop in the bucket to Qwest (this  
12 represents 0.07% of Qwest's annual operating revenues),<sup>76</sup> but this is real money  
13 to Eschelon (this represents 3.6% of Eschelon's annual total revenue or almost  
14 half of our cash holdings that could be tied up in a deposit to Qwest).<sup>77</sup> And  
15 again, Qwest would not be faced with paying any deposit to Eschelon.

16 Commission oversight on these matters is particularly important so that there is an  
17 independent arbiter of the facts and to ensure that the information relied upon to

---

<sup>75</sup> Eschelon's annual revenue is less than 2% of Qwest's annual revenue. Stated differently, Qwest earns more revenues by the first week of January than Eschelon earns all year. Qwest has around 40,000 employees compared to Eschelon's approximate 1,300 employees.

<sup>76</sup> Qwest's YE2006 total operating revenue was \$13,923 million.  
[http://ww3.ics.adp.com/streetlink\\_data/dirQ0000/annual/HTML1/default.htm](http://ww3.ics.adp.com/streetlink_data/dirQ0000/annual/HTML1/default.htm).

<sup>77</sup> Eschelon's YE2006 total revenue was \$274.5 million. Eschelon's YE2006 cash and cash equivalents were \$21.1 million.  
<http://library.corporate-ir.net/library/12/121/121503/items/242984/ESCH2006AR.pdf>.

1 make these decisions is accurate. Eschelon and Qwest have had serious  
2 disagreements about billing information (discussed below), which means that  
3 Qwest could invoke these remedies based on information with which Eschelon  
4 disagrees – even when Eschelon believes that it is current in its payment of  
5 undisputed amounts to Qwest. If Eschelon challenges an action by Qwest, and  
6 the Commission finds Qwest to be correct, then Qwest is not harmed. However,  
7 if Qwest can override Eschelon’s challenge and make these decisions without  
8 Commission approval, Eschelon would be faced with these serious business-  
9 affecting and customer-affecting problems even if the basis for Qwest’s decision  
10 is flawed. At the same time, if Eschelon has no basis to disagree with Qwest’s  
11 claim, then it certainly would not waste the time and money pursuing such a  
12 dispute, and would simply pay the outstanding charges and/or the deposit Qwest  
13 demanded.

14 Eschelon is only asking that Commission authority be reserved if there is a  
15 disagreement about these issues so that Qwest cannot cut off Eschelon’s  
16 customers or cripple Eschelon’s ability to provide service to its customers based  
17 upon faulty premises.

18 **Q. CAN YOU PROVIDE AN EXAMPLE THAT ILLUSTRATES THE NEED**  
19 **FOR COMMISSION INVOLVEMENT WHEN ESCHELON DISAGREES**  
20 **WITH QWEST’S DECISION TO DISCONNECT ESCHELON’S**  
21 **CIRCUITS, STOP PROCESSING ESCHELON’S ORDERS OR DEMAND**  
22 **A DEPOSIT?**

1 A. Yes. Eschelon and Qwest have had many disagreements about the accuracy of  
2 Qwest's bills, the timeliness of Qwest's recognition of payments and the handling  
3 of disputed billings. And Eschelon oftentimes disagrees with Qwest about the  
4 amount past due and the amount disputed by Eschelon. Case in point: in the  
5 Spring of 2006, Qwest threatened to disconnect Eschelon's service or stop  
6 processing Eschelon's orders, or both, due to an alleged overdue balance due from  
7 Eschelon to Qwest under ICAs from several states in which Eschelon purchases  
8 services from Qwest. Included as Eschelon/12 is a chronology that explains the  
9 details of this issue along with the supporting documentation.

10 On April 20, 2006, Eschelon received a letter from Qwest indicating that  
11 Eschelon had a total past due balance across all states of over \$4 million, and  
12 further indicating that if Qwest did not receive payment in full by May 4, 2006,  
13 Qwest would suspend Eschelon's service order activity and disconnect Eschelon's  
14 services on May 5, 2006. However, Eschelon/12 shows that the amount Qwest  
15 was demanding from Eschelon did not reflect the payments that Eschelon had  
16 already made to Qwest, and that Eschelon and Qwest were disagreeing on the  
17 amount of the outstanding charges from the beginning and are still disagreeing  
18 (*see* Eschelon/12, 3/29/06 email, 4/5/06 email and reply email, 4/25/06 email,  
19 5/22/06 email, 5/24/06 conference call, 5/25/06 letter, 6/5/06 letter, 7/5/06 letter  
20 and 7/12/06 letter). In addition, Qwest never identified a specific amount that was  
21 due under any particular ICA (or in any state) and did not follow the ICA process  
22 in raising the issue (*see* Eschelon/12, Qwest's 3/14/06 letter). However, after a

1 lengthy debate and additional threats of service disruption, in order to avoid any  
2 possibility of disruption of services to its customers, Eschelon paid all amounts  
3 alleged by Qwest making payment of almost \$9 million.<sup>78</sup> After going through all  
4 of this, Qwest notified Eschelon that it remained in default and that Qwest  
5 unilaterally decided to apply credits due and owing to past due balances, even if  
6 those balances were in dispute, leaving Eschelon under a cloud of possible  
7 disruption of service despite Eschelon's payment of all undisputed bills.<sup>79</sup> As  
8 indicated in Eschelon's July 12, 2006 letter (*See* Eschelon/12), Eschelon  
9 continues to dispute the outstanding charges that Qwest alleges is owed to it by  
10 Eschelon. And as indicated in Qwest's August 11, 2006 letter, it still has not  
11 identified an amount that is allegedly past due in Oregon, or any other state. Yet,  
12 Qwest continues to insist that Eschelon is in default under the ICA.

13 **Q. HOW DOES THIS EXAMPLE SUPPORT ESCHELON'S PROPOSALS**  
14 **ON PAYMENT AND DEPOSITS?**

15 A. It shows that, because of the potential for billing disagreements, Commission  
16 oversight is necessary to prevent Qwest from inappropriately using its ability to  
17 disconnect circuits, stop processing orders, or extracting deposits. In this  
18 example, Qwest provided a lump sum amount that it demanded was due for six

---

<sup>78</sup> The following is an excerpt from Eschelon's 6/5/06 letter to Qwest: "In Qwest's May 25th letter, Qwest threatened Eschelon with 'suspending service order activity.' That means Qwest would disrupt our customer orders, and Qwest said it would do *so this month!* The consequences of Qwest carrying out that threat would be so disruptive and potentially devastating that, to avoid that possibility, Eschelon has no choice but to bring our account current even though Qwest did not provide the amount allegedly due by state and despite Eschelon's valid disputes."

<sup>79</sup> Qwest stated in its 7/5/06 letter: "Qwest will, for the time being, refrain from taking further collection action against Eschelon."

1 states, without providing any detail regarding what was due in each state or what  
2 portion of the total amount was disputed or undisputed charges. Surely it would  
3 not be appropriate for Oregon customers to get cut off because Qwest claims  
4 Eschelon did not pay a charge rendered in Utah, but that could be the effect of  
5 Qwest's proposals for the Payment and Deposits issues. If Qwest's proposals are  
6 adopted, Qwest could disconnect circuits or stop processing Eschelon's orders  
7 without providing any detail or verification of the charges it claims are  
8 outstanding. And if Eschelon believes that it is now current with Qwest (and  
9 Qwest has indicated in its letter that it could take action without further notice),  
10 Qwest could still potentially put Eschelon's customers out of service  
11 unexpectedly since Section 5.4.2 of the ICA provides that, if Qwest determines  
12 that Eschelon is still in non-compliance after initial notice, Qwest can refuse to  
13 accept additional orders from Eschelon without further notice.

14 Therefore, Commission oversight is needed when disagreements like these arise  
15 to make sure that the Payment and Deposit remedies are invoked properly and  
16 based on accurate information.

17 **SUBJECT MATTER NO. 5. DISCONTINUATION OF ORDER PROCESSING**  
18 **AND DISCONNECTION**

19 *Issue Nos. 5-6, 5-7, and 5-7(a): ICA Sections 5.4.2, 5.4.3, 5.13.1*

20 **Q. PLEASE BRIEFLY DESCRIBE ISSUE NOS. 5-6 AND 5-7 AND SUBPART.**

1 A. These issues address the remedies available to Qwest when Eschelon does not pay  
2 in full the undisputed charges it owes – the ability to disconnect Eschelon’s  
3 services and stop processing Eschelon’s orders. The proposals under Issue Nos.  
4 5-6, 5-7 and 5-7(a) indicate the conditions that exist before these remedies can be  
5 invoked.

6 **Q. WHAT ARE ESCHELON’S PROPOSALS FOR ISSUES 5-6, 5-7, AND 5-  
7 7(A)?**

8 A. Eschelon provides two options for Issue No. 5-6, and offers either one for the  
9 Commission’s adoption.

10 **Issue No. 5-6 – (1 of 2 options)**

11 5.4.2 With the Commission’s approval, One Party may  
12 discontinue processing orders for relevant services for the failure  
13 of the other Party to make full payment, less any disputed amount  
14 as provided for in Section 21.8 of this Agreement, for the relevant  
15 services provided under this Agreement within thirty (30) Days  
16 following the Payment Due Date...

17 **Issue No. 5-6 – (2 of 2 options)**

18 5.4.2. ...One Party may discontinue processing orders for  
19 relevant services for the failure of the other Party to make full  
20 payment, less any disputed amount as provided for in Section 21.8  
21 of this Agreement...If the billed Party asks the Commission to  
22 prevent discontinuance of order processing and/or rejection of  
23 orders (e.g., because delay in submitting dispute or making  
24 payment was reasonably justified due to inaccurate or incomplete  
25 Billing), the Billing Party will continue order processing while the  
26 proceedings are pending, unless the Commission orders otherwise.

27 **Issue No. 5-7**

28 5.4.3 With the Commission’s approval pursuant to Section  
29 5.13.1, tThe the Billing Party may disconnect any and all relevant  
30 services for failure by the billed Party to make full payment, less  
31 any disputed amount as provided for in Section 21.8 of this

1 Agreement, for the relevant services provided under this  
2 Agreement within sixty (60) Days following the Payment Due  
3 Date...If the Billing Party does not disconnect the billed Party's  
4 service(s) on the date specified in the ten (10) business days notice,  
5 and the billed Party's noncompliance continues, nothing contained  
6 herein shall preclude the Billing Party's right to disconnect any or  
7 all relevant services of the non-complying Party without further  
8 notice, if disconnection has been approved by the Commission...

9 **Issue 5-7(a)**

10 5.13.1 If either Party defaults in the payment of any amount due  
11 hereunder, or if either Party violates any other material provision  
12 of this Agreement, and such default or violation shall continue for  
13 thirty (30) Days after written notice thereof, the other Party must  
14 notify the Commission in writing and may seek relief in  
15 accordance with the Dispute resolution provision of this  
16 Agreement. The failure of either Party to enforce any of the  
17 provisions of this Agreement or the waiver thereof in any instance  
18 shall not be construed as a general waiver or relinquishment on its  
19 part of any such provision, but the same shall, nevertheless, be and  
20 remain in full force and effect. Neither Party shall disconnect  
21 service to the other Party without first obtaining Commission  
22 approval. To the extent that either Party disputes, pursuant to  
23 Section 21.8, any amount due hereunder, the Party's withholding  
24 of such disputed amounts pursuant to Section 21.8 shall not  
25 constitute a default under this Section 5.13 during the pendency of  
26 such dispute.

27 Both of Eschelon's proposals under Issue No. 5-6 are intended to provide for  
28 Commission oversight in the instance that Qwest wants to discontinue processing  
29 Eschelon's orders. Eschelon's first option for Issue 5-6 requires Commission  
30 approval before Qwest may discontinue processing Eschelon's orders for the  
31 alleged failure of Eschelon to make full payment of undisputed charges. This  
32 would ensure that order processing does not stop (and no action is taken that will  
33 disrupt service to end users) until the Commission has at least had a chance to  
34 verify whether there is a legitimate disagreement. The ICA already provides that

1 Qwest give the Commission notice of the alleged late payment and of Qwest's  
2 proposal to discontinue services (Section 5.4.2), and Eschelon's proposal would  
3 simply provide that Qwest would include a request for approval of that action  
4 with its notice. If the Commission does not want to require Commission approval  
5 in every instance in which Qwest intends to stop processing Eschelon's orders,  
6 the Commission should ensure that it will have an opportunity to act on the  
7 public's behalf before the services of End User Customers are disrupted when  
8 Eschelon disagrees with Qwest's proposed action. To that end, Eschelon's  
9 alternative option provides that if Eschelon disputes Qwest's determination and  
10 seeks Commission review, Eschelon's orders will continue to be processed while  
11 its dispute is pending or until a date specified by the Commission. This would  
12 ensure that Commission authority is preserved when there is a disagreement, and  
13 would prevent Qwest from being able to take such a serious step as stopping order  
14 processing unilaterally or based on information with which Eschelon disagrees.

15 For Issue 5-7, Eschelon proposes language to ensure that before Qwest takes the  
16 very serious step of disconnecting Eschelon's services, that it first obtains  
17 Commission approval. This will allow the Commission to evaluate the basis for  
18 the proposed disconnection and ensure that any actions taken in this regard are  
19 justified and in the public interest. Regarding Issue 5-7(a), Eschelon proposes  
20 language that would assure that the Commission is kept informed of alleged  
21 defaults under the ICA that will allow the Commission to monitor disputes, and

1 become involved to the extent necessary and appropriate for the protection of the  
2 public interest.

3 **Q. WHAT ARE QWEST'S PROPOSALS FOR ISSUES 5-6, 5-7 AND 5-7(A)?**

4 A. Qwest's proposals are shown below:

5 **Issue 5-6**

6 5.4.2 ~~With the Commission's approval,~~ One Party may  
7 discontinue processing orders for relevant services for the failure  
8 of the other Party to make full payment, less any disputed amount  
9 as provided for in Section 21.8 of this Agreement, for the relevant  
10 services provided under this Agreement within thirty (30) Days  
11 following the Payment Due Date.

12 **Issue 5-7**

13 5.4.3 ~~With the Commission's approval pursuant to Section~~  
14 ~~5.13.1,~~ The Billing Party may disconnect any and all relevant  
15 services for failure by the billed Party to make full payment, less  
16 any disputed amount as provided for in Section 21.8 of this  
17 Agreement, for the relevant services provided under this Agreement  
18 within sixty (60) Days following the Payment Due Date...If the  
19 Billing Party does not disconnect the billed Party's service(s) on the  
20 date specified in the ten (10) business days notice, and the billed  
21 Party's noncompliance continues, nothing contained herein shall  
22 preclude the Billing Party's right to disconnect any or all relevant  
23 services of the non-complying Party without further notice,~~if~~  
24 ~~disconnection has been approved by the Commission...~~

25 **Issue 5-7(a)**

26 5.13.1 If either Party defaults in the payment of any amount due  
27 hereunder, or if either Party violates any other material provision  
28 of this Agreement, and such default or violation shall continue for  
29 thirty (30) Days after written notice thereof, the other Party ~~must~~  
30 ~~notify the Commission in writing and~~ may seek relief in  
31 accordance with the Dispute resolution provision of this  
32 Agreement. The failure of either Party to enforce any of the  
33 provisions of this Agreement or the waiver thereof in any instance  
34 shall not be construed as a general waiver or relinquishment on its  
35 part of any such provision, but the same shall, nevertheless, be and

1 remain in full force and effect. ~~Neither Party shall disconnect~~  
2 ~~service to the other Party without first obtaining Commission~~  
3 ~~approval.~~ To the extent that either Party disputes, pursuant to  
4 Section 21.8, any amount due hereunder, the Party's withholding  
5 of such disputed amounts pursuant to Section 21.8 shall not  
6 constitute a default under this Section 5.13 during the pendency of  
7 such dispute.

8 The difference in Qwest's language is that Commission approval would not be  
9 necessary for Qwest to stop processing Eschelon's orders or disconnect  
10 Eschelon's circuits. In fact, Qwest's language would allow it to invoke these very  
11 serious remedies even if Eschelon has a legitimate disagreement pertaining to the  
12 charges Qwest alleges it owes (as in the example provided above). In support of  
13 its position, Qwest argues that it is Eschelon's obligation to pay its bills in a  
14 timely fashion and that Eschelon can invoke dispute resolution or dispute the  
15 charges if it disagrees.<sup>80</sup>

16 **Q. WHY SHOULD THE COMMISSION ADOPT ESCHELON'S PROPOSAL**  
17 **FOR ISSUE NOS. 5-6, 5-7 AND 5-7(A)?**

18 A. Eschelon's proposals maintain Commission authority in these instances so that  
19 Qwest can not unilaterally discontinue processing Eschelon's orders or  
20 unilaterally disconnect Eschelon's services. I explained above the devastating  
21 effect on Eschelon that would result from Qwest unjustifiably taking these  
22 actions. I also explained that the information that would be used by Qwest to  
23 determine whether to reject Eschelon's orders and shut off Eschelon's services is  
24 not always accurate or current, and is extremely vague. The Commission should

---

<sup>80</sup> Qwest Response, p. 15.

1 be involved on behalf of the public interest to ensure that these remedies are being  
2 invoked properly and after a careful examination of the facts (particularly of the  
3 data Qwest is using to allege non-payment) to ensure that these serious steps are  
4 justified.

5 **Q. PLEASE ELABORATE ON THE IMPORTANCE OF ISSUE 5-7 AND**  
6 **SUBPART.**

7 A. The need for Commission oversight related to the ability to disconnect services is  
8 even greater than in the circumstance in which orders are rejected. Disconnecting  
9 services would leave existing End User Customers without dial tone and without  
10 access to critical 9-1-1 emergency services. Not only would such a drastic  
11 measure likely harm Eschelon's business very seriously, if not fatally, it would be  
12 extremely disruptive for Eschelon's customers who would lose their telephone  
13 service as a result. Before Qwest takes such a step, it should have the obligation  
14 to first seek permission from the Commission in order to make sure that the  
15 interests of the public are adequately protected.

16 **Q. WOULD THE PROVISIONS SET OUT IN ESCHELON'S PROPOSAL BE**  
17 **UNIQUE TO OREGON?**

18 A. No. In Minnesota, the Commission requires approval for disconnection, and  
19 Qwest agreed to this language and issue 5-7 was not arbitrated in Minnesota.  
20 Therefore, Qwest will have a process for providing notice to the Commission  
21 before disconnection that it could use in Oregon.

1 **Q. COULDN'T ESCHELON JUST PAY ALL OF THE UNDISPUTED**  
2 **AMOUNTS IT OWES QWEST AND AVOID QWEST DISCONNECTING**  
3 **CIRCUITS OR DISRUPTING ORDER PROCESSING?**

4 A. Though Qwest will likely argue that this problem is solely within Eschelon's  
5 control because Eschelon only need to pay all undisputed amounts to avoid these  
6 remedies,<sup>81</sup> Qwest is wrong. There are a number of reasons that Eschelon and  
7 Qwest may have very different views about amounts that are disputed and  
8 undisputed – which is the case in the example explained above. And since  
9 Qwest's data on Eschelon's disputed and undisputed amounts is a determining  
10 factor as to whether Qwest can invoke the payment and deposits remedies, it is  
11 critical that Qwest's data be shown to be correct before Qwest takes the serious  
12 step of disconnecting Eschelon's customers based on that data. Otherwise, Qwest  
13 will attempt to impose its view of Eschelon's payment status to invoke these  
14 remedies, despite the fact that Eschelon believes that its payments of all  
15 undisputed amounts to Qwest are current. That is why Commission involvement  
16 should be preserved.

17 **Q. HOW CAN THESE DISCREPANCIES OCCUR?**

18 A. There are several reasons that Eschelon and Qwest could disagree on the amount  
19 of undisputed charges. I will briefly describe some of these reasons below:

- 20 • Qwest takes it upon itself to simply declare disputes to be “resolved” even when  
21 no agreement has been reached and Qwest has taken no action to bring the matter  
22 to dispute resolution. This has led to Qwest understating what Eschelon has put

---

<sup>81</sup> Qwest states in its position statements on these issues that “If a bill is undisputed, Eschelon should pay it.” See, Issues 5-7, 5-7(a), 5-8, 5-9, 5-11 and 5-12.

1 in dispute. Qwest's approach to "resolving" billing disputes is discussed in more  
2 detail below.

3 • Qwest's notices of past due status do not always include detail by Billing Account  
4 Number (BAN) or by state for that matter, of what Qwest considers past due.  
5 Qwest historically has only identified a lump sum amount without providing any  
6 detail. *See*, Confidential Eschelon/12.

7 • Even when Qwest does provide detail on what it claims to be past due, that detail  
8 sometimes does not match up with the amount Qwest is claiming as past due.  
9 Case in point: Qwest provided detail on August 29, 2006 about a letter it sent on  
10 August 11<sup>th</sup> concerning an amount Qwest claimed was overdue on August 1<sup>st</sup>.  
11 The detail provided on August 29<sup>th</sup> did not match up with the amount Qwest  
12 claimed in its August 11<sup>th</sup> correspondence. I have provided an email string  
13 between Eschelon and Qwest describing this problem and supporting  
14 documentation as Eschelon/13.

15 • Qwest does not always post Eschelon's payment in a timely manner, and counts  
16 payments that Qwest has already received as past due. I have attached  
17 Eschelon/14, an email exchange between Qwest and Eschelon, that typifies this  
18 problem. This exhibit shows that Qwest sent a letter to Eschelon on 10/24/06  
19 claiming that Eschelon had outstanding undisputed amounts due Qwest in  
20 Oregon, and threatening to stop processing orders or disconnect Eschelon's  
21 circuits if this payment was not made in full by 10/27/06 (three days later).  
22 However, Eschelon/14 shows that Eschelon had already paid the amount Qwest  
23 was claiming was overdue on 10/16/06 – one week before it was due and over a  
24 week before Qwest's letter was sent threatening disconnection. Despite  
25 Eschelon's request for Qwest to "review your internal process to determine why  
26 payments are not applied in a timely manner," Qwest simply informed Eschelon  
27 that its payment had been posted and the account was current (with no  
28 explanation of why Qwest threatened such drastic measures when Eschelon was  
29 actually current with Qwest).

30 • Qwest also includes in its past due amounts payments that are not even due yet.  
31 Eschelon/15 is an instance of Qwest claiming that an account was past due in  
32 September when in fact payment was not due until October 10th.

33 • Instead of providing billing refunds owed to carriers, Qwest, by its own admission  
34 in a July 5, 2006 letter (see Confidential Eschelon/12), applies these refunds to  
35 any amounts that Qwest determines are past due (which may include amounts that  
36 Eschelon disputes). This causes Qwest's aging to be inaccurate and a discrepancy  
37 between what Eschelon shows as disputed and what Qwest shows as disputed.

- 1 • Disputes that are submitted by Eschelon are sometimes not responded to by  
2 Qwest, and sometimes Qwest loses them. Qwest recently referred to this as the  
3 “black hole.” *See* Eschelon/16.
  
- 4 • Qwest routinely denies Eschelon’s disputes for multiple months until such time  
5 when Qwest later recognizes the disputes and either records them or ignores them.  
6 For example, in December 2005, Eschelon disputed DSL rates that Qwest had  
7 applied to the November 2005 invoice. Qwest denied the dispute, but corrected  
8 the rates on the February 2006 invoice. However, Qwest did not go back to  
9 correct this mistake on the November 2005 invoice (or any invoices in between),  
10 when the mistake was first identified and disputed.
  
- 11 • Qwest incorrectly applies Eschelon’s payments. Eschelon provides a check stub  
12 and the invoice remittance with each payment that contains the amounts and  
13 BANs to which the check should be applied. At times, Qwest posts some  
14 payments to the wrong account or posts the wrong amount to the proper account.  
15 Qwest apparently applies payments to disputes that have been “resolved” from  
16 Qwest’s perspective, but not Eschelon’s. It is Eschelon’s position that Qwest  
17 should apply payments to the invoice being paid, not simply to any open balance.  
18 I have provided as Eschelon/17 an email exchange between Eschelon and Qwest  
19 that discusses these misapplied payments.
  
- 20 • Qwest’s payment processing center doesn’t effectively communicate with the  
21 billing representatives with whom Eschelon interacts regarding billing disputes.  
22 Or, in other words, Qwest’s “left hand” does not always know what its “right  
23 hand” is doing. As a result, Qwest has asked that Eschelon send its remittance  
24 information to two separate groups. *See*, Confidential Eschelon/12, Qwest’s July  
25 5, 2006 letter (page 2) from Mary Dobesh (Qwest) to Bill Markert (Eschelon).
  
- 26 • Qwest’s employee turnover in the department that processes Eschelon’s billing  
27 disputes can cause disputes to get lost or not addressed by the new employees.  
28 This also means that Eschelon may work with Qwest personnel to resolve a  
29 billing dispute for quite some time, only to be forced to start all over when new  
30 Qwest personnel are assigned that are unfamiliar with the dispute’s history. *See*,  
31 Eschelon/16.
  
- 32 • Qwest’s billing department may not update its information about where to send  
33 Eschelon invoices/correspondences (information that is updated by Eschelon in  
34 the CLEC Questionnaire), which can lead to invoices being paid late, or balances  
35 being addressed later because the proper Eschelon employees have not been

1 notified in a timely manner. I have attached an email sent from Eschelon to  
2 Qwest on this issue as Eschelon/18.<sup>82</sup>

3 **Q. IN YOUR ANSWER ABOVE EXPLAINING WHY ESCHELON AND**  
4 **QWEST OFTEN DISAGREE ABOUT DISPUTED AMOUNTS, YOU**  
5 **MENTION THAT QWEST DETERMINES THAT DISPUTES ARE**  
6 **“RESOLVED” EVEN WHEN NO AGREEMENT HAS BEEN REACHED.**  
7 **PLEASE ELABORATE.**

8 A. First, Qwest’s use of the word “resolved” in connection with payment disputes is  
9 a misnomer because, in fact, no agreement has necessarily been reached between  
10 Qwest and Eschelon. What “resolved” means to Qwest is that Qwest believes that  
11 the dispute should be resolved in Qwest’s favor and the disputed charges be paid  
12 by Eschelon. Then, when Qwest labels the dispute “resolved,” even if Eschelon  
13 still disputes the charges, Qwest does not recognize the dispute any longer and  
14 removes this amount from their systems that track disputed charges and adds it to  
15 the overdue category. I have provided as Eschelon/19 a flow diagram of the  
16 Qwest billing Dispute Resolution process it developed in CMP. This flow  
17 diagram shows that once Qwest has received a billing dispute and confirms that it  
18 has received the information Qwest requires, Qwest will “resolve” (or possibly

---

<sup>82</sup> A recent example of this problem occurred on April 2, 2007. Qwest sent a notice to Eschelon demanding a deposit and threatening to stop order processing and disconnect circuits effective April 16, 2007 for billing that Qwest *sent to the wrong address*. Eschelon followed Qwest’s process and updated the Qwest questionnaire with the correct billing information in November of 2006, but after inquiries from Eschelon about the bills, Qwest only corrected the information in March. Though Eschelon had been in communication with Qwest about this issue, and even though Eschelon paid undisputed amounts once it tracked down the bills, Qwest sent this notice of disconnection and disruption of order processing to Eschelon. This example demonstrates the need for Eschelon’s proposed language in these sections.

1 “status”) the dispute within 28 calendar days. As I mention above, “resolve”  
2 means that Qwest can reject the dispute and re-label the amount as past due.  
3 Once Qwest has “resolved” the dispute, the flow diagram shows that if the CLEC  
4 does not agree, the *CLEC* must invoke the escalation process to pursue the dispute  
5 further.

6 **Q. DOES THIS CMP BILLING PROCESS OF “RESOLVING” BILLING**  
7 **DISPUTES APPLY TO ESCHELON AND DID ESCHELON ASSIST**  
8 **QWEST IN ITS DEVELOPMENT?**

9 A. No. I have attached Eschelon/20 which is an email exchange between Eschelon  
10 and Qwest on this CMP billing dispute process, as well as Eschelon’s Comments  
11 to the Qwest Change Request (“CR”) that introduced the new billing dispute  
12 process. Eschelon’s 4/6/05 email to Qwest states in part: “Although Qwest has  
13 developed its own processes for billing through CMP, CMP is both not a part of  
14 these ICAs and, even were it to apply, the CMP document specifically provides  
15 that the ICA controls. There is no requirement in our ICAs to use the process you  
16 describe.” This excerpt, as well as Eschelon’s comments on Qwest’s CR, show  
17 very clearly that Eschelon did not develop this process with Qwest, nor does the  
18 process even apply to Eschelon. Therefore, Qwest should not even be applying  
19 this CMP billing dispute process to Eschelon, but Qwest does anyway – and it is  
20 this process that can cause disagreements between Qwest and Eschelon as to  
21 Eschelon’s payment status.

1 **Q. IS THIS PROCESS OF “RESOLVING” BILLING DISPUTES THAT**  
2 **QWEST IMPOSES ON ESCHELON CONTAINED IN THE CURRENT**  
3 **ESCHELON/QWEST ICA?**

4 A. No. Attachment 7, Section 14.1 of the parties’ ICA addresses billing disputes,  
5 and allows Qwest to pursue bill disputes under the current ICA. Attachment 7,  
6 Section 14.1.4 of the current ICA provides that if a bill dispute is not resolved in  
7 150 days Qwest can take it to dispute resolution. Importantly, Section 14.1 of the  
8 existing ICA states that “closure of a specific billing period will occur by joint  
9 agreement of the Parties whereby the Parties agree that such billing period is  
10 closed to any further analysis and financial transactions...” However, instead of  
11 following these procedures from the ICA, Qwest instead follows the procedure it  
12 established in CMP. By using the CMP billing dispute process instead of the  
13 process in the ICA, Qwest supplants the “joint agreement” needed to close a  
14 billing dispute in the ICA with its unilateral judgment to “resolve” the issue.  
15 Also, Qwest attempts to make the collections process self-executing by  
16 “resolving” the issue and forcing the CLEC to invoke escalation if it disagrees  
17 with Qwest’s decision – instead of Qwest escalating the dispute if it disagrees  
18 with the CLEC (as would be allowed under the ICA). Thus, Qwest’s approach is  
19 the opposite of the typical billing and collections process and the opposite of the  
20 process provided for under the ICA: Qwest pushes onto Eschelon, as the party  
21 disputing the bill, the burden of proving that the money isn’t owed. Qwest wants  
22 Eschelon to prove that it does not owe money to Qwest, when in fact, once  
23 Eschelon disputes an amount, it should be Qwest’s responsibility to escalate the

1 dispute. Since Qwest takes it upon itself to decide what is in dispute, Qwest's  
2 proposed ICA language would enable it to declare what amount it considers  
3 disputed and require Eschelon to pay the remaining amount (even if Eschelon  
4 disagrees) or face dire consequences.

5 **Q. HAS QWEST'S APPROACH TO "RESOLVING" BILLING DISPUTES**  
6 **CAUSED THE PARTIES TO DISAGREE ABOUT DISPUTED**  
7 **AMOUNTS?**

8 A. Yes. I have provided as Eschelon/16, an email exchange between Eschelon and  
9 Qwest showing that Qwest's determination of an issue as "resolved" results in  
10 Qwest changing the status from disputed to overdue over the disagreement of  
11 Eschelon. As Eschelon explained in its 9/13/06 email to Qwest on this issue:

12 You spoke about requiring Eschelon to escalate disputes if they are  
13 not resolved. As you can see with this one, I did request escalation  
14 back in 2003, but nothing ever was done by Qwest after my  
15 request.

16 We provided proof that our position was correct, provided the  
17 Department of Revenue's response to our inquiry, which was in our  
18 favor. Yet, nothing was ever done by Qwest other than to continue  
19 to deny our dispute and not reflect it as a valid dispute in your  
20 aging/systems.

21 Qwest does not show any of this amount disputed and continues to show the  
22 amounts associated with this dispute past due and owed by Eschelon.  
23 Eschelon/21 is a spreadsheet that shows the significant discrepancy between  
24 Eschelon's calculations of disputed amounts and what Qwest believes is disputed.

1           These discrepancies are caused by the reasons listed above, including Qwest's  
2           approach to "resolving" billing disputes.

3   **Q.   PLEASE ELABORATE ON QWEST'S ARBITRARY CONTROL IN THIS**  
4   **REGARD.**

5   A.   The correspondence provided as Confidential Eschelon/12 is an example of the  
6       arbitrary control Qwest would have over these remedies if its proposals were  
7       adopted. With arbitrations soon to be commenced, Qwest decided that it was time  
8       to send its letter and pursue these remedies, presumably to paint Eschelon as a  
9       "bad actor." This shows that Qwest could pursue these remedies when it is  
10      convenient for Qwest, and that other factors could similarly motivate Qwest  
11      during the term of the ICA to take these actions – that is, unless Commission  
12      oversight is preserved. Qwest – Eschelon's largest competitor – should not be  
13      permitted to exercise this type of arbitrary control.

14 **Q.   IF QWEST STOPPED PROCESSING ESCHELON'S ORDERS OR**  
15 **DISCONNECTED ESCHELON'S SERVICES AND ESCHELON**  
16 **DISAGREED, COULD ESCHELON SEEK COMMISSION RECOURSE**  
17 **THROUGH DISPUTE RESOLUTION?**

18 A.   Eschelon could seek dispute resolution before the Commission if Eschelon  
19       disagreed with Qwest's view of late payment and/or overdue amount, but it likely  
20       could not do so in time to keep Qwest from refusing to process Eschelon's orders  
21       or disconnecting Eschelon's customers – so the damage to Eschelon and its End  
22       User Customers would have already been done. Under the ICA language, Qwest

1 need only give 10 days notice of its intention to cease processing orders and  
2 disconnect services. It would be very difficult, if not impossible, for Eschelon to  
3 file a complaint, get it on the Commission's schedule, conduct a Commission  
4 hearing and have a decision within 10 business days. In addition, this will cause  
5 Eschelon to come to the Commission in crisis mode, which significantly  
6 compresses timeframes for fact-checking and deliberations and adds additional  
7 burden on the Commission, Eschelon and Qwest.

8 **Q. ARE THERE OTHER MEANS BY WHICH QWEST CAN COLLECT**  
9 **UNPAID UNDISPUTED BILLS BESIDES REJECTING ORDERS OR**  
10 **DISCONNECTING CUSTOMERS?**

11 A. Yes. Other remedies are available, like late payment fees and dispute resolution.  
12 *See, e.g.,* Sections 5.4.8 and 5.18. These other means of redress available to  
13 Qwest support the notion that Commission approval should be required before  
14 taking the much more serious step of order rejection or disconnection.

15 **SUBJECT MATTER NO. 6. DEPOSITS**

16 **Issue Nos. 5-8, 5-9, 5-11 and 5-12: ICA Section 5.4.5**

17 **Q. YOU HAVE EXPLAINED THE BUSINESS REASON UNDERLYING**  
18 **ESCHELON'S PROPOSALS ON PAYMENTS AND DEPOSITS ABOVE.**  
19 **WHAT SERVES AS THE DISAGREEMENT BETWEEN ESCHELON**  
20 **AND QWEST FOR ISSUE NOS. 5-8, 5-9, 5-11 AND 5-12?**

1 A. Eschelon and Qwest disagree on (1) whether the deposit requirement should be  
2 triggered when Eschelon fails to pay a “de minimus” undisputed amount (with the  
3 word de minimus serving as the disagreement) [Issue No. 5-8]; (2) how  
4 “Repeatedly Delinquent” should be defined in terms of failure to pay undisputed  
5 amounts [Issue No. 5-9]; (3) whether Eschelon should be required to pay a deposit  
6 to Qwest within 30 days if Eschelon has challenged the merits of the deposit  
7 requirement at the Commission [Issue No. 5-11]; and (4) whether a separate  
8 option is appropriate in which the deposit requirement does not hinge on the  
9 definition of Repeatedly Delinquent, but instead provides an avenue for the  
10 Commission to review a party’s payment history and determine whether “all  
11 relevant circumstances warrant a deposit.” [Issue No. 5-12]

12 **Q. WHAT ARE ESCHELON’S PROPOSALS FOR THESE ISSUES?**

13 A. On these issues, Eschelon proposes the following language modifications (with  
14 Eschelon’s proposed language underlined):

15 **Issue No. 5-8**

16 5.4.5 “Repeatedly Delinquent” means payment of any undisputed  
17 non-de minimus amount received more than thirty (30) Days after  
18 the Payment Due Date...<sup>83</sup>

19 **Issue No. 5-9 (1<sup>st</sup> of 2 options)**

20 5.4.5 . . . “Repeatedly Delinquent” means payment of any  
21 undisputed . . . amount received more than thirty (30) Days after  
22 the Payment Due Date, for three (3) consecutive months ~~or more~~  
23 ~~times during a twelve (12) month period~~ on the same Billing  
24 account number. . . .

---

<sup>83</sup> As explained below, Eschelon also offers to use the word “material” in place of “non-de minimus.” The word “material” is used in closed language numerous times throughout the ICA and, therefore, has a commonly-understood meaning.

1           **Issue No. 5-9(2<sup>nd</sup> of 2 options)**

2                     5.4.5 . . . “Repeatedly Delinquent” means payment of any  
3                     undisputed . . . amount received more than thirty (30) Days after  
4                     the Payment Due Date, three (3) or more times during a six (6)  
5                     ~~twelve (12)~~ month period on the same Billing account number.

6           **Issue No. 5-11**

7                     5.4.5 .....Required deposits are due and payable within thirty (30)  
8                     Days after demand and conditions being met, unless the billed  
9                     Party challenges the amount of the deposit or deposit requirement  
10                    (e.g., because delay in submitting disputes or making payment was  
11                    reasonably justified due to inaccurate or incomplete Billing)  
12                    pursuant to Section 5.18. If such a Dispute is brought before the  
13                    Commission, deposits are due and payable as of the date ordered  
14                    by the Commission.

15           **Issue No. 5-12**

16                    ~~5.4.5 Each Party will determine the other Party's credit status~~  
17                    ~~based on previous payment history as described below, or if, If the~~  
18                    ~~Parties are doing business with each other for the first time, each~~  
19                    ~~Party will determine the other Party's credit status based on credit~~  
20                    ~~reports such as Dun and Bradstreet. If a Party that is doing~~  
21                    ~~business with the other Party for the first time has not established~~  
22                    ~~satisfactory credit with the other Party according to the previous~~  
23                    ~~sentence or the Party is Repeatedly Delinquent in making its~~  
24                    ~~payments, or the Party is being reconnected after a disconnection~~  
25                    ~~of service or discontinuance of the processing of orders by the~~  
26                    ~~Billing Party due to a previous non-payment situation, the Billing~~  
27                    ~~Party may require a deposit to be held as security for the payment~~  
28                    ~~of charges before the orders from the billed Party will be~~  
29                    ~~provisioned and completed or before reconnection of service. The~~  
30                    ~~Billing Party may also require a deposit for the failure of the other~~  
31                    ~~Party to make full payment, less any disputed amount as provided~~  
32                    ~~for in Section 21 of this Agreement, for the relevant services~~  
33                    ~~provided under this Agreement within ninety (90) Days following~~  
34                    ~~the Payment Due Date, if the Commission determines that all~~  
35                    ~~relevant circumstances warrant a deposit. “Repeatedly delinquent”~~  
36                    ~~means any payment received thirty (30) Days or more after the~~  
37                    ~~Payment Due Date, three (3) or more times during a twelve (12)~~  
38                    ~~month period on the same Billing account number. Accounts with~~  
39                    ~~amounts disputed under the dispute provisions of this agreement~~  
40                    ~~shall not be included as Repeatedly Delinquent based on amounts~~  
41                    ~~in dispute alone. The deposit may not exceed the estimated total~~  
42                    ~~monthly charges for an average two (2) month period within the 1<sup>st</sup>~~

1 three (3) months from the date of the triggering event which would  
2 be either the date of the request for reconnection of services or  
3 resumption of order processing ~~and/or the date CLEC is repeatedly~~  
4 ~~delinquent as described above~~ for all services. The deposit may be  
5 a surety bond if allowed by the applicable Commission regulations,  
6 a letter of credit with terms and conditions acceptable to the Billing  
7 party, an interest bearing escrow account, or some other form of  
8 mutually acceptable security such as a cash deposit. Required  
9 deposits are due and payable within thirty (30) Days after demand  
10 and conditions being met.

11 Issues 5-8 and 5-9 address the definition of “Repeatedly Delinquent,” which is the  
12 operative term in determining whether Qwest can demand a deposit. In other  
13 words, if payment by Eschelon is “Repeatedly Delinquent,” as that term will be  
14 defined by this arbitration, Qwest can invoke remedies set forth in the Payment  
15 and Deposit language of the contract. Eschelon’s proposal under Issue No. 5-8 is  
16 designed so that the deposit requirement (a deposit that can amount to 2 months  
17 worth of charges, or about \$10 million for Eschelon) under Section 5.4.5 is  
18 triggered only when there is a failure to pay a non-de minimus, undisputed  
19 amount. The deposit requirement is designed to protect Qwest when there is a  
20 legitimate concern regarding future payment, and a de minimus outstanding  
21 amount does not rise to this level.

22 For Issue 5-9, Eschelon provides two options, one that defines “Repeatedly  
23 Delinquent” in terms of three late payments in three consecutive months, and one  
24 that defines the term as late payments in three months out of a six month period –  
25 either of which is acceptable to Eschelon. Again, Eschelon’s language is  
26 designed to trigger a deposit when there is a legitimate concern about its ability to

1 pay. Regarding Issue 5-11, Eschelon’s language simply recognizes that deposits  
2 are payable in 30 days except when challenged at the Commission pursuant to  
3 dispute resolution.<sup>84</sup> In these instances the Commission would determine the  
4 payment due date of the deposit.

5 As a separate alternative, Eschelon proposes language in Issue 5-12 that would  
6 not hinge on the definition of “Repeatedly Delinquent,” but rather would allow  
7 the Commission to determine whether a deposit is warranted based on the  
8 Commission’s review of a party’s payment history and “all relevant  
9 circumstances.” Adopting Eschelon’s language on Issue 5-12 would avoid the  
10 need to rule on Issues 5-8, 5-9 and 5-11.

11 **Q. WHAT ARE QWEST’S PROPOSALS ON THESE ISSUES?**

12 A. Qwest proposes the following language on these issues (Qwest language opposed  
13 by Eschelon is underlined and Eschelon proposed language opposed by Qwest in  
14 ~~strikeout~~):

15 **Issue No. 5-8**

16 5.4.5 “Repeatedly Delinquent” means payment of any undisputed  
17 ~~non-de minimus~~ amount received more than thirty (30) Days after  
18 the Payment Due Date . . .

19 **Issue No. 5-9**

20 5.4.5 . . . “Repeatedly Delinquent” means payment of any  
21 undisputed . . . amount received more than thirty (30) Days after  
22 the Payment Due Date, ~~for three (3) consecutive months~~ or more  
23 times during a twelve (12) month period on the same Billing  
24 account number.. .

---

<sup>84</sup> Section 5.18 is the dispute resolution provision of the ICA.

1           **Issue No. 5-11**

2                     5.4.5 .....Required deposits are due and payable within thirty (30)  
3                     Days after demand and conditions being met, ~~unless the billed~~  
4                     ~~Party challenges the amount of the deposit or deposit requirement~~  
5                     ~~(e.g., because delay in submitting disputes or making payment was~~  
6                     ~~reasonably justified due to inaccurate or incomplete Billing)~~  
7                     ~~pursuant to Section 5.18. If such a Dispute is brought before the~~  
8                     ~~Commission, deposits are due and payable as of the date ordered~~  
9                     ~~by the Commission.~~

10           **Issue No. 5-12**

11                     Qwest does not offer an alternative proposal under Issue 5-12 as  
12                     Eschelon does.

13                     For Issue 5-8, Qwest proposes to omit the term “non de minimus,” which means  
14                     that any undisputed amount, even a few dollars, that is received after 30 days after  
15                     the due date could be counted by Qwest as “Repeatedly Delinquent” and used to  
16                     invoke the deposit requirement. Qwest states that the term non de minimus is  
17                     vague and would lead to further disagreements requiring Commission  
18                     resolution.<sup>85</sup> For Issue 5-9, Qwest proposes to define Repeatedly Delinquent as  
19                     late payments in three months within a twelve month period. Qwest notes that its  
20                     proposed timeframe is consistent with the timeframe adopted in the past.<sup>86</sup> Under  
21                     Issue 5-11, Qwest proposes to demand payment of deposits within 30 days with  
22                     no exceptions. Qwest complains that the exception in Eschelon’s language  
23                     (allowing a deposit demand to be challenged at the Commission and the  
24                     Commission to set the deposit due date) would cause delay in the payment of the

---

<sup>85</sup> Qwest Response, p. 16, line 18.

<sup>86</sup> Qwest Response, p. 17.

1 deposit and would require the Commission to “micro manage” the companies’  
2 relationship.<sup>87</sup> Qwest does not provide a separate proposal under Issue 5-12.

3 **Q. PLEASE DESCRIBE THE DISAGREEMENT UNDER ISSUE 5-8 “DE**  
4 **MINIMUS AMOUNT” (FIRST OF FOUR ISSUES).**

5 A. There is a provision in the contract under Section 5.4.5 that allows a Billing Party  
6 to demand a deposit from the Billed Party if the Billed Party is “Repeatedly  
7 Delinquent” in making payments. The operative, agreed to language of Section  
8 5.4.5 states that:

9 If a Party that is doing business with the other Party for the first  
10 time has not established satisfactory credit with the other Party  
11 according to the previous sentence or the Party is *Repeatedly*  
12 *Delinquent* in making its payments, or the Party is being  
13 reconnected after a disconnection of service or discontinuance of  
14 the processing of orders by the Billing Party due to a previous non-  
15 payment situation, the Billing Party may require a deposit to be  
16 held as security for the payment of charges before the orders from  
17 the billed Party will be provisioned and completed or before  
18 reconnection of service. (emphasis added)

19 The key to Issues 5-8 and 5-9 is the appropriate definition of “Repeatedly  
20 Delinquent.” Eschelon proposes to include the term “non de minimus” in the  
21 definition of Repeatedly Delinquent so that a few dollars of undisputed late  
22 payments do not trigger a significant deposit requirement.

23 **Q. WHY SHOULD DE MINIMUS AMOUNTS NOT TRIGGER THE**  
24 **DEPOSIT REQUIREMENT?**

---

<sup>87</sup> Qwest Response, p. 18.

1 A. The purpose of this deposit provision is to allow Qwest to obtain a deposit when  
2 there is a legitimate concern about Eschelon’s ability to pay future charges. A *de*  
3 *minimus* amount of undisputed late charges does not rise to the level of a  
4 legitimate concern in this regard, and should therefore not trigger the requirement  
5 of Section 5.4.5 to pay a substantial deposit.

6 **Q. WHAT CONSTITUTES A DE MINIMUS AMOUNT?**

7 A. “De Minimus” is defined as “of trifling consequence of importance; too  
8 insignificant to be worthy of concern.”<sup>88</sup> According to *Webster’s*, the term *de*  
9 *minimus* is derived from the Latin phrase *de minimus non curat lex*, which:

10 ...refers to the principle of law that even if a technical violation of  
11 a law appears to exist according to the letter of the law, if the effect  
12 is too small to be of consequence, the violation of the law will not  
13 be considered as a sufficient cause of action...

14 So, under Eschelon’s proposal, for Qwest to be able to demand a deposit under  
15 the “Repeatedly Delinquent” provision, the amount received more than 30 days  
16 after the payment due date would need to be “worthy of concern” and not of  
17 “trifling consequence.” Amounts that are “too small to be of consequence” do not  
18 rise to the level of a legitimate concern about Eschelon’s ability to pay. The term  
19 “non de minimus” should be included to acknowledge this.

20 **Q. IS THIS TERM TOO VAGUE TO BE USEFUL?**

21 A. Though Qwest may complain that the term is vague,<sup>89</sup> the dictionary definition

---

<sup>88</sup> Webster’s dictionary online: <http://www.webster-dictionary.net/definition/Minimus>

<sup>89</sup> Qwest Response, p. 16, line 18.

1 quoted above shows that the term is commonly understood. Other terms in the  
2 ICA that also have a commonly understood meaning are likewise not defined.  
3 For example, the term “material” and the concept of “materiality” are used  
4 throughout the agreement in closed language without being defined in those  
5 provisions. See ICA Sections 2.1, 2.2, 5.1.3.1, 5.4.6, 5.6.2, 5.8.4, 5.13.1,  
6 7.2.2.9.6, 8.2.1.29, 10.6.2.5.1, 10.8.2.14, 10.8.2.18 & 11.3. In a way, “material”  
7 is the flip side of “de minimus,” because a de minimus amount would not be  
8 material. In fact, another way to resolve this issue would be to adopt the  
9 following language for this sentence in Issue 5-8:

10 “Repeatedly Delinquent” means payment of any undisputed  
11 material amount received more than thirty (30) Days after the  
12 Payment Due Date.

13 Eschelon also offers this language as a means to resolve this issue. The term  
14 “material” has the advantage (unlike the term “non de minimus”) of being used  
15 elsewhere in the interconnection agreement. And the parties must be able to  
16 determine its meaning, given the frequency of its use in other provisions of the  
17 agreement. In fact, it is already used within the Payment and Deposit provisions  
18 of Section 5.4. In Section 5.4.6, agreed-to language states:

19 Upon a material change in financial standing (including Qwest  
20 transfer of relevant exchanges to any unaffiliated party as  
21 described in Section 5.12.2), the billed Party may request and the  
22 Billing Party will consider a recalculation of the deposit.

1 If a change in financial standing can be determined “material” or not, then an  
2 undisputed amount can likewise be determined “material” or not. Eschelon does  
3 not object to use of either “non de minimus” or “material” to resolve this issue.

4 **Q. PLEASE DESCRIBE THE DISAGREEMENT UNDER ISSUE 5-9**  
5 **“DEFINITION OF REPEATEDLY DELINQUENT” (SECOND OF FOUR**  
6 **ISSUES).**

7 A. Eschelon proposes to define Repeatedly Delinquent to mean undisputed amounts  
8 received more than 30 days after the Payment Due Date for three consecutive  
9 months for the same billing account number (“BAN”). Qwest, on the other hand,  
10 proposes that Repeatedly Delinquent should mean late payment three or more  
11 times in a twelve month period (*i.e.*, the three months do not need to be  
12 consecutive).

13 **Q. WHY IS ESCHELON’S PROPOSAL SUPERIOR TO QWEST’S?**

14 A. Similar to Issue 5-8, Eschelon’s proposal would trigger a deposit requirement  
15 when there is actually a legitimate concern about a party’s ability to pay, while  
16 Qwest’s proposal would trigger a deposit requirement when there is no legitimate  
17 concern.

18 Under Qwest’s proposed language, if Eschelon were to pay Qwest a portion of the  
19 amount due late in months one and two (even a de minimus amount), make timely  
20 payments in full for the next nine months, and then pay a portion of the amount  
21 due late in month twelve, Qwest could demand a large security deposit. This

1 scenario does not provide evidence of the financial stress that gives rise to a  
2 legitimate need for payment “security.”

3 **Q. HAS QWEST AGREED TO THE “3 CONSECUTIVE MONTH”**  
4 **STANDARD ESCHELON IS PROPOSING HERE IN ICAS WITH OTHER**  
5 **CLECS?**

6 A. Yes. For example, in a recent filing in Utah, McLeodUSA quoted the definition  
7 of “Repeatedly Delinquent” in § 26.4.4 of its ICA with Qwest as “being thirty  
8 (30) days or more delinquent for three (3) consecutive months.”<sup>90</sup> In addition,  
9 ATI, which was recently acquired by Eschelon, has the three consecutive month  
10 standard in Section 26.4.4 of its current ICA with Qwest in Washington. In  
11 addition to these CLECs for whom Qwest utilizes the 3 consecutive month  
12 standard for defining Repeatedly Delinquent, Qwest uses it for the following  
13 additional companies (this list is not meant to be exhaustive): AT&T Wireless  
14 Services; Pathnet, Inc.; Autotel; Arch Paging, Inc.; Airtouch Paging, Inc.;  
15 MetroArea User; and Alamosa PCS LLC. The fact that Qwest has agreed to  
16 include “3 consecutive month” language in interconnection/service agreements  
17 with other companies shows that Qwest recognizes that this standard adequately  
18 protects its interests. Holding Eschelon to a higher standard is unnecessary and  
19 discriminatory. Qwest attempts to support its position by pointing out that its

---

<sup>90</sup> The pertinent portion of McLeodUSA’s brief is provided as Eschelon/22. I have provided as Eschelon/22 the pertinent pages of various carriers’ interconnection/service agreements with Qwest which shows that Qwest has agreed to the three consecutive month standard with numerous CLECs, CMRS providers and paging companies.

1 proposal has been adopted in the past, but as shown in Eschelon/22, Eschelon's  
2 proposal has also been adopted in the past, and Qwest/US WEST has agreed to it.

3 **Q. WHY IS ESCHELON'S ALTERNATIVE PROPOSAL – "3 MONTHS IN A**  
4 **SIX MONTH PERIOD" - SUPERIOR TO QWEST'S PROPOSAL?**

5 A. Again, Eschelon's language addresses a situation in which a legitimate concern  
6 exists about a party's ability to pay. For instance, under Eschelon's alternative  
7 proposal, if the billed party had nine consecutive months of timely payment in  
8 full, it would not be Repeatedly Delinquent (unlike under Qwest's proposal).  
9 Eschelon offers either proposal #1 or #2 for the Commission's adoption.

10 **Q. PLEASE DESCRIBE THE DISAGREEMENT UNDER ISSUE 5-11**  
11 **"DISPUTES BEFORE COMMISSION" (THIRD OF FOUR ISSUES).**

12 A. This disagreement addresses whether Eschelon can dispute the amount of a  
13 deposit or deposit requirement at the Commission before it is implemented.  
14 Qwest's proposal is that "deposits are due and payable within thirty (30) days  
15 after demand and conditions are met." Eschelon's proposal contains this same  
16 language, but also provides an exception if the billed party challenges the amount  
17 of the deposit or deposit requirement to the Commission, in which case the  
18 deposit due date would be established by the Commission. Eschelon's language  
19 identifies an example in which this scenario may occur, that is, delay in  
20 submitting disputes or making payment was reasonably justified due to inaccurate  
21 or incomplete billing – much like the examples I discuss above.

1 **Q. IS THE DISPUTE RESOLUTION PROVISION CAPABLE OF**  
2 **ADDRESSING ESCHELON'S CONCERNS ABOUT QWEST LEVYING**  
3 **DESPOSITS?**

4 A. No. If Eschelon is forced to rely solely on the dispute resolution provision in this  
5 instance, it is likely that Eschelon would be required to pay a deposit that Qwest  
6 demanded before recourse could be sought and obtained at the Commission.

7 **Q. COULD THE COMMISSION REQUIRE ANY DEPOSIT PAYMENT DUE**  
8 **DATE IT WISHES UNDER ESCHELON'S LANGUAGE?**

9 A. Yes. Eschelon's language simply states that if it brings a dispute to the  
10 Commission, the due date for payment of any deposit would be as of the date  
11 ordered by the Commission. In this instance, the Commission could require  
12 Eschelon to provide interim relief to Qwest while the dispute is being litigated, or  
13 the Commission could require payment of a deposit at the conclusion of the  
14 dispute, or the Commission could find the deposit unwarranted and require no  
15 deposit to be paid. Eschelon's language, therefore, would allow the Commission  
16 to make the call on when a deposit is paid when a disagreement regarding that  
17 deposit arises.

18 **Q. WOULD ESCHELON'S LANGUAGE REQUIRE THE COMMISSION TO**  
19 **MAKE A DETERMINATION IN EVERY INSTANCE?**

20 A. No. Eschelon's language only applies if Eschelon challenges the deposit amount  
21 or requirement at the Commission. If Eschelon does not challenge the deposit, it  
22 would pay within 30 days as set forth in Section 5.4.5. Eschelon would not waste

1 the resources of the Commission, Qwest, or itself by raising a baseless challenge  
2 that would result in Eschelon ultimately paying the deposit anyway.

3 **Q. ESCHELON'S LANGUAGE FOR ISSUE 5-12 HAS AN ALTERNATIVE**  
4 **STANDARD OF WHEN THE COMMISSION "DETERMINES THAT ALL**  
5 **RELEVANT CIRCUMSTANCES WARRANT A DEPOSIT" (FOURTH OF**  
6 **FOUR ISSUES). PLEASE EXPLAIN.**

7 A. Eschelon has proposed alternative language in Issue 5-12 that would not hinge on  
8 the definition of "Repeatedly Delinquent." Instead, it would allow the  
9 Commission to determine whether a deposit is warranted based on the  
10 Commission's review of a Billed Party's payment history and "all relevant  
11 circumstances." Since this option does not rely on the definition of "Repeatedly  
12 Delinquent" and defers to Commission authority, it avoids the need to rule on  
13 Issues 5-8, 5-9 and 5-11. Eschelon's alternative language is shown above.

14 **Q. WHAT ARE SOME OF THE ADVANTAGES OF THIS ALTERNATIVE?**

15 A. This option provides the Commission the ability to determine contested deposit  
16 requirements on a case-by-case basis if and when they arise. This option would  
17 provide the greatest degree of flexibility to the Commission in addressing  
18 potential disagreements. If Eschelon does not have a legitimate disagreement  
19 with Qwest, Commission approval would be straightforward. However, if there  
20 was a disagreement, this alternative would allow the Commission to weigh all  
21 relevant facts. The key here is that Commission oversight is preserved and Qwest  
22 is not allowed to unilaterally demand deposits.

1 **SUBJECT MATTER NO. 7. REVIEW OF CREDIT STANDING**

2 **Issue No. 5-13: ICA Section 5.4.7**

3 **Q. WHAT IS THE SOURCE OF DISAGREEMENT UNDER ISSUE 5-13 (THE**  
4 **FINAL “PAYMENT AND DEPOSITS” ISSUE)?**

5 A Qwest proposes to include language that would allow Qwest to increase a deposit  
6 amount or require a new deposit for Eschelon based on Qwest’s unilateral review  
7 of Eschelon’s credit standing.

8 **Q. WHAT IS ESCHELON’S PROPOSAL FOR ISSUE 5-13?**

9 A. Eschelon offers two options for Issue 5-13.

10 **Issue No. 5-13 (1<sup>st</sup> of 2 options)**

11 5.4.7 Intentionally Left Blank

12 **Issue No. 5-13 (2<sup>nd</sup> of 2 options)**

13 5.4.7 If a Party has received a deposit pursuant to Section 5.4.5  
14 but the amount of the deposit is less than the maximum deposit  
15 amount permitted by Section 5.4.5, the Billing Party may review  
16 the other Party's credit standing and increase the amount of deposit  
17 required, if approved by the Commission, but in no event will the  
18 maximum amount exceed the amount stated in Section 5.4.5.  
19 Section 5.4 is not intended to change the scope of any regulatory  
20 agency’s or bankruptcy court’s authority with regard to Qwest or  
21 CLECs.

22 Eschelon’s first option is to leave this section intentionally blank. Eschelon  
23 contends that Qwest’s proposed Section 5.4.7 is undefined and unnecessary.  
24 Eschelon provides option #2 in case the Commission is inclined to agree with the  
25 concept of allowing Qwest to increase deposit amounts based on its review of  
26 Eschelon’s credit standing, in which case Commission approval should be

1 required and the language should recognize that 5.4.7 applies to increasing a  
2 deposit amount and not establishing a new deposit.<sup>91</sup>

3 **Q. WHAT IS QWEST'S PROPOSAL FOR ISSUE 5-13?**

4 A. Qwest has proposed language that would allow it to review Eschelon's credit  
5 standing and unilaterally increase the amount of the deposit. Qwest proposes the  
6 following language under Section 5.4.7:

7 5.4.7 The Billing Party may review the other Party's credit  
8 standing and increase the amount of deposit required but in no  
9 event will the maximum amount exceed the amount stated in  
10 Section 5.4.5.

11 **Q. WHY DOES ESCHELON DISAGREE WITH QWEST'S LANGUAGE IN**  
12 **5.4.7?**

13 A. There are several reasons. First, Qwest's proposed language would grant it  
14 unilateral authority to increase Eschelon's deposit without any recourse by  
15 Eschelon. In fact, Eschelon's credit standing would not even need to change for  
16 Qwest to invoke Section 5.4.7 and demand a deposit or deposit increase. Again,  
17 Eschelon could seek dispute resolution, but as explained above, Commission  
18 relief would likely come after Eschelon has already been required to pay Qwest's  
19 unilaterally-determined deposit amount.

20 Second, Qwest's proposed provision contains no criteria or standards defining  
21 when this provision may be invoked. Qwest's language does not describe the

---

<sup>91</sup> Qwest contends that its proposed Section 5.4.7 could allow Qwest to not only increase existing deposits but also to demand a new deposit. Qwest has stated that an increase takes into consideration zero as a starting point.

1 “credit history” that would be subject to review, the conditions that might justify a  
2 review, or the circumstances that would warrant an increase. Indeed Qwest has  
3 indicated during negotiations that it could simply read something in the  
4 newspaper regarding Eschelon and use that information to invoke Section 5.4.7  
5 and increase Eschelon’s deposit (or require a new deposit).

6 Third, this language would effectively nullify the limitations on deposit  
7 requirements under Section 5.4.5. Section 5.4.5 would allow a party to demand a  
8 deposit when a party (i) has not established satisfactory credit with the other  
9 Party, (ii) is Repeatedly Delinquent in making its payments, or (iii) the Party is  
10 being reconnected after a disconnection of service or discontinuance of the  
11 processing of orders due to a previous non-payment situation. Qwest’s proposed  
12 language in 5.4.7 is not limited in any of these respects. In fact, Qwest’s  
13 proposed language would grant Qwest the authority to increase a deposit  
14 requirement even when Eschelon is current in its payments to Qwest. A  
15 legitimate concern about Eschelon’s ability to pay certainly does not exist when  
16 Eschelon is current with Qwest, but Qwest’s 5.4.7 would allow it to demand a  
17 deposit anyway.

18 **Q. DOES ESCHELON DISAGREE WITH QWEST’S 5.4.7 FOR ANY OTHER**  
19 **REASONS?**

20 A. Yes. The provision in Qwest’s proposed Section 5.4.7 that allows Qwest to  
21 increase deposit amounts is unnecessary because Sections 5.4.5 and 5.4.6 already  
22 address how deposits should be recalculated based on financial standing. There is

1 no reason to duplicate less clear provisions in Section 5.4.7. In addition, Qwest is  
2 interpreting Section 5.4.7 to allow Qwest to require a new deposit and not just an  
3 increase in an existing deposit (*i.e.*, an increase from \$0), and this, too, is  
4 unnecessary given that Section 5.4.5 already addresses new deposit requirements.  
5 The ICA already provides Qwest with a means to establish and increase a deposit  
6 for Eschelon, and it is unnecessary and unfair for Qwest to have a second  
7 opportunity to do through Section 5.4.7.

8 Furthermore, Qwest's proposed Section 5.4.7 states that the amount of the  
9 deposit, when increased, may not exceed the maximum amount under Section  
10 5.4.5. Section 5.4.5, however, provides no method for calculation of a maximum  
11 for Qwest's proposed Section 5.4.7. Specifically, Section 5.4.5 states that "[t]he  
12 deposit may not exceed the estimated total monthly charges for an average two  
13 (2) month period within the first three (3) months, *from the date of the triggering*  
14 *event*, which would be either the date of the request for reconnection of services  
15 or resumption of order processing and/or the date CLEC is Repeatedly Delinquent  
16 as described above for all services." (*emphasis added*) However, under Qwest's  
17 Section 5.4.7 there would be no "triggering event" that could be used to select  
18 three months for purposes of computing an average. In other words, Section 5.4.7  
19 does not involve reconnection, resumption of order processing, or Eschelon being  
20 Repeatedly Delinquent, so the deposit cap in 5.4.5 makes no sense within the  
21 context of Qwest's proposed Section 5.4.7.

22 **Q. IS THERE REASON FOR CONCERN ABOUT MISUSE OF THIS**

1           **SECTION?**

2    A.    Yes. Eschelon has requested examples from Qwest in which Section 5.4.7 would  
3           apply that are not already covered by Sections 5.4.5 and 5.4.6. Qwest failed to  
4           provide any examples and responded that Qwest has the right to secure its  
5           accounts if it determines there may be a financial risk. “Financial risk” is a broad  
6           term and suggests that Qwest could take the liberty to read Section 5.4.7 very  
7           broadly. The closed language in 5.4.5 reads: “each Party will determine the other  
8           Party’s credit status based on previous payment history as described below or, if  
9           the Parties are doing business with each other for the first time, based on credit  
10          reports such as Dun and Bradstreet.” Given that Eschelon and Qwest already  
11         agreed to language in Section 5.4.5 that explains how credit status will be  
12         determined and does not grant the unilateral authority carved out in Qwest’s  
13         proposed Section 5.4.7, there is reason for concern.

14   **Q.    WHY IS ESCHELON’S ALTERNATIVE LANGUAGE PROPOSAL**  
15   **SUPERIOR TO QWEST’S PROPOSAL FOR SECTION 5.4.7?**

16    A.    Eschelon’s alternative would alleviate the concern regarding the unilateral  
17           authority granted to Qwest under its proposed Section 5.4.7 by requiring  
18           Commission approval of an increase in the deposit amount. This would also  
19           allow the Commission to review whatever criteria and/or standards are used by  
20           Qwest to increase (or establish) the deposit amount, and also allow the  
21           Commission to address any issues related to the deposit cap under Section 5.4.7.  
22           Eschelon’s alternative for Section 5.4.7 also recognizes that Section 5.4.7 applies

1 to increasing existing deposit amounts and not establishing new deposit  
2 requirements.

3 **Q. PLEASE SUMMARIZE THE PAYMENT AND DEPOSIT ISSUES (ISSUES**  
4 **5-6, 5-7, 5-7(A), 5-8, 5-9, 5-11, 5-12 AND 5-13).**

5 A. Eschelon does not object to the inclusion of the Payment and Deposit provisions  
6 and remedies in the ICA because it agrees that Qwest (and Eschelon) should have  
7 the ability to protect its financial interests when there is a legitimate concern  
8 about future payment. After all, the intent of the payment and deposit provisions  
9 is to address situations when legitimate concerns exist in this regard. However, if  
10 Qwest is able to invoke these provisions in cases where no legitimate concern  
11 about ability to pay exists, it could cause significant harm to Eschelon and to  
12 customers. Given the seriousness of these steps, and the effects they would have  
13 on Eschelon and its customers, Commission oversight should be available to  
14 protect the public interest before these steps are taken.

15 **V. NON DISCLOSURE AGREEMENTS, BILL VALIDATION,**  
16 **COLLOCATION RATE APPLICATION, AND DATA RELATED TO**  
17 **TRRO CAPS (SUBJECT MATTER NOS. 8 – 10, 11 PARTIAL, AND 17)**

18 **SUBJECT MATTER NO. 8. COPY OF NON-DISCLOSURE AGREEMENT**

19 **Issue No. 5-16: ICA Section 5.16.9.1**

20 **Q. PLEASE DESCRIBE THE BUSINESS NEED REGARDING COPY OF**  
21 **NON-DISCLOSURE AGREEMENT IN ISSUE NO. 5-16.**

1 A. Eschelon provides forecasting information to Qwest. This information is highly  
2 competitive and sensitive and this information should not be disclosed to Qwest  
3 employees who are in a position to use it to Eschelon's competitive disadvantage.  
4 Qwest has agreed that Qwest employees to whom Eschelon's forecasts and  
5 forecasting information are disclosed will be required to execute a nondisclosure  
6 agreement covering the information. However, Qwest disagrees as to whether  
7 Qwest must agree to provide Eschelon with a signed copy of each non-disclosure  
8 agreement within ten days of execution. Eschelon should be able to know who at  
9 Qwest is reviewing Eschelon's highly confidential information.

10 **Q. WHAT IS ESCHELON'S PROPOSAL TO ADDRESS THIS ISSUE?**

11 A. Eschelon proposes the following (underlined) language for ICA Section 5.16.9.1:

12 5.16.9.1 The Parties may disclose, on a need to know basis only,  
13 CLEC individual forecasts and forecasting information disclosed  
14 by Qwest, to legal personnel, if a legal issue arises about that  
15 forecast, as well as to CLEC's wholesale account managers,  
16 wholesale LIS and Collocation product managers, network and  
17 growth planning personnel responsible for preparing or responding  
18 to such forecasts or forecasting information. In no case shall retail  
19 marketing, sales or strategic planning have access to this  
20 forecasting information. The Parties will inform all of the  
21 aforementioned personnel, with access to such Confidential  
22 Information, of its confidential nature and will require personnel to  
23 execute a non-disclosure agreement which states that, upon threat  
24 of termination, the aforementioned personnel may not reveal or  
25 discuss such information with those not authorized to receive it  
26 except as specifically authorized by law. Qwest shall provide  
27 CLEC with a signed copy of each non-disclosure agreement  
28 executed by Qwest personnel within ten (10) Days of execution.  
29 Violations of these requirements shall subject the personnel to  
30 disciplinary action up to and including termination of employment.

31 **Q. WHAT IS QWEST'S PROPOSAL ON THIS ISSUE?**

1 A. Qwest proposes to delete Eschelon's proposed language.

2 **Q. WHAT TYPE OF FORECAST INFORMATION IS PROVIDED**  
3 **PURSUANT TO THE ICA?**

4 A. Forecasts provided under the ICA include competitively sensitive information  
5 related to Interconnection Trunks in ICA Section 7.2.2.8; future Central Office  
6 space Collocation requirements in ICA Section 8.4.1.4; and forecasted demand by  
7 DS0, DS1 and DS3 capacities that will be terminated on the Interconnection  
8 Distribution Frame (ICDF) by Qwest on behalf of CLEC in ICA Section 8.4.4.1.

9 **Q. WHY IS ESCHELON'S PROPOSAL NECESSARY AND REASONABLE?**

10 A. If Qwest does not provide Eschelon with copies of executed nondisclosure  
11 agreements, Eschelon will have insufficient information to object if sensitive  
12 information is provided to a Qwest employee not authorized by the ICA to receive  
13 it. Eschelon thus will have no way to confirm that its confidential information is  
14 being adequately protected. Qwest has already agreed that employees will sign  
15 the agreement. Eschelon's proposal to require Qwest to provide a copy of that  
16 existing executed agreement imposes no additional burden on Qwest. Qwest's  
17 unwillingness to provide copies of executed nondisclosure agreements renders the  
18 agreed upon requirement to actually execute these agreements difficult to enforce.

19 Eschelon's proposal to receive copies of executed non-disclosure agreements  
20 reflects the common practice in other contexts under which the parties exchange  
21 signature pages of confidentiality protective agreements so that a party will be

1 aware of who is receiving its confidential information and will be in a position to  
2 raise objections if necessary.

3 Because providing executed protective agreements is common practice and  
4 facilitates Eschelon's ability to enforce these agreements, Qwest should be  
5 required to provide signed copies of these agreements to Eschelon.

6 **Q. IS IT BURDENSOME TO PROVIDE SIGNED COPIES OF PROTECTIVE**  
7 **AGREEMENTS?**

8 A. No. Providing copies of signed protective agreements is common practice and  
9 can not reasonably be considered a burden.

10 **Q. IS ESCHELON PROTECTED UNDER SECTION 18 OF THE ICA?**

11 A. No. Though section 18.3.1 allows Eschelon to audit Qwest's compliance with  
12 this interconnection agreement, the most obvious potential cause of non-  
13 compliance with the Agreement regarding the handling of Eschelon's forecast  
14 would be the signatories of the protective agreement. This is precisely the type of  
15 information that should be made available to Eschelon to ensure the proper  
16 handling of forecasted data. Section 18.3.1 reads in its entirety [emphasis added]:

17 18.3.1 Either Party may request an Audit of the other Party's  
18 compliance with this Agreement's measures and requirements  
19 applicable to limitations on the distribution, maintenance, and use  
20 of proprietary or other protected information that the requesting  
21 Party has provided to the other. Those *Audits shall not take place*  
22 *more frequently than once in every three (3) years unless cause is*  
23 *shown* to support a specifically requested audit that would  
24 otherwise violate this frequency restriction. *Examinations will not*  
25 *be permitted in connection with investigating or testing such*  
26 *compliance.* Other provisions of this Section that are not

1 inconsistent herewith shall apply, except that in the case of audits,  
2 the Party to be audited may also request the use of an independent  
3 auditor.

4 **Q. PLEASE SUMMARIZE THIS ISSUE.**

5 A. Qwest has agreed that Qwest employees to whom Eschelon's forecasts and  
6 forecasting information are disclosed will be required to execute a nondisclosure  
7 agreement covering the information. Eschelon's proposed language would  
8 require Qwest to provide Eschelon with a signed copy of each non-disclosure  
9 agreement within ten days of execution. Eschelon's language is reasonable and  
10 should be adopted.

11 **SUBJECT MATTER NO. 9. TRANSIT RECORD CHARGE AND BILL**  
12 **VALIDATION**

13 **Issues Nos. 7-18 and 7-19: ICA Sections 7.6.3.1 and 7.6.4**

14 **Q. PLEASE DESCRIBE THE BUSINESS NEED RELATED TO TRANSIT**  
15 **RECORD CHARGE AND BILL VALIDATION IN ISSUE NOS. 7-18 AND**  
16 **7-19.**

17 A. "Transit Traffic" is defined as any traffic that originates from one  
18 Telecommunications Carrier's network, transits another Telecommunications  
19 Carrier's network, and terminates to yet another Telecommunications Carrier's  
20 network<sup>92</sup> Qwest is a transit provider and bills Eschelon for transit for certain  
21 Eschelon originated calls. The bills that Qwest provides to Eschelon for Eschelon

---

<sup>92</sup> See ICA, Section 4 - Definitions.

1 originated calls do not contain call record detail, but instead simply contain the  
2 number of transit minutes and the transit traffic rate. In order to validate the bills  
3 that Qwest provides, Eschelon requests, on a limited basis, call records that would  
4 allow for bill verification. It is unclear whether Qwest will even provide the  
5 transit records necessary for bill verification, and if so, whether Qwest would  
6 attempt to charge for the information necessary to validate Qwest's bills.

7 **Q. WHAT IS ESCHELON'S PROPOSAL TO ADDRESS THIS ISSUE?**

8 A. Eschelon proposes the following (underlined) language:

9 **Issue No. 7-18:**

10 7.6.3.1 In order to verify Qwest's bills to CLEC for Transit Traffic  
11 the billed party may request sample 11-01-XX records for  
12 specified offices. These records will be provided by the transit  
13 provider in EMI mechanized format to the billed party at no  
14 charge, because the records will not be used to bill a Carrier. The  
15 billed party will limit requests for sample 11-01-XX data to a  
16 maximum of once every six months, provided that Billing is  
17 accurate.

18 **Issue No. 7-19:**

19 7.6.4 Qwest will provide the non-transit provider, upon request,  
20 bill validation detail including but not limited to: originating and  
21 terminating CLLI code, originating and terminating Operating  
22 Company Number, originating and terminating state jurisdiction,  
23 number of minutes being billed, rate elements being billed, and  
24 rates applied to each minute.

25 **Q. WHAT IS QWEST'S PROPOSAL ON THIS ISSUE?**

26 A. Qwest proposes that Eschelon's language be deleted.

27 **Q. WHY IS ESCHELON'S LANGUAGE NECESSARY?**

28 A. Qwest has already agreed to provide reasonably requested documentation that will

1 expedite the resolution of disputes between Eschelon and Qwest.<sup>93</sup> Section 7.6.3  
2 of this ICA contains agreed upon language describing the circumstances under  
3 which Qwest can charge CLEC for transit records.

4 7.6.3 If the non-transit provider requests records pursuant to ICA  
5 Sections 7.6.1 or 7.6.2, the Parties will charge the same rate for  
6 Category 11-01-XX records sent in an EMI mechanized format.  
7 ***These records are used to provide information necessary for each***  
8 ***Party to bill the Originating Carrier.*** The charge listed in Exhibit  
9 A of this Agreement is applicable to each transit record that meets  
10 the definition of a billable record. (Emphasis added)

11 Because ICA Section 7.6.3 appears to be limited to records necessary to bill the  
12 Originating Carrier and the records sought by Eschelon are records of Eschelon  
13 originated calls, Eschelon proposes to add a provision that explicitly states that  
14 there is no charge for sample records used to verify Qwest's bills to CLEC.  
15 Qwest does not bill Eschelon transit charges for calls originated by a third party.  
16 Qwest does bill Eschelon transit charges for calls originated by Eschelon and it is  
17 these records Eschelon seeks to review for bill validation purposes.

18 It should also be noted that Eschelon's language limits the request for these  
19 records to once every six months, provided Qwest's billing is accurate. ICA  
20 Section 7.6.4 of Eschelon's proposal simply provides detail regarding the  
21 information Eschelon seeks when it requests transit records for the purpose of bill  
22 validation.

---

<sup>93</sup> See ICA Section 21.8.4.3 of this Interconnection Agreement.

1 **Q. WHY CAN'T ESCHELON VERIFY THE INFORMATION ON QWEST'S**  
2 **TRANSIT BILLS?**

3 A. Qwest's transit bills provide information at the summary level. The bills tell you  
4 the number of minutes terminated to a particular office, but do not provide call  
5 detail information, such as the time and duration of each individual call. Because  
6 Eschelon originates these calls, Eschelon may be able to compare its own switch  
7 records with the bill summaries. However, in instances when Eschelon's data  
8 does not reconcile with Qwest's summary bills, Eschelon would require more  
9 detailed information to determine why differences exist.

10 **Q. DOES QWEST HAVE THE INFORMATION REQUESTED BY**  
11 **ESCHELON?**

12 A. Yes. Qwest must have call detail information available to it in order to generate  
13 the summary bills. Otherwise, how is Qwest able to bill Eschelon for these  
14 minutes? Eschelon is simply seeking information that it can use to validate the  
15 bills it receives from Qwest. Eschelon's proposal for Section 7.6.4 does not ask  
16 that the information be added to other records; it merely seeks to obtain  
17 information on a request basis when needed to validate bills.

18 **Q. PLEASE SUMMARIZE THIS ISSUE.**

19 A. In order to validate the bills that Qwest provides, Eschelon needs occasional  
20 access to a limited number of call records that would allow for bill verification.  
21 Eschelon's language allows for Eschelon to obtain these records from Qwest for  
22 the purpose of bill verification. Eschelon's language is reasonable and therefore

1 should be adopted.

2 **SUBJECT MATTER NO. 10. COLLOCATION AVAILABLE INVENTORY**

3 **Issue Nos. 8-20 and 8-20(a): ICA Sections 8.1.1.10.1.1.1 and 8.2.10.4.3**

4 **Q. ARE ISSUES 8-20 AND 8-20(A) CLOSED?**

5 A. Yes. The closed language for these issues is shown below:

6 8.1.1.10.1.1.1 Notwithstanding any other provision of this  
7 Agreement, if Qwest prepares a Quote Preparation Fee for a posted  
8 Collocation site and for any reason the posted Collocation site is  
9 returned to Qwest inventory, Qwest will post the Quote  
10 Preparation Fee quote (with the carrier's name redacted) on the  
11 inventory list for that site and, for future requests for that site, will  
12 waive the Quote Preparation Fee, as the quote has already been  
13 prepared, unless Qwest establishes a change in circumstance  
14 affecting the quoted price.  
15

16 8.2.10.4.3 CPMC will verify whether the requested site is still  
17 available for acquisition by conducting a feasibility study within  
18 ten (10) Days after receipt of the application. If the site is not  
19 available the CPMC will notify the CLEC in writing. If the site is  
20 available a site survey will be arranged with the CLEC and Qwest  
21 State Interconnect Manager (SICM). Upon completion of the  
22 survey Qwest will prepare a quote based on the site inventory and  
23 any requested modifications to the site. CLEC must pay in full one  
24 hundred percent (100%) of the quoted non-recurring charges to  
25 Qwest within thirty (30) Days of receipt of the quote. If Qwest  
26 does not receive the payment within such thirty (30) Day period,  
27 the quote will expire and the requested site will be returned to  
28 Qwest inventory. The CLEC will be charged a Special Site  
29 Assessment fee as specified in Section 8.1.15.2.1 of Exhibit A for  
30 work performed up to the point of expiration or non-acceptance of  
31 the quote. See Section 8.3.11.3.2. Each Party reserves its right to  
32 advocate for changes regarding the rates and application of the  
33 rates for the elements in this section in a Commission docket (e.g.,  
34 cost case). Upon receipt of the full payment for the quoted non-  
35 recurring charges, Qwest will begin the establishment of the site  
36 records and complete the job build-out. The interval shall be forty-

1 five (45) Days for completion of the site from receipt of payment.  
2 In the event that CLEC requires Qwest to install additional services  
3 to the existing site, the interval will revert to the intervals defined  
4 in the assuming CLEC's Interconnect Agreement.

5 **SUBJECT MATTER NO. 11. POWER – QPF<sup>94</sup>**

6 **Issue No. 8-22: ICA Sections 8.3.9.1.3 and 8.3.9.2.3**

7 **Q. HAS ISSUE 8-22 CLOSED SINCE ESCHELON'S PETITION FOR**  
8 **ARBITRATION WAS FILED?**

9 A. Yes. The closed language for Issue 8-22 in Oregon is as follows:

10 8.3.9.1.3 DC Power Reduction Without Reservation QPF: Includes the  
11 cost of performing a feasibility study and producing the quote for  
12 fulfilling the DC Power Reduction request. It covers the project, order  
13 and support management, engineering and planning associated with the  
14 administrative functions of processing the request.

15 8.3.9.2.3 DC Power Restoration Without Reservation QPF: Includes the  
16 cost of performing a feasibility study and producing the quote for  
17 fulfilling the DC Power Restoration Without Reservation request. It  
18 covers the project, order and support management, engineering and  
19 planning associated with the administrative functions of processing the  
20 request.

21 **SUBJECT MATTER NO. 17. CAPs – DATA RELATING TO CAPS**

22 **Issue Nos. 9-39: ICA Sections 9.1.13.4.1.2.2.1 and 9.1.13.4.1.2.2.2**

23 **Q. HAS THIS ISSUE CLOSED SINCE THE PETITION FOR ARBITRATION**  
24 **WAS FILED IN THIS CASE?**

25 A. Yes. This issue has closed, with respect to the caps provisions cited below,<sup>95</sup> with  
26 the following language:

---

<sup>94</sup> Other Power issues (Issues 8-21 and subparts) are being address in the testimony of Mr. Starkey. As shown in the Disputed Issues Matrix, p. 68 (dated 10/10/06), Issue No. 8-23 is closed.

1 9.1.13.4.1.2.2 For Caps:

2 9.1.13.4.1.2.2.1 With respect to disputes regarding the caps  
3 described in Sections 9.2 and 9.6.2.3, data that allows CLEC to  
4 identify all CLEC circuits relating to the applicable Route or  
5 Building [including if available circuit identification (ID),  
6 installation purchase order number (PON), Local Service Request  
7 identification (LSR ID), Customer Name/Service Name,  
8 installation date, and service address including location (LOC)  
9 information (except any of the above, if it requires a significant  
10 manual search), or such other information to which the Parties  
11 agree]. In the event of such a dispute, CLEC will also provide  
12 Qwest the data upon which it relies for its position that CLEC may  
13 access the UNE.

14 9.1.13.4.1.2.2.2 Notwithstanding anything in this Section 9.1.13.4  
15 that may be to the contrary, to the extent that Qwest challenges  
16 access to any UNE(s) on the basis that CLEC's access to or use of  
17 UNEs exceeds the caps described in Sections 9.2 or 9.6.2.3  
18 because CLEC has ordered more than ten UNE DS1 Loops or  
19 more than the applicable number of DS3 Loop circuits or UDIT  
20 circuits in excess of the applicable cap on a single LSR (or a set of  
21 LSRs submitted at the same time for the same address for which  
22 CLEC populates the related PON field to indicate the LSRs are  
23 related), Eschelon does not object to Qwest rejecting that single  
24 LSR (or the set of LSRs that meets the preceding description) on  
25 that basis. The means by which Qwest will implement rejection of  
26 such orders is addressed in Section 9.1.13. Except as provided in  
27 this Section 9.1.13.4.1.2.2.2, in all other situations when Qwest  
28 challenges access to any UNE(s) on the basis that CLEC's access  
29 to or use of UNEs exceeds the caps described in Sections 9.2 or  
30 9.6.2.3, Qwest must immediately process the request and  
31 subsequently proceed with the challenge as described in Section  
32 9.1.13.4.1.

33 **Q. HAS ESCHELON'S POSITION CHANGED REGARDING WHETHER**  
34 **QWEST SHOULD BE ABLE TO REJECT ESCHELON'S ORDERS?**

---

<sup>95</sup> Parties have agreed that portions of 9-39 dealing with the non-impaired wire center case are not being dealt with in this round of testimony.

1 A. No. Eschelon agreed to this language in order to close this proposal. The  
2 situation described in 9.1.13.4.1.2.2.2 is an isolated situation that is unlikely to  
3 occur for a small company such as Eschelon.<sup>96</sup>

4 **VI. WIRE CENTER ISSUES (ISSUE NOS. 9-37, 9-37(A), 9-37(B), 9-38, 9-39**  
5 **(EXCEPT CAPS), 9-40, 9-41 AND 9-42)**

6 **Q. WHAT IS ESCHELON'S BUSINESS NEED RELATED TO THE WIRE**  
7 **CENTER ISSUES (ISSUES 9-37, 9-37(A), 9-37(B), 9-38, 9-39, 9-40, 9-41,**  
8 **AND 9-42)?**

9 A. On March 20, 2007 the Oregon Commission issued Order No. 07-109 in docket  
10 UM 1251 regarding Request for Commission Approval of Non-Impairment Wire  
11 Center List.<sup>97</sup> This order addresses the proper means to calculate business line  
12 counts and fiber-based collocations when determining whether a Qwest wire  
13 center can be classified as non-impaired;<sup>98</sup> the procedures for evaluation and  
14 implementation of future wire center classifications; how Qwest should process  
15 orders submitted by CLECs for non-impaired UNEs in or between impacted wire  
16 centers; whether Qwest can impose a charge, and if so how much, for converting

---

<sup>96</sup> For additional discussion see my testimony on issue 9-38 -- Processing of High Capacity Loop and Transport Requests).

<sup>97</sup> This order ("Oregon Wire Center Order") is attached to my testimony as Eschelon/40.

<sup>98</sup> For convenience, I will use the term non-impaired wire center to reflect a wire center that is classified as Tier 1 or Tier 2 with respect to high capacity transport or classified as non-impaired for DS1 and/or DS3 Loops. Technically a wire center is not non-impaired with respect to transport, as transport is between two Qwest offices and transport non-impairment is determined by the status the wire centers on both ends of the transport route. For example, a DS1 or DS3 transport facility between a Tier 1 and Tier 3 office would not be considered non-impaired. In other words, CLECs would retain access to Unbundled DS1 and DS3 transport even though we refer to the Tier 1 as being on the Commission approved non-impairment list.

1 impacted UNEs to tariffed services.<sup>99</sup> The Commission’s decisions in this docket  
2 need to be put into practice through inclusion in the Interconnection Agreement.  
3 Eschelon has proposed language for these wire center issues that implements the  
4 Commission’s decision.<sup>100</sup> Specific contract language will help minimize future  
5 disputes, and inclusion in the ICA will allow other CLECs to opt in to those  
6 terms.

7 **Q. ARE THE WIRE CENTER ISSUES STAYED IN THIS ARBITRATION?**

8 A. No. Subsequent to the Commission’s order in Docket UM 1251 Eschelon  
9 updated its latest wire center ICA language so that it is consistent with the  
10 Commission’s order.<sup>101</sup> Qwest in its response petition argues, “For reasons of  
11 efficiency and to avoid inconsistent outcomes, the parties should not litigate these  
12 issues in this arbitration but, instead, should incorporate the results of the wire  
13 center proceeding into their interconnection agreement.”<sup>102</sup> Because this  
14 Commission has issued an order in the Wire Center Docket, however, there is no  
15 reason to delay implementation of the wire centers issues through contract  
16 language.

---

<sup>99</sup> See Oregon Wire Center Order, p. 4 (Eschelon/40, Denney/4).

<sup>100</sup> See, e.g., TRRO ¶233 (“We expect that incumbent LECs and competing carriers will implement the Commission’s findings as directed by section 252 of the Act . . . the incumbent LEC and competitive LEC must negotiate in good faith regarding any rates, terms, and conditions necessary to implement our rule changes.”).

<sup>101</sup> Eschelon provided updated ICA language to Qwest in January and again on April 20, 2007. Qwest has not updated its proposals to reflect the Oregon Commission’s Wire Center Order. Eschelon’s updated language is reflected in the discussion below.

<sup>102</sup> Qwest Response Petition, pp. 48-49.

1 As with any issue, if the companies are able to resolve the open contract language  
2 before the Oregon PUC rules on these issues in this arbitration, that agreed upon  
3 language may be incorporated into the ICA and these issues could, at that point,  
4 be closed in this arbitration. If, however, language issues remain, arbitration of  
5 those issues in this proceeding will be needed before the contract can be finalized  
6 for approval.<sup>103</sup>

7 **Q. PLEASE PROVIDE A BRIEF OVERVIEW OF THE “WIRE CENTER”**  
8 **ISSUES.**

9 A. There are eight wire center issues. I refer to these issues as wire center issues  
10 because they relate to the classification of wire centers for determining the  
11 availability of DS1 and DS3 UNE loop and dedicated transport UNEs and Dark  
12 Fiber UNEs. The FCC, in the TRRO, established criteria for determining  
13 impairment for DS1 and DS3 loop and dedicated transport UNEs and Dark Fiber  
14 based on the number of business lines and/or fiber based collocators in a  
15 particular wire center.<sup>104</sup> The Oregon PUC interpreted the FCC’s wire center  
16 related rules in UM 1251. The wire center issues in this arbitration relate to  
17 disagreements between the companies as to proper language in the ICA

---

<sup>103</sup> The Commission has approved a Qwest-Eschelon “Bridge Agreement Until New Interconnection Agreements Are Approved” which provides: “the Parties elect to address the changes of law as part of their new ICAs for each state . . . and not as an amendment to the existing ICAs between Qwest and CLEC for each such state.” See Eschelon/37 (“Bridge Agreement” executed Dec. 8, 2005); Some terms of the Bridge Agreement are also reflected in closed language in the proposed ICA (see, e.g., Section 9.1.14.3). See Disposition: Amendment Approved, *In the Matter Eschelon Telecom of Oregon, Inc., and Qwest Corporation, Twenty-third Amendment to the Interconnection Agreement, Submitted for commission Approval Pursuant to Section 252(e) of the Telecommunications Act of 1996.*, Docket No. ARB 199(23), Order No. 06-078 (Feb. 21, 2006).

<sup>104</sup> See, 47 CFR § 51.319(a)(4) – (5) and (e)(2)(ii) – (iv) and (e)(3). See also, TRRO, ¶¶ 146, 155, 166, 174, 178, 182 and 195.

1 incorporating the FCC’s and Oregon PUC’s rulings. The wire center issues are as  
2 follows:

- 3 • Issue 9-37: Wire Center List – Section 9.1.13.3 & Definition of  
4 “Commission Approved Wire Center List” and “Wire Center  
5 Docket.”
- 6 • Issue 9-37(a): Wire Center List – Additional Non-Impaired Wire  
7 Centers – Section 9.1.14.4 (portion) & 9.1.14.4.3 and subparts
- 8 • Issue 9-37(b): Wire Center List – Change in UNE Status – Section  
9 9.1.13.4.1.2
- 10 • Issue 9-38: Processing of High Capacity Loop and Transport  
11 request – Section 9.1.13.4 and 9.1.13.4.2
- 12 • Issue 9-39 (except caps): Wire Center List – Review of Wire  
13 Center List – Section 9.1.13.4.1.2.1 and 9.1.14.4.2
- 14 • Issue 9-40: NRCs for Conversion – Sections 9.1.13.5.2, 9.1.14.6,  
15 9.1.15.2.1
- 16 • Issues 9-41 (Length of Time Period) and 9-42 (Rate During Time  
17 Period) – Sections 9.1.14.4 (portion), 9.1.14.4.1 and 9.1.14.4.2.

18 Eschelon’s proposed language for these issues reflects the rulings of the Oregon  
19 PUC and the FCC, while Qwest’s proposals either conflict with these decisions or

1 ignore them. Each company’s proposed language for these issues is shown  
2 below. Language that is state specific to Oregon is shaded in gray.

3 **ISSUE 9-37**

4 **Q. WHAT LANGUAGE DOES ESCHELON PROPOSE FOR ISSUE 9-37?**

5 A. Eschelon proposes the following language for Issue 9-37. Issue 9-37 includes  
6 Eschelon’s proposed language for 9.1.13.3 as well as proposed definitions for  
7 “Commission Approved Wire Center List” and “Wire Center Docket” in Section  
8 4.

9 **Issue 9-37 – Section 9.1.13.3**

10  
11 9.1.13.3 Whether a High Capacity Loop or high capacity transport  
12 UNE is unavailable, and the date upon which it becomes  
13 unavailable, based on non-impairment wire center designations  
14 have been or will be determined by the Commission in a Wire  
15 Center Docket. The Parties will follow any procedures established  
16 by the Commission in the Wire Center Docket with respect to  
17 Confidential Information and requests for additions to the  
18 Commission-Approved Wire Center List. For non-impaired  
19 facilities identified using the initial Commission-Approved Wire  
20 Center List, CLEC will not order an unbundled DS1 or DS3 Loop  
21 or an unbundled DS1, DS3 or Dark Fiber transport circuit when the  
22 order would be restricted based on the Wire Center designations  
23 identified on the applicable Commission-Approved Wire Center  
24 List. Regarding ordering after any additions are made to the initial  
25 Commission-Approved Wire Center List, see Section 9.1.14.4.  
26 CLEC will transition such UNEs impacted by the Commission-  
27 Approved Wire Center List as described in Section 9.1.14.

28  
29 Section 4 Definitions

30  
31 “Commission-Approved Wire Center List” means a list approved  
32 by the Commission in a Wire Center Docket(s) that identifies DS1

1 and DS3 Unbundled Loop facilities that are non-impaired and,  
2 regarding DS1, DS3, and Dark Fiber unbundled transport facilities,  
3 identifies Wire Center Tier Designation(s).

4  
5 “Wire Center Docket” means Commission Docket No. UM 1251  
6 entitled “In the Matter of COVAD COMMUNICATIONS COM-  
7 PANY; ESCHELON TELECOM OF OREGON, INC.; INTEGRA  
8 TELECOM OF OREGON, INC.; MCLEODUSA  
9 TELECOMMUNICATIONS SERVICES, INC.; and XO  
10 COMMUNICATIONS SERVICES, INC. Request for  
11 Commission Approval of Non-Impairment Wire Center List,” and  
12 any successor or separate Commission docket in which Qwest files  
13 a request(s) to add additional non-impaired wire center(s) to the  
14 Commission-Approved Wire Center List, and the Commission  
15 approves addition of wire center(s) to the list.

16  
17 Eschelon’s language in Section 9.1.13.3 for Issue 9-37 states that the  
18 Commission’s – not Qwest’s – non-impairment designations will determine  
19 whether high capacity transport UNE or high capacity loop UNE are available  
20 and, if applicable, the date on which it becomes available due to non-impairment.  
21 This language also directs the companies to use the Commission-approved  
22 processes (in the “Wire Center Docket”) related to confidential information and  
23 requests for additions to the “Commission-Approved Wire Center List.”  
24 Timeframes established in the Wire Center Docket for objecting to a future Qwest  
25 request to add another wire center to the Commission-approved list would be an  
26 example of the procedures referenced in Section 9.1.13.3. This language also  
27 states that CLEC will not order a UNE that is restricted by the wire center  
28 designations on the Commission approved Wire Center list, and points to Sections  
29 9.1.14 for language on ordering after any additions are made to the Commission  
30 Approved Wire Center list and transitioning UNEs impacted by the Commission

1 Approved Wire Center List. Eschelon’s proposed definitions of the terms  
2 Commission-Approved Wire Center List and Wire Center Docket also contained  
3 Issue 9-37, which provide definitions for terms used in Section 9.1.13.3.

4 **Q. WHAT LANGUAGE DOES QWEST PROPOSE FOR ISSUES 9-37?**

5 A. Qwest proposes the following language for Issue 9-37:

6 9.1.13.3 As part of the reasonably diligent inquiry described in  
7 Section 9.1.13, CLEC shall ensure that a requested unbundled DS1  
8 or DS3 Loop is not in a Wire Center identified on the list provided  
9 by Qwest of Wire Centers that meet the applicable non-impairment  
10 thresholds specified in Sections 9.2.1.3, 9.2.1.3.2, 9.2.1.4 and  
11 9.2.1.4.2 that a requested unbundled DS1, DS3 or Dark Fiber  
12 transport circuit is not between Wire Centers identified on the list  
13 of Wire Centers that meet the applicable non-impairment threshold  
14 specified in Section 9.6.2.2.1, 9.6.2.2.2, 9.6.2.3.1, 9.6.2.3.2, and  
15 9.7.1.1.1.1.

16 Qwest’s proposed language for Section 9.1.13.3 would require that Eschelon use  
17 Qwest’s – not the Commission’s – wire center list when performing a “reasonably  
18 diligent inquiry” related to high capacity UNEs. This is inappropriate, as Qwest  
19 should not be allowed to establish the list of non-impaired wire centers. Rather,  
20 that determination should be made by the Commission based on a Commission  
21 Approved Wire Center List established in the Wire Center Docket – as those  
22 terms should be defined in Section 4. That is why Eschelon’s proposed language  
23 for this issue focuses on the Commission Approved Wire Center List – not  
24 Qwest’s list – as impacting whether and when a CLEC may order a high capacity  
25 loop or transport UNE.

1 **Q. WHY SHOULD THE COMMISSION ADOPT ESCHELON’S PROPOSAL**  
2 **FOR ISSUE 9-37?**

3 A. Eschelon’s proposed language reflects the OR PUC ruling on these issues in the  
4 Wire Center docket (UM 1251). For example, Eschelon’s proposal reflects the  
5 Oregon PUC’s notion that the Commission – not Qwest – should establish the list  
6 of non-impaired wire centers. The Oregon PUC’s Wire Center Docket Order  
7 (Order No. 07-109, UM 1251) discusses its expectations that Qwest will come to  
8 the Commission to seek Commission approval for adding wire centers to the  
9 Commission Approved Wire Center list. At page 13 of the Commission’s Order  
10 No. 07-109, the Commission states: “we shall require Qwest to include detailed  
11 wire center-specific information in its initial filing for Commission approval of a  
12 new wire center classification...”<sup>105</sup> The Commission also required “that the  
13 initial filing seeking non-impaired status for a wire center contain more granular  
14 detail than Qwest has proposed.”<sup>106</sup> Further, the Commission notes that the wire  
15 center proceedings arose “out of Qwest’s submission of its list of non-impaired  
16 wire centers in Oregon and the objections to that list...”<sup>107</sup> These statements  
17 show that the Commission fully expects to be deciding whether Qwest requests  
18 for future additions to the Commission Approved Wire Center list, if any, are  
19 appropriate, and does not expect Qwest to be making these determinations on its

---

<sup>105</sup> Eschelon/40, Denney/13.

<sup>106</sup> Eschelon/40, Denney/14.

<sup>107</sup> Eschelon/40, Denney 2.

1 own. Further, Qwest did not disagree with this approach in the wire center  
2 docket.

3 In addition, Eschelon's proposed defined terms in Section 4 should also be  
4 adopted so that the ICA will be clear on what important terms used in Section  
5 9.1.13.3 (and elsewhere, e.g., Section 9.1.14.4) mean.

6 **ISSUE 9-37(A)**

7 **Q. WHAT LANGUAGE DOES ESCHELON PROPOSE FOR ISSUE 9-37(A)?**

8 A. Eschelon's proposal for Issue 9-37(a) includes language from Sections 9.1.14.4  
9 (additional non-impaired wire centers) and 9.1.14.4.3 and subparts  
10 (methodology).

11 9.1.14.4 Additional Non-Impaired Wire Centers. When Qwest  
12 files a request(s) with the Commission to add additional Wire  
13 Center(s) to the Commission-Approved Wire Center List, Qwest  
14 will follow the procedures for making such requests adopted by the  
15 Commission in the Wire Center Docket. When additional Qwest  
16 Wire Center(s) meet the relevant factual criteria discussed in  
17 Sections V and VI of the FCC's Triennial Review Remand Order  
18 as reflected in this Agreement and ~~Qwest~~ the Commission adds the  
19 Wire Center(s) to the Commission-Approved Wire Center ~~List,~~  
20 the terms of this Section will apply to facilities subject to the  
21 transition based on any addition(s) to the Commission-Approved  
22 Wire Center List. ~~Qwest shall provide notice to CLEC.~~ Thirty (30)  
23 Days after ~~notification from Qwest~~ Commission-approval of  
24 additions to that list, CLEC will no longer order impacted High  
25 Capacity Loops, high capacity transport UNEs, or Dark Fiber Loop  
26 and Dark Fiber Dedicated Transport UNEs in (for loops) or  
27 between (for transport) those additional Wire Centers.

28

1                   9.1.14.4.3 Methodology: The Parties agree to use the following  
2                   methodology for non-impairment or tier designations:

3  
4                   9.1.14.4.3.1 Business lines – Business lines shall be  
5                   counted as follows, excluding unused capacity:

6  
7                   9.1.14.4.3.1.1 Qwest retail business lines shall be  
8                   determined using the most recently filed unadjusted  
9                   ARMIS data reported to the FCC. For purposes of  
10                  future non-impairment designations, Qwest shall  
11                  follow FCC ARMIS instructions and will record  
12                  and count retail business lines in precisely the same  
13                  manner as business access line data is tracked and  
14                  recorded in the Wire Center level data Qwest uses  
15                  to develop its statewide ARMIS 43-08 reports filed  
16                  annually with the FCC, without making any inter-  
17                  Wire Center adjustments to this data and without  
18                  including the same lines in more than one of the  
19                  categories listed in Sections 9.1.14.4.3.1.2 –  
20                  9.1.14.4.3.1.4.

21  
22                  9.1.14.4.3.1.2 UNE Loops connected to a Wire  
23                  Center where High Capacity Loops and high  
24                  capacity EELs are provided to CLECs shall be  
25                  counted at the capacity used to serve customers  
26                  (i.e., DS1s will not be counted as 24 business lines  
27                  and DS3s will not be counted as 672 business lines  
28                  if a fewer number of lines are being used to serve  
29                  customers).

30  
31                  9.1.14.4.3.1.3 Only Business UNE-P lines will be  
32                  counted for the Commission-Approved Wire Center  
33                  List. Business UNE-P lines shall be derived by  
34                  subtracting the count of listings associated with  
35                  residential UNE-P from the total number of UNE-P  
36                  lines.

37  
38                  9.1.14.4.3.1.4 Qwest Platform Plus (“QPP”), Qwest  
39                  Local Services Platform (“QLSP”), and other  
40                  similar platform product offerings shall be  
41                  calculated using actual business line counts for  
42                  these services.

43  
44                  9.1.14.4.3.2 Collocation –

1  
2 9.1.14.4.3.2.1 The terms Fiber-Based Collocator  
3 and Collocation shall have the meanings set forth in  
4 Section 4 of this Agreement.  
5

6 9.1.14.4.3.2.2 Before classifying a carrier as a  
7 Fiber-Based Collocator in a Qwest request pursuant  
8 to Section 9.1.14.4 for Commission approval of a  
9 non-impaired designation, Qwest will:  
10

11 9.1.14.4.3.2.2.1 Confirm that the carrier  
12 meets the criteria contained in the definition  
13 of Fiber-Based Collocator in Section 4.0 of  
14 this Agreement;  
15

16 9.1.14.4.3.2.2.2 Conduct a field visit to  
17 verify and document the above criteria in  
18 Section 9.1.14.4.3.2.2.1; and  
19

20 9.1.14.4.3.2.2.3 Validate the criteria against  
21 the most recent order and/or billing data.

22 Eschelon’s proposed language from Sections 9.1.14.4 (additional non-impaired  
23 wire centers) states that Qwest will follow the procedures adopted by the  
24 Commission in the Wire Center Docket for adding wire centers to the  
25 Commission Approved Wire Center list,<sup>108</sup> and like Issue 9-37, recognizes that  
26 the Commission will approve the non-impaired wire center list – it will not be  
27 dictated by Qwest. This language further recognizes that upon Commission  
28 approval of additions to the wire center list, Eschelon will require a reasonable  
29 period of time, 30 days, to properly train and inform its employees to stop  
30 ordering impacted UNEs in those wire centers.

---

<sup>108</sup> See Wire Center Order, Eschelon/40, Denney/11 – Denney/14 regarding the Commission’s decision on advanced notice.

1 Eschelon's proposed language under 9.1.14.4.3 relates to the methodology to be  
2 followed in determining the critical criteria for non-impairment or tier  
3 designations (i.e., business line counts and fiber based collocator counts).<sup>109</sup>  
4 Eschelon's language requires that Business Lines be counted excluding unused  
5 capacity, excluding residential UNE-P lines, and requires that the most recent  
6 ARMIS data be used.<sup>110</sup> Eschelon's proposed language also requires Qwest to  
7 verify and validate that the fiber based collocators it counts meet the applicable  
8 criteria.

9 **Q. WHAT LANGUAGE DOES QWEST PROPOSE FOR ISSUE 9-37(A)?**

10 A. Qwest has no proposed language for 9.1.14.4.3 and subparts regarding the  
11 methodology for counting switched business lines and fiber-based collocators.  
12 Qwest's proposal for 9.1.14.4 is as follows:

13 9.1.14.4 Additional Non-Impaired Wire Centers. ~~When Qwest~~  
14 ~~files a request(s) with the Commission to add additional Wire~~  
15 ~~Center(s) to the Commission Approved Wire Center List, Qwest~~  
16 ~~will follow the procedures for making such requests adopted by the~~  
17 ~~Commission in the Wire Center Docket.~~ When additional Qwest  
18 Wire Center(s) meet the relevant factual criteria discussed in  
19 Sections V and VI of the FCC's Triennial Review Remand Order  
20 as reflected in this Agreement and Qwest ~~the Commission~~ adds the  
21 Wire Center(s) to the ~~Commission Approved Wire Center List,~~  
22 ~~the terms of this Section will apply to facilities subject to the~~  
23 ~~transition based on any addition(s) to the Commission Approved~~  
24 ~~Wire Center List. Qwest shall provide notice to CLEC. Thirty (30)~~  
25 ~~Days after notification from Qwest Commission approval of~~  
26 ~~additions to that list, CLEC will no longer order impacted High~~

---

<sup>109</sup> See Wire Center Order, Eschelon/40, Denney/8 – Denney/11 regarding the methodology for counting switched business lines and fiber-based collocations.

<sup>110</sup> See wire Center Order, Eschelon/40, Denney/9.

1 Capacity Loops, high capacity transport UNEs, or Dark Fiber Loop  
2 and Dark Fiber Dedicated Transport UNEs in (for loops) or  
3 between (for transport) those additional Wire Centers.

4 **Q. WHY SHOULD THE COMMISSION ADOPT ESCHELON'S LANGUAGE**  
5 **FOR ISSUE 9-37(A)?**

6 A. Eschelon's language reflects the Commission's decision on wire center issues. As  
7 discussed above under Issue 9-37, a Qwest request to add wire centers to the  
8 Commission Approved Wire Center List should be reviewed and approved by the  
9 Commission before the Commission Approved Wire Center List should be  
10 amended. Eschelon's language in 9.1.14.4 makes this clear. Qwest's language,  
11 on the other hand, would allow Qwest to add to the list and send notice to CLECs,  
12 which would supplant the Commission's judgment with Qwest's.

13 Qwest apparently desires to omit the terms surrounding 9.1.14.4.3 from the ICA  
14 and leave open the potential of Qwest unilaterally interpreting the Wire Center  
15 Docket order in the future. Including language in the ICA now will facilitate  
16 understanding of that ruling and allow resolution of any disputes in an orderly  
17 manner and not under time pressures that may arise when future requests for  
18 additions to the wire center list are pending. Also, individuals using the ICA,  
19 including personnel at any CLECs opting in to the ICA, may not have been  
20 involved in the Wire Center Docket to date and will look to the ICA for  
21 implementation of these provisions. Adding clear language to the contract today  
22 will avoid future disputes and facilitate the process of adding wire centers to the  
23 Commission approved non-impaired wire center list.

1 **ISSUE 9-37(B)**

2 **Q. WHAT LANGUAGE DOES ESCHELON PROPOSE FOR ISSUE 9-37(B)?**

3 A. Eschelon's language for Issue 9-37(b) states as follows:

4 9.1.13.4.1.2 If Qwest seeks to challenge any such UNEs, it will  
5 also provide CLEC with data to support its claim.

6 Eschelon's language for 9-37(b) simply states that when Qwest challenges  
7 Eschelon's access to a UNE in dispute resolution, that Qwest will provide  
8 Eschelon with the data to support its claim.

9 **Q. DOES QWEST HAVE A LANGUAGE PROPOSAL FOR ISSUE 9-37(b)?**

10 A. No. Qwest proposes to leave this section intentionally blank.

11 **Q. WHY SHOULD THE COMMISSION ADOPT ESCHELON'S LANGUAGE**  
12 **FOR ISSUE 9-37(B)?**

13 A. Closed language in 9.1.13.4.1 and 9.1.13.4.1.1 describe the steps Qwest must take  
14 if it seeks to challenge access to UNEs. This language is repeated below:

15 9.1.13.4.1 To the extent that Qwest seeks to challenge access to any  
16 such UNE(s), it subsequently can raise that issue through the Dispute  
17 resolution procedures in Section 5.18 of this Agreement. Regarding  
18 Service Eligibility Criteria for High Capacity EELs, see Sections  
19 9.23.4.2.1.3 and 9.23.4.3.

20  
21 9.1.13.4.1.1 If Qwest seeks to challenge any such UNEs, it will  
22 provide written notice to CLEC of its request for Dispute  
23 resolution.

1 Eschelon’s proposed language in 9.1.13.4.1.2 simply states that if Qwest disputes  
2 Eschelon’s access to high capacity loop, high capacity transport or dark fiber  
3 UNEs then Qwest will provide Eschelon with information in support of its claim.  
4 In the case of a wire center that the Commission has determined is non-impaired  
5 the data may be as simple as pointing to the Commission approved non-impaired  
6 wire center list.<sup>111</sup> In the case of Caps the data may be more complex as outlined  
7 in closed language in 9.1.13.4.1.2.2 and subparts discussed previously as Subject  
8 Matter No. 17, Caps – Data Relating to Caps. If the dispute is not resolved,  
9 Qwest will need to compile information in any event to present its case, so there is  
10 no additional burden. Providing information early will facilitate dispute  
11 resolution.

12 Eschelon’s proposed language is consistent with the Commission’s order in the  
13 Wire Center Docket and will facilitate the resolution of any disputes. In the Wire  
14 Center Docket the Commission concluded:

15 “The Joint CLEC proposal seeks the development of a process  
16 wherein a CLEC request for a UNE in a non-impaired wire center,  
17 either made in error or in dispute, is dealt with by Qwest and the  
18 CLEC in such a way so that facilities are provided in a timely  
19 manner. This process should also ensure that the services are  
20 ultimately charged at the proper rate – UNE or tariffed service –  
21 and the CLEC back-billed for the difference, if the CLEC has  
22 erroneously placed a UNE order that Qwest was not required to  
23 provide. We find such an approach, which provides facilities to  
24 CLECs on a timely basis and keeps Qwest financially whole, to be  
25 a reasonable one and fully consistent with the *TRRO*. We therefore

---

<sup>111</sup> Eschelon has language in section 9.1.13.3 (issue 9-37) indicating that Eschelon will not order UNE facilities that would be considered non-impaired as a result of a Commission approved wire center list.

1 direct Qwest and Joint CLECs to develop such procedures  
2 reasonably consistent with the intentions we have set forth  
3 here.”<sup>112</sup>

4 Eschelon’s proposal for this issue is consistent with this Commission. Eschelon’s  
5 proposed language for issue 9-38 further addresses this paragraph of the  
6 Commission’s order. Note that closed language in section 9.1.13.5 of the ICA  
7 address the Commission’s concerns about keeping Qwest financially whole in  
8 instances where the CLEC orders a non-impaired facility in error. The closed  
9 language of 9.1.13.5 reads:

10 If the Parties agree or it is determined through Dispute resolution  
11 that CLEC was not entitled to unbundled access to a particular  
12 UNE that is not subject to one of the transition periods described in  
13 Section 9.1.14, or the transition period has ended, CLEC will place  
14 an order within thirty (30) Days to either disconnect the UNE or  
15 convert such UNE to an alternative service arrangement. Back  
16 billing for the difference between the rates for UNEs and rates for  
17 the Qwest alternative service arrangements will apply no earlier  
18 than the later of: (1) the installation date; or (2) the effective date  
19 of the TRO or TRRO, whichever is applicable.

20 **ISSUE 9-38**

21 **Q. WHAT LANGUAGE DOES ESCHELON PROPOSE FOR ISSUE 9-38?**

22 A. Eschelon has two alternative proposals for Issue 9-38. Eschelon’s first proposal is  
23 in section 9.1.13.4 and is as follows:

24 **Eschelon 1<sup>st</sup> Proposal for Issue 9-38**

25 9.1.13.4 Upon receiving a request for access to a High Capacity  
26 Loop or high capacity transport UNE pursuant to Section 9.1.13, Qwest

---

<sup>112</sup> Oregon Wire Center Order, Eschelon/40, Denney/17.

1 must immediately process the request. Qwest shall not prevent order  
2 submission and/or order processing (such as via a system edit, or by  
3 requiring affirmation of the information in the self-certification letter  
4 through remarks in the service request, or through other means) for any  
5 such facility on non-impairment grounds, unless the Parties agree  
6 otherwise in an amendment to this Agreement.

7 Eschelon's second proposal is similar to its first proposal except that it describes  
8 an acceptable process, consistent with the Commission's finding on page 17 of  
9 the Oregon Wire Center Order, whereby Qwest could reject CLEC orders for high  
10 capacity loop or high capacity transport UNEs when the facilities are identified as  
11 non-impaired via a Commission-approved wire center list if Qwest found doing  
12 so more efficient than processing the orders and then disputing them.

13 **Eschelon Alternative Proposal for Issue 9-38**

14 9.1.13.4 Except as described in Section 9.1.13.4.2, upon receiving a  
15 request for access to a High Capacity Loop or high capacity  
16 transport UNE pursuant to Section 9.1.13, Qwest must  
17 immediately process the request. Other than as described in  
18 Section 9.1.13.4.2, Qwest shall not prevent order submission  
19 and/or order processing (such as via a system edit, or by requiring  
20 affirmation of the self-certification letter information through  
21 remarks in the service request, or through other means) for any  
22 such facility on non-impairment grounds.

23 9.1.13.4.2 Order Rejection of CLEC UNE Service  
24 Requests for Facilities that are Identified as Non-Impaired  
25 via a Commission-Approved Wire Center List. This  
26 Section applies to CLEC UNE orders for High Capacity  
27 Loop facilities that are identified as non-impaired on a  
28 Commission-Approved Wire Center List and CLEC UNE  
29 orders for high capacity transport UNEs when the orders  
30 for high capacity transport UNEs would be restricted based  
31 on Wire Center Tier Designation(s) identified on the  
32 applicable Commission-Approved Wire Center List. Qwest

1 will not reject CLEC UNE service requests on the grounds that  
2 the such requested facilities are non-impaired facilities  
3 except as follows:

4  
5 9.1.13.4.2.1 Qwest electronic system(s) will check CLEC  
6 service requests based on CLEC ID, state, Wire Center, and  
7 Wire Center Tier Designation(s) on the applicable  
8 Commission-Approved Wire Center List. This system  
9 check will be an electronic process and will only impact  
10 service requests for High Capacity Loop facilities and high  
11 capacity transport UNEs that are non-impaired based on the  
12 applicable Commission-Approved Wire Center List. This  
13 determination will not impact the flow through eligibility of  
14 any other CLEC service requests, including service  
15 requests for impaired high capacity UNE facilities (UNE  
16 facilities that are not identified as non-impaired based on  
17 the applicable Commission-Approved Wire Center List).

18  
19 9.1.13.4.2.2 Qwest will electronically place requests for  
20 high capacity UNEs that are identified as non-impaired via  
21 a Commission-Approved Wire Center List into a non-  
22 impairment queue.

23  
24 9.1.13.4.2.3 For CLEC service requests placed in the non-  
25 impairment queue, Qwest Service Delivery Coordinator(s)  
26 will send a fatal rejection notice to CLEC. Qwest will  
27 electronically provide a specific reject/error code for service  
28 requests for Non-Impaired Facilities and it will not be in the  
29 form of a manual remark (except for requests for Dark  
30 Fiber, which are addressed below in Section  
31 9.1.13.4.2.3.1). Qwest must provide the fatal rejection  
32 notice to CLEC within four (4) business hours after  
33 CLEC's service request was submitted to Qwest. If Qwest  
34 rejects a service request in error based on the applicable  
35 Commission-Approved Wire Center List and CLEC objects  
36 on the same business day (or, if the fatal rejection notice is  
37 received after 3:00 pm local time, objects before noon local  
38 time on the next business day) Qwest will process the  
39 service request with the due date requested by CLEC on the  
40 service request.<sup>113</sup>

---

<sup>113</sup> This paragraph of Eschelon's proposal has been updated. The previous version included a reference to a specific reject/error code for service requests for Non-Impaired Facilities being "fully implemented as described in the Wire Center Docket." As such a code and implementation are not described in the Commission's order, the language needed to be updated to reflect that order. A

1  
2  
3 9.1.13.4.2.3.1 For CLEC service requests for Dark  
4 Fiber in the Non-Impairment Queue, the Qwest  
5 Service Delivery coordinator will send a fatal  
6 rejection notice to the CLEC. The rejection notice  
7 shall include a remark that the service request has  
8 been rejected “based on non-impairment.” Qwest  
9 must provide the rejection notice to the affected  
10 CLEC within four (4) business hours after the  
11 CLEC service request was submitted to Qwest. If  
12 Qwest’s fatal rejection notice was in error based on  
13 the applicable Commission-Approved Wire Center  
14 List and CLEC objects on the same business day the  
15 notice was received (or, if the fatal rejection notice  
16 is received by CLEC after 3:00pm local time,  
17 CLEC objects before noon local time the next  
18 business day), Qwest will process the service  
19 request with the due date requested by CLEC on the  
20 initial service request.

21 Eschelon’s first proposal in Section 9.1.13.4 under Issue 9-38 states that Qwest  
22 must immediately process a request for access to high capacity Loop or high  
23 capacity transport. Eschelon’s alternative proposal also states that Qwest must  
24 immediately process a request for access to high capacity Loop or high capacity  
25 transport but provides an exception described in 9.1.13.4.2.

26 Eschelon’s language for Section 9.1.13.4.2, as part of Eschelon’s alternative  
27 proposal, spells out the process that Qwest should follow if the CLEC submits a  
28 request for a high capacity UNE when that UNE would be restricted based on the  
29 wire center designations on the Commission Approved Wire Center List, which

---

specific reject/error code is needed before Qwest could reject orders, or there would be no mechanized way of identifying and tracking order rejections for this reason, which would inappropriately shift the burden to Eschelon. Eschelon is offering an exception for Dark Fiber as a compromise.

1 includes an electronic systems check impacting only high capacity UNEs that are  
2 non impaired based on the Commission Approved Wire Center List, a queue for  
3 these orders, and fatal rejection notices to be sent to the CLEC.

4 **Q. WHAT LANGUAGE DOES QWEST PROPOSE FOR ISSUE 9-38?**

5 A. Qwest proposes the following language for Issue 9-38:

6 9.1.13.4 Upon receiving a request for access to a high capacity  
7 Dedicated Transport or High Capacity Loop UNE or High  
8 Capacity EEL that indicates that the UNE meets the relevant  
9 factual criteria discussed in sections V and VI of the Triennial  
10 Review Remand Order, Qwest must immediately process the  
11 request.

12 Qwest’s proposed language states that Qwest will immediately process the request  
13 for a high capacity UNE *if* the request indicates that the UNE meets the relevant  
14 criteria in the TRRO related to impairment.

15 **Q. WHY SHOULD THE COMMISSION ADOPT ESCHELON’S LANGUAGE**  
16 **FOR ISSUE 9-38?**

17 A. Agreed upon language in 9.1.13 describes the requirements for ordering high  
18 capacity loops and high capacity transport. Eschelon’s language for Section  
19 9.1.13.4 follows paragraph 234 of the *TRRO* and states that upon receiving a  
20 request for high capacity loop or transport under Section 9.1.13, Qwest will  
21 “immediately process the request.” While it may seem obvious that “immediate”  
22 processing of a request requires processing the order and not rejecting it, Qwest  
23 initiated a Change Request through the CMP to implement a systems change to

1 block CLEC orders, even when CLECs have self certified, if Qwest unilaterally  
2 determines that the wire center is non-impaired (Qwest CR #SCR083005-01).  
3 Also, Qwest should not be allowed to delay or forego processing the request by  
4 requiring the CLEC to affirm information the CLEC has already provided in the  
5 self certification letter. Therefore, Eschelon’s proposal is necessary to make clear  
6 that Qwest must truly process the request “immediately” as required by paragraph  
7 234 of the TRRO, and may not implement system edits or other blocks to reject  
8 the CLEC orders, or otherwise delay or prevent processing, as Qwest has  
9 attempted to do in the past.

10 Additionally, Eschelon’s alternative proposed language for Section 9.1.13.4.2  
11 follows the intent of the Commission’s order to develop a process to address a  
12 CLEC request for a UNE in a non-impaired wire center (made in error or is  
13 disputed) so that facilities are provided in a timely manner and Qwest is kept  
14 financially whole related to the rate it charges the CLEC for the facility.<sup>114</sup>

15 **ISSUE 9-39**

16 **Q. IS PART OF ISSUE 9-39 CLOSED?**

17 A. Yes. The portion of Issue 9-39 relating to caps closed and was discussed  
18 previously as Subject Matter 17, but the remainder of Issue 9-39 (Wire Center  
19 List – Review of Wire Center List) remains open for resolution in this arbitration.

---

<sup>114</sup> Oregon Wire Center Order, Eschelon/40, Denney/17.

1 **Q. WHAT LANGUAGE DOES ESCHELON PROPOSE FOR ISSUE 9-39?**

2 A. Eschelon proposes the following language for Issue 9-39 under Sections  
3 9.1.13.4.1.2.1 and 9.1.14.4.2:

4 9.1.13.4.1.2.1 Regarding data related to additions to the initial  
5 Commission-Approved Wire Center List, see Section 9.1.14.4.2.

6 9.1.14.4.2 Data. Qwest will file supporting data with the  
7 Commission when filing a request to obtain additional non-  
8 impaired designations added to the Commission-Approved  
9 Wire Center List. Qwest will also provide a copy of the  
10 supporting data pursuant to the terms of the applicable  
11 protective agreement/order to CLEC if CLEC has signed  
12 the applicable protective agreement/order (or is subject to  
13 any applicable standing protective order put in place by the  
14 Commission).

15  
16 9.1.14.4.2.1 If Qwest relies upon Fiber-Based  
17 Collocators for its proposed non-impairment  
18 designation, the supporting data provided to CLEC  
19 will include at least the following information:

20  
21 9.1.14.4.2.1.1 The name of each Fiber-  
22 Based collocator.

23  
24 9.1.14.4.2.1.2 The applicable Qwest Ready  
25 for Service date.

26  
27 9.1.14.4.2.1.3 The results of any field  
28 verification that Qwest undertook to verify  
29 the fiber-based collocation, including the  
30 field technicians' notes which includes: (1)  
31 the wire center and state; (2) collocator  
32 name; (3) collocation type; (4) fiber type;  
33 (5) validation of fiber termination at the  
34 fiber-based collocation; (6) validation that  
35 fiber exits a Wire Center; (7) visual power  
36 verification (confirming that working power  
37 is being provided to the collocation cage);  
38 (8) power verification at BDFB, if possible;  
39 (9) additional comments from field

1 personnel.

2  
3 9.1.14.4.2.1.4 A copy of the letter sent by  
4 Qwest to collocator(s) requesting validation  
5 of status as a fiber-based collocator and  
6 ownership/responsibility.

7  
8 9.1.14.4.2.1.5 Copies of any responses to  
9 the letter noted in Section 9.1.14.4.2.1.4,  
10 including an indication of whether the  
11 collocator has affirmatively identified (or  
12 disputed) itself as a Fiber-Based Collocator;  
13 and

14  
15 9.1.14.4.2.1.6 All written correspondence  
16 between Qwest and the collocator(s)  
17 regarding the validation of the Fiber-Based  
18 Collocation.

19  
20 9.1.14.4.2.2 If Qwest relies upon Switched Business  
21 Line Count data for its proposed Non-Impairment  
22 Designation, the supporting data provided to CLEC  
23 will include at least the following information:

24  
25 9.1.14.4.2.2.1 The latest available ARMIS  
26 43-08 line counts, using the methodology  
27 described in Section 2.0.F.4 of this  
28 Agreement and used to create official  
29 ARMIS data on file with the FCC.

30  
31 9.1.14.4.2.2.2 Total wholesale UNE loops  
32 shown at the aggregated level for the wire  
33 center(s) at issue, and by capacity (voice  
34 grade, DS1, DS3). This information will  
35 also be provided on a disaggregated basis  
36 for all CLECs with the CLEC names  
37 masked. A CLEC will be provided the  
38 necessary identifying information in order to  
39 verify CLEC's own line count data. Qwest  
40 calculations to derive 64-kbps equivalents  
41 for high capacity (e.g., DS1 and DS3) loops  
42 will also be provided.

43  
44 9.1.14.4.2.2.3 CLEC line counts based upon  
45 OPP or Qwest Local Services Platform (or

1                                    similar platform product) will be provided  
2                                    on a disaggregated basis for all CLECs with  
3                                    CLEC names masked. A CLEC will be  
4                                    provided the necessary identifying  
5                                    information in order to verify CLEC's own  
6                                    line count data.

7                    Closed language in Section 9.1.13.4.1 allows Qwest to challenge access to these  
8                    UNEs in Dispute Resolution under Section 5.18 of the Agreement. Eschelon's  
9                    proposed language for 9.1.13.4.1.2 (discussed under Issue 9-37(b)) states that  
10                   when Qwest challenges access to these UNEs, Qwest will provide CLEC with the  
11                   data support Qwest's claim. Section 9.1.13.4.1.2.1 (discussed as part of this Issue  
12                   9-39) is a subsection of 9.1.13.4.1.2 (discussed under this issue 9-37(b)) that was  
13                   added to make clear that data regarding Qwest's requested additions to the  
14                   Commission Approved Wire Center List are addressed under 9.1.14.4.2, while  
15                   data related to Qwest's challenge of Eschelon's access to UNEs in dispute  
16                   resolution is addressed under Section 9.1.13.4.1.2. Eschelon's language in  
17                   9.1.13.4.1.2.1 includes a cross reference to Section 9.1.14.4.2 dealing with data  
18                   related to additions to the initial Commission Approved Wire Center List.

19                   Eschelon's language for Section 9.1.14.4.2 relates to the cross reference  
20                   mentioned above regarding the data Qwest must provide when requesting to add  
21                   non-impaired wire centers to the Commission Approved Wire Center List. This  
22                   language provides that Qwest will provide at the time of the request data  
23                   supporting the request to the Commission and CLEC (to the extent CLEC has  
24                   signed the applicable protective agreement). This data includes, for fiber based

1 collocators, names of fiber based collocators, Ready for Service date, results of  
2 any field verification, and correspondence related to Qwest’s verification of those  
3 fiber based collocators. For business lines, this supporting data includes the most  
4 recent available ARMIS 43-08 line counts, UNE loop counts by CLEC (with  
5 CLEC names masked) with information allowing a CLEC to verify CLEC’s own  
6 line count data, and QPP or Qwest Local Services Platform line counts by CLEC  
7 (with CLEC names masked) with information allowing a CLEC to verify CLEC’s  
8 own line count data.

9 **Q. WHAT IS QWEST’S PROPOSAL FOR ISSUE 9-39?**

10 A. Qwest opposes all of Eschelon’s proposed language for Issue 9-39.

11 **Q. WHY SHOULD ESCHELON’S PROPOSED LANGUAGE FOR ISSUE 9-39**  
12 **BE ADOPTED?**

13 A. Eschelon’s proposal reflects the Oregon PUC’s findings in UM 1251. The  
14 requirement under 9.1.14.4. for Qwest to file supporting data with the  
15 Commission when filing a request for additions to the Commission Approved  
16 Wire Center List reflects the Oregon PUC’s finding that “we shall require Qwest  
17 to include detailed wire center-specific information in its initial filing for  
18 Commission approval of a new wire center classification equivalent in scope and  
19 particularly to that which was provided in this proceeding pursuant to CLEC data  
20 requests.”<sup>115</sup> The Commission noted in its order that “it is in Qwest’s own

---

<sup>115</sup> Eschelon/40, Denney/13.

1 interests to be as thorough and forthcoming as possible with respect to the  
2 submission of supporting documentation.”<sup>116</sup> Eschelon’s proposed Section  
3 9.1.14.4.2.2.1 requires Qwest to provide the latest ARMIS line counts. Regarding  
4 the vintage of ARMIS data to be used for wire center classification purposes, the  
5 Oregon PUC found that it is “in the public interest to use the data that most  
6 closely reflects *current, real world* circumstances.”<sup>117</sup> The latest ARMIS line  
7 count data required by Eschelon’s language reflects that requirement. The  
8 granularity of the information required to be provided by Qwest under Eschelon’s  
9 proposal for Issue 9-39 is also supported by the Oregon PUC’s finding that, “We  
10 also require that the initial filing seeking non-impaired status for a wire center  
11 contain more granular detail than Qwest has proposed, including Qwest and  
12 CLEC-specific business line count and facilities data by wire center, calculating  
13 the number of lines served...Such data shall be identified as ‘highly confidential’  
14 and subject to the standing special protective order used in this proceeding.”<sup>118</sup>  
15 The information required by Eschelon’s proposed Section 9.1.14.4.2.2 is the same  
16 type of information the Commission required Qwest to provide in its initial filing  
17 to request that a wire center be added to the Commission Approved Wire Center  
18 list. Including Eschelon’s language in the ICA will facilitate resolution of  
19 disputes and allow opt in to these terms by other CLECs.

<sup>116</sup> Oregon Wire Center Order, Eschelon/40, Denney/13.

<sup>117</sup> Eschelon/40, Denney/7.

<sup>118</sup> Eschelon/40, Denney/14.

1 **ISSUE 9-40**

2 **Q. WHAT LANGUAGE DOES ESCHELON PROPOSE FOR ISSUE 9-40?**

3 A. Eschelon proposes the following language for Issue 9-40 (NRCs for Conversion)  
4 in sections 9.1.13.5.2, 9.1.14.6 and 9.1.15.2.1:

5 For each such facility converted from a UNE to an alternative  
6 service arrangement, Qwest may assess a non-recurring charge, if  
7 any, in the amount established by the Commission in the Wire  
8 Center Docket. No additional non-recurring charges apply, other  
9 than OSS non-recurring charges if applicable pursuant to Section  
10 12.7.

11 Eschelon’s language for Sections 9.1.13.5.2, 9.1.14.6 and 9.1.15.2.1 allows Qwest  
12 to assess a non-recurring charge, if any, approved by the Commission in the Wire  
13 Center Docket for each facility converted, but rules out other conversion NRCs  
14 (with the possible exception of OSS NRCs pursuant to Section 12.7).

15 **Q. WHAT LANGUAGE DOES QWEST PROPOSE FOR ISSUE 9-40?**

16 A. Qwest proposes the following language for Sections 9.1.13.5.2, 9.1.14.6, and  
17 9.1.15.2.1:

18 CLEC is also responsible for all applicable non-recurring charges  
19 associated with the appropriate alternative service arrangements.

20 Qwest’s proposed language that CLEC is responsible for “all applicable non-  
21 recurring charges associated with the appropriate alternative service  
22 arrangement.” Qwest’s language is unclear and overly broad.

1 **Q. WHY SHOULD THE COMMISSION ADOPT ESCHELON’S PROPOSED**  
2 **LANGUAGE FOR ISSUE 9-40?**

3 A. Like all other wire center issues, Eschelon’s proposal reflects the Commission’s  
4 findings on this issue, by following the Commission’s directive on a UNE to  
5 private line conversion charge in Order No. 07-109 in UM 1251. In contrast,  
6 Qwest’s proposed language is unclear and potentially conflicts with the Oregon  
7 PUC and FCC findings on conversion charges.<sup>119</sup> When addressing conversion  
8 charges for UNE to private line conversion, the Oregon Commission discussed a  
9 single UNE to private line conversion charge – not multiple charges, as Qwest’s  
10 proposal suggests. Further, the Commission stated that “the non-recurring UNE-  
11 to-private-line service conversion *charge* shall be based on costs.”<sup>120</sup> Similarly,  
12 the Commission stated that “We direct Qwest to propose a specific non-recurring  
13 *rate* for the UNE-to-private line conversions, and to submit a cost study in support  
14 of its proposed *charge*.”<sup>121</sup> The Commission’s conclusions on this issue reflecting  
15 the Commission’s expectation of a singular TELRIC-based charge for UNE to  
16 private line conversions flies in the face of Qwest’s proposed language that  
17 discusses “all applicable non-recurring charges associated with the applicable  
18 alternative service arrangements.” Eschelon’s language specifically identifies the  
19 conversion charge that will be set by the Commission in the wire center docket.

---

<sup>119</sup> See also the Direct Testimony of Mr. Starkey, issues 9-43 and 9-44 regarding UNE to non-UNE conversions (Eschelon/1).

<sup>120</sup> Eschelon/40, Denney/20. (emphasis added)

<sup>121</sup> Eschelon/40, Denney/20.

1 Eschelon’s language also clearly identifies all other NRCs that could apply to the  
2 conversion process.

3 Eschelon’s language on Issue 9-40 is consistent with the Oregon PUC’s directive  
4 on this issue and should be adopted.

5 **ISSUES 9-41 & 9-42**

6 **Q. WHAT LANGUAGE DOES ESCHELON PROPOSE FOR ISSUES 9-41**  
7 **AND 9-42?**

8 A. As part of Issue 9-41 Eschelon proposes to delete the following Qwest proposed  
9 sentence in 9.1.14.4 and replace Qwest’s proposed 9.1.14.4.1 in its entirety with  
10 Eschelon’s language.

11 ~~9.1.14.4...CLEC will have ninety (90) Days to transition existing~~  
12 ~~DS1 and DS3 UNEs to an alternative service. CLEC will have one~~  
13 ~~hundred eighty (180) Days to transition Dark Fiber transport to an~~  
14 ~~alternative service.~~

15 ~~9.1.14.4.1 CLEC is subject to back billing for the difference~~  
16 ~~between the UNE and Tariff recurring rates beginning on the~~  
17 ~~ninety first (91st) Day for the existing DS1 and DS3 UNEs, and on~~  
18 ~~Day one hundred eighty one (181) for the existing Dark Fiber~~  
19 ~~transport, as well as all applicable nonrecurring charges associated~~  
20 ~~with such conversions.~~

21 9.1.14.4.1 Transition Periods for additions to the Commission-  
22 Approved Wire Center List.

23 9.1.14.4.1.1 For a ninety (90) Day period beginning on the  
24 effective date on which the Commission approves an  
25 addition to the Commission-Approved Wire Center List,  
26 any DS1 Loop UNEs, DS3 Loop UNEs, DS1 Dedicated  
27 Transport UNEs, and DS3 Dedicated Transport UNEs that

1 CLEC leases from Qwest as of that date, but which Qwest  
2 is not obligated to unbundle, shall be available for lease  
3 from Qwest at a rate equal to 115% of the UNE rates  
4 applicable as of the effective date on which the  
5 Commission adds the Wire Center to the Commission-  
6 Approved Wire Center List.

7 9.1.14.4.1.2 For a one-hundred and eighty (180) Day period  
8 beginning on the effective date on which the Commission  
9 approves an addition to the Commission-Approved Wire  
10 Center List, any Dark Fiber Loop UNEs and Dark Fiber  
11 Dedicated Transport UNEs that CLEC leases from Qwest  
12 as of that date, but which Qwest is not obligated to  
13 unbundle, shall be available for lease from Qwest at a rate  
14 equal to 115% of the UNE rates applicable as of the  
15 effective date on which the Commission adds the Wire  
16 Center to the Commission-Approved Wire Center List.

17 Eschelon's language for Issue 9-42 in Section 9.1.14.4.1 relates to transition  
18 periods for additions to the Commission Approved Wire Center List. Eschelon's  
19 language provides that when an addition is made to the Commission Approved  
20 Wire Center list, Eschelon would be allowed to lease DS1 and DS3 UNEs  
21 impacted by this addition at 115% of the UNE rates applicable at the time of the  
22 addition for a period of 90 days. Eschelon's language would also provide the  
23 same arrangement for Dark Fiber impacted by an addition to the Commission  
24 Approved Wire Center list for a period of 180 days. Eschelon also proposes to  
25 strike Qwest's proposed language regarding back billing under Section 9.1.14.4.1  
26 and strike Qwest's proposed language regarding transition periods from Section  
27 9.1.14.4. Qwest's language in these sections is inconsistent with the Oregon Wire  
28 Center Order.

1 **Q. WHAT LANGUAGE DOES QWEST PROVIDE FOR ISSUES 9-41 AND 9-**  
2 **42?**

3 A. Qwest proposes the following sentence in 9.1.14.4 and language for 9.1.14.4.1:

4 9.1.14.4...CLEC will have ninety (90) Days to transition existing  
5 DS1 and DS3 UNEs to an alternative service. CLEC will have one  
6 hundred eighty (180) Days to transition Dark Fiber transport to an  
7 alternative service.

8 9.1.14.4.1 CLEC is subject to back billing for the difference  
9 between the UNE and Tariff recurring rates beginning on the  
10 ninety-first (91st) Day for the existing DS1 and DS3 UNEs, and on  
11 Day one-hundred-eighty-one (181) for the existing Dark Fiber  
12 transport, as well as all applicable nonrecurring charges associated  
13 with such conversions.

14 Qwest's proposed language for Section 9.1.14.4 would allow Qwest to add wire  
15 centers to the non-impaired wire centers list without Commission approval, and  
16 would prohibit Eschelon from ordering impacted UNEs 30 days after Qwest's  
17 notice of the addition (see Issue 9-37 (a)). The Qwest proposed language under  
18 these issues for 9.1.14.4 requires Eschelon to convert to an alternative service  
19 arrangement for DS1 and DS3 UNEs within 90 days of Qwest's notice and Dark  
20 Fiber transport within 180 days of Qwest's notice.

21 Qwest's proposed language for 9.1.14.4.1 focuses on the pricing after the  
22 transition period is over. Specifically, Qwest's language states that Eschelon is  
23 subject to back billing for the difference between the UNE rate and Tariff rate  
24 once the 90 day and 180 day transition periods are over, and like under Issue 9-  
25 40, includes an open ended provision related to conversion charges.

1 **Q. WHY IS ESCHELON’S LANGUAGE FOR ISSUES 9-41 AND 9-42**  
2 **SUPERIOR TO QWEST’S?**

3 A. Eschelon’s language for 9.1.14.4.1 reflects the Commission’s and the FCC’s  
4 findings on this issue that allows for an interim compensation plan. Specifically,  
5 the Oregon Commission stated that “The interim compensation plan – 115 percent  
6 of the current UNE rates for non-impaired UNE services and facilities – is also a  
7 reasonable [balance]; CLECs can plan for the future by knowing how to quantify  
8 their incremental costs to continue to use UNEs during the transition period...”<sup>122</sup>  
9 Eschelon’s proposed 9.1.14.4.1 reflects this Commission directive. This is also  
10 supported by the FCC’s TRRO at paragraphs 145 ad 198.

11 Qwest’s proposed language, on the other hand, ignores this Commission  
12 conclusion and instead focuses on the transition period starting with Qwest’s  
13 notice that it has added a wire center to the Commission Approved Wire Center  
14 List. As discussed under Issue 9-37, the Commission – not Qwest – should  
15 determine if and when a rate center is added to the Commission Approved Wire  
16 Center List. In addition, Qwest’s proposed language on backbilling under Section  
17 9.1.14.4.1 conflicts with the Commission’s findings on backbilling in UM 1251,  
18 in which the Commission found that “rather than allowing Qwest to automatically  
19 back-bill CLECs to the original effective date if it prevails on the designation  
20 generally, we shall only allow Qwest to back-bill to a date designated by the  
21 Commission in the event that we specifically find the CLECs’ objections to have

---

<sup>122</sup> Eschelon/40, Denney/15.

1           been without merit or primarily for the purpose of delaying implementation. To  
2           do otherwise would have an undue chilling effect on the exercise of the CLECs'  
3           rights to scrutinize Qwest's proposed wire center designation."<sup>123</sup> Qwest's  
4           proposal conflicts with the Commission's conclusions and should be rejected.

5       **VII. UNE AVAILABILITY, CERTAIN RATE APPLICATIONS AND**  
6       **COMMINGLED EELS (SUBJECT MATTER NOS. 20, 22, 22A, 23, 25 AND**  
7       **26)**

8       **SUBJECT MATTER NO. 20, SUBLOOPS – QWEST CROSS CONNECT/WIRE**  
9       **WORK**

10       **Issue Nos. 9-50: ICA Section 9.3.3.8.3**

11       **Q. IS ISSUE 9-50 NOW CLOSED?**

12       A. Yes. The companies closed Issue 9-50 based on language in Section 9.3.3.8.3.  
13       The closed language for 9.3.3.8.3 is as follows:

14                   9.3.3.8.3       If CLEC elects to move its service to the new  
15                   minimum point of entry, CLEC may either perform its own cross-  
16                   connect or request that Qwest perform the cross-connect. If Qwest  
17                   performs the cross-connect appropriate time and material charges  
18                   are applicable.

19       **SUBJECT MATTER NO. 22, UNBUNDLED CUSTOMER CONTROLLED**  
20       **REARRANGEMENT ELEMENT (“UCCRE”)**

21       **Issue No. 9-53: ICA Sections 1.7.3, 9.9 and 9.9.1**

22       **Q. PLEASE DESCRIBE THE BUSINESS NEED AND SUMMARIZE THE**  
23       **ISSUE RELATED TO UNBUNDLED CUSTOMER CONTROLLED**

---

<sup>123</sup> Eschelon/40, Denney/14.

1           **REARRANGEMENT.**

2    A.    Discrimination is harmful to Eschelon’s business, as it is at a disadvantage vis-à-  
3           vis its competitors if it is discriminated against. Eschelon offers four alternative  
4           proposals for Subject Matter 22 that are all designed to remedy the following  
5           situation:<sup>124</sup> Qwest refuses to offer a product to Eschelon on the grounds that  
6           Qwest plans to discontinue the product (such as for lack of demand), but Qwest  
7           does not discontinue it. The product remains in the SGAT and/or ICAs with other  
8           CLECs, and Qwest takes no action (such as amending those ICAs or seeking  
9           Commission approval) to remove the product, while Qwest will not provide the  
10          product on the same terms to Eschelon in its ICA. Eschelon is willing to accept  
11          the identical language and rates for these products in its ICA as are currently  
12          contained in the SGAT and/or the Qwest-AT&T ICA, but Qwest refuses to  
13          include those terms in Eschelon’s ICA.

14          Through Eschelon’s four language options as to how to remedy this problem,  
15          Eschelon offers to (1) require Qwest to notify Eschelon and offer it the same  
16          terms upon which it offers the product to another CLEC, if during the term of this  
17          Agreement Qwest performs or offers to perform the identified services to the  
18          other CLEC; (2) require Qwest to obtain Commission approval to phase out or  
19          otherwise cease offering a wholesale product or service to all CLECs; (3) require  
20          Qwest to obtain Commission approval to phase out or otherwise cease offering a  
21          wholesale product or service to all CLECs (with additional procedures included to

---

<sup>124</sup> Eschelon has updated its proposals for Issue 9-53 since the Petition for Arbitration was filed in this case.

1 address Qwest's stated concerns about the second proposal); or (4) require Qwest  
2 to continue to offer products on nondiscriminatory terms until it amends all  
3 agreements to eliminate the product or asks the Commission for approval to phase  
4 out or otherwise cease offering a wholesale product or service to all CLECs (with  
5 no language about the procedures for doing so, as they will be determined later by  
6 the Commission, should Qwest request such a process). All of these proposals are  
7 compromises from Eschelon's initial position, which was simply to include the  
8 same language for these products that is currently included in the SGAT and/or  
9 the Qwest-AT&T ICA. Eschelon made the second, third, and fourth proposals  
10 (the "phase out" proposals) after the witness for the Minnesota Department of  
11 Commerce pointed out in testimony that a commission process for phasing out  
12 products may be needed if Qwest prefers not to individually amend each  
13 interconnection agreement.

14 Qwest proposes to delete Eschelon's language and provide only that it will  
15 provide this product if the Commission approves "a new negotiated ICA or  
16 negotiated amendment" during the term of the agreement. AT&T already has this  
17 product in its ICA. Under Qwest's proposal, Qwest could provide this product to  
18 AT&T pursuant to the existing approved Qwest-AT&T ICA on the date after the  
19 Qwest-Eschelon proposed ICA becomes effective, and Qwest would not have to  
20 offer the same product to Eschelon because AT&T's ICA is not a "new negotiated  
21 ICA." Qwest's proposed language does nothing to remedy the identified  
22 problem. If Qwest does not amend its ICAs with AT&T and other CLECs that

1 contain this product, Qwest should have to provide it to Eschelon on the same  
2 terms or approach the Commission to discontinue it generally to avoid  
3 discrimination and ensure an orderly phase out of the product.

4 The product that is at issue in Issue 9-53 is Unbundled Customer Controlled  
5 Rearrangement Element (“UCCRE”). Qwest claims that it is discontinuing this  
6 product due to lack of demand, but UCCRE is in both the Qwest-AT&T ICA, the  
7 Qwest-Qwest ICA,<sup>125</sup> and the SGAT. UCCRE enables Eschelon to control the  
8 configuration of UNEs or ancillary services on a Near Real Time basis through a  
9 digital cross connect device, when this device is available in a Qwest central  
10 office. Qwest previously had agreed in negotiations to provide UCCRE to  
11 Eschelon but now claims it plans to discontinue the product.

12 **Q. WHAT IS ESCHELON’S PROPOSAL TO ADDRESS THIS ISSUE?**

13 A. The language of Eschelon’s four alternative language proposals for these issues is  
14 as follows:

15 **Proposal #1 (Sections 9.9 & 9.9.1)**

16 **9.9 Unbundled Customer Controlled Rearrangement Element**  
17 **(UCCRE)**

18 **9.9.1 If Qwest provides or offers to provide UCCRE to any other**  
19 **CLEC during the term of this Agreement, Qwest will notify CLEC**  
20 **and offer CLEC an amendment to this Agreement that allows**  
21

---

<sup>125</sup> Qwest Corporation (Qwest) has an interconnection agreement with its CLEC, Qwest Communications Corp. This agreement was approved by the Commission in Order 04-630 as part of Docket and UCCRE. Further, when this agreement was updated with a TRRO Amendment, UCCRE was not removed from the interconnection agreement. The TRRO amendment as part of the Qwest-Qwest contract was approved by the Commission on September 27, 2006 in Order 06-559.

1 CLEC, at its option, to request UCCRE on nondiscriminatory  
2 terms and conditions.

3  
4 **Proposal #2 (Sections 1.7.3, 9.9 & 9.9.1)**

5 1.7.3 If Qwest desires to phase out or otherwise cease offering on  
6 a wholesale basis to any Competitive Local Exchange Carriers an  
7 Interconnection service, access to Unbundled Network Elements  
8 (UNEs), additional Ancillary Services or Telecommunications  
9 Services available for resale which is contained in the Statement of  
10 Generally Available Terms (SGAT) or this Agreement, Qwest  
11 must request and obtain Commission approval, after CLEC and  
12 other potentially affected carriers are afforded reasonable notice  
13 and opportunity to be heard in a generic Commission proceeding.  
14 If the basis for Qwest's request is that Qwest is no longer required  
15 to provide the product or service pursuant to a legally binding  
16 modification or change of the Existing Rules, in the cases of  
17 conflict, the pertinent legal ruling and the terms of Section 2.2 of  
18 this Agreement govern notwithstanding anything in this Section  
19 1.7.3. This provision is not intended to change the scope of any  
20 regulatory agency's authority with regard to Qwest or CLECs.

21  
22 1.7.3.1 Before Qwest submits a request to cease offering a  
23 product or service pursuant to this Section 1.7.3, and while  
24 a request pursuant to this Section 1.7.3 is pending before  
25 the Commission, Qwest must continue to offer the product  
26 or service to CLEC, unless the Commission orders  
27 otherwise.

28  
29 1.7.3.1.1 If the Commission orders that Qwest need  
30 not offer the product or service while the  
31 proceeding is pending, the Commission may place  
32 such restrictions on that order as allowed by its  
33 rules and authority, including a condition that if  
34 Qwest later offers the product or service to any  
35 CLEC, it must then inform CLECs of the  
36 availability of the product or service and offer it to  
37 other CLECs on the same terms and conditions. If  
38 those terms and conditions are in this Agreement  
39 (but were not in effect due to the Commission order  
40 that Qwest need not offer the product or service  
41 while the proceeding is pending), once Qwest offers  
42 those terms to any other CLEC, Qwest must offer  
43 those terms to CLEC pursuant to those terms in this  
44 Agreement without amendment as well.

1  
2 1.7.3.2 If the Commission approves the phase out or other  
3 cessation of a product or service offering, the Agreement  
4 will be amended as set forth in Section 2.2 to reflect the  
5 outcome of the generic proceedings by the Commission,  
6 except where CLEC notifies Qwest in writing that an  
7 amendment is not required. Qwest will also amend its  
8 SGAT consistent with the Commission's ruling, unless the  
9 Commission orders otherwise.

10  
11  
12 **9.9 Unbundled Customer Controlled Rearrangement Element**  
13 **(UCCRE)**

14  
15 9.9.1 Qwest shall provide Unbundled Customer Controlled  
16 Rearrangement Element (UCCRE) to CLEC in a non-  
17 discriminatory manner according to the terms and  
18 conditions of Section 9.9 and subparts of the SGAT, unless  
19 Qwest obtains an order from the Commission that it need  
20 not offer UCCRE to CLECs, such as an order pursuant to  
21 Section 1.7.3 of this Agreement.

22  
23 **Proposal #3 (Sections 1.7.3, 9.9 & 9.9.1)**

24 1.7.3 If Qwest desires to phase out or otherwise cease offering on  
25 a wholesale basis (without first individually amending every  
26 interconnection agreement containing that term and updating the  
27 SGAT) an Interconnection service, access to Unbundled Network  
28 Elements (UNEs), Ancillary Services or Telecommunications  
29 Services available for resale, Qwest must request and obtain  
30 Commission approval, after CLEC and other potentially affected  
31 carriers are afforded reasonable notice and opportunity to be heard  
32 in a generic Commission proceeding. For example, if a product is  
33 generally available per the terms of the SGAT and is contained in  
34 the ICAs of other CLECs (but not CLEC), before refusing to make  
35 that product available to CLEC on the same terms on the basis that  
36 Qwest intends to cease offering the product (such as due to lack of  
37 demand), Qwest must either (1) amend the ICAs of those other  
38 CLECs and update the SGAT to remove the product; or (2) obtain  
39 Commission approval to cease offering the product on a wholesale  
40 basis. This provision is intended to help facilitate  
41 nondiscrimination by ensuring that Qwest cannot refuse to offer a  
42 product on the same terms to CLEC while that product is still  
43 contained in the ICAs of other CLECs or in the SGAT.  
44

1 1.7.3.1 If the basis for Qwest’s request is that Qwest is no  
2 longer required to provide the product or service pursuant  
3 to a legally binding modification or change of the Existing  
4 Rules, in the cases of conflict, the pertinent legal ruling and  
5 the terms of Section 2.2 of this Agreement govern  
6 notwithstanding anything in this Section 1.7.3.

7  
8 1.7.3.2 This Section 1.7.3 is not intended to change the  
9 scope of any regulatory agency's authority with regard to  
10 Qwest or CLECs.

11  
12 1.7.3.3 This Section 1.7.3 relates to the cessation of a  
13 product or service offering on a wholesale basis as  
14 described in Section 1.7.3 (referred to as a “phase out” or  
15 as “cease offering”). Nothing in this Section 1.7.3 prevents  
16 another CLEC and Qwest from mutually agreeing to  
17 remove a product from an individual ICA to which CLEC  
18 is not a party.

19  
20 1.7.3.4 Before Qwest submits a request to phase out or  
21 cease offering a product or service (as those terms are used  
22 in this Section 1.7.3) pursuant to this Section 1.7.3, and  
23 while a request pursuant to this Section 1.7.3 is pending  
24 before the Commission, Qwest must continue to offer the  
25 product or service, unless the Commission orders  
26 otherwise.

27  
28 1.7.3.4.1 If the Commission orders that Qwest need  
29 not offer the product or service while the  
30 proceeding is pending, the Commission may place  
31 such restrictions on that order as allowed by its  
32 rules and authority, including a condition that if  
33 Qwest later offers the product or service to any  
34 CLEC, it must then inform CLECs of the  
35 availability of the product or service and offer it to  
36 other CLECs on the same terms and conditions. If  
37 those terms and conditions are in this Agreement  
38 (but were not in effect due to the Commission order  
39 that Qwest need not offer the product or service  
40 while the proceeding is pending), once Qwest offers  
41 those terms to any other CLEC, Qwest must offer  
42 those terms to CLEC pursuant to those terms in this  
43 Agreement without amendment as well.  
44

1 1.7.3.5 If the Commission approves the phase out or other  
2 cessation of a product or service offering that is contained  
3 in this Agreement, the product or service will no longer be  
4 available per the terms of the Commission's order without  
5 the need for an amendment to this Agreement, unless the  
6 Commission orders otherwise or the Parties agree to amend  
7 this Agreement. Qwest will amend its SGAT consistent  
8 with the Commission's ruling, unless the Commission  
9 orders otherwise.

10  
11 **For 9.9 & 9.1.9: Same language as for Eschelon proposal #2 (language**  
12 **repeated below)**

13 **9.9 Unbundled Customer Controlled Rearrangement Element**  
14 **(UCCRE)**

15  
16 9.9.1 Qwest shall provide Unbundled Customer Controlled  
17 Rearrangement Element (UCCRE) to CLEC in a non-  
18 discriminatory manner according to the terms and conditions of  
19 Section 9.9 and subparts of the SGAT, unless Qwest obtains an  
20 order from the Commission that it need not offer UCCRE to  
21 CLECs, such as an order pursuant to Section 1.7.3 of this  
22 Agreement.

23  
24 **Proposal #4 (Sections 1.7.3, 9.9 & 9.9.1)**

25 1.7.3 If Qwest desires to phase out or otherwise cease offering a  
26 product, service, element, or functionality on a wholesale basis that  
27 it has previously made available pursuant to Section 251 of the  
28 Act, Qwest must first obtain an order from the Commission  
29 adopting a process for doing so. Once that process in place, Qwest  
30 may use that process as ordered by the Commission.

31  
32 1.7.3.1 Unless and until a process is approved by the  
33 Commission as described in Section 1.7.3, Qwest must  
34 continue to offer such products, services, elements, or  
35 functionalities on a nondiscriminatory basis, such that  
36 Qwest may not refuse to make an offering available to  
37 CLEC on the same terms as it is available to other CLECs  
38 through their ICAs or the SGAT on the grounds that Qwest  
39 , although it has not yet amended those agreements,  
40 indicates that it intends to cease offering that product (such  
41 as due to lack of demand). If the Commission does not  
42 adopt a process as described in Section 1.7.3 or Qwest  
43 chooses not to use that process, Qwest may cease a

1 wholesale offering by promptly amending all ICAs  
2 containing that offering to remove it.  
3  
4

5 **For 9.9 & subparts: As part of Proposal #4, Eschelon proposes that the**  
6 **language of the SGAT (copied below) for Section 9.9 and subparts be**  
7 **included in the Qwest-Eschelon ICA, subject to Qwest being able to remove**  
8 **it through the process described in Section 1.7.3.**  
9

10 **9.9 Unbundled Customer Controlled Rearrangement Element (UCCRE)**

11 Qwest shall provide Unbundled Customer Controlled Rearrangement Element  
12 (UCCRE) in a non-discriminatory manner according to the following terms and  
13 conditions.

14 **9.9.1 Description**

15 9.9.1.1 Unbundled Customer Controlled Rearrangement Element  
16 (UCCRE) provides the means by which CLEC controls the configuration  
17 of Unbundled Network Elements (UNEs) or ancillary services on a near  
18 real time basis through a digital cross connect device. UCCRE utilizes the  
19 Digital Cross-Connect System (DCS). UCCRE is available in Qwest Wire  
20 Centers that contain a DCS and such DCS is UCCRE compatible.

21 **9.9.2 Terms and Conditions**

22 9.9.2.1 DCS ports are DS1, DS3 and Virtual Ports (Virtual Ports are for  
23 connecting one End User to another). The DCS Port is connected to the  
24 Demarcation Point using tie cables via the appropriate DSX cross-connect  
25 panel. The DSX panel serves both as a “Design-To” point and a network  
26 interface at the DCS. CLEC is responsible for designing to the “Design-  
27 To” point. CLEC may connect the UCCRE ports to its elements or CLEC  
28 designated equipment. If CLEC desires DS0 Port functionality, CLEC  
29 will order a DS1 UCCRE Port and provide its own multiplexer (or DS1  
30 UDIT multiplexers) and connect them together. This combination will  
31 form the equivalent of 24 DS0-level ports.

32 9.9.2.2 The reconfiguration of the service is accomplished at the DS0  
33 signal level. Reconfiguration of these services can be accomplished  
34 through two methods: Dial Up or Attendant Access.

35 9.9.2.2.1 Dial Up Access. Qwest will provide access to mutually  
36 agreed upon UCCRE points in those offices where UCCRE is  
37 available. Qwest will provide and engineer this service in the same  
38 manner that it is currently provided to Qwest’s End Users.

39 9.9.2.2.2 Attendant Access. When CLEC requests Qwest to make  
40 changes on its behalf, an attendant access charge will apply per

1 transaction.

2 **9.9.3 Rate Elements**

3 9.9.3.1 Recurring rate elements include:

4 9.9.3.1.1 DS1 Port;

5 9.9.3.1.2 DS3 Port;

6 9.9.3.1.3 Dial Up Access; and

7 9.9.3.1.4 Attendant Access.

8 9.9.3.2 Nonrecurring rate elements include:

9 9.9.3.2.1 DS1 Port;

10 9.9.3.2.2 DS3 Port; and

11 9.9.3.2.3 Virtual Ports.

12 **9.9.4 Ordering Process**

13 9.9.4.1 Ordering processes and installation intervals are specified in  
14 Exhibit C of this Agreement and are the same as specified in the UNEs -  
15 UDIT Section. UCCRE is ordered via the ASR process.

16 9.9.4.2 UCCRE is ordered with the Basic Installation option. Qwest will  
17 begin the work activity on the negotiated Due Date and notify CLEC when  
18 the work activity is complete. Test results performed by Qwest are not  
19 provided to CLEC.

20 **Q. WHAT IS QWEST'S PROPOSAL ON THIS ISSUE?**

21 A. Qwest opposes all of Eschelon's language for Issue 9-53, and proposes to leave  
22 Section 9.9 intentionally blank.

23 **Q. QWEST PROPOSES THE DELETION OF ALL LANGUAGE PROPOSED**  
24 **BY ESCHELON, INCLUDING DELETION OF ALL THREE PHASE OUT**  
25 **PROPOSALS FOR SECTION 1.7.3. WHY IS ESCHELON'S LANGUAGE**  
26 **APPROPRIATE?**

1 A. This issue presents a straight-forward application of the prohibition against  
2 discrimination.<sup>126</sup> Qwest currently offers to other CLECs an option under which  
3 it will provide UCCRE and, when it does so, charges the Commission-approved  
4 rate for the services provided. Specifically, Qwest makes this option available to  
5 itself, AT&T and Covad pursuant to those carriers' ICAs that were approved by  
6 this Commission. When the FCC reversed the pick-and-choose rule, it made clear  
7 that "existing state and federal safeguards against discriminatory behavior" were  
8 still in effect and remained "in place" to provide needed protection against  
9 discrimination.<sup>127</sup> Therefore, Qwest cannot, consistent with its obligation to not  
10 discriminate, offer such a UNE term under its ICAs with other carriers but refuse  
11 to make that term available under its agreement with Eschelon.

12 Qwest has opposed Eschelon's proposed contract language regarding Qwest's  
13 obligation to provide UCCRE primarily on the ground that there is no CLEC  
14 demand for this product and that Qwest, therefore, is discontinuing offering it on  
15 a "going forward basis."<sup>128</sup> The Minnesota Department of Commerce witness Dr.  
16 Fagerlund recommended that the ICA include language that would enable Qwest  
17 to "phase out" elements that are either no longer required or not needed. In  
18 response to Dr. Fagerlund's recommendation, Eschelon has proposed new

---

<sup>126</sup> See 47 U.S.C. § 251(c)(3) (duty of local exchange carrier to nondiscriminatory access to network elements on an unbundled basis).

<sup>127</sup> ["Second Report and Order"] Second Report and Order, In the Matter of Review of the Section 251 Unbundling Obligations of Incumbent Local Exchange Carriers, CC Docket No. 01-338 (July 8, 2004) ¶¶ 18, 20-23.

<sup>128</sup> See Issue No. 9-53, Qwest's position in the Issues Matrix.

1 language (Eschelon proposals #2-#4) that would allow Qwest to phase out  
2 elements, subject to Commission review.

3 Eschelon proposed placing the language in Section 1.7, because this section  
4 already deals with ICA amendments. As Section 1.7.1, in a sense, deals with the  
5 “phasing in” of new products, Section 1.7.3 seemed like a logical place to place  
6 language relating to the “phasing out” of products.

7 Eschelon’s Proposal #3 is offered to alleviate concerns asserted by Qwest during  
8 cross examination on this issue in the Minnesota arbitration. Eschelon’s Proposal  
9 #3 clarifies that its proposal is intended to govern the operation of this  
10 interconnection agreement and does not interfere with the negotiations of other  
11 CLECs. An example has been added to assist in identifying the situation being  
12 addressed.

13 Eschelon’s Proposal #4 is an alternative approach that allows Qwest to propose  
14 for Commission review and adoption a process for the phase out or withdrawal of  
15 a product or service. Unless and until the Commission approves such a process  
16 and it is followed by Qwest, Qwest must either amend all its ICAs individually to  
17 eliminate the offering or offer the products and services on a nondiscriminatory  
18 basis. This proposal is also responsive to suggestion by Qwest that the other  
19 phase out proposals had too much detail in them and perhaps the procedures for a  
20 phase out proposal should be worked out in a more generic proceeding. Under  
21 Proposal #4, Qwest has the opportunity to obtain a phase out process in such

1 circumstances and, until then, may withdraw products by amending the  
2 agreements containing them to eliminate those terms.

3 All three of Eschelon's phase out proposals attempt to remedy the current  
4 situation in which Qwest is holding out products and services as being generally  
5 available through its SGATs, and Qwest is obligated to provide them to other  
6 CLECs under their ICAs, but Qwest will not offer these products and services to  
7 Eschelon.

8 **Q. WHY IS QWEST'S PROPOSAL INSUFFICIENT?**

9 A. Qwest's proposal would allow Qwest to leave the other agreements in place and  
10 discriminate against Eschelon. For UCCRE, Qwest's language is silent, allowing  
11 Qwest to offer this to other CLECs while excluding its availability to Eschelon.

12 **Q. QWEST ARGUES THAT THERE IS NO DEMAND FOR UCCRE.  
13 SHOULD DEMAND BE TAKEN INTO ACCOUNT?**

14 A. No. If Qwest were permitted to unilaterally withdraw a product based on nothing  
15 more than its assertion that there is "no demand" for the product, Eschelon would,  
16 without Commission review, have little or no means for challenging such an  
17 assertion. "Lack of demand" may or may not be a factor that the Commission  
18 will wish to take into account, but Qwest should be required to make its case to  
19 the Commission, rather than engaging in self help and proceeding without  
20 Commission oversight.

1       There is nothing in the Act that limits access only to products and services with  
2       current demand. If Eschelon has a legitimate business reason to believe it may  
3       use a service during the term of the ICA (particularly in light of dwindling UNE  
4       access and the need to explore alternatives going forward), it should be able to get  
5       that service, particularly as long as that service is offered to other CLECs.  
6       Eschelon's phase out proposal would, nonetheless, provide Qwest a mechanism to  
7       withdraw offerings if it can make its case for withdrawal to the Commission.

8       For purposes of applying the prohibition under federal and state law against  
9       discrimination, the issue is not whether there is "demand" for a product or service,  
10      but rather, whether Qwest makes the product or service available to other CLECs.

11      Qwest's approach of attempting to remove this rate element on an ICA by ICA  
12      basis will result in some carriers having access to this service while others do not.  
13      If Qwest proposes changes in Commission-approved rates, including the  
14      availability of products for which this Commission has set rates, Qwest should go  
15      to the Commission, rather than to each CLEC. Unless and until it does so, Qwest  
16      has an obligation to offer the service to all carriers on the same terms and  
17      conditions.

18      Qwest makes this product available pursuant to its SGAT as well as pursuant to  
19      interconnection agreements that it has with other carriers such as AT&T and

1 Covad.<sup>129</sup> Because Qwest provides this product to other carriers, it must also  
2 provide it to Eschelon.<sup>130</sup> Eschelon's proposal, consistent with Qwest's  
3 obligations to not discriminate among carriers, only requires that Qwest provide  
4 Eschelon with this product on the same terms and conditions as it offers or  
5 provides the elements to another carrier.

6 Qwest's proposal, in contrast, allows Qwest to continue to provide access to these  
7 products to other CLECs under its existing SGATs and ICAs while denying such  
8 access to Eschelon. This is discriminatory and violates the Act.

9 **Q. CAN YOU PROVIDE ANY EXAMPLES WHERE THERE WAS**  
10 **SIGNIFICANT DEBATE OVER A UNE SERVICE, YET LITTLE**  
11 **ACTUAL DEMAND?**

12 A. Yes. In the past, there was considerable debate regarding access to dark fiber.<sup>131</sup>  
13 Few, if any CLECs, ordered dark fiber for a long time, but CLECs still had a legal  
14 right to it and eventually it has been used. What this example illustrates is that,  
15 because of rapid and frequent changes in both the law and technology in the  
16 telecommunications field, it is difficult to predict the future demand for a product  
17 or service for which the current demand may be minimal.

---

<sup>129</sup> See SGAT, AT&T/Qwest ICA, Covad/Qwest ICA § 9.3.6 and § 9.9. In addition, Qwest is required to provide CLECs with nondiscriminatory access to unbundled network elements pursuant to 47 U.S.C. § 251(c)(3).

<sup>130</sup> *Second Report and Order* at ¶¶ 18, 20-23.

<sup>131</sup> Section 9.7.1.1 of the ICA defines Dark Fiber as follows: "Dark Fiber, unlike "lit" fiber, is unused fiber within an existing fiber optic cable that has not yet been activated through optronics to render it capable of carrying communications services.

1 **Q. DID THE *TRRO* REMOVE QWEST'S OBLIGATION TO PROVIDE**  
2 **UCCRE?**

3 A. No. Qwest argues that, because the FCC omitted a reference to “digital cross-  
4 connect systems” when it re-wrote the unbundling rule, 47 C.F.R. § 51.319 (“Rule  
5 319”), this means that it is not obligated to provide UCCRE as a UNE.

6 Rule 319 sets forth the FCC’s unbundling rules. Prior to its revision pursuant to  
7 the *TRO*, 47 C.F.R. § 51.319(d)(2)(iv) provided that:

8 “The incumbent shall . . . permit, to the extent technically feasible,  
9 a requesting telecommunications carrier to obtain the functionality  
10 provided by the incumbent LEC’s digital cross-connect systems in  
11 the same manner that the incumbent LEC provides such  
12 functionality to interexchange carriers.”

13 This rule was substantially re-written in 2003 (and re-written again pursuant to the  
14 *TRRO*) to set forth a process by which state commissions would conduct an  
15 impairment analysis to determine what elements must be unbundled. As a result  
16 of the re-write, § 51.319(d)(2)(iv) was omitted from the rule. Qwest interprets  
17 this to mean that the FCC found that incumbents are not required to offer access  
18 to digital cross connect systems and, therefore, that Qwest is not required to offer  
19 UCCRE, which is accessed using a digital cross connect system.

20 However, after Rule 319 was re-written, 47 C.F.R. § 51.305(a)(2)(iv) continued to  
21 require incumbents to provide CLECs with interconnection at “central office  
22 cross-connect points.” The reasonable interpretation is that, in amending Rule  
23 319, the FCC was focused on establishing a process for conducting the necessary

1 impairment analysis, and not that the FCC had concluded that unbundled access  
2 to cross-connects would no longer be required. There is no discussion in the  
3 FCC's Order relieving incumbents from the obligation to offer access using cross-  
4 connects. When the FCC has eliminated such obligations in other cases, it has  
5 done so expressly.

6 In the absence of any amendment by the FCC to its unbundling rules, it remains  
7 obligatory that Qwest make this product available pursuant to its SGAT as well as  
8 pursuant to interconnection agreements that it has with other carriers.<sup>132</sup> Because  
9 Qwest provides this product to other carriers, it must also provide it to  
10 Eschelon.<sup>133</sup> Eschelon's proposal, consistent with Qwest's obligations to avoid  
11 discrimination among carriers, only requires that Qwest provide Eschelon with  
12 this product on the same terms and conditions as it offers or provides them to  
13 another carrier.

14 **Q. PLEASE SUMMARIZE THIS ISSUE.**

15 A. Eschelon's language states that the rates and services Qwest currently offers to  
16 other CLECs related to UCCRE be available to Eschelon so long as they are  
17 available to other CLECs. This proposal is reasonable and allows Eschelon to  
18 utilize this product, to the extent Qwest makes it available to other CLECs.  
19 Eschelon offers three alternative proposals that would all allow Qwest to

---

<sup>132</sup> See SGAT §9.9., Qwest-AT&T ICA, Qwest-Covad ICA § 9.9. In addition, Qwest is required to provide CLECs with nondiscriminatory access to unbundled network elements pursuant to 47 U.S.C. § 251(c)(3).

<sup>133</sup> *Second Report and Order* at ¶¶ 18, 20-23.

1           discontinue products (such as for lack of demand) without individually amending  
2           every ICA containing those products, so any alleged burden of doing so has been  
3           adequately addressed by Eschelon’s proposals.

4           **SUBJECT MATTER NO. 22A. APPLICATION OF UDF-IOF TERMINATION**  
5           **(FIXED) RATE ELEMENT**

6           **Issue No. 9-51: ICA Section 9.7.5.2.1.a**

7           **Q. PLEASE DESCRIBE THE BUSINESS NEED RELATED TO UDF-IOF**  
8           **TERMINATIONS.**

9           A. Eschelon desires clear language relating to the application of rates in Exhibit A.  
10           Qwest proposes one rate application for Eschelon, while its language reflects an  
11           alternative rate application in its SGAT and agreements with other carriers.

12           **Q. WHAT IS ESCHELON’S PROPOSAL TO ADDRESS THIS ISSUE?**

13           A. Eschelon offers two alternative proposals for this issue:

14                           **Proposal #1**

15                           9.7.5.2.1.a) UDF-IOF Termination (Fixed) Rate Element. This  
16                           rate element is a recurring rate element and provides a termination  
17                           at the interoffice FDP within the Qwest Wire Center. Two UDF-  
18                           IOF terminations apply (one for each of the two end points in the  
19                           termination path) per pair ~~cross-connect provided on the facility.~~  
20                           Termination charges apply for each intermediate office terminating  
21                           at an FDP or like cross-connect point.

22                           **Proposal #2 (SGAT language)**

23                           9.7.5.2.1.a) UDF-IOF Termination (Fixed) Rate Element. This  
24                           rate element is a recurring rate element and provides a termination  
25                           at the interoffice FDP within the Qwest Wire Center. Two UDF-  
26                           IOF terminations apply per pair ~~cross-connect provided on the~~  
27                           facility. Termination charges apply for each intermediate office  
28                           terminating at an FDP or like cross-connect point.

1 **Q. WHAT IS QWEST’S PROPOSAL ON THIS ISSUE?**

2 A. Qwest has one proposal for this issue:

3 9.7.5.2.1.a) UDF-IOF Termination (Fixed) Rate Element. This  
4 rate element is a recurring rate element and provides a termination  
5 at the interoffice FDP within the Qwest Wire Center. Two UDF-  
6 IOF terminations apply ~~(one for each of the two end points in the~~  
7 ~~termination path) per pair cross connect provided on the facility.~~  
8 Termination charges apply for each intermediate office terminating  
9 at an FDP or like cross-connect point.

10 **Q. WHY IS ESCHELON’S LANGUAGE APPROPRIATE?**

11 A. The contract contains descriptions of rate elements along with the method in  
12 which they are applied. This section applies to the rate in 9.7.5.1.4 of Exhibit A.  
13 The rate from Exhibit A is the same for all carriers. Qwest has not provided any  
14 support, including cost studies,<sup>134</sup> for the change in the terms related to the rate  
15 application for this element. Further, there is no reason why Qwest should change  
16 the terms of the application of these rates for Eschelon, but not for other carriers.

17 Eschelon’s second proposal mirrors the language from Qwest’s SGAT and Qwest  
18 has provided no clear reason why its SGAT language is unacceptable. Qwest  
19 proposed adding the phrase, providing that the rate applies “per cross-connect  
20 provided on the facility.” Because the rate has not changed, it is unclear how  
21 Qwest’s proposed change impacts the rates, their application or the cost studies  
22 creating these rates.

---

<sup>134</sup> During negotiations Eschelon requested to review Qwest’s cost studies to determine if the rate application language proposed by Qwest is consistent with the way in which the costs were developed. Qwest has refused to provide cost studies for this rate element.

1 **Q. WHY IS QWEST’S PROPOSED LANGUAGE INSUFFICIENT?**

2 A. Qwest’s language potentially alters the rate application of a Commission  
3 approved rate. In an attempt to close this issue and address Qwest’s “concern”  
4 with the language it uses for other carriers, Eschelon offered its first proposal  
5 clarifying that the termination charges described apply to each end of the transport  
6 path.

7 **Q. WILL ESCHELON’S PROPOSAL ALLOW QWEST TO RECOVER ITS**  
8 **COST?**

9 A. Yes. Qwest argues that Eschelon’s proposal prevents Qwest from recovering its  
10 cost because multiple terminations may be required.<sup>135</sup> However, Qwest provided  
11 no cost support to Eschelon to support this claim.

12 **Q. PLEASE SUMMARIZE THIS ISSUE.**

13 A. Qwest’s proposal is unsupported and contrary to language in its own SGAT.  
14 Qwest’s language would potentially create discriminatory rate application terms  
15 for Eschelon than exist for the rest of the carriers in the state of Oregon. Qwest’s  
16 language should be rejected and Eschelon’s proposal #2, which mirrors the  
17 SGAT, or proposal #1, which attempts to clarify the current rate application,  
18 should be adopted.

---

<sup>135</sup> See Qwest’s position in the Issues Matrix (10/10/06), issue 9-51, p. 117.

1 **SUBJECT MATTER NO. 23. DIFFERENT UNE COMBINATIONS**

2 **Issue Nos. 9-54 and 9-54(a): ICA Sections 9.23.2 (1 of 2 issues) and 9.23.5.1.3**

3 **Q. DID ANY PART OF THE LANGUAGE IN ISSUE NO. 9-54 AND 9-54(a)**  
4 **CLOSE SINCE THE PETITION FOR ARBITRATION WAS FILED IN**  
5 **THIS CASE?**

6 A. Yes. The language below has closed, except the underlined phrase (“and Loop  
7 Mux Combinations”). The underlined language remains in dispute and is  
8 discussed in the testimony of Mr. Starkey (Eschelon/1) as part of Subject Matter  
9 No. 27 (Multiplexing (Loop-Mux Combinations)); Issue No. 9-61 and 9-61(a)-(c).

10 **Issue 9-54**

11 9.23.2 UNE Combinations are available in, but not limited to, the  
12 following products: EELs (subject to the limitations set forth  
13 below) and Loop Mux Combinations. If CLEC desires access to a  
14 different UNE Combination, CLEC may request access through  
15 the Special Request Process set forth in this Agreement. Qwest  
16 will provision UNE combinations pursuant to the terms of this  
17 Agreement without requiring an amendment to this Agreement,  
18 provided that all UNEs making up the UNE Combination are  
19 contained in this Agreement. If Qwest develops additional UNE  
20 Combination products, CLEC can order such products without  
21 using the Special Request Process, but CLEC may need to submit a  
22 questionnaire pursuant to Section 3.2.2.

23  
24 **Issue 9-54(a)**

25 9.23.5.1.3 If CLEC elects to use the SR process to obtain access to  
26 a different UNE Combination, the recurring rates for the UNE  
27 Combination will be no greater than the total of the recurring rates  
28 in Exhibit A in that combination, unless Qwest negotiates with  
29 CLEC that the particular SR request would require different  
30 recurring rates. Any disputes regarding different rates other than  
31 in Exhibit A would follow the dispute resolution process outlined  
32 in Section 5.18. While any such rate dispute is pending, Qwest  
33 shall make the different UNE Combination available at recurring  
34 rates for the UNE Combination that are no greater than the total of

1 the recurring rates in Exhibit A in that combination, and those  
2 recurring rates will be Interim Rates.

3 **SUBJECT MATTER NO. 25. SERVICE ELIGIBILITY CRITERIA**

4 **Issue Nos. 9-56 and 9-56(a): ICA Sections 9.23.4.3.1.1 and 9.23.4.3.1.1.1**

5 **Q. PLEASE DESCRIBE THE BUSINESS NEED RELATED TO SERVICE**  
6 **ELIGIBILITY CRITERIA.**

7 A. Qwest is required by the FCC to have cause before conducting an audit regarding  
8 CLEC compliance with service eligibility requirements. Eschelon's proposed  
9 language memorializes this requirement and requires Qwest to provide  
10 information to Eschelon that Qwest used to support its cause for review. Service  
11 eligibility audits impose a burden and cost upon Eschelon and because Qwest is  
12 required to have cause for such an audit, Qwest should also be required to provide  
13 the rationale supporting its request for an audit. Besides being consistent with the  
14 requirement that Qwest have cause before conducting on audit, providing this  
15 information is likely to facilitate resolution of any disputes.

16 **Q. WHAT IS ESCHELON'S PROPOSAL TO ADDRESS THIS ISSUE?**

17 A. Eschelon proposes the following language:

18 **Issue No. 9-56: Service Eligibility Audits**

19 9.23.4.3.1.1 After CLEC has obtained High Capacity EELs in  
20 accordance with ICA Section 9.23.4.1.2, Qwest may conduct a  
21 Service Eligibility Audit to ascertain whether those High Capacity  
22 EELs comply with the Service Eligibility Criteria set forth in ICA  
23 Section 9.23.4.1.2., when Qwest has a concern that CLEC has not  
24 met the Service Eligibility Criteria.

25 **Issue No. 9-56(a): Service Eligibility Audits**

1                   9.23.4.3.1.1.1.1 The written notice shall include the cause  
2                   upon which Qwest has a concern that CLEC has not met  
3                   the Service Eligibility Criteria. Upon request, Qwest shall  
4                   provide to CLEC a list of circuits that Qwest has identified  
5                   as of that date, if any, for which Qwest alleges non-  
6                   compliance or which otherwise supports Qwest’s concern.

7   **Q.     WHAT IS QWEST’S PROPOSAL ON THIS ISSUE?**

8   A.     Qwest proposes that Eschelon’s language be deleted for both 9.23.4.3.1.1 and  
9           9.23.4.3.1.1.1.1.

10   **Q.     WHY IS ESCHELON’S LANGUAGE NECESSARY?**

11   A.     Eschelon’s language is necessary in order to ensure that Qwest has a reasonable  
12           basis for requesting an audit and to potentially give Eschelon a chance to resolve  
13           any issues before an audit is conducted, avoiding the necessity of an audit.  
14           Consistent with the FCC requirement, Eschelon’s proposal would allow Qwest to  
15           perform an audit per the ICA terms when Qwest has a concern that Eschelon has  
16           not met the Service Eligibility Criteria. Eschelon’s proposal would require Qwest  
17           to disclose the reasons for its concern. Qwest has rejected this very modest  
18           provision, in effect insisting that it should be able to conduct an audit without  
19           cause. The FCC held, however, that:

20                   ...audits will not be routine practice, but will **only** be undertaken  
21                   when the incumbent LEC has a concern that a requesting carrier  
22                   has not met the criteria for providing a significant amount of local  
23                   exchange service.<sup>136</sup> (emphasis added)

---

<sup>136</sup> TRO at ¶ 621, citing *Implementation of the Local Competition Provisions of the Telecommunications Act of 1996*, CC Docket No. 96-98, Supplemental Order Clarification (2000), at ¶¶ 28-33, *aff’d sub nom. CompTel v. FCC*, 309 F.3d 3 (D.C. Cir. 2002).

1 Before Eschelon is put to the work that an audit necessarily entails, Qwest should  
2 be required to have at least some reason to believe that there may be  
3 noncompliance that will be uncovered by an audit. Otherwise, the audit process  
4 becomes not a reasonable measure for assuring compliance, but rather, the very  
5 sort of “routine practice” that the FCC precluded.

6 **Q. DOES THE FCC REQUIRE QWEST TO PROVIDE ANY INFORMATION**  
7 **TO ESCHELON AS A CONDITION OF AN AUDIT?**

8 A. The FCC in the *TRO*, determined that the states are in a better position to address  
9 implementation of the audit provisions.<sup>137</sup> Eschelon’s proposal is precisely the  
10 sort of implementation issue that the FCC left to the states to determine.

11 Eschelon’s language would require Qwest to describe its concern regarding  
12 Eschelon’s compliance with the Service Eligibility Criteria, as discussed above,  
13 and to identify any non-complying circuits that it has identified. Eschelon’s  
14 proposal would require Qwest to provide information that may allow Eschelon to  
15 respond to Qwest’s articulated concerns and further early resolution, thereby  
16 avoiding the possibility of a costly audit, or a dispute ending up in front of the  
17 Commission.

18 Eschelon’s notice proposal is not burdensome. It does not require Qwest to  
19 provide information that it does not already have. Qwest knows the reason for its  
20 concern and must merely state it. In addition, the language states only that Qwest

---

<sup>137</sup> *TRO* at ¶ 625.

1 will provide, upon request, a list of allegedly non-complying circuits “if any” only  
2 if Qwest has identified such circuits “as of that date.” If Qwest has a list of non-  
3 complying circuits, there is no reason for it to not provide that information to  
4 further root cause analysis and allow CLEC to respond fully. If Qwest does not  
5 have such a list, the language places no burden on Qwest to create one.

6 **Q. PLEASE SUMMARIZE THIS ISSUE.**

7 A. Qwest is required by the FCC to have cause before conducting an audit regarding  
8 CLEC compliance with service eligibility requirements. Eschelon’s proposed  
9 language memorializes this requirement and requires Qwest to provide  
10 information to Eschelon that Qwest used to support its cause for review. As a  
11 result, Eschelon’s language should be adopted.

12 **SUBJECT MATTER NO. 26. COMMINGLED EELS/ARRANGEMENTS**

13 *Issue Nos. 9-58, 9-58(a), 9-58(b), 9-58(d), 9-58(e) and 9-59: ICA Sections*  
14 *9.23.4.5.1, 9.23.4.5.1.1, 9.23.4.5.4, 9.23.4.6.6 (and subparts), 9.1.1.1.1,*  
15 *9.1.1.1.1.2, and 9.23.4.7*

16 **Q. WHAT IS A LOOP-TRANSPORT COMBINATION AND WHAT IS THE**  
17 **BUSINESS NEED RELATED TO LOOP-TRANSPORT COMBINATIONS**  
18 **AND COMMINGLED EELS/ARRANGEMENTS.**

19 A. A Loop-Transport Combination is a combination of a loop and dedicated  
20 transport.<sup>138</sup> The term “Loop-Transport Combination” is an umbrella term to  
21 cover both UNE EELs and Commingled EELs, since both are functionally the

---

<sup>138</sup> TRO at ¶575 and ¶583.

1 same. Eschelon may purchase commingled EELs in situations where UNE EELs  
2 are not available.<sup>139</sup>

3 The intent of Eschelon's proposed language is to ensure that point-to-point<sup>140</sup>  
4 Commingled EELs are a useful offering and a meaningful alternative to the point-  
5 to-point UNE EEL product it is replacing. Because a Commingled EEL is  
6 functionally equivalent to a UNE EEL, a Commingled EEL should be put  
7 together (ordering, tracking, repair and billing) in a manner similar to a UNE  
8 EEL. Further, Qwest should not be able to alter the terms of the UNE portion of a  
9 commingled EEL simply because the UNE is commingled.

10 Qwest 's proposal would make Commingled EELs difficult to use by requiring  
11 separate orders, separate circuit IDs and separate bills for each component of the  
12 commingled arrangement. Qwest's proposals would extend the installation time  
13 for commingled EELs, lengthen the time and cost for installation and repair, and  
14 make bill verification more difficult than with point-to-point UNE EELs or end-  
15 to-end special access.

16 **Q. WHAT ARE ESCHELON'S PROPOSALS TO ADDRESS THESE ISSUES?**

---

<sup>139</sup> A UNE EEL may not be available because one of the components of this EEL has been classified as "non-impaired." When a component of a UNE EEL is not available, Eschelon is able to order a Commingled EEL, which replaces the "non-impaired" UNE component of the UNE EEL with another Qwest wholesale product, such as private lines. For example, if DS1 UNE transport between two offices is no longer available due to a finding of "non-impairment," then Eschelon can replace the UNE transport with private line transport. The UNE Loop / Private Line Transport combination is an example of a Commingled EEL.

<sup>140</sup> Point-to-point refers to the case where the loop and transport component of the loop transport combination is of the same bandwidth. See ICA closed language section 9.23.4.4.

1 A. Eschelon’s proposals are simple, as these proposals align the ordering, tracking,  
2 repair and billing provisions of a point-to-point UNE EEL or point-to-point  
3 Special Access circuit with a point-to-point Commingled EEL. As is explained in  
4 more detail below, a lack of alignment diminishes the usefulness of a  
5 Commingled EEL compared to the UNE EEL, by extending the provisioning and  
6 repair timeframes and making tracking of the circuit difficult.

7 **Issue No. 9-58: Ordering for Commingled Arrangements**

8 9.23.4.5.1 CLEC will submit orders for Loop Transport EELs  
9 Combinations using the LSR process. Submission of LSRs is  
10 described in ICA Section 12.

11 9.23.4.5.1.1 If any component of the Loop-Transport  
12 Combination is not a UNE (i.e., not a component to which  
13 UNE pricing applies), CLEC will indicate on the LSR that  
14 the component is not a UNE (e.g., CLEC is ordering the  
15 component as an alternate service such as special access).  
16 CLEC will indicate this information in the Remarks section  
17 of the LSR, unless the Parties agree otherwise.

18 9.23.4.5.4 One (1) LSR is required when CLEC orders  
19 Point-to-Point EELs, and Point-to-Point Commingled  
20 EELs. . . .

21 This language makes it clear that only a single order is required for point-to-point  
22 Commingled EELS.

23 **Issue No. 9-58(a): Circuit ID for Commingled Arrangements**<sup>141</sup>

24 9.23.4.5.4 One (1) LSR is required when CLEC orders Point-to-  
25 Point EELs—,and Point-to-Point Commingled EELs. For such  
26 Point-to-Point Loop-Transport Combinations, Qwest will assign a  
27 single circuit identification (ID) number for such combination.

---

<sup>141</sup> Note the first part of ICA Section 9.23.4.5.4 is part of issue 9-58.

1 Qwest may require two (2) service requests when CLEC orders  
2 Multiplexed ~~EELs~~ Loop-Transport Combinations (which are not  
3 Point-to-Point) and EEL loops (as part of a multiplexed EEL).  
4 Regarding Commingling see ICA Section 24. (Emphasis added).

5 This language makes it clear that a single circuit ID will be used for point-to-point  
6 Commingled EELs.<sup>142</sup> Eschelon also offers, in the alternative, if the remainder of  
7 this language is adopted, to replace “LSR” with “service request” in issues 9-58  
8 and 9-58(a).

9 **Issue No. 9-58(b): Billing for Commingled Arrangements**

10 9.23.4.6.6 For each Point-to-Point Loop-Transport Combination  
11 (see ICA Section 9.23.4.5.4), all chargeable rate elements for such  
12 combination will appear on the same Billing Account Number  
13 (BAN).

14 This language makes it clear that chargeable elements of a point-to-point  
15 Commingled EEL will appear on the same BAN.

16 In the event that the Commission accepts Qwest’s position on 9.23.4.6.6 in Issue  
17 No. 9-58(b) above, Eschelon proposes the following alternative language:

18 **Issue No. 9-58(c): Billing for Commingled Arrangements –**  
19 **Alternative Proposal**

20 9.23.4.6.6 For each Point-to-Point Commingled EEL (see Section  
21 9.23.4.5.4), so long as Qwest does not provide all chargeable rate  
22 elements for such EEL on the same Billing Account Number  
23 (BAN), Qwest will identify and relate the components of the  
24 Commingled EEL on the bills and the Customer Service Records.  
25 Unless the Parties agree in writing upon a different method(s),

---

<sup>142</sup> For Eschelon’s alternative proposal (if single circuit ID is rejected), see Issue No. 9-59 for ICA Section 9.23.4.7 in subpart below.

1 Qwest will relate the components of the Commingled EEL by  
2 taking at least the following steps:

3 9.23.4.6.6.1 Qwest will provide, on each Connectivity Bill  
4 each month, the circuit identification (“circuit ID”) for the  
5 non-UNE component of the Commingled EEL in the sub-  
6 account for the related UNE component of that  
7 Commingled EEL;

8 9.23.4.6.6.2 Qwest will assign a separate account type to  
9 Commingled EELs so that Commingled EELs appear on an  
10 account separate from other services (such as special  
11 access/private line);

12 9.23.4.6.6.3 Each month, Qwest will provide the summary  
13 BAN and sub-account number for the UNE component of  
14 the Commingled EEL in a field (e.g., the Reference Billing  
15 Account Number, or RBAN, field) of the bill for the non-  
16 UNE component; and

17 9.23.4.6.6.4 For each Commingled EEL, Qwest will  
18 provide on all associated Customer Service Records the  
19 circuit ID for the UNE component; the RBAN for the non-  
20 UNE component; and the circuit ID for the non-UNE  
21 component.

22 The proposal above simple provides that if Qwest is not required to provide  
23 chargeable elements of a point-to-point Commingled EEL on a single BAN, then  
24 these elements should at least be related.

25 **Issue No. 9-58(d): Other Commingled Arrangements**

26 9.1.1.1.1 Commingled EELs are addressed in Section 9.23. For  
27 any other Commingled arrangement, the following terms apply, in  
28 addition to the general terms described in Section 24:

29 9.1.1.1.1.2 When a UNE or UNE Combination is  
30 connected or attached with a non-UNE wholesale service,  
31 unless it is not Technically Feasible or the Parties agree  
32 otherwise, CLEC may order the arrangement on a single  
33 service request; if a circuit ID is required, there will be a  
34 single circuit ID; and all chargeable rate elements for the

1                   Commingled service will appear on the same BAN. If  
2                   ordering on a single service request, using a single  
3                   identifier, and including all chargeable rate elements on the  
4                   same BAN is not Technically Feasible, Qwest will identify  
5                   and relate the elements of the arrangement on the bill and  
6                   include in the Customer Service Record for each  
7                   component a cross reference to the other component, with  
8                   its billing number, unless the Parties agree otherwise.

9                   The provisions above require the option of a single order, single Circuit ID and  
10                  single BAN treatment for commingled arrangements other than EELs.

11                  **Issue No. 9-58(e): Interval for Commingled Arrangements**

12                  9.23.4.4.3.1 When any component of the Loop-Transport  
13                  Combination is not a UNE, the service interval for the combination  
14                  will be the longer interval of the two facilities being Commingled.  
15                  See Section 24.1.2.1.

16                  24.3.2 See Section 9.23.4.4.3.1 regarding intervals for  
17                  Commingled EELs.

18                  ~~24.3.2 The service interval for Commingled EELs will be as~~  
19                  ~~follows. For the UNE component of the EEL see Exhibit C. For~~  
20                  ~~the tariffed component of the EEL see the applicable Tariff.~~

21                  9.1.1.1.1 Commingled EELs are addressed in Section 9.23. For  
22                  any other Commingled arrangement, the following terms apply, in  
23                  addition to the general terms described in Section 24:

24                  9.1.1.1.1.1 When a UNE and another service are  
25                  Commingled, the service interval for the Commingled  
26                  arrangement will be the longer interval of the two facilities  
27                  being Commingled.

28                  The provisions above logically require that when ordering a Commingled EEL the  
29                  total service interval will be no longer than the component with the longest  
30                  interval.

1 In the event that the Commission accepts Qwest’s position for 9-58(a), Eschelon  
2 proposes the following language:

3 **Issue No. 9-59: Circuit ID – Alternate Proposal**

4 9.23.4.7 Maintenance and Repair for UNE Component of Point-  
5 to-Point Commingled EELs

6 9.23.4.7.1 When CLEC reports a trouble through any of  
7 the means described in Section 12.4.2.2, so long as Qwest  
8 provides more than one circuit ID per Commingled EEL,  
9 CLEC may provide all circuit IDs associated with the  
10 Commingled EEL in a single trouble report (i.e., Qwest  
11 shall not require CLEC to submit separate and/or  
12 consecutive trouble reports for the different circuit IDs  
13 associated with the single Commingled EEL). If CLEC is  
14 using CEMR to submit the trouble report, for example,  
15 CLEC may report one circuit ID and include the other  
16 circuit ID in the remarks section (unless the Parties agree to  
17 a different method). Qwest will communicate a single  
18 trouble report tracking number (i.e., the “ticket” number)  
19 (described in Section 12.1.3.3.3.1.1) for the Commingled  
20 EEL to CLEC at the time the trouble is reported.

21 9.23.4.7.1.1 If any circuit ID is missing from any  
22 Customer Service Record associated with the  
23 Commingled EEL, Qwest will provide the circuit  
24 ID information to CLEC at the time CLEC submits  
25 the trouble report.

26 9.23.4.7.1.2 Qwest may charge a single Maintenance of  
27 Service or Trouble Isolation Charge (referred to as “No  
28 Trouble Found” charge in some cases) only if Qwest  
29 dispatches and no trouble is found on both circuits  
30 associated with the Commingled EEL. If CLEC may  
31 charge Qwest pursuant to Section 12.4.1.8, CLEC may also  
32 charge only a single charge for both circuits associated with  
33 the Commingled EEL.

34 This provision simply requires that Qwest treat a point-to-point Commingled EEL  
35 as a single circuit for the purpose of maintenance and repair.

1 Q. WHAT ARE QWEST'S PROPOSAL ON THESE ISSUES?

2 A. Qwest proposes the following language:

3 **Issue No. 9-58: Ordering for Commingled Arrangements**

4 9.23.4.5.1 CLEC will submit orders for ~~Loop Transport EELs~~  
5 ~~Combinations~~ using the LSR process. Submission of LSRs is  
6 described in Section 12.

7 ~~9.23.4.5.1.1 If any component of the Loop Transport~~  
8 ~~Combination is not a UNE (i.e., not a component to which UNE~~  
9 ~~pricing applies), CLEC will indicate on the LSR that the~~  
10 ~~component is not a UNE (e.g., CLEC is ordering the component as~~  
11 ~~an alternate service such as special access). CLEC will indicate~~  
12 ~~this information in the Remarks section of the LSR, unless the~~  
13 ~~Parties agree otherwise.~~

14 9.23.4.5.4 One (1) LSR is required when CLEC orders Point-to-  
15 Point EELs ~~and Point-to-Point Commingled EELs.~~

16 **Issue No. 9-58(a): Circuit ID for Commingled Arrangements**

17 9.23.4.5.4 One (1) LSR is required when CLEC orders Point-to-  
18 Point EELs. ~~and Point to Point Commingled EELs. For such~~  
19 ~~Point to Point Loop Transport Combinations, Qwest will assign a~~  
20 ~~single circuit identification (ID) number for such combination.~~  
21 Qwest may require two (2) service requests when CLEC orders  
22 Multiplexed ~~EELs Loop Transport Combinations~~ (which are not  
23 Point-to-Point) and EEL loops (as part of a multiplexed EEL).  
24 Regarding Commingling see ICA Section 24.

25 **Issue No. 9-58(b): Billing for Commingled Arrangements**

26 9.23.4.6.6 For Commingling see Section 24.

27 Qwest rejects Eschelon's alternative language to 9-58(b), contained in Issue No.

28 9-58(c).

29 **Issue No. 9-58(d): Other Commingled Arrangements**

30 Qwest proposes deletion of Eschelon's language.

1           **Issue No. 9-58(e): Interval for Commingled Arrangements**

2                           ~~9.23.4.4.3.1~~ When any component of the Loop Transport  
3                           Combination is not a UNE, the service interval for the combination  
4                           will be the longer interval of the two facilities being Commingled.  
5                           See Section 24.1.2.1.

6                           24.3.2 The service interval for Commingled EELs will be as  
7                           follows. For the UNE component of the EEL see Exhibit C. For  
8                           the tariffed component of the EEL see the applicable Tariff.

9                           ~~9.1.1.1.1~~ Commingled EELs are addressed in Section 9.23. For  
10                           any other Commingled arrangement, the following terms apply, in  
11                           addition to the general terms described in Section 24:

12   ~~9.1.1.1.1.1~~ When a UNE and another service are  
13   Commingled, the service interval for the Commingled  
14   arrangement will be the longer interval of the two facilities  
15   being Commingled.

16           **Issue No. 9-59: Circuit ID – Alternative Proposal**

17                           9.23.4.7 Maintenance and Repair for UNE Component of ~~Point to~~  
18                           Point Commingled EELs

19   9.23.4.7.1 When CLEC reports a trouble through any of  
20   the means described in Section 12.4.2.2, ~~so long as Qwest~~  
21   ~~provides more than one circuit ID per Commingled EEL,~~  
22   CLEC may provide ~~all~~ both circuit IDs associated with the  
23   Commingled EEL in a single trouble report. ~~(i.e., Qwest~~  
24   ~~shall not require CLEC to submit separate and/or~~  
25   ~~consecutive trouble reports for the different circuit IDs~~  
26   ~~associated with the single Commingled EEL).~~ If CLEC is  
27   using CEMR to submit the trouble report, for example, the  
28   CLEC ~~may~~ will first report one circuit ID (the circuit it  
29   believes has the trouble) and include the other circuit ID in  
30   the remarks section ~~(unless the Parties agree to a different~~  
31   ~~method).~~ ~~Qwest will communicate a single trouble report~~  
32   ~~tracking number (i.e., the “ticket” number) (described in~~  
33   ~~Section 12.1.3.3.3.1.1) for the Commingled EEL to CLEC~~  
34   ~~at the time the trouble is reported. Should a second repair~~  
35   ~~ticket be required for the circuit in the remarks section,~~  
36   Qwest will contact CLEC, and they will mutually agree  
37   who will open the second repair ticket.

1                   9.23.4.7.1.1 ~~Intentionally Left Blank. If any circuit~~  
2                   ~~ID is missing from any Customer Service Record~~  
3                   ~~associated with the Commingled EEL, Qwest will~~  
4                   ~~provide the circuit ID information to CLEC at the~~  
5                   ~~time CLEC submits the trouble report.~~

6                   9.23.4.7.1.2       Qwest may charge a single  
7                   Maintenance of Service or Trouble Isolation Charge  
8                   ~~(sometimes referred to as “No Trouble Found”~~  
9                   ~~charge) only if Qwest dispatches and no trouble is~~  
10                  found on either both circuits associated with the  
11                  Commingled EEL. ~~If CLEC may charge Qwest~~  
12                  ~~pursuant to Section 12.4.1.8, CLEC may also~~  
13                  ~~charge only a single charge for both circuits~~  
14                  ~~associated with the Commingled EEL.~~

15       **Q.     WHAT IS A UNE EEL AND HOW IS A COMMINGLED EEL**  
16       **DIFFERENT FROM A UNE EEL?**

17       A.     An EEL is a type of Loop-Transport Combinations where both components of the  
18              Combination are unbundled network elements. A Commingled EEL is identical  
19              to the EEL in function, except one component of the Loop-Transport  
20              Combination is not a UNE.<sup>143</sup> Loop-Transport Combinations promote  
21              competition by giving CLECs access to end user customers in wire centers where  
22              the CLEC is not collocated.<sup>144</sup> In other words, the Loop-Transport Combination  
23              extends the loop from the end user’s location to a wire center where the CLEC is  
24              collocated. The diagram below shows a picture of a Point-To-Point EEL. Point-  
25              To-Point simply refers to the fact that the loop and transport are of the same  
26              bandwidth, in other words no multiplexing is involved.

---

<sup>143</sup> As is explained below, it is the price that is different between a UNE EEL and a Commingled EEL.

<sup>144</sup> TRO at ¶576.

### Point-To-Point EEL with Collocation

1

2 Source: Qwest TRRO/OFO Enhanced Extended Loop (EEL) PCAT -  
3 <http://www.qwest.com/wholesale/pcat/trroeel.html>

4 The picture for a Point-To-Point Commingled EEL, would be identical to the  
5 picture above, except that the label, not the facilities, for “EEL Transport” or  
6 “EEL Loop” would be replaced with non-UNE label, such as “Private Line  
7 Transport” or “Channel Termination.”

8 **Q. WHY IS ESCHELON’S LANGUAGE NECESSARY?**

9 A. In several provisions of the ICA, Eschelon proposes the use of a single order,  
10 single circuit ID, and single bill for Point-To-Point Commingled EELs, just as  
11 Qwest provides for a single order, single circuit ID, and single bill for Point-To-  
12 Point UNE EELs today. A Commingled EEL is nothing more than a change in  
13 name and price to the UNE EEL it is replacing. As such, it is a network facility

1 that Qwest has already been provisioning, maintaining and repairing. Except for  
2 the price there is absolutely nothing new about a Commingled EEL from a  
3 technical, network, provisioning or maintenance standpoint. Therefore, the terms  
4 based upon well-established history proposed by Eschelon should be acceptable to  
5 Qwest.

6 A single order is required for a Point-To-Point EEL. Point-to-Point EEL requests  
7 are issued using a Common Language Circuit ID, which is identified on the  
8 customer service record (CSR) as CLS. With respect to repair, CLECs submit a  
9 single trouble report for a Point-To-Point EEL.<sup>145</sup> Qwest also provides trouble  
10 isolation and testing as a joint process for Point-To-Point EELs.<sup>146</sup> EELs are  
11 billed on a single Customer Records and Information System (CRIS) summary  
12 bill. Thus, Eschelon is able to place a single order, receive a single bill, track the  
13 EEL using a single Circuit ID, and issue a single repair ticket for EELs.

14 There is no functional difference between a UNE EEL and a Commingled EELs -  
15 the facilities are the same; the function is the same; and the end-user experience is  
16 the same for both a UNE EEL and a Commingled EEL. However, Qwest is  
17 attempting to create differences by treating the two pieces of a Commingled EEL  
18 separately, rather than together as Qwest treats an EEL. Qwest wants CLECs to  
19 order the two components of a Commingled EELs using two separate orders;

---

<sup>145</sup> Qwest Wholesale Website, Maintenance and Repair Overview - V64.0,  
<http://www.qwest.com/wholesale/clecs/maintenance.html>

<sup>146</sup> Qwest Wholesale Website, Maintenance and Repair Overview - V64.0,  
<http://www.qwest.com/wholesale/clecs/maintenance.html>

1 Qwest wants to bill CLECs two separate bills; Qwest wants to assign two separate  
2 Circuit IDs to the Commingled circuit which adds to the complexity of tracking  
3 the Commingled EEL and would require CLECs to issue separate repair ticket for  
4 combined components of the Commingled EEL.

5 A CLEC would purchase a Commingled EEL in a situation where a UNE EEL is  
6 not available. UNE EELs availability can be limited due to limits placed upon the  
7 availability of high capacity unbundled loops and transport in and between certain  
8 wire centers. The CLEC could build a collocation eliminating the need for the  
9 loop-transport combination. However, collocations are capital intensive and time  
10 consuming. For example, the direct cost charged by Qwest to Eschelon for a new  
11 collocation (space, power, APOT) is approximately \$40,000. In addition to this  
12 cost, the CLEC must place equipment in the collocation space. Without Loop-  
13 Transport combinations, such as Commingled EELs, CLECs might have to  
14 abandon the particular market where UNE EELs are not available.

15 By complicating the ordering, maintenance, and billing processes for  
16 Commingled EELs, Qwest makes this commingled arrangement less useful and  
17 raises Eschelon's cost by either 1) imposing onerous and inefficient processes for  
18 the purchase and use of a Commingled EEL or 2) making the use of loop  
19 transport combination so difficult that the only alternative is to exit (cease to offer  
20 products using this combination) from the market or purchase the arrangement at  
21 a yet higher price, solely from Qwest's special access tariff. Qwest's proposed

1 language diminishes Eschelon's ability to compete effectively against Qwest,  
2 because the language prevents Eschelon from:

- 3 1) ordering a Commingled EEL on a single order;
- 4 2) receiving a Commingled EEL identified by a single circuit ID; and
- 5 3) being billed for a Commingled EEL on a single bill.

6 **Q. WHY DOESN'T ESCHELON SIMPLY PURCHASE END-TO-END**  
7 **SPECIAL ACCESS CIRCUITS FROM QWEST INSTEAD OF**  
8 **COMMINGLED EELS?**

9 A. The FCC has upheld a CLECs right to purchase UNE combinations, including  
10 Commingled EELs. Eschelon should not be forced to migrate to yet a higher  
11 priced alternative because Qwest prefers not to provide Commingled EELs on  
12 reasonable terms and conditions. UNE EELs, Commingled EELs and end-to-end  
13 Special Access circuits are all functionally identical. The difference between  
14 them is their price. The table below compares the wholesale cost of a DS1 UNE  
15 EEL, a DS1 Commingled EEL and a DS1 end-to-end special access arrangement.

Loop-Transport Combinations / Special Access Price Comparison Oregon (DS1)				
	UNE EEL	Commingled EEL		Special Access
	UNE Loop / UNE Xport	SA Loop / UNE Xport	UNE Loop / SA Xport	SA Loop / SA Xport
Loop (Zone 1) / Channel Term	\$ 87.37	\$ 165.00	\$ 87.37	\$ 165.00
ITP	\$ 6.05	\$ 6.05	\$ 6.05	\$ 10.00
Transport (10 miles)	\$ 46.44	\$ 46.44	\$ 252.00	\$ 252.00
<b>Total</b>	<b>\$ 139.86</b>	<b>\$ 217.49</b>	<b>\$ 345.42</b>	<b>\$ 427.00</b>
<b>Sources</b>				
UNE Rate Sources: Exhibit A - Loop 9.2.3.3, ITP 9.1.2, Xport 9.6.2.2				
SA Rate Sources: FCC Tariff #1 - Channel Termination (Loop) and Xport, 17.2.11, ITP 7.11.4.				

The first comparison is for a UNE EEL and shows the cost of a DS1 UNE Loop and DS1 UNE transport. The second and third cases show Commingled EELs. The second is a DS1 Channel Termination combined with a DS1 UNE Transport and the third is a DS1 loop combined with a DS1 special access transport circuit. The final case shows an end-to-end special access circuit using a DS1 channel termination and DS1 special access dedicated transport.

**Q. WILL ESCHELON’S PROPOSAL CAUSE QWEST TO INCUR SIGNIFICANT COSTS?**

A. No, Eschelon is not asking Qwest to modify systems and incur costs, but simply treat point-to-point commingled EELs as point-to-point UNE EELs and end-to-end special access circuits are treated today. Qwest is attempting to turn what is essentially a price change into something much more – an unusable alternative. With respect to ordering, Qwest claims that Eschelon’s proposal is “unique” and that Eschelon’s proposal would impose upon Qwest costly systems and

1 processing changes.<sup>147</sup> Eschelon's proposal is not unique because Eschelon is not  
2 proposing a change from Qwest's current process which uses a single order,  
3 single circuit ID, and single bill for Eschelon's Point-To-Point EELs. Eschelon is  
4 merely proposing to treat EELs in a similar manner, as they have been in the past.  
5 In fact, for Eschelon's embedded base of EELs, those circuits are billed on the  
6 same bill and have a single circuit ID, and were originally ordered on a single  
7 order.

8 **Issue No. 9-58: ICA Sections 9.23.4.5.1, 9.23.4.5.1.1; 9.23.4.5.4 - Ordering,**  
9 **Billing, and Circuit ID for Commingled Arrangements – ORDERING**

10 **Q. WHAT IS THE SPECIFIC BUSINESS NEED INVOLVED IN ISSUE NO. 9-**  
11 **58 – ORDERING, BILLING AND CIRCUIT ID FOR COMMINGLED**  
12 **ARRANGEMENTS?**

13 A. Under Qwest's proposed ordering process, Eschelon must submit separate orders  
14 for the UNE and non-UNE components of Commingled EELs. The problem with  
15 the separate ordering process is that once Eschelon receives the FOC for the UNE  
16 segment, only then may Eschelon submit an ASR for the non-UNE component.  
17 Using a DS1 UNE loop and PLT transport as an example, there are at least two  
18 problems with this process: (1) there is a time delay since Qwest can take up to  
19 72 hours to return a FOC for a DS1 UNE loop ; and (2) receipt of a FOC is no  
20 guarantee that the UNE facility will actually be delivered on the due date.

---

<sup>147</sup> Qwest Response, p. 35.

1 Because the EEL circuit is incomplete without the loop facility, completion of the  
2 PLT transport order without the loop is of no use to Eschelon or its customer. In  
3 that case there is no complete functioning circuit, because the UNE and non-UNE  
4 segments are provisioned using a separate orders. If one segment goes held  
5 because of lack of facilities, Eschelon may end up paying recurring charges for a  
6 partial circuit, even though Eschelon's end-user is not yet receiving service and  
7 Eschelon is not able to commence billing to its end-user. The customer thus has  
8 no service, and there may be no specified time by which it will have service, and  
9 all the while Eschelon is paying for a partial circuit which is of no use to Eschelon  
10 or its customer.

11 **Q. HOW DOES ESCHELON'S PROPOSED LANGUAGE FOR ISSUE NO. 9-**  
12 **58, ICA SECTIONS 9.23.4.5.1; 9.23.4.5.1.1; AND 9.23.4.5.4 ADDRESS**  
13 **THESE ISSUES?**

14 A. Eschelon proposes language in ICA Section 9.23.4.5.1 and its subpart  
15 9.23.4.5.1.1, and ICA Section 9.23.4.5.4 that provides for ordering Commingled  
16 EELs on a single LSR. In ICA Section 9.23.4.5.1, Eschelon proposes use of the  
17 term "Loop Transport Combination" which would include Commingled EELs as  
18 being ordered through the LSR process. ICA Section 9.23.4.5.1.1 is a new  
19 subpart proposed by Eschelon that specifies how non-UNE components (e.g.,  
20 special access) would be specified on the LSR. Eschelon is proposing that for  
21 non-UNE components, Eschelon would use the Remarks section of the LSR to  
22 indicate that non-UNE components are included in the LSR. In ICA Section

1 9.23.4.5.4, Eschelon proposes adding the language “Point-to-Point Commingled  
2 EELs” to clarify that Commingled EELs are ordered using one (1) LSR. Eschelon  
3 proposes alternate language below in Issue No. 9-59 if Qwest’s position is  
4 adopted for ICA Section 9.23.4.5.4.

5 **Issue No. 9-58 (a): ICA Sections - 9.23.4.5.4 - Ordering, Billing, and Circuit ID**  
6 **for Commingled Arrangements – CIRCUIT ID [2 of 2 issues in ICA Section**  
7 **9.23.4.5.4; For 1st issue (terminology), see Issue No. 9-58 above]**

8 **Q. WHAT IS THE SPECIFIC BUSINESS NEED IN 9-58(A) RELATED TO**  
9 **SINGLE CIRCUIT ID?**

10 A. Qwest assigns a single circuit ID to a UNE EEL and provides it to the ordering  
11 CLEC for tracking purposes. For Commingled EELs, Qwest proposes to assign  
12 two circuit IDs (one to the UNE and another to the non-UNE). Qwest makes this  
13 proposal even in the case where a UNE EEL is being converted to a Commingled  
14 EEL – in other words, the arrangement started with a single circuit ID and Qwest  
15 is proposing to break them apart.

16 The linchpin of effective EEL facility management is the use of a single circuit ID  
17 to cover all segments of the facility. It is this single identifier that permits both  
18 Qwest and Eschelon to easily and accurately track facility inventories, order  
19 correctly, repair in the most efficient manner possible, and bill in a way that  
20 actually permits verification of bill and rate accuracy. The end result, of course,  
21 is that both companies manage what is a single facility from the end user

1 customer's perspective in the most efficient manner possible, which ensures the  
2 best possible delivery of service to a customer.

3 **Q. WHAT PROBLEMS RESULT FROM HAVING A COMMINGLED EEL**  
4 **ASSIGNED MORE THAN ONE CIRCUIT ID?**

5 A. Under Qwest's proposal, instead of installing one EEL, the parties must install  
6 two separate circuits at two different times. This leads to multiple problems,  
7 including mismatches between service delivery intervals for the separate circuits.  
8 For example, the gap in time between deliveries of the two circuits will cause a  
9 delay in Eschelon's ability to conduct full testing on the customer's entire circuit.  
10 The DS1 UNE loop interval is 9 days and the PLT transport interval is 9 days. If  
11 Qwest wants to meet the PID performance for the loop, it will deliver the loop  
12 within 9 days. Because the PLT transport piece will not be delivered until many  
13 days later, however, there is no point in Eschelon testing the loop segment  
14 because the circuit for the Commingled EEL is not complete until all segments  
15 are installed. Qwest, however, will start to bill CLEC for the loop. The loop and  
16 transport together serve the end user customer and whether that customer's  
17 service is working "end-to-end" cannot be determined until the two are connected.  
18 To make matters worse, Qwest's proposal related to intervals (as discussed in 9-  
19 58(e)) forces Eschelon to order sequentially rather than concurrently, which  
20 causes a delay. If Eschelon orders circuits concurrently, Eschelon must accept,  
21 test and turn up of the loop independently of the special access circuit. This  
22 testing process is futile because Eschelon is testing a loop not connected to the

1 customer. Thus, even if Eschelon tests and accepts the UNE loop, there is no  
2 guarantee that the entire circuit is going to work.

3 **Q. HOW DOES ESCHELON'S LANGUAGE PROPOSAL FOR ICA**  
4 **SECTIONS 9.23.4.5.1 AND SUBPARTS SOLVE THE ISSUES DESCRIBED**  
5 **ABOVE?**

6 A. Eschelon's language makes clear that a single circuit ID will be provided for  
7 Point-To-Point loop-transport combinations.

8 **Q. WILL QWEST HAVE TO MODIFY ITS INTERNAL SYSTEMS IN**  
9 **ORDER TO ASSIGN A SINGLE CIRCUIT ID TO A COMMINGLED**  
10 **EEL?**

11 A. Qwest currently provides combinations of loops and transport (EELs and special  
12 access) using a single circuit ID. The only difference that is taking place with a  
13 Commingled EEL is that the price of one of the components is changing. In most  
14 cases, the price change occurs for all loops in a wire center, or all transport  
15 facilities on a route as a result of a non-impairment finding in the wire center  
16 proceeding. The result is that in most situations, both UNEs and Special Access  
17 services will not be simultaneously available in a given wire center or along a  
18 given transport route, thus the change really is as simple as an increase in price.  
19 Qwest surely is competent at raising prices.

1 **Issue No. 9-58 (b): ICA Sections - 9.23.4.6.6 (and subparts), Ordering, Billing,**  
2 **and Circuit ID for Commingled Arrangements – BILLING**

3 **Q. WHAT IS THE SPECIFIC BUSINESS NEED RELATED TO BILLING?**

4 A. When billing Eschelon for a UNE EEL, Qwest bills the UNE EEL as a single  
5 facility on one billing account number (BAN). Bill review and reconciliation will  
6 be challenging at best, and unmanageable at worst, if Qwest implements its  
7 proposal to bill the two components of the Commingled EEL separately. In the  
8 absence of a single circuit ID or relating the segments of the Commingled EEL on  
9 the bills (as proposed by Eschelon in its alternative proposal), Eschelon will not  
10 know whether a particular UNE is a part of a Commingled EEL. Thus, Eschelon  
11 will have to review every line item on its UNE bill to attempt to determine  
12 whether that UNE is part of a Commingled EEL. Given the volume of Eschelon's  
13 UNE inventory, this kind of undertaking is simply not feasible. Similarly, while  
14 Eschelon can track loss and completion reports to ensure accurate billing for  
15 disconnected UNEs, no loss and completion reports are provided for tariffed  
16 services such as special access. Without some indication that the UNE and non-  
17 UNE segments of a Commingled EEL are related, a loop may be disconnected  
18 and Eschelon could conceivably continue to pay for the non-UNE segment for no  
19 reason at all. Thus, billing the UNE and non-UNE segments on a single bill will  
20 allow Eschelon to track these segments in tandem, which makes sense since they  
21 are combined together to make up the Commingled EEL.

22 **Q. IS PROVIDING A SINGLE BAN FOR COMMINGLED EELS COSTLY**

1           **FOR QWEST?**

2    A.    No, it should not be costly. First, Qwest currently provides a single bill for UNE  
3           EELs today. As mentioned above, the difference between a UNE EEL and a  
4           commingled EEL is the price of one of the components of the EEL. In most  
5           cases, the change in price is brought about by a change in the availability of a  
6           UNE component of the UNE EEL. This change in availability means that what  
7           was once available at a TELRIC rate is now available at an alternative, higher  
8           rate, such as special access. Qwest need only change the rate that it is charging to  
9           Eschelon. Qwest does not need to virtually separate the two components of the  
10          loop-transport combination, so that ordering, repair and billing for these  
11          components are contained in separate systems.

12           **Issue No. 9-58 (c): ICA Sections - 9.23.4.6.6 (and subparts) Ordering, Billing,**  
13           **and Circuit ID for Commingled Arrangements – BILLING - (Alternate**  
14           **proposal to 9.23.4.6.6)**

15    **Q.    IF THE COMMISSION DETERMINES THAT QWEST DOES NOT NEED**  
16           **TO PROVIDE A SINGLE BILL FOR COMMINGLED EELS, WHAT**  
17           **ALTERNATIVE DOES ESCHELON PROPOSE?**

18    A.    As discussed above in Issue No. 9-58(b), Eschelon supports a single bill for the  
19           components of a Commingled EEL. However, to the extent that the Commission  
20           adopts Qwest’s language for these provisions, the Commission should order that  
21           Eschelon’s alternative language for ICA Sections 9.23.4.6.6 (and subparts) and  
22           9.23.4.7 (and subparts) also is included in the ICA. Eschelon’s alternative

1 language only requires that Qwest relate the UNE and non-UNE segments of the  
2 Commingled EEL.

3 Eschelon's proposed language spells out the process for relating the UNE and  
4 non-UNE segments of the Commingled EEL in the billing system so Eschelon  
5 can track the individual components. A single circuit ID for the Commingled  
6 EEL facility, relating the loop and transport segments as laid out above, is the  
7 only way that Eschelon can manage the repair and billing for Commingled EELs  
8 to any customer's satisfaction. Absent an identified relationship between the  
9 UNE and non-UNE segments of the same EEL, no CLEC can feasibly use a  
10 Commingled EEL. This is not an acceptable implementation of the FCC's  
11 mandate to eliminate restrictions on commingling, and Qwest should not be  
12 permitted to so deliberately tilt the field to the advantage of its exorbitantly  
13 expensive retail products. For these reasons, Eschelon proposes this alternate  
14 language if Qwest's position on 9.23.4.6.6 is accepted in arbitration.

15 **Issue No. 9-58 (d): ICA Section 9.1.1.1.1 & 9.1.1.1.2 Ordering, Billing, and**  
16 **Circuit ID for Commingled Arrangements – OTHER ARRANGEMENTS**

17 **Q. WHAT IS THE SPECIFIC BUSINESS NEED RELATED TO ORDERING,**  
18 **BILLING, AND CIRCUIT ID FOR COMMINGLED ARRANGEMENTS –**  
19 **OTHER ARRANGEMENTS?**

20 A. The same types of problems that will occur with Commingled EELs if there is not  
21 a single LSR, single circuit ID, and single bill will arise with other Commingled  
22 arrangements as well. Therefore, these sections create a default to have a single

1 LSR, single circuit ID, and single bill, unless the Parties agree otherwise or doing  
2 so is not Technically Feasible. In the latter case, the components of the  
3 Commingled arrangement are to be related for these purposes, unless the Parties  
4 agree otherwise. Such language will help prevent Qwest from proceeding again  
5 in the unilateral manner in which Qwest approached implementing Commingled  
6 EELs and its initially password protected terms.

7 *Issue No. 9-58(e) - ICA Sections 9.23.4.4.3.1 & 24.3.2; 9.1.1.1.1 & 9.1.1.1.1.1*  
8 *INTERVAL for Commingled Arrangements*

9 **Q. WHAT IS THE SPECIFIC BUSINESS NEED RELATED TO INTERVALS**  
10 **FOR COMMINGLED ARRANGEMENTS?**

11 A. As discussed earlier, when Eschelon is forced to order the UNE and non-UNE  
12 components separately, separate service installation intervals apply.<sup>148</sup> Qwest's  
13 position is that the tariffed component and the UNE component must be installed  
14 separately from each other, and that "because each service order for each  
15 component must be complete before installation, the provisioning intervals for  
16 each component may have to be added together to determine the total time  
17 required for installation."<sup>149</sup> In other words, Qwest's position is that the intervals  
18 for the individual components must be provisioned consecutively, rather than  
19 concurrently, which has the effect of lengthening the overall interval for  
20 Commingled arrangements. This is unnecessary, as it does not work that way

---

<sup>148</sup> See discussion for Issue No. 9-58(a).

<sup>149</sup> See Issue No. 9-58(e), Qwest's position in the Issues Matrix (10/10/06), p. 144.

1 today for EELs. As discussed below, Eschelon agrees to a lengthened interval by  
2 applying the longer of the ICA and Tariff interval to the Commingled product.

3 **Q. HOW IS QWEST'S PROPOSAL DIFFERENT FROM ESCHELON'S**  
4 **PROPOSAL ON THIS ISSUE?**

5 A. On its face, Qwest's proposal appears similar. Qwest states that the UNE interval  
6 will apply to the UNE and the tariffed interval will apply to the tariffed  
7 component. When Qwest's proposal is closely scrutinized and facts outside its  
8 proposed ICA language are known, however, the proposals are very different. A  
9 key difference is that Eschelon's proposal allows the Commission to retain full  
10 jurisdiction over the UNE, whereas Qwest's proposal allows factors outside the  
11 approved ICA to change the operation of the UNE terms, in contradiction to the  
12 ICA. Qwest is attempting to limit ICA terms as they apply to UNE components  
13 of commingled arrangements by imposing terms that are outside the ICA.

14 For example, Qwest's language in ICA Section 9.23.4.5.4 appears to allow a  
15 CLEC to order a UNE loop and tariffed transport on separate service requests on  
16 the same day and then, pursuant to ICA Section 24.3.2, calculate the interval. If  
17 that were true, the result would be the same as under Eschelon's proposed  
18 language and the longer interval would be the latest date for installation of the two  
19 services. That, in fact, is not how the calculation of the interval will work. The  
20 reason cannot be found in the ICA language that Qwest has presented to this  
21 Commission for approval. Rather, Qwest's proposed calculation of the interval is  
22 based on terms that were initially distributed by Qwest in a secret, password-

1 protected form, with the password available only to CLECs after they signed the  
2 Qwest TRO amendment.<sup>150</sup>

3 Qwest's secret PCAT states that consecutive ordering is required for each  
4 component of a commingled EEL. This lengthens the total time required to install  
5 the commingled EEL. Specifically, Qwest's TRRO EEL PCAT, which is not part  
6 of the ICA, states:

7 ...When commingling an EEL Loop with the same bandwidth PLT  
8 transport, an LSR and an ASR is required. **Your LSR for EEL**  
9 **Loop must be submitted first** and must include the following  
10 specific information:

11 PriLoc Section = End user Location

12 Sec Loc Section = Dangling Wire Center

13 Remark = "EEL, Install Dangling/Commingled Circuit."

14 **Once you have received the FOC with circuit ID for your**  
15 **commingled EEL Loop, you may submit your ASR** for PLT  
16 transport to be commingled with an EEL Loop of the same  
17 bandwidth... (Emphasis added).<sup>151</sup>

18 As a result, Qwest's PCAT process lengthens the interval of delivery of a working  
19 service to the end user customer because the CLEC cannot submit the second  
20 order until it receives an FOC on the first order. Thus, if the FOC commitment is  
21 72 hours for the loop, this pushes out the later due date by up to three days.  
22 Consequently, there is no way to calculate the installation interval from Qwest's  
23 proposed ICA language.

---

<sup>150</sup> Qwest has since provided Eschelon the password in order to access the secret PCATs. (For a discussion of the non-CMP secret "TRRO" PCATs, see the testimony of Mr. Starkey.) Although the password is now available, these PCATs remain password protected. The term "secret" is used to distinguish them from the portions of the PCAT that are not password protected.

<sup>151</sup> See Qwest PCAT, <http://www.qwest.com/wholesale/pcat/trroeel.html>.

1 CLECs need certainty for planning purposes and to set customer expectations.  
2 CLECs who signed the TRO amendment before receiving the password to the  
3 secret PCAT may have been surprised to discover this. Eschelon was certainly  
4 surprised to discover it once the terms were posted on the website. The terms of  
5 the secret PCAT affect the UNE ordered under this ICA. As a result, under  
6 Qwest's proposal, the time period for service delivery applicable to the entire  
7 commingled EEL would be longer than ordering the same circuit as a special  
8 access facility, thus diminishing the usefulness of the commingled arrangement.

9 Further problems arise if either one of the orders goes held because of a lack of  
10 available facilities. Eschelon would end up paying for a partial circuit, while  
11 waiting for the held order to clear. In addition, the overall lengthened interval  
12 means that Eschelon is not able to serve its end-user customer in a timely manner.  
13 From a provisioning standpoint, this makes Commingled Arrangements inferior to  
14 Point-To-Point EELs or Special Access, because the combined provisioning  
15 interval is longer as a result of Qwest's requirement of consecutive ordering.  
16 Eschelon's proposal is reasonable because it applies the longer of the two  
17 intervals for the individual components to the Commingled Arrangement.

18 *Issue No. 9-59 (alternate): ICA Sections 9.23.4.7 and subparts Ordering,*  
19 *Billing, and Circuit ID for Commingled Arrangements- CIRCUIT ID -*  
20 *(Alternate proposal to 9.23.4.5.4)*

21 **Q. WHAT IS THE SPECIFIC BUSINESS NEED SURROUNDING**  
22 **ESCHELON'S ALTERNATE PROPOSAL FOR ORDERING, BILLING**

1           **AND CIRCUIT ID FOR COMMINGLED ARRANGEMENTS -- CIRCUIT**  
2           **ID?**

3       A.     Eschelon supports language for ICA Section 9.23.4.5.4 as specified in Issue No.  
4           9-58 and 9-58(a).  However, to the extent the Commission adopts Qwest's  
5           proposed language for ICA Section 9.23.4.5.4, Eschelon proposes alternate  
6           language in 9.23.4.7 relating to repair of a commingled EEL.  This language is  
7           necessary because Qwest's proposed language would delay the repair of a  
8           commingled EEL in some circumstances.

9           Currently, for UNE EELs, CLEC opens a trouble report and Qwest assigns a  
10          trouble ticket number.<sup>152</sup>  When CLEC opens the ticket, the clock starts running  
11          under the PIDs for mean time to repair.<sup>153</sup>  For Commingled EELs, however,  
12          Qwest is proposing that the CLEC first submit the trouble ticket on one  
13          component of the commingled EEL and then, if the problem is not resolved, a  
14          second trouble ticket would be opened on the other component of the commingled  
15          EEL.

16          Like the consecutive placement of orders discussed in connection with intervals in  
17          ICA Section 9.23.4.4.3.1 (Issue No. 9-58(d)), Qwest's repair process for  
18          Commingled EELs is also a consecutive process.  Only if Qwest does not find  
19          trouble on the first portion of the EEL will Qwest contact the CLEC and open a  
20          repair ticket on the other portion of the EEL.

---

<sup>152</sup> See proposed ICA Section 12.1.3.3.3.1.1.

<sup>153</sup> See ICA Exhibit B (MR-5).

1 The customer is out of service the entire time and does not know or care whether  
2 the trouble is in one circuit or the other. The customer just wants it repaired. This  
3 process will certainly delay repair time for the customer's service when the  
4 trouble is in the portion of the commingled EEL which was not investigated first.

5 **Q. COULD ESCHELON OPEN TROUBLE TICKETS ON BOTH**  
6 **COMPONENTS OF THE COMMINGLED EEL SIMULTANEOUSLY?**

7 A. If Eschelon defies Qwest's requirement to open a trouble ticket on one portion of  
8 the EEL and instead opens trouble tickets on both circuits (UNE and non-UNE),  
9 Eschelon increases the likelihood of incurring additional charges to uncover  
10 problems that are in the Qwest network. Finding trouble on both circuits of a  
11 commingled EEL at the same time is likely rare. Much more likely is that the  
12 trouble is on one circuit or the other, but the parties do not know which one. If  
13 CLEC simultaneously opens a ticket on both circuits (assuming Qwest accepts  
14 them) to avoid delay, Qwest will code one ticket as no trouble found (NTF) in  
15 every case, because the trouble will likely be on only one of the two circuits.  
16 Qwest charges the CLEC maintenance of service charges on tickets that Qwest  
17 codes as NTF. The end result is that Eschelon would have to do more work to  
18 open and track more tickets, while paying Qwest more charges, for trouble that is  
19 found to be a Qwest's network.

20 **Q. HOW DOES ESCHELON'S PROPOSED LANGUAGE SOLVE THIS**  
21 **ISSUE?**

1 A. Eschelon’s proposed language makes clear that when Eschelon reports trouble on  
2 a commingled EEL, Eschelon can simultaneously submit multiple circuit IDs on a  
3 single trouble report; if necessary, Qwest will facilitate identifying the multiple  
4 circuit IDs for the commingled EEL; and Qwest will charge Eschelon a “no  
5 trouble found” charge, only in cases where the trouble is not on either component  
6 of the commingled arrangement.

7 **Q. WOULD THE TERMS AND CONDITIONS, SUCH AS ORDERING,**  
8 **MAINTENANCE AND BILLING, RELATED TO LOOP-TRANSPORT**  
9 **COMBINATIONS BE BETTER ADDRESSED IN CMP, RATHER THAN**  
10 **THIS ARBITRATION?**

11 A. No. For years, Qwest has stated that this issue was currently not appropriate for  
12 CMP,<sup>154</sup> while Qwest pursued unilaterally developing terms outside of CMP.<sup>155</sup>  
13 Qwest’s proposal to exclude key terms from the contract until some later date,  
14 while Qwest has developed and implemented its own terms, is unreasonable,  
15 especially since parties are already before the Commission and Qwest has stated  
16 that Eschelon’s proposals will be rejected in CMP. This issue is addressed in  
17 detail in the testimony of Mr. Starkey.<sup>156</sup>

---

<sup>154</sup> See Communications attached to the Testimony of Ms. Johnson, *e.g.*, Eschelon/59 (which is discussed in the testimony of Mr. Starkey).

<sup>155</sup> See Testimony of Mr. Starkey (including his discussion of the non-CMP TRRO PCATs); *see also* Eschelon/59 and Eschelon 77 to the direct testimony of Ms. Johnson.

<sup>156</sup> See *Starkey Direct*. (Eschelon/1)

1 **Q. SHOULD THE COMMISSION CONSIDER WHETHER OR NOT OTHER**  
2 **CLECS ARE CURRENTLY PURCHASING COMMINGLED EELS**  
3 **UNDER QWEST'S ONEROUS TERMS IN DECIDING WHETHER TO**  
4 **ADDRESS THIS ISSUE IN ESCHELON'S CONTRACT?**

5 A. No. The fact that other CLECs may have signed Qwest's contract amendments or  
6 have begun purchasing commingled EELs under terms dictated by Qwest is not  
7 evidence or justification for imposing those terms, without question, on all  
8 CLECs. Other CLECs decisions not to litigate onerous terms should not waive  
9 Eschelon's rights to raise these issues in its contract negotiations and have the  
10 Commission decide these issues on the merits of the proposals.

11 **Q. PLEASE SUMMARIZE THESE ISSUES.**

12 A. Commingled EELs should be a useful and meaningful alternative to UNE EELs.  
13 Because a Commingled EEL is functionally equivalent to a UNE EEL, a  
14 Commingled EEL should be put together (ordering, tracking, repair and billing) in  
15 a manner similar to a UNE EEL. Eschelon's language accomplishes this task,  
16 while Qwest's language allows Qwest to diminish the usefulness of a commingled  
17 EEL by delaying provisioning and repair. In addition, Qwest's language allows  
18 Qwest to provide bills for the components of the commingled EEL that are not  
19 related in any way and thus extremely difficult to review and verify. Eschelon's  
20 language should be adopted for these issues.

1 **SUBJECT MATTER NO. 28. MICRODUCT RATE**

2 **Issue No. 10-63: ICA Section 10.8.2.29**

3 **Q. HAS THIS ISSUE CLOSED SINCE THE PETITION FOR ARBITRATION**  
4 **WAS FILED IN THIS CASE?**

5 A. Yes, this issue has closed with the following language:

6 10.8.2.29 In cities where Qwest has not deployed microduct and  
7 CLEC wishes to use this technology, CLEC must lease an  
8 innerduct at one-half (1/2) of the rate for innerduct in Exhibit A per  
9 microduct placed within the innerduct. In these locations CLEC  
10 will be required to furnish and place the microduct. At the  
11 conclusion of the lease, CLEC and Qwest will make a joint  
12 decision whether or not CLEC will be required to remove CLEC's  
13 microduct from the innerduct.

14 **VIII. EXPEDITED ORDERS**

15 **SUBJECT MATTER NO. 31. EXPEDITED ORDERS**

16 **Issues Nos. 12-67 and 12-67(a)-(g)**

17 **Q. SUBJECT MATTER 31 HAS EIGHT RELATED SUBPARTS. HOW IS**  
18 **YOUR DISCUSSION OF THIS SUBJECT ORGANIZED?**

19 A. It is organized as follows: (A) Summary and Background; (B) Description of  
20 Language and Proposals; and (C) Key Cost Issues, including (1) Wholesale  
21 Access at Cost-Based Rates and (2) Exceptions to Charging an Additional  
22 Expedite Fee.

23 **(A) SUMMARY AND BACKGROUND**

1 Q. PLEASE PROVIDE A BRIEF SUMMARY OF ISSUE 12-67 AND ITS  
2 SUBPARTS.<sup>157</sup>

3 A. An expedited order, or an “expedite,” is an order for which Qwest delivers service  
4 more quickly than it otherwise would under the normal service provisioning  
5 interval. It is undisputed that Qwest provides expedites to itself<sup>158</sup> and its retail  
6 customers.<sup>159</sup> It is also undisputed that Qwest does not charge its retail customers  
7 an additional expedite fee in all cases; rather, Qwest provides exceptions to  
8 charging an additional fee for expedites under certain conditions.<sup>160</sup> The two  
9 over-arching questions regarding expedited orders for resolution in this arbitration  
10 are:

11 (1) **Interim Wholesale Rate:** At what rate should expedites be  
12 provided to a Qwest wholesale customer (*i.e.* Eschelon), at least on  
13 an interim basis until a permanent rate is set? and

14 (2) **Exceptions to Charging Additional Fee for Expedites:**  
15 Should the circumstances when Qwest provides exception(s) to  
16 charging an additional fee for expedites be nondiscriminatory?

---

<sup>157</sup> Regarding expedited orders, see also Eschelon/ 29, 32, 33, 41 and 93 through 109. In Arizona, Eschelon has a complaint pending against Qwest related to Qwest’s new expedite changes (*See In re. Complaint of Eschelon Telecom of Arizona, Inc. Against Qwest Corporation*, ACC Docket No. T-01051B-06-0257, T-03406A-06-0257.) Eschelon will refer to it in its testimony as the “Arizona Complaint Docket.” *See* Eschelon/33.

<sup>158</sup> Eschelon/7, Arizona arbitration Transcript, Vol. I, p. 58, lines 19-21 (“Q. Now, you would agree with me that Qwest provides itself with expedites; correct? A. Yes.”) (Ms. Albersheim).

<sup>159</sup> *See, e.g.*, Colorado arbitration, Albersheim Colorado Direct, p. 49, (Qwest “provides expedites to its retail POTS customers and design services customers...”); Exhibit Eschelon/36 (Qwest tariff pages for Qwest retail customers, including those receiving services over a “designed” facility).

<sup>160</sup> Qwest (Ms. Martain) Direct (Aug. 28, 2006), Arizona Complaint Docket, p. 40, lines 4-10 (“The tariff then goes on to state that if the end user elects to move service to a temporary location (either within the same building, or a different building) that non-recurring charges would apply. This would include the non recurring charge to expedite a design service. However, when the customer moves its service, via a service order, back to the original premise location, if it meets the criteria as outlined in 3.2.2.d included below, the non-recurring charges would be *waived (including the expedite fee)*” (emphasis added)).

1           Regarding both of these issues, the ability to expedite UNE orders is integral to a  
2           company's ability to gain "access to a UNE" and therefore such access must be  
3           provided on nondiscriminatory terms and at cost-based rates.<sup>161</sup> Although  
4           deciding those two issues will resolve the bulk of the dispute regarding expedites,  
5           there are sub-issues relating to the ICA language as well. Eschelon asks the  
6           Commission to adopt its language for Issue 12-67 and all of its subparts.

7           Another question, whether expedite terms belong in the interconnection  
8           agreement ("ICA") or in Qwest's PCAT through CMP, is dealt with by Mr.  
9           Starkey in the first section of his direct testimony (Eschelon/1). He discusses, in  
10          particular, that the governing term of the CMP Document (Eschelon/53 at § 1.0)  
11          anticipates that terms in individual ICAs may vary and may conflict with CMP  
12          and provides, that when they do, the ICA controls.<sup>162</sup>

13          Recently the Minnesota Commission adopted Eschelon's proposed interim rate  
14          and ruled that expedites on CLEC UNE orders constitute access to UNEs and,  
15          therefore, their prices should be cost-based in the Minnesota Qwest-Eschelon ICA  
16          Arbitration.<sup>163</sup> In addition, Arizona Staff testimony in the pending Arizona  
17          Complaint Docket confirmed that expedites should be subject to cost-based

---

<sup>161</sup> 47 U.S.C. §252(d); 47 C.F.R. §§51.311 & 51.313.

<sup>162</sup> See, e.g., Eschelon/1, Starkey/26-28.

<sup>163</sup> See Eschelon/29, Denney/55 (MN Arbitrators' Report, ¶¶ 221-222). This was affirmed in the Minnesota commission's March 30, 2007 Order Resolving Arbitration Issues. Eschelon/30, Denney/17-19; see also *id.* Denney/23, ¶5.

1 pricing. Specifically, Arizona Staff Conclusion Number Seven<sup>164</sup> states that the  
2 rate(s) for expedites be considered as part of the next cost docket.<sup>165</sup>

3 **Q. DOES QWEST PROVIDE ESCHELON WITH EXPEDITED SERVICE**  
4 **FOR UNEs PER THE ICA IN OREGON TODAY?**

5 A. No. Although per Qwest an ICB rate in a Qwest tariff in Oregon applies to CLEC  
6 expedite orders,<sup>166</sup> Qwest will not expedite an unbundled loop order in Oregon  
7 under the existing interconnection agreement<sup>167</sup> regardless of whether emergency  
8 conditions are met or not<sup>168</sup> even when a CLEC is willing to pay an ICB rate  
9 based on costs.<sup>169</sup> Explicit language is needed in the proposed ICA addressing  
10 when Qwest will process expedite orders.

---

<sup>164</sup> Arizona Staff conclusions are summarized in the Direct Testimony of Pamela Genung, *In re. Complaint of Eschelon Telecom of Arizona, Inc. Against Qwest Corporation*, ACC Docket No. T-01051B-06-0257, T-03406A-06-0257 (“Arizona Complaint Docket”) (Jan. 30, 2007) (“Arizona Staff Expedite Testimony”) at Executive Summary. This Executive Summary is attached to this testimony as Eschelon/33.

<sup>165</sup> Eschelon/33, Denney/2 (Arizona Staff Expedite Testimony, Executive Summary, Staff Conclusion No. 7).

<sup>166</sup> Qwest Response to Petition, p. 44.

<sup>167</sup> Qwest-Eschelon existing approved Oregon ICA, Attachment 5, Sections 2.9, 7.4.2 (quoted in footnote below).

<sup>168</sup> *See* Eschelon/104, Johnson 3 (Qwest Expedites & Escalations PCAT).

<sup>169</sup> *See, e.g.*, Eschelon/41 [showing Eschelon offered to pay cost-based approved rates, including on a case-by-case (i.e., ICB) basis, as stated on page 2 of Eschelon’s April 3, 2006 letter: “The charges Eschelon will pay includes the installation charge for the order requesting the expedite. Installation charges cover the costs of the work activities to process the order. (In an expedite situation, the same work activities take place; they simply occur earlier.) Although the installation charges generally also include the cost of a dispatch, if Qwest dispatches a technician to complete an expedite, Eschelon will also pay the dispatch charge. (When the dispatch cost is included in the installation charge, this is a double recovery by Qwest.) If Qwest spends additional time due to the expedite itself, Eschelon will also pay the half hourly labor rate (which in Arizona is the same rate whether billed as repair or additional labor, other) for that time. Payment of these charges is provided for under the current interconnection agreements, and no amendment is necessary.”]. Although the example in this quotation referred to Arizona, the dispute resolution letters covered several states, including Oregon, and citations from the Oregon ICA were included with the letters.

1 **Q. DID QWEST PROVIDE ESCHELON WITH EXPEDITED ORDERING**  
2 **FOR UNEs IN OREGON PREVIOUSLY UNDER THE SAME ICA?**

3 A. Yes. I provide a one-page summary of the change in Qwest’s conduct over time,  
4 while the existing approved ICA language did not change, in Eschelon/32.<sup>170</sup>  
5 From the very beginning of the interconnection relationship between Eschelon  
6 and Qwest, when Eschelon opted in to the AT&T interconnection agreement in  
7 2000 (before Qwest even created the expedites PCAT<sup>171</sup>), Qwest provided  
8 Eschelon with expedite capability at no additional charge for loops and other  
9 UNEs when certain specified emergency conditions were met (“emergency-based  
10 expedites”).<sup>172</sup> This continues to be the practice in Washington.<sup>173</sup> However, in

---

*See* Exhibit Eschelon/41; *id.* at Denney/5-7 (attached list of ICA citations).

<sup>170</sup> In Eschelon/32, expedite language from Qwest-Eschelon ICAs that is the same in some other states (such as Arizona) is quoted. In Oregon as well, Qwest provided expedite capability for unbundled loop orders during the time period before January of 2006 under the current ICA language. *See, e.g.*, Qwest-Eschelon existing approved Oregon ICA, Attachment 5, Section 2.9 (“ . . . ILEC and CLEC shall in good faith develop a mutually agreeable escalation and expedite process by which service ordering and provisioning can be provided.”); Section 7.4.2 (“Expedite: This will apply when the provisioning activity is required to be completed in less time than stipulated by the minimum element intervals as defined in Section 9.1 of this Attachment 5. The Desired Due Date category will reflect the date the activity needs to be completed.”); 9.1 (“CLEC will specify on each order its Desired Due Date (DDD) for completion of that particular order. Standard intervals do not apply to orders under this Agreement. ILEC will not complete the order prior to DDD or later than DDD unless authorized by CLEC. If the DDD is less than the following element intervals, the order will be considered an expedited order.”).

<sup>171</sup> *See* Eschelon/96 (Sept. 22, 2001 product notification) (discussed in Eschelon/93 at Johnson/5).

<sup>172</sup> *See, e.g.*, Eschelon/107 (Examples of Expedite Requests Approved by Qwest for Unbundled Loop Orders); *see also* Arizona Complaint Docket, at Answer, May 12, 2006, p. 9, ¶ 14, lines 24-25 (“Qwest admits that it previously expedited orders for unbundled loops on an expedited basis for Eschelon. . .”); *See also* Qwest (Ms. Novak) Direct (July 13, 2006) (Arizona Complaint Docket), p. 5, lines 5-12 & lines 21-22 (Qwest “uniformly followed the process in existence at the time for expediting orders for unbundled loops”).

1 January of 2006, in Oregon and all other states but Washington,<sup>174</sup> Qwest  
2 implemented a Qwest-initiated change by CMP notification<sup>175</sup> over the objection  
3 of multiple CLECs<sup>176</sup> to deny CLECs the capability to expedite orders for loops  
4 and other UNEs using the emergency-based expedites process (or any process  
5 under the same ICA as Eschelon had been receiving expedites, without  
6 amendment).<sup>177</sup> Instead, irrespective of any expedite provisions in an existing  
7 approved ICA, Qwest unilaterally requires an amendment that specifies a “per  
8 day” rate before it will expedite UNE orders.<sup>178</sup> In the Eschelon complaint case  
9 against Qwest under the existing Arizona ICA, Staff in Arizona concluded that  
10 “CLECs should not be forced into signing” the Qwest expedite amendment.<sup>179</sup>  
11 The Staff added that “since CLEC interconnection agreements are voluntarily

---

<sup>173</sup> See Eschelon/104, Johnson 3 (Qwest Expedites & Escalations PCAT, stating: “The Expedites Requiring Approval section of this procedure does not apply to any of the products listed below (unless you are ordering services in the state of WA)”). Qwest now refers to expedites in these emergency situations as “Expedites Requiring Approval.” Qwest has a UNE tariff in Washington that contains approved rates. Qwest has not received Commission approval for a UNE \$200 per day advanced rate in Washington. After input from Washington staff, Qwest withdrew proposed tariffs in Washington containing its non cost based \$200 per day rate. (Docket Nos. UT-041886; UT-041890; withdrawn Nov. 18, 2004, see <http://tabb.qwest.com/PPNB.NSF/JobNum?OpenView&Start=1&Count=50&Expand=19#19>)

<sup>174</sup> See Eschelon/104, Johnson/3 (Qwest Expedites & Escalations PCAT, stating: “The Pre-Approved expedite process is available in all states except Washington for the products listed below when your ICA contains language for expedites with an associated per day expedite charge.”). Qwest now refers to expedites for an added fee (as opposed to those available on an emergency basis) as “Pre-Approved” expedites.

<sup>175</sup> See Eschelon/108 (Qwest notice annotated to highlight information showing it was a Qwest-initiated notice not associated with any change request).

<sup>176</sup> See Eschelon/93, Johnson/12-15 (summary in Chronology); Eschelon/94, Johnson/1-5 (Rows 2-14); Eschelon/102, Johnson/7-10; Eschelon/103, Johnson/13-18.

<sup>177</sup> See Eschelon/93 (Chronology) & Eschelon/97/Johnson 1 (Qwest notice effective January 3, 2006).

<sup>178</sup> See Eschelon/104, Johnson/1 (Qwest Expedites & Escalations PCAT, stating: “your ICA must contain language supporting expedited requests with a “per day” expedite rate”).

<sup>179</sup> Direct Testimony of Pamela Genung, *In re. Complaint of Eschelon Telecom of Arizona, Inc. Against Qwest Corporation*, ACC Docket No. T-01051B-06-0257, T-03406A-06-0257 (Jan. 30, 2007) [“Arizona Complaint Docket”], p. 34, lines 10-11.

1 negotiated or arbitrated,” Qwest “rather than trying to force Eschelon into signing  
2 an amendment,” could have taken the issue to arbitration under the Qwest-  
3 Eschelon ICA.<sup>180</sup>

4 A chronology and list of documented facts regarding expedites in CMP is  
5 attached to Ms. Johnson’s testimony as Eschelon/93 and Eschelon/94. They  
6 provide a detailed account of these events, including CLECs’ objections to  
7 Qwest’s refusal to provide expedites using the emergency-based expedite process  
8 for unbundled loops and other UNEs. Ms. Johnson personally participated in  
9 CMP during these events. The events provide an example of Qwest’s changing  
10 the rules that govern the companies’ contractual relationship without Commission  
11 approval and underscore why it is essential to include expedite terms and  
12 conditions in the ICA, rather than, as Qwest has insisted, simply referring in the  
13 ICA to expedite requirements contained in Qwest’s PCAT.<sup>181</sup> Qwest wants  
14 contractual certainty for itself on pricing through its proposal to document a rate  
15 in Exhibit A to the ICA but asks the Commission to exclude the terms regarding  
16 when that rate would apply from the ICA – denying needed contractual certainty  
17 to Eschelon. Mr. Starkey discusses the need for contractual certainty in his direct  
18 testimony.

19 **(B) DESCRIPTION OF LANGUAGE AND PROPOSALS**

---

<sup>180</sup> *Id.* p. 36, line 21 – p. 37, line 2.

<sup>181</sup> Qwest proposed language for Sections 9.1.12.1.2 and 7.3.5.5.2; Disputed Issues Matrix (10/10/06, pp. 171-172), Qwest’s position statement, Issue 12-67.

1 Q. WHAT IS ESCHELON'S PROPOSED LANGUAGE FOR ISSUE 12-67  
2 AND ITS SUBPARTS?

3 A. Eschelon proposes to include the following language in the contract:

4 **Issues 12-67 (Section 12):**

5 12.2.1.2 Expedites. CLEC may request a Due Date earlier than the  
6 applicable Due Date interval for that product or service. Requests for  
7 expedites can be made either prior to, or after, submitting CLEC's service  
8 request.

9  
10 **Issue 12-67(a) – first of two options**

11 12.2.1.2.1 Notwithstanding any other provision of this Agreement,  
12 for all products and services under this Agreement (except for  
13 Collocation pursuant to Section 8), Qwest will grant and process  
14 CLEC's expedite request, and expedite charges are not applicable,  
15 if one or more of the following conditions are met:

16  
17 a) Fire;

18  
19 b) Flood;

20  
21 c) Medical emergency;

22  
23 d) National emergency;

24  
25 e) Conditions when the End User Customer is  
26 completely out of service (primary line);

27  
28 f) Disconnect in error when one of the other  
29 conditions on this list is present or is caused by the  
30 disconnect in error;

31  
32 g) Requested service necessary for CLEC End User  
33 Customer's grand opening event delayed for facilities or  
34 equipment reasons with a future Ready For Service (RFS)  
35 date;

36  
37 h) Delayed orders with a future RFS date that meet  
38 any of the above described conditions;

39  
40 i) National Security;

1  
2 j) Business Classes of Service unable to dial 911 due  
3 to previous order activity; or  
4

5 k) Business Classes of Service where hunting, call  
6 forwarding or voice mail features are not working correctly  
7 due to previous order activity where the End User  
8 Customer's business is being critically affected.  
9

10 **Issue 12-67(a) – second of two options**

11 12.2.1.2.1 Notwithstanding any other provision of this Agreement, for  
12 all products and services under this Agreement (except for Collocation  
13 pursuant to Section 8), Qwest will grant and process CLEC's expedite  
14 request, and expedite charges are not applicable, if Qwest does not apply  
15 expedite charges to its retail Customers, such as when certain conditions  
16 (e.g., fire or flood) are met and the applicable condition is met with  
17 respect to CLEC's request for an expedited order.  
18

19 **Issue 12-67(b)**

20 12.2.1.2.2 If none of the conditions described in Section 12.2.1.2.1  
21 are met, Qwest will grant and process CLEC's expedite request,  
22 but the expedite charges in Exhibit A will apply, unless the need  
23 for the expedite is caused by Qwest.  
24

25 **Issue 12-67(c)**

26 12.2.1.2.3 Nothing in this Section 12.2.1.2 alters whether a non-  
27 recurring installation charge in Exhibit A applies to the CLEC  
28 order pursuant to the terms of the applicable section of this  
29 Agreement. The expedite charge, if applicable, is separate from  
30 the installation charge.  
31

32 **Issue 12-67(d), 12-67(e) (Section 9):**

33 9.1.12.1 For expedites, see Section 12.2.1.2.  
34

35 9.23.4.5.6 For expedited orders, see Section 12.2.1.2.  
36

37 **Issue 12-67(f) (Section 7) (1<sup>st</sup> of 2 options):**

38 7.3.5.2 For expedites, see Section 12.2.1.2.  
39

40 **Issue 12-67(f) (Section 7) (2<sup>nd</sup> of 2 options):**

1           7.3.5.2 Expedite requests for Interconnection LIS trunk orders are  
2 allowed. ~~Expedits are requests for intervals that are shorter than the~~  
3 ~~interval defined in Qwest's Service Interval Guide (SIG) or Individual~~  
4 ~~Case Basis (ICB) Due Dates. Expedite charges as identified in Exhibit A~~  
5 ~~apply per order for every day that the Due Date interval is shortened,~~  
6 ~~based on the standard interval in the SIG or based on ICB criteria for Due~~  
7 ~~Dates.~~

8           7.3.5.2.1 CLEC will request an expedite for Interconnection LIS  
9 trunks, ~~including an expedited Due Date,~~ on the Access Service  
10 Request (ASR).

11           7.3.5.2.2 The request for expedite will be allowed only when the  
12 request meets the criteria outlined in Section 12.2.1.2.2. ~~the Pre~~  
13 ~~Approved Expedite Process in Qwest's Product Catalog for~~  
14 ~~expedite charges at Qwest's wholesale website.~~

15

16           **Issue 12-67(g)(Exhibit A):**

17           9.20.12 Expedite Charge     \$100 (footnote 1)<sup>182</sup>

18           **Q.     WHAT IS QWEST'S PROPOSED LANGUAGE?**

19           A.     Qwest proposes the following language for Issue 12-67 and its subparts:

20           **Issues 12-67, 12-67(a), 12-67(b), 12-67(c) (Section 12):**

21           [Qwest proposes deletion, with no counter language.]

22           **Issue 12-67(d), 12-67(e) (Section 9):**

23           9.1.12.1 Expedite requests for designed Unbundled Network Elements are  
24 allowed. Expedites are requests for intervals that are shorter than the  
25 interval defined in Qwest's Service Interval Guide (SIG), Exhibit C or  
26 Individual Case Basis (ICB) Due Dates as applicable.

27           9.1.12.1.1 CLEC will request an expedite for designed Unbundled  
28 Network Elements, including an expedited Due Date, on the Local  
29 Service Request (LSR) or the Access Service Request (ASR), as  
30 appropriate.

31           9.1.12.1.2 The request for an expedite will be allowed only when  
32 the request meets the criteria outlined in the Pre-Approved

---

<sup>182</sup> Footnote 1 to Exhibit A states: "Rates not approved in cost docket."

1 Expedite Process in Qwest's Product Catalog for expedites at  
2 Qwest's wholesale web site.

3 [For Section 9.23.4.5.6, Qwest proposes deletion, with no counter language.]

4 **Issue 12-67(f) (Section 7) (same for both options):**

5 7.3.5.2 Expedite requests for ~~Interconnection~~ LIS trunk orders are  
6 allowed. Expedites are requests for intervals that are shorter than the  
7 interval defined in Qwest's Service Interval Guide (SIG) or Individual  
8 Case Basis (ICB) Due Dates. Expedite charges as identified in Exhibit A  
9 apply per order for every day that the Due Date interval is shortened,  
10 based on the standard interval in the SIG or based on ICB criteria for Due  
11 Dates.

12 7.3.5.2.1 CLEC will request an expedite for ~~Interconnection~~ LIS  
13 trunks, including an expedited Due Date, on ~~an~~ the Access Service  
14 Request (ASR).

15 7.3.5.2.2 The request for expedite will be allowed only when the  
16 request meets the criteria outlined in ~~Section 12.2.1.2.2~~ the Pre-  
17 Approved Expedite Process in Qwest's Product Catalog for  
18 expedite charges at Qwest's wholesale web site.

19

20 **Issue 12-67(g)(Exhibit A):**

21 9.20.12 Expedite Charge ICB (footnote 3)<sup>183</sup> Qwest's proposal for  
22 expedites in Exhibit A in this case provides:<sup>184</sup>

---

<sup>183</sup> Footnote 3 in Exhibit A states: "ICB, Individual Case Basis pricing"

<sup>184</sup> Qwest also cites an ICB rate in its Oregon SGAT Exhibit A, page 14 available at: [http://www.qwest.com/about/policy/sgats/SGATSdocs/oregon/OR\\_18th\\_Rev\\_Exh\\_A\\_11\\_24\\_04\\_C\\_lean.pdf](http://www.qwest.com/about/policy/sgats/SGATSdocs/oregon/OR_18th_Rev_Exh_A_11_24_04_C_lean.pdf); As indicated below, Qwest's negotiations template references Qwest's access tariffs and a rate of \$200 per day.

2

3 **Q. DO THE POSITION STATEMENTS OF THE PARTIES FILED IN**  
 4 **OCTOBER ACCURATELY REPRESENT THE CHARGE FOR**  
 5 **EXPEDITES PROPOSED BY ESCHELON AND QWEST?**

6 A. With respect to Issue 12-67(g) (Expedite Charge), Eschelon and Qwest both  
 7 accurately presented their proposals for the charge on page 181 of the Joint  
 8 Disputed Issues Matrix (Exhibit 3 to the Petition) but inaccurately described their  
 9 positions in other sections of the matrix (see, for example, page 176). Therefore, I  
 10 will clarify the positions of the companies here.

11 On page 181 of Exhibit 3 to the Petition, Eschelon accurately shows its proposal  
 12 of a \$100 charge with a reference to footnote 1 (indicating a rate has not been  
 13 approved) to show this is an interim rate and not a final approved rate.<sup>185</sup> On page  
 14 181, Qwest accurately shows its current proposal of an ICB rate with a reference

---

<sup>185</sup> See proposed ICA Section 24.4.1.1, which states in the portion of this Section that is closed: “Rates reflected on Exhibit A that have not been approved by the Commission in a cost case and require Commission approval shall be considered as Interim rates (“Interim Rates”) by the Parties . . . .”

1 to footnote 3 (which refers to ICB pricing).<sup>186</sup> Qwest confirmed in its April 23,  
2 2007 Response to the Petition (on page 44) that Qwest’s proposal in Oregon is an  
3 ICB charge.

4 With respect to their position statements, however, both companies erred in  
5 presenting their positions. Eschelon withdraws any references to its proposal for  
6 the expedite charge as being on a “per day” basis. Such references were  
7 inadvertent and do not accurately represent Eschelon’s proposal, which is a \$100  
8 flat (*i.e.*, per order) proposed interim rate. Eschelon has provided its proposal to  
9 Qwest, including in other arbitration proceedings since October, so Qwest is  
10 aware of Eschelon’s proposal. On page 176, Qwest lists its proposal as consisting  
11 of a reference to “Qwest’s FCC Tariff No. 1.” Based on its proposal on page 181  
12 of an ICB charge, along with Qwest’s recent confirmation in its Response to the  
13 Petition that its proposal is an ICB charge, Eschelon believes this is an error as  
14 well. Although Qwest has proposed a \$200 per day advanced charge (from its  
15 retail tariff) at some points in time and in some states, Qwest specifically states in  
16 its Response in Oregon that its position is that “the tariff authorizes charges on an  
17 ICB (Individual Case Basis) basis” and that “Eschelon must be required to pay  
18 Qwest . . . consistent with the terms of the governing tariff.”<sup>187</sup>

19 **Q. WHAT ARE THE DISPUTED ISSUES ASSOCIATED WITH EXPEDITED**

---

<sup>186</sup> On page 181, Qwest incorrectly refers to Section 9.20.14 of Exhibit A (which should be Section 9.20.12 in Oregon) and incorrectly includes a reference to footnote 5 (which relates to bill and keep in Oregon), but these appear to be carryovers from another state and not part of Qwest’s proposal in Oregon.

<sup>187</sup> Qwest Response to Petition, p. 44.

1           **ORDERS?**

2    A.    The two over-arching issues described above have ICA language and a rate  
3           associated with them that have been broken down for purposes of numbering the  
4           arbitration issues into eight sub-parts.   The eight numbered disputed issues  
5           associated with expedited orders are:

6	Issue 12-67:	General provisions
7	Issue 12-67(a)	Exceptions to Charging - Emergencies
8	Issue 12-67(b)	Application of Charges in Exhibit A
9	Issue 12-67(c)	Separate Non-Recurring Charge
10	Issue 12-67(d)	Placement - UNEs
11	Issue 12-67(e)	Placement - UNE Combinations
12	Issue 12-67(f)	Placement - Trunk Orders
13	Issue 12-67(g)	Expedite Charge

14           These issues are associated with Section 12.2.1.2 and its subparts, as well as  
15           7.3.5.2 and its subparts, 9.1.12.1 and its subparts, 9.23.4.5.6, and Exhibit A.

16    **Q.    PLEASE EXPLAIN THE KEY POINTS IN ESCHELON’S PROPOSED**  
17           **LANGUAGE FOR ISSUE 12-67.**

18    A.    Issue 12-67 (General provisions) deals with the expedite description (Eschelon  
19           12.2.1.2 v. Qwest 7.3.5.2 & 9.1.12.1) and when expedites can be ordered - only  
20           when submitting an order (Qwest 7.3.5.2.1 & 9.1.12.1.1) or also after order  
21           submission (Eschelon 12.2.1.2/second sentence).

22           First, Eschelon’s proposed language (in Section 12.2.1.2) describes expedites in  
23           terms of “Due Date” – a term that is defined in the agreed-upon “Definitions”

1 section of the contract.<sup>188</sup> In contrast, Qwest’s proposed language (in Sections  
2 9.1.12.1 and 7.3.5.2) refers to intervals, including in Qwest’s Service Interval  
3 Guide (SIG). Some intervals are already contained in Exhibit A to the proposed  
4 ICA and, if Eschelon’s proposal for Issue 1-1 is adopted, applicable intervals will  
5 be contained in the ICA, not the SIG.<sup>189</sup> Eschelon’s proposal describes expedites  
6 as requests for due dates earlier than the due dates that would otherwise apply  
7 under the ICA. Because the due dates are defined elsewhere in the contract,  
8 Eschelon’s proposed definition of expedites leaves no ambiguity.

9 Second, Eschelon’s proposed language for Section 12.2.1.2 explains that requests  
10 for expedites can be made either with Eschelon’s service order request, or after  
11 Eschelon submits the request.<sup>190</sup> It is important that expedites can be made after  
12 the initial Eschelon order is submitted because circumstances requiring an  
13 expedite may arise *after* the initial order. These circumstances may include  
14 emergency conditions that did not exist originally or a change of Eschelon’s End  
15 User Customer’s plans. In addition, if Eschelon were to cancel its original request  
16 so that it could submit a new request in order to ask for an expedite, and Qwest

---

<sup>188</sup> This definition in Section 4.0 of the proposed ICA states as follows: “Due Date” means the specific date on which the requested service is to be available to the CLEC or to CLEC’s End User Customer, as applicable.

<sup>189</sup> See also Qwest-Eschelon existing approved Oregon ICA, Attachment 5, Section 9.1 (“CLEC will specify on each order its Desired Due Date (DDD) for completion of that particular order. Standard intervals do not apply to orders under this Agreement.”).

<sup>190</sup> Qwest’s PCAT relating to expedites provides: “For any of the above conditions, expedited request can be made *either prior to, or after, submitting* your service request.” See Eschelon/104, Johnson/2. In contrast, Qwest’s proposed language is more limiting. For example, Qwest’s proposed Section 9.1.12.1.1 provides that the expedite request must be made on “the” LSR or ASR (singular), which would preclude making an expedite request prior to or after submitting that LSR or ASR.

1           were then to deny Eschelon’s expedite request, Eschelon would have lost the due  
2           date interval to which it was entitled under its original request.

3   **Q.   PLEASE EXPLAIN ESCHELON’S PROPOSAL FOR ISSUE NO. 12-67(A)**  
4           **REGARDING EXCEPTIONS TO CHARGING AN ADDITIONAL**  
5           **EXPEDITE FEE.**

6   A.   Issue 12-67(a) (Exceptions to charging) addresses when emergency conditions are  
7           met (Eschelon proposal #1 for 12.2.1.2.1 with subparts; Qwest proposes deletion);  
8           on a nondiscriminatory basis (Eschelon proposal #2 for 12.2.1.2.1; Qwest  
9           proposes deletion), or not at all (Qwest 7.3.5.2.2, referring to the PCAT Pre-  
10          Approved process, which contains no such exceptions).

11          Eschelon offers two alternative proposals for Section 12.2.1.2.1 for Issue 12-67(a)  
12          (Exceptions to Charging). The first proposal contains an itemized list of  
13          conditions for which an exception to charging an additional fee will be made  
14          (using substantially the same list of conditions<sup>191</sup> that is available for UNE orders  
15          in Washington today and was available in Oregon and other states for UNE orders  
16          before Qwest took it away over CLEC objection in January of 2006, as I

---

<sup>191</sup> The list of conditions is contained in Qwest’s PCAT. (Eschelon/104, Johnson/1-2.) A minor difference is condition (f). Qwest’s PCAT language lists under the item (f) condition “Disconnect in error by Qwest.” Eschelon’s proposal is to include “Disconnect in error when one of the other conditions on this list is present or is caused by the disconnect in error.” From the customer’s perspective, it does not matter why the service was disconnected or which company caused the disconnection; the customer needs its service restored without delay. Eschelon’s proposal that would provide for expedited service in on an emergency basis when a customer’s service is disconnected in error is consistent with Qwest’s past practice. (See Escheon/93, Johnson/9-10 at Section 5, “Qwest Attempted to Change the Expedites Process to Exclude CLEC-Caused Disconnects in Error, But Retracted its Proposal After Eschelon Objected”, citing Initial “Expedites & Escalation Overview – V29.0) Although Eschelon would not pay the added fee, Eschelon would pay the installation charge for the order to correct the disconnect in error.

1 described above). The second proposal articulates a nondiscrimination standard  
2 but does not contain an itemized list of conditions. The CMP background (and  
3 Qwest’s claim about its changes to the PCAT that are allegedly based on the  
4 differences between “designed” and “non-designed” facilities<sup>192</sup>) is less pertinent  
5 if the Commission adopts Eschelon’s proposal number two for Section 12.2.1.2.1,  
6 because much of that background deals with the list of emergency conditions that  
7 is enumerated in the subparts to Section 12.2.1.2.1 in Eschelon’s first proposal.  
8 Exceptions to charging is one of the two over-arching expedite issues that I  
9 discuss in greater detail below.

10 **Q. PLEASE DESCRIBE ESCHELON’S PROPOSAL WITH RESPECT TO**  
11 **ISSUE NO. 12-67(B) REGARDING SITUATIONS WHEN THE EXPEDITE**  
12 **CHARGE APPLIES.**

13 A. Issue 12-67(b) (Application of Charges in Exhibit A) addresses when the expedite  
14 charges in Exhibit A apply (Eschelon 12.2.1.2.2 v. Qwest 7.2.5.3, 7.3.5.2.2 &  
15 9.2.12.1.2); whether if charges apply Qwest must grant and process the request or  
16 only allow them (Eschelon 12.2.1.2.2 v. Qwest 7.2.5.3, 7.3.5.2.2 & 9.1.12.1,  
17 9.2.12.1.2); and whether there is an exception to charging when the need for an  
18 expedite is caused by Qwest (Eschelon 12.2.1.2.2; Qwest proposes deletion and  
19 relies on a reference to the PCAT).

20 First, regarding applying the charge in Exhibit A, the expedite charge is one of the  
21 two over-arching issues that I discuss in detail below.

---

<sup>192</sup> See, e.g., Qwest’s Response to Petition, p. 44.

1 Second, in the Arizona Complaint Docket, Qwest denied<sup>193</sup> that the following  
2 sentence from the Arizona and Colorado Qwest-Eschelon ICA entitles Eschelon  
3 to receive expedites for UNE loops: Qwest “shall provide CO-PROVIDER the  
4 capability to expedite a service order.”<sup>194</sup> In Colorado, Qwest testified that, under  
5 that provision: “Qwest had complete discretion to decide whether or not to grant  
6 expedites.”<sup>195</sup> Qwest also suggested that alleged problems with the quoted  
7 Arizona and Colorado contract language will be avoided because expedite terms  
8 are “clearly delineated” in Qwest’s proposed contract language.<sup>196</sup> Qwest  
9 therefore argues that providing the capability to expedite a loop order does not  
10 require Qwest to actually expedite a loop order under the existing ICA terms in  
11 any case. Following the logic of Qwest’s testimony, Qwest’s language for the  
12 new ICA would also give Qwest “complete discretion to decide whether or not to  
13 grant expedites.”<sup>197</sup> It could even be viewed as less certain, because Qwest’s  
14 proposal uses permissive language (allowed) rather than mandatory language  
15 (shall). Nowhere in Qwest’s proposed language does it expressly say that Qwest  
16 will actually grant or process an expedite request. In contrast, Eschelon’s  
17 proposed language in Section 12.2.1.2.2 specifically provides: “Qwest will **grant**  
18 **and process** CLEC’s expedite request” when the terms are met (which includes

---

<sup>193</sup> Qwest Answer in Arizona Complaint Docket.

<sup>194</sup> AZ Qwest-Eschelon ICA, Att. 5, §3.2.2.13 (Eschelon/41, Denney 5).

<sup>195</sup> Colorado arbitration, Albersheim Answer, p. 55, lines 15-16.

<sup>196</sup> Colorado arbitration, Albersheim Answer, p. 55, lines 12-17.

<sup>197</sup> Colorado arbitration, Albersheim Answer, p. 55, lines 15-16.

1 Eschelon’s payment of the rate in Exhibit A).<sup>198</sup> Eschelon agrees with Qwest that  
2 more clearly delineating contract terms is an advantage;<sup>199</sup> however, Eschelon’s  
3 position is that only Eschelon’s proposed language accomplishes this objective  
4 and minimizes future disputes. By providing more information and direction in  
5 the interconnection agreement in regarding the terms upon which Qwest must  
6 expedite loop<sup>200</sup> orders, Eschelon’s proposed language is aimed at avoiding such  
7 disputes going forward.

8 Third, Eschelon’s proposed language for Section 12.2.1.2.2 states that the  
9 expedite charges in Exhibit A apply, unless the need for the expedite is caused by  
10 Qwest. Qwest’s PCAT provides: “Any requests that are expedited due to a  
11 Qwest caused reason, do not incur an expedite charge. Additionally, if the due  
12 date of an expedited request is missed due to Qwest reasons, expedite charges do  
13 not apply.”<sup>201</sup> Qwest’s proposed ICA language, however, does not contain this  
14 exception. Instead, Qwest proposed to simply refer to its PCAT even though, as  
15 further described by Mr. Starkey, Qwest may change the PCAT over CLEC  
16 objection. Eschelon’s language provides contractual certainty on this point and is  
17 more likely to minimize future disputes.

18 **Q. PLEASE DESCRIBE ESCHELON’S PROPOSAL WITH RESPECT TO**

---

<sup>198</sup> Eschelon’s Proposed ICA Section 12.2.1.2.2 (emphasis added).

<sup>199</sup> Colorado arbitration, Albersheim Answer, p. 55, lines 12-17.

<sup>200</sup> Eschelon’s proposed language states that the expedite provision applies to “all products and services under this Agreement (except for Collocation pursuant to Section 8)” (See Section 12.2.1.2.1) and therefore includes all types of unbundled loops.

<sup>201</sup> Eschelon/104, Johnson/4 (Qwest expedites PCAT).

1           **ISSUE NO. 12-67(C) RELATED TO NON-RECURRING INSTALLATION**  
2           **CHARGES FOR EXPEDITED ORDERS.**

3       A.     Issue 12-67(c) (Separate Non-Recurring Charge) addresses whether the contract  
4           should confirm the expedite fee is separate from the installation Non-Recurring  
5           Charge (“NRC”) (Eschelon 12.2.1.2.3; Qwest proposes deletion).

6           Eschelon is not trying to get something for nothing through its expedite proposal.  
7           Thus, Eschelon proposes language in Section 12.2.1.2.3 that spells out that  
8           applicable NRC charges apply in addition to any applicable expedite charges.  
9           Qwest does not propose an alternative language for Section 12.2.1.2.3.  
10          Eschelon’s language ensures that the provisions of Section 12.2.1.2 will not alter  
11          the application of installation charges under Exhibit A when they appropriately  
12          apply. Expedites are not free under Eschelon’s proposal. Eschelon clarifies that  
13          it will pay the installation charge (covering Qwest’s costs), in addition to expedite  
14          charges (for which Qwest has proven no cost basis) when applicable.

15          For example, the basic installation non-recurring charge for a DS1 capable loop is  
16          \$124.67 per circuit.<sup>202</sup> In response to stated concerns by Qwest about potential  
17          confusion between this installation NRC and expedite charges, Eschelon’s  
18          language in Section 12.2.1.2.3 confirms that Eschelon will pay the expedite  
19          charge, when applicable, in addition to this installation NRC. Eschelon’s  
20          proposal is particularly reasonable because, for retail customers, Qwest in some  
21          cases waives the installation NRC in addition to not charging an expedite

---

<sup>202</sup> Section 9.2.5.1.1 of Exhibit A to the proposed ICA.

1 charge<sup>203</sup> and because Qwest performs the same work for the installation,  
2 regardless of whether it is expedited or not. The only material difference is that  
3 the work is performed earlier, as I discuss below.

4 **Q. WHAT IS ESCHELON’S PROPOSAL WITH RESPECT TO ISSUE NOS.**  
5 **12-67(D), 12-67(E), AND 12-67(F) RELATED TO PLACEMENT OF**  
6 **LANGUAGE REGARDING EXPEDITED ORDERS IN THE ICA?**

7 A. For expedites, Eschelon’s language and Qwest’s counter language do not appear  
8 in the same sections of the ICA. Issues 12-67(d), 12-67(e), and 12-67(f)<sup>204</sup> all  
9 relate to placement of expedited ordering terms in the ICA – in Section 12.2 “Pre-  
10 Ordering, Ordering and Provision” (Eschelon, with cross references in 7.3.5.2,  
11 9.1.12.1 & 9.23.4.5.6 to Section 12.2.1.2) or in Section 9 “UNEs” and Section 7  
12 “Interconnection” (Qwest 7.3.5.2 and subparts & 9.1.12.1 and subparts;<sup>205</sup> Qwest  
13 proposes deletion of all expedite language in Section 12).

---

<sup>203</sup> Qwest (Ms. Martain) Direct (Aug. 28, 2006), Arizona Complaint Docket, p. 40, lines 4-10 (quoted above; describing situation when, for Qwest retail customers, “the non-recurring charges would be *waived (including the expedite fee)*” (emphasis added)).

<sup>204</sup> Regarding Issue 12-67(f) (Trunk orders), Qwest objects to use of the word “Interconnection” instead of “LIS” in the language for Section 7.3.5.2. The word “Interconnection” is used in the approved Qwest-AT&T ICA, which was used in part as the basis for negotiations. “LIS” is Qwest’s product name for interconnection service (which is the industry generic term, and as such, is more appropriate in the contract than a company product name). Examination of the agreed-upon language of the ICA shows that the ICA uses the terms “Interconnection” and “Local Interconnection Service” to denote the same set of services. This conclusion is evident from the introductory closed language of ICA Section 7.1.1 (“Interconnection”). In other words, Eschelon’s proposal to use the industry-wide term “Interconnection,” rather than Qwest’s product name “LIS,” correctly describes the scope of the provision in section 7.3.5.2.

<sup>205</sup> The substantive differences in these sections are discussed with respect to the corresponding language in Eschelon’s proposed language in Section 12.

1 As stated in Section 12.2.1.2.1, Eschelon’s proposal is to deal with expedites “for  
2 all products and services under this Agreement (except for Collocation pursuant  
3 to Section 8)” in Section 12. Eschelon does not believe that any other expedite  
4 language is needed in the ICA, other than possibly cross references to Section  
5 12.2.1.2 (and the rate in Exhibit A). Therefore, for all three issues, Eschelon  
6 proposes addressing expediting the due date when ordering centrally in Section  
7 12.2 (“Pre-Ordering, Ordering, and Provisioning”). Qwest proposes addressing  
8 this subject separately in Section 7 (“Interconnection”) and Section 9  
9 (“Unbundled Network Elements”).

10 Because expedites are requests associated with provisioning a CLEC order, it is  
11 logical to include provisions about expedites in the ordering and provision portion  
12 of Section 12. This is consistent with the manner in which expedites are placed in  
13 the current Qwest-Eschelon ICA, in which expedites are addressed in Attachment  
14 5, entitled “Provisioning and Ordering” (rather than the product specific  
15 attachments to the ICA).<sup>206</sup> The companies have agreed in the proposed ICA that  
16 Section 12 “describes Qwest’s OSS interfaces, as well as manual processes, that  
17 Qwest shall provide to CLEC to support Pre-Ordering, Ordering, Provisioning,

---

<sup>206</sup> Qwest-Eschelon existing approved Oregon ICA, Attachment 5, Sections 2.9, 7.4.2, 9.1, 9.2, 9.3.

1 Maintenance and Repair and Billing.”<sup>207</sup> Section 12.2 specifically addresses “Pre-  
2 Ordering, Ordering, and Provisioning.” Therefore, Eschelon proposes that  
3 expedited ordering be addressed in Section 12.2.1.2 and subparts. This is also  
4 more efficient than repeating terms in different sections.

5 **Q. PLEASE DESCRIBE ESCHELON’S PROPOSAL WITH RESPECT TO**  
6 **ISSUE NO. 12-67(G) RELATED TO EXPEDITE CHARGE.**

7 A. Issue 12-67(g) (Expedite Charge) addresses the charge in Exhibit A - flat non-  
8 recurring interim fee of \$100 (Eschelon) versus an ICB rate for which Qwest may  
9 propose in every case to charge \$200 per day advanced (*e.g.*, \$1,000 if advanced  
10 by 5 days)<sup>208</sup> (Qwest).

11 Eschelon’s proposal represents a compromise by Eschelon. Eschelon proposes to  
12 set a specific rate for non-emergency-based (fee-based) expedites, despite the fact  
13 that no cost basis has been established for such rate, in order to avoid additional  
14 litigation in this case. However, Eschelon reserves its right to a cost-based rate if

---

<sup>207</sup> Section 12.1.1 of proposed ICA (closed language). Although Qwest may attempt to define “OSS” more narrowly to include systems only, that is not how the term is defined in the contract. *See id.* In addition, in the Third Report and Order (at ¶ 425), the FCC said: “In the *Local Competition First Report and Order*, the Commission defined OSS as consisting of pre-ordering, ordering, provisioning, maintenance and repair, and billing functions supported by an incumbent LEC’s databases and information. OSS includes the *manual*, computerized, and automated systems, *together with associated business processes* and the up-to-date data maintained in those systems” (emphasis added). *See* Third Report and Order, *In the Matter of Implementation of the Local Competition Provisions of the Telecommunications Act of 1996*, CC Docket No. 96-98 (Released Nov. 5, 1999), ¶425 (citing “*Local Competition First Report and Order*, 11 FCC Rcd at 15763-64, paras. 518, 523”).

<sup>208</sup> *See* Washington arbitration, Albersheim Washington Direct, p. 60, lines 2-4 (“It is Qwest's position that the appropriate ICB rate is \$200.00 per day consistent with Qwest's its practices in other states.”).

1 this rate is litigated in the cost case. Therefore, Eschelon proposes its expedite  
2 charge as an interim rate.

3 Qwest's "expedite amendment," which as I discussed above Qwest now requires  
4 CLECs to sign in order to obtain expedited ordering for UNEs,<sup>209</sup> contains a rate  
5 of \$200 *per day* expedited. The same rate is listed in Qwest's Exhibit A for  
6 Oregon to its current negotiation template (Qwest's generic price offer),<sup>210</sup> which  
7 references Qwest's FCC access service tariff as a source for this rate.<sup>211</sup> Qwest  
8 made similar rate proposals in Minnesota and other states where Qwest and  
9 Eschelon are engaged in ICA arbitration proceedings. By proposing a \$100  
10 interim flat fee to be charged by Qwest for expedites, Eschelon is offering a  
11 compromise.

12 Charging an additional fee for expedites is the first over-arching issue identified  
13 in my summary above, and I turn to that issue now.

14 **(C) KEY COST ISSUES**

15 **1. WHOLESALE ACCESS AT COST-BASED RATES**

---

<sup>209</sup> See Eschelon/104, Johnson/1 (Qwest Expedites & Escalations PCAT, stating: "your ICA must contain language supporting expedited requests with a "per day" expedite rate").

<sup>210</sup> <http://www.qwest.com/wholesale/downloads/2007/070208/ORNegTempTRROExhibitA1-31-07.xls>

<sup>211</sup> Specifically, Qwest's Oregon Exhibit A to its negotiation template notes as follows: "Market-based prices, All charges and increments shall be the same as the comparable charges and increments provided in Qwest FCC, Retail Tariffs, Catalogs, or Price Lists." <http://www.qwest.com/wholesale/downloads/2007/070430/ORNT04-30-07.xls> rows 849 (expedite rate) and 1067 (explanation of footnote 9).

1 **Q. PLEASE EXPLAIN ESCHELON’S POSITION THAT THE EXPEDITE**  
2 **CHARGE SHOULD BE A COST-BASED RATE.**

3 A. Eschelon is a wholesale customer of Qwest’s and should pay a wholesale rate.  
4 Section 252(d) of the federal Act sets forth the applicable pricing standards for  
5 interconnection, network elements, and resale at wholesale rates of ILEC retail  
6 services. It states that rates shall be cost-based and nondiscriminatory.<sup>212</sup>  
7 Nonetheless, Qwest has argued that Eschelon should pay the “same” charge as the  
8 \$200 per day advanced fee (*e.g.*, \$1,000 per order if advanced by 5 days) that  
9 Qwest charges its private line retail customers.<sup>213</sup> Qwest erroneously equates  
10 providing a retail service *at the same price* with providing wholesale service on  
11 nondiscriminatory terms. The threshold question to be addressed is whether for  
12 itself Qwest provides the service to its retail customers, separate from the question  
13 of price. If so, the analysis moves to another question, which addresses what the  
14 wholesale price should be (whether TELRIC-based). Qwest inappropriately  
15 collapses these two questions into one.

16 As it is undisputed that Qwest provides expedites to itself<sup>214</sup> and its retail  
17 customers,<sup>215</sup> the threshold question is met and the inquiry moves to the price.

18 The wholesale price should be based on cost because Qwest faces its own costs in

---

<sup>212</sup> 47 U.S.C. § 252(d)(1)(A)(i) & (ii).

<sup>213</sup> See, *e.g.*, Colorado arbitration, Albersheim Colorado Direct, p. 52.

<sup>214</sup> Eschelon/7, Arizona arbitration Transcript, Vol. I, p. 58, lines 19-21 (“Q. Now, you would agree with me that Qwest provides itself with expedites; correct? A. Yes.”) (Ms. Albersheim).

<sup>215</sup> See, *e.g.*, Colorado arbitration, Albersheim Colorado Direct, p. 49, (Qwest “provides expedites to its retail POTS customers and design services customers...”); Exhibit Eschelon/36 (Qwest tariff pages for Qwest retail customers, including those receiving services over a “designed” facility).

1 providing expedites of orders. Qwest does not explicitly or implicitly charge  
2 itself a non cost based, market rate in order to expedite orders for its retail  
3 customers. Rather, it only incurs the cost of expediting such orders. By  
4 proposing to charge Eschelon a non cost based price that is higher than Qwest's  
5 own expedite costs, Qwest proposes to violate its nondiscrimination obligation<sup>216</sup>  
6 because this price constitutes terms that are less favorable than terms faced by  
7 Qwest in expediting its own orders (*i.e.*, the term that Qwest offers "to itself").<sup>217</sup>

8 The need for this comparison stems from the fact that Qwest acts in a dual role of  
9 the CLEC's provider of bottleneck facilities and the CLEC's competitor in retail  
10 markets. This standard for comparison is captured in the following federal rule:

11 **§ 51.313 Just, reasonable and nondiscriminatory terms and**  
12 **conditions for the provision of unbundled network elements.**

13 (b) Where applicable, the terms and conditions pursuant to which  
14 an incumbent LEC offers to provide access to unbundled network  
15 elements, including but not limited to, the time within which the  
16 incumbent LEC provisions such access to unbundled network  
17 elements, shall, *at a minimum, be no less favorable to the*  
18 *requesting carrier than the terms and conditions under which the*  
19 *incumbent LEC provides such elements to itself.* (emphasis added).

20 Eschelon and Qwest compete in the retail market and this competition includes an  
21 ability to offer expedite service to retail customers "on competitive" terms. By

---

<sup>216</sup> See §51.313 (quoted below). See also FCC First Report and Order ¶218 ("Therefore, we reject for purposes of section 251, our historical interpretation of "nondiscriminatory," which we interpreted to mean a comparison between what the incumbent LEC provided other parties in a regulated monopoly environment. We believe that the term "nondiscriminatory," as used throughout section 251, applies to the terms and conditions an incumbent LEC imposes on third parties *as well as on itself.*") (emphasis added).

<sup>217</sup> See §51.313(b) (nondiscriminatory terms for the provision of UNEs shall be no less favorable to CLEC than the terms that the ILEC provides "to itself").

1 charging Eschelon a wholesale expedite price that exceeds the cost of expedite,  
2 Qwest is gaining an unfair advantage because Qwest can “profit” on the  
3 difference between the retail price of an expedite and Qwest’s cost associated  
4 with expedites. This advantage is very similar to an advantage that Qwest would  
5 have if it charged above-cost rates for UNE loops and other UNE elements – a  
6 situation that the unbundling rules and TELRIC pricing are designed to avoid.  
7 For example, although Qwest takes the position that private line service is the  
8 retail analogue of an unbundled DS1 Capable Loop,<sup>218</sup> Qwest presumably would  
9 not claim it is appropriate to charge the same price for the unbundled loop as for  
10 the retail service. Certainly, that is not what the Commission has found with  
11 respect to loop rates. An expedite rate for UNE orders should be cost-based, and  
12 not set based on market-based pricing or retail tariff offerings.

13 **Q. QWEST HAS ARGUED THAT EXPEDITES SHOULD NOT BE COST-**  
14 **BASED BECAUSE “EXPEDITES ARE NOT UNE’S.”<sup>219</sup> IS THAT THE**  
15 **APPROPRIATE ANALYSIS?**

16 A. No. The proper analysis not whether a term (*e.g.*, “expedite”) is itemized on the  
17 minimum list of “UNEs”; the issue is nondiscriminatory *access to UNEs*.<sup>220</sup> In

---

<sup>218</sup> Arizona arbitration, Albersheim Arizona Rebuttal, p. 51, lines 13-14; *see also* Qwest’s Response to Eschelon’s Motion for Summary Judgment, or in the Alternative, Partial Summary Judgment, *In the Matter of the Complaint of Eschelon Telecom of Arizona Inc. Against Qwest Corporation*, ACC Docket No. T-01051B-06-0257, T-03406A-06-0257 (Aug. 18, 2006) [“Arizona Complaint Docket”], p. 17, lines 8-9 [“the only retail analogue is between high capacity loops (DS1 and DS3 Capable Loops) and high-capacity private lines.”].

<sup>219</sup> Colorado arbitration, Albersheim Colorado Direct, p. 52.

1 Paragraph 268 of its *First Report and Order*, the FCC found that the requirement  
2 to provide “access” to UNEs must be read broadly, concluding that the Act  
3 requires that UNEs be “provisioned in a way that would make them useful.”  
4 Expedites are needed to make UNEs useful.

5 When it argues that expedites are not UNEs, Qwest is asking the Commission to  
6 engage in the following rudimentary exercise: (1) take the list of seven or eight  
7 UNEs identified by the FCC (*e.g.*, “loop”);<sup>221</sup> (2) compare the words on that list to  
8 the term being requested (*e.g.*, “expedite”); and (3) find that Sections 251 and 252  
9 do not apply if the same word is not on both lists. If the exercise were that  
10 simple, there would hardly be several hundred pages of FCC orders discussing  
11 **access to** UNEs. Note that ICA Exhibit A (the rate sheet) contains approximately  
12 600 items with rates. If Qwest’s test were applied, Exhibit A would contain less

---

<sup>220</sup> For those functions with a retail analogue (“the BOC provides to competing carriers that are analogous to the functions a BOC provides to itself in connection with its own retail service offerings”), the BOC “must provide access to competing carriers in “substantially the same time and manner” as it provides to itself. Thus, where a retail analogue exists, a BOC must provide access that is equal to (*i.e.*, substantially the same as) the level of access that the BOC provides itself, its customers, or its affiliates, in terms of quality, accuracy, and timeliness.” *In the Matter of the Application by Bell Atlantic New York for Authorization Under Section 271 of the Communications Act To Provide In-Region, InterLATA Service in the State of New York*, Memorandum Opinion and Order, FCC 99-404, CC Docket No. 99-295, rel. December 22, 1999, ¶ 45. For those functions that have no retail analogue, the BOC must demonstrate that the access it provides to competing carriers would offer an efficient carrier a “meaningful opportunity to compete.” *Id.* ¶ 44. The FCC made clear that the lack of a retail analogue did not mean that the BOC would be subject to a more lenient nondiscrimination obligation. The FCC stated that “we do not view the ‘meaningful opportunity to compete’ standard to be a weaker test than the ‘substantially the same time and manner’ standard.” The meaningful opportunity to compete standard is, rather, “intended to be a proxy for whether access is being provided in substantially the same time and manner and [is], thus, nondiscriminatory.” *Id.* at ¶ 45.

<sup>221</sup> See §51.319; see also FCC First Report and Order ¶ 27 [“The minimum set of network elements the Commission identifies are: local loops, local and tandem switches (including all vertical switching features provided by such switches), interoffice transmission facilities, network interface devices, signalling and call-related database facilities, operations support systems functions, and operator and directory assistance facilities.”]

1 than ten items with rates. Obviously, Qwest’s proposed approach is not the test  
2 the Commission has applied in determining cost-based rates pursuant to Sections  
3 251 and 252. Nondiscriminatory access to UNEs must be provided at cost-based  
4 rates.<sup>222</sup>

5 **Q. WAS IT ALWAYS QWEST'S POSITION THAT NON COST BASED**  
6 **RATES APPLY AND EXPEDITE CHARGES REQUIRE NO**  
7 **COMMISSION APPROVAL?**

8 A. No. Historically Qwest has treated expedites as a rate element subject to cost  
9 based pricing. As discussed above, expedites were provided for unbundled loop  
10 orders for six years as part of the Section 251 interconnection agreement between  
11 Eschelon and Qwest in Oregon and other states and are still provided in  
12 Washington under the existing agreement when the emergency conditions are  
13 met. Qwest confirmed that expedites were a part of accessing UNEs when Qwest  
14 previously asked state commissions to establish an Individual Case Basis (“ICB”)  
15 rate for expedites.<sup>223</sup> For example, in 2001 in Washington, Qwest introduced the  
16 expedite charge in the direct testimony of Qwest witness Robert F. Kennedy  
17 under section titled “Unbundled Network Elements (“UNEs”).<sup>224</sup>

---

<sup>222</sup> 47 C.F.R. §51.307(a); 47 U.S. C. §252(d)(1)(A)(i).

<sup>223</sup> See Qwest Response to Petition, p. 44 (“The tariff authorizes charges on an ICB (Individual Case Basis) basis.”).

<sup>224</sup> See Eschelon/35 (pages from Kennedy WA Direct). See Before the Washington Utilities and Transportation Commission, In the Matter of the Continued Costing and Pricing of Unbundled Network Elements, Transport, Terminations and Resale, Docket No. UT-003013, Part D (“Part D UNE Cost Docket”), Direct Testimony of Robert F. Kennedy (“Kennedy Direct”), Qwest Corporation, November 7, 2001, pp. 13 and 26. Qwest made the same arguments in Arizona, which

1 Expedites is listed in Mr. Kennedy’s testimony as within the category of  
2 unbundled network elements, which means that Qwest understood they were  
3 subject to cost-based (*i.e.* TELRIC) pricing. Mr. Kennedy notes that, “Qwest  
4 proposes to charge for Expedites and Cancellations on an ICB.”<sup>225</sup>

5 As I discussed above regarding Oregon, the ICB rate also appears in the Qwest  
6 UNE tariff in Washington,<sup>226</sup> yet Qwest will not expedite an unbundled loop order  
7 in Washington under the existing interconnection agreement<sup>227</sup> when the  
8 emergency conditions are not met<sup>228</sup> even when a CLEC is willing to pay an ICB  
9 rate based on costs.<sup>229</sup> An ICB rate also appears in Exhibit A (Section 9.20.14) in  
10 the Colorado SGAT,<sup>230</sup> but Qwest will not provide expedites to Eschelon under  
11 the existing ICA at an ICB rate based on costs.<sup>231</sup> Specific language and an  
12 interim rate should be included in the proposed interconnection agreement to  
13 ensure expedited ordering will be provided for unbundled loops on  
14 nondiscriminatory terms and at cost-based rates.

<sup>227</sup> See Qwest-Eschelon existing approved WA ICA, Att. 5, Section 3.2.2.13 (“Expedites: U S WEST shall provide CO-PROVIDER the capability to expedite a service order.”).

<sup>228</sup> Exhibit Eschelon/104 (Qwest expedite PCAT) (“The Pre-Approved expedite process is available in ***all states except Washington*** for the products below when your ICA contains language for expedites with an associated per day expedite charge.”) (emphasis added). Qwest refers to expedites for an additional fee as “Pre-Approved Expedites.”

<sup>229</sup> See, e.g., Exhibit Eschelon/41 (described in above footnote).

<sup>230</sup> See attachment A to Decision No. C02-409, Issued April 17, 2002, in Docket 99A-577T.

<sup>231</sup> See Exhibit Eschelon/41 (and previous footnote).

1 **Q. DID ANY OTHER COMMISSIONS MAKE ANY RULING WITH**  
2 **RESPECT TO QWEST EXPEDITE CHARGES?**

3 A. Yes. First, during 2001 Qwest made a filing similar to the Washington filing in  
4 the Arizona cost docket, introducing an expedite rate under “UNE” section of its  
5 testimony and proposing an ICB charge.<sup>232</sup> The Arizona Commission in its order  
6 in the UNE Cost Docket found that “Qwest is directed to develop cost studies for  
7 all services offered in this docket on an ICB price basis in Phase III. Qwest  
8 should make every effort to develop reasonable cost-based prices for such  
9 services even if it has little or no experience actually provisioning the services.”<sup>233</sup>  
10 Because Qwest “offered in this docket on an ICB price basis” the provision of  
11 expedites, expedite charges are subject to this order. Indeed, in its current  
12 Arizona SGAT (dated February 10, 2005), Qwest lists footnote five next to the  
13 Expedite rate element.<sup>234</sup> Footnote five reads: “Rates for this element will be  
14 proposed in Arizona Cost Docket Phase III and may not reflect what will be  
15 proposed in Phase III. There may be additional elements designated for Phase III  
16 beyond what are reflected here.”<sup>235</sup> Inclusion of this footnote indicates Qwest

<sup>235</sup> Qwest’s Arizona SGAT, page 16, note 5.

1 recognized that expedite charges are subject to the Arizona Commission order.  
2 Qwest has never sought permission from the Arizona Commission to remove  
3 expedites from the list of UNE rate elements, nor has the Arizona Commission  
4 issued an order removing expedites. Therefore, cost-based rates for Expedites are  
5 still required by the Arizona Commission's order (in addition to Section  
6 252(d)(1)(A)(i) of the federal Act). In addition, Arizona Staff testimony in the  
7 ongoing Arizona Complaint Docket further verifies that expedites should be  
8 subject to cost-based pricing.<sup>236</sup>

9 Second, recently, in the Minnesota Qwest- Eschelon ICA Arbitration, the  
10 Minnesota Commission ruled that expedites on CLEC UNE orders constitute  
11 access to UNEs and therefore, their prices should be cost-based.<sup>237</sup>

12 **Q. PLEASE DESCRIBE THE MINNESOTA DECISION.**

13 A. In a report upheld by the Minnesota commission, the ALJs agreed with Eschelon  
14 with respect to: (1) the role of the Qwest Change Management Process ("CMP");  
15 (2) expedites being an integral part of access to UNEs (i.e., *not* a superior  
16 service); and (3) cost-based rates.<sup>238</sup> The ALJs rejected Qwest's per day rate  
17 proposal and recommended adoption of Eschelon's positions regarding an interim

---

<sup>236</sup> Eschelon/33, Denney/2 (Arizona Staff Expedite Testimony, Executive Summary, Staff Conclusion No. 7).

<sup>237</sup> Eschelon/29, Denney/6-7, 54-55 (Arbitrators' Report at ¶¶ 21-22 & 219-222), affirmed Eschelon/30, Denney/17-19 & 23 (Order Resolving Arbitration at pp. 17-19 & p. 23 ¶5).

<sup>238</sup> Eschelon/29, Denney/6-7, 54-55 (Arbitrators' Report at ¶¶ 21-22 & 219-222), affirmed Eschelon/30, Denney/17-19 & 23 (Order Resolving Arbitration at pp. 17-19 & p. 23 ¶5).

1 rate and TELRIC pricing.<sup>239</sup> The ALJs only disagreed with Eschelon on a single  
2 sub-point, which I discuss in the next section below on exceptions to charging and  
3 additional fee.

4 First, regarding Qwest's expedite-related activities in CMP, the ALJs found that  
5 the "CMP process by which Qwest reached its current position is not the  
6 controlling factor on whether emergency situations should create an exception to  
7 charging an additional fee for expedited ordering."<sup>240</sup> More generally regarding  
8 CMP, the ALJs made a separate finding regarding CMP that:

9 The CMP document itself provides that in cases of conflict  
10 between changes implemented through the CMP and any CLEC  
11 ICA, the rates, terms and conditions of the ICA shall prevail. In  
12 addition, if changes implemented through CMP do not necessarily  
13 present a direct conflict with an ICA but would abridge or expand  
14 the rights of a party, the rates, terms, and conditions of the ICA  
15 shall prevail.<sup>241</sup> Clearly, the CMP process would permit the  
16 provisions of an ICA and the CMP to coexist, conflict, or  
17 potentially overlap. The Administrative Law Judges agree with the  
18 Department's analysis that any negotiated issue that relates to a  
19 term and condition of interconnection may properly be included in  
20 an ICA, subject to a balancing of the parties' interests and a  
21 determination of what is reasonable, non-discriminatory, and in the  
22 public interest. ***Eschelon has provided convincing evidence that***  
23 ***the CMP process does not always provide CLECs with adequate***  
24 ***protection from Qwest making important unilateral changes in***  
25 ***the terms and conditions of interconnection.***<sup>242</sup>

---

<sup>239</sup> Eschelon/29, MN Arbitrators' Report, at ¶¶ 221-222.

<sup>240</sup> Eschelon/29, MN Arbitrators' Report, at ¶ 219.

<sup>241</sup> [MN] Ex. 1 (Albersheim Direct) at RA-1, part 1.0, page 15.

<sup>242</sup> Eschelon/29, MN Arbitrators' Report, at ¶¶ 21-22 (footnote in original; emphasis added).

1 Second, regarding access to UNEs, the ALJs specifically found: “When Eschelon  
2 requests an expedite, it will be for accessing a UNE. Under 47 U.S.C. §§ 51.307  
3 and 51.313, it must be provided under Section 251 of the Act and, thus, at  
4 TELRIC rates.”<sup>243</sup>

5 Finally, regarding cost-based rates, the ALJs rejected Qwest’s per day rate  
6 proposal and said “as to pricing, Eschelon’s position should be adopted.”<sup>244</sup> The  
7 ALJs noted that historically in Minnesota TELRIC rates have been substantially  
8 less than Qwest’s tariffed rates for similar services, and they found that  
9 “Eschelon’s proposal for an interim rate of \$100 is appropriate.”<sup>245</sup> The ALJs  
10 agreed with Eschelon that a TELRIC study should be done.<sup>246</sup>

11 **Q. WHICH EXPEDITE CHARGE PROPOSAL IS MORE REASONABLE?**

12 A. Eschelon’s interim proposal for a flat per order charge is more reasonable.  
13 Because the only additional cost that Qwest may incur to expedite an order  
14 involves the cost of processing the expedite order, this cost will not vary based on  
15 the number of days by which service is sought to be expedited. Accordingly, a  
16 per day charge is inappropriate.

17 The reasonableness of Eschelon’s proposed \$100 interim per order charge is also  
18 shown by comparison of that charge with other rates that the Commission has

---

<sup>243</sup> Eschelon/29, MN Arbitrators’ Report, at ¶221.

<sup>244</sup> Eschelon/29, MN Arbitrators’ Report, at ¶¶ 221-222.

<sup>245</sup> Eschelon/29, MN Arbitrators’ Report, at ¶ 222.

<sup>246</sup> Eschelon/29, MN Arbitrators’ Report, at ¶ 222.

1 established. Eschelon’s proposed interim expedite rate, for example, is similar to  
2 the rate – \$124.67 – for basic installation of a DS1 capable loop.<sup>247</sup> Qwest has  
3 acknowledged that expediting service does not require any additional  
4 provisioning activities; it merely involves performing the same provisioning  
5 activities more quickly than would otherwise be the case.<sup>248</sup> An additional  
6 expedite charge that approaches the amount of the charge for all of the activities  
7 for an entire installation of a facility should more than amply compensate Qwest  
8 for performing the installation activities more quickly.

9 Another point of comparison is the rate for “express service” – which essentially  
10 is an expedite service offered to residential customers in some states and defined  
11 as provisioning of access line dial tone prior to the standard installation service  
12 date. Under its express service offering, Qwest offers same-day installation for  
13 \$22 flat (per order) fee in Colorado.<sup>249</sup>

14 Another example of the reasonableness of Eschelon’s proposed \$100 per order  
15 charge is a comparison with the rate that Qwest charges for a Due Date change.  
16 For example, in Arizona, the approved rate for a Due Date change is \$10.38.<sup>250</sup>  
17 More recently, Qwest has proposed a higher rate for a Due Date change in the  
18 Minnesota UNE cost case. Expediting an order changes the date to an earlier

---

<sup>247</sup> If Eschelon expedited a loop order by 5 days, Qwest proposes to charge Eschelon \$1,000 (\$200 X 5 days).

<sup>248</sup> See Eschelon/6 , MN ICA Arbitration Transcript, Vol. 2,p. 97, line 18-p, 98, line 22.

<sup>249</sup> See Qwest Colorado Services Catalog No. 1, Original Sheet 8 Effective 12-09-05.

<sup>250</sup> Arizona SGAT §9.20.12.

1 date. Qwest’s proposed Due Date Change in Minnesota appears to apply when  
2 the date is changed to a later date – “any time a customer requests a Due Date  
3 Change after Qwest has assigned/dispatched a technician on the original due  
4 date.”<sup>251</sup> For these types of date changes, Qwest is proposing a per order (*i.e.*, *not*  
5 per day) non-recurring charge of \$91.32, which is listed as the ***additional dispatch***  
6 ***charge***.<sup>252</sup> In other words, in Minnesota, Qwest is proposing a per order charge  
7 for due date changes that is ***lower*** than Eschelon’s proposed per order \$100  
8 interim charge for expediting the due date. Thus, in order to move the due date  
9 for a loop order up by five days, Qwest proposes that it be permitted to charge  
10 \$1000.00 (in addition to the regularly applicable installation charge), although to  
11 move the due date for a loop order out, Qwest proposes that it be permitted to  
12 charge an additional \$91.32, regardless of the number of days that the due date is  
13 being moved.

14 Qwest has provided no evidence at all that expediting an order would require an  
15 additional dispatch. To the contrary, Qwest has expressly admitted that  
16 expediting service does not require *any* additional provisioning activities.<sup>253</sup> Even  
17 assuming that expedites involve some non-provisioning “front office” type

---

<sup>251</sup> *In the Matter of Qwest Corporation's Application for Commission Review of TELRIC Rates Pursuant to 47 U.S.C. § 251*, Minnesota PUC Docket No. P-421/AM-06-713, OAH Docket No. 3-2500-17511-2 [*“MN UNE Cost Case”*], Attachment 3 Summary of Costs and Attachment 4 Element Description, December 21, 2006, at §§9.20.12 (Qwest proposed element description for §9.20.11).

<sup>252</sup> *MN UNE Cost Case*, Attachment 3 Summary of Costs and Attachment 4 Element Description, December 21, 2006, at §§9.20.12 (Date Change – states “see 9.20.11”) & 9.20.11 (Additional Dispatch, per Order \$91.32).

<sup>253</sup> *See* Eschelon/6, MN ICA Arbitration Transcript (Qwest witness Terry Million), Vol. 2, p. 97, line 18-p, 98, line 22; *id.* p. 98, lines 16-17.

1 activities, there is no evidence to suggest that the cost of those activities exceed  
2 not only the rate for basic installation of a DS1 capable loop but also Qwest's own  
3 recently proposed Due Date charge in the amount of an Additional Dispatch,  
4 when no additional dispatch is required for expedites.

5 Eschelon's proposed charge is expressly an interim rate. It affords Qwest the  
6 opportunity to obtain a higher permanent rate, if Qwest can provide a TELRIC  
7 study to support that rate. If Qwest can present a cost study that supports a per-  
8 day charge, then it will be permitted to assess such a charge. To date, however,  
9 Qwest has provided no cost study and thus made no effort to prove that it incurs  
10 additional costs when providing expedites that are not recovered in the installation  
11 charge and the \$100 interim additional expedite fee.

12 **2. EXCEPTIONS TO CHARGING AN ADDITIONAL EXPEDITE**  
13 **FEE**

14 **Q. PLEASE EXPLAIN ESCHELON'S PROPOSAL THAT EXCEPTIONS TO**  
15 **CHARGING AN ADDITIONAL FEE FOR EXPEDITES SHOULD BE**  
16 **NONDISCRIMINATORY.**

17 **A.** Qwest does not charge an additional expedite fee in every case. Qwest makes  
18 certain exceptions -- providing expedites at no additional charge such as when  
19 emergency-conditions are met and resources are available. For CLECs at least for  
20 certain products, Qwest refers to the emergency-based expedite exceptions that  
21 were previously provided in Oregon for UNE orders as its "Expedites Requiring

1 Approval” process.<sup>254</sup> In its retail tariff, Qwest refers to exceptions to charging an  
2 additional non-recurring fee for expedites within “Reestablishment of Service  
3 Following Fire, Flood, or Other Occurrence” – “Nonrecurring Charges Do Not  
4 Apply.”<sup>255</sup> Although Qwest cannot deny that it makes exceptions to charging an  
5 expedite fee,<sup>256</sup> Qwest disputes when and for what products it makes an  
6 exception. Eschelon has offered its alternative ICA proposal #2 for Issue 12-  
7 67(a) (ICA Section 12.2.1.2.1), described above, to simplify this debate.

8 Eschelon’s second proposal states that if Qwest does provide exceptions to  
9 charging an additional fee for expedites for its retail customers (as Qwest  
10 currently does, for example, “if a customer needs to restore service at the original  
11 location when it is re-entering the original facility, after a fire, flood or Act of  
12 God disaster”),<sup>257</sup> it will likewise provide those exceptions for CLECs when the  
13 same conditions are met. The approach reflected in Eschelon’s first proposal is  
14 preferable in that it offers more certainty as to the conditions under which  
15 exceptions to charging a separate fee will be made. If the Commission finds that  
16 some of all of these conditions are inapplicable (or does not reach that issue),

---

<sup>254</sup> Eschelon/104 (Qwest PCAT).

<sup>255</sup> See Eschelon/36.

<sup>256</sup> See Qwest (Ms. Martain) Direct (Aug. 28, 2006), Arizona Complaint Docket, p. 40, lines 4-10 (“The tariff then goes on to state that if the end user elects to move service to a temporary location (either within the same building, or a different building) that non-recurring charges would apply. This would include the non recurring charge to expedite a design service. However, when the customer moves its service, via a service order, back to the original premise location, if it meets the criteria as outlined in 3.2.2.d included below, the non-recurring charges would be *waived (including the expedite fee)*” (emphasis added)).

<sup>257</sup> See Qwest (Ms. Martain) Direct (Aug. 28, 2006), Arizona Complaint Docket, p. 39, lines 27-28; see *id.* p. 40, lines 4-10 (quoted in above footnote).

1           however, Eschelon’s second proposal at least articulates a nondiscrimination  
2           standard. It also limits future disputes at least to the extent that the companies  
3           agree Qwest does not apply expedite charges for its retail customers.<sup>258</sup>

4       **Q.    IS ESCHELON’S PROPOSAL TO ALLOW NONDISCRIMINATORY**  
5       **EXCEPTIONS TO CHARGING AN ADDITIONAL EXPEDITE FEE IN**  
6       **CERTAIN EMERGENCY SITUATIONS CONSISTENT WITH**  
7       **ESCHELON’S POSITION THAT RATES FOR EXPEDITES SHOULD BE**  
8       **COST-BASED?**

9       A.    Yes. As discussed, Eschelon continues to pay the installation NRC separate from  
10       the expedite fee,<sup>259</sup> unlike a Qwest retail customer which also receives a waiver of  
11       that installation charge.<sup>260</sup> In addition, Qwest provides expedites when the  
12       identified emergency conditions are met (“Expedites Requiring Approval”) only  
13       if resources are available. Regarding Expedites Requiring Approval (but not fee-  
14       added Pre-Approved Expedites),<sup>261</sup> Qwest’s PCAT states:

15                   Qwest will review your expedited request for resource availability.  
16                   In some cases, we may contact you to advise resources for expedite  
17                   are not available or offer an alternate date.<sup>262</sup>

---

<sup>258</sup> *See id.*

<sup>259</sup> Eschelon proposed ICA Sections 12.2.1.2.2 & 12.2.1.2.3.

<sup>260</sup> *See* Qwest (Ms. Martain) Direct (Aug. 28, 2006), Arizona Complaint Docket, p. 39, lines 27-28; *see id.* p. 40, lines 4-10 (quoted in above footnote).

<sup>261</sup> Per Qwest’s PCAT, the emergency-based Expedites Requiring Approval (at no additional fee) are subject to resource availability; the fee-added Pre-Approved Expedites are not. *See* Eschelon/104 (Qwest Escalations and Expedites PCAT).

<sup>262</sup> *See* Eschelon/104 (current Qwest Escalations and Expedites PCAT, discussing emergency-based Expedites Requiring Approval).

1 Qwest incurs no cost to add resources for expediting an order when the  
2 emergency conditions are met. If resources are not available, Qwest simply  
3 denies the request.

4 **Q. BOTH THE MINNESOTA ALJS' AND THE ARIZONA STAFF DID NOT**  
5 **SUPPORT A FINDING OF DISCRIMINATION REGARDING THE**  
6 **CIRCUMSTANCES UNDER WHICH QWEST CURRENTLY OFFERS**  
7 **EXCEPTIONS TO CHARGING AN ADDITIONAL EXPEDITE FEE**  
8 **UNDER EMERGENCY CONDITIONS.<sup>263</sup> DO THESE CONCLUSIONS**  
9 **IMPACT WHETHER OR NOT EXPEDITES SHOULD BE PROVIDED AT**  
10 **COST-BASED RATES?**

11 A. No. Though Eschelon disagrees with the conclusion of the Minnesota ALJs' and  
12 the Arizona Staff with respect to the conditions under which discrimination  
13 occurs when applying an exception to charging a separate fee for expedites, both  
14 the Minnesota ALJs' and the Arizona Staff – despite those findings - support the  
15 conclusion that expedites should be provided at cost-based rates.<sup>264</sup> As for the  
16 issue of not having a separate charge in emergency situations, it is consistent with

---

<sup>263</sup> See Eschelon, 29 (MN Arbitrators' Report, at ¶ 219) and Staff Testimony, Arizona Complaint Docket, p. 32, line 21. Staff concludes that there is no retail analogue for expedites of loop installations. *Id.* p. 32, lines 21-23. When there is no retail analogue, "no retail analogue" does not mean "no discrimination." An analysis must be made of whether the access the ILEC provides to CLECs offers a meaningful opportunity to compete. *See* Bell Atlantic NY 271 Order at ¶ 44. In any event, Qwest has now admitted that there *is* a retail analogue for DS1 and DS3 loops. *See, e.g.,* Albersheim AZ Rebuttal, AZ Docket Nos. T-03406A-06-0572, T-01051B-06-0572 (Feb. 9, 2007), p. 51, lines .13-14 ("a DSI private line (the retail analog)"); *see also* Albersheim Rebuttal in the Arizona Complaint Docket (Aug. 28, 2006), p. 12, lines 18-20 ("the Commission has already determined that DS1 Capable Loops and DS3 Capable Loops have a retail analogue; specifically, DS1 and DS3 private lines respectively").

<sup>264</sup> See Eschelon, 29 (MN Arbitrators' Report, at ¶ 221) and Eschelon/33 (AZ Staff Testimony, Executive Summary, Staff Conclusion No. 7).

1 cost-based rates because Eschelon continues to pay the installation NRC separate  
2 from the expedite fee,<sup>265</sup> and because Qwest provides emergency-based expedites  
3 *only if resources are available* (as indicated in the PCAT language quoted in my  
4 previous response).

5 Although the ALJs in Minnesota suggested that an expedite for a non-designed  
6 service may be more involved than an expedite for a designed service,<sup>266</sup> the  
7 evidence in this case shows that Qwest had been offering (and continues offering  
8 in Washington) emergency-based expedites for both designed and non-designed  
9 facilities for many years,<sup>267</sup> and the “complexity” of design facilities had not been  
10 an issue for all these years. Further, when discussing costs associated with an  
11 expedite, Ms. Million of Qwest named cost of working the order into an existing  
12 provisioning schedule, coordination of activities among the several Qwest’s  
13 departments and communication with the customer regarding the status of the  
14 order.<sup>268</sup> Ms. Million’s description of these costs does not suggest that expedites  
15 for design services would be more complex than expedites for non-design  
16 services. Finally, Qwest does not explain how these complexities can possibly  
17 justify a rate difference between \$0 and \$200 per day. As I discuss above, the

---

<sup>265</sup> Eschelon proposed ICA Sections 12.2.1.2.2 & 12.2.1.2.3.

<sup>266</sup> Eschelon/29, MN Arbitrators’ Report, at ¶ 220.

<sup>267</sup> See Eschelon/107; see also *In re. Complaint of Eschelon Telecom of Arizona, Inc. Against Qwest Corporation*, ACC Docket No. T-01051B-06-0257, T-03406A-06-0257 [“Arizona Complaint Docket”], Qwest (Ms. Novak) Direct (July 13, 2006), p. 5, lines 5-12 & lines 21-22 (Qwest “uniformly followed the process in existence at the time for expediting orders for unbundled loops”); see also Answer (May 12, 2006) (Arizona Complaint Docket), Page 9, ¶ 14, Lines 24-25 (“Qwest previously expedited orders for unbundled loops on an expedited basis for Eschelon”).

<sup>268</sup> Minnesota arbitration, Million Minnesota Rebuttal, p. 28.

1 ALJs agreed (as upheld by the Minnesota Commission) with Eschelon on the  
2 latter point and rejected Qwest's \$200 per day proposed rate.

3 Further, Eschelon's Proposal # 2 for issue 12-67(a) would require Qwest to offer  
4 the emergency conditions to Eschelon only to the extent that Qwest does not  
5 apply expedite charges to its own customers, providing protection against  
6 discrimination while addressing Qwest's stated concerns about its offering few if  
7 any exceptions to charging for expedites for its retail customers.

8 **IX. RATES FOR SERVICES, UNAPPROVED RATES AND**  
9 **INTERCONNECTION ENTRANCE FACILITIES (SUBJECT MATTER**  
10 **NOS. 44, 45 AND 46)**

11 **SUBJECT MATTER NO. 44. RATES FOR SERVICES**

12 **Issues 22-88, 22-88(a) and 22-89: ICA Sections 22.1.1 and 22.4.1.3, and Exhibit**  
13 **A, Section 7.11.**

14 **Q. PLEASE DESCRIBE ESCHELON'S BUSINESS NEED REGARDING**  
15 **RATES FOR SERVICES REFLECTED IN ISSUES NOS. 22-88, 22-88(A)**  
16 **AND 22-89.**

17 **A.** Eschelon needs the same certainty and clarity regarding the rates that Eschelon  
18 charges Qwest as Qwest desires regarding the rates Qwest charges Eschelon.  
19 Although the majority of rates in the ICA refer to Qwest's charges to Eschelon for  
20 services and facilities, some of the rates apply to Eschelon's charges to Qwest.  
21 Therefore, the ICA and its Exhibit A should not inaccurately confine rates to  
22 "Qwest rates" or misleadingly refer solely to "Qwest" tariffs, as proposed by

1 Qwest. Eschelon and Qwest have agreed that Eschelon will charge Qwest in  
2 certain instances; keeping the language in the ICA general as “rates,” rather than  
3 “Qwest’s rates” avoids contradictions and confusions.

4 Issue 22-88 deals with the general references to rates in Exhibit A, while Issue 22-  
5 88(a) deals with a specific line item in Exhibit A describing rates for IntraLATA  
6 toll traffic. Issue 22-89 concerns the right of each company to request a cost  
7 proceeding at the Commission to establish a rate to replace an interim rate.

8 **Q. WHAT IS ESCHELON’S PROPOSAL TO ADDRESS THESE ISSUES?**

9 A. Eschelon proposes language modifications to make clear that Eschelon has the  
10 same right to charge for certain rates and services under the terms of the ICA as  
11 Qwest does. Eschelon also proposes eliminating language in Exhibit A that  
12 contradicts the parties’ agreement that they will mutually exchange, and  
13 compensate for intraLATA toll traffic. In addition, Eschelon proposes to spell out  
14 in the contract that each company has a right to request a cost proceeding at the  
15 Commission to establish a permanent rate in replacement of an interim rate.  
16 Eschelon proposes the following language modifications for Issues 22-88, 22-  
17 88(a) and 22-89:

18 **Issue 22-88:**

19 22.1.1 The rates in Exhibit A apply to the services provided by  
20 ~~Qwest to CLEC~~ pursuant to this Agreement.

21 **Issue 22-88(a):**

22 Exhibit A, Section 7.11  
23 ~~Qwest’s Oregon Access Services Tariff~~

15  
  
16  
17  
18  
19  
20  
21  
  
22  
23  
24  
25  
26

**Issue 22-89:**

22.4.1.3 Nothing in this Agreement shall waive any right of either Party to request a cost proceeding at the Commission to establish a Commission-approved rate to replace an Interim Rate.

**Q. WHAT IS QWEST’S PROPOSAL ON THESE ISSUES?**

A. Qwest opposes Eschelon’s proposals for these Sections. Qwest recommends including the language in Section 22.1.1 that would confine the scope of the rates in Exhibit A specifically to those that apply to services provided *by Qwest to Eschelon* (thus in effect excluding agreed-upon Eschelon rates from Exhibit A). Similarly, Qwest’s proposal for Exhibit A, Section 7.11 is to confine the source of access charges for the agreed-upon mutual exchange of intraLATA toll traffic to Qwest’s, and not Eschelon’s, access tariff. In addition, Qwest opposes including in the contract the provision regarding each company’s right to request a cost proceeding to replace an interim rate. Qwest proposes the following language modifications:

**Issue 22-88:**

22.1.1 The rates in Exhibit A apply to the services provided by Qwest to CLEC pursuant to this Agreement.

**Issue 22-88(a):**

Exhibit A, Section 7.11  
Qwest’s Oregon Access Services Tariff

**Issue 22-89:**

~~22.4.1.3 Nothing in this Agreement shall waive any right of either Party to request a cost proceeding at the Commission to establish a Commission-approved rate to replace an Interim Rate~~ Intentionally Left Blank.

1 **Q. REGARDING ISSUE 22-88 (THE FIRST OF THE THREE ISSUES),**  
2 **PLEASE EXPLAIN ESCHELON’S POSITION.**

3 A. Eschelon proposes striking the phrase “by Qwest to CLEC” because it contradicts  
4 the fact that Exhibit A also includes rates for services provided by Eschelon to  
5 Qwest.<sup>269</sup> The contract language makes numerous references to rates charged by  
6 CLECs, or by such nonspecific terms as “the originating carrier,” which are meant  
7 to be equally applicable to Eschelon or Qwest. These contract references  
8 furthermore state that these rates may be contained in Exhibit A. For example,  
9 section 22.1.3 contains the following agreed-upon language:

10 22.1.3 Reciprocal Charges: See Section 7.3 regarding bill and  
11 keep for reciprocal compensation. *To the extent that CLEC*  
12 *provides services to Qwest, other than bill and keep for reciprocal*  
13 *compensation, or services provided pursuant to this Agreement at*  
14 *the rate in Exhibit A, CLEC may apply its tariffed rates as*  
15 *provided in Section 22.1.3.1.*<sup>270</sup>

16 Below is a partial list of citations from the agreed-upon portions of the contract  
17 that make references to charges that are assessed by Eschelon or by either  
18 Eschelon or Qwest, and are based on Exhibit A rates and assumptions (emphasis  
19 added):

20 **Interconnection**

21 **7.3.3 Trunk Non-recurring charges**  
22 ...

---

<sup>269</sup> See, e.g., Sections 7.3.7.1 and 7.3.7.2 (charges for local, ISP-bound and intraLATA toll transit traffic); 9.2.5.2 and 9.2.5.2.1 (trouble isolation); and 10.2.5.5.4 and 10.2.5.5.5 (Qwest Requested LNP Managed Cuts).

<sup>270</sup> Emphasis added.

1 7.3.3.1 *Installation non-recurring charges may be assessed*  
2 *by the provider for each Interconnection trunk ordered at the rates*  
3 *specified in Exhibit A, or the CLEC's Tariff when the rates in the*  
4 *aggregate are not greater than the amount in Exhibit A.*

5  
6 7.3.3.2 *Non-recurring charges for rearrangement may be*  
7 *assessed by the provider for each Interconnection trunk*  
8 *rearrangement ordered, at one-half (1/2) the rates specified in*  
9 *Exhibit A.*

10  
11 **7.3.7 Transit Traffic**

12  
13 The following rates will apply:

14 7.3.7.1 Local Transit and ISP-bound Transit: *The*  
15 *applicable Interconnection tandem switching and tandem*  
16 *transmission rates at the assumed mileage contained in Exhibit A*  
17 *of this Agreement, apply to the originating Party. (See Section*  
18 *7.3.1.1.2) The assumed mileage will be modified to reflect actual*  
19 *mileage, where the mileage can be measured, based on*  
20 *negotiations between the Parties.*

21 7.3.7.2 IntraLATA Toll Transit: The applicable tariffed  
22 Switched Access Tandem switching and tandem transmission rates  
23 apply to the originating CLEC or LEC. *The assumed mileage*  
24 *contained in Exhibit A of this Agreement shall apply.*

25  
26 **7.6 Transit Records**

27 7.6.3 If the non-transit provider requests records pursuant  
28 to Section 7.6.1 or 7.6.2, *the Parties will charge the same rate for*  
29 *Category 11-01-XX records sent in an EMI mechanized format.*  
30 These records are used to provide information necessary for each  
31 Party to bill the Originating Carrier. *The charge listed in Exhibit A*  
32 *of this Agreement is applicable to each transit record that meets*  
33 *the definition of a billable record.*

34 **Labor Charges for Audits**

35 **8.2.3 General Terms--Caged and Cageless Physical Collocation**

36 8.2.3.10 All equipment placed will be subject to random safety  
37 audits conducted by Qwest. Qwest will not enter CLEC's caged

1 Collocation space or access CLEC's cageless Collocation  
2 equipment as part of a random safety audit. These audits will  
3 determine whether the equipment meets the NEBS Level 1 safety  
4 standards required by this Agreement. CLEC will be notified of  
5 the results of this audit. If, pursuant to the random audit, Qwest  
6 does not demonstrate non-compliance, *Qwest shall pay CLEC*  
7 *using the rates in Exhibit A for Additional Labor Other, for CLEC*  
8 *time spent, if any, as a result of Qwest's audit...*

9 **Trouble Isolation**

10 9.2.5.2 When CLEC requests that Qwest perform trouble isolation  
11 with CLEC, a Maintenance of Service Charge will apply when  
12 Qwest dispatches a technician and the trouble is found to be on the  
13 End User Customer's side of the Loop Demarcation Point. If the  
14 trouble is on the End User Customer's side of the Loop  
15 Demarcation Point, and CLEC authorizes Qwest to repair the  
16 trouble on CLEC's behalf, Qwest will charge CLEC the  
17 appropriate Additional Labor Charges and Maintenance of Service  
18 Charge, if any, as set forth in Exhibit A at 9.20. No charges shall  
19 apply if CLEC provides Qwest with test results indicating trouble  
20 in Qwest's network and Qwest confirms that such trouble is in  
21 Qwest's network. In the event that Qwest reports no trouble found  
22 in its network on a trouble ticket and it is subsequently determined  
23 that the reported trouble is in Qwest's network, then Qwest will  
24 waive or refund to CLEC any Maintenance of Service Charges  
25 assessed to CLEC for that same trouble ticket. If Qwest reported  
26 no trouble found in its network but, as a result of a repeat trouble,  
27 CLEC demonstrates that the trouble is in Qwest's network, *CLEC*  
28 *will charge Qwest a trouble isolation charge as described in*  
29 *Section 12.4.1.8.*<sup>271</sup>

30 **Local Number Portability Ordering**

31 10.2.5.5.3 Qwest will incur charges for the Qwest requested  
32 Managed Cut ....

33 10.2.5.5.4 *Charges for Qwest requested Managed Cuts* shall  
34 be based upon actual hours worked in one half (1/2) hour  
35 increments. If the time to perform the Managed Cut is extended  
36 due to CLEC error, CLEC will not charge Qwest for the additional  
37 time. *Exhibit A of this Agreement contains the rates for Managed*

---

<sup>271</sup> The disputed portion of this paragraph shown as strike out and underline (Issue 12-80(c)) is quoted according to Eschelon's proposal.

1           *Cuts.* Qwest understands and agrees that in the event Qwest does  
2 not make payment for Qwest requested Managed Cuts, unless  
3 disputed as permitted under Sections 5.4 and 21 of the Agreement,  
4 CLEC may choose not to accept any new LSR requests for  
5 Managed Cuts.

6           **Exchange of Usage Data**

7                   **21.14.1.       Daily Usage Files**

8                   21.14.1.2       CLEC agrees to record call information in  
9 accordance with this Section. Unless Qwest notifies CLEC in  
10 writing that CLEC may discontinue doing so, CLEC shall provide  
11 to Qwest access records. The access records provide Qwest with  
12 usage by CLEC end office of originating switched access usage.  
13 These records are in industry standard Category 11 Exchange  
14 Message Interface (EMI) format. Category 1101 series records are  
15 used to exchange detail Meet Point Billed access minutes-of-use.  
16 Qwest will make accessible to CLEC through electronic means the  
17 transmission method/media types available for these mechanized  
18 records. *The CLEC may charge Qwest for these records in*  
19 *accordance with Exhibit A.*

20           As is evident from these citations, the agreed-upon language of the contract  
21 references Exhibit A as a basis of Eschelon-charged rates (or rates chargeable by  
22 Qwest or Eschelon, dependent on the circumstances) in connection with a number  
23 of topics, including reciprocal compensation, transit traffic, non-recurring charges  
24 for interconnection trunks, transit and usage records, labor and trouble isolation  
25 charges, and Local Number Portability managed cuts.

26   **Q.       DOES INCLUSION OF ESCHELON'S PROPOSED LANGUAGE IN**  
27   **SECTION 22.1.1 HELP FULFILL ESCHELON'S BUSINESS NEED FOR**  
28   **CLARITY IN RATES OUTLINED ABOVE?**

1 A. Yes. Eschelon, as well as Qwest, will depend upon the ICA for certainty and  
2 clarity in rates that will be charged for the term of the ICA. Elimination of the  
3 words “by Qwest to CLEC” (as proposed by Eschelon) allows the general  
4 sentence in Section 22.1.1 linking Exhibit A rates to the “services  
5 provided...pursuant to this agreement” to apply to Eschelon as well as to Qwest.  
6 For the terms and conditions under which the rates actually apply, each party  
7 looks equally to the text of the ICA, allowing clarity in rates for each.<sup>272</sup> Qwest’s  
8 proposed addition of the qualifier “by Qwest to CLEC” in Section 22.1.1, on the  
9 other hand, would destroy this framework, resulting at best in ambiguity and at  
10 worst in a false conclusion that Eschelon cannot charge for services pursuant to  
11 the ICA.

12 As I discussed above, various sections throughout the contract already contain the  
13 agreed-upon language that references Exhibit A as a basis for certain Eschelon  
14 rates. In light of these other agreed-upon provisions, Qwest’s proposal for  
15 Section 22.1.1 – which describes rates in Exhibit A as Qwest’s rates – is clearly  
16 inaccurate and misleading. In contrast, Eschelon’s proposal provides an accurate  
17 and unambiguous description of rates contained in Exhibit A.

18 **Q. REGARDING ISSUE 22-88(A) (THE SECOND OF THE THREE ISSUES),**  
19 **PLEASE EXPLAIN ESCHELON’S POSITION.**

20 A. Eschelon proposes that the language in Exhibit A, Section 7.11, refer simply to  
21 the Oregon Access Services Tariff rather than *Qwest’s* Oregon Access Services

---

<sup>272</sup> Exhibit A itself simply provides rates – it does not make rates specific to Qwest, Eschelon, or either.

1 Tariff. Eschelon proposal is essential to bring clarity and certainty to the ICA’s  
2 treatment of charges for the exchange of intraLATA toll traffic. Elimination of  
3 Qwest’s proposed qualifying reference to *Qwest’s* tariff makes the language in  
4 Exhibit A consistent with the agreed-upon portions of the contract that discuss the  
5 mutual exchange of intraLATA toll traffic.

6 The topic Mutual Exchange of Traffic is found in Section 7.2 of the ICA.  
7 Specifically included in this section is “Exchange Access (IntraLATA Toll) traffic  
8 as defined in this Agreement.” (Section 7.2.1.2.2.) Qwest and Eschelon have  
9 agreed that intraLATA toll traffic will be mutually exchanged and mutually  
10 compensated for under the each provider’s respective tariff, as captured in the  
11 following provisions of the agreed-upon language of the contract:

12 7.3.7.2 IntraLATA Toll Transit: The applicable tariffed  
13 Switched Access Tandem switching and tandem transmission rates  
14 apply to the originating CLEC or LEC. The assumed mileage  
15 contained in Exhibit A of this Agreement shall apply.

16 7.3.10.1 Where either Party acts as an IntraLATA Toll  
17 provider, each Party shall bill the other the appropriate charges  
18 pursuant to its respective Tariff or Price Lists.

19 Given the agreed-upon language in the ICA regarding the assessment of mutual  
20 compensation for the exchange of intraLATA toll traffic, the language in Section  
21 7.11 of Exhibit A – which provides the Oregon Access Services Tariff as the  
22 source of the intraLATA toll traffic rates – must be general: This section must list  
23 the source of intraLATA toll traffic rates not only for Qwest, but also for  
24 Eschelon. Eschelon’s proposal that this section read simply “Oregon Access

1 Tariff,” in contrast to Qwest’s proposal to limit this language to “Qwest’s Oregon  
2 Access Tariff,” provides necessary clarity regarding the mutuality of these  
3 charges. Both Eschelon and Qwest will resort to their respective Oregon access  
4 tariffs for the application of intraLATA toll rates – thus, neither Eschelon’s nor  
5 Qwest’s access tariff can be excluded from reference in Exhibit A.

6 Finally, the agreed-upon language at Section 7.2.2.3.3.1 regarding Qwest’s  
7 payment of CLEC access charges could create confusion if read in combination  
8 with Qwest’s proposal for Exhibit A, Section 7.11. Eschelon’s proposed language  
9 (far from rendering Eschelon’s proposal unnecessary, as Qwest argues) provides  
10 necessary clarification that each party will depend on its own Oregon access tariff  
11 for the application of access charges, in light of the agreed-upon language as  
12 follows:

13 7.2.2.3.3.1 Notwithstanding any other provision of this  
14 Agreement, in the case of Exchange Access (IntraLATA Toll)  
15 traffic where Qwest is the designated IntraLATA Toll provider, or  
16 where Qwest has agreed to be a presubscribed IntraLATA Toll  
17 provider for other LEC end user toll Customers, Qwest will be  
18 responsible to CLEC for payment of CLEC Tariff access rates for  
19 traffic terminating to CLEC’s network. Qwest will also be  
20 responsible for traffic originating from CLEC’s network for a  
21 CLEC End User Customer utilizing an intraLATA Toll-free  
22 service where Qwest is the provider of the intraLATA Toll-free  
23 service.

24 This language states that when Qwest acts as a provider of the long-distance  
25 intraLATA toll service, it pays access charges to the CLEC whose local network  
26 it is using. Comparison of the contract language and Qwest’s proposed language  
27 for Exhibit A creates confusion and unnecessary ambiguity: On the one hand, the

1 contract spells out a situation in which *CLEC* charges *Qwest* for intraLATA toll.  
2 On the other hand, under *Qwest*'s proposal, Exhibit A would say that rates for  
3 intraLATA toll traffic are to be found only in *Qwest*'s Access Tariff. *Qwest*'s  
4 proposed language could lead to the mistaken conclusion that a CLEC must  
5 charge access rates out of *Qwest*'s, rather than the CLEC's own, access tariff.  
6 Eschelon's proposal to make a general reference to an "Oregon Access Tariff,"  
7 rather than "*Qwest*'s Oregon Access Tariff," will remove any ambiguity  
8 regarding each party's use of its own Oregon access tariff for its access charges,  
9 and thus will reduce the likelihood of future disputes.

10 **Q. REGARDING ISSUE 22-89 (THE THIRD OF THE THREE ISSUES),**  
11 **PLEASE EXPLAIN ESCHELON'S POSITION.**

12 A. Eschelon's proposed language preserves the right of either company to request a  
13 cost case with the Commission to establish permanent rates in place of interim  
14 rates. This issue is closely linked to the agreed-upon Section 22.4 (Interim Rates)  
15 and Eschelon's proposed language in section 22.6.1 (Eschelon's proposal for  
16 Issue 22-90).<sup>273</sup> In section 22.4.1.1, Eschelon and *Qwest* agreed that the  
17 Commission may review and change approved interim rates or interim rates. In  
18 section 22.6.1, Eschelon proposes the process under which an *interim* rate may be  
19 established for products for which the Commission has not established a rate.  
20 Eschelon's proposal for Issue 22-89 clarifies that each company may request a  
21 cost case to establish *permanent* rates. If for any reason *Qwest* files rates and cost

---

<sup>273</sup> See the citation of section 22.6.1 under Issue 22-90 below.

1 support with the Commission but there is not a contested cost case and a full  
2 review by the Commission, Eschelon's proposal for Issue 22-89 ensures that  
3 interim rates do not remain indefinitely *if* one of the companies asks the  
4 Commission to review them. The opportunity to obtain permanent Commission-  
5 approved rates is necessary to ensure that rates are cost-based, just, reasonable  
6 and non-discriminatory.

7 **Q. WHAT ARGUMENTS DOES QWEST MAKE AGAINST ESCHELON'S**  
8 **PROPOSAL FOR ISSUE 22-89?**

9 A. Qwest's only argument against Eschelon's proposal is that it places unnecessary  
10 language in the interconnection agreement.<sup>274</sup> Note that Qwest does not deny that  
11 each party has the right to request a cost proceeding; it simply claims that such a  
12 provision is unnecessary in the ICA. Qwest's argument is flawed: First, this  
13 issue concerns a subsection in Section 22.4 – the section titled "Interim Rates."  
14 Closed language in Section 22.4 states that the interim rates may be reviewed and  
15 changed by the Commission (Section 22.4.1.1). Therefore, a clarification that  
16 Eschelon or Qwest may request a cost proceeding in which the Commission  
17 would review and change these rates (Eschelon's proposal for Section 22.4.1.3,  
18 which is Issue 22-89), is appropriate.

19 Second, Qwest has agreed to Eschelon's proposal on Issue 22-89 (Section  
20 22.4.1.3) in Minnesota. Because Qwest does not point to any state-specific reason

---

<sup>274</sup> Qwest's position in the Disputed Issues Matrix (10/10/06, p. 241) for Issue 22-89 states that Eschelon's proposed provision is unnecessary.

1 that this provision is “unnecessary” in Oregon, but is “necessary” in Minnesota,  
2 Qwest’s objections to Eschelon’s proposal in Oregon are unsupported and  
3 unreasonable.

4 **Q. PLEASE SUMMARIZE ISSUES 22-88, 22-88(A) AND 22-89 RELATING**  
5 **TO RATES FOR SERVICES.**

6 A. Eschelon proposals for Issues 22-88 and 22-88(a) are consistent with the  
7 numerous agreed-upon provisions of the contract – provisions that refer to Exhibit  
8 A as a basis of CLEC-charged rates. Qwest’s proposal to treat Exhibit A as if  
9 containing only Qwest-charged rates is inaccurate and confusing, and could lead  
10 to needless dispute. Eschelon’s proposal for Issue 22-89 is a necessary  
11 complement to Section 22.6 (Issue 22-90). As I discuss below, it has become  
12 clear that Qwest is attempting to unreasonably narrow the agreed upon portion of  
13 Section 22.6, to limit that language to a paper “filing” requirement, rather than  
14 reading that language as reflecting the terms that already apply in Minnesota, as  
15 has been Eschelon’s consistent position. Eschelon agreed to language in Section  
16 22.6 regarding a set of circumstances (described in the next section) under which  
17 Eschelon would pay Qwest’s proposed rates even though they are unapproved.  
18 Section 22.6.1 specifically provides (in closed language) that Qwest’s proposed  
19 rate will only apply “until the Commission orders a rate.” In other words, the  
20 interim rate will not apply indefinitely and will be replaced by an approved  
21 permanent rate. If for any reason Qwest files rates and cost support with the  
22 Commission as required by Section 22.6 but there is not an associated contested

1 cost case, Qwest should not be able to avoid the provision of Section 22.6.1 that  
2 the Commission will order a rate but not initiating a cost case and then arguing  
3 that, by agreeing to Section 22.6, Eschelon has waived its right to initiate a cost  
4 case. The underpinning of Section 22.6 is that interim rates will be replaced with  
5 permanent rates, and Section 22.4.1.3 removes an opportunity for Qwest to delay  
6 that intended result.

7 **SUBJECT MATTER NO. 45. UNAPPROVED RATES**

17 *9.23.7.11.1, 9.23.7.11.2 and subparts, 10.7.12, and 10.7.12.1.*

18 **Q. PLEASE DESCRIBE ESCHELON'S BUSINESS NEED REGARDING**  
19 **UNAPPROVED RATES AS REFLECTED IN ISSUE 22-90 AND ITS**  
20 **SUBPARTS.**

21 A. Rates are key to decision making and planning with respect to products and  
22 services. If rates are unknown or change unexpectedly, a business cannot plan its  
23 expenses or budget appropriately. And, if rates are inflated and not cost based, a  
24 business cannot remain competitive. Therefore, it is important that rates are  
25 substantiated and approved in a timely manner. Eschelon's proposal addresses  
26 two scenarios involving unapproved rates in particular: (1) without seeking

1 Commission approval, Qwest starts charging an unapproved rate for a UNE or  
2 process that it previously provided under a Commission-approved agreement  
3 without an additional charge; and (2) Qwest implements and imposes upon  
4 Eschelon (under threat of not providing the service at all) Qwest's "going-in"  
5 positions or "wish-list"<sup>275</sup> unapproved rates and then leaves them in effect  
6 indefinitely with no action by Qwest to support the rates to the Commission or  
7 obtain Commission approval of those rates. An example of the first scenario, as I  
8 discussed with respect to Issue 4-5, is design changes for loops. For years, Qwest  
9 provided design changes for loops with no additional charge<sup>276</sup> under the existing  
10 Commission-approved Qwest-Eschelon interconnection agreement before it  
11 unilaterally announced in an unexpected letter to CLECs that it would commence  
12 billing a non-recurring charge ("NRC") for these same design changes.<sup>277</sup>  
13 Eschelon had no reason to anticipate or budget for these new NRCs for an activity  
14 Qwest had been performing regularly under the ICA without these NRCs. An  
15 example of the second scenario is when Qwest offers a new product and assigns it  
16 a rate, does not substantiate the rate or seek Commission approval for the rate for  
17 a substantial period of time, and yet will not process orders for the product unless  
18 CLECs sign an amendment containing that unapproved rate.

---

<sup>275</sup> For rates that are contested in cost cases, the going in rate proposal of a party, for which it wishes to obtain Commission approval, is frequently not adopted without any modification at all. There is often some modification that results in Commission approval of a rate lower than that initially proposed. Therefore, I refer to this initial proposal as a "going in" position or "wish list" rate.

<sup>276</sup> Although there is no *additional* charge (*i.e.*, separate rate), that does not necessarily mean that Qwest is not recovering its costs. The costs may be recovered elsewhere, such as in the recurring loop rate.

<sup>277</sup> Eschelon/10, non-CMP September 1, 2005 letter from Qwest with the subject line "Billing for design changes on Unbundled Loop." See also my discussion of Issue 4-5.

1 In Section 22.6 and subparts, Eschelon’s proposal tracks terms from a  
2 commission decision in Minnesota,<sup>278</sup> where CLECs faced these same problem  
3 scenarios involving unapproved rates. A comparison of the results in Minnesota  
4 versus other states that do not have the Minnesota terms demonstrates the need for  
5 such terms in Oregon and other states as well. In the first scenario, there has been  
6 no ICA change allowing Qwest to charge a separate NRC for design changes for  
7 loops in any of the six states where Eschelon does business with Qwest.<sup>279</sup> Yet,  
8 Minnesota is the only one of these states in which Qwest is not charging CLECs a  
9 new NRC for design changes for loops. In all of the other states, including  
10 Oregon, Qwest has provided *no* related cost study, obtained *no* related ICA  
11 amendment, and sought *no* related Commission approval, but, instead, simply  
12 commenced billing for design changes for loops. This is unjust, particularly as  
13 Qwest bears the burden for substantiating its own rates. In the second scenario,  
14 Qwest has no incentive to obtain an approved rate, which will never be higher and  
15 may be lower than its proposed rate, if it can charge the unapproved rate  
16 indefinitely without having to substantiate and obtain approval of that rate. For

---

<sup>278</sup> October 2, 2002 Order in MN PUC Docket CI-01-1375 (“MN 271 Cost” Docket). Specifically, “Summary of the Commission’s findings and conclusions” contains the following provisions on pp. A-6 and A-7: **“Price Under Development:** Qwest shall obtain Commission approval before charging for a UNE or process that it has previously offered without charge. Qwest may negotiate an interim price for a UNE and service not previously offered in Minnesota provided that Qwest file a permanent price, and related cost support, with the Commission within 60 days of offering the UNE or service. ALJ Report p. 64. ....**New UNE Price:** When offering a new UNE, Qwest shall file a cost-based price, together with an adequate description of the UNE’s application, for Commission review within 60 days of offering. Qwest may charge a negotiated rate immediately if part of an approved interconnection agreement (ICA), provided the ICA is filed for Commission review within 60 days.”

<sup>279</sup> The six states where Eschelon historically has done business with Qwest are: Colorado, Minnesota, Arizona, Oregon, Utah, and Washington.

1 example, Qwest initiated terms for its collocation transfer (or change) of  
2 responsibility amendment in 2001,<sup>280</sup> but its proposed rates for collocation  
3 transfer of responsibility remains unapproved.<sup>281</sup> Qwest will not process orders  
4 for collocation transfers of responsibility without an ICA amendment containing  
5 Qwest's unapproved rates.<sup>282</sup> The ICA needs to contain terms and conditions that  
6 provide an incentive for Qwest to substantiate its rates and obtain Commission  
7 approval of them in a more timely manner.

8 Qwest has agreed to a portion of Eschelon's proposed language, as shown below.  
9 Qwest will likely argue that Eschelon's business need and these concerns are met  
10 by that portion of the language. That is not the case, however. Qwest chooses to  
11 ignore the portion of the Minnesota order that requires Qwest to obtain  
12 Commission approval before charging for a UNE or process that it has previously  
13 offered without charge.<sup>283</sup> This provision is critical to preventing situations like  
14 the design change charge scenario, under which Qwest unexpectedly unilaterally

<sup>281</sup> See Section 8.14 of Oregon Exhibit A to Qwest Negotiations Template (with footnote "1" to Section 8.1.4 indicating "Rates not addressed in a Cost Docket"). See <http://www.qwest.com/wholesale/downloads/2007/070208/ORNegTempTRROExhibitA1-31-07.xls>

<sup>282</sup> See <http://www.qwest.com/wholesale/pcat/collotransferresponsibilityreq.html>

("Qwest has provided a template Facility Transfer of Responsibility Agreement found in the Wholesale Interconnection Agreements & Amendments Interconnection Agreement PCAT which must be accepted or negotiated, signed by the vacating and assuming CLECs and appended to their Interconnection Agreements.").

<sup>283</sup> October 2, 2002 Order in MN PUC Docket CI-01-1375 ("MN 271 Cost" Docket). Specifically, "Summary of the Commission's findings and conclusions" contains the following provisions on pp. A-6 and A-7: **"Price Under Development:** Qwest shall obtain Commission approval before charging for a UNE or process that it has previously offered without charge.

1 commences billing for work it previously performed at no additional charge. It  
2 has recently become clear, in discussions with Qwest regarding the operation of  
3 Section 22.6 in states outside of Minnesota, that Qwest is attempting to turn the  
4 Eschelon proposed terms into a rubberstamp “filing” process under which Qwest  
5 can charge any rate it proposes – even for work it has performed previously at  
6 Commission approved rates (such as the loop recurring rate) – so long as it makes  
7 a paper filing with the Commission. As Qwest knows, that has never been  
8 Eschelon’s intent with this proposal,<sup>284</sup> and it should not be this Commission’s  
9 ruling. Eschelon thus has added an even clearer provision (the first sentence)  
10 reflecting this portion of the Minnesota process to Section 22.6.1 to avoid a  
11 situation in which Qwest interprets language intended to capture that process in a  
12 different manner. There is no reason to believe that the Oregon commission  
13 intended for Qwest to unexpectedly unilaterally commence billing for work it  
14 previously performed at no additional charge or operate indefinitely with  
15 unapproved rates. Qwest’s conduct, however, demonstrates that language is  
16 needed in the interconnection agreement to avoid these results in Oregon.

---

<sup>284</sup> Eschelon reiterated in a January 17, 2006, email to the Qwest negotiation team: “As discussed previously with respect to Section 22, Eschelon’s Section 22 proposal is to use the MN PUC’s process in all six states.” Qwest is very familiar with the Minnesota PUC’s process, including the provision quoted in the previous footnote, through having applied it over the years. The difference in how design changes for loops are handled in Minnesota shows that Qwest knows there is a tangible difference in results under the Minnesota process for UNEs and processes that Qwest previously offered without a charge.

1 Issues 22-90 and 22-90(a) concern the contract language regarding unapproved  
2 rates, and Issues 22-90(b) through 22-90(ae) contain specific rate proposals for  
3 products for which the Commission has not approved rates.

4 **Q. WHAT IS ESCHELON'S PROPOSAL FOR CONTRACT LANGUAGE, IN**  
5 **ISSUES 22-90 AND 22-90(a)?**

6 A. Eschelon proposes the following language for Section 22.6.1:

7 [Issue 22-90]

8 22.6.1 Qwest shall obtain Commission approval before charging  
9 for a UNE or process that it previously offered without charge. If  
10 Qwest offers a new Section 251 product or service or one that was  
11 previously offered with a charge for which a price/rate has not  
12 been approved by the Commission in a TELRIC Cost Docket  
13 ("Unapproved rate"), Qwest shall develop a TELRIC cost-based  
14 rate and submit that rate and related cost support to the  
15 Commission for review within sixty (60) Days of the later of (1)  
16 the Effective Date of this Agreement, or (2) Qwest offering the rate  
17 to CLEC, unless the Parties agree in writing upon a negotiated rate  
18 (in which case Qwest shall file the negotiated rate with the  
19 Commission within 60 Days). Except for negotiated rates, Qwest  
20 will provide a copy of the related cost support to CLEC (subject to  
21 an applicable protective agreement, if the information is  
22 confidential) upon request or as otherwise ordered by the  
23 Commission. If the Parties do not agree upon a negotiated rate and  
24 the Commission does not establish an Interim Rate for a new  
25 product or service or one that was previously offered under Section  
26 251 with an Unapproved Rate, CLEC may order, and Qwest shall  
27 provision, such product or service using such Qwest proposed rate  
28 until the Commission orders a rate. In such cases, the Qwest  
29 proposed rate (including during the aforementioned sixty (60) Day  
30 period) shall be an Interim Rate under this Agreement.

31 [Issue 22-90(a)]

32 22.6.1.1 For a UNE or process that Qwest previously  
33 offered without charge, the rates in Exhibit A do not apply  
34 until Qwest obtains Commission approval or the Parties  
35 agree to a negotiated rate. If the Parties do not agree on a

1 negotiated rate, the Commission does not establish an  
2 Interim rate, and Qwest does not submit a proposed rate  
3 and related cost support to the Commission within the time  
4 period described in Section 22.6.1 for a new product or  
5 service or one that was previously offered under Section  
6 251 with an Unapproved Rate, the Unapproved rate(s) in  
7 Exhibit A do not apply. Qwest must provision ~~the~~ such  
8 products and services pursuant to the terms of this  
9 Agreement, at no additional charge, until Qwest submits  
10 the rate and related cost support to the Commission for  
11 approval.

12 **Q. PLEASE EXPLAIN ESCHELON'S PROPOSAL.**

13 A. For Issue 22-90 (Sections 22.6.1 and 22.6.1.1), Eschelon proposes language that  
14 covers all three of the following situations involving unapproved rates: (1) Qwest  
15 desires to charge for a UNE or process that it previously offered without a charge  
16 but has not obtained an approved rate; and (2) Qwest offers a new product or  
17 service and the rate is not yet approved; and (3) Qwest continues to offer a  
18 product or service that it has previously offered but the rate remains unapproved.  
19 In all three situations, the companies may negotiate a rate so long as the  
20 negotiated rate is filed with the Commission (as, for example, part of a filed  
21 interconnection agreement). If the companies do not negotiate a rate, the proposal  
22 provides as follows. In the first situation, Qwest must obtain Commission  
23 approval before charging for a UNE or process that it previously offered without a  
24 charge. In the second and third situations, Qwest must develop a cost-based rate  
25 and submit that rate and related cost support to the Commission for review. Once  
26 that information is filed (and, under Eschelon's proposal, provided to

1 Eschelon),<sup>285</sup> Eschelon may order the product and service and will pay a  
2 Commission-approved interim rate if one is established, or the Qwest-proposed  
3 rate if no interim rate is set.

4 As part of Issue 22-90(a) (Section 22.6.1.1), Eschelon's language also addresses a  
5 situation not covered by Section 22.6.1 (Issue 22-90): If (1) Eschelon and Qwest  
6 have not agreed upon a negotiated rate, (2) the Commission has not established an  
7 interim rate, and (3) Qwest does not submit a proposed rate and cost support to  
8 the Commission within the specified time frame, the unapproved rates do not  
9 apply, and Qwest must provision the product in question at no additional  
10 charge.<sup>286</sup> Qwest and Eschelon agree that Qwest must provision the product at no  
11 additional charge under Section 22.6.1.1, but disagree (as with Issue 22-90) on the  
12 portion of the language dealing with a UNE or process that Qwest previously  
13 offered without a charge.

14 **Q. PLEASE EXPLAIN WHY ESCHELON'S PROPOSALS FOR ISSUES 22-90**  
15 **AND 22-90(a) ARE REASONABLE.**

16 A. The pricing standards of the federal rules require that rates, terms and conditions  
17 for network elements and methods of obtaining access to interconnection and

---

<sup>285</sup> As part of Issue 22-90, Eschelon proposes language in Section 22.6.1 that states that, except for negotiated rates, Qwest will provide a copy of the related cost support to Eschelon (subject to an applicable protective agreement, if the information is confidential) upon request or as otherwise ordered by the Commission.

<sup>286</sup> Section 22.6.1.1 thus ensures that Qwest cannot extend a period by which it imposes unapproved rates by not filing cost support with the Commission and requesting approval of the rates.

1 network elements<sup>287</sup> be just, reasonable, non-discriminatory,<sup>288</sup> and be established  
2 by state commissions based on the forward-looking cost pricing standard.<sup>289</sup> The  
3 agreed-upon language in Section 22.4 of the ICA recognizes that some products  
4 offered under the ICA may not have a Commission-approved rate yet, in which  
5 case the rate constitutes an interim rate. Clearly, to ensure compliance with the  
6 federal pricing rules, an unapproved rate should not remain unexamined by the  
7 state commission indefinitely. Similarly, a Commission-approved rate (such as  
8 the recurring loop rate) should not be undermined by allowing Qwest to  
9 unexpectedly and unilaterally announce that it will commence billing for work for  
10 which it is already recovering its costs in the approved rate. Such conduct would  
11 defeat not only the requirement that rates be cost based but also the requirements  
12 to obtain a Commission-approved amendment *before* changing the terms of the  
13 existing agreement under which the parties are already operating.

14 As discussed, Eschelon’s proposed language on Issues 22-90 and 22-90(a)  
15 follows a commission’s decision in a Minnesota 271 case and should be adopted  
16 to avoid the disparity that exists today in which Qwest may commence billing for  
17 a UNE or process that it previously offered without a charge in Oregon, unlike in  
18 Minnesota.

---

<sup>287</sup> 47 CFR § 51.501(b) specifies that Subpart F of the rules (47 CFR § 51.501 through 47 CFR § 51.515) that deals with the pricing standards for network elements uses the word “element” to include interconnection and methods of obtaining access to UNEs and interconnection.

<sup>288</sup> 47 CFR § 51.503(a).

<sup>289</sup> 47 CFR § 51.503(b). Although the rules allow state commissions to use proxies for forward-looking economic cost as an alternative to forward-looking costing method, 47 CFR § 51.513(a(1)) explains that the proxy ceilings are a temporary method used in the absence of sufficient cost information and until the state commission reviews the cost study.

1 In addition, Eschelon proposes in Issue 22-90 that Qwest make available to  
2 Eschelon its supporting cost study filed with the Commission. Eschelon's  
3 proposal is a narrow one requiring only that Qwest provide the information "upon  
4 request or as otherwise ordered by the Commission." Eschelon needs a  
5 mechanism that allows it to obtain in a timely manner the details of Qwest's  
6 filings that concern rates for UNEs offered under section 251. Eschelon needs to  
7 be able to review Qwest's supporting cost studies in order to make a decision on  
8 whether to intervene in the case regarding essential UNE products. Note that  
9 Eschelon would likely receive notice of a section 251 rate filing later officially –  
10 by intervening in the case. Without access to the rate information at the time of  
11 Qwest's filing, however, Eschelon is trapped in a Catch-22: It must intervene in  
12 the case in order to see the cost filing, but it needs the cost filing to decide  
13 whether or not to intervene. Eschelon may determine that it does not wish to  
14 intervene in the end, but in the meantime it has expended the money and  
15 resources required for intervention.

16 **Q. WHAT IS QWEST'S PROPOSAL REGARDING ISSUES 22-90 AND 22-**  
17 **90(A)?**

18 A. For Issues 22-90 and 22-90(a), Qwest disagrees with Eschelon's proposed  
19 language modifications and proposes exclusion from the ICA of Eschelon's  
20 proposed insertions.

21 Eschelon's proposal is more consistent with requirement of federal law that rates  
22 for UNEs and interconnection be just, reasonable, non-discriminatory and cost-

1 based.<sup>290</sup> And, only Eschelon’s proposal addresses the problems that arise when  
2 Qwest unexpectedly and unilaterally commences billing for work it previously  
3 performed at no additional charge under a Commission-approved ICA.

4 **Interim Rate Proposals – Issues 22-90(b) through 22-90(ae)**

5 **Q. PLEASE EXPLAIN ESCHELON’S PROPOSAL FOR ISSUES 22-90(b)**  
6 **THROUGH 22-90(ae).**

7 A. For Issues 22-90 (b) through (ae), both Qwest and Eschelon propose interim rates  
8 for specific Qwest products where rates have not been approved by the  
9 Commission.<sup>291</sup> Eschelon’s interim rate proposals are based on rates in the  
10 current Eschelon-Qwest interconnection agreement, Qwest’s own rate offers, and  
11 a review of approved rates in the other large Qwest states. Eschelon’s proposed  
12 interim rates are more reflective of prior Commission cost case decisions than the  
13 Qwest proposed interim rates. Qwest’s interim rate proposals completely ignore  
14 prior Commission decisions and in some cases have no cost support at all backing  
15 up these rates. In addition, Qwest’s rate proposals sometimes ignore Qwest’s rate  
16 offerings from its own negotiations template or SGAT, and in many cases  
17 Qwest’s proposed interim rates are higher than the rates Qwest offers itself in the  
18 Qwest-Qwest interconnection agreement.<sup>292</sup>

---

<sup>290</sup> 47 C.F.R. § 51.303.

<sup>291</sup> See proposed ICA Section 24.4.1.1, which states in the portion of this Section that is closed: “Rates reflected on Exhibit A that have not been approved by the Commission in a cost case and require Commission approval shall be considered as Interim rates (“Interim Rates”) by the Parties . . . .”

<sup>292</sup> As discussed with Design Changes and UCCRE, Qwest Corporation (Qwest) has an interconnection agreement with its CLEC, Qwest Communications Corp. This agreement was approved by the

1 **Q. SHOULD INTERIM RATES BE ADDRESSED IN THIS PROCEEDING?**

2 A. Yes. Both companies have proposed interim rates for these issues. Yet, Qwest  
3 also takes the inconsistent position that rates should not be addressed in this  
4 proceeding, but rather, should be deferred to a later generic cost case. In other  
5 states Qwest has sought to dismiss the rate issues from the arbitrations.<sup>293</sup>

6 Qwest is incorrect in claiming that rate issues are inappropriate for arbitration.  
7 The appropriate scope of this proceeding is established by federal law. Section  
8 252(b)(4)(c) of the Federal Telecommunications Act (the “Act”) requires the  
9 Commission to resolve each issue set forth in the petition.<sup>294</sup> The Act expressly  
10 envisions that individual arbitration proceedings may involve rates issues. To that  
11 end, Section 252(c) requires that a state commission, “in resolving *by arbitration*”  
12 any open issues and imposing conditions upon the parties to the agreement, “*shall*  
13 *establish any rates* for interconnection, services or network elements according to  
14 subsection (d) of this section.”<sup>295</sup> The FCC’s rules also recognize that state  
15 commissions may set rates in arbitration proceedings and therefore impose a duty  
16 to produce in negotiations cost data relevant to setting rates in arbitration.<sup>296</sup>

---

Commission in Order 04-630 as part of Docket ARB 616.

<sup>293</sup> In Arizona and Colorado, the ALJs allowed the interim rate issues to proceed at hearing, while taking the issue under advisement for consideration by the Commissions. Regarding the Washington order rejecting Qwest’s motion, see my discussion below.

<sup>294</sup> 47 U.S.C. § 252(b)(4)(c).

<sup>295</sup> 47 U.S.C. § 252(c) (emphasis added). Section 252(d) of the Act sets forth the applicable pricing standards for interconnection, network elements, and resale at wholesale rates of ILEC retail services. It states that rates shall be cost-based and nondiscriminatory. 47 U.S.C. § 252(d)(1)(A)(i) & (ii).

<sup>296</sup> 47 C.F.R. § 51.301(c)(8)(iii) (“If proven to the Commission, an appropriate state commission, or a court of competent jurisdiction, the following actions or practices, among others, violate the duty to

1       There would be no reason to require that this data be provided if rates were not  
2       proper subject for arbitration, and therefore the rule specifically refers to cost data  
3       relevant to setting rates “in arbitration.”<sup>297</sup> The ALJ in the Washington arbitration  
4       proceeding between Eschelon and Qwest relied on these provisions of the Act in  
5       denying Qwest’s motion to dismiss in that case, noting that the interim rates  
6       issues were raised in the petition for arbitration and the response and that “[T]he  
7       statute is mandatory and not only requires the Commission to establish rates but  
8       sets forth the standard by which those rates must be established.”<sup>298</sup>

9       Consideration of Eschelon’s interim rate proposals in this case is fully consistent  
10      with this Commission’s prior orders. In particular, in a previous cost docket, UT  
11      138 / 139, the Commission held that “work times and probabilities shall remain in  
12      effect until such time as USWC and GTE file revised analyses that are approved  
13      by the Commission.”<sup>299</sup> Thus, for the kind of rates that are at issue here –  
14      elements for which no Commission-approved rate has been set – the Commission

---

negotiate in good faith: . . . (8) Refusing to provide information necessary to reach agreement. Such refusal includes, but is not limited to: . . . (ii) Refusal by an incumbent LEC to furnish *cost data* that would be relevant to *setting rates* if the parties were *in arbitration*.”) (emphasis added).

<sup>297</sup> *Id.*

<sup>298</sup> *In the Matter of the Petition for Arbitration of an Interconnection Agreement Between Qwest Corporation and Eschelon Telecom, Inc. Pursuant to 47 U.S.C. § 252(b)*, Docket UT-063061, Order Denying Motion to Dismiss Issues, Order 10 (W.U.T.C. April 19, 2007). A copy of this order accompanies this brief as Attachment 7. See also *In the Matter of Petition of Buytel Communications, Inc. for Arbitration Pursuant to Section 252(b) to Resolve Open Issues for an Interconnection Agreement with Ameritech Indiana*, 2002 Ind. PUC LEXIS 277 at \*20 (I.P.U.C. 2002) (“The establishment of rates is precisely the type of issue that the Arbitration provisions of TA-96 were promulgated to address. While generic proceedings such as that established in Cause No. 40611 can promote the competition and policy goals of TA-96 by permitting the full development and exploration of forward-looking costs, nothing in TA-96 or in the FCC’s rules permits such a generic proceeding to limit a requesting carrier’s right to petition a state commission to arbitrate such an unresolved issue.”).

<sup>299</sup> Order No. 98-444, p. 82. (See Eschelon/23)

1 did not authorize Qwest to charge, even on an interim basis, any rate that it saw  
2 fit. Rather, the Commission anticipated that its previous cost case orders would  
3 be incorporated until such time that a new cost case established a different set of  
4 inputs and assumptions. CLECs must be given a fair opportunity to negotiate a  
5 rate or challenge Qwest's proposed rate outside the context of a cost case, such as  
6 in an arbitration proceeding like this one.

7 What should be made clear is that Qwest is also seeking to establish interim rates  
8 in this arbitration. The difference between Qwest and Eschelon on this point is  
9 that Qwest wants its rates to go into effect without any Commission scrutiny,  
10 while Eschelon seeks Commission review to assure that the rates that Qwest  
11 charges are not excessive.

12 The Commission's role here is to evaluate the evidence presented by the parties  
13 and determine which of the companies' proposed interim rates most closely  
14 approximates the TELRIC standard. The Washington Commission explained the  
15 relationship between generic cost proceedings and arbitration proceedings as  
16 follows:

17 The Commission stated that rates adopted in the pending  
18 arbitrations would be interim rates, pending the completion  
19 of the generic proceeding. Accordingly, the price proposals  
20 made in this arbitration have been reviewed with the goal  
21 of determining which offers a more reasonable interim rate,  
22 more closely based on what we believe to be accurately  
23 determined cost levels based on the evidence specifically

1 submitted in this docket, our recent prior actions regarding  
2 cost studies, and our expertise as regulators.<sup>300</sup>

3 **Q. WHAT RATES IS ESCHELON PROPOSING FOR ISSUES 22-90(B)**  
4 **THROUGH (AE)?**

5 A. The following table summarizes Eschelon's, as well as Qwest's, proposal for each  
6 disputed rate element:

1 **Q. PLEASE EXPLAIN THE BASIS FOR ESCHELON'S PROPOSED RATES.**

2 A. During negotiations Eschelon asked Qwest for cost studies in support of rates that  
3 had not been approved by the Commission.<sup>301</sup> Qwest provided cost studies for a  
4 number of rates, but did not produce cost support for all of the rates Qwest was  
5 proposing. Upon review of Qwest's cost studies and the Qwest proposed interim  
6 rates it became clear that: (1) Qwest ignored prior Commission orders regarding  
7 cost study inputs and instead was attempting to impose upon Eschelon's Qwest's  
8 "wish list" of rates; (2) In many cases Qwest's proposed interim rates are greater  
9 than the rates that Qwest and Eschelon have in their current interconnection  
10 agreement; (3) Qwest's proposed interim rates in Oregon were usually well in  
11 excess of TELRIC rates ordered by the Commissions in the other large Qwest  
12 states; (4) Qwest's proposed interim rates were sometimes higher than the rates  
13 Qwest was offering to carriers today in through Qwest's negotiations template;  
14 and (5) Qwest's proposed interim rates were sometimes higher than the rates  
15 contained in other carrier agreements including the rates that Qwest negotiated  
16 with itself in the Qwest-Qwest interconnection agreement.

17 To fix the problems with Qwest's proposed cost support or lack thereof and  
18 develop interim rates for these rate elements, Eschelon made the following  
19 modifications:

- 20
- Averaged rates approved by state Commissions in other large Qwest states

---

<sup>301</sup> Note that Eschelon also asked to review cost studies in a number of other situations.

1 in which Eschelon operates.<sup>302</sup> See, Exhibit A Sections 8.1.1.2, 8.1.4.1.1,  
2 8.1.4.1.2, 8.1.5.1.1 through 8.1.5.1.6, 8.1.9.2, 8.1.12, 8.1.14, 8.4.2.4.1  
3 through 8.4.2.4.4, 8.6.1.2, 8.6.2.2.2, 8.6.1.3, 8.7.2.1 through 8.7.2.4,<sup>303</sup>  
4 8.7.4, 8.8.1, 8.12.2, 8.12.4, 8.16.1 through 8.16.4, 9.2.5.5.1.2, 9.2.5.5.2.2,  
5 9.2.6.5.1.2, 9.2.6.5.2.2, 9.2.8, 9.6.7.1, 9.6.11.1 through 9.6.11.4, 9.7.1.1,  
6 9.7.1.2, 9.7.4.1.1, 9.7.4.1.2, 9.7.4.1.4,<sup>304</sup> 9.7.4.1.5,<sup>305</sup> 9.7.5.1.1, 9.7.5.1.2,  
7 9.7.5.1.5, 9.7.6, 9.20.1.1, 9.20.1.2, 9.20.2.1, 9.20.2.2, 9.20.3.1, 9.20.3.2,  
8 9.20.3.3, 9.20.4.1, 9.20.4.2, 9.20.4.3, 9.20.5.1, 9.20.5.2, 9.20.5.3, 9.20.6.1,  
9 9.20.6.2, 9.20.6.3, 9.20.9, 9.20.10, 9.23.6.2.1.1, 9.23.6.2.1.2, 9.23.6.3.1.1,  
10 9.23.6.3.1.2, 9.23.6.4.1.1, 9.23.6.4.1.2, 9.23.6.5, 9.23.6.7.2, 9.23.7.1.1.1,  
11 9.23.7.1.1.2, 9.23.7.2.1.1, 9.23.7.2.1.2, 9.23.7.3.1.1, 9.23.7.3.1.2,  
12 9.23.7.4.1.1, 9.23.7.4.1.2, 9.23.7.6, 9.23.7.11.1, 9.23.7.11.2, 10.7.12, and  
13 17.1.

- 14 • Proposed rate in the Eschelon/Qwest historical ICA. See, Exhibit A  
15 Sections 8.1.2.2, 8.1.2.3, 8.1.2.4, 8.1.8.1.1.1, 8.1.8.1.1.3, 8.1.8.1.1.5,  
16 8.1.8.1.1.7, 8.1.8.1.2.1, 8.1.8.1.2.3, 8.1.8.1.2.5, 8.1.8.1.2.7, 8.1.8.1.3.1  
17 through 8.1.8.1.3.4, 8.2.1.1, 8.3.1.1, 8.4.1.1, 8.15.4.1, and 8.15.4.2.
- 18 • Proposed rate from Qwest SGAT, Qwest Negotiations Template, Qwest  
19 cost support for rates across states, or Qwest proposed rate in other states.

---

<sup>302</sup> In some instances, Eschelon averaged approved rates from other states with Qwest proposed rates in other states.

<sup>303</sup> In every other state, Qwest proposes rates for these sections on a per foot basis. Eschelon's interim rate proposal is on a per foot basis, while Qwest's proposal is based on per request.

<sup>304</sup> For this rate element, Eschelon used both ordered rates and Qwest proposed rates in other states.

<sup>305</sup> For this rate element, Eschelon used both ordered rates and Qwest proposed rates in other states.

1 See, Exhibit A Sections 8.1.8.1.4.1 through 8.1.8.1.4.4, 8.1.16, 8.7.3.1  
2 through 8.7.3.3, 8.8.3, 8.13.1.1, 8.13.1.2.1 through 8.13.1.2.3, 8.13.1.3,  
3 8.13.1.4, 8.13.2.1, 8.13.2.2.1.1 through 8.13.2.2.1.3, 8.15.2.3, 8.17.1,  
4 8.17.2, and 10.7.12.1.

- 5 • Halved Qwest’s “wish list” rates. See, Exhibit A Sections 8.8.4, 8.15.2.1,  
6 and 8.15.2.2.
- 7 • Corrected Qwest’s cost studies to reflect Commission cost decisions. See,  
8 Exhibit A Sections 9.6.12, 9.23.6.8.1, 9.23.6.8.2, 9.23.7.7.1, and  
9 9.23.7.7.2.

10 **Q. HOW DO QWEST’S PROPOSED INTERIM RATES IGNORE PRIOR**  
11 **COMMISSION ORDERS?**

12 A. Much of Qwest’s cost support is based on its filings in UM 1025.<sup>306</sup> Qwest had  
13 indicated the rates based upon this cost support on Exhibit A with footnote 12.<sup>307</sup>  
14 UM 1025 was recently closed by the Commission on March 16, 2007.<sup>308</sup> Qwest’s  
15 cost study represents its advocacy regarding appropriate rates and does not  
16 incorporate prior Commission decisions regarding labor times, flow through,  
17 separation of mechanical and manual ordering, and overhead factors.<sup>309</sup> Interim

---

<sup>306</sup> Qwest filed cost studies in UM 1025 in September 2002, March 2003 and September 2003.

<sup>307</sup> Footnote 12 reads, “Rates proposed in UM 1025.” Though not all of Qwest’s interim rate proposals are based upon its proposals in UM 1025, none of Qwest’s interim rate proposals incorporate prior Commission decisions and instead are Qwest’s advocacy rates.

<sup>308</sup> See <http://apps.puc.state.or.us/orders/2007ords/07-101.pdf>.

<sup>309</sup> The Commission’s orders in UT 138/UT 139 established a set of inputs that should apply to Qwest’s non-recurring cost studies. This includes separation of manual and mechanical ordering costs (Order No. 98-444, p. 71) a flow through rate of 98% in the ordering process (Order No. 03-085,

1 rates should incorporate prior Commission decisions until such time that  
2 permanent rates are established by the Commission. The Commission found it its  
3 98-444 order in docket UT 138 / UT 139, that “work times and probabilities shall  
4 remain in effect until such time as USWC and GTE file revised analyses that are  
5 approved by the Commission.”<sup>310</sup> This conclusion makes sense; otherwise Qwest  
6 would have no incentive ever to establish permanent rates, since it could charge  
7 its “wish” rate indefinitely.

8 Exhibit Eschelon/23 contains excerpts from Commission Order 98-444 regarding  
9 non-recurring costs and Commission Order 03-085 in Docket UT 138/UT 139.

10 **Q. WHY DIDN'T ESCHELON ADJUST ALL OF THE QWEST COST**  
11 **STUDIES TO MAKE THEM CONSISTENT WITH THE COMMISSION'S**  
12 **ORDERS IN UT 138/UT 139?**

13 A. Eschelon does not have the information available to it in order to implement the  
14 adjustments to labor times and probabilities. In Order No 03-085 the Commission  
15 found: “that Qwest’s nonrecurring cost studies shall include WTAP estimates  
16 calculated using the averaging process recommended by the Joint CLECs.”<sup>311</sup>  
17 Eschelon does not have this information available to it in order to make these  
18 adjustments to the current non-recurring cost studies. As part of this proceeding

---

page 3 and Order No. 98-444, p. 71), a reduction to labor times and probabilities (Order No. 03-085, page 11 and Order No. 98-444, p. 82), and updates to Qwest’s overhead factors (Order No. 98-444, p. 101). (See Eschelon/23.)

<sup>310</sup> Order No. 98-444, p. 82. (See Eschelon/23.)

<sup>311</sup> Order No. 03-085, p. 11. (See Eschelon/23.)

1 the Commission could order that for the purpose of interim non-recurring rates,  
2 Qwest incorporate the Commission's findings in UT 138/UT 139.

3 **Q. IS AN AVERAGE OF COMMISSION APPROVED RATES IN THE FIVE**  
4 **LARGEST QWEST STATES AN APPROPRIATE METHOD FOR**  
5 **ESTABLISHING INTERIM RATES?**

6 A. Yes. As mentioned previously, it is important to recognize that both companies  
7 have proposed interim rates and therefore the Commission will establish interim  
8 rates in this proceeding. Permanent rates will be established by the Commission  
9 in a generic cost docket.

10 Second, as discussed with Design Changes [Issue No. 4-5(c)], Qwest has  
11 acknowledged the reasonableness of the five large state averaging approach by  
12 agreeing to this approach as part of the negotiations in Minnesota for the rates  
13 9.20.2.1 and 9.20.2.2 -- Additional Labor Installation, per Half Hour or fraction  
14 thereof, overtime and premium. The table below is an excerpt from the Exhibit A  
15 in the Minnesota Eschelon / Qwest arbitration.

		Recurring	Nonrecurring	REC	NRC
<b>9.20</b>	<b>Miscellaneous Charges</b>				
9.20.1	Intentionally Left Blank				
9.20.2	Additional Labor Installation, Per Half Hour or fraction thereof				
9.20.2.1	Additional Labor installation - Overtime		\$8.79		++
9.20.2.2	Additional Labor installation - Premium		\$17.57		++
Notes:					
++	Negotiated rate until Commission approves a rate.				

1

2 The negotiated rates in this table were the average of Commission approved rates  
3 in Arizona, Colorado, Utah and Washington. The table below shows the rates in  
4 the four states mentioned above.

		AZ	CO	UT	WA	AVG
<b>9.20</b>	<b>Miscellaneous Charges</b>					
9.20.2	Additional Labor Installation, per Half Hour or fraction thereof					
9.20.2.1	Additional Labor Installation - Overtime	\$8.89	\$9.03	\$8.28	\$8.94	<b>\$8.79</b>
9.20.2.2	Additional Labor Installation - Premium	\$17.78	\$18.06	\$16.55	\$17.89	<b>\$17.57</b>

5

6 The six large states in Qwest’s region are similar in that these states are most  
7 likely to have closely scrutinized contested cost cases involving the largest  
8 CLECs in Qwest’s region. Oregon was not used because there are no  
9 Commission approved rates for this rate element.

10 These rate elements in Oregon are part of Issue No. 22-90(ac). For this issue  
11 Eschelon is proposing the same rates that Qwest agreed to in Minnesota. In  
12 Oregon Qwest is proposing \$14.86 and \$19.81, clearly well above the rates  
13 approved by the Commissions in the other large states in the Qwest region.

1 **Q. WHAT IS THE SIGNIFICANCE OF THE RATES IN THE CURRENT**  
2 **ESCHELON-QWEST INTERCONNECTION AGREEMENT?**

3 A. The current Eschelon-Qwest interconnection agreement has a number of  
4 collocation rate elements that Qwest is proposing to replace with Qwest's  
5 advocacy rates for Collocation. Eschelon should not be forced to replace  
6 negotiated rates with unapproved Qwest proposed interim rates. In many cases  
7 Qwest's proposed interim rates are significantly in excess of the rates for these  
8 products that are in the historical Qwest-Eschelon ICA. Qwest's proposed rates  
9 would potentially increase Eschelon's recurring collocation cost for certain rate  
10 elements. Because Qwest has been generally unwilling to negotiate interim rates,  
11 and instead has offered a take it or leave it approach, Qwest should not be able to  
12 change the rates that exist between Eschelon and Qwest, without agreement from  
13 Eschelon, simply because Qwest desires different rates.

14 The table below shows a comparison of rates from Eschelon's current ICA with  
15 Qwest that Qwest is attempting to replace with its interim rate proposal. For  
16 many of the rate elements, Qwest's interim proposed non-recurring charges are  
17 almost double the non-recurring charges that Eschelon pays today.<sup>312</sup>

---

<sup>312</sup> Note that the NRC in 8.1.2.4 may appear as an anomaly, but it is not. The recurring and non-recurring rate elements need to be considered in conjunction. Qwest's proposal would raise the recurring rate by four times, but reduce the non-recurring rate in half. If this proposal were adopted Eschelon would receive the worst of all worlds for any of this element Eschelon has historically purchased. This is because, Eschelon would have paid the high NRC and with Qwest's change would not have to pay the high recurring charge.

Table. Eschelon's Historical Collocation Rates Compared with Qwest's Interim Proposals						
Issue #	Exhibit A Section	Rate Element	RATE PROPOSAL			
			Eschelon		Qwest	
			REC	NRC	REC	NRC
22-90(c)	8.1.2.2	Cageless & Caged Standard Shared, per Fiber	\$4.14		\$5.92	
22-90(c)	8.1.2.3	Cross Connect, per Fiber	\$3.66		\$6.09	
22-90(c)	8.1.2.4	Express, per Cable	\$21.49	\$20,279.08	\$96.38	\$9,415.02
22-90(e)	8.1.8.1.1.1	Collocation Termination - Shared Access DS0 - Cable Placement, per 100 Pair Block	\$0.32	\$127.42	\$0.37	\$230.24
22-90(e)	8.1.8.1.1.3	Collocation Termination - Shared Access DS0 - Cable, per 100 Pair Block	\$0.45	\$178.10	\$0.52	\$321.83
22-90(e)	8.1.8.1.1.5	Collocation Termination - Shared Access DS0 - Blocks, per 100 Pair Block	\$0.78	\$310.50	\$0.91	\$561.07
22-90(e)	8.1.8.1.1.7	Collocation Termination - Shared Access DS0 - Block Placement, per 100 Pair Block	\$0.33	\$134.10	\$0.39	\$242.31
22-90(e)	8.1.8.1.2.1	Collocation Termination - Shared Access DS1 - Cable Placement, per 28 DS1s	\$0.47	\$207.44	\$0.60	\$399.70
22-90(e)	8.1.8.1.2.3	Collocation Termination - Shared Access DS1 - Cable, per 28 DS1s	\$0.44	\$192.80	\$0.56	\$371.50
22-90(e)	8.1.8.1.2.5	Collocation Termination - Shared Access DS1 - Panel, per 28 DS1s	\$0.31	\$133.13	\$0.39	\$256.52
22-90(e)	8.1.8.1.2.7	Collocation Termination - Shared Access DS1 - Panel Placement, per 28 DS1s	\$0.09	\$42.72	\$0.12	\$82.31
22-90(e)	8.1.8.1.3.1	Collocation Termination - Shared Access DS3 - Cable Placement, per termination	\$0.17	\$73.22	\$0.22	\$147.89
22-90(e)	8.1.8.1.3.2	Collocation Termination - Shared Access DS3 - Cable, per termination	\$0.27	\$118.77	\$0.36	\$239.90
22-90(e)	8.1.8.1.3.3	Collocation Termination - Shared Access DS3 - Connector, per termination	\$0.28	\$121.51	\$0.37	\$245.44
22-90(e)	8.1.8.1.3.4	Collocation Termination - Shared Access DS3 - Connector Placement, per termination	\$0.02	\$9.84	\$0.03	\$19.88
22-90(k)	8.2.1.1	Quote Preparation Fee		\$2,317.79		\$4,951.46
22-90(l)	8.3.1.1	Quote Preparation Fee		\$2,317.79		\$4,956.18
22-90(l)	8.4.1.1	Quote Preparation Fee		\$2,317.79		\$5,403.92
22-90(l)	8.15.4.1	Cageless		\$2,317.79		\$4,956.18
22-90(l)	8.15.4.2	Caged		\$2,317.79		\$5,403.92

1

2 Eschelon proposes that unless agreement is otherwise reached, the historical rate  
3 continue to be used as an interim rate.

4 **Q. DOES QWEST OFFER THE SAME RATES TO ALL CLECS IN**  
5 **OREGON?**

6 A. No. Qwest offers different rates to different CLECs. One example is 22-90(t),  
7 Power Reduction / Power Restoration rates. Eschelon's proposal for these rates is  
8 based on Qwest's negotiation template dated February 28, 2006. These rates are  
9 contained in the Interconnection agreement of at least one other CLEC, AT&T.  
10 Qwest has updated this template in August 2006, changing its "offer" for rate  
11 elements in Issue 22-90(g). In other words, if one CLEC signed an ICA with  
12 Qwest in March 2006 by using the then-effective February 2006 negotiation  
13 template, and another CLEC signed an ICA with Qwest in October 2006 by using  
14 the currently-effective August 2006 negotiation template, these two CLECs would

1 have different rates for the same rate elements. Eschelon initially accepted the  
 2 rates proposed by Qwest, which are now Eschelon’s proposed rates, but Qwest  
 3 then increased its interim rate proposal. The table below shows that Qwest’s  
 4 current interim rate proposal for power reduction and power restoration are  
 5 significantly higher than what Qwest has offered to other CLECs.

Table. Power Restoration / Power Reduction						
Issue #	Exhibit A Section	Rate Element	RATE PROPOSAL			
			Eschelon		Qwest	
			REC	NRC	REC	NRC
22-90(t)	8.13.1.1	Power Reduction, Quote Preparation Fee		\$411.00		\$811.18
22-90(t)	8.13.1.2.1	Power Reduction, Less Than 60 Amps		\$346.00		\$624.52
22-90(t)	8.13.1.2.2	Power Reduction, Equal to 60 Amps		\$346.00		\$898.00
22-90(t)	8.13.1.2.3	Power Reduction, Greater Than 60 Amps		\$587.00		\$1,140.52
22-90(t)	8.13.1.3	Power Off, per Feed Set		\$587.00	\$802.04	
22-90(t)	8.13.1.4	Power Maintenance Charge (Reservation Charge), per Fuse Set	\$37.00		\$57.32	
22-90(t)	8.13.2.1	Power Restoration, Quote Preparation Fee, per Office		\$411.00		\$811.18
22-90(t)	8.13.2.2.1.1	Power Restoration with Reservation, Less Than 60 Amps		\$346.00		\$624.52
22-90(t)	8.13.2.2.1.2	Power Restoration with Reservation, Equal to 60 Amps		\$346.00		\$898.00
22-90(t)	8.13.2.2.1.3	Power Restoration with Reservation, Greater Than 60 Amps		\$587.00		\$1,140.52

6  
 7 In some cases Qwest offers to its own CLEC rates that are lower than what Qwest  
 8 is proposing to charge Eschelon. The table below shows Eschelon’s proposal for  
 9 selected collocation rates, Qwest’s proposal, and the rates contained in the Qwest-  
 10 Qwest interconnection agreement.<sup>313</sup> In some cases the Eschelon proposal is  
 11 higher than what Qwest has in its own Qwest-Qwest interconnection agreement,  
 12 yet Qwest is insisting that Eschelon pay yet even higher rates.

<sup>313</sup> Eschelon/25 contains additional examples of where the rates in the Qwest-Qwest interconnection agreement are less than the interim rates proposed by Qwest for Eschelon.

Table. Qwest Proposals Compared with Qwest-Qwest ICA								
Issue #	Exhibit A Section	Rate Element	RATE PROPOSAL					
			Eschelon		Qwest		Qwest-Qwest ICA	
			REC	NRC	REC	NRC	REC	NRC
22-90(d)	8.1.4.1.1	Power Plant, Less Than 60 Amps	\$9.20		\$11.95		\$ 7.52	
22-90(d)	8.1.4.1.2	Power Plant, Equal to or Greater Than 60 Amps	\$7.32		\$9.31		\$ 7.52	
22-90(k)	8.2.1.1	Quote Preparation Fee		\$2,317.79		\$4,951.46		\$ 1,500.00
22-90(l)	8.3.1.1	Quote Preparation Fee		\$2,317.79		\$4,956.18		\$ 1,500.00
22-90(l)	8.4.1.1	Quote Preparation Fee		\$2,317.79		\$5,403.92		\$ 1,500.00
22-90(l)	8.15.4.1	Cageless		\$2,317.79		\$4,956.18		\$ 1,500.00
22-90(l)	8.15.4.2	Caged		\$2,317.79		\$5,403.92		\$ 1,500.00
22-90(w)	8.17.1	Joint Testing - Set Up Fee (price contains a one hour set up fee)		\$40.96		\$65.20		\$ 40.96
22-90(w)	8.17.2	Joint Testing - Test Time Fee, per half hour		\$20.48		\$27.62		\$ 20.48

**Q. DID QWEST PROVIDE COST SUPPORT FOR ALL OF ITS INTERIM RATE PROPOSALS?**

A. No. Eschelon asked Qwest to provide cost support for all interim rates. Qwest claimed that its interim rates were “estimated TELRIC” but failed to provide any cost support for a number of rates. For some of these unsupported rates, Eschelon was able to calculate an average from approved rates in other states,<sup>314</sup> or proposed a rate from another state as a proxy.<sup>315</sup> In other cases, Eschelon did not have any information, such as Qwest’s provided cost study or commission-approved rates in other states, to make a specific proposal for a rate element,<sup>316</sup> and in these instances, the absence of Qwest’s cost studies supporting rates that Qwest has claimed to be TELRIC would support a rate of zero until such time that Qwest provides cost support. In these instances, Eschelon used the two available boundaries – zero and Qwest’s “wish list” rate – to calculate an average “expected” rate (effectively dividing Qwest’s proposal by a factor of two).

<sup>314</sup> See, e.g., 8.8.1 (Issue 22-90(r)).  
<sup>315</sup> See, e.g., 8.8.3 (Issue 22-90(r)).  
<sup>316</sup> See e.g., 8.15.2.1 and 8.15.2.2 (Issue 22-90(u)).

1 Eschelon's proposal is conservative because, as mentioned above, the absence of  
2 Qwest's cost studies for these rates suggests that interim rates would be more  
3 appropriately set at zero.

4 **Q. PLEASE SUMMARIZE ESCHELON'S INTERIM RATE PROPOSALS.**

5 A. The following table provides a brief summary of Eschelon's basis for its proposed  
6 rates; a more detailed explanation is contained in Eschelon/25.

Table. Basis for Eschelon's Rate Proposals for Issues 22-90(b) through 22-90(ae)			RATE PROPOSAL		Basis for Eschelon's Proposal
Issue #	Exhibit A Section	Rate Element	Eschelon		
			REC	NRC	
22-90(b)	8.1.1.2	Cable Augment Quote Preparation Fee		\$700.00	Average of Approved Rates from other states.
22-90(c)	8.1.2.2	Cageless & Caged Standard Shared, per Fiber	\$4.14		Rate from Historical ICA
22-90(c)	8.1.2.3	Cross Connect, per Fiber	\$3.66		Rate from Historical ICA
22-90(c)	8.1.2.4	Express, per Cable	\$21.49	\$20,279.08	Rate from Historical ICA
22-90(d)	8.1.4.1.1	Power Plant, Less Than 60 Amps	\$9.20		Average of Approved Rates from other states.
22-90(d)	8.1.4.1.2	Power Plant, Equal to or Greater Than 60 Amps	\$7.32		Average of Approved Rates from other states.
22-90(d)	8.1.5.1.1	Backup AC Power Feed, 120V	\$17.13		Average of Approved Rates from other states.
22-90(d)	8.1.5.1.2	208V, Single Phase	\$29.69		Average of Approved Rates from other states.
22-90(d)	8.1.5.1.3	208V, Three Phase	\$51.37		Average of Approved Rates from other states.
22-90(d)	8.1.5.1.4	240V, Single Phase	\$34.26		Average of Approved Rates from other states.
22-90(d)	8.1.5.1.5	240V, Three Phase	\$59.27		Average of Approved Rates from other states.
22-90(d)	8.1.5.1.6	480V, Three Phase	\$118.55		Average of Approved Rates from other states.
22-90(e)	8.1.8.1.1.1	Collocation Termination - Shared Access DS0 - Cable Placement, per 100 Pair Block	\$0.32	\$127.42	Rate from Historical ICA
22-90(e)	8.1.8.1.1.3	Collocation Termination - Shared Access DS0 - Cable, per 100 Pair Block	\$0.45	\$178.10	Rate from Historical ICA
22-90(e)	8.1.8.1.1.5	Collocation Termination - Shared Access DS0 - Blocks, per 100 Pair Block	\$0.78	\$310.50	Rate from Historical ICA
22-90(e)	8.1.8.1.1.7	Collocation Termination - Shared Access DS0 - Block Placement, per 100 Pair Block	\$0.33	\$134.10	Rate from Historical ICA
22-90(e)	8.1.8.1.2.1	Collocation Termination - Shared Access DS1 - Cable Placement, per 28 DS1s	\$0.47	\$207.44	Rate from Historical ICA
22-90(e)	8.1.8.1.2.3	Collocation Termination - Shared Access DS1 - Cable, per 28 DS1s	\$0.44	\$192.80	Rate from Historical ICA
22-90(e)	8.1.8.1.2.5	Collocation Termination - Shared Access DS1 - Panel, per 28 DS1s	\$0.31	\$133.13	Rate from Historical ICA
22-90(e)	8.1.8.1.2.7	Collocation Termination - Shared Access DS1 - Panel Placement, per 28 DS1s	\$0.09	\$42.72	Rate from Historical ICA
22-90(e)	8.1.8.1.3.1	Collocation Termination - Shared Access DS3 - Cable Placement, per termination	\$0.17	\$73.22	Rate from Historical ICA
22-90(e)	8.1.8.1.3.2	Collocation Termination - Shared Access DS3 - Cable, per termination	\$0.27	\$118.77	Rate from Historical ICA
22-90(e)	8.1.8.1.3.3	Collocation Termination - Shared Access DS3 - Connector, per termination	\$0.28	\$121.51	Rate from Historical ICA
22-90(e)	8.1.8.1.3.4	Collocation Termination - Shared Access DS3 - Connector Placement, per termination	\$0.02	\$9.84	Rate from Historical ICA
22-90(e)	8.1.8.1.4.1	Fiber Terminations - Terminations, per 12 Fibers	\$12.39	\$1,601.47	Eschelon's proposal is based on cost support supplied by Qwest for rates across Qwest states. Qwest proposes higher rates in OR than it proposes in other states.
22-90(e)	8.1.8.1.4.2	Fiber Terminations - Add'l Connector, if applicable	\$0.53	\$435.37	
22-90(e)	8.1.8.1.4.3	Fiber Terminations - Cable Racking, Shared, per 12 Fibers	\$19.61		
22-90(e)	8.1.8.1.4.4	Fiber Terminations - Cable Racking, Dedicated	\$1.85	\$1,516.92	
22-90(f)	8.1.9.2	Card Access, per Employee, per Central Office	\$6.20		Average of Approved Rates from other states.
22-90(g)	8.1.12	Space Availability Report		\$234.38	Average of Approved Rates from other states.
22-90(h)	8.1.14	Collocation Space Option Administration Fee		\$1,029.40	Average of Approved Rates from other states.
22-90(i)	8.1.16	Joint Inventory Visit Fee, per Visit		\$1,610.12	Eschelon proposes the same rate that Qwest proposes in other states.
22-90(k)	8.2.1.1	Quote Preparation Fee		\$2,317.79	Rate from Historical ICA
22-90(l)	8.3.1.1	Quote Preparation Fee		\$2,317.79	Rate from Historical ICA
22-90(l)	8.4.1.1	Quote Preparation Fee		\$2,317.79	Rate from Historical ICA
22-90(l)	8.15.4.1	Cageless		\$2,317.79	Rate from Historical ICA
22-90(l)	8.15.4.2	Caged		\$2,317.79	Rate from Historical ICA
22-90(m)	8.4.2.4.1	Space Construction and Site Preparation - cage up to 100 Sq. Ft.	\$41.60	\$26,168.10	Average of Approved Rates from other states.
22-90(m)	8.4.2.4.2	Space Construction and Site Preparation - cage 101-200 Sq. Ft.	\$51.08	\$27,852.73	Average of Approved Rates from other states.
22-90(m)	8.4.2.4.3	Space Construction and Site Preparation - cage 201-300 Sq. Ft.	\$54.27	\$29,650.53	Average of Approved Rates from other states.
22-90(m)	8.4.2.4.4	Space Construction and Site Preparation - cage 301-400 Sq. Ft.	\$58.09	\$31,797.64	Average of Approved Rates from other states.
22-90(n)	8.6.1.2	FDI Terminations, per 25 Pair		\$506.92	Average of Approved Rates from other states.
22-90(n)	8.6.2.2.2	FDI Terminations, per 25 Pair		\$506.92	Average of Approved Rates from other states.
22-90(o)	8.7.2.1	Cable Racking - DS0	\$0.15		Average of Approved Rates from other states.
22-90(o)	8.7.2.2	Cable Racking - DS1	\$0.16		Average of Approved Rates from other states.
22-90(o)	8.7.2.3	Cable Racking - DS3	\$0.14		Average of Approved Rates from other states.
22-90(p)	8.7.3.1	Virtual Connections - DS0, per 100 Connections		\$191.23	Qwest SGAT contains lower rates than what Qwest proposes. Eschelon proposes the rates from the SGAT.
22-90(p)	8.7.3.2	Virtual Connections - DS1, per 28 Connections		\$89.56	
22-90(p)	8.7.3.3	Virtual Connections - DS3, per Fiber Spliced		\$6.11	
22-90(q)	8.7.4	Cable Hole, if applicable		\$434.08	Average of Approved Rates from other states.
22-90r	8.8.1	ICDF Collocation - Quote Preparation Fee		\$700.25	Average of Approved Rates from other states; Qwest provides no cost support.
22-90r	8.8.3	ICDF Collocation - DS1 Circuit, per Two Legs		\$75.00	Qwest provided no cost support. In a recent MN cost case, Qwest proposed \$74.93, below Qwest's proposed rate, based on this Eschelon proposes \$75.
22-90r	8.8.4	ICDF Collocation - DS3 Circuit, per Two Legs		\$612.89	Qwest provided no cost support. Eschelon divided Qwest's proposed interim rate in half.
22-90(s)	8.12.2	FC Collocation Engineering Fee, per Job		\$700.25	Average of Approved Rates from other states.
22-90(s)	8.12.4	FC Collocation Fiber Entrance Facility Charge, per Cable, minimum 12 Strands	\$7.10	\$850.15	Average of Approved Rates from other states.
22-90(t)	8.13.1.1	Power Reduction, Quote Preparation Fee		\$411.00	Eschelon's proposed rates are from a Qwest multistate rate proposal, contained in many Qwest negotiations template, that Qwest recently offered.
22-90(t)	8.13.1.2.1	Power Reduction, Less Than 60 Amps		\$346.00	
22-90(t)	8.13.1.2.2	Power Reduction, Equal to 60 Amps		\$346.00	
22-90(t)	8.13.1.2.3	Power Reduction, Greater Than 60 Amps		\$587.00	
22-90(t)	8.13.1.3	Power Off, per Feed Set		\$587.00	
22-90(t)	8.13.1.4	Power Maintenance Charge (Reservation Charge), per Fuse Set	\$37.00		
22-90(t)	8.13.2.1	Power Restoration, Quote Preparation Fee, per Office		\$411.00	
22-90(t)	8.13.2.2.1.1	Power Restoration with Reservation, Less Than 60 Amps		\$346.00	
22-90(t)	8.13.2.2.1.2	Power Restoration with Reservation, Equal to 60 Amps		\$346.00	
22-90(t)	8.13.2.2.1.3	Power Restoration with Reservation, Greater Than 60 Amps		\$587.00	

22-90(u)	8.15.2.1	Collocation Available Inventory, Special Site Assessment Fee		\$597.56	Qwest provided no cost support. Eschelon divided Qwest's proposed interim rate in half.
22-90(u)	8.15.2.2	Collocation Available Inventory, Network Systems Assessment Fee		\$909.63	Qwest provided no cost support. Eschelon divided Qwest's proposed interim rate in half.
22-90(u)	8.15.2.3	Collocation Available Inventory, Site Survey Fee		\$150.00	Qwest provided no cost support; Qwest proposed \$150 in multiple other Qwest states. Eschelon proposes \$150 as an interim rate.
22-90(v)	8.16.1	Collocation Decommissioning - Add'l Labor Other Basic		\$26.60	Average of Approved Rates from other states; Qwest provides no cost support.
22-90(v)	8.16.2	Collocation Decommissioning - Add'l Labor Other Overtime		\$35.50	Average of Approved Rates from other states; Qwest provides no cost support.
22-90(v)	8.16.3	Collocation Decommissioning - Add'l Labor Other Premium		\$44.42	Average of Approved Rates from other states; Qwest provides no cost support.
22-90(v)	8.16.4	Collocation Decommissioning - Add'l Dispatch		\$57.70	Average of Approved Rates from other states; Qwest provides no cost support.
22-90(w)	8.17.1	Joint Testing - Set Up Fee (price contains a one hour set up fee)		\$40.96	Qwest provided on cost support; Eschelon's proposed rates come from Qwest's negotiations template.
22-90(w)	8.17.2	Joint Testing - Test Time Fee, per half hour		\$20.48	Qwest provided on cost support; Eschelon's proposed rates come from Qwest's negotiations template.
22-90(x)	9.2.5.5.1.2	DS1 Loop Installation - Basic Installation with Cooperative Testing - Mechanized (first)		\$150.26	Average of Approved Rates from other states.
22-90(x)	9.2.5.5.2.2	DS1 Loop Installation - Basic Installation with Cooperative Testing - Mechanized (each add'l)		\$121.94	Average of Approved Rates from other states.
22-90(x)	9.2.6.5.1.2	DS3 Loop Installation - Basic Installation with Cooperative Testing - Mechanized (first)		\$150.26	Average of Approved Rates from other states.
22-90(x)	9.2.6.5.2.2	DS3 Loop Installation - Basic Installation with Cooperative Testing - Mechanized (each add'l)		\$121.94	Average of Approved Rates from other states.
22-90(y)	9.2.8	Private Line / Special Access to Unbundled Loop Conversion		\$16.72	Average of Approved Rates from other states.
22-90(aa)	9.6.11.1	UDIT Rearrangement - DS0 Single Office		\$122.25	Average of Approved Rates from other states.
22-90(aa)	9.6.11.2	UDIT Rearrangement - DS0 Dual Office		\$127.98	Average of Approved Rates from other states.
22-90(aa)	9.6.11.3	UDIT Rearrangement - High Capacity Single Office		\$145.05	Average of Approved Rates from other states.
22-90(aa)	9.6.11.4	UDIT Rearrangement - High Capacity Dual Office		\$151.17	Average of Approved Rates from other states.
22-90(aa)	9.6.12	Private Line / Special Access to UDIT Conversion		\$66.70	Eschelon adjusted Qwest's cost study to make it consistent with the Commission's decision in the UT 138/139 case. There are no Commission ordered rates for this element to be used as a comparison.
22-90(aa)	9.23.6.5	Private Line / Special Access to LMC Conversion		\$16.72	Average of Approved Rates from other states.
22-90(aa)	9.23.7.6	Private Line / Special Access to EEL Conversion		\$16.72	Average of Approved Rates from other states.
22-90(ab)	9.7.1.1	UDF, Initial Records Inquiry, Simple		\$135.57	Average of Approved Rates from other states.
22-90(ab)	9.7.1.2	UDF, Initial Records Inquiry, Complex		\$169.70	Average of Approved Rates from other states.
22-90(ab)	9.7.4.1.1	UDF-IDF Single Strand Order Charge, per First Strand/Route/Order		\$373.22	Average of Approved Rates from other states.
22-90(ab)	9.7.4.1.2	UDF-IDF Single Strand Order Charge, per Add'l Strand/Route/Order		\$187.08	Average of Approved Rates from other states.
22-90(ab)	9.7.4.1.4	UDF-IDF Single Strand Termination, per Strand/Office	\$4.01		Average of rates from other states, both approved and Qwest proposed. Qwest provided no cost support.
22-90(ab)	9.7.4.1.5	UDF-IDF Single Strand Fiber Cross Connect, per Strand	\$1.84	\$11.65	Average of rates from other states, both approved and Qwest proposed. Qwest provided no cost support.
22-90(ab)	9.7.5.1.1	UDF-IDF - per pair, Order Charge, per First pair/Route/Order		\$373.22	Average of Approved Rates from other states.
22-90(ab)	9.7.5.1.2	UDF-IDF - per pair, Order Charge, per Add'l pair/Route/Order		\$187.08	Average of Approved Rates from other states.
22-90(ab)	9.7.5.1.5	UDF-IDF - per pair, Fiber Cross Connect, per pair	\$3.55	\$11.65	Average of Approved Rates from other states.
22-90(ab)	9.7.6.	Dark Fiber Splice		\$565.67	Average of Approved Rates from other states.
22-90(ac)	9.20.1.1	Add'l Engineering, per half hour or fraction thereof - Basic		\$30.91	Average of Approved Rates from other states.
22-90(ac)	9.20.1.2	Add'l Engineering, per half hour or fraction thereof - Overtime		\$38.22	Average of Approved Rates from other states.
22-90(ac)	9.20.2.1	Add'l Labor Installation, per half hour or fraction thereof - Overtime		\$8.89	Average of Approved Rates from other states.
22-90(ac)	9.20.2.2	Add'l Labor Installation, per half hour or fraction thereof - Premium		\$17.57	Average of Approved Rates from other states.
22-90(ac)	9.20.3.1	Add'l Labor Other - (Optional testing) Basic		\$26.94	Average of Approved Rates from other states.
22-90(ac)	9.20.3.2	Add'l Labor Other - (Optional testing) Overtime		\$35.98	Average of Approved Rates from other states.
22-90(ac)	9.20.3.3	Add'l Labor Other - (Optional testing) Premium		\$45.03	Average of Approved Rates from other states.
22-90(ac)	9.20.4.1	Testing and Maintenance, per half hour or fraction thereof - Basic		\$28.62	Average of Approved Rates from other states.
22-90(ac)	9.20.4.2	Testing and Maintenance, per half hour or fraction thereof - Overtime		\$35.72	Average of Approved Rates from other states.
22-90(ac)	9.20.4.3	Testing and Maintenance, per half hour or fraction thereof - Premium		\$47.83	Average of Approved Rates from other states.
22-90(ac)	9.20.5.1	Maintenance of Service, per half hour or fraction thereof, Basic		\$26.94	Average of Approved Rates from other states.
22-90(ac)	9.20.5.2	Maintenance of Service, per half hour or fraction thereof, Overtime		\$35.98	Average of Approved Rates from other states.
22-90(ac)	9.20.5.3	Maintenance of Service, per half hour or fraction thereof, Premium		\$45.03	Average of Approved Rates from other states.
22-90(ac)	9.20.6.1	Add'l Cooperative Acceptance Testing, per half hour or fraction thereof, Basic		\$28.62	Average of Approved Rates from other states.
22-90(ac)	9.20.6.2	Add'l Cooperative Acceptance Testing, per half hour or fraction thereof, Overtime		\$35.72	Average of Approved Rates from other states.
22-90(ac)	9.20.6.3	Add'l Cooperative Acceptance Testing, per half hour or fraction thereof, Premium		\$47.83	Average of Approved Rates from other states.
22-90(ac)	9.20.9	Additional Dispatch		\$63.63	Average of Approved Rates from other states.
22-90(ac)	9.20.10	Date Change		\$7.48	Average of Approved Rates from other states.
22-90(ad)	9.6.7.1	DS0 Low Side Channelization	\$10.89		Average of Approved Rates from other states.
22-90(ad)	9.23.6.2.1.1	LMC 2-Wire Loop Installation, First		\$118.12	Average of Approved Rates from other states.
22-90(ad)	9.23.6.2.1.2	LMC 2-Wire Loop Installation, Add'l		\$66.68	Average of Approved Rates from other states.
22-90(ad)	9.23.6.3.1.1	LMC 4-Wire Loop Installation, First		\$118.12	Average of Approved Rates from other states.
22-90(ad)	9.23.6.3.1.2	LMC 4-Wire Loop Installation, Add'l		\$66.68	Average of Approved Rates from other states.
22-90(ad)	9.23.6.4.1.1	LMC DS1 Loop Installation, First		\$155.41	Average of Approved Rates from other states.
22-90(ad)	9.23.6.4.1.2	LMC DS1 Loop Installation, Add'l		\$125.06	Average of Approved Rates from other states.
22-90(ad)	9.23.6.7.2	DS1/DS0 Low Side Channelization	\$7.09		Average of Approved Rates from other states.

1

22-90(ad)	9.23.6.8.1	LMC Rearrangement DS0		\$97.21	Eschelon adjusted Qwest's cost study to make it consistent with the Commission's decision in the UT 138/139 case. There are no Commission ordered rates for this element to be used as a comparison.
22-90(ad)	9.23.6.8.2	LMC Rearrangement High Capacity		\$97.62	Eschelon adjusted Qwest's cost study to make it consistent with the Commission's decision in the UT 138/139 case. There are no Commission ordered rates for this element to be used as a comparison.
22-90(ad)	9.23.7.7.1	EEL Rearrangement DS0		\$97.21	Eschelon adjusted Qwest's cost study to make it consistent with the Commission's decision in the UT 138/139 case. There are no Commission ordered rates for this element to be used as a comparison.
22-90(ad)	9.23.7.7.2	EEL Rearrangement High Capacity		\$97.62	Eschelon adjusted Qwest's cost study to make it consistent with the Commission's decision in the UT 138/139 case. There are no Commission ordered rates for this element to be used as a comparison.
22-90(ad)	9.23.7.1.1.1	EEL Loop, 2 Wire Loop Installation, First		\$117.98	Average of Approved Rates from other states.
22-90(ad)	9.23.7.1.1.2	EEL Loop, 2 Wire Loop Installation, Add'l		\$86.40	Average of Approved Rates from other states.
22-90(ad)	9.23.7.2.1.1	EEL 4 Wire Loop Installation, First		\$117.98	Average of Approved Rates from other states.
22-90(ad)	9.23.7.2.1.2	EEL 4 Wire Loop Installation, Add'l		\$86.40	Average of Approved Rates from other states.
22-90(ad)	9.23.7.3.1.1	EEL DS1 Loop Installation, First		\$140.02	Average of Approved Rates from other states.
22-90(ad)	9.23.7.3.1.2	EEL DS1 Loop Installation, Add'l		\$103.65	Average of Approved Rates from other states.
22-90(ad)	9.23.7.4.1.1	EEL DS3 Loop Installation, First		\$148.53	Average of Approved Rates from other states.
22-90(ad)	9.23.7.4.1.2	EEL DS3 Loop Installation, Add'l		\$112.75	Average of Approved Rates from other states.
22-90(ad)	9.23.7.11.1	DS0 Low Side Channelization	\$10.89		Average of Approved Rates from other states.
22-90(ad)	9.23.7.11.2	DS1/DS0 Low Side Channelization	\$7.09		Average of Approved Rates from other states.
22-90 (ad)	17.1	Bona Fide Request Process - Processing Fee		\$1,666.60	Average of Approved Rates from other states.
22-90(ae)	10.7.12	Innerduct Occupancy Fee, per Linear Foot, per Year	\$0.31		Qwest did not support the cost support for its proposal, only the rate. Eschelon's interim rate is based on an average in 4 other states..
22-90(ae)	10.7.12.1	Microduct Occupancy Fee, per Microduct, per Foot, per Year	\$0.26		Qwest did not provide cost support in OR, but did in AZ that included OR data. Eschelon adjusted the AZ cost support to make it reflective of conditions in OR. An input to this rate element is the innerduct rate, and E used its proposed rate for innerduct.

3 **Q. WHAT ARE QWEST'S ARGUMENTS AGAINST ESCHELON'S**  
4 **PROPOSAL FOR ISSUES 22-90(B) THROUGH 22-90(AE)?**

5 A. Even though Qwest has its own interim rate proposals in this docket,<sup>317</sup> Qwest  
6 argues that interim rates should be addressed in a cost docket, and not in the ICA  
7 negotiations.<sup>318</sup> Notably, Qwest does not propose a rate of zero in the meantime.  
8 It is clearly seeking adoption of its proposed interim rates in this docket. As  
9 discussed previously, in essence, Qwest is stating that Eschelon must submit to  
10 any rate that Qwest proposes in negotiations, and then wait for Qwest to file with

<sup>317</sup> See proposed ICA Section 24.4.1.1, which states in the portion of this Section that is closed: "Rates reflected on Exhibit A that have not been approved by the Commission in a cost case and require Commission approval shall be considered as Interim rates ("Interim Rates") by the Parties . . . ."

<sup>318</sup> See, e.g., Disputed Issued Matrix, Exhibit 3 to Eschelon's Petition for Arbitration, p. 245. See also, Qwest Response, p. 48.

1 the Commission for an interim rate. Clearly, this “dictatorial” position is  
2 unacceptable to Eschelon. Qwest argument that ITS PROPOSED rates should not  
3 be QUESTIONED in the ICA negotiations goes against the federal rules  
4 regarding the ILEC’s duty to negotiate (47 CFR §51.301). Specifically, 47 CFR  
5 §51.301 states that cost data should be provided as part of negotiations regarding  
6 rates. Clearly, the federal rules would not require that cost data be provided if  
7 they presumed that the CLEC should not question the ILEC’s rate proposal.  
8 Below I reproduce the relevant portions of 47 CFR §51.301:

9 (a) An incumbent LEC shall negotiate in good faith the terms and  
10 conditions of agreements to fulfill the duties established by  
11 sections 251 (b) and (c) of the Act.  
12 ....  
13 (c) If proven to the Commission, an appropriate state commission,  
14 or a court of competent jurisdiction, the following actions or  
15 practices, among others, violate the duty to negotiate in good faith:  
16 ...  
17 (8) Refusing to provide information necessary to reach  
18 agreement. Such refusal includes, but is not limited to:  
19 ....  
20 (ii) *Refusal by an incumbent LEC to furnish cost*  
21 *data that would be relevant to setting rates if the*  
22 *parties were in arbitration.*<sup>319</sup>

23  
24 By requiring that an ILEC negotiating in good faith should provide the cost data  
25 for its negotiated rates, the rules imply that the individual rates will be discussed  
26 during negotiations and arbitration.

27 **Q. PLEASE EXPLAIN WHY QWEST’S OTHER ARGUMENT – THAT**  
28 **ESCHELON SHOULD NOT RECEIVE UNIQUE TREATMENT BY**

---

<sup>319</sup> 47 CFR §51.301 (emphasis added).

1           **NEGOTIATING RATES<sup>320</sup> – IS INVALID.**

2    A.     Qwest argues that Eschelon should accept Qwest’s proposed rates because Qwest  
3           offers its proposed rates to all CLECs, and Eschelon should not receive unique  
4           treatment.<sup>321</sup> First, as I explained above, by requiring that cost support be  
5           provided for the ILEC rates addressed in the ICA negotiations, the federal  
6           unbundling rules<sup>322</sup> assume that rates will be scrutinized and negotiated – rather  
7           than accepted at the level proposed by an ILEC – during the ICA negotiation and  
8           arbitration. Negotiation implies that the negotiated rates may be different from  
9           rates offered to other CLECs. Second, Eschelon should not be required to accept  
10          Qwest’s proposed unsupported, unapproved, unjust, unreasonable or  
11          discriminatory rates simply because some other CLEC accepted such rate  
12          proposal.

13          Third, Qwest’s argument is contrary to the facts. As explained above Qwest  
14          offers different rates to different CLECs.

15    **Q.     PLEASE SUMMARIZE ISSUE 22-90 AND ITS SUBPARTS.**

16    A.     The companies have agreed that “Rates reflected on Exhibit A that have not been  
17           approved by the Commission in a cost case and require Commission approval  
18           shall be considered as Interim rates (“Interim Rates”) by the Parties.”<sup>323</sup> The  
19           Commission needs to decide pursuant to Section 252(c) of the federal Act which

---

<sup>320</sup> See, e.g., Qwest Response, p. 48, lines 14-16.

<sup>321</sup> See, e.g., Qwest Response, p. 48, lines 14-16.

<sup>322</sup> 47 CFR §51.301.

<sup>323</sup> See proposed ICA Section 24.4.1.1.

1 rates will be reflected in Exhibit A for these elements, as the companies have not  
2 agreed upon interim rates.

3 In addition, if Qwest files with the Commission cost studies in support for its rate  
4 proposal, these cost studies should be available to Eschelon, if requested or as  
5 otherwise ordered by the Commission. Because the rates in question concern  
6 essential products and services offered to CLECs, CLECs' participation in the  
7 Commission's review is important and contributes substantially to the process.

8 Eschelon proposes a number of interim rates for products and services for which  
9 Qwest's cost support was particularly inadequate. Eschelon's rate proposal is  
10 based (where available) on its corrections to Qwest's cost studies to include the  
11 Commission-approved cost inputs, and when Qwest's cost study was not  
12 available, Eschelon's proposed rates are based on an average of rates approved in  
13 other states or the rate for the product or service that is in Eschelon's historical  
14 ICA with Qwest. Eschelon's rate proposal, as well as Eschelon's acceptance of a  
15 large number of Qwest-proposed rates, do not mean that Eschelon considers these  
16 rates, which are interim rates, to be cost-based, just, reasonable and non-  
17 discriminatory. Eschelon reserves the right to modify its proposals when the  
18 Commission considers permanent rates.

19 Qwest should not be permitted, as a result of proposing interim rates, to simply  
20 ignore this Commission's previous cost decisions, particular when it seeks, at the  
21 same time, to defer Commission review of those proposed rates to some indefinite

1 time in the future. Further, to the extent Qwest may contend that the adjustments  
2 that I made do not accurately reflect the Commission's prior orders, one option  
3 available to the Commission is to order Qwest to make a compliance filing of its  
4 cost studies incorporating the Commission's previously ordered inputs.

5 **SUBJECT MATTER NO. 46. INTERCONNECTION ENTRANCE FACILITY**

6 **Issue No. 24-92: Section 24.1.2.2**

7 **Q. HAS THIS ISSUE CLOSED SINCE ESCHELON'S PETITION FOR**  
8 **ARBITRATION WAS FILED IN THIS CASE?**

9 A. Yes, this issue has closed and section 24.1.2.2 has been deleted.

10 **X. CONCLUSION**

11 **Q. WHAT ARE YOUR RECOMMENDATIONS TO THE OREGON**  
12 **COMMISSION?**

13 A. I recommend that the Commission adopt Eschelon's proposed Interconnection  
14 Agreement language as described in this testimony.

15 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

16 A. Yes.

TO: Doug Denney

**Announcement Date:** September 1, 2005  
**Effective Date:** October 1, 2005  
**Document Number:** PROS.09.01.05.F.03204.Design\_Chgs\_Unbundld\_Loop  
**Notification Category:** Process Notification  
**Target Audience:** CLECs  
**Subject:** Billing for design changes on Unbundled Loop

**Summary of Change:**

Qwest will commence billing CLECs non-recurring charges for design changes to Unbundled Loop circuits. Among the charges for the design change that will be billed, the following activities will generate a non-recurring design change charge per occurrence:

- Connecting Facility Assignments (CFA) change
- Circuit Reference (CKR) change
- CKL 2 end user address change on a pending LSR
- Service Name (SN) change
- NC/NCI Code change on a pending LSR

Charges for the design change will be billed via Qwest's Customer Records Information System (CRIS) beginning October 1, 2005 and may appear as early as your October billing statement. These charges will be displayed as a separate line item with charges for other ancillary services that you are already being billed for by Qwest.

Design changes will be billed for non-recurring charges at the rate found in the miscellaneous elements of Exhibit A or the specific rate sheet in your Interconnection agreement.

If you have any questions or would like to discuss this notice please contact your Qwest Service Manager, Joshua Nielsen on (801) 239-5335. Qwest appreciates your business and we look forward to our continued relationship.

Sincerely,

Qwest Corporation

Note: In cases of conflict between the changes implemented through this notification and any CLEC interconnection agreement (whether based on the Qwest SGAT or not), the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement.

The Qwest Wholesale Web Site provides a comprehensive catalog of detailed information on Qwest products and services including specific descriptions on doing business with Qwest. All information provided on the site describes current activities and process. Prior to any modifications to existing activities or processes described on the web site, wholesale customers will receive written notification announcing the upcoming change.

**From:** Johnson, Bonnie J.  
**Sent:** Monday, September 26, 2005 10:19 AM  
**To:** 'cmpesc[CONTACT INFORMATION REDACTED]  
**Cc:** Johnson, Bonnie J.  
**Subject:** Eschelon Escalation PROS.09.01.05.F.03204.Design\_Chgs\_Unbundld\_Loop

- **Description of item being escalated:** Qwest is attempting to implement new rates via a process change through CMP. Qwest cannot implement new charges to CLEC or change the application of rates through a process change notice.
- **History of item:** CMP Notice PROS.09.01.05.f.03204.Design\_Chgs\_Unbundled\_Loop identified:

*"Qwest will commence billing CLECs non-recurring charges for design changes to Unbundled Loop circuits. Among the charges for the design change that will be billed, the following activities will generate a non-recurring design change charge per occurrence:*

- *Connecting Facility Assignments (CFA) change*
- *Circuit Reference (CKR) change*
- *CKL 2 end user address change on a pending LSR*
- *Service Name (SN) change*
- *NC/NCI Code change on a pending LSR*

*Charges for the design change will be billed via Qwest's Customer Records Information System (CRIS) beginning October 1, 2005 and may appear as early as your October billing statement. These charges will be displayed as a separate line item with charges for other ancillary services that you are already being billed for by Qwest.*

*Design changes will be billed for non-recurring charges at the rate found in the miscellaneous elements of Exhibit A or the specific rate sheet in your Interconnection agreement."*

The design change charge was not designed for loops. Qwest's own language in its FCC tariff describes this charge as applicable to transport facilities. The cost studies, upon which the rates in Exhibit A are based, were also designed with unbundled transport facilities in mind. These cost studies refer to ASR's, EXACT and IAB's, which are systems used for transport facilities, not unbundled loops. Therefore, the cost Qwest wishes to apply for design changes on loops are based on a that was performed for a different product, process and systems. [See cost dockets: AZ: T-00000A-00-0194, Phase II; CO: 99A-577T; UT: 00-049-105; and WA: UT-003013, Part D; The rate in Exhibit A for OR comes from a cost study in docket UM 1025, which was also designed for transport facilities, but has not been approved by the Commission for either transport or unbundled loops.] It is inappropriate for Qwest to attempt to apply this charge for Loops, LSR's and CRIS billing. In addition, Qwest is attempting to apply this to activity which does not cause Qwest to reengineer or redesign the circuit. Qwest's application of the rate is more broad than for which the design change charge was intended.

- **Reason for Escalation:**

Qwest is attempting to implement new rates outside of a CLECs ICA, through a process change in CMP. Qwest is attempting to apply a rate designed for a specific product to products, processes, systems and activities the rate was not meant for.

- **Business need and impact:**

See above.

- **Desired CLEC resolution:**

Qwest should withdraw this notice. Qwest should obtain Commission approved rates for design change charges on Loops. When Qwest obtains Commission approved rates, CLEC's ICA's dictate the action Qwest can take to implement those Commission approved rates.

- **CLEC contact information including Name, Title, Phone Number, and e-mail**

**address:** Bonnie Johnson, Director of Carrier Relations [CONTACT INFORMATION REDACTED],  
[\[CONTACT INFORMATION REDACTED\]](#)

- **CLEC may request that impacted activities be stopped, continued or an interim solution be established:**

Eschelon requests Qwest stop the activities that will impact CLEC's billing.

**Subject:** Escalation Acknowledgment and Response: Eschelon Escalation 092605-1E35

Bonnie,

This is to acknowledge receipt of your escalation 092605-1E35 submitted Monday, September 26, 2005 received 9:19 a.m.

This acknowledgement is being sent at approximately 5:00 p.m. MT September 26, 2005.

In addition, Qwest has included our response to this escalation in this email.

Qwest's Response:

Qwest received an Escalation from Eschelon on September 26, 2005 at 9:19 a.m.

Qwest has reviewed the escalation and determined that this item is outside the scope of CMP. The notice that is in question (PROS.09.01.05.F.03204.Design\_Chgs\_Unbunbld\_Loop) is a non CMP notice as it relates to charges contained in your Interconnect Agreement. Please contact your Service Manager for additional information or follow the appropriate contract dispute procedures.

Thank you,  
Cindy Harlan

**Subject:** RE: Oregon Telecom Acct.# 64907989 Undisputed Past Due Notice

Tonya,

The balance referenced below is from the 9/23/06 invoice. It was paid on check # 1000009947 on 10/16/06. One week before it was due. Please review your internal process to determine why payments are not applied in a timely manner. Timely payment application on the part of Qwest will prevent the unnecessary distribution of letters such as this one.

Thank you,

Chris Gilbert

RE: Past Due Balance: \$ 28,041.83

Account No: 64907989

Delivery via E-Mail and UPS Overnight

Dear Mr. Bill Markert and Ms. Bonnie Johnson:

Thank you for your continued business. We value the relationship we have developed with Oregon Telecom, Inc. /Eschelon, and we recognize the importance of meeting our commitment to provide you with quality service in exchange for timely payment for such services.

It has come to our attention that there is an undisputed balance of \$ 28,041.83 associated with account number 64907989.

As you know, your contract allows Qwest to take the appropriate collections action to obtain payment for the services Qwest provides. Those actions may include charging late fees, refusing to accept additional orders, or interrupting service until we receive the appropriate past due amounts. We want to avoid such counterproductive activities. Therefore, we are requesting that you immediately remit the undisputed balance due. If we do not receive confirmation that a payment of \$ 28,041.83 has been received prior to 12:00 pm Mountain Time on October 27, 2006, we may be forced to exercise our rights under the contract. Please help us avoid taking such actions.

Please submit your payment via wire as follows:

FIRST TENNESSEE BANK

MEMPHIS, TN.

[routing number redacted]

Please place your account numbers in the notes

Please send confirmation of your wire transfer number to me at [email redacted] Your prompt attention to this matter is appreciated.

If payment has been sent, please disregard this notice. If you feel you have received this notice in error, please contact me immediately so we can work with you to correct any discrepancies in our records.

We look forward to working with you to resolve these issues so that we can continue to provide you with excellent customer service.

Thank you in advance,

*Tanya Mays on behalf of Viktoria Dozier*

*Qwest Wholesale Accounts Receivable Analyst*

Re: 5/30/2006 Letter RE: Past Due Balances

Sue,

I am writing in response to your 5/30/2006 certified letter regarding Oregon Telecom Inc. past due balances addressed to David Gahlsdorf in Salem Oregon. The Oregon Telecom Inc. new customer questionnaire was updated with a new primary billing and payment contact on 4-6-06. For your convenience, I am attaching a copy the current Oregon Telecom Inc. questionnaire. In the future please contact Mr. Chris Gilbert regarding any billing or payment issues. Thank you.

## Billing Information - Dispute Process - V4.0

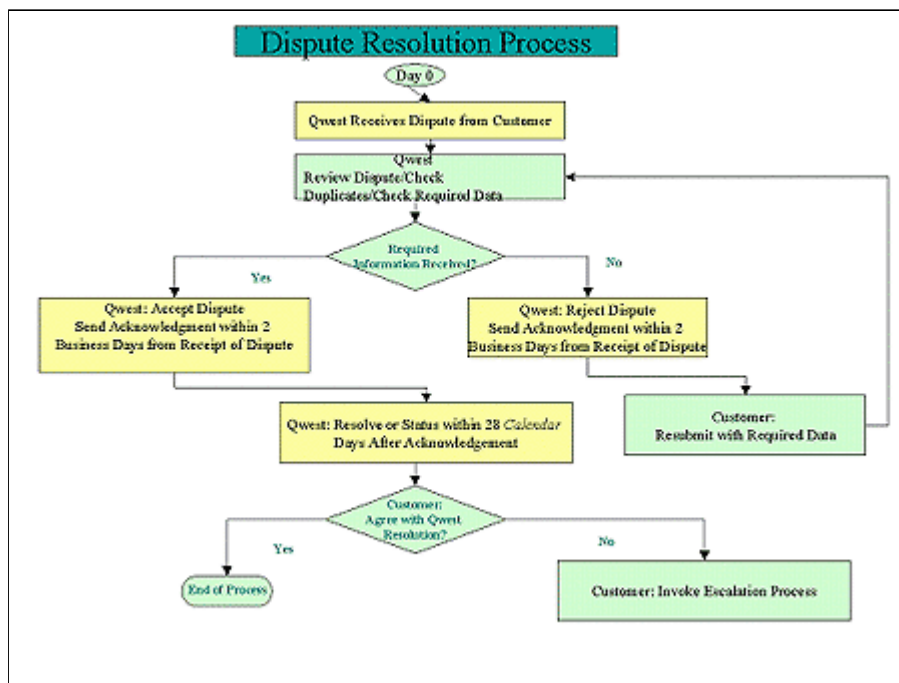

[History Log](#)

### Description

The purpose of this process is to document requirements for submitting billing disputes to the Wholesale Billing Service Delivery Coordinator (SDC).

Once billing has occurred, and if you have a general question about your bill or charge on your bill, you should contact the Qwest Billing SDC assigned to your account. If the Qwest Billing SDC cannot resolve the billing type question, you may submit a dispute for the disputed amount.

### Process Diagram

### Implementation

#### Submitting a Dispute

Check individual state tariffs and/or your Interconnection Agreement for time limits for submitting a dispute.

Qwest offers two options for submitting disputes.

Click here to fill out the [Dispute Notification Form](#) (in WORD format).

Click here to fill out the [Dispute Notification Form](#) (in EXCEL format).

The following rules apply when filling out the Dispute Notification Form:

- One product per dispute (i.e. Resale, Unbundled, Collocation)
- One bill period per dispute (i.e. 10th bill period)
- Multiple bill months are allowed for the same bill period (i.e. 1-10-05, 2-10-05 etc.)
- If multiple bill months are disputed on one dispute form, Qwest will use the oldest bill month when entering the dispute
- If you copy and paste information from BillMate, provide the BillMate file name. (i.e. MONSERV, SOACTVTY, Toll, etc).

#### Example Dispute Supporting Information Format:

The following are only examples. You can attach dispute summary and detail information to the dispute form or attach detail spreadsheet information to the dispute form.

Example #1:

Sub Account	Dispute type/Description	Dispute Reason	Qty	Service Order	Billed Rate	Should bill	Difference
0000000000000	MRC G5LTM- Qwest Choice DSL	Rates does not match contract section 1000.0	1	C1234567	\$10.00	\$1.00	\$9.00
1111111111111	MRCG5LAM - Qwest - DSL	"	1	C8910111	\$10.00	\$1.00	\$9.00
2222222222222	MRCG6LAN - Qwest - DSL	"	1	C1213145	\$10.00	\$1.00	\$9.00
Total					\$30.00	\$3.00	\$27.00

Example #2:

Tab 1: Dispute Form

Tab 2: Main Account Number with Summary Information

- Dispute Type/Description (e.g. 3-way calling, Intralata toll, Tax)
- Dispute Reason
- Disputed \$ Amount Total per Dispute Type

Example Summary Tab:

Dispute Type and Description	Dispute Reason	Amount in Dispute
MRC on Long Distance Charges	Not in ICA Section 1000	\$30.00

Tab 3: Main Account Number with detailed explanation

- Detail (e.g. Sub Accounts, Circuit number)
- Dispute Description
- Amount in Dispute
- Total dispute amount should equal field 12 on the dispute form

Example Detail Tab:

Intralata TOLL	Description	Disputed Amount
801239XXXXCUS	Long Distance Charges	\$10.00
801239X1X1CUS	Long Distance	\$10.00
801239X2X2CUS	Long Distance	\$10.00
Total		\$30.00

Once the dispute submittal form is completed, submit your dispute by email, fax or U. S. Mail (or other written format jointly agreed upon between Qwest and you) to the assigned Qwest Billing SDC. If submitted by email, : Customer ACNA or RSID or ZCID or TRAK, Customer dispute ID # (if applicable), State and disputed bill month(s) should be included in the subject line as space permits.

#### **EMAIL Out of Office Message**

If you receive an email "Out of Office" message, send the dispute to the Billing SDC backup in order for the dispute to be processed using the date you submitted the dispute. The Billing SDC out of office message will contain the following message:

"I will be out of the office from MM-DD-YYYY to MM-DD-YYYY. Any disputes received during that time will be acknowledged and reviewed upon my return. If your request is of an urgent nature, please contact my backup, (Billing SDC name) at (email address) and telephone number. Receipt of a dispute will be the date I am scheduled to return unless the dispute is sent to my backup."

If the dispute is sent to the SDC backup, the receipt of the dispute will be the date the dispute was sent to the SDC backup. If you do not receive an out of office message, the receipt of the dispute will be the day the dispute was sent to the SDC.

#### **Receipt of Dispute**

Billing days/hours for receipt of billing disputes are Monday through Friday, 8:00 AM to 5:00 PM (per Qwest Billing Office time zone), excluding Qwest Legal Holidays. Disputes for billing errors received outside these business hours shall be considered received at 8:00 AM on the first business day thereafter.

#### **Acknowledgment of a Dispute**

Qwest will provide acknowledgment of your written documented dispute within two business days of receipt of dispute by email, fax or U. S. Mail (or other written format jointly agreed upon between Qwest and you pursuant to a written agreement). The acknowledgment will include:

Email Subject Line: Customer name, customer dispute ID # (if applicable), Qwest ID #, State, and disputed bill month will be included in the subject line as space permits. The acknowledgment will include:

- Qwest ID #
- Your company name

- Your company code (ACNA or RSID or ZCID)
- Bill Date
- Your own dispute (claim) number, if provided
- Date dispute received by Qwest
- BAN (including CUS code)
- State
- Total disputed \$ amount
- If dispute rejected, the reason for rejection (i.e. missing dispute reason)

At the time of acknowledgment, the dispute is considered one dispute. The entire dispute is rejected if missing any required information. At the time of resolution, the dispute is counted by "dispute type" (also known as reason code).

Examples how Qwest treats a dispute:

How Qwest counts Acknowledgment (ACK) and Resolution (Reso)

Disputes:

Dispute Receive Date:	Bill PER	Disputed Bill Date	Billing Account Number	Dispute Type (s):	ACKCount:	ResoCount:
5-04-04	1st	01-01-04	303B040000000	1. NRC on a USOC	1	1
4/01/04	1st	3-10-04	6120000000000	1. TAX 2. LPC	1	2*

\*Each dispute type counts as a dispute.

### Rejected Dispute Examples

Rejected (or returned) means a Qwest Dispute ID number is assigned, but required information is missing. Qwest will send an acknowledgment response to you and identify why the dispute is rejected and communicate what information is missing. To resubmit the dispute, provide the original Qwest Dispute ID # and the missing information.

Rejection examples:

- If the dispute is missing required supporting information needed to process the dispute or dispute is not submitted following this Dispute Business Procedure.
- When Qwest receives your billing dispute prior to Qwest's Public Utilities Commission (PUC) ordered Cost Docket Implementation Date.
- Duplicate disputes of the same item more than once (i.e. disputing non recurring charges on the same order more than once)
- If double disputing (i.e. disputing the same time period more than once. .For example disputing March recurring charges and then send in another dispute for February, March and April recurring charges causing a double dispute for the March non recurring charges)
- When invoking escalation procedures on a dispute and you change the original disputed issue (i.e. the original resolved dispute was for non-recurring charges (NRC) dispute type and you added another dispute type and bill period on the escalation. This is considered a new dispute.)
- Disputing charges in advance of charges displaying on your bill

### Carrier Access Billing System Bill Output Specifications (CABS/BOS) Format

If your account is in Carrier Access Billing System Bill Output Specifications (CABS BOS) Bill Data Tape Records (CABS/BOS) format, check the [Differences List](#). The BOS Bill Data Tape (BDT) Differences List is provided to inform customers, who choose the BDT option, of any instance where Qwest differs from the standards detailed in the current version of Telcordia's CABS/BOS documentation. The differences may be in the record outlay, the use of data elements, the use of phrase codes, or identifying the company's local calling plans.

Sub Accounts are not provided in CABS/BOS format. If Qwest provides a list of the Working Telephone Numbers (WTN) for UNE-P accounts and a list of the Circuit IDs for Unbundled Loop accounts, then your dispute must provide this level of supporting documentation.

### Qwest's Dispute Resolution

Once the dispute is resolved, the Qwest Billing SDC will provide the results of the investigation in a dispute resolution notification letter. The dispute will be either resolved in customer favor or resolved in Qwest favor or partially resolved in Qwest and Customer favor.

If Qwest sends a resolution saying Qwest resolves in customer favor, Qwest will identify on the resolution letter the credit from and through dates. In this example, you are not required to continue to send in disputes each month saying the rate is wrong. The credit will automatically apply usually within two billing cycles for the time the adjustment was issued.

Example:

Dispute Receive Date:	Bill PER	Disputed Bill Period/Year submitted on dispute:	Dispute Type(s):	Resolution Letter Sent Date:	Effective Date:
5-04-04	1st	01-01-04 to 4-1-04	1. MRC on a USOC	5-30-04	01-01-04

In the example above, the charges are corrected from your January 1, 2004 bill and going forward. You received Qwest Resolution Letter on May 30, 2004 stating you should see a credit within the next two billing cycles. If today is June 2, 2004 and you see the exact rate is wrong on your June 1, 2004 bill, you would not need to submit another dispute.

Note: If a Commission final cost docket order has been issued, but not implemented by Qwest, Qwest will provide you with a final resolution letter describing whether Qwest is resolving in Qwest favor or Customer favor or partial Qwest and customer favor. Qwest will notify you when rates will be implemented and the true up adjustment effective dates per the Commission.

The following will be entered on the resolution:

Email Subject Line: Customer name, Qwest Dispute ID #, Customer dispute ID # (if applicable), State and disputed bill month will be included in the subject line as space permits.

- Your Contact Name:
- Your Address (unless dispute sent via email)
- City, State, Zip code (unless dispute sent via email)
- BAN
- Bill Date
- Customer Dispute #, if available
- Qwest ID #:

- Total \$ Amount disputed
- Dispute Type
- Status
- \$ Amount resolved Qwest favor, Customer Favor or Partial (Qwest favor and customer favor)
- If multiple dispute types are included on one dispute, you will also receive a status of unresolved items.

The following additional fields could appear on the Resolution Notification Letter if resolved in Qwest Favor:

- Final Commission Cost Docket number will be included, if available
- Service order will be included, if available
- Trouble Ticket number will be included, if available
- Interconnection Agreement (IA) or Tariff or SGAT section
- Reason why resolved in Qwest Favor

The following additional fields could appear on the Resolution Notification Letter if resolved in Customer Favor:

- Credit from and through dates: m/d/yyyy to m/d/yyyy
- Credit will appear within two billing cycles

Spreadsheet attachments or other documentation that details the resolution for each Dispute Type/Description, including how or why the conclusion was reached may also be included.

[Download Sample Resolved Customer Favor Dispute Resolution Letter](#) (

[Download Sample Resolved Customer/Qwest Favor Resolution Letter](#)

[Download Sample Resolved Qwest Favor Resolution Letter](#)

### **Qwest's Dispute Status**

If the Qwest Billing SDC is unable to resolve the dispute within 28 calendar days after acknowledgment of the dispute, a status update per dispute type/reason will be provided to you in writing on a Qwest status notification letter. The follow-up date will be no later than 28 calendar days from the receipt of the dispute or sooner if dispute is resolved.

### **Escalations**

If you do not agree with Qwest's Resolution Letter provide, in writing, the reason why you disagree and the original Qwest Dispute ID #. Submit via email, fax or U. S. Mail (or other written format jointly agreed upon between Qwest and you) to the assigned Qwest Billing SDC.

If the SDC is unable to resolve the problem or provide the requested information to your satisfaction, you may initiate an escalation for any issue, at any time, and at any escalation point. Resolution of the dispute is expected to occur at the first level of management resulting in a recommendation for resolution of the dispute.

### **Prerequisites**

If you are a new CLEC and are ready to do business with Qwest, view [Getting Started as a Facility-Based CLEC](#). If you are an existing CLEC wishing to amend your Interconnection Agreement or New Customer Questionnaire, additional information is located in the [Interconnection Agreement](#).

**Subject:** Qwest Billing Dispute Process CR

In CMP last week, I committed to getting back to Qwest off line on whether Eschelon agrees to close the CR. Here is Eschelon's response. Please include our response in the CR status history.

Eschelon's position has not changed on this CR Qwest implemented. Qwest implemented this CR over Eschelon's objection and Qwest can close the CR over our objection. Eschelon's ICA controls and this process does not apply to Eschelon or any CLEC that has billing dispute provisions in its contract.

Thanks,

**Subject:** Billing disputes

Vonda:

Your email below was forwarded to me for response. Communications on this issue should be directed to me. Eschelon's position is that any such rejection by Qwest will be a violation of each state's interconnection agreements between Qwest and Eschelon. Please ensure that all appropriate billing and other personnel at Qwest are aware of this. As this involves contract and legal issues, I am directing this note to Qwest attorney Doug Hsiao and its interconnection director, Larry Christensen.

Although Qwest has developed its own process for billing through CMP, CMP is both not a part of these ICAs and, even were it to apply, the CMP document specifically provides that the ICA controls.\* There is no requirement in our ICAs to use the process you describe. As long as we provide our billing disputes in writing per the ICAs, Qwest must process them per the ICA. Our current processes comply with the ICAs.

Eschelon has indicated that, if Qwest desires changes to the current process that has been in place for a long time under the existing ICAs, Eschelon is willing to work with Qwest on any such changes, if Qwest will do so MUTUALLY. Eschelon may also trial at least some aspects of Qwest's "new" billing dispute process, but only on an optional, voluntary basis. Use of that process is not required by the ICAs, and Eschelon reserves all rights to use the process it has been using.

If Qwest continues to assert that it may unilaterally impose Qwest's "new" billing process upon Eschelon over its objection, please provide the basis in each state's contract for Qwest's position. Then we can arrange a call to discuss the issue. In the meantime, Qwest needs to continue processing the bills per the existing process, as it has been doing for a period of years pursuant to those same ICAs. Qwest should NOT reject any disputes on this basis.

\*Section 1.0 of Qwest's CMP Document provides: "In cases of conflict between the changes implemented through this CMP and any CLEC interconnection agreement (whether based on the Qwest SGAT or not), the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement. In addition, if changes implemented through this CMP do not necessarily present a direct conflict with a CLEC interconnection agreement, but would abridge or expand the rights of a party to such agreement, the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such agreement. " See [http://www.qwest.com/wholesale/downloads/2005/050328/QwestWholesaleChangeManagementDocument\\_03\\_28\\_05.doc](http://www.qwest.com/wholesale/downloads/2005/050328/QwestWholesaleChangeManagementDocument_03_28_05.doc)

**Qwest Response to Product/Process CMP - Billing Information – Dispute Process – V1.0**  
**Comments**

#	Page/ Section	CLEC Comment	Qwest Response
1		<i>Eschelon March 04, 2005 Comment: The list below is not exhaustive. Eschelon will also send a WORD document with this information</i>	Throughout this document, Eschelon makes many assertions, legal and otherwise, that are not relevant to this process document. Qwest reserves it's right to address these assertions in the

	<p><i>to the CMP mailbox as format is often changed using this process.</i></p> <p><i>Eschelon objects to Qwest's billing dispute process. Qwest's billing dispute process is beyond the scope of the commitment Qwest made to LTPA. Qwest is trying to change a CLECs legal rights by calling it process.</i></p> <p><i>In addition, Qwest expanded the new process to move even farther from LTPA's initial purpose which is Qwest's commitment to provide additional detail when Qwest denies a billing dispute initiated by the CLEC (at least if the CLEC so desires this information). Qwest and CLECs can agree to such a process for providing additional detail. The remainder can and should be dealt with in each CLEC's ICA.</i></p> <p><i>Much of the work involved in billing disputes, for example, would not be required at all if Qwest had met its contractual obligation to provide complete and accurate bills. The problems at issue arise because of Qwest's failure to provide accurate billing to CLECs. Qwest resources should be spent improving billing accuracy rather than Qwest's elaborate proposal. Qwest's proposal would significantly increase resources required by CLECs to dispute bills. For example, the number of dispute notifications required by Qwest's inefficient proposal would be approximately 5 times the number of dispute notifications Eschelon currently initiates each month, for the same number of disputes. CLECs already expend too many resources on billing disputes and Qwest's proposed process adds additional steps that create no additional benefit to CLECs.</i></p> <p><i>Eschelon does not object to providing additional information (such as even more contract/tariff information than currently provided) when needed within the current process, and has already done so. Eschelon's objection is to the</i></p>	<p>appropriate forum. In this document, Qwest limits it's responses to the process-related issues.</p> <p>For Qwest to be able to continue providing prompt, consistent and standard resolution of disputes for all CLECs, a consistent form and process is needed for all CLECs to submit their disputes. The proposed process will lead to greater efficiencies because it will ensure that information is provided in a uniform and appropriate manner. Qwest business procedures are documented on WWW.Qwest.Com rather than Individual Interconnection Agreements. Work processes, business rules, and organizational practices that do not address Section 251 obligations do not fall within the purview of interconnection agreements. Qwest, by providing notice of changes to these processes via CMP, is providing full rein to CLECs to exercise their legal rights..</p> <p>In order to process a dispute, Qwest needs to completely understand what the customer is disputing. Qwest has committed [Resolution Section] to provide specific details that will be included in the resolution letters and has provided examples of the format it will use. Qwest's response to the dispute is a function of the information it is provided by the disputing carrier. A uniform and comprehensive dispute submission process will facilitate a comprehensive response. Once again, Qwest must reiterate that this forum is not only the appropriate place in which to address these processes; it is also the required forum.</p> <p>Re: 5 times the number of dispute notifications..... Qwest will continue to provide Acknowledgment and Resolution Letters by Main Billing Account Number (i.e. BAN or Summary Billing Telephone Number) for all customers</p> <p>There can be no dispute that a uniform process will lead to greater efficiency.</p>
--	--	--

	<p><i>unnecessary additional work and rigid structure that introduces inefficiencies where much simpler minor changes to the current process would be sufficient. The proposed process introduces even more uncertainty and delay to billing disputes because Qwest has inserted unnecessary steps that it can use to reject claims for no substantive reason.</i></p> <p><b>DESCRIPTION</b>  <i>The description fails to describe the optional nature of the process. Eschelon objects to Qwest's use of mandatory language, such as "requirement". Eschelon has been clear from the start that its interconnection agreement (ICA) controls, so Eschelon (and other CLECs with similar or other controlling ICAs) is not required to use the procedure</i></p> <p><i>A CLEC should not be forced to submit a dispute to get a "billing type question" answered. Billing questions and disputes are two different requests and should be treated as such.</i></p> <p><b>TERMS AND CONDITIONS</b>  <i>Eschelon asks Qwest to add a terms and conditions section and asks Qwest to add the following language to Terms and Conditions.</i>  <i>"In cases of conflict between this process and any CLEC interconnection agreement the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement." This language applies to the entire procedure and is not specific to intervals for submitting a claim. Eschelon asks Qwest to add this language to Terms and Conditions (see Submitting a dispute).</i></p> <p><b>IMPLEMENTATION</b>  <b>SUBMITTING A CLAIM</b>  <i>See Terms and Conditions about first paragraph</i></p>	<p>The work CLECs encounter in submitting a dispute is a mere fractional component of the work Qwest must undertake to resolve disputes for all CLECs. Individualized processes impede the ultimate goal that both CLECs and Qwest seek which is the prompt and comprehensive resolution of disputes.</p> <p><b>DESCRIPTION</b>  This Dispute Business Procedure Process is not optional for disputes submitted to the Wholesale Service Delivery Coordinator. Business Process Procedures are documented and located on www.Qwest.com rather than individual Interconnection Agreements.</p> <p>The dispute process addresses disputes that are submitted in writing. An inquiry is not considered a dispute unless it is submitted in writing. Use of the Dispute Form will help alleviate confusion.</p> <p><b>TERMS and CONDITIONS:</b>  It is not appropriate to include Terms and Conditions in this business process document.</p>
--	--	---

	<p><i>Paragraph 5</i>  <i>Qwest's proposed process including the "rules" when filling out the dispute notification form, are not an improvement over the existing process Qwest and Eschelon jointly developed over a two-year period. It appears that, as Qwest downsizes its own operations, it is attempting to shift work to CLECs that appropriately belongs to Qwest. In fact, Qwest sent Eschelon a notice that effective 2/7/05, Qwest was downsizing the Qwest billing SDC's working on Eschelon's account from 3 to 2. Qwest replaced the two experienced Qwest billing SDC's familiar with Eschelon's account with ONE Qwest billing SDC that had never worked on Eschelon's account. It is inefficient to impose additional work on many CLECs that Qwest itself should be doing to process its own bills. Qwest's proposed process creates additional work, such as:</i></p> <ul style="list-style-type: none"> <li><i>- On additional claim forms, Qwest would require Eschelon to enter redundant data that is already on the summary tab of the spreadsheet Eschelon currently submits to Qwest. This additional manual entry increases the workload for Eschelon.</i></li> <li><i>- Navigating within dispute files becomes more complicated and time consuming due to the addition of claims and claim forms.</i></li> <li><i>- Dispute reasons for all Summary BANs must be revised under Qwest's process. This would affect both dispute memos submitted the first month of implementation and new disputes going forward.</i></li> <li><i>- Qwest requires additional contract/tariff information and/or locate and repeat ICA information and tariff citations that were already provided to Qwest in previous dispute memos.</i></li> <li><i>- Historical Claim Forms and an additional detail worksheet for dispute back-up must be created for all disputes over 60 days under Qwest process. This is an attempt by Qwest to circumvent the manner in which the</i></li> </ul>	<p>Streamlining of billing dispute processes is a natural evolution in the industry. Enabling SDCs to serve CLECs in a more efficient manner will lead to a reduced expenditure of time and resources for all concerned. While Eschelon would undoubtedly prefer to have Qwest dedicate vital personnel solely to its issues this does not benefit the other industry participants.</p> <p>Any transition to a new system requires some additional work by all concerned. The ultimate goal is not to minimize Eschelon's workload, but to create a more efficient system that will benefit the entire industry. The additional work Eschelon identifies seems to amount to the mere transfer of information to the relevant document location, and pales in comparison to the amount of work that individualized CLEC dispute processes places on Qwest.</p>
--	---	---

	<p><i>PIDS operate. The PIDs are driven by the true date of the dispute. Qwest cannot alter the operation of the PID by creating a false date. In addition, Qwest is unclear how Qwest intends to count claims if they are not resubmitted each month.</i></p> <p><b>EXAMPLE DISPUTE SUPPORTING INFORMATION FORMAT:</b> <i>Last paragraph</i> <i>Qwest's process asks for different information on the subject line Eschelon sends than Qwest returns on responses to Eschelon. The addition of claims and claims forms is burdensome enough. Eschelon asked that Qwest respond using the same subject line that Qwest requires Eschelon to send Qwest. This would at least allow Eschelon to match the dispute with the response.</i></p> <p><b>EMAIL OUT OF OFFICE MESSAGE</b> <i>Qwest agreed to look into revising this section. CLECs voiced their concerns about this section because Qwest is putting additional burden on CLECs to manage Qwest's staffing. We understood that Qwest is looking into revising this section. Although Qwest has had ample time (several months) to do so, Qwest has still not revised this section. Eschelon reserves the right to comment on the new section. Please provide an update on the progress Qwest has made for the revision of this section.</i></p> <p><b>ACKNOWLEDGMENT OF A DISPUTE</b> <i>Eschelon finds Qwest's language "pursuant to a written agreement" highly objectionable. Qwest can negotiate changes to CLECs ICA's if Qwest wants a written agreement. This is not appropriate language for a business procedure and Qwest should remove this.</i></p> <p><i>Qwest needs to expand its description of the information provided in the response when a claim is rejected to</i></p>	<p>Re: Example Dispute Supporting Information Format: Qwest will provide a standard subject header line on all Acknowledgments and Resolution Letters for all customers.</p> <p><b>EMAIL OUT OF OFFICE MESSAGE</b> Qwest would like to offer, in the future, an automated dispute management tool so CLECs can submit disputes "on line." This process should provide online dispute status and improve the out of office process. Qwest is currently reviewing this option.</p> <p><b>ACKNOWLEDGMENT OF A DISPUTE</b> Re: Pursuant to a written agreement" The language is merely intended to provide a way to document the parties mutually agreed upon process, and does not implicate the parties Interconnection Agreement.</p> <p>This statement allows CLECs to work with the Billing SDC if, for some reason, they need to submit a dispute other than by email, fax or U. S. Mail.</p>
--	---	---

	<p><i>ensure that the level of detail is no less than the level of detail required of CLECs. Currently, Qwest simply states that it will communicate what information is missing, without committing any detail. If the problem is something other than missing information, a detailed explanation is needed. Because Qwest would require a detailed claim form from CLECs, Qwest should likewise be required to complete a detailed acknowledgement response form with an equal level of detail. Qwest should draft one and distribute to CLECs for comments.</i></p> <p><b>REJECTED DISPUTE EXAMPLES</b> <i>Qwest's proposal places form over substance. Even if a CLEC provides Qwest with every piece of information Qwest needs to address a billing dispute completely, Qwest's proposed process would allow Qwest to reject a legitimate dispute based on alleged non-compliance with a rigid form.</i></p> <p><b>QWEST'S DISPUTE RESOLUTION</b> <i>Qwest made significant revisions from version 9 on this section. Under additional fields that could appear: Eschelon asked Qwest to change "could be included" to "will be included". Qwest made that change, however, Qwest removed "If it forms the basis for denial" and added "if available". How can Qwest form a basis for denial if that information is not available.</i></p> <p><i>See paragraph 2 under</i> <b>ACKNOWLEDGMENT OF A DISPUTE</b></p> <p><b>ESCALATIONS</b> <i>Last paragraph This paragraph is confusing and the first and second sentence conflict with each other. If Qwest's intention of the</i></p>	<p>Qwest will communicate what information is missing. If it is something other than missing information, Qwest will provide a detailed explanation.</p> <p><b>REJECTED Dispute Examples</b></p> <p>For Qwest to be able to continue providing prompt, consistent and standard resolution of disputes for all CLECs, a consistent process is needed. The proposed process will lead to more efficiency because it will ensure that information is provided in a uniform and appropriate manner.</p> <p>A dispute missing required information needed to process the dispute or not submitted using the form will be rejected.</p> <p><b>QWEST'S DISPUTE RESOLUTION</b></p> <p>The section merely references information that will be provided, if the information is available and relevant. If that information is available Qwest will provide it; however, other independent sources could form the basis for denial and this information will be provided if available.</p> <p><b>ESCALATIONS:</b> If a CLEC disagrees with Qwest's resolution, there are 2 options: 1. Refer to the Dispute Resolution Billing Dispute or Section of their contract and</p>
--	--	--

	<i>second sentence is to mean "However, Qwest's expectation is resolution of a dispute will occur at the first level of Management", then say that. If that is Qwest's intent, Eschelon believes that is a performance issue internal to Qwest and should not be included in this process</i>	submit the dispute to the address in the "notice" section of their contract 2. Submit disagreement of Qwest resolution pursuant to the Escalations section in the Wholesale Billing SDC Dispute Business Procedure Process.

**Subject:** Billing Dispute Process

Qwest billing SDC's (see attached note from Deb Judge) are recommending Eschelon use Qwest proposed process. Eschelon's ICA controls how Eschelon sends billing disputes to Qwest. It is certainly questionable that Qwest billing SDC's would be suggesting that Eschelon follow the process that Eschelon has objected to prior to Qwest's implementation date. Sue Kriebel at Qwest said on the call that Qwest SDC's, for the most part, are not even aware of, or have been trained on the new dispute process. In some cases, Qwest billing SDC's are making statements on the phone such as "when the new process starts you can't do this." Perhaps the SDC's are aware that Eschelon objected to Qwest's proposed process.

"Also, in anticipation of the changes in the way disputes are suppose to be submitted starting sometime next year, I would like to suggest that all of the bill dates for Frame Relay bans be changed to the same bill date. Currently there are some bans that have the 10th bill date and some have the 16th bill date. Then they would meet the criteria to be submitted on the same spreadsheet as they are today. It would be a relatively simple "fix"."

Please advise the Qwest billing SDC's that Eschelon will use the process outlined in its ICA.

Thanks,

**From:** Johnson, Bonnie J.  
**Sent:** Friday, December 03, 2004 2:26 PM  
**To:** [Donna Devine (Qwest) email redacted]  
**Cc:** Johnson, Bonnie J.; Stichter, Kathleen L.; Copley, Ellen M.  
**Subject:** Eschelon comments - Qwest dispute billing claim business procedure version 9

Donna,  
Eschelon sent comments to Qwest on Version 8 of Qwest's proposed Wholesale Local Dispute Claim Process on 9/30/04. In those comments, Eschelon had significant concerns regarding Qwest's proposal. Though Qwest did make some changes as a result of Eschelon's concerns, too many unresolved issues remain on Qwest's proposal.

In response to your request, Eschelon again provides these additional comments on Qwest's proposed "Wholesale Local Dispute (Claim) Business Procedure." Again, the list below is not exhaustive, however, it gives you an idea of the issues that cause Eschelon to continue to object to this proposed procedure. Eschelon has been clear from the start that its interconnection agreement (ICA) controls, so Eschelon (and other CLECs with similar or other controlling ICAs) is not required to use the procedure. Nonetheless, Eschelon continues to attempt to work on the proposed procedure to assist Qwest in making it attractive to CLECs such as Eschelon so that they may choose to use it. Even still, that has not yet happened. The proposed procedure is not an improvement over the existing process, so Qwest has provided little incentive to use it. It appears that, as Qwest down-sizes its own operations, it is attempting to shift work to CLECs that appropriately belongs to Qwest. Much of the work involved in billing disputes, for example, would not be required at all if Qwest had met its contractual obligation to provide complete and accurate bills. It is inefficient to impose additional work on many CLECs that Qwest itself should be doing to process its own bills.

Qwest's proposed process creates additional work, such as:

- At least one new tab in the spreadsheet (a new claim form) must be created for all dispute memos under Qwest's process. This would be a total of up to 85 additional claim forms that would need to be created and maintained each month for all Summary BANs for Eschelon alone.
- On those additional claim forms, Qwest would require Eschelon to enter redundant data that is already on the summary tab. This additional manual entry greatly increases the work load for Eschelon.
- Navigating within dispute files becomes more complicated and time consuming due to the addition of these claim forms.
- All dispute reasons for all Summary BANs must be revised under Qwest's process. This would affect both dispute memos submitted the first month of implementation and new disputes going forward.
- Qwest requires additional contract/tariff information and/or locate and repeat ICA information and tariff citations that were already provided to Qwest in previous dispute memos. (On the claim form, for rates, Qwest requires both the page and section number for tariffs. This should either the page or the section number and not both).
- Historical Claim Forms and an additional detail worksheet for dispute back-up must be created for all disputes over 60 days under Qwest process. This is an attempt by Qwest

to circumvent the manner in which the PIDS operate. The PIDs are driven by the true date of the dispute. Qwest cannot alter the operation of the PID by creating a false date.

As discussed, Eschelon does not object to providing additional information (such as even more contract/tariff information than currently provided) when needed within the current process, and has already done so. Eschelon's objection is to the unnecessary additional work and rigid structure that introduces inefficiencies where much simpler minor changes to the current process would be sufficient. The proposed process introduces even more uncertainty and delay to billing disputes because Qwest has inserted unnecessary steps that it can use to reject claims for no substantive reason.

**Examples of specific issues with the document/proposed Process:**

**TITLE**

Qwest replaced the word process with business procedure - Please describe Qwest's intent of the name change from process to business procedure. Throughout the document Qwest still uses the term process and not procedure (for example the first sentence of description).

**DESCRIPTION**

The description fails to optional nature of the process. Eschelon objects to Qwest's use of mandatory language, such as "must" throughout the document.

Qwest states that the words bill date and bill period is interchangeable. Eschelon disagrees that these words are interchangeable. Eschelon believes a bill period is, for example, the 4<sup>th</sup>, 10<sup>th</sup>, 16<sup>th</sup>, etc. A bill date adds the month, so for example, it would be 9/04, 10/16, etc.

In general Eschelon never understood Qwest's clarification of the interchangeable words. If they mean the same thing, Qwest should use one or the other.

**TERMS AND CONDITIONS**

Consistent with the CMP document and CMP notices, this section should clearly state: "In cases of conflict between this process and any CLEC interconnection agreement (whether based on the Qwest SGAT or not), the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement." Qwest said that this language does not appear in Process PCATs and is specific to Product PCATs. However, Qwest itself uses this language in its own proposal under implementation. This language applies to the entire procedure and is not specific to intervals for submitting a claim. Eschelon asks Qwest to add this language to Terms and Conditions.

**IMPLEMENTATION**

**SUBMITTING A CLAIM**

See Terms and Conditions about first paragraph

**ADDITIONAL CLAIM SUBMITTING CRITERIA**

Second bullet. Eschelon recommends Qwest remove the i.e. and simply state "multiple months are allowed" for clarity.

Regarding the third bullet

For clarity once again, Eschelon recommends the sentence read "If CLEC is disputing multiple months, separate out the disputes.....etc.

If Qwest does not make Eschelon's recommended changes, Qwest should at least correct the typo Eschelon believe Qwest made. The date should read 01/10/04 in the i.e.

See also paragraph 6 under additional work

#### Example #2

Qwest agreed to allow Eschelon to put the claim form and summary information on the same tab. Version 9 of the business procedure does not state tab 1 and tab 2 can be combined. Qwest should add that option to the procedure.

#### EXAMPLE DETAIL TAB

Regarding the first paragraph after the table. Qwest should insert after SDC ", unless the ICA provides otherwise."

#### E-MAIL OUT OF OFFICE MESSAGE

CLECs have voiced their concerns about this section, and we understand that Qwest is looking into revising this section. Eschelon reserves the right to comment on the new section.

#### BILLING DISPUTE (CLAIM) NOTIFICATION FORM AND SUPPORTING INFORMATION

See comments above regarding additional work and specific sections.

In LTPA, Qwest agreed to provide certain detailed information to CLECs regarding dispute responses/resolution. Instead, in CMP, Qwest is attempting to shift that burden to CLECs (see column titled "Additional Customer Required Information").

#### FORM AND FIELD DICTIONARY

Eschelon recommends Qwest revise this paragraph to "If multiple months for same bill period are disputed....etc. At least correct i.e. to 01/10/04.

See also paragraph 6 under additional work

#### RECEIPT OF CLAIM

Eschelon finds Qwest's addition of "pursuant to a written agreement" highly objectionable. Qwest can negotiated changes to CLECs ICA's if Qwest wants a written agreement. This is not appropriate language for a business procedure and Qwest should remove this.

Subject line. The acknowledgement should include the same subject line as in the dispute if by E-mail.

#### Last bullet

Qwest needs to expand its description of the information provided in the response when a claim is rejected to ensure that the level of detail is no less than the level of detail required of CLECs. Currently, Qwest simply states that it will communicate what information is missing, without committing any detail. If the problem is something other than missing information, a detailed explanation is needed. Because Qwest would require a detailed claim form from CLECs, Qwest should likewise be required to complete a detailed acknowledgement response form with an equal level of detail. Qwest should draft one and distribute to CLECs for comments.

#### REJECTED CLAIM EXAMPLES

See comments above.

Regarding paragraph number two is particularly objectionable. Qwest should remove the last part of the sentence so the sentence reads "If the claim is missing required supporting information Qwest needs to process the claim." Language such as this suggests that Qwest is attempting to make the process more difficult and more likely to result in rejection.

Regarding paragraph number three. Qwest should clarify that the billing claim relates to a cost order and delete the word "final." Qwest has indicated on the adhoc calls, that it will abide by the effective date in Commission order.

Regarding paragraph number four. Eschelon understands Qwest's intent, however, the description remains unclear. Perhaps we could work on language on the call.

#### BILLS IN CABS/BOS FORMAT

See above regarding terms and conditions

#### QWEST RESOLUTION OF A CLAIM

See comments above.

Regarding the second paragraph of this section, it is unclear how Qwest intends to count claims if they are not resubmitted each month. The impact on invoice reconciliation is also unclear in situations in which CLEC does not pay a disputed portion of the bill. The following sentence of the same paragraph and example are also unclear.

Regarding Qwest "Definition of Qwest's Resolution" it is unclear what Qwest intends with this list. In addition, the note in the final bullet point is inaccurate. The Commission determines the implementation date.

The following will be entered on the resolution.

Qwest should state where this information will appear. Will it be in the body of the E-mail?

Subject line. Qwest should send the resolution attached to the original dispute for request. The additional correspondence will be difficult to manage. If Qwest never changes the subject line it will make it more manageable for the CLECs. Qwest can add the dispute ID to that subject line.

#### SAMPLE GRANTED DISPUTE RESOLUTION LETTER

Qwest did provide a sample letter, however, Eschelon recommends Qwest use a form and asks Qwest to provide a form field dictionary. Because Qwest would require a detailed claim form from CLECs, Qwest should likewise be required to complete a detailed Resolution Letter form with at least as much detail. Qwest should draft one and distribute to CLECs for comments.

#### SAMPLE PARTIAL (GRANT AND DENY) RESOLUTION LETTER

See above

Will Qwest be providing a form and field dictionary or sample letter for full denial?

#### QWEST STATUS OF A CLAIM

See above comments regarding level of detail, subject line and resubmission of claims. See also Terms and Conditions above.

#### ESCALATIONS

Regarding paragraph two. The second sentence is unclear. Depending on Qwest's intent, Eschelon will comment.

**Subject:** Wholesale Local Dispute Claim Process/Eschelon comments Revision 8

Donna,

In response to your request, Eschelon provides these additional comments on Qwest's proposed "Wholesale Local Dispute (Claim) Process." While the list below is not exhaustive, it gives you an idea of the issues that cause Eschelon to continue to object to this proposed process. Eschelon has been clear from the start that its interconnection agreement (ICA) controls, so Eschelon (and other CLECs with similar or other controlling ICAs) is not required to use the process.

Nonetheless, Eschelon has been willing to attempt to work on the proposed process to assist Qwest in making it attractive to CLECs such as Eschelon so that they may choose to use it. So far, that has not yet happened. The proposed process is not an improvement over the existing process, so Qwest has provided little incentive to use it. It appears that, as Qwest down-sizes its own operations, it is attempting to shift work to CLECs that appropriately belongs to Qwest. Much of the work involved in billing disputes, for example, would not be required at all if Qwest had met its contractual obligation to provide complete and accurate bills. It is inefficient to impose additional work on many CLECs that Qwest itself should be doing to process its own bills.

Qwest's proposed process creates additional work, such as:

- At least one new tab in the spreadsheet (a new claim form) must be created for all dispute memos under Qwest's process. This would be a total of at least 85 additional claim forms that would need to be created and maintained each month for all Summary BANs for Eschelon alone.
- On those additional claim forms, Qwest would require Eschelon to enter redundant data that is already on the summary tab. This additional manual entry greatly increases the work load for Eschelon.
- Navigating within dispute files becomes more complicated and time consuming due to the addition of these claim forms.
- All dispute reasons for all Summary BANs must be revised under Qwest's process. This would affect both dispute memos submitted the first month of implementation and new disputes going forward.
- Qwest requires additional contract/tariff information and/or locate and repeat ICA information and tariff citations that were already provided to Qwest in previous dispute memos. (On the claim form, for rates, Qwest requires both the page and section number for tariffs. This should either the page or the section number and not both).
- Historical Claim Forms and an additional detail worksheet for dispute back-up must be created for all disputes over 60 days under Qwest process. This is an attempt by Qwest to circumvent the manner in which the PIDS operate. The PIDs are driven by the true date of the dispute. Qwest cannot alter the operation of the PID by creating a false date.

As discussed, Eschelon does not object to providing additional information (such as even more contract/tariff information than currently provided) when needed within the current process. Eschelon's objection is to the unnecessary additional work and rigid structure that introduces inefficiencies where much simpler minor changes to the current process would be sufficient. The proposed process introduces even more uncertainty and delay to billing disputes because Qwest has inserted unnecessary steps that it can use to reject claims for no substantive reason.

**Examples of specific issues with the document/proposed Process:**

Qwest refused to conduct end to end testing of this process. Qwest limited the "trial" to form submission. The bulk of the process is untested.

**DESCRIPTION**

The description fails to describe the purpose of the proposed process. Unlike other descriptions in the PCAT or the SCAT this description begins to describe a piece of the process rather than its overall nature.

The description also fails to optional nature of the process. Eschelon objects to Qwest's use of mandatory language, such as "must" throughout the document.

The last sentence of the first paragraph of the description is inappropriate. This is an editorial comment and not a process or a description. It certainly does not describe the process from Eschelon's ICA (an opt in of the AT&T ICA). If Qwest insists on including such an editorial comment, Qwest should also include CLECs' position. For example, the description should say: "CLECs recommend you do not pay the total amount due until a claim for dispute is resolved, although the CLEC may pay late payment charges if not resolved in its favor.

The second paragraph

**DIAGRAM**

The diagram does not follow true flow chart format, so it is difficult to follow.

Because the diagram is an attempt to reflect the proposed process, Eschelon will not comment on it separately. To the extent the process is modified the diagram should be modified accordingly.

**TERMS AND CONDITIONS**

Consistent with the CMP document and CMP notices, this section should clearly state: "In cases of conflict between this process and any CLEC interconnection agreement (whether based on the Qwest SGAT or not), the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement."

Paragraph number one in this section should not be limited to time periods. As indicated above, all terms of the ICA prevail.

The second paragraph of this section is unclear. Qwest suggested that this language refers to a time period, but the language does not say that. Instead it refers to how claims will be analyzed. If Qwest is suggesting that the interval for claim resolution may depend upon applicable laws, Qwest should so state more clearly. Use of the passive voice ("will be analyzed") also adds ambiguity.

In addition the second paragraph refers to an ICA that is silent on this issue. Eschelon does not believe its ICAs are silent on this issue. If Qwest disagrees, Qwest needs to request an ICA amendment to be publicly filed. (Many existing ICAs do not have any CMP provision.) If Qwest believes a contract is silent on this issue and does not amend the contract, when the contract does not have exhibit G, but claims CLECs agreed to this process, query whether Qwest is operating under an unfiled agreement.

The third paragraph of this section is inaccurate and contrary to the ICAs. This statement is contrary to the process that has been in place between Eschelon and Qwest under their existing ICAs for a period of several years. Eschelon will continue to use the process it has been using. Any rejection by Qwest based on non use of this proposed process is inappropriate. As discussed

such a rejection will result in Eschelon using the formal notice process under the ICAs, and Larry Christiansen will likely be swamped with billing disputes. Once a resolution is reached, Larry and the unfiled agreements committee at Qwest will need to determine whether the resolution is an agreement that needs to be filed.

See also paragraph one of Additional Claim Submittal Criteria discussed below.

#### PRICING

This section is inapplicable and should be deleted. If Qwest nonetheless includes it, at a minimum it should indicate the prices are included in the ICAs.

#### IMPLEMENTATION SUBMITTING A CLAIM

Qwest should insert after SDC ", unless the ICA provides otherwise." The remainder of this paragraph is too narrow. It does not account for multiple numbers that do not readily fit in the subject line, for example. At a minimum, the word "must" should be changed to "may". Another possibility is to add "as space permits" at the end of this line. Rejecting a claim for failure to include such numbers in the subject line when Qwest receives the information as part of the email submission, would be inefficient, duplicative, and place form over substance. Examples such as this one suggest that Qwest is attempting to make the process more difficult and more likely to result in rejection.

The first two format options are unusable for the reasons previously discussed. Regarding the third format option, Qwest has agreed to delete the last sentence of its previous proposed language. Even with that deletion, the third option adds unnecessary work and undue complication, with no corresponding benefit. Eschelon already provides the needed information in spreadsheet form, and there is no point to complicating this by adding another form.

#### ADDITIONAL CLAIM SUBMITAL CRITERIA

Throughout this section, the term "Main Account Number" should be followed by the insertion of "Billing Telephone Number".

Paragraph one of this section assumes that Qwest has provided certain information to CLEC. It should be modified to indicate that CLEC needs to provide information only if Qwest provides it on the bill to CLECs. A general statement to this effect should be added to the terms and conditions section, because this concept applies to other provisions of the document. Qwest bills, at times, reflect inaccurate information or are missing information. Qwest cannot require CLECs to provide accurate information that Qwest did not provide and certainly cannot reject claims for this reason.

In paragraph 2-4 of this section, Qwest has inserted references to claim workbooks. Based on previous discussions, Eschelon believes Qwest did this in error (or is misusing the term workbook). As previously discussed Qwest has agreed to allow multiple claims on one spreadsheet/workbook. If, however, Qwest intended to make this change, Eschelon objects to this increased work. Eschelon currently provides very specific detailed information by BAN to Qwest for disputes. For the ease of both parties, Eschelon often places these disputes in one spreadsheet. Qwest's proposed process, would create additional work and complication by requiring multiple spreadsheets.

Regarding paragraph 5. See comments above regarding additional work. It is also unclear why the CLEC needs to provide the name of Qwest's own SDC to Qwest.

Regarding paragraph 6. This information is already provided.

Regarding paragraph 7. There is no need to duplicate the BTN on the detail tab because it is on the summary tab. The more relevant information is the detail which is already provided. Unlike the

current process which allows copying and pasting from Billmate, this provision would require additional manual typing of this information.

Regarding paragraph 8. See note above as to terms and conditions.

Regarding paragraph 9. See note about 60 days and the PIDs.

Paragraph number 10 is unclear. If Qwest intends to require separation of disputes even when Qwest combines the information on its own bills, this is particularly objectionable. In addition, if Qwest is attempting to alter the operation of the PID, this is an improper use of CMP. Qwest has clearly taken the position in the past that such changes must be made, if at all, through LTPA and approved by the Commission.

Regarding rejection of the claim for missing information, see above.

#### OUT OF OFFICE MESSAGE

CLECs have voiced their concerns about this section, and we understand that Qwest is looking into revising this section. Eschelon reserves the right to comment on the new section.

#### CUSTOMER BILLING DISPUTE (CLAIM) NOTIFICATION FORM AND FIELD DICTIONARY

See comments above regarding additional work and specific sections.

In LTPA, Qwest agreed to provide certain detailed information to CLECs regarding dispute responses/resolution. Instead, in CMP, Qwest is attempting to shift that burden to CLECs (see column titled "Additional Customer Required Information").

#### ACKNOWLEDGMENT OF CLAIM

The acknowledgement should include the same subject line as in the dispute if by E-mail.

#### EXAMPLES WHEN A CLAIM WILL BE REJECTED

See comments above.

This section is unclear. Use of the passive voice also adds ambiguity. For example, who decides if a request is "considered and inquiry only"? If a CLEC has committed the time and resources to completing the claim form per Qwest's process, Qwest should not be able to unilaterally deem it an inquiry only.

Qwest needs to expand its description of the information provided in the response when a claim is rejected to ensure that the level of detail is no less than the level of detail required of CLECs. Currently, Qwest simply states that it will communicate what information is missing, without committing any detail. If the problem is something other than missing information, a detailed explanation is needed. Because Qwest would require a detailed claim form from CLECs, Qwest should likewise be required to complete a detailed acknowledgement response form with an equal level of detail. Qwest should draft one and distribute to CLECs for comments.

Regarding paragraph number two, Qwest should clarify that the billing claim relates to a cost order and delete the word "final." Qwest has indicated on the adhoc calls, that it will abide by the effective date in Commission order.

Regarding paragraph number 3, CLECs should not have to resubmit the dispute or the form. This paragraph is also unclear.

Paragraph number 5 is particularly objectionable. If Qwest fails to correct billing errors before the next bill cycle, a new dispute may be appropriate. Problems with bill media are also appropriate disputes. Frequently, for example, Qwest provides Billmate files that are missing required field information or contain inaccurate information. For example, in May, most of the bills for AZ, CO

and UT were missing the service order classification and number and contained the wrong or missing WTN on the MONTSERV file. Qwest's error prevented Eschelon from validating the bills and the dispute was therefore required. As indicated above, Qwest should not be able to avoid its obligation regarding billing disputes by claiming the dispute is an "inquiry."

Regarding paragraph number 6. If this is an issue, Qwest needs to provide the specific limitations it is referring to.

#### BILLS IN CABS/BOS FORMAT

See above regarding terms and conditions

#### QWEST RESOLUTION OF A CLAIM

See comments above.

Regarding the second paragraph of this section, it is unclear how Qwest intends to count claims if they are not resubmitted each month. The impact on invoice reconciliation is also unclear in situations in which CLEC does not pay a disputed portion of the bill. The following sentence of the same paragraph and example are also unclear.

Regarding Qwest "Definition of Qwest's Resolution" it is unclear what Qwest intends with this list. In addition, the note in the final bullet point is inaccurate. The Commission determines the implementation date.

For the next two sections regarding the content of the Resolution Notification Letter, Eschelon disagrees with Qwest's conclusions about what is required and what may be optional. For example, the claim resolution, amount in dispute, and additional detail must be included. As discussed above with respect to the acknowledgement, Qwest needs to provide at least as much detail as it requires of CLECs and committed to in LTPA. Qwest should compare, for example, the detail list under "Additional Customer Required Supporting Information" in the section of the document describing the claim form with the minimal level of detail listed in this section. Because Qwest would require a detailed claim form from CLECs, Qwest should likewise be required to complete a detailed Resolution Letter form with at least as much detail. Qwest should draft one and distribute to CLECs for comments. For example, despite its agreement in LTPA, Qwest states that it will only provide a docket number for a cost case. Qwest needs to provide the specific citation to the applicable portion of the order. Qwest states that it "could" include certain information when it should say it "will."

#### QWEST STATUS OF A CLAIM

See above comments regarding level of detail and resubmission of claims. See also Terms and Conditions above.

#### PAYMENTS and PAYMENT HISTORY

The ICAs deal with payments and are not appropriately part of a billing claim procedural document/process. The information is also incorrect especially with respect to the last paragraph of the payment history.

#### REMAINING PROVISIONS OF THE DOCUMENT

Eschelon has not reviewed URL's in the remaining sections to see if they are accurate.

See above comments.

Eschelon has previously described issues with the document/process. If Qwest has questions we can discuss on the next adhoc call.

Attachments contain confidential CLEC information

Donna,

As discussed on the 7/15/04 Billing dispute process ad-hoc call, Eschelon is willing to move forward to work collaboratively with Qwest to develop an optional billing dispute process. The goal would be to make the process attractive enough for all CLECs to use. To reach that goal, Qwest and CLECs will need to work collaboratively to develop a process that meets the needs of all CLECs. As the Qwest CMP ad-hoc meetings progressed, and CLECs raised concerns and provided comments, it became apparent to Eschelon that each CLEC had developed a unique dispute process with their dedicated Qwest billing SDC team. Eschelon spent two years developing a mutual process with its dedicated Qwest billing SDCs. That process has met both Eschelon and Qwest's needs since it was developed and implemented. Qwest must have recognized each CLEC is unique and has different volume, pricing, products and internal processes and a "one size fits all" approach would not be an effective way to help their customers manage the billing disputes a CLEC sends Qwest when Qwest bills a CLEC incorrectly. As a result, Qwest and CLECs choose to include the terms of the billing dispute the CLECs ICA. For Qwest to now say Qwest prefers the process MCI currently uses may meet MCI's needs, however, that leaves other CLECs with significant changes and increased work load with no benefit to the CLEC.

Eschelon believes the appropriate approach would be to allow each CLEC to continue to use its current spreadsheet format and continue sending the same information the CLEC sends using the format under a CLECs current process. In one of the first ad-hoc meetings, Eschelon asked Qwest if Eschelon could continue to use the current spreadsheet and submit multiple forms to care for the different BANS and bill dates. Eschelon understood Qwest agreed to that process, however, in a later meeting when Eschelon asked the question again because Eschelon had concerns about a portion of the process Qwest was proposing, Qwest said it would not allow Eschelon to keep its current spreadsheet intact. Perhaps if Qwest had provided meeting minutes reflecting the conversation that took place in the first meeting, Qwest or Eschelon may have recognized the different understanding of the conversation sooner than later.

The following was Eschelon's understanding:

General

- Eschelon requested Qwest provide the "Customer Billing Dispute (Claim) Notification form" in an EXCEL format. That request did not get noted
- Eschelon would attach the above form as a tab in the spreadsheet

Example (1)

Western region (includes two BANS, one for WA and one for OR – both share the same bill date). This one spreadsheet would represent two separate claims. Eschelon would label the “form tab” and the “detail tab” in an agreed upon format so Qwest can easily recognize they go together.

The end result would be:

1. One E-mail
2. One spreadsheet
3. Two forms contained within the spreadsheet

Example-Disp  
Memo.xls (498 KB)..

Example (2)

Central region (includes Utah Resale, Utah UNE-P and Utah UNE-Star BANS –not all BANS have the same bill date)

This spreadsheet would represent three separate claims. Eschelon would label the “form tab” and the “detail tab” in an agreed upon format so Qwest can easily recognize they go together.

The end result would be:

1. One E-mail
2. One spreadsheet
3. Three forms contained within the spreadsheet

Example-UT Disp  
Memo.xls (1,01...

**Subject:** Eschelon's Comments on Qwest's Version 4 Billing Dispute Process

Eschelon objects to Qwest's proposed CR. Qwest's proposed CR is beyond the scope of the commitment Qwest made to LTPA. Qwest is trying to change a CLECs legal rights by calling it process. Although Qwest claims that there is a correlation between its proposed “process” and the billing PIDs, that correlation does not exist for the vast majority of Qwest's proposal. Qwest's proposal applies to many invoices/products not even measured by the billing PIDs. In fact, Qwest has refused to add such items to those PIDs. (See, e.g., Issue 5, LTPA Issues Matrix at

[http://www.qwest.com/about/policy/ltpa/docs/June\\_2\\_Matrix.pdf](http://www.qwest.com/about/policy/ltpa/docs/June_2_Matrix.pdf).) In addition, Qwest continues to expand its proposal to move even farther from LTPA's initial purpose. For example, in Qwest's 4<sup>th</sup> revision of the Dispute Claim Process, Qwest added an entirely new 90 day provision (discussed below) that is unrelated to the amount of detail that accompanies dispute denials. The single issue that is relevant to the billing PIDs, however, is Qwest's commitment to provide additional detail when Qwest denies a billing dispute initiated by the CLEC (at least if the CLEC so desires this information). Qwest and CLECs can agree to such a process for providing additional detail. The remainder can and should be dealt with in each CLEC's ICA.

The problems at issue arise because of Qwest's failure to provide accurate billing to CLECs. Qwest resources should be spent improving billing accuracy rather than Qwest's elaborate proposal. Qwest's proposal would significantly increase resources required by CLECs to dispute bills. For example, the number of dispute notifications required by Qwest's inefficient proposal would be approximately 5 times the number of dispute notifications Eschelon currently initiates each month, for the same number of disputes. CLECs already expend too many resources on billing disputes and Qwest's proposed process adds additional steps that create no additional benefit to CLECs.

Qwest's proposal states that certain time deadlines or steps apply when an ICA does not contain that particular time deadline or step. Qwest is attempting to misuse CMP to unilaterally impose its own interpretation of ICA language. CLECs may interpret silence as to a time limit or step to mean that there is no time limit (or the time limit is elsewhere in the ICA or state law, such as a limitations period) or that no step is required. If Qwest disagrees with an ICA interpretation, the proper procedure is to invoke the ICA dispute process. Qwest's proposal is an attempt to displace the Commission's or Arbitrator's authority to decide such issues. At a minimum, Qwest's language misleads business personnel at CLECs about the meaning of the ICA and whether that meaning is decided. Qwest's statements about the ICA are too broad and out of context. Qwest cannot say that a deadline applies, for example, when it hasn't even checked a particular ICA to determine whether that is the case or whether there is other language in the ICA to the contrary.

Another problem with Qwest's proposed 90 day limit is the language "from when the charge first appeared on the bill" is that it does not account for billing errors that legitimately are not discovered until later. For example, Qwest recently asked Eschelon about the status of certain lines being billed. When Eschelon investigated, Eschelon found that Qwest was billing Eschelon for those lines even though Qwest sent loss reports to Eschelon for these lines in 2002 and 2003. Under the current process, Qwest has properly agreed to refund those payments back to 2002 and 2003. Qwest's proposal would lead to unfair results such that Qwest would benefit from its own billing errors and is a significant departure from Qwest's current practice. Pursuant to Qwest's current process, "Questions concerning the application of the CLEC/Qwest ICA are considered compliance issues" that are dealt with outside of CMP (See <http://www.qwest.com/wholesale/downloads/2002/020729/QwestServiceCenterManagerRolesRelationtoCMP06-06-02.doc>). The documentation containing this statement was developed in CMP redesign. Qwest cannot now unilaterally deal with contact application issues in CMP in violation of its own process and its commitment in CMP redesign. This issue is one of the application of contract/ICAs and not a CMP issue. It is beyond the scope of CMP.

With respect to Qwest's proposed form and related process (See page 13 of Qwest's 4<sup>th</sup> version of its proposed "process"), it is overly complicated, insufficiently flexible, and contrary to Qwest's current escalation process (which allows CLEC to go to any level at anytime and go to a higher level of Manager than identified in Qwest's proposal). Qwest's proposal places form over substance. Even if a CLEC provides Qwest with every piece of information Qwest needs to address a billing dispute completely, Qwest's proposed process would allow Qwest to reject a legitimate dispute based on alleged non compliance with a rigid form. Resubmission of the form is extra work and causes delay. Qwest's proposal introduces unnecessary resource burdens and delays.

Regarding the section on "returns of claims" (See page 11 of Qwest's 4<sup>th</sup> version of its proposed "process"), Qwest's terminology is a euphemism that causes unnecessary confusion. Instead of

using "returned," Qwest should simply say "rejected" because that is what Qwest means. Regarding number 5 in Qwest's list of examples of when a claim will be rejected, Qwest needs to delete this "example" from the list. If the parties disagree as to the need for an ICA amendment or the source or application of a rate, Qwest should accept the dispute and take the normal steps to obtain resolution of the dispute. Unlike some of the other examples, a claim rejected based on reason number 5 cannot be "corrected" and resubmitted. A decision is needed regarding the disagreement of the parties. Therefore, the dispute needs to be recognized and get resolved. As to the remaining examples, Eschelon understands Qwest plans to revise the examples. Eschelon reserves the right to comment on Qwest's proposed language, if Qwest continues to pursue its proposal.

Eschelon opposes Qwest's CR. Eschelon reiterates its request that Qwest instead initiate a notice on this issue. The notice should state that Qwest will provide CLECs with the detailed reason(s) for Qwest's denial of a dispute (which reasons have been agreed upon in the LTPA/CMP joint meeting) when Qwest denies a CLEC's billing dispute, if a CLEC makes a one-time request to receive such information on an ongoing basis. (Because the process would be optional, a level one notice is sufficient. However, because this issue has already been dealt with in CMP, Qwest could also modify its CR to deal with just this one issue and deal with it that way, if that is preferable to Qwest.) This notice would meet the commitment Qwest made in LTPA. If a CLEC requests this information for future dispute resolutions and Qwest fails to provide the required information, then Qwest's response should count as a miss in BI-5B. If a CLEC does not request the detail, Qwest may count the response as timely, assuming Qwest responds to the claim within 28 days of acknowledging the claim. (Alternatively, Qwest can provide the committed additional detail to all CLECs if it is easier for Qwest to do so.)

**Subject:** Billing Dispute process/Eschelon response

Donna,  
I am attaching Eschelon's response that Qwest and the CLECs agreed was due by COB on 5/13/04. As a general note, Eschelon believes that Qwest's CR has significant changes to Eschelon's existing billing dispute process. Qwest committed in LTPA to providing more detail on its resolution responses. Qwest said it had to submit a CR to make those changes. The CR Qwest submitted is a complete redesign of the entire dispute process. Qwest said "Qwest's expectation was that CMP would address several aspects of the billing claim process". Qwest has always had the ability to address the billing claim process in CMP. If Qwest had submitted the request to CMP with only the change Qwest committed to making in LTPA and needed to go through CMP to make, (increasing the detail on the resolution response) the change could have been implemented quickly. This change does not impact CLECs process and could be considered "optional" because the CLEC could choose to review the additional data Qwest would

provide, or not. Instead, Qwest submitted a CR that had changes well outside the scope of the LTPA commitment Qwest made.

Comments on the revised draft document:

- 1.) Pages 4 and 5 of Qwest's revised document contains four examples of disputes submitted. Qwest states that the first two examples will be excluded from BI-5. However, Qwest has populated "1" in the BI-5A and BI-5B "count". How can a dispute be excluded from the PID and at the same time included in the PID?
- 2.) (New question based on MCI #22) On page 9 of the revised document, Qwest states that if "a claim is determined to be a legally disputed claim, the claim will be resolved and [sic] resolution letter sent." Will Qwest's resolution letter state "Status", "Resolution" or some other identification of the response type?

Please let me know if you have questions or concerns.

Thanks,

**Questions from Eschelon, MCI and Cbeyond related to Supporting Documents Associated with Dispute (Claim) Process CMP PC040604-1 – Revision 1 dated 4/20/2004**

#	CLEC Question	Qwest Response
1	<p><b>Eschelon</b> <b>Date receive: May 3, 2004</b> <b>Question:</b> Qwest asserts that this CR is in response to requests made by CLECs in Long Term PID Administration ("LTPA").<sup>1</sup> Explain how each change Qwest proposes to how CLECs submit claims is necessary to respond to the CLEC request for Qwest to provide additional detail in Qwest's responses when it denies a CLEC claim.</p>	<p>Qwest's expectation was that CMP would address several aspects of the billing claim process. Included in that was the additional details in Qwest's response when it denies a CLEC claim. The combination of the change request and ensuing CMP discussion go to the heart of that matter.</p> <p>Specifically, Qwest's intent is to expand on the level of detail currently provided on the resolution letters.</p> <p>If Qwest denies or grants a claim, our system will be able to generate consistent information back to you driven from the data submitted with the initial claim. This will assist in providing consistent data on your resolution letter.</p> <p>The following should be entered on the Resolution:</p> <ul style="list-style-type: none"> <li>• Today's Date</li> <li>• Your Contact Name:</li> </ul>

<sup>1</sup> Qwest April 26, 2004 Documentation at 3.

		<ul style="list-style-type: none"> <li>• Your Address</li> <li>• City, State, Zip code</li>   <li>• Identify if Status or Resolution</li>   <li>• Customer Claim #, if available</li> <li>• Qwest Dispute ID #</li> <li>• If it forms the basis of the denial, Cost docket, and Docket # will be included</li> <li>• If <u>it</u> forms the basis of the denial, the Service order will be included <u>(Eschelon does not track by service order number. Qwest should provide the PON that generated the service order/orders or in the case of M&amp;R charges the Qwest trouble ticket number.)</u></li> <li>• If it forms the basis of the denial, Interconnection Agreement (IA), SGAT or tariff, the section will be included <u>(Eschelon requests additional documentation on the level of detail Qwest will provide. For example, the section of the ICA should be down to the paragraphs that Qwest is referencing (2.4.4.2.3 not just section 2.0) and Qwest should tell the CLEC which tariff Qwest is referring to as well as the exact section of that tariff. Qwest should remove SGAT from this section. If a CLEC is operating under the SGAT, that is their ICA.)</u></li> </ul> <p>The following applies to Resolution only:</p> <ul style="list-style-type: none"> <li>• Claim Resolution (Deny, Grant or Partial Deny or Grant)</li> <li>• Amount in Dispute</li> <li>• Spreadsheet or other documentation that details the resolution for each Dispute Type, including how or why the conclusion was reached</li> <li>• Credit Invoice Period: mm/dd/yyyy to mm/dd/yyyy</li> <li>• Credit should appear on your mm/dd/yyyy bill</li> </ul>
2	<p><b>Eschelon</b> <b>Date received: May 3, 2004</b> <b>Question:</b> In LTPA, Qwest “agreed to advocate before the CMP, processes and procedures to provide greater detail when a claim is denied.”<sup>2</sup> Why has Qwest failed to document in this CR the detail Qwest will provide when Qwest denies claims such as, citing cost docket orders/compliance filings and/or sections of Interconnection Agreements?</p>	<p>The detail was not in the initial change request because it was a judgment call on the appropriate level of detail to include. Based on CLEC feedback, that detail has been added. It was always Qwest’s intent to discuss the level of resolution detail in the CMP process. Qwest’s intent remains to expand on the level of detail currently provided on the resolution letters. Qwest will cite a Cost Docket/compliance filing and or sections of Interconnection Agreements in resolution letters</p>

<sup>2</sup> See LTPA Final Issues Matrix, March 25, 2004 at 6.

		See #1
3	<p><b>Eschelon</b> <b>Date received: May 3, 2004</b> <b>Question:</b> If a CLEC disputes Qwest’s denial of a claim, Qwest states that the CLEC “will be required to explain why you disagree with the resolution.”<sup>3</sup> How can CLECs provide an explanation unless Qwest provides its reason for denying the claim?</p>	<p>As stated in the response to an earlier question, Qwest will provide the level of detail in the resolution for the customer to understand the reason for the denial. The expectation is that when challenging a denial of a claim, the specific details from the resolution that are in question be provided.</p>
4	<p><b>Eschelon</b> <b>Date received: May 3, 2004</b> <b>Question:</b> In this CR, Qwest is attempting to require CLECs to cite cost docket/tariff, including section or page number, or Qwest will reject the CLEC’s claim.<sup>4</sup> Please explain why Qwest is attempting to avoid its burden to charge appropriate rates. Qwest’s approach to its customers should not be, “prove to me Qwest can’t charge this.” Please also explain if it is Qwest’s intent to begin rejecting disputes that do not contain the proposed “Customer Required Supporting Information.”</p>	<p>Qwest’s intent is to expand on the level of detail currently provided on the resolution letters. Qwest is committed to providing accurate bills to you. Providing the cost docket/tariff and contract references in the claim will help Qwest to understand exactly what is being disputed. This should assist in providing a quality resolution letter to you. Yes, it is the intent for Qwest to return disputes that do not contain customer-required information. <u>(Eschelon comment – Qwest states above that Qwest’s intent is to expand the level of detail it provides on resolution letters. Instead, Qwest has designed the process so the CLEC has the onus to first provide to Qwest the very detail Qwest said it would provide. That being the case, Eschelon asks Qwest to include the detail required to justify charges on the bills it sends to the CLEC. For example, the bill should have per ICA section 2.4.3.4 or per next to a USOC, NRC, RC or M&amp;R charge, so the CLEC can verify whether Qwest is appropriately charging the CLEC.)</u></p>
5	<p><b>Eschelon</b> <b>Date Received: May 3, 2004</b> <b>Question:</b> Please define the terms “claim” and “dispute” as used by Qwest. Qwest’s glossary provides that the two words are interchangeable, but does not define what a claim is.</p>	<p>Dispute is to “call into question”. Claim is “this matter needs (claims) attention: <u>(Qwest has provided a “dictionary definition”. Eschelon will clarify the request. Please provide a definition that describes Qwest use of the term in this process. Eschelon asks Qwest to define all terms it uses the first time in this process in some manner.)</u></p>
6	<p><b>Eschelon</b> <b>Date received: May 3, 2004</b> <b>Question:</b> Qwest currently reports BI-5 performance based on however the CLEC submits the dispute. For example, if the CLEC submits one claim for multiple invoices, Qwest acknowledges and responds to that one claim submission. Please explain precisely the intent of the proposed Dispute Detail Section Information Section #11. The description of</p>	<p>Qwest is asking that claims greater than 60 days from the bill period be submitted on one claim and less than 60 days from the bill period on another claim. Or, if multiple disputes are submitted, we will use the oldest bill date. <u>(Eschelon comments – Qwest stated in the response to #1 that “Qwest’s expectation was that CMP would address several aspects of the billing claim process.” In short, Qwest is making changes to the billing dispute process that would not be</u></p>

<sup>3</sup> Qwest April 26, 2004 Documentation at 7.

<sup>4</sup> Qwest April 26, 2004 Documentation at 5.

	<p>Section #11 is too vague. The intention of this section appears to greatly expand the number of disputes that CLECs must submit each month.</p>	<p><u>required to meet the commitment Qwest made to LTPA. The form Qwest has introduced has no bearing on and does not drive the PID. Qwest does not require the form now to report this PID. Qwest stated that information the CLEC would provide on this form is manually loaded into a tracking database. Is the information Eschelon currently sends manually entered into this database? It is Eschelon's understanding that database is the source of the data for the PID and not this form. The form and its required fields are a significant change to the existing process Eschelon and the Qwest billing team spent almost two years developing. Since Qwest currently reports this PID using the current process, Eschelon recommends that Qwest use this CR, which Qwest told LTPA it needed, to implement a process to provide more detail on the resolution letter. Qwest then can submit a separate CR if it wishes to make additional changes to the billing dispute process that are unrelated to the changes required to fulfil its commitment to LTPA.)</u></p>
<p>7</p>	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> Please define the term "Dispute Reason Code" on page 6 of the Documentation. How is this term different from "Dispute Type"?</p>	<p>Dispute Reason Code and Dispute Type mean the same. The document will be changed to reflect this.</p>
<p>8</p>	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question</b> How will Qwest use Field 16 to link the current dispute to a prior dispute?</p>	<p>This provides a way for the customer to reference the dispute ID # they disagree with. If you disagree with Qwest's resolution, Qwest will need to know what claim number the customer disagrees with so the Service Delivery Coordinator (SDC) can refer to that claim.</p>
<p>9</p>	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> In this CR, Qwest states, "If you receive an 'Out of Office' message, you may send the claim to the SDC backup. If the claim is not sent to the SDC backup, the receipt of the claim will be the day the SDC is scheduled to return to the office." Please remove this limitation as it conflicts with Qwest's PID language. The BI-5 PID defines the date of receipt as follows: "Date of receipt is the date Qwest receives the claim."</p>	<p>The out of office issue was discussed and agreed upon at the February 20, 2004 LPTA Ad Hoc meeting (<u>Eschelon agrees this process was discussed at the February 20, LTPA Ad Hoc meeting, however, Eschelon does not agree that CLECs agreed to this process. Qwest has not yet provided the minutes of this meeting for review. John Kern (LTPA facilitator) reported for this meeting "2/20 - Qwest has withdrawn the "legally disputed claims" exclusion. Qwest will review the proposed PID to determine if changes are required as a result of open cost docket proceedings (e.g., no written order is available or rates are retroactive). Qwest rejected the proposal by Eschelon to extend the claims period from 60 days to 90 days but CLECs agreed to review the use of national OBF guidelines to see if it addresses this issue. CLECs agreed to develop a proposal to include "timely credits" and a new diagnostic disaggregation to count the % of resolved claims denied by Qwest that CLECs</u></p>

		<p>challenge within “x” number of days. Both proposals are due by Mar. 1 To assist in this effort, Qwest agreed to forward billing claim PIDs used by other ILECs. This issue will be discussed again on 2/27 at 1:30 MST/2:30 CST.” As you can see, John Kern makes no mention of this change that Qwest said CLECs agreed to. In addition, the updated March 11<sup>th</sup> draft Qwest sent to LTPA did not reflect this change. A change of this nature impacts CLECs business units and would need to be communicated. Qwest’s confusion on this issue supports the need for joint LTPA/CMP meetings when PID changes a CLECs business operations process.)</p>
10	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> Please define the words “returned” and “closed” in Acknowledgment of a claim section on page 7 of the Qwest Documentation</p>	<p>Return means to send back to the customer. Closed means no further action by Qwest. (Eschelon comments - On page 8 of the revised document, Qwest states that if "required information is missing from the dispute, Qwest will send an acknowledgment response indicating why the dispute is being returned. The dispute will be considered returned (sent back to the customer) and closed (no further action by Qwest &amp; no internal Qwest Dispute ID number assigned)..."</p> <p>Eschelon understands the insertion of the parenthetical remarks in the document to be in response to Eschelon's question #10. This response did not address the issue intended by the question. So, Eschelon submits this follow up questions:</p> <p>On page 5 of Qwest's revised document, Qwest describes two examples of disputes submitted by CLECs that have multiple dispute types. Suppose that the CLEC's dispute was missing necessary information on only the "TAX" portion of each of these forms--i.e., the CLEC had provided all necessary information on the other dispute type(s). Would Qwest process (i.e., investigate fully and resolve) the portions of the dispute with all the necessary information? How would Qwest populate the last three columns of the table ("Exclude from PID (y/n)", "BI5A count", and "BI5B count") for these two scenarios?)</p>
11	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> Please explain why a CLEC can only submit a disagreement with Qwest’s response “once”, per Qwest Dispute ID number.<sup>5</sup></p>	<p>When notified of a disagreement the first time, Qwest will work with the customer to a final disposition. Multiple communications regarding the disagreement are not necessary, and in fact, would take up valued time for both parties. (Eschelon recommends that Qwest state that</p>

<sup>5</sup> Qwest April 26, 2004 Documentation at 8.

		<u>CLECs should follow the dispute/escalation process to their ICA)</u>
12	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> Please explain the mapping between the proposed Customer Billing Dispute Notification Form and the Field Dictionary. There are discrepancies between the two documents (see, for example, Field 14).</p>	Field 14 should read Total # of disputed items and will be corrected in the document
13	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> What is the purpose Field 14 ("Total # of Disputed Items") on the proposed Customer Billing Dispute Notification Form?</p>	<p>This identifies if you are disputing 10 items or 10000 items (i.e. sub-accounts). (This data is not required for Qwest to report this PID. BI-5a is based on receipt and BI-5b is based on dispute type, bill date, within 60 days, etc. The numbers of items is not a basis for the measure. See # 6 Eschelon response.)</p>
14	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> How will CLECs identify Status Notifications?</p>	<p>The word STATUS will be on the notification (Eschelon recommends Qwest add "status" or Resolution" to a <del>defined</del> spot in the response, such as the subject line. This will eliminate any confusion if the content of the information Qwest sends the CLEC includes, for example, the word "status" in a resolution response or visa versa.)</p>
15	<p><b>Eschelon:</b> <b>Date received: May 3, 2004</b> <b>Question:</b> Please respond to the CLEC request for joint LTPA-CMP meetings under Section 2.6 of the CMP Document for this CR.</p>	<p>In the CMP meetings there are Qwest representatives from both CMP and LTPA. From our perspective, that meets the CLEC request. (Eschelon adds that Qwest submitted this CR but there was no communication to LTPA that the CR existed or what it requested.)</p>
16	<p><b>MCI</b> <b>Date received: May 3, 2004</b> <b>Question:</b> Submit claims using the following form. If you have an agreement with the Billing Center, you may also attach a spreadsheet with all required information. If required information is not provided, the claim will be returned and considered closed. <b>MCI Comment: Spreadsheet must be an option for all Parties.</b></p>	<p>Spreadsheet is an option. The phrase "if you have an agreement with the Billing Center you may" will be removed from the document.</p>
17	<p><b>MCI</b> <b>Date received: May 3, 2004</b> <b>Comment:</b> If multiple bill dates are disputed (i.e. 4<sup>th</sup>, 7<sup>th</sup>, 10<sup>th</sup>), dispute claims must be split out by bill date/year. Enter claims within 60 days of the bill date on one claim and those greater than 60 days on another claim. If the disputes greater than 60 days from the bill date are not separated from those within 60 days from the bill date, Qwest will group using the oldest bill date. <b>MCI Comment: MCI currently keeps disputes</b></p>	See #6

	<p>separated by billing account numbers. Is it Qwest's intent that a dispute for each invoice date for each ban must be filed? It would be cumbersome to file a "Claim Form" for the same issue month after month. One claim to identify the issue should be sufficient, using a spreadsheet to outline the activity on a monthly basis.</p> <p><i>list comment as verbatim from CLEC</i></p>	
18	<p><b>MCI</b> <b>Date received: May 3, 2004</b> If you receive an "Out of Office" message, you may send the claim to the SDC backup. If the claim is not sent to the SDC backup, the receipt of the claim will be the day the SDC is scheduled to return to the office. <b>MCI</b> Question: This is not feasible and places the burden on CLECs to track Qwest personnel schedules. In addition, CLECs disputes will be delayed based on Qwest personnel schedules. The BI-5 PID defines as "Date of receipt is the date Qwest receives the claim"</p>	See #9
19	<p><b>MCI</b> <b>Date received: May 3, 2004:</b> The Qwest Billing SDC will investigate and attempt to resolve the claim of dispute within 28 calendar days after acknowledgment of the claim. If the Qwest Billing SDC is unable to resolve the claim within 28 calendar days after acknowledgment of the claim, a status update will be provided in writing on a status notification. <b>MCI</b> Question: Distinction between final resolution and status notice is not clear. CLECs must be able to differentiate. Need to define what instances would constitute not meeting the 28 calendar day interval (the exceptions to the rule). In addition, status notification must identify follow-up resolution time frame.</p>	The letter will say either Status or Resolution. The follow-up date for status will be either the next 28-calendar day or the actual resolution.
20	<p><b>MCI</b> <b>Date received: May 3, 2004</b> MCI Question: Qwest must provide sufficient details when a claim is denied. In LTPA, Qwest agreed to advocate in CMP sufficient details surrounding when a claim is denied. Why has Qwest failed to document in the CR the detail Qwest will provide when Qwest denies claims such as, citing cost docket orders/compliance filings and/or section of the Interconnect Agreements?</p>	See #1 and #2
21	<p><b>MCI:</b> <b>Date received: May 3, 2004</b> MCI Comment: Bullet that includes follow-up resolution time frame</p>	<p>Bullet added: The letter will say either Status or Resolution. The follow-up date for status will be either the next 28-calendar day or the actual resolution.</p>

<p>22</p>	<p><b>MCI</b> <b>Date received: May 3, 2004</b> Definition of Legal Dispute:</p> <ul style="list-style-type: none"> <li>• Referrals to the Qwest attorney that contemplate a need for litigation, arbitration or other dispute resolution pursuant to an Interconnection Agreement, or where the customer's attorney has actively joined the resolution of the claim." If a claim is determined to be a legally disputed claim, the claim will be resolved and resolution letter sent. This includes bankruptcies.</li> </ul> <p>MCI Question: The escalation process must be clearly defined in this section, including but not limited to timeframes and dollar levels of authority.</p>	<p>Need more clarification on this question.</p>
<p>23</p>	<p><b>MCI</b> <b>Date received: May7, 2004</b> If you do not agree with the resolution letter, you may send in a new dispute within 90 business days from receipt of the resolution letter using the Customer Billing Dispute (Claim) Notification Form. You will not be required to submit the "type of dispute" again, but you will be required to explain why you disagree with the resolution. If the issue can not be resolved between you and the SDC, the SDC will escalate to the SDC supervisor. The supervisor will negotiate with you to reach a conclusion satisfactory to Qwest and you as per the terms of your Interconnection Agreement. You can only submit a disagreement claim once, per Qwest Dispute ID number.</p> <p>MCI Question: It is unacceptable that "a new dispute" form must be submitted for the identical claim that Qwest has denied. The ability to revisit any claim must be an option and not limited to once "per Qwest Dispute ID number." As stated above, an escalation process must be fully defined. As well, dispute resolution is always an option, thus language needs to be added to the affect.</p>	<p>See #33</p>
<p>24</p>	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> Question: Qwest specifies in detail how CLECs must submit claims to Qwest, but Qwest fails to specify how it will submit acknowledgements to CLECs. Cbeyond</p>	<p>Qwest can acknowledge via FAX, Email or USPS. We do have the same options. The document has been updated. For example, if Qwest receives the claim via FAX, the acknowledgement and resolution will be returned via FAX.</p>

	would like this to be included in the documentation. Cbeyond would also like to hold Qwest to the same options that Qwest gives CLECs.	
25	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> Question: Qwest specifies in detail the fields that CLECs are required to populate on its claim forms submitted to Qwest. Cbeyond would like to see the same level of detail applied to required fields in Qwest's acknowledgement back to CLECs. For example, if Qwest rejects a claim for lack of detail or missing information, what details will Qwest provide to the CLEC as to the reason for the load rejection?</p>	Qwest's current process is to provide the reason for the returned claim. Qwest will indicate what required information is missing.
26	<p><b>Cbeyone</b> <b>Date received: May 4, 2004</b> Question: If a claim is rejected based on the definition offered below, why does Qwest close out the dispute? Loading rejects should be handled differently than claim resolutions in Qwest's favor. For loading rejects, Cbeyond proposes that Qwest hold these disputes in the system in a "reject" status much like service orders are clarified on the provisioning side. This will then enable the CLEC to resubmit the claim once it has made the appropriate corrections to the claim form as outlined by Qwest. This will also enable the CLEC to maintain it's original claim number. Cbeyond has grave concerns about allowing Qwest to simply close out a dispute that it never reviewed for merit. Cbeyond will have already withheld the money and wants assurance that Qwest can appropriately track Cbeyond's dispute submission even if the submission file contained errors that caused Qwest to respond with a load reject. Just like with LSRs, Qwest can apply a window for the CLEC to resubmit a corrected file.</p>	You can reuse your claim number. If all required fields are populated on the claim when it is submitted then the claim will be accepted.
27	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> Question: It's unclear between today's call and this document which fields are required and which fields are optional. Could you please highlight this in the documentation?</p>	Yes – the document has been updated
28	<p><b>Cbeyond</b> <b>Date receive: May 4, 2004</b> <b>Question</b> Cbeyond doesn't agree with</p>	The out of office issue was discussed and agreed upon at the February 20, 2004 LPTA Ad Hoc meeting

	<p>Qwest's process for assignment of claim receipt date. If a Qwest SDC is out of the office, the onus should be on Qwest (not the CLEC) to forward it to the appropriate party. Qwest's internal personnel issues are of no concern to CLECs and should not become an additional burden on the CLEC to manage on Qwest's behalf – they are after all Qwest employees. An alternative proposal is to have Qwest automatically forward dispute emails to the SDC backup when the SDC is out of the office. Another option is to setup a dispute mailbox that acts as the system of record for claim receipts so as to separate claim receipt date from Qwest personnel issues.</p>	
<p>29</p>	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> <b>Question:</b> Can you clarify what is meant by the requirement to supply the list of subaccounts if the main billing account number provided is a CRIS summary billing account? Can you explain why Qwest has this requirement? If my dispute relates to a circuit or is the same issue for a group of circuits, why won't the circuit id or the list of circuit ids suffice?</p>	<p>Our SDC's access your account information by sub-account.</p>
<p>30</p>	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> <b>Question:</b> On Late Payment Charges, Qwest does not specify on its invoices (at least in CRIS generated bills) the date Qwest shows a check was received, nor does it delineate the number of days that LPCs are being assessed, nor does it specify the outstanding balance to which LPCs are applied. Why, then, must CLECs provide details that Qwest itself doesn't provide related to the charges it is billing?</p>	<p>In the event Qwest assesses late payment charges on a bill, the detailed information would be provided. If you are disputing the late payment charges, this information would be required.</p>
<p>31</p>	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> <b>Question:</b> Qwest requires a great deal of specific information to support claims such as ICA, docket, or tariff references. However, there are no guidelines specified that require Qwest to provide like details in its responses back to CLECs. Can you explain why such details are missing from this document? What is being done by Qwest to remedy this gap in the documentation?</p>	<p>See # 1</p>

32	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> <b>Question:</b> What if Qwest bills a CLEC for something which is not documented in an ICA, SGAT, PCAT, etc.? For example, applicable USOCs for DS1 EELS were not defined in a Qwest document until February 2004. That's at least 3 years after Qwest had been billing for these services. Is Qwest suggesting these items are not disputable? I would think to the contrary that these items are disputable until Qwest provides the appropriate documentation to support the charges.</p>	Yes, they are disputable.
33	<p><b>Cbeyond</b> <b>Date received: May 4, 2004</b> <b>Question:</b> The escalation process defined in the last section seems to contradict the process outlined in Cbeyond's interconnection agreement, specifically sections 5.4 Payment &amp; 5.18 Dispute Resolution, which specify vice presidential level negotiations. I can recall several disputes that have required director level escalations to get the correct resolution to a dispute with Qwest. Please explain why Qwest would establish a process that is in breach of its contractual obligations for dispute resolution? Cbeyond has had claims erroneously denied by Qwest due to training issues that went as high as the management level. How does Qwest justify setting a limit to disagreements to just one per claim especially given its history of erroneous resolutions? The proper treatment of this is to escalate one level of management for each instance of disagreement among the parties arises over the same claim.</p>	<p>Qwest still needs the disagreement in writing and will require the customer to submit on the form. The supervisor will negotiate with the customer to reach a conclusion satisfactory to both Qwest and the customer as per the terms of their Interconnection Agreement. The following was added to the document "Subject to any contrary procedures in applicable interconnection agreements, ..."</p>
34	<p><b>Covad</b> <b>Date received: May 6, 2004</b> If you receive an "Out of Office" message, you may send the claim to the SDC backup. If the claim is not sent to the SDC backup, the receipt of the claim will be the day the SDC is scheduled to return to the office. <b>Question:</b> Covad does not agree. The "receipt of claim" date should be the date CLEC initially submits the claim, not the date the SDC backup is contacted. Qwest needs to maintain appropriate coverage for this process. MZ</p>	See #9
35	<b>Covad</b>	Would it work for you if we add this under Service

	<p><b>Date received: May 6, 2004</b> Covad believes an additional "Dispute Type" needs to be identified to specifically address Facility "type" and "quantity" disputes. MZ</p>	Order issues on the Dispute Notification Form?
36	<p><b>Covad</b> <b>Date received: May 6, 2004</b> Covad believes the Definition of the Resolution must include all "facts" related to the resolution as well as any PUC order which Qwest relies upon for the Resolution. MZ</p>	See #1
37	<p><b>Covad</b> <b>Date received: May 6, 2004</b> Covad needs clarification that Qwest does not intend to preclude CLEC going to "dispute resolution" should CLEC not agree with the Qwest Resolution. MZ</p>	Does #33 answer this question?

IN RE:

PETITION OF MCLEODUSA  
TELECOMMUNICATIONS SERVICES,  
INC., FOR ENFORCEMENT OF  
INTERCONNECTION AGREEMENT  
WITH QWEST CORPORATION

Docket No. MTI-T-05-01

**PETITION OF MCLEODUSA TELECOMMUNICATIONS SERVICES, INC.,  
FOR ENFORCEMENT OF INTERCONNECTION AGREEMENT  
WITH QWEST CORPORATION**

McLeodUSA Telecommunications Services, Inc. ("McLeodUSA"), through its undersigned counsel, and pursuant to Idaho Code § 61-501, petitions the Idaho Public Utilities Commission ("Commission") for enforcement of its interconnection agreement with Qwest Corporation ("Qwest"). This Petition stems from a dispute between McLeodUSA and Qwest over Qwest's right under the interconnection agreement to demand security deposits from McLeodUSA for services provided under the agreement, and to discontinue services to McLeodUSA should McLeodUSA not comply with Qwest's demand. Qwest has recently demanded that McLeodUSA pay more than \$15.9 million to Qwest within 10 days—\$971,870.45 in Idaho alone—or Qwest will "suspend order activity" and "disconnect services" provided to McLeodUSA. Rather than follow the clear terms of the interconnection agreement regarding dispute resolution, Qwest has made extortionate demands rather than adopt the approach of established telecommunications carriers that respect their contractual obligations. McLeodUSA seeks an order from this Commission that Qwest may not demand a security deposit and that Qwest may not "suspend order activity" or "disconnect services" until all procedures for dispute resolution in the interconnection agreement have been satisfied. Because

A. Qwest Has No Right To Demand A Security Deposit Under The Interconnection Agreement.

21. Nothing in the Interconnection Agreement gives Qwest the right to demand a security deposit from McLeodUSA at this time. Section (A)3.4.3 of Part A of the General Terms provides Qwest's rights to a security deposit under certain conditions, but none of the conditions allowing Qwest to invoke those rights have been satisfied. First, Section (A)3.4.3 is a subsection of Section (A)3.4 titled "Payment." Section (A)3.4.1 defines the scope of Section (A)3.4: "Amounts payable under this Agreement are due and payable within thirty (30) calendar days after the date of invoice." (emphasis added) Thus, any rights to a security deposit under Section (A)3.4.3 are limited to security for payments made for services provided under the Interconnection Agreement. Therefore, Qwest is wrong to make the connection as it does in the Qwest Demand Letter that "outstanding balances under the Interconnection Agreement and other agreements, tariffs, or accounts," justify its demand that McLeodUSA provide Qwest with a security deposit. Section (A)3.4.3 does not grant rights to Qwest to demand a security deposit for payments under another agreement or under a Qwest tariff.

22. Section (A)3.4.3 provides as follows:

[Qwest] will determine McLeod's credit status based on previous payment history with [Qwest] or credit reports such as Dun and Bradstreet. If McLeod has not established satisfactory credit with [Qwest] or if McLeod is repeatedly delinquent in making its payments, [Qwest] may require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) calendar days or more delinquent for three (3) consecutive months.

23. Qwest fails to satisfy any of these conditions. Taking the second condition first, Qwest does not allege, and could certainly not prove, that McLeodUSA has been "repeatedly delinquent" on any payments under the Interconnection Agreement. As stated above,

**CERTIFICATE OF SERVICE**

I HEREBY CERTIFY that on this day, March 30, 2005, I caused a true and correct copy of the foregoing **MCLEODUSA TELECOMMUNICATIONS SERVICES, INC., MOTION FOR EMERGENCY RELIEF and PETITION OF MCLEODUSA TELECOMMUNICATIONS SERVICES, INC., FOR ENDORCEMENT OF INTERCONNECTION AGREEMENT WITH QWEST CORPORATION** to be served by the method indicated below, and addressed to the following:

later than 60 days after the month in which service is provided. ATG shall not be responsible for paying untimely bills. Should ATG dispute any portion of the monthly billing under this Agreement, ATG will notify USWC in writing within thirty (30) days of the receipt of such billing, identifying the amount and details of such dispute. Both ATG and USWC agree to expedite the investigation of any disputed amounts in an effort to resolve and settle the dispute prior to initiating any other rights or remedies. ATG shall notify USWC in the event that it does not receive a bill from USWC within 45 days of ordering the Service.

26.4.4 If ATG is repeatedly delinquent in making its payments, USWC may, in its sole discretion, require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) days or more delinquent for three (3) consecutive months. The deposit may not exceed the estimated total monthly charges for a two (2) month period. The deposit may be a cash deposit, a letter of credit with terms and conditions acceptable to USWC in its sole discretion, or some other form of mutually acceptable security.

26.4.5 Interest will be paid on cash deposits at the rate applying to deposits under applicable Commission rules, regulations, or Tariffs. Cash deposits and accrued interest will be credited to ATG's account or refunded, as appropriate, upon the earlier of the termination of this Agreement or one full year of timely payments in full by ATG. The fact that a deposit has been made does not relieve ATG from any requirements of this Agreement.

## 26.5 Taxes

Each Party purchasing services hereunder shall pay or otherwise be responsible for all applicable federal, state, or local sales, use, excise, gross receipts, transaction or similar taxes, fees or surcharges levied against or upon such purchasing Party (or the providing Party when such providing Party is permitted to pass along to the purchasing Party such taxes, fees or surcharges), except for any tax on either Party's corporate existence, status or income. Whenever possible, these amounts shall be billed as a separate item on the invoice. To the extent a sale is claimed to be for resale tax exemption, the purchasing Party shall furnish the providing Party a proper resale tax exemption certificate as authorized or required by statute or regulation by the jurisdiction providing said resale tax exemption. Failure to timely provide said resale tax exemption certificate will result in no exemption being available to the purchasing Party.

## 26.6 Force Majeure

Neither Party shall be liable for any delay or failure in performance of any part of this Agreement from any cause beyond its control and without its fault or negligence including, without limitation, acts of nature, acts of civil or military

effort to resolve and settle the dispute prior to initiating any other rights or remedies. Each party shall pay all billed amounts when due, provided, however, that a Party may withhold (i) up to four months worth of disputed charges (not to exceed \$100,000 in the aggregate for all disputes should multiple disputes exist) pending resolution of such dispute, and (ii) any disputed amounts pertaining to reciprocal compensation for internet-related traffic. Should the dispute be resolved in the non-disputing Party's favor, the disputing Party shall pay the withheld amounts to the non-disputing Party within thirty days. Should the dispute be resolved in the disputing Party's favor, the non-disputing party will credit any paid disputed amounts against the disputing Party's succeeding monthly bills; provided, however, that if a credit balance remains for more than 3 months on an account, the non-disputing Party shall pay the credit balance in cash to the disputing Party. No late payment factor or charges, interest or other penalties shall apply to payments or credits made pursuant to the settlement of disputed amounts provided the payment or credit is made within 30 days following the resolution of the dispute.

- 12.4 If either Party is repeatedly delinquent in making payments, the other Party may, in its sole discretion, require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) days or more delinquent in the payment of non-disputed amounts for three (3) consecutive months. The deposit may not exceed the estimated total monthly charges for a two (2) month period. The deposit may be a cash deposit, a letter of credit with terms and conditions acceptable to the requesting Party in its sole discretion, or some other form of mutually acceptable security.
- 12.5 Interest will be paid on cash deposits at the rate applying to deposits under applicable Commission rules, regulations, or Tariffs. Cash deposits and accrued interest will be credited to the depositing Party's account or refunded, as appropriate, upon the earlier of the termination of this Agreement or one full year of timely payments in full by the depositing Party. The fact that a deposit has been made does not relieve the depositing Party from any requirements of this Agreement.

**13. MISCELLANEOUS TERMS**

**13.1. General Provisions**

13.1.1. The Parties are each solely responsible for participation in and compliance with national network plans, including the National Network Security Plan and Emergency Preparedness Plan.

13.1.2. Each Party is solely responsible for the services it provides to its End Users and to other telecommunications carriers.

13.1.3. The Parties shall work cooperatively to minimize fraud associated with third-number billed calls, calling card calls, and any other services related to this Agreement.

**13.2. Taxes**

**13.25. Headings of No Force or Effect**

The headings of Articles and Sections of this Agreement are for convenience of reference only, and shall in no way define, modify or restrict the meaning or interpretation of the terms or provisions of this Agreement.

**13.26. Regulatory Approval**

The Parties understand and agree that this Agreement will be filed with the Commission and may thereafter be filed with the FCC and shall, at times, be subject to review by the Commission or the FCC. The Parties shall cooperate in a good faith effort to secure, as soon as practicable, any required regulatory approvals of this Agreement.

**13.27. Compliance**

Each Party shall comply with all applicable federal, state, and local laws, rules and regulations applicable to its performance under this Agreement.

**13.28 Further Assurances**

Each Party shall at any time, and from time to time, upon the written request of the other Party, execute and deliver such further documents, and do such further acts and things as the other Party may reasonably request to effect the purposes of this Agreement. The Parties shall act in good faith and consistent with the intent of the Act in the performance of their obligations under this Agreement. Where notice, approval or similar action by a Party is permitted or required by any provision of this Agreement (including, without limit, the obligation of the Parties to further negotiate the resolution of new or open issues under this Agreement) such action shall not be unreasonably delayed, withheld or conditioned.

**13.29 Section 252(i) Election**

**Paging Provider shall have the right under 47 U.S.C. Sections 252(i) to elect terms and conditions from other approved agreements consistent with 47 C.F.R. Section 809.<sup>16</sup>**

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their respective duly authorized representatives.

COLORADO**

## **22.2. Term of Agreement**

This Agreement shall become effective upon Commission approval, pursuant to Sections 251 and 252 of the Act, shall terminate on October 31, 2002, and shall be finding upon the Parties during that term, notwithstanding Section 252 (i) of the Act. The Parties agree to commence negotiations on a new agreement no later than 135 calendar days prior to the termination date specified above; provided that Carrier, consistent with Section 252 (i) of the Act, may opt into a then-existing, valid interconnection agreement, in its entirety, at the conclusion of the said term of this Agreement. In the event that negotiations are not concluded as of the termination date specified above, the window of opportunity to file for arbitration to resolve outstanding contractual issues in accordance with the Act, will open upon the termination date specified above.

## **22.3. Payment**

22.3.1. Amounts payable under this Agreement are due and payable within thirty (30) days after the date of invoice. Billing and collection of usage charges by Carrier from its Customers shall have no bearing on the amount or timeliness of Carrier's payment obligation to USWC. USWC is solely responsible for making all Reciprocal Compensation Credits due to Carrier under this Agreement and the billing and collection of usage charged by USWC from its Customers shall have no bearing on the amount or timeliness of its credit obligations to Carrier.

22.3.2. Unless otherwise specified in this Agreement, any amount due and not paid by the due date stated above shall be subject to the late payment factor of the Intrastate Access Service Tariffs, General Regulations for the state in which the Service is rendered.

22.3.3. Should Carrier dispute any portion of the monthly billing under this Agreement, including the Reciprocal Compensation Credit, Carrier will notify USWC in writing within thirty (30) days of the receipt of such billing, identifying the amount and details of such dispute. Carrier shall pay all amounts due. Both Carrier and USWC agree to expedite the investigation of any disputed amounts in an effort to resolve and settle the dispute prior to initiating any other rights or remedies. Should the dispute be found in Carrier's favor, USWC will reimburse Carrier the resolved amount plus interest from the date of payment at the late payment factor of the Intrastate Access Service Tariffs, General Regulations for the state in which the service is rendered.

22.3.4. If Carrier is repeatedly delinquent in making its payments, USWC may, in its sole discretion, require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) days or more delinquent for three (3) consecutive months. The deposit may not exceed the estimated total monthly charges for a two (2) month period. The deposit may be a cash deposit, a letter of credit with terms and conditions acceptable to USWC in its sole discretion, or some other form of mutually acceptable security.

**U S WEST Communications, Inc.**

that will be consistent with the call detail information available from AWS upon request.

AWS will provide to USWC a monthly bill that will summarize the number of completed calls and minutes generated by USWC exchanges (as identified in the LERG and by USWC OCN) based upon the state and point of interconnection between AWS and USWC. Minutes of use will be aggregated monthly based on Conversation Time and will not be rounded to the next full minute. AWS will provide to USWC its first bill based on this system for the first full month after the Effective Date of this Agreement.

For purposes of billing the proportionate share of the Connecting Facilities, AWS may request that USWC apply the agreed-to factor, as discussed in Section 11.A(2), to the total of the Connecting Facilities, thus crediting the amount due from AWS to USWC. If a proportionate share of a third party facility is applicable to USWC, AWS shall at that time manually bill those charges to USWC.

- C. Invoices for Charges. Not later than fifteen (15) days following the end of each monthly billing cycle, the Parties shall deliver to each other an invoice reflecting the charges due from the other Party for facilities and usage attributable to the month covered by such billing cycle. Facilities charges will be billed in advance for the following period. Usage charges will be billed in arrears for the preceding period. All invoices shall be due and payable within thirty (30) days following the invoice date.
- D. Late Charges. If any portion of a payment due from a Party is received by the other Party after the required payment date, the portion of the payment unpaid shall be subject to a late payment factor of the Intrastate Access Service Tariffs, General Regulations for the state in which the Service is rendered.

If Parties are repeatedly delinquent in making its payments, Parties may, in their sole discretion, require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) days or more delinquent for three (3) consecutive months. The deposit may not exceed the estimated total monthly charges for a two (2) month period. The deposit may be a cash deposit, a letter of credit with terms and conditions acceptable to the Parties in their sole discretion, or some other form of mutually acceptable security.

Interest will be paid on cash deposits at the rate applying to deposits under applicable Commission rules, regulations, or tariffs. Cash deposits and accrued interest will be credited to the account of the Party that made the deposit or refunded, as appropriate, upon the earlier of the termination of this Agreement or one full year of timely payments in full. The fact that a deposit has been made does not relieve Parties from any requirements of this Agreement.

payment factor of the Intrastate Access Service Tariffs, General Regulations for the state in which the Service is rendered.

3. Should either Party dispute any portion of the monthly billing under this Agreement, that Party will notify the other Party in writing within thirty (30) days of the receipt of such billing, identifying the amount and details of such dispute. The Parties shall pay all undisputed amounts due. The Parties agree to expedite the investigation of any disputed amounts in an effort to resolve and settle the dispute prior to initiating any other rights or remedies. Should the dispute be found in Carrier's favor, Qwest will reimburse Carrier the resolved amount plus interest from the date of payment at the late payment factor of the Intrastate Access Service Tariffs, General Regulations for the state in which the service is rendered.
4. If Carrier is repeatedly delinquent in making its payments, Qwest may, in its sole discretion, require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) days or more delinquent for three (3) consecutive months. The deposit may not exceed the estimated total monthly charges for a two (2) month period. The deposit may be a cash deposit, a letter of credit with terms and conditions acceptable to Qwest in its sole discretion, or some other form of mutually acceptable security.
5. Interest will be paid on cash deposits at the rate applying to deposits under applicable Commission rules, regulations, or tariffs. Cash deposits and accrued interest will be credited to Carrier's account or refunded, as appropriate, upon the earlier of the termination of this Agreement or one full year of timely payments in full by Carrier. The fact that a deposit has been made does not relieve Carrier from any requirements of this Agreement.

#### **E. Taxes**

Each Party purchasing services hereunder shall pay or otherwise be responsible for all federal, state, or local sales, use, excise, gross receipts, transaction or similar taxes, fees or surcharges levied against or upon such purchasing Party (or the providing Party when such providing Party is permitted to pass along to the purchasing Party such taxes, fees or surcharges), except for any tax on either Party's corporate existence, status or income. Whenever possible, these amounts shall be billed as a separate item on the invoice. To the extent a sale is claimed to be for resale tax exemption, the purchasing Party shall furnish the providing Party a proper resale tax exemption certificate as authorized or required by statute or regulation by the jurisdiction providing said resale tax

17.2.2. This Agreement will terminate upon a revocation or other termination of either Party's governmental authority to provide the services contemplated by this Agreement. If the authority is temporarily suspended, delivery of traffic will cease only during the suspension if the suspended Party otherwise is and remains in full compliance under this Agreement.

**17.3. Payment**

17.3.1. Amounts payable under this Agreement are due and payable within thirty (30) days after the date of invoice. Billing and collection of usage charges by Paging Provider from its customers shall have no bearing on the amount or timeliness of Paging Provider's payment obligation to USWC.

17.3.2. Unless otherwise specified in this Agreement, any amount due and not paid by the due date stated above shall be subject to the late payment factor of the Intrastate Access Service Tariffs, General Regulations for the state in which the Service is rendered.

17.3.3. Should Paging Provider dispute any portion of the monthly billing under this Agreement, Paging Provider will notify USWC in writing within thirty (30) days of the receipt of such billing, identifying the amount and details of such dispute. Paging Provider shall pay all amounts due, including amounts in dispute. Both Paging Provider and USWC agree to expedite the investigation of any disputed amounts in an effort to resolve and settle the dispute prior to initiating any other rights or remedies. Should the dispute be found in Paging Provider's favor, USWC will reimburse Paging Provider the resolved amount plus interest from the date of payment at the late payment factor of the Intrastate Access Service Tariffs, General Regulations for the state in which the service is rendered.

17.3.4. If Paging Provider is repeatedly delinquent in making its payments, USWC may, in its sole discretion, require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) days or more delinquent for three (3) consecutive months. The deposit may not exceed the estimated total monthly charges for a two (2) month period. The deposit may be a cash deposit, a letter of credit with terms and conditions acceptable to USWC in its sole discretion, or some other form of mutually acceptable security.

17.3.5. Interest will be paid on cash deposits at the rate applying to deposits under applicable Commission rules, regulations, or tariffs. Cash deposits and accrued interest will be credited to Paging Provider's account or refunded, as appropriate, upon the earlier of the termination of this Agreement or one full year of timely payments in full by Paging Provider. The fact that a deposit has been made does not relieve Paging Provider from any requirements of this Agreement.

in reasonably resolving issues which result from such implementation on a timely basis.

**17.33. Entire Agreement**

This Agreement constitutes the entire agreement between the Parties and supersedes all prior oral or written agreements, representations, statements, negotiations, understandings, proposals and undertakings with respect to the subject matter hereof.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their respective duly authorized representatives.

COLLOCATION AGREEMENT

AGREEMENT NUMBER

CDS-990616-0108

BETWEEN

U S WEST COMMUNICATIONS, INC.

AND

PATHNET, INC.

i

2

COLLOCATION AGREEMENT

THIS COLLOCATION AGREEMENT ("Agreement") is made and effective as of August 12, 1999, by and between U S WEST Communications, Inc., a Colorado corporation ("USW"), and Pathnet, Inc., a Delaware corporation ("Pathnet").

WHEREAS, USW is an incumbent local exchange carrier having a statutory duty to provide for "Collocation" of equipment necessary for interconnection or access to unbundled network elements at its Premises, in accordance with the Telecommunications Act of 1996 (the "Act"); and

WHEREAS, Pathnet wishes to physically locate certain of its equipment within the Space (as defined herein) and connect with USW in accordance with the Act;

WHEREAS, Pathnet must have a state approved Interconnection agreement with USW in the states covered by this Agreement before Pathnet can order local interconnection trunks for the purpose of exchanging traffic between the Parties' networks.

NOW THEREFORE, in consideration of the mutual agreements and covenants contained herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, USW and Pathnet (the "Parties") agree as follows:

SECTION 1. TERM

This Agreement is prepared in order for USW to process Pathnet's Collocation requests for the states of Arizona, Colorado, Idaho, Iowa, Minnesota, Nebraska, New Mexico, North Dakota and Wyoming (other states can be requested through a general amendment to this contract) while the Parties finalize the Interconnection Agreement between USW and Pathnet ("Interconnection Agreement"). The Parties intend to submit the Interconnection Agreement to the state public utilities commissions having jurisdiction, for approval under the provisions of 47 U.S.C. Section 252. This Agreement will remain in effect until April 1, 2000, or until approval of that Interconnection Agreement, whichever occurs first. At such time of Commission approval of the Interconnection Agreement, this Agreement will terminate and the terms and conditions of the approved Interconnection Agreement will prevail. In the event the Interconnection Agreement is not approved by the Commission Pathnet shall vacate the Space and pay USW all of the expenses and costs that USW has incurred that have not been fully reimbursed to USW by the nonrecurring charges paid by Pathnet to USW. Pathnet shall have the option to convert cageless collocation to a virtual collocation in this event as defined under the FCC tariffs dealing with the USW Expanded Interconnection Services and shall pay charges for such conversion. USW shall not refund any sum paid to it by or on behalf of Pathnet.

## SECTION 2. COLLOCATION DESCRIPTION

2.1 Collocation allows for the placing of telecommunications equipment owned by Pathnet within USW's Central Office for the purpose of accessing Unbundled Network Elements (UNEs) and/or terminating EAS/Local and ancillary traffic.

1

3

### 2.1.1 Virtual Collocation

With a Virtual Collocation arrangement, Pathnet is responsible for the procurement of its own telecommunications equipment which USW installs and maintains. Pathnet does not have physical access to its equipment in the USW Central Office but will be granted access to the appropriate cross-connect for making any cross connections it may require for access to USW UNEs.

### 2.1.2 Caged Physical Collocation

Caged Physical Collocation allows Pathnet to lease caged floor space approximately in 100 square foot increments, up to a maximum of 400 square feet, for placement of its telecommunications equipment within USW's

through Friday, 8:00am to 5:00pm (local time) and after business hours are after 5:00pm and before 8:00am (local time), Monday through Friday, all day Saturday, Sunday and holidays.

20.1.2 Installation and maintenance of Pathnet's virtually collocated equipment will be performed by USW or a USW authorized vendor.

20.1.3 Upon failure of Pathnet's virtually collocated equipment, Pathnet is responsible for transportation and delivery of maintenance spares to USW at the Wire Center housing the failed equipment. Pathnet is responsible for purchasing and maintaining a supply of spares.

#### 20.2 Caged Physical Collocation

Pathnet is solely responsible for the maintenance and repair of its equipment located within Pathnet's caged space. If two or more Co-Providers agree to a Shared Space Caged Physical Collocation arrangement, such collocators are solely responsible for any and all maintenance, security and repair arrangements necessitated by such sharing. USW assumes no liability for any damages of any kind relating to Shared Space Caged Physical Collocation or related personnel disputes among the parties to those arrangements.

#### 20.3 Cageless Physical Collocation

Pathnet is solely responsible for the maintenance and repair of its equipment located within Pathnet's cageless physical space.

#### 20.4 ICDF Collocation

Pathnet is responsible for block and jumper maintenance at the appropriate cross-connect device and using correct procedures to dress and terminate jumpers on the appropriate cross-connect device, including using fanning strips, retaining rings, and having jumper wire on hand, as needed. Additionally, Pathnet is required to provide its own tools for such operations.

### SECTION 21. PAYMENT

21.1 Amounts payable under this Agreement are due and payable within thirty (30) calendar days after the date of invoice.

18

20

21.2 Should Pathnet dispute, in good faith, any portion of the monthly billing under this Agreement, Pathnet will notify USW in writing within thirty (30) calendar days of the receipt of such billing, identifying the amount, reason and rationale of such dispute. Pathnet shall pay all amounts due. Both Pathnet and USW agree to expedite the investigation of any disputed amounts in an effort to resolve and settle the dispute prior to initiating any other rights or remedies. Should the dispute be resolved in Pathnet's favor and the resolved amount did not appear as a credit on Pathnet's next invoice from USW, USW will reimburse Pathnet the resolved amount plus interest from the date of payment. The amount of interest will be calculated using the late payment factor that would have applied to such amount had it not been paid on time. Similarly, in the event Pathnet withholds payment for a disputed charge, and upon resolution of the matter it is determined that such payments should have been made to USW, USW is entitled to collect interest on the withheld amount, subject to the above provisions.

21.3 USW will determine Pathnet's credit status based on previous payment history with USW or credit reports such as Dun and Bradstreet. If Pathnet has not established satisfactory credit with USW or if Pathnet is repeatedly delinquent in making its payments, USW may require a deposit to be held as security for the payment of charges. "Repeatedly delinquent" means being thirty (30) calendar days or more delinquent for three (3) consecutive months. The deposit may not exceed the estimated total monthly charges for a two (2) month period. The deposit may be a surety bond, a letter of credit with terms and conditions acceptable to USW or some other form of mutually acceptable security such as a cash deposit. Required deposits are due and payable within ten (10) calendar days after demand in accordance with Commission requirements.

21.4 Interest will be paid on cash deposits at the rate applying to deposits under applicable Commission rules, regulations, or Tariffs. Cash deposits and accrued interest will be credited to Pathnet's account or refunded, as appropriate, upon the earlier of the termination of this Agreement or the establishment of satisfactory credit with USW, which will generally be

one full year of timely payments in full by Pathnet. The fact that a deposit has been made does not relieve Pathnet from any requirements of this Agreement.

21.5 USW may review Pathnet's credit standing and modify the amount of deposit required.

21.6 The late payment charge for amounts that are billed under this Agreement shall be in accordance with Commission requirements.

## SECTION 22. TAXES

Each Party purchasing services hereunder shall pay or otherwise be responsible for all federal, state, or local sales, use, excise, gross receipts, transaction or similar taxes, fees or surcharges levied against or upon such purchasing Party (or the providing Party when such providing Party is permitted to pass along to the purchasing Party such taxes, fees or surcharges), except for any tax on either Party's corporate existence, status or income. Whenever possible, these

19

21

amounts shall be billed as a separate item on the invoice. To the extent a sale is claimed to be for resale tax exemption, the purchasing Party shall furnish the providing Party a proper resale tax exemption certificate as authorized or required by statute or regulation by the jurisdiction providing said resale tax exemption. Until such time as a resale tax exemption certificate is provided, no exemptions will be applied.

## SECTION 23. INSURANCE

Pathnet shall at all times during the term of this Agreement, at its own cost and expense, carry and maintain the insurance coverage listed below with insurers having a "Best's" rating of B+XIII.

23.1 Workers' Compensation with statutory limits as required in the state of operation; and Employers' Liability insurance with limits of not less than \$100,000 each accident.

23.2 Commercial General Liability insurance covering claims for bodily injury, death, personal injury or property damage occurring or arising out of the use or occupancy of the premises, including coverage for independent contractor's protection (required if any work will be subcontracted), premises-operations, products and/or

SECTION 46. COMPLIANCE WITH THE COMMUNICATIONS ASSISTANCE LAW ENFORCEMENT ACT OF 1994 ("CALEA")

Each Party represents and warrants that any equipment, facilities or services provided to the other Party under this Agreement comply with CALEA. Each Party shall indemnify and hold the other Party harmless from any and all penalties imposed upon the other Party for such noncompliance and shall at the non-compliant Party's sole cost and expense, modify or replace any equipment, facilities or services provided to the other Party under this Agreement to ensure that such equipment, facilities and services fully comply with CALEA.

SECTION 47. COOPERATION

The Parties agree that this Agreement involves the provision of USW services in ways such services were not previously available and the introduction of new processes and procedures to provide and bill such services. Accordingly, the Parties agree to work jointly and cooperatively in testing and implementing processes for pre-ordering, ordering, maintenance, provisioning and billing and in reasonably resolving issues which result from such implementation on a timely basis.

SECTION 48. ENTIRE AGREEMENT

This Agreement and all exhibits, schedules, and amendments and supplements hereto and including, but not limited to any Adjacent Collocation Arrangements, constitutes the entire agreement between the Parties and supersedes all prior oral or written agreements, representations, statements, negotiations, understandings, proposals and undertakings with respect to the subject matter hereof.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their respective duly authorized representatives.

Because permutations are probable for each service type, the NRCM develops scenarios that incorporate varying activities and costs. Basically, the model develops costs for three functions -- migration, installation, and disconnection.<sup>146</sup>

Because the nonrecurring costs associated with the unbundled network elements produced by the NRCM do not correspond precisely with the nonrecurring costs for Oregon building blocks produced by the USWC cost model, AT&T and MCI have also remodeled USWC costs by incorporating assumptions included in the NRCM. Both the nonrecurring costs produced by the NRCM and the costs produced by the remodelling effort are substantially less than the nonrecurring costs proposed by USWC and GTE in this docket.

## VII. NONRECURRING COST STUDIES -- DISPUTED ISSUES

In the following sections, we analyze several disputed issues pertaining to the nonrecurring cost studies prepared by the parties. The decisions on these issues shall be incorporated into the revised nonrecurring costs and charges filed in accordance with this order.

### A. Service Order Processing Costs.

This issue involves the amount of human intervention necessary to process a CLEC order for unbundled elements. The USWC and GTE studies assume that all building block orders submitted by CLECs must be reviewed by ILEC representatives before the orders can be routed for further downstream processing. Staff and Joint Intervenors, on the other hand, assume that ILEC representatives will have to review CLEC orders a smaller percentage of the time. A greater amount of manual intervention increases the nonrecurring costs paid by competing carriers.

#### 1. Flow through and Fallout.

Operations support systems (OSS) are electronic, software-driven computer systems and data bases used by telephone companies to manage preordering, ordering, provisioning, maintenance, repair, and billing functions for their retail and wholesale operations. By linking different functions together, OSS provide more efficient and effective control of ongoing network operations.<sup>147</sup> OSS have been classified as a UNE by the FCC,<sup>148</sup> and as a building block by this Commission.<sup>149</sup>

---

to serve the customer. Provisioning is the actual assignment of all of the building blocks requested by a carrier to serve its customer. AT&T/MCI Exhibit/2, Petti/5-6.

<sup>146</sup>"Migration" describes the situation where a CLEC requests building blocks for a customer that currently takes service from an ILEC. Installation is the establishment of any new or additional service for a CLEC customer. Disconnection refers to activities necessary to disconnect a CLEC customer. Id.

<sup>147</sup>See e.g., AT&T/MCI Exhibit/1, Zepp/19-24; Attachment TMZ-2 at 6-17.

<sup>148</sup>47 C.F.R. §51.319(f).

At one time, the functions necessary to process a service order were extremely labor intensive, requiring constant human intervention to complete each order and update inventories. In recent years, OSS have been reengineered to reduce the need for direct human intervention by automating the processing of service order transactions, including service connections, disconnections, moves, and service changes. As these automated systems developed, the goal has been to achieve “flow through”-- meaning that a service request can be processed through several computer systems without the need for human intervention.

The opposite of “flow through” is “fallout.” If an error occurs as data flows through computer systems, it may cause service orders to fall out of the system and manual activity may be required to correct or complete the order. Fallout is significant because it is a major cost driver underlying nonrecurring costs.<sup>150</sup>

## **2. AT&T/MCI**

The AT&T/MCI NRCM models the cost of processing a service order separately. It is designed to model the processes and procedures currently used by large ILECs and assumes fully automated OSS that allow maximum electronic flow through of CLEC local service order requests (LSRs) for building blocks. The NRCM assumes that CLEC LSRs will be processed with a fallout rate of two percent. In other words, it assumes that 98 percent of total CLEC orders will flow through the ordering process with no manual intervention by ILEC personnel.

AT&T/MCI witness Petti states that well managed and maintained OSS will have very little fallout. This is especially true in a competitive environment because fallout impacts delivery intervals, restoration/response times, and the overall cost of service. Companies thus have market incentives to continually improve customer service by minimizing fallout. Ms. Petti describes the service order process modeled by the NRCM as follows:

In the normal order scenario, the customer will directly contact the CLEC service representative. That same CLEC service representative will discuss the service desired by the customer and then determine what services are to be ordered. The CLEC service representative will obtain preordering information and access U S WEST’s OSS to obtain the customer service records, the availability of service, and other pertinent information. The CLEC representative will then input the request into the U S WEST Service Order Generator (“SOG”) through the electronic gateway. There is no need for the ILEC service representative to be involved in any of these activities. If the order is rejected for some reason,

---

<sup>149</sup>Order No. 96-283 at 3.

<sup>150</sup>AT&T/MCI Exhibit/2, Petti/9; GTE Exhibit/7, Murphy/7.

then the order should return across the gateway to the CLEC for correction. The only instance in which the CLEC service representative would contact [the ILEC service representative] for assistance would be in the case of an order that requires investigation due to faulty records or other inconsistency. Such assistance would be minimal.<sup>151</sup>

Ms. Petti notes that Southwestern Bell Telephone Company (SWBT) has implemented a system known as the Easy Access Sales Environment (EASE) system, that allows 99 percent flow through of CLEC orders for resold services purchased from SWBT. In addition, SWBT indicated that it expected to develop an "EASE-like" system by mid-1998 that will be capable of processing orders for unbundled elements. According to SWBT, the new system will have a flow through rate similar to that experienced with the EASE system.<sup>152</sup>

USWC and GTE argue that the flow through/fallout assumptions embodied in the NRCM are unrealistic and assume a technology that is not currently available. GTE witness Francis Murphy argues that the NRCM does not properly model the processes and procedures used by GTE or reflect GTE's experience with fallout. Mr. Murphy points out that there are two types of fallout. The first is due to errors on faxed or electronically submitted LSRs received from CLECs. These must either be returned to the CLEC for correction or the ILEC must intervene to correct or explain the error. In either case, manual intervention is required. Mr. Murphy asserts that GTE currently experiences a 50-80 percent error rate on orders submitted by new CLECs.<sup>153</sup>

The second type of fallout occurs when LSRs are rejected by electronic systems. The rejected orders must either be corrected by the ILEC representative or returned to the CLEC for correction. Currently, GTE's electronic systems reject about 37 percent of the LSRs submitted by CLECs.

Mr. Murphy asserts that the high flow through rate in the NRCM fails to recognize that ILECs must keep processes and procedures in place to serve new and/or smaller carriers that do not order building blocks electronically because of the capital expenditures required. These carriers place orders manually (e.g., via fax) and require substantial time commitments from the ILECs. Mr. Murphy states that the NRCM is flawed because it does not account for the fact that GTE and USWC must accommodate building block requests from all CLECs, not merely those using electronic interfaces.

GTE witness Kevin Collins emphasizes that it is important to distinguish between receiving orders electronically and processing orders electronically. He estimates that

---

<sup>151</sup> AT&T/MCI Exhibit/9, Petti/17.

<sup>152</sup> AT&T/MCI Exhibit/2, Petti/9-10; AT&T/MCI Exhibit/11, Transcript of Texas PSC proceeding at 128-130. See also Administrative Law Judge Ruling issued January 22, 1998.

<sup>153</sup> GTE Exhibit/7, Murphy/7-8.

electronic OSS will not be fully implemented for another 2-3 years. At that time, Mr. Collins expects that GTE will electronically receive and process only 64 percent of the building block orders submitted by CLECs.

USWC witnesses Brigham and Buhler also maintain that the 98 percent flow through rate included in the NRCM cannot be achieved in the foreseeable future. To ensure that costs are forward-looking, nonrecurring cost studies should assume that some mechanized processes are used to perform certain nonrecurring functions. In most cases, however, mechanized processes can be used only for a certain percentage of orders, since no computer system can respond to all questions or be completely reliable. Nonrecurring cost studies must include realistic estimates of whether manual intervention will be required for each activity.

In addition to fallout resulting from incorrectly submitted orders, Mr. Buhler states that LSRs will fallout because they are designed to be completed manually. He notes that many types of CLEC orders cannot be processed using automated flow through because of their inherent complexity and constraints relating to the systems involved. For example, turning a USWC customer loop into an NAC that can be purchased by a CLEC requires a “disconnect” order to terminate the USWC retail service and a separate “connect” order to convert the retail customer loop into an NAC. In order to reuse these same facilities, the orders must be coordinated by a person. This is accomplished by inserting a “Map F” field identifier code. Mr. Buhler states that the NRCM understates the work ILECs must perform to provision building blocks by assuming these functions will be performed automatically.<sup>154</sup>

Mr. Buhler also emphasizes that processes modeled by the NRCM do not correspond to the actual systems used by USWC to process service orders. As a result, the NRCM understates nonrecurring costs. For example, the NRCM assumes that systems used to process access service requests (ASRs) from IXC will also be used for CLEC LSRs. Mr. Buhler asserts that LSRs for unbundled elements must be supported by different OSS because they involve more complex customer data and facilities. In their current form, the software systems used for ASRs do not have the necessary online interfaces to support the data acquisition and functionality requirements of preordering, ordering, and provisioning necessary for LSRs.<sup>155</sup>

GTE and USWC contend that it is unreasonable to rely on the SWBT EASE system as evidence of the flow through rate that will be experienced for building block orders. They emphasize that the EASE system is only used for resale orders and that the

---

<sup>154</sup>USWC Exhibit/14, Buhler/8.

<sup>155</sup>ASRs are processed through a system known as “EXACT.” Mr. Buhler states that LSRs will be processed through a system known as Interconnect Mediated Access or “IMA.” He further indicated that EXACT could not be modified to meet the January 1, 1997, deployment deadline for LSRs without undergoing a major software rewrite. Id. at 7.

new “EASE-like” system planned by SWBT is not ready for deployment today.<sup>156</sup> Contrary to Ms. Petti’s claim, the ILECs also assert that the new system will have a much lower flow through rate for unbundled elements than experienced under the EASE system.<sup>157</sup>

### 3. USWC and GTE.

The USWC and GTE nonrecurring cost studies assume that manual intervention will be necessary to process every CLEC building block order. In other words, the ILEC studies assume zero flow through of CLEC orders. According to Mr. Buhler, USWC representatives in the Interconnect Service Center must review all orders to ensure that the information on them is accurate and complete. The information must then be manually rekeyed into the USWC service order processor by the USWC service representative. As noted above, a CLEC order for unbundled loops will cause USWC to issue a disconnect order to unbundle the connection to USWC’s switch and the customer’s account, and a separate connect order to provide the loop to the CLEC’s collocated equipment. Both of these orders require manual intervention to coordinate the cut-over of circuits, even with the recent deployment of the Electronic Data Interchange (EDI) interface. According to Mr. Buhler:

The issue of EDI and the issue of flow through are independent of one another because EDI just allows you to communicate with an operational support system. It isn’t intended or built or designed in and of itself to do the conversion from the EDI messages into the proprietary -- the unique languages used by a company’s operational support system. So, in other words, EDI doesn’t in and of itself automatically convert the CLECs orders into USOCs [Universal Service Order Codes] and FIDs [Field Identifier Codes] and format the order for U S WEST’s downstream systems. We need another component with all of the business rules and all of the mappings that will accomplish that . . . . Until, then we still will have a manual step to input unbundled loop orders.<sup>158</sup>

In its initial filing, USWC estimated that it would take ISC service representatives 45 minutes to process an order to connect an unbundled loop and 30 minutes to process an order to disconnect a loop. At the hearing, Mr. Brigham revised these estimates downward to 35 minutes and 15 minutes, respectively, to account for utilization of

---

<sup>156</sup>USWC and GTE also point out that AT&T has filed documents with the FCC criticizing the EASE system because, among other things, it requires “excessive manual intervention” and has “significant shortcomings” that will place CLECs at a competitive disadvantage. TR. 908-911; USWC Exhibit/32.

<sup>157</sup>In their post-hearing briefs, USWC and the Joint Intervenors propose to supplement the record with additional evidence regarding flow through/fallout issues. See, Joint Intervenor Opening Brief at 25; USWC Reply Brief at 4, Exhibit A. Because there was no opportunity for other parties to examine this evidence, it is excluded.

<sup>158</sup>TR. 513-514.

USWC's IMA interface. These labor time savings lowered USWC's proposed nonrecurring charge for the basic NAC from \$117.49 to \$97.55. The nonrecurring costs and prices of provisioning other building blocks were also reduced.

GTE's labor time estimates for NOMC personnel are designated as confidential. We observe, however, that GTE's cost study assumes that it will take NOMC representatives significantly more time to process a CLEC order to install an unbundled loop than estimated by USWC. On the other hand, GTE also allocates less time to disconnect activities than does USWC.

Mr. Buhler points out that USWC is in the process of modifying and updating its OSS to achieve some flow through of building block orders. The flow through rate that USWC will achieve is unknown, however, since the technology is still being developed. Moreover, predicting precise flow through levels is difficult because USWC and other ILECs have no previous experience processing building block orders.

Joint Intervenors challenge the assumptions underlying the USWC and GTE cost studies. In general, they maintain that the studies focus improperly on ILEC systems and facilities that have been deployed rather than more efficient technologies currently available. As a result, they claim that the USWC and GTE studies inflate CLEC service order costs because they assume that OSS functions require significantly more manual intervention than is necessary.

In particular, Joint Intervenors dispute USWC's claim that all CLEC service orders must be individually reviewed for accuracy by an ILEC service representative and then manually rekeyed into the USWC service order processor. As noted above, Joint Intervenors maintain that there is no need for ILEC personnel to engage in these activities. They contend that a more efficient solution is to develop a software translation table that converts CLEC orders into the appropriate format for USWC's downstream systems.

#### **4. Staff.**

Staff states that technology necessary to perform electronic processing of OSS functions is available now and will be fully implemented within the long run period contemplated by TSLRIC cost principles. Nonrecurring costs should therefore be based on the use of fully automated OSS.

Staff witness Jack Breen agrees that fully electronic interfaces make it possible to process CLEC service orders with minimal manual intervention. He points out, however, that not all carriers will order electronically and that some manual intervention will be required by ILEC personnel to process such orders. Mr. Breen recommends that service order costs be computed using a weighted average of electronic and manual processing

costs. His analysis assumes that 64 percent of orders will be handled electronically, and 36 percent manually.<sup>159</sup>

USWC and GTE maintain that the 64 percent electronic flow through assumption used by Staff does not accurately reflect the capabilities of currently available technology. They argue that Mr. Breen's analysis incorporates flow through rates that GTE may achieve in the future only if it modifies its OSS to include additional electronic interfaces.

Joint Intervenors argue that Staff's proposal will provide incorrect economic signals to CLECs. They maintain that a weighted average charge will force CLECs who have implemented electronic OSS to subsidize competitors who have not made such investments. In the alternative, Joint Intervenors recommend separate cost-based rates to encourage CLECs placing manual orders to deploy more efficient and economical OSS technology currently available.

### **5. Commission Decision -- Service Order Processing Costs.**

Based on the evidence presented, the Commission is persuaded that the technological capability exists to process CLEC service orders for unbundled elements on an automated basis using electronic OSS. Although USWC and GTE have not fully implemented such systems to date, we agree with Joint Intervenors and Staff that the technology is available to produce computer programs that can process unbundled element orders with a minimum amount of human intervention.

In particular, we see no reason why it is necessary for ILEC service representatives to review all CLEC orders for accuracy and manually reenter the translation codes necessary to permit downstream processing of the order. As Ms. Petti explains in her testimony, properly designed software programs obviate the need for ILEC personnel to perform these tasks. In USWC's case, for example, programs can be used which automatically convert the information entered by the CLEC into the FIDs and USOCs required by USWC's OSS. This process will enable CLEC representatives to input service order requests into the ILEC's OSS through the electronic gateway. If the order is rejected for some reason, the order should return across the gateway to the CLEC for correction. This process eliminates the "double ordering" procedure incorporated in the USWC and GTE cost studies. Although there will be instances where CLEC service representatives will need to contact ILEC representatives, we believe the frequency of manual intervention will be nowhere near the 100 percent level incorporated in the USWC and GTE nonrecurring cost studies.<sup>160</sup>

---

<sup>159</sup>As noted above, GTE estimates that approximately 64 percent of CLEC LSRs will be handled electronically in the next 2-3 years after OSS is fully implemented. GTE Exhibit/6, Collins/5.

<sup>160</sup>The record indicates that the preordering and ordering processes proposed by the USWC and GTE for building block orders would entail a greater amount of manual intervention than is presently required to process orders for USWC and GTE retail customers. If that is indeed the case, the proposals violate the duty to provide nondiscriminatory access under the Act. The FCC has held that §251(c)(3) requires an ILEC to provide requesting carriers with access to OSS functions that the ILEC uses for its own internal

Evidence concerning the OSS systems developed by Southwest Bell Telephone Company substantiates our finding that the technology is available to process unbundled element orders on a fully automated basis. Statements by SWBT personnel indicate that company will deploy electronic OSS interfaces this year which will enable SWBT to process unbundled element orders at flow through levels approaching 98 percent. SWBT's plan to implement fully automated interfaces in the immediate future stands in stark contrast to the claims by USWC and GTE that all unbundled element orders must be reviewed manually. More importantly, it substantiates the position taken by Joint Intervenors and Staff that the technology to develop automated interfaces exists but simply has not been implemented by USWC and GTE.

In addition to concluding that the technology to produce fully automated interfaces is available, it is clear that such interfaces must be implemented if new entrants are to have a meaningful opportunity to compete in local exchange markets. The level of manual processing envisioned by the USWC and GTE studies not only increases the nonrecurring charges paid by competing carriers, it inhibits competitive entry by (a) increasing the time necessary to process CLEC service orders; (b) increasing the likelihood for error because information must be reentered by ILEC personnel; and (c) limiting the ability of CLEC's to process a high volume of orders.<sup>161</sup> To compete effectively in the local exchange market, new entrants must be able to perform services and interact with customers as quickly and efficiently as the incumbent LECs. Manual processing of unbundled element orders would significantly reduce the quality of service that new entrants can offer as well as the ability to market their services in a cost effective manner.

Because fully automated systems for processing unbundled element orders have not yet been deployed, we do not have information from other jurisdictions regarding actual flow through rates for such systems. We agree with Joint Intervenors, however, that efficient, well-managed, and fully automated operational support systems should result in very high flow through levels. As we have emphasized, such systems will enable CLEC representatives to query ILEC databases to obtain the information necessary to prepare properly documented service orders. Orders that are incorrectly submitted will be rejected by the system and returned to the CLEC for correction. ILEC

---

purposes or offers to its own customers. Thus, if an ILEC provides electronic preordering, ordering, provisioning, maintenance, repair or billing to itself, it must provide at least equivalent electronic access to requesting carriers in the provision of unbundled network elements. In other words, USWC and GTE may not require competing carriers to take extra steps or engage in additional manual activities to process service orders if such steps or activities are not required for the ILEC's retail operations. Implementation of the Local Competition Provisions in the Telecommunications Act of 1996, CC Docket No. 96-98, Second Order on Reconsideration, 11 FCC Rcd 19738, ¶ 9 (1996) (Second Order on Reconsideration).

<sup>161</sup>The record in this case does not disclose the specific level of resources USWC and GTE will devote to the manual processing of building block orders. Even if substantial resources are dedicated to this effort, the amount of time proposed by USWC and GTE to review each order would severely limit the number of unbundled element orders that could be processed each day.

representatives should become involved in the ordering process only infrequently: for example, where there is incorrect customer data or other system inconsistencies. In our estimation, it is reasonable to assume that a well-managed and maintained OSS will allow unbundled element orders to flow through at the 98 percent rate recommended by Ms. Petti. Accordingly, we find that the revised nonrecurring cost studies developed in accordance with this order should incorporate this level of flow through for all electronically submitted orders.

Notwithstanding our finding that the ILEC cost studies must incorporate flow through rates associated with fully automated OSS interfaces, we recognize that some CLECs may choose not to submit electronic orders for unbundled elements, at least initially. As we understand it, non-electronic orders are typically faxed or transmitted to ILEC service representatives over the telephone. Since these types of orders necessitate manual intervention by ILEC personnel, it is appropriate to develop a separate nonrecurring charge to insure that USWC and GTE are properly compensated for the costs they incur to process such orders.

We have elected not to adopt the weighted average flow through rate suggested by Staff witness Breen because we do not know what percentage of carriers will opt to process orders manually as opposed to electronically. Separate nonrecurring charges for manual orders will ensure that ILECs are not under or overcompensated for order processing costs. In addition, we agree with Dr. Zepp that separate nonrecurring charges for electronic and manual orders will send carriers the correct economic signals regarding the costs associated with the method of ordering they select. Carriers who place manual orders will be encouraged to deploy more efficient and economical OSS. This approach is consistent with the Cost Principle #3 which specifies that costs should be paid by those who are responsible for causing the cost to be incurred.<sup>162</sup> Finally, separate charges will prevent CLECs that have deployed efficient OSS from subsidizing competitors who have not.

## **B. Provisioning Processes.**

The parties dispute the manner in which CLEC orders for unbundled elements must be provisioned. The ILECs argue that building block orders must be treated as complex products requiring special handling and manual attention. Joint Intervenors, on the other hand, assert that building block orders may be provisioned in the same manner as residential or business basic exchange service -- as standardized products requiring minimal handling and lower nonrecurring costs.

### **1. POTS vs. Design Services.**

The term "POTS" refers to "plain old telephone service." Generally, it relates to simpler products and services such as residential flat rate service or vertical features such as call waiting and speed dialing. According to USWC, POTS services are typically

---

<sup>162</sup>Telecommunications Cost Report, Vol I., *supra* at 14-15.

identified with a telephone number, are preengineered, and have a standard design and components.<sup>163</sup> POTS service orders are supported by their own inventory OSS that configure the line based on the end-to-end service ordered by the customer.<sup>164</sup>

“Design services” describe more complex, customized products and services. Examples include private lines, primary rate ISDN, interoffice trunks and feature group D service. These services generally require customized designs or individual configuration reviews, have quality and performance expectations, unique test characteristics, and may be associated with a telephone number or a circuit ID. Design circuits do not have to be associated with an end-user and, as a result, can be provisioned through the specification of meet points.

Design service orders can accommodate products that do not have a telephone number and require manual or coordinated handling. This type of order allows scheduling of a series of dates needed to process the order, such as record issue date, a design record layout, design verification assignment, and plant test date. Orders for design services are routed to OSS that contain inventory information concerning such services.<sup>165</sup> Throughout the design service flow, orders are handled by employees specifically trained to provision and test design services.<sup>166</sup>

## 2. USWC.

USWC witnesses Brigham and Buhler testified that unbundled elements, such as loops, must be provisioned using the more expensive design services flow. Unbundled loops, like private lines, are not switched or associated with a telephone number. Service orders for unbundled loops must be routed to OSS that contain inventory information about loops and to employees with the training and experience to provision unbundled elements.<sup>167</sup> In addition, the design flow allows USWC to design specific services for

---

<sup>163</sup>POTS services may be provisioned with or without dispatching a technician for field work, but in either case do not undergo an end-to-end service test. USWC Exhibit/5, Buhler/4.

<sup>164</sup>OSS unique to USWC’s POTS service are SOAC Assigner (controls the flow of POTS service orders), LMOS (supports POTS repair processes), and DELIVER (supports the creation of repair tickets). Id. at 5.

<sup>165</sup>OSS unique to USWC’s design services are SOAC-C (controls the flow of design services orders), WFA/DI and WFA/C (support design services repair processes), DELIVER-C (supports the creation of repair tickets), NSDB (keeps end-to-end circuit information), and TIRKS (contains circuit equipment and facility data). Other OSS are used by both POTS and design services. These are SOPS (processes service orders), SWITCH/COSMOS (keeps central office inventory and assignments), WFA-DO (dispatches technicians), MARCH (performs switch translations), and LFACS (contains loop assignments and inventory and, in the case of design services, passes this information to TIRKS). Id.

<sup>166</sup>According to Mr. Brigham, design services require the participation of ISC, plant line assignment, circuit provisioning and central office frame technicians to perform activities that are not required to provision POTS services. USWC Exhibit/4, Brigham/14.

<sup>167</sup>The unbundled loop inventory that connects the local loop to the meet point with a CLEC resides in TIRKS. POTS orders are routed to LFACS, not TIRKS. Also, unbundled loop orders must be handled by

CLECs. Unbundled loops can be configured in different ways depending on the method chosen by the CLEC to connect with USWC. Finally, only the design services flow accommodates coordinated cut-overs and the testing processes necessary to ensure connectivity between a CLEC's collocated equipment and the point of interface to USWC's loop.

Mr. Buhler emphasizes that manual intervention is required to accommodate CLEC building block requests, including processing disconnect and connect orders (described above) and coordinating circuit cut-overs. In addition, he observes that all software systems are subject to errors that require manual intervention on a periodic basis. The software necessary to improve reliability to the level now associated with modern switching equipment does not currently exist. Such a project would require total system replacements and drive up the cost of provisioning unbundled loops.

USWC is currently investigating whether the same loop facility can be used for both disconnect and new connect orders, thus eliminating some of the manual processing now required to provision unbundled loops. Improving the ability to associate related orders would ensure efficient loop engineering, but no implementation date for this process has been established. USWC is also working with Bellcore to determine whether the inventory for unbundled loops can be migrated to other OSS that support the POTS services flow. This would involve relocating loop inventory from TIRKS to SWITCH. However, coordinating the information that would remain in TIRKS with the unbundled loop information that would go to SWITCH is problematic and the advantages from a cost and technical standpoint are not apparent at this time. The ability to move inventory to SWITCH will not be available until the second half of 1998 at the earliest.

### **3. Joint Intervenors.**

Joint Intervenors contend that USWC's proposal to use the design services flow for unbundled element orders will disadvantage CLECs and their customers. According to Ms. Petti, CLEC customers who choose a CLEC as their local provider will experience longer waits for service and more technical problems than will ILEC retail customers. CLECs will also incur additional and excessive costs.

Whereas ILEC retail customer orders for simple business or residential service will flow through the POTS process, Ms. Petti emphasizes that all CLEC orders will require a separate set of OSS, special technicians, and procedures that are now required only for a minority of new telecommunications services provided by USWC.<sup>168</sup> Instead of flowing through to the central office technicians and field installation crews normally used for basic services, CLEC orders will be sent to TIRKS. At that point, a special document known as a Work Order Record Document (WORD) will be created and sent

---

employees trained to provision orders through SOAC-C and TIRKS. Only design services orders are routed to them. USWC Exhibit/5, Buhler/6.

<sup>168</sup> AT&T/MCI Exhibit/9, Petti/6-7.

to multiple locations for special handling, tracking, testing, and completion. These locations include the ISC (discussed above), the Circuit Provisioning Center (CPC), and the Special Service Test Center (SSC).

Ms. Petti emphasizes that it typically takes several days for an order to flow through the design services process. In contrast, new USWC retail customers can expect to receive service on the same day, or within a couple of days, from the time they place an order for service. As a result, CLEC customers will have to wait much longer than USWC customers to obtain the same service. Using the design services flow also means that maintenance and trouble reports will be handled by a smaller workforce than is assigned to USWC's small business and residential users. This means that CLEC customers will have to wait longer for problems to be resolved. Finally, the CPC and SSC technicians responsible for design services flow are more highly paid than their counterparts in basic services because of their technical skills and knowledge. Because the higher labor rates for CPC and SSC technicians are factored into USWC's nonrecurring cost studies, the cost of providing unbundled loops is overstated.

Ms. Petti also contends that there is no technical justification for provisioning unbundled loops through the design services flow. She disagrees with USWC's claim that the POTS flow will not work because unbundled loops differ from ILEC loops. To the contrary, she maintains that a properly written and executed CLEC order should flow through without manual intervention as follows:

Using Uniform Service Order Codes (USOCs) and Feature Identification Codes (FIDs) unique to each CLEC to identify the unbundled loop, the Service Order Analysis and Control system (SOAC) could be triggered to query LFACS for the loop assignment as it does for services currently provided by USWC. By inventorying the CLEC tie cable appearance in the USWC SWITCH OSS as a pseudo OE/LEN/LU (originating equipment/line equipment number/line unit), the OSS would map the loop to the pseudo OE (EICT). SWITCH would then perform all of the inventory and assignments for the unbundled loop.<sup>169</sup>

Ms. Petti states that pseudo identifiers have been used for years and are commonly used for switch cut-overs and line and station transfers. She maintains that USWC's SWITCH OSS should be able to handle the inventory of pseudo OE. That process requires USWC's data base manager or line assignment clerk to build pseudo tables for each switch. USWC witnesses have testified that Bellcore, the SWITCH vendor, has confirmed that the tie cable inventory for unbundled loop orders and any necessary programming may be available in the second half of 1998.

Ms. Petti also states that the design services flow envisioned by USWC will disadvantage CLECs because of the limitations of the TIRKS OSS. TIRKS is the

---

<sup>169</sup>Id. at 10-11.

primary OSS used by USWC to deliver high capacity business services. It is a costly, finite resource that may be compromised if large volumes of orders for unbundled loops must be processed. Ms. Petti contends that it is not feasible to use TIRKS to provide services to residential customers.

Ms. Petti agrees that CLECs will order a certain number of sophisticated and complex circuits. These types of circuits are usually ordered by large business customers and require the special handling associated with the design services process. Based on prior experience, however, Ms. Petti projects that the ratio of designed circuits to small business/residential orders will be only 10 percent of total orders.

#### **4. Commission Decision -- Provisioning Processes.**

The Commission agrees with Joint Intervenors that the nonrecurring charges paid by new entrants should not be based on the assumption that all orders for unbundled elements must be processed through the design services flow. The evidence demonstrates -- and USWC acknowledges -- that it takes longer and is more expensive to provision unbundled loops via the design services flow than it takes for USWC to provision basic retail services using the POTS services flow. This disparity means that CLECs will be unable to supply services in as efficient or as timely a manner as the services offered by the ILECs. As a result, new entrants are placed at a significant competitive disadvantage vis a vis the ILECs.

If competing carriers are to have a reasonable opportunity to compete with incumbent providers of local exchange service, they must be able to obtain unbundled elements in a manner that allows them to assemble services in approximately the same time it takes the ILEC to provision similar telecommunications services. Customers are likely to have little patience with competing carriers that take substantially more time than the incumbent to supply service, and only then at additional expense. USWC's assumption that all CLEC building block orders must flow through the design service process produces a lack of parity from an ordering/provisioning standpoint and impedes the emergence of effective local exchange competition.

We are also unconvinced by USWC's claim that it is necessary from a technical standpoint to provision all unbundled elements in the same manner as private lines and other complex telecommunications services. Ms. Petti testified persuasively that CLEC orders can flow through without manual intervention by using pseudo identifiers, an existing technology common to other telecommunications applications. USWC did not adequately refute this claim. In fact, Mr. Buhler acknowledged that USWC is currently working with Bellcore to determine if unbundled loop inventory can be migrated to OSS that support the POTS services flow. Although he indicated that problems could arise, he also confirmed that the ability to move loop inventory from TIRKS to SWITCH may be available in 1998.<sup>170</sup> The record also discloses that USWC's witnesses have testified

---

<sup>170</sup>Mr. Buhler also testified that USWC is attempting to eliminate some manual activities by using the same loop inventory for disconnect and new connect orders. USWC Exhibit/5, Buhler/7. If we understand his testimony correctly, this process would be particularly beneficial in the case where a customer migrates

elsewhere that the SWITCH OSS may be modified this year to accommodate the process contemplated by Ms. Petti.

We are also concerned with the ability of USWC's TIRKS OSS to accommodate the demand for unbundled elements. As Ms. Petti explains, TIRKS was designed to handle orders for high capacity business services and may be compromised if large volumes of orders for unbundled loops must be processed through that system. USWC has only received a very limited number of orders for unbundled elements to date and has not demonstrated that TIRKS will be able to function adequately as the number of CLEC orders expands.

Although we reject the contention that all CLEC unbundled element orders must be provisioned as design services, we acknowledge that CLECs will order sophisticated and complex circuits that necessitate the specialized handling associated with the design services flow. According to Ms. Petti, design services currently provided to USWC customers include Digital Data Service, Foreign Exchange Service, Feature Group A and D, Voice Grade Analog Data, High Capacity Special Services and Interoffice Transport (Hi-Cap or DS1, DS3, STS-1, etc.), Frame Relay Service, and ISDN Primary Rate Interface Service.<sup>171</sup> Basic residential and simple business<sup>172</sup> services on the other hand, are not provisioned to USWC customers as design services. Based on her experience in a geographical area encompassing a very large urban center, and suburban and rural communities, Ms. Petti estimates that the ratio of design circuits to small business and residential orders will approximate 10 percent of total orders.

The Commission is persuaded by Ms. Petti's testimony regarding this issue. Accordingly, we find that the nonrecurring costs of provisioning the Basic NAC, ISDN NAC, NACC Switched Lineside, NACC ISDN, Switching Features, Premium Listing, and Private Listing building blocks shall be based on the POTS services flow.<sup>173</sup> While it is possible that these building blocks might be used occasionally for design services, they are used to provision POTS-type residential and business services the vast majority of the

---

from an ILEC to a CLEC and the CLEC purchases all of the unbundled elements necessary to provide a finished service. In that instance, the ILEC technician could disconnect service by merely lifting a wire, and the CLEC could initiate new service by reconnecting the same wire. Alternatively, the parties could agree to a "glue charge" that would eliminate both activities.

<sup>171</sup>These services are provisioned through the Circuit Provisioning Center and the Special Services Center and are referred to as design private line/special services. AT&T/MCI Exhibit/9, Petti/8. USWC witness Buhler also identified several of these services as design services. USWC/5, Buhler/4.

<sup>172</sup>Ms. Petti points out that ISDN Basic Rate Interface (ISDN/BRI) is also not provisioned as a design circuit. Because ISDN/BRI rides over copper or IDLC to the central office switch, the provisioning and proactive maintenance monitoring is performed through OSS that connect to the switch. Id.

<sup>173</sup>For USWC, these building blocks are listed on Staff Exhibit 11, Breen/1-3, Lines 744-745, 747-749, 769, 776, 805-834, and 879-880. For GTE, the building blocks are listed on Staff Exhibit/11, Breen/4-6, Lines 576-577, 599, 606, 636-665, and 701-702.

time. The nonrecurring costs associated with provisioning the remaining building blocks shall be based on the design services flow.

While it is impossible to accurately match all of the building blocks with the types of services that may be provisioned, we believe the approach we have taken to calculate building block provisioning costs is indicative of the provisioning processes that should exist in a forward-looking environment. More importantly, we conclude that USWC and GTE can and should develop provisioning processes which reasonably approximate those used by USWC and GTE to provision similar facilities and services for their own customers. As we have emphasized, USWC and GTE have a duty under §251(c)(3) of the Act to provide nondiscriminatory access to unbundled elements. The ILECs cannot meet this obligation -- and competition cannot succeed -- if we assume that building blocks can only be provisioned to CLECs through more expensive, time-consuming, and inefficient processes.

### **C. Integrated Digital Loop Carrier (IDLC).**

This issue concerns the percentage of IDLC systems, as opposed to the percentage of copper loops, assumed to be present in ILEC networks for purposes of calculating nonrecurring costs. In general, a greater percentage of IDLC results in a lower cost for provisioning loops and thus, lower nonrecurring costs.

#### **1. Party Positions.**

The AT&T/MCI NRCM assumes that all loops over nine kilofeet are provisioned by TR-303 IDLC systems. Ms. Petti claims that the TR-303 IDLC systems represent least cost forward-looking technology and “are made up of intelligent, processor-controlled network elements that can communicate over standard interfaces to the OSS systems in such a manner that little or no manual intervention is required for provisioning maintenance activities.”<sup>174</sup>

USWC and GTE oppose the IDLC assumptions incorporated in the NRCM and emphasize that IDLC technology is deployed in only very small parts of their current networks. It is unclear, however, what assumptions USWC has included in its cost studies regarding placement of IDLC systems. Mr. Schmidt testified that USWC “advocates a least-cost forward-looking network architecture that places TR-303 IDLC systems in the network beyond 12,000 feet in the highest density areas and TR-008 IDLC systems in the lower density areas.”<sup>175</sup> On the other hand, USWC’s reply brief indicates that USWC did not include any IDLC technology in its nonrecurring cost studies.<sup>176</sup>

---

<sup>174</sup>Ms. Petti distinguished TR-303 IDLC systems from TR-008 systems, noting that the former are connected directly to the switch and can be provisioned electronically, while the latter must be provisioned manually. TR. 989-993. See also the discussion of IDLC systems, *supra* at 31-32, 53-54.

<sup>175</sup>USWC Exhibit/15, Schmidt/7.

<sup>176</sup>USWC Reply Brief at 7.

According to GTE witness Murphy, the IDLC assumptions in the NRCM are inappropriate for the provision of voice grade circuits. The model assumes that voice grade service will be handed off to the CLEC with multiple loops embedded in a DS1 handoff. Where loops are provided over fiber, however, it is necessary to install demultiplexing equipment and a plug in card, or channel unit, before voice grade loops can be unbundled. It is also necessary for a technician to make cross-connections at the MDF. Mr. Murphy claims that the NRCM fails to include the equipment and labor costs necessary to allow the handoff of voice grade loops.

## **2. Commission Decision -- IDLC.**

As noted above, the cost studies approved in docket UM 773 were used to develop the recurring building block prices adopted in docket UM 844. The recurring cost studies incorporate specific assumptions regarding the percentage of digital carrier systems in USWC's network using the overall least cost technology to calculate TSLRIC.<sup>177</sup> The studies assume that 25 percent of the USWC network is supplied by IDLC systems and 75 percent is supplied by analog (copper or metallic) facilities.

For purposes of calculating nonrecurring charges, the Commission finds that the percentage of IDLC included in the nonrecurring cost studies should be consistent with the percentage of IDLC incorporated in the recurring studies. We realize that these percentages may change over time as cost studies are reevaluated and more efficient technologies become available. In the meantime, however, we believe it is important to maintain consistency between recurring and nonrecurring studies where the same issue is addressed.

The recurring cost studies do not specify the type of IDLC systems which should be assumed for purposes of cost calculation. The evidence indicates that the TR-303 systems are currently available and represent more recent technology than TR-008 systems. Accordingly, TR-303 systems should be assumed for purposes of calculating IDLC costs.

We are not persuaded by the ILEC argument that IDLC should be excluded for purposes of calculating nonrecurring costs because digital carrier technology comprises only a small percentage of USWC's and GTE's existing network. As emphasized above, this position is inconsistent with the TSLRIC cost principles adopted in docket UM 351. See discussion of Cost Principles #1 and #2, *supra*.

### **D. Labor Times and Probabilities.**

The nonrecurring cost studies identify the time required by ILEC personnel to complete each nonrecurring activity. The work time estimate is multiplied by the

---

<sup>177</sup>The incremental costs developed for USWC also apply to GTE until such time as GTE-specific cost studies are approved. See e.g., Order No. 96-283 at 8-9.

probability of occurrence<sup>178</sup> and the appropriate labor rate to derive the cost for the activity. Labor times and rates are significant cost drivers for nonrecurring costs.

## 1. USWC.

USWC witness Brigham testified that the work time estimates and probabilities for each nonrecurring activity are based on special studies and analyses conducted by teams of service experts within USWC. The teams include product managers and experts from each functional area (e.g., Interconnect Service Center). The estimates and probabilities are usually updated each time a study is performed.

Joint Intervenors argue that USWC's proposed labor times and probabilities are based upon outdated and unreliable personnel surveys -- known as "Task Oriented Cost" (TOC) studies<sup>179</sup> -- conducted by USWC in the late 1980s and early 1990s. They further maintain that the TOC studies do not incorporate any of the efficiencies USWC has realized from reengineering its systems and from consolidating processes and functions. Joint Intervenors maintain that USWC has not supplied any documentation to show that a systematic review of the older TOC estimates has been performed. They also contend that USWC has not conducted any "time in motion" studies to substantiate the proposed labor times and probabilities.

USWC concedes that it relies on some TOC studies, but emphasizes that those studies are used merely as a starting point for developing time and probability estimates. USWC notes that the TOC studies are first reviewed by subject matter experts to determine if the studies reflect current practices. In some cases, the experts concluded that the TOC studies were outdated and could not be used. In other cases, the TOC studies were deemed current and continue to be used by USWC. In the NAC (loop) nonrecurring cost study, for example, USWC relied on the TOC studies only for work times relating to the loop and circuit provisioning centers. All other work times for the loop study are based on new analyses.

USWC contends that the activity times included in its nonrecurring cost studies represent the best available estimate of the work times that USWC is likely to experience on a forward-looking basis given currently available systems and methods of operation. USWC concedes that it has not conducted any time in motion studies to substantiate its work time and probability estimates, but emphasizes that AT&T/MCI NRCM is also deficient in that respect.

---

<sup>178</sup>In some cases, an activity must always be performed and the probability is 100 percent. Other times, the activity may need to be performed occasionally. For example, we have determined that 98 percent of electronically-submitted service orders will not require the intervention of USWC's ISC personnel. Thus, there is a two percent probability that electronic orders will not flow through and will have to be handled manually by ISC representatives.

<sup>179</sup>The TOC studies are set forth in USWC Exhibits 27 and 28. In its opening brief, USWC incorrectly states that only a portion of USWC Exhibit/28 was admitted. In fact, the entire exhibit was entered in the record. TR. 340.

## **2. AT&T, MCI and GTE.**

The AT&T/MCI NRCM and the GTE nonrecurring cost studies also include work time and probability estimates. Ms. Petti and Mr. Collins testified that those estimates are based on the opinions of subject matter experts. AT&T/MCI and GTE did not submit workpapers or documentation indicating the information that the experts relied upon to develop their work time and probability estimates.

## **3. Staff.**

Staff witness Breen made a number of adjustments to the work time estimates included in the USWC and GTE cost studies. Staff's adjustments are discussed below.

## **4. Commission Decision -- Labor Times and Probabilities.**

The Commission has a number of concerns relating to the work time and probability estimates included in the USWC nonrecurring cost studies. We acknowledge USWC's efforts to update its old TOC studies with more recent estimates, but we do not believe that USWC has produced sufficient evidence to substantiate its proposed work times and probabilities. Our concerns include the following:

(a) For the most part, USWC did not identify the subject matter experts used to develop time and probability estimates. There are a number of memos included with the TOC studies that we understand were prepared by experts, but we cannot tell how many other persons were involved in the review process for each work activity. Moreover, no information has been provided regarding the knowledge or experience possessed by the experts responsible for those decisions.

(b) It is not clear from the evidence when the TOC study results were modified by subject matter experts and when they were not. Although the attached memoranda indicate some modifications were made, we have no idea whether they represent all of the changes proposed. Nor can we determine with certainty whether the changes recommended were adopted and incorporated in USWC's nonrecurring cost studies.

(c) In those cases where we have been able to discern that TOC studies were modified by a subject matter expert, we are often unable to determine why the changes were made.<sup>180</sup> Even where the subject matter expert has made a better effort to document

---

<sup>180</sup>For example, in the case of the installation function associated with the "Special Service-Circuit Installation Time Study," there is a memorandum entitled "Validation of TOC STUDY time estimate." The memorandum states: "The time estimates [from the TOC Study] for the work functions below do not appear to be a reasonable estimate. I have reviewed the questions and based on my experience, knowledge of the work functions and further investigation, believe the Staff estimate will reflect the average time it takes to perform the function." This explanation provides no clue why the TOC studies are unreasonable. Nor can we tell what the "staff estimate" is, or how that estimate was prepared. USWC Exhibit/27 at 144.

the reasons for proposed work times and probabilities, the underlying rationale is not always explained in sufficient detail to enable us to conclude that the decisions are reasonable.<sup>181</sup>

(d) USWC does not specify the criteria used by the subject matter experts to evaluate work activities or estimate probabilities. Without such information, we cannot tell whether decisions to modify or verify the TOC studies are reasonable.<sup>182</sup>

(e) The TOC studies list various work activities necessary to perform a given function. In some cases, these activities appear to be fairly well detailed. In other cases, however, the activities are not clearly described and there is insufficient information regarding how the associated work time estimates were developed. A properly constructed study should (1) list all of the steps a service representative or technician must take to complete a particular task; (2) include an adequate description of each step; and (3) include documented measurements of the time necessary to complete each step.

(f) Mr. Brigham testified the work time estimates included in the TOC studies are based on a sampling of results from throughout USWC's service territory.<sup>183</sup> The studies disclose that there are wide variations in the work time necessary to perform certain activities from state to state. USWC does not explain the reason for such variations. We are left to speculate whether the differences might be because of the type of central offices sampled, the type of equipment employed in the central office, the number of technicians used, etc.

(g) Mr. Brigham explained that the final work times produced by the TOC study are based on a weighted average of information from the states served by USWC. There is no information showing what factors were considered in computing the weighted average.

(h) For many work activities, the TOC studies include a line where the "minimum," "maximum" and "most likely times" are supposed to be entered. In the vast

---

<sup>181</sup>The subject expert memorandum relating to "Unbundled Switch Port Cost Studies" contains more detail and includes a brief discussion of the rationale underlying probabilities associated with work activities. However, the reasons for other assumptions are not explained. In addition, the associated work times for initial and additional activities are not explained. USWC Exhibit/28 at 31-40.

<sup>182</sup>For example, during the hearing Mr. Brigham indicated that ISC work times incorporated in the USWC nonrecurring cost studies should be reduced substantially to reflect time savings resulting from the recent implementation of USWC's Interconnect Mediated Access (IMA) electronic interface. A USWC subject matter expert recommended the initial work times estimates in 1996. TR. 316-318, 359-363. USWC did not explain how the IMA interface has altered the work processes of ISC personnel to achieve such significant time savings. Even though this change reduced USWC's proposed nonrecurring charges, it is nevertheless essential to know the reasons underlying the revised time estimates.

<sup>183</sup>TR. 350.

majority of cases, there is no entry for the minimum and maximum times.<sup>184</sup> In these instances, it is impossible to tell how the “most likely time” was derived.

(i) Since the TOC studies were conducted several years ago, it is safe to assume that they do not incorporate any efficiencies derived from USWC’s recent reengineering efforts or new technological developments that USWC may have employed to reduce work times. Although USWC indicated that the subject matter experts took such issues into account during the course of their review, we are unable to discern from the record all of the instances where increased efficiencies or new technologies were considered. Nor are we able to tell how such efficiencies and technologies were factored into the work times and probability estimates included in USWC’s nonrecurring cost studies.<sup>185</sup>

The work time estimates and probabilities included in the GTE cost study and the AT&T/MCI NRCM suffer from the same type of defects that afflict USWC’s cost studies. Both GTE witness Collins and AT&T/MCI witness Petti testified that the work times and probabilities are based on the judgment of subject matter experts. However, neither GTE nor AT&T/MCI supplied sufficient documentation to support the assumptions underlying the work time and probability estimates. Without a more detailed showing, the GTE and AT&T/MCI estimates are also unacceptable.

Because of the shortcomings in the proposals presented, it is extremely difficult to determine the appropriate work time and probability estimates for each nonrecurring activity. Although we could reasonably exclude such costs altogether because of a failure of proof, that approach would not acknowledge the fact that ILEC personnel must perform certain nonrecurring activities to provision building blocks for competing carriers.

In the following sections of this order, the Commission discusses certain nonrecurring activities and adopts interim work time and probability estimates for those activities. With respect to the remaining nonrecurring activities, we conclude that nonrecurring costs should be based on the minimum work time and probability estimates included in USWC’s TOC studies. These work times and probabilities shall remain in effect until such time as USWC and GTE file revised analyses that are approved by the Commission. Such analyses must be comprehensive and include full documentation. In order to avoid the problems associated with the studies presented in this case, we strongly encourage the ILECs to conduct time-in-motion studies. Such studies provide a more accurate indication of the work times and probabilities associated with the various nonrecurring functions necessary to provision building blocks.

---

<sup>184</sup>See e.g., USWC Exhibit/27 at 44-47; 56-60; 63; 66-68; 75-76; 80-84; 89-91; 93-95; 99-106; 115-119; 126-127; 133-137; 139-140; 149-160; and 162-164.

<sup>185</sup>See e.g., *supra* note 182.

## **E. Jumper Activity Times.**

This issue involves the amount of work time necessary for an ILEC technician to install and connect or to disconnect and remove jumper wires at the ILEC's main distribution frame. The parties discussed this issue at length.

### **1. Party Positions.**

USWC witness Schmidt testified that the physical unbundling of loops involves several manual, labor-intensive processes. Upon receipt of an order for an unbundled loop, USWC must dispatch a technician to the central office to disconnect a two-wire jumper (short jumper) from the loop at the MDF. The technician must then connect the loop to the CLEC using another short jumper that runs between the loop connection on the MDF and the tie cable that runs to the SPOT frame and then on to the CLEC's collocated space.<sup>186</sup> USWC estimates that 14 minutes are required to perform the physical jumper activity -- seven minutes at the MDF and another seven minutes at the distribution frame located near the carrier's collocated space. The estimates are based on meetings held during 1997 by USWC personnel experienced in provisioning and maintenance activities. Mr. Schmidt indicated that USWC has investigated whether these manual processes can be mechanized, but there are no mechanized solutions available in the foreseeable future.

AT&T/MCI contends that USWC's estimated jumper activity times are "very leisurely." According to Ms. Petti, low-profile COSMIC frames commonly have jumpers that are much shorter than those required for conventional MDFs. As a result, less time is required to run, install, or remove jumpers. The AT&T/MCI NRCM estimates that only two minutes are necessary to perform these activities.

The jumper time estimates included in the GTE cost study are less than half of those estimated by USWC and somewhat greater than those estimated by AT&T/MCI. The precise times are designated as confidential by GTE.

Staff argues that jumper activity times should not be included in the loop nonrecurring cost where switching is supplied by the CLEC. Mr. Breen emphasizes that the Commission did not distinguish between "short jumpers" (i.e., jumper wires connecting the loop and the switch) and "long jumpers" (i.e., tie cables between the MDF and a CLEC's collocated space) when it developed the recurring cost for the "Jumper NAC" building block. He further maintains that the material and labor (or "EF&I") cost to place long jumpers was included in the recurring cost of the Jumper NAC building block approved in docket UM 351. As a result, Mr. Breen argues that it is inappropriate for USWC to charge the recurring Jumper NAC building block rate and also charge for

---

<sup>186</sup> Note that this scenario contemplates the CLEC is collocated at USWC's central office. It does not assume that the CLEC will have direct access to the MDF to make its own connections. Collocation is not required where a CLEC purchases all of the building blocks necessary to provision a finished service and opts to make its own connections via the direct access procedure authorized in this order.

the short jumper placement through a nonrecurring charge. He suggests that the distinction between long and short jumpers should be considered in future analyses of recurring and nonrecurring costs.

On the other hand, Staff recommends an increase in the NACC (switch port) building block. Mr. Breen observes that a short jumper must be provisioned as part of the NACC when switching is provided by the ILEC.<sup>187</sup> Since the placement of short jumpers is typically expensed, it is appropriately treated as a nonrecurring cost. Mr. Breen recommends that the nonrecurring cost and price of the NACC should be adjusted accordingly. However, rather than use the seven-minute estimate suggested by USWC, Mr. Breen recommends that the Commission adopt the short jumper activity time included in USWC's retail cost study. The jumper activities modeled in the retail study are the same as those in the nonrecurring cost study, but the work time estimates are significantly lower.<sup>188</sup> Mr. Breen did not apply the lower retail jumper activity time to other USWC cost studies which include short jumper activities.

USWC does not object to increasing the NACC nonrecurring cost, but takes issue with Staff's proposal to eliminate jumper activity costs from the nonrecurring cost of the loop. USWC claims that Mr. Breen does not properly distinguish between short and long jumpers.<sup>189</sup> Mr. Brigham emphasizes that the short jumper must be installed each time a customer orders service and that short jumpers are neither capitalized nor included in recurring costs. By contrast, long jumpers (tie cables) are hardwired cables that run between the MDF and the CLEC's collocated space. Long jumpers are permanent investments and are therefore capitalized and included in recurring costs. Mr. Brigham maintains that the cost data relied on by Mr. Breen to support the removal of jumper activity times from the nonrecurring cost of the loop<sup>190</sup> pertain only to long jumper costs, not to the labor costs required to place the short jumper. He further argues that short jumper placement costs are not recovered in any other building block cost.

---

<sup>187</sup>Mr. Breen assumes that the ILEC will supply the short jumper to connect the loop (NAC) to the switch port (NACC). Although Staff's position is consistent with our understanding of how unbundling would occur, USWC and GTE have stated that they will not combine most building blocks pursuant to the Iowa Utils. Bd. decision. In that case, the nonrecurring charges paid by requesting carriers should not include any costs to perform such combinations.

<sup>188</sup>The retail jumper activity times are confidential. See Confidential Staff Exhibit/12, Breen/12, line 698-699, Column G.

<sup>189</sup>USWC refers to "short" jumpers as "MDF jumpers" and "long" jumpers as "Jumper NACs." We have used Staff's terminology to avoid confusion with the "Jumper NAC" building block.

<sup>190</sup>USWC notes that Mr. Breen's adjustment affects the loop nonrecurring cost, since USWC has agreed to waive nonrecurring charges for the long jumper, cross-connection, and the distributing frame termination when the a CLEC orders these building blocks with a loop. However, USWC claims it would not recover its costs if these building blocks are ordered individually. USWC Exhibit/11, Brigham/22-23.

## 2. Commission Decision -- Jumper Activity Times.

### (a) How should short jumper-related costs be categorized?

Staff witness Breen correctly observes that the Commission did not distinguish between short jumpers and long jumpers when the Jumper NAC building block was established in docket UM 351. The recurring monthly price of the Jumper NAC building block is based on the investment and labor costs of installing tie cables within ILEC central offices.

Although short jumper-related costs were not considered in developing the recurring Jumper NAC rate, the evidence suggests that Jumper NAC rate would be more than sufficient to compensate the ILEC for the capital cost of the short jumper facility. Tie cables are permanently installed cables that include hundreds of wires. They are often more than several feet in length and may extend between different floors of an ILEC central office. Conversely, short jumpers are comprised of only one or two wire pairs and typically extend no more than a few feet between terminal connections on the MDF. Compared to tie cables, the capital cost of short jumpers is *de minimis*.

On the other hand, the record discloses that nearly all of the costs associated with short jumpers are labor-related expenses of connecting and disconnecting jumper wires. Moreover, short jumper wire is generally treated as a supply item. Since these costs are fundamentally expense items, it may be more appropriate to recover short jumper-related expenses through a nonrecurring charge, rather than create a separate short jumper building block. This approach allows the ILECs to assess a short jumper nonrecurring charge whenever a short jumper is required in conjunction with a building block. It also addresses our concern that a recurring monthly rate may not provide an adequate means of recovering the ILEC's labor costs unless the CLEC retains the jumper connection for an extended period of time. For example, if the short jumper were priced at the current Jumper NAC building block rate of 12 cents per month, it would take many months for the ILEC to recoup its short jumper-related costs. In addition, we have noted that customer "churn" in a competitive local exchange market is likely to approximate the 40-50 percent annual rate now experienced in the long distance market. A high rate of customer churn will cause short jumpers to be connected and disconnected more frequently, lessening the chance that the ILEC will be able to recover its labor costs.

For these reasons, the Commission finds that short jumper-related costs incurred by USWC and GTE should be recovered as a nonrecurring charge. We are not persuaded that it is necessary to establish a short jumper building block or that short-jumper related costs can be reasonably recovered through recurring rates.

### (b) Under what circumstances should a nonrecurring charge for short jumper-related activity be assessed?

The Commission concludes in this order that the mandatory collocation proposals proposed by USWC and GTE contravene the nondiscriminatory access requirement in

§251(c)(3) of the Act. We have also determined that, in light of the *Iowa Utilities Bd.* decision, nondiscriminatory access requires that requesting carriers must have direct access to the MDF and other ILEC facilities where building blocks may be combined. These decisions allow CLECs to self-provision short jumpers without any involvement by the ILEC. As a consequence, USWC and GTE may have limited occasion to connect and disconnect short jumpers and to assess nonrecurring charges for those activities.

Clearly, the nonrecurring charges assessed by USWC and GTE should not include short jumper-related costs except in circumstances where the ILEC performs short jumper activities and supplies the short jumper wire on behalf of the CLEC. Under the terms of this order, a CLEC may access the MDF to self-provision the short jumper between the loop termination location and the tie cable termination location on the MDF.<sup>191</sup> This is true regardless of whether the CLEC purchases ILEC switching or supplies its own switching.<sup>192</sup> Because the ILEC will not incur any labor costs to connect the short jumper in either instance, these costs may not be included in the nonrecurring charges paid by the CLEC.<sup>193</sup>

Likewise, there will be instances where the ILEC will not incur any cost to disconnect short jumpers. For example, where a customer served by one CLEC seeks to transfer service to another CLEC, the ILEC will not incur any cost to disconnect the short jumper if the serving CLEC disconnects the short jumper itself at the MDF.<sup>194</sup>

**(c) How should short jumper labor costs be calculated?**

The final issue relates to the work time estimate that should be used for purposes of calculating the nonrecurring charges in those cases where the ILEC performs short jumper activities. As emphasized above, the Commission encourages USWC and GTE to produce work time and probability studies that are more comprehensive and better documented than those presented in this case. In the interim, we agree with Staff that the short jumper activity time estimates incorporated in USWC's retail cost studies should also be used for purposes of calculating nonrecurring costs where USWC technicians are

---

<sup>191</sup>It is presumed that the CLEC will supply its own wire, unless the ILEC elects to make wire available to the CLEC.

<sup>192</sup>The latter scenario assumes that a tie cable runs from the MDF to the carrier's collocation space and from there to the carrier's remotely collocated switch.

<sup>193</sup>Of course, the ILEC's nonrecurring costs will be higher if a CLEC opts to collocate, does not use the direct access option, and the parties agree that the ILEC should connect/disconnect the short jumper. In that case, the ILEC may assess a separate nonrecurring charge to recover the cost of the short jumper activities it performs. This assumes, of course, that collocation is optional rather than mandatory and the ILEC agrees to connect/disconnect the short jumper for all carriers on a nondiscriminatory basis.

<sup>194</sup>Also, the ILEC may incur short jumper-related cost but have already recouped that cost. For example, where an ILEC customer migrates to a CLEC and the CLEC purchases building blocks to serve that customer, the ILEC's cost of disconnecting the short jumper is included in the retail installation charge paid by the customer when ILEC service is established.

required to connect or disconnect the short jumper. There is no significant difference between the short jumper work USWC performs for its retail customers and the work USWC may perform for the CLECs. USWC did not explain the substantial difference between the retail short jumper activity times and the seven-minute jumper activity time included in its nonrecurring cost studies.

Moreover, as in the case of the work time estimates discussed above, there is not enough information in the record to determine how USWC's seven-minute jumper activity estimate was developed. For example, it is not clear whether the seven-minute estimate is based entirely upon expert opinion or whether measurements were taken of technicians performing jumper activities. Also, we do not know the time period over which the seven-minute estimate was developed, the location or size of the central offices under study, or the type of distribution frames used in the study. If we are to attach significant weight to such analyses, USWC must supply more complete and better organized data than that included in the nonrecurring cost studies presented in this case.

The Commission has similar problems with the two-minute short jumper activity estimate incorporated in the AT&T/MCI NRCM. Although, the NRCM purports to be based on subject matter expert opinion, AT&T/MCI did not provide sufficient documentation to substantiate the two-minute estimate.

GTE's short jumper activity time estimates do not differ substantially from the USWC retail jumper activity times recommended by Staff, and are considerably less than the seven-minute estimate proposed by USWC.<sup>195</sup> For those reasons, we are willing to use GTE's short jumper activity time estimates to calculate GTE's nonrecurring costs until the company develops better studies to document the labor time necessary to perform these activities.

## **F. COSMIC Frames.**

This issue addresses the type of main distribution frame assumed to be used in ILEC central offices for cost study purposes. As discussed above, there are two types of main distribution frames generally in use: conventional MDFs and low-profile, or COSMIC, frames. The type of distribution frame is important for purposes of calculating nonrecurring costs because it takes less time to connect jumpers on COSMIC frames.<sup>196</sup>

### **1. Party Positions.**

The AT&T/MCI NRCM assumes that COSMIC frames comprise 100 percent of the distribution frames installed in ILEC central offices. Ms. Petti states that COSMIC

---

<sup>195</sup>The GTE jumper connect activity time is slightly greater than the USWC retail short jumper connection activity time. On the other hand, the GTE jumper disconnection activity time is slightly less than USWC's retail short jumper disconnection activity time. Compare Confidential Staff Exhibit/12, Breen/22, Lines 559-560, Column G with Confidential Staff Exhibit/12, Breen/12, Lines 598-599, Column G.

<sup>196</sup>TR. 1010-1012.

frames were included in the NRCM because they represent newer, forward-looking technology that is currently widely deployed in the industry. In Ms. Petti's experience as a regional manager for Pacific Bell, all new central offices were equipped with COSMIC frames.<sup>197</sup>

GTE objects to the COSMIC frame assumption included in the NRCM. It points out that neither Ms. Petti, nor the developers of the NRCM model know how many COSMIC frames are actually installed in Oregon.

## **2. Commission Decision -- COSMIC Frames.**

We agree with Joint Intervenors that COSMIC frames represent forward-looking, least cost methodology consistent with TSLRIC principles. The 100 percent COSMIC frame assumption in the NRCM is therefore reasonable. The percentage of COSMIC frames actually installed by GTE or USWC is irrelevant from a TSLRIC standpoint.<sup>198</sup>

Although the evidence indicates that COSMIC frames reduce the amount of time necessary for technicians to install and remove short jumper wires, there is not enough information in the record to determine the average number of minutes required to perform these functions on a COSMIC frame. The experts retained by AT&T/MCI have ascertained that two minutes is sufficient for these activities, but there is no additional support for this claim. For that reason, we find that the ILECs should perform studies to calculate the average work times to install and remove short jumpers on COSMIC frames. Once this information is produced, it should be incorporated into all applicable cost estimates. In the interim, all short jumper-related costs should be based on the short jumper work time estimates discussed above.

## **G. Disconnection Activities.**

This issue deals with whether the nonrecurring charges paid by requesting carriers should also include costs associated with disconnecting service.

### **1. Party Positions.**

GTE and USWC recommend that nonrecurring charges include both the cost of establishing service and the cost of disconnecting service in the future. In support of this position, USWC and GTE emphasize that it is often difficult to recover disconnection costs if charges are levied after the business relationship with a customer has ended. Mr. Brigham and Mr. Schmidt testified that customers whose accounts have been terminated are less likely to pay their telephone bills than are customers with active accounts. For that reason, it has become standard practice in the telecommunications

---

<sup>197</sup>TR. 962-963.

<sup>198</sup>See discussion, *supra* at 60-61, 78.

industry and in other industries to recover disconnection costs as part of the up-front nonrecurring charge to establish service.

Staff agrees with USWC and GTE that any disconnection costs should be included in the initial nonrecurring charge paid by carriers purchasing building blocks. Staff observes that it would be an administrative burden for the ILECs to have to track these costs through to the time of actual disconnection.

Joint Intervenors argue that disconnection charges should be separated out and paid by CLECs only when and if the disconnection charges are actually incurred by an ILEC. They maintain that including disconnection costs in up-front nonrecurring charge will: (a) make it significantly more expensive for CLECs to enter the market, creating a barrier to entry; (b) violate the principle of Cost Causation, by allowing ILECs to charge for activities before they are incurred; and (c) force CLECs to pay disconnection costs for activities that never occur, as in the case where loop facilities are transferred from one CLEC to another.<sup>199</sup>

AT&T and MCI further argue that CLECs, unlike retail customers, do not pose a significant risk of defaulting on disconnection charges. They point out that the ILECs already require substantial deposits from carriers before supplying unbundled elements.

## **2. Commission Decision -- Disconnection Activities.**

We agree with the ILECs and Staff that disconnection costs should be included in the upfront nonrecurring charge. Levying a separate disconnection charge would be difficult to collect and burdensome to administer. Although the ILECs are unlikely to experience problems recovering disconnection costs from large carriers such as AT&T or MCI, there will undoubtedly be many smaller, less-established carriers providing local exchange service. The ILEC would be exposed to a significant risk of nonpayment if these carriers purchase large quantities of building blocks and subsequently experience financial difficulties. Moreover, as Staff points out, it would be difficult to separately track, bill, and collect disconnection charges. The additional administrative costs associated with separate disconnection charges would increase the total cost of provisioning building blocks.

In view of the decisions the Commission has made regarding the calculation of nonrecurring costs, we do not believe that collecting disconnection costs upfront will discourage competitive entry as Joint Intervenors allege.<sup>200</sup> Nor are we persuaded that

---

<sup>199</sup>Joint Intervenors argue that the ILECs would not have to perform any disconnection activities in these instances. Presumably, this is because the disconnection and reconnection of the customer's loop would be handled by CLEC technicians. See discussion above.

<sup>200</sup>For example, we have determined that 98 percent of electronically submitted disconnection orders will flow through without manual intervention by USWC ISC representatives or GTE NOMC representatives. This should significantly reduce disconnection order processing costs. Other decisions in this order should have a similar effect.

our decision violates the cost causation principle adopted in docket UM 351. That principle addresses the assignment of costs to particular building blocks. It does not specify the precise mechanism by which those costs must be collected. Also, as USWC and GTE observe, it is standard practice in the utility industry to include disconnection costs in the nonrecurring charge of a given service.

We are not persuaded by Joint Intervenors' claim that including disconnection costs in the initial nonrecurring charge will cause CLECs to pay for activities that may never occur. We recognize that ILECs may not have to perform any short jumper work or other physical activity to disconnect building blocks in certain circumstances.<sup>201</sup> Also, because we have concluded that a high percentage of building blocks will be processed electronically, disconnection costs are likely to be minimal in many cases. Nevertheless, every building block transaction will require the ILEC to incur some cost at the time a building block is disconnected. At the very least, this will include the cost of processing the disconnection order to maintain a proper record of the transaction for billing and inventory purposes. Accordingly, we find that disconnection costs should be included in nonrecurring charges 100 percent of the time.

#### **H. Dedicated Inside Plant (DIP) and Dedicated Outside Plant (DOP).**

DIP refers to the connection between the loop termination location on the MDF and the ILEC's switch termination location on the MDF.<sup>202</sup> By leaving this connection in place when a customer discontinues service, the ILEC is able to reduce expenses for technician time and copper wire, and connect the next customer more quickly and easily. DOP is the practice of allowing outside cross-connections to remain in place, leaving the customer's loop in a "connect-through" state. Among other things, DOP reduces the need to dispatch outside field technicians for connect and disconnect orders.

When used together, DIP and DOP allow the ILEC to maintain a "warm dial tone" at premises that have been vacated by a customer. When a new customer moves in, that customer can simply pick up the telephone to order new service or to dial emergency numbers.

#### **1. Party Positions.**

Joint Intervenors emphasize that DIP and DOP significantly reduce the cost of provisioning, allow faster customer service, and eliminate errors that can arise from manual processes. According to Ms. Petti, these advantages have made DIP and DOP a common practice among ILECs. She notes that USWC's retail cost studies assume that

---

<sup>201</sup>As noted above, any short jumper activity costs incurred by USWC and GTE should be recovered through a separate nonrecurring charge.

<sup>202</sup>The connection between the loop termination location and the ILEC switch port termination location is made by the short jumper.

DIP and DOP will be used a substantial percentage of the time.<sup>203</sup> The AT&T/MCI NRCM assumes that DIP and DOP will be available 100 percent of the time where customers migrate from ILEC service to CLEC service.

The ILECs argue that it is erroneous to assume DIP/DOP will be available 100 percent of the time. They point out that DIP/DOP cannot be used to activate a loop that is not connected to a switch. In other words, DIP/DOP assumes that the ILEC will combine the loop and switching building blocks for CLECs. USWC and GTE emphasize that this assumption is contrary to the Eighth Circuit's holding that ILECs cannot be compelled to combine elements under the Act.

In addition, GTE and USWC observe that their networks use DIP/DOP significantly less than 100 percent of the time. GTE witness Murphy points out that the 100 percent assumption ignores the massive network growth now underway and understates the nonrecurring costs associated with outside plant activities by ILEC technicians.

## **2. Commission Decision -- DIP/DOP.**

Under the Eighth Circuit's decision, ILECs are not required to provide CLECs with building block combinations. Thus, an ILEC may disconnect the loop from the switch even where the CLEC buys both building blocks. Once the ILEC technician disconnects the jumper wire that runs between the loop and the ILEC switch, the DIP connection is broken.<sup>204</sup> DIP is also broken in the instance where the ILEC technician disconnects the loop from the ILEC switch so that the loop can then be reconnected to a CLEC switch. For these reasons, the Commission agrees with USWC and GTE that it is unrealistic to assume DIP will be available when CLECs purchase unbundled elements.

On the other hand, we see no reason why an ILEC should disconnect existing outside cross-connections when an ILEC customer migrates to a CLEC or a CLEC customer migrates to another CLEC. Unlike the inside plant connections between the loop and switch, the outside plant connections do not involve a combination of separate building blocks and are not encompassed by the Eighth Circuit's decision.<sup>205</sup> In our opinion, it is reasonable to assume that DOP will remain in place the same percentage of the time that it is assumed to be available in USWC's retail cost studies. This will take into account the customer migration scenario (where DOP connections should generally

---

<sup>203</sup>The percentage of DIP and DOP included in USWC's retail studies is designated confidential.

<sup>204</sup>Under the direct access approach approved in this order, the CLEC technician could then reconnect the NAC (loop) to the NACC (ILEC switch port) at the MDF. Where the CLEC supplies its own switching, the CLEC technician would connect the loop to the tie cable that runs to the CLEC's collocation space and, from there, to the CLEC's remotely situated switch.

<sup>205</sup>To date, the Commission has not disaggregated the loop by creating separate feeder and distribution building blocks.

not have to be disturbed) as well as those cases where ILEC technicians still have to perform outside plant rearrangement activities (e.g., to connect new loops).

## **I. Number of Work Activities per Visit.**

This issue involves the number of activities ILEC technicians perform during each visit to a nonstaffed central office or outside plant location. The more activities performed per visit, the lower the nonrecurring cost.

### **1. Party Positions.**

AT&T/MCI witness Petti asserts that cost studies should assume efficient management practices. She observes that ILEC technicians do not perform work on a per order basis, but rather are sent to do several jobs at a time. These include such things as general maintenance, routines, and provisioning activities. Also, when technicians are dispatched, they are equipped with mechanized field access systems that allow them to complete orders, obtain new work assignments, close trouble tickets, update data bases, remotely assess test systems, and complete their work in a mechanized fashion. The NRCM assumes that an ILEC technician will complete an average of four work activities per trip to all work locations, including customer sites, outside plant locations, and unattended central offices.<sup>206</sup>

USWC witness Schmidt argues that it is incorrect to assume that ILEC field technicians working on outside plant will perform multiple tasks at the same location. He emphasizes that the work required for outside plant technicians depends on the physical location of the customer requiring the work and the amount of time allotted to complete the work. USWC attempts to minimize travel time by allocating work within a geographic area, but technicians must often travel several miles between jobs.

GTE witness Murphy also maintains that the NRCM assumption is unreasonable. In order to provide service as quickly as possible, GTE technicians frequently complete only one work activity per trip. If technicians are required to wait until there were four activities per trip at a specific location, service could not be provided in a timely fashion. While it may be reasonable to assume multiple work activities at unattended central offices, Mr. Murphy contends that it is not reasonable to make the same assumptions for work activities at outside plant or customer locations.

### **2. Commission Decision -- Work Activities per Visit.**

Although there is sufficient evidence in the record to allow the Commission to conclude that ILEC technicians often conduct more than one work activity per trip, none of the parties have submitted documentation that would enable us to calculate the average number of activities performed at the various work locations visited by ILEC technicians. We are inclined to agree with Messrs. Schmidt and Murphy that technicians visiting

---

<sup>206</sup>AT&T/MCI Exhibit/2, Petti/14; AT&T/MCI Exhibit/4, Petti/18.

customer locations are likely to perform fewer activities because of the need to respond quickly to customer requests. On the other hand, visits to unattended offices, and perhaps also to SAIs, are likely to be somewhat less time-constrained and allow technicians to schedule more activities.

Without more specific information, we cannot find that the four activity per visit average in the NRCM is reasonable. The record does, however, support the finding that ILEC technicians frequently complete more than one activity per visit. For purposes of calculating nonrecurring costs, therefore, we will assume that ILEC technicians will complete two activities per trip on average to all work locations. As with the other cost study assumptions adopted in this order, the Commission will reevaluate this decision in subsequent proceedings once more complete information is produced.

### **J. Loop Unloading Activities.**

USWC and GTE must place loading coils on copper loops over 18,000 feet long (18 kilofeet or 18kf) in order to supply adequate voice grade quality service. In such cases, resistance design standards require placement of three loading coils at distances of 3kf, 9kf, and 15kf from the central office.

Loop unloading is a type of circuit conditioning. If a customer with an 18kf loaded loop requests digital service, an ILEC technician must splice the line to remove loading coils<sup>207</sup> at each of the three points on the loop where the coils are attached.<sup>208</sup>

### **1. Party Positions.**

Staff witness Breen testified that the costs associated with unloading loops are included in the maintenance factors used to develop recurring building block rates. To prevent double recovery of these costs, Staff argues that loop unloading costs should not also be included in the nonrecurring charges paid by CLECs.<sup>209</sup> Mr. Breen contends that the costs associated with loop unloading and other outside plant activities are appropriately included in recurring costs and urges the Commission to refrain from establishing a policy of separately identifying and assessing nonrecurring charges for all of the outside plant rearrangement expenses that may be associated with the myriad of situations that arise. Mr. Breen suggests that the better approach is to continue the policy of recovering outside plant expenses and investments in recurring costs. The net effect of Staff's recommendation is to reduce USWC's and GTE's proposed nonrecurring loop unloading charge from \$597.61 to zero.

---

<sup>207</sup>According to USWC, any associated bridge taps may also have to be removed. A bridge tap is an undetermined length of wire attached between the normal endpoints of a circuit that introduces unwanted impedance imbalances for data transmission. Newton's Telecom Dictionary, 8<sup>th</sup> Edition (1994).

<sup>208</sup>Underground loops are accessed through manholes at three different locations. Loops longer than 18kf may require additional coils and unloading activities.

<sup>209</sup>TR. 1079-1081; Staff Exhibit/15, Breen/7.

USWC concedes that the labor costs associated with unloading loops are currently included in the maintenance factor used to develop recurring costs. However, it claims that unloading costs are properly treated as nonrecurring costs because they are incurred each time a CLEC requests removal of coils and taps. USWC maintains that the appropriate solution is allow recovery of its proposed nonrecurring charges for loop unloading. It agrees to adjust its maintenance factor to avoid double recovery of these costs. USWC also notes that the Commission “ordered USWC to deload loops” by mandating loop conditioning charges in docket UM 351. GTE’s proposed nonrecurring charge for cable unloading mirrors USWC’s proposed charge.

Joint Intervenors agree with Staff that there should not be any nonrecurring charge for loop deloading. They claim that USWC’s proposal to adjust the recurring cost maintenance factor is improper because recurring costs are not at issue in this proceeding.

Joint Intervenors also argue that unloading costs should be deleted from both recurring and nonrecurring rates charged to CLECs because unloaded loops represent forward-looking technology. According to Ms. Petti, current outside plant design recognizes that customers, including those with loops greater than 18kf, require more sophisticated services. She states that the industry typically plans for unloaded cable in sufficient quantities to assure that the only effort required to serve a customer is to change to a spare loop that is not loaded. The method used most often is to place new cables as nonloaded and to change existing customers to the new cable. Another approach is to plan and incorporate the unloading of loops in routine cable maintenance. The unloaded loops would then be held as shelf stock, most efficiently in binder groups of twenty-five. Both of these methods contrast with USWC’s assumption that only one loop will be unloaded at a time.

USWC witness Schmidt contends that it is incorrect to assume that ILECs will maintain binder groups of “clean” or unloaded loops. He points out that telephone companies do not have the luxury of designing and engineering feeder plant to include binders of dedicated, unloaded loops. Moreover, he states that this type of excess capacity does not exist on USWC’s network.

## **2. Commission Decision -- Loop Unloading.**

The Commission agrees that loop unloading and other similar outside plant activities should continue to be recovered through recurring charges for the reasons stated by Mr. Breen. Consequently, we decline to adopt nonrecurring charges proposed by USWC and GTE for loop unloading. USWC and GTE are not harmed by this approach because the costs of unloading will continue to be recovered through recurring rates.

USWC’s claim that the Commission “ordered USWC to provide loop deloading” in docket UM 351 argument is not on point. The conditioning building blocks established in Order No. 96-283 do not relate to loop deloading, but rather to other conditioning processes used to enhance the performance of voice grade and digital loops.

Moreover, even if loop deloading was entailed in these processes, the costs associated with the conditioning building blocks are recovered through recurring charges, not through nonrecurring charges.

Joint Intervenors agree that the nonrecurring cost for unloading should be zero. We do not address their additional claim that unloading costs should be removed from the ILEC's recurring cost because unloaded loops represent least cost technology. As Joint Intervenors emphasize with respect to USWC's request to adjust the maintenance factor, recurring rates are not at issue in this case. If Joint Intervenors desire to pursue this issue, they must do so in another proceeding.

#### **K. GTE Outside Facilities Connection Charge.**

In Section 3.1.1(C) of its proposed tariff, GTE proposes an Outside Facility Connection charge that would apply each time a GTE service technician visits a customer's premises.<sup>210</sup> We decline to adopt this charge for the reasons discussed immediately above. That is, we are persuaded that outside plant activities should be recovered through recurring rather than nonrecurring charges.

#### **L. Testing Activities.**

This issue concerns whether nonrecurring charges should include costs associated with testing unbundled elements provided to requesting carriers.

##### **1. USWC and GTE Proposed Tariffs.**

USWC's proposed tariff states that CLEC "will have responsibility for testing the equipment, network facilities and the Unbundled Loop facility. If USWC tests the unbundled loop at the carrier's request and the fault is in USWC facilities, a charge shall apply."<sup>211</sup>

GTE Advice No. 589 stated that "GTE will perform routine testing at the time of installation and will be responsible for its own facilities." This language was subsequently modified in Advice No. 611 as follows:

GTE will provision the NAC (loop) with the functionality specified by the [telecommunications carrier] and as described in the Tariff, for the particular building block ordered or combination of building blocks when channel performance building blocks are also ordered.

GTE will provision the NACC (port) testing for dial tone and complete a test call to verify the assigned telephone number. Switch features ordered

---

<sup>210</sup>The charge would be in addition to the GTE service activity charge. GTE Advice 611, Tariff P.U.C. Or No. 15, Revised Sheet 9.1, Section 3.1.1(C).

<sup>211</sup>USWC Exhibit/35, P.U.C. Oregon No. 26, Original Sheet 5, Section 6.2.A.6.g.

by the [telecommunications carrier] will also be tested to ensure proper operation.<sup>212</sup>

Currently automated loop testing of unbundled loops is not available. When such testing becomes available, it will be offered.

## **2. Staff.**

Staff recommended that USWC revise its tariff to mirror the testing provisions in GTE Advice No. 589. Staff did not address the tariff modifications proposed subsequently by GTE in Advice No. 611.

Staff witness Breen testified that testing occurs during provisioning and on an ongoing basis. In both cases, the ILEC and CLEC should be responsible for testing, maintaining, and repairing their own facilities. Mr. Breen contends that the entity providing the switching should conduct the periodic testing required. He further observes that recurring charges already include costs associated with ongoing testing activities. These include, for example, situations where the ILEC tests a facility in response to a repair call and reports to the customer that the trouble is not associated with the ILEC facility.

Mr. Breen states that testing costs should not be included in nonrecurring charges where the ILEC is not required to visit a customer's premises because those costs are already included in the recurring charge. On the other hand, a CLEC should be required to pay a trouble isolation charge where an ILEC technician travels to the customer's premises and the trouble is not in the ILEC's facilities. Mr. Breen proposes that USWC and GTE revise their building block tariffs so that CLECs pay trouble isolation charges in the same manner as USWC and GTE retail customers.

## **3. USWC.**

USWC disagrees with Staff's position regarding testing. Mr. Brigham states that the testing expenses included in USWC's recurring costs studies are part of ongoing repair costs included in the maintenance factor. However, the maintenance factor is based on historical costs and does not consider the incremental expenses associated with testing loops. Mr. Brigham emphasizes that every time a CLEC requests USWC to test an unbundled loop, USWC must dispatch a technician to the frame to test the cable pair connected to the loop. Frequently, technicians must be dispatched to nonstaffed central offices to perform the test. This manual process is not normally required in the retail environment because USWC can perform automated testing through its switch.

USWC's proposed tariff applies time and material charges when testing is requested by a CLEC. Mr. Brigham recommends that the "Testing Access" building block approved by the Commission in UM 351 should apply when the ILEC is required

---

<sup>212</sup>GTE Advice 611, Tariff P.U.C. Or No. 15, 1<sup>st</sup> Revised Sheet 6.46, Section 2.7 (citations omitted).

to test unbundled loops in the central office.<sup>213</sup> He agrees with Mr. Breen that trouble isolation charges are appropriate where the CLEC requests USWC to visit an end user's premises to test for trouble, and the trouble is not caused by USWC's facilities.

#### **4. GTE.**

GTE witness Murphy states that the costs of testing associated with the initial establishment of all telephone services are properly categorized as nonrecurring costs. He emphasizes that the NRCM assumes minimal testing functions and an unreasonably low level of testing for unbundled elements. Mr. Murphy contends that new and smaller CLECs will not purchase testing equipment immediately, but will rely on GTE to do their testing for them. Larger CLECs may do some testing, but GTE will retain responsibility for network testing. Mr. Murphy claims that the NRCM does not account for these costs.<sup>214</sup>

GTE is willing to provide CLECs with the same facility testing that GTE provides to itself and its retail customers. GTE witness McLeod indicated that GTE can provide automated testing where it also provides switching to the CLEC. GTE cannot provide automated testing of unbundled loops, however.

#### **5. Joint Intervenors.**

Joint Intervenors agree with Staff that testing should be performed by the party providing the switching. According to Ms. Petti, AT&T and MCI will use their own MLT OSS, no-test trunks and digital switches to test loops for provisioning, service activation, and maintenance. Consequently, the nonrecurring charges for the basic NAC should not include any testing charges.

Ms. Petti states that it is unnecessary for the ILEC to test the basic NAC prior to migrating an existing customer to a new entrant. The NRCM assumes that USWC's local digital switches are equipped with Predictor/Automatic Line Insulation Test (ALIT) which conducts "automatic/non-intrusive proactive performance monitoring of the NAC to detect potential problems before the customer migration."<sup>215</sup> Thus, it is assumed that the basic NAC will meet performance objectives prior to migration. After the NAC has migrated to the CLEC, it will perform ALIT-type testing. The only time reactive testing occurs is if the customer reports trouble.

---

<sup>213</sup>The cost and price for this building block have not yet been approved by the Commission.

<sup>214</sup>Mr. Murphy also claims that the NRCM underestimates the amount of testing required for 4-wire and DS1 unbundled loops. Interexchange carriers generally insist on joint testing of special access circuits. He asserts that there is no reason to believe that CLECs will not require joint testing of unbundled elements used to provide special services.

<sup>215</sup> AT&T/MCI Exhibit/9, Petti/19.

Ms. Petti points out that each provisioning scenario included in the NRCM assumes some level of testing. The model contemplates that the ILECs will proactively maintain their networks to ensure proper operation and reliable customer service. It also assumes that the cost of basic maintenance is a recurring cost. Because ILECs must be prepared to respond to customer service inquiries, some level of testing will continue to be performed.

## **6. Commission Decision -- Testing Activities.**

We agree with Staff that each ILEC and CLEC should bear the cost and responsibility for testing, maintaining, and repairing their own facilities. We also agree that the entity providing the switching facilities should bear the cost and responsibility for routine testing.

When building blocks are provided to CLECs, the ILEC must ensure that the building blocks meet the requisite technical parameters.<sup>216</sup> This presumes that building blocks will be tested beforehand by the ILECs. The record indicates that it is unnecessary for USWC or GTE to manually test every loop before it is delivered to a CLEC. As Ms. Petti observes, ILEC local digital switches can perform ALIT-type testing to automatically monitor NAC performance and detect potential problems before the NAC is delivered to the CLEC.

Once building blocks are provided to the CLEC and combined to form a service, they must be tested to ensure that the service works as planned. Ongoing testing must also be provided to ensure that service quality is maintained. The record indicates that these testing functions can be performed on an automated basis by the party providing the switching. Thus, where the ILEC provides the switching function, it can test the loop on an automated basis. The CLEC can do likewise where supplies its own switching.

As Mr. Breen points out, ongoing testing expenses are already included in the maintenance factor of recurring building block rates. Mr. Brigham argues that this allowance is insufficient because of incremental costs associated with testing unbundled loops. We find this argument unpersuasive for the reasons discussed above. Moreover, even if Mr. Brigham were correct, we are persuaded that testing expenses should continue to be recovered through recurring costs because of the ongoing nature of testing activities.

An additional testing charge should only be required where a CLEC requests that an ILEC technician visit an end user's premises to test for trouble, and trouble is not found in the ILEC facilities. We agree with Mr. Breen and Mr. Brigham that a trouble

---

<sup>216</sup>USWC and GTE agree that every building block supplied to a requesting carrier will meet the requisite technical specifications for that building block. USWC Exhibit/39 at 7; GTE Reply Brief at 30; TR. 1255, 1377. This is consistent with 47 C.F.R. §51.309(c), which states that a telecommunications carrier's purchase of access to an unbundled network element does not relieve the incumbent LEC of the duty to maintain, repair, or replace the unbundled network element.

isolation charge should be assessed in that instance. We adopt Staff's proposal to impose the same type of trouble isolation charge paid by USWC and GTE retail customers in this situation.

USWC's proposal to impose the testing access building block charge when unbundled loops are tested within the central office is unnecessary for the reasons stated above. Furthermore, USWC's proposed treatment of the testing access is inconsistent with the definition of that building block.<sup>217</sup>

## **M. Staff Adjustments for Circuit Provisioning Functions.**

### **1. Party Positions.**

The nonrecurring charges recommended by Staff include several revisions to the USWC and GTE cost studies. Mr. Breen initially proposed excluding several circuit provisioning functions (e.g., ODAP/HCPC and IFCPC and CPC) and message trunk administration (e.g., CAC) activities from the nonrecurring building block studies on the assumption that those costs were included in recurring EF&I costs. Based on further examination, Mr. Breen revised his nonrecurring cost estimates to add back certain costs originally thought to be included in the recurring building block costs. Mr. Breen's revised estimates continue to exclude ODAP/HCPC and IFCPC costs associated with provisioning functions.

USWC witness Brigham asserts that ODAP/HCPC and IFCPC circuit provisioning work is required whenever a CLEC orders an NAC, NACC, multiplexing, or transport. He asserts that the costs associated with these network activities are not included in the recurring EF&I cost for these building blocks, because the activities do not occur when a building block (e.g., loop) is installed, but rather when the building block is ordered by a CLEC and an existing circuit must be provisioned. Mr. Brigham claims that Staff correctly included the costs in the basic NAC studies but incorrectly excluded those costs from the DS1 NAC, DS3 NAC, multiplexing, and transport studies.

Mr. Brigham also contends that Mr. Breen incorrectly excluded the CAC function from nonrecurring cost studies. CAC costs relate to message trunk administration (e.g., the assignment of trunk groups) and are not included in EF&I recurring costs. He asserts that transport building block nonrecurring costs must be adjusted upward to include this activity.

### **2. Commission Decision -- Circuit Provisioning Functions.**

We adopt the adjustments proposed by Staff. To begin with, the record shows the CAC costs, which USWC claims were incorrectly excluded, were actually added back to

---

<sup>217</sup>The testing access building block compensates the ILEC for testing equipment supplied to a collocating carrier to enable that carrier to perform throughput testing of loops. It is not a separate charge for ILEC testing.

the nonrecurring cost estimates by Mr. Breen.<sup>218</sup> Second, the record shows that Mr. Breen included expenses associated with order handling, order screening, and order logging activities in the nonrecurring cost estimates for DS1 and DS3 NACs.<sup>219</sup> Staff properly excluded ODAP/HPCP and IFPCP provisioning costs from the nonrecurring cost estimates because these types of expenses are already included in the building block recurring costs. As discussed previously, this type of outside plant expense should continue to be included in recurring costs.

## **N. Nonrecurring Cost Markup.**

This issue deals with whether nonrecurring charges should be marked up over TSLRIC.

### **1. Party Positions.**

The nonrecurring charges proposed by Staff incorporate the markup over TSLRIC approved for recurring building block rates in docket UM 844. USWC proposes a markup greater than that used in UM 844, but is willing to accept the markup recommended by Staff.

Joint Intervenors claim that the markup proposed by USWC is excessive and inconsistent with markups USWC has proposed for nonrecurring charges in the past. According to Dr. Zepp, the nonrecurring costs proposed in USWC's retail cost studies are less than or equal to direct nonrecurring costs or a combination of direct and indirect nonrecurring costs.<sup>220</sup> He alleges that the nonrecurring charge proposed by USWC for residential service in its recent rate case is less than the company's estimate of TSLRIC. Similarly; USWC's proposed nonrecurring charges for business service approximate TSLRIC plus shared costs. In addition, Dr. Zepp maintains that USWC's current nonrecurring charges for both services are below USWC's nonrecurring cost estimates. He asserts that it is improper for USWC to markup nonrecurring costs for competitors when it does not propose similar markups for USWC retail customers.

Joint Intervenors also oppose the markup authorized in UM 844 for recurring building block costs. They state that the decision to exclude nonrecurring costs from the markup authorized in that proceeding acknowledges USWC's past practice of assessing nonrecurring charges which do not exceed the sum of direct and indirect nonrecurring costs.

---

<sup>218</sup>Compare e.g., Staff Exhibit/7, Breen/6, Lines 348 and 385, Column K, with Staff Exhibit/12, Breen/7, Lines 349 and 388, Column K.

<sup>219</sup>Compare USWC Exhibit/18 at 10, 21-25, with Staff Exhibit/12, Breen/4.

<sup>220</sup>Dr. Zepp explains that direct plus indirect costs are comparable to TSLRIC plus shared costs. AT&T/MCI Exhibit/14, Zepp/16.

Joint Intervenors assert that the markup over nonrecurring cost should be no greater than the 10.4 percent markup included in the AT&T/MCI NRCM. They maintain that such a markup will allow the ILECs a reasonable opportunity to recover their costs without denying the CLECs the opportunity to compete for local exchange customers.

## **2. Commission Decision -- Nonrecurring Cost Markup.**

The Commission adopts Staff's recommendation to use the same markup for nonrecurring charges that was authorized for building block recurring charges in docket UM 844. In prior decisions, we have held that building block rates should include a mark up over TSLRIC. Logically, there is no reason why nonrecurring charges should not also include a markup; provided, of course, that the resulting charges are not so high they discourage competitive entry. The Commission will monitor the progress of competition and may revisit this issue if it appears that the amount of markup included in the nonrecurring charges for building blocks creates a barrier to entry.

AT&T and MCI maintain that competition will suffer if CLECs must pay nonrecurring charges that include a significant markup over TSLRIC while the nonrecurring charges paid by ILEC retail customers include little or no markup over cost. Under such circumstances, CLECs will either have to absorb the difference or try to pass along the nonrecurring charges to their customers in the form of higher retail prices. Since AT&T and MCI did not disclose how TSLRIC was calculated for the bundled retail services used in its comparison, we cannot confirm that the nonrecurring charges currently paid by USWC and GTE residential and business retail customers approximate TSLRIC.

Furthermore, the record in this case does not contain an extensive discussion of the relationship between building block and retail service nonrecurring charges. As a result, we do not have a sufficient basis to conclude that the markups included in building block nonrecurring charges should equal the markups in retail nonrecurring charges, or that a separate imputation test for nonrecurring charges should be established.<sup>221</sup>

---

<sup>221</sup>A separate imputation test for nonrecurring charges would require the nonrecurring charge for an ILEC retail service to equal or exceed the sum of the nonrecurring charges for each building block necessary to provision that service. In other words, the ILEC would have to impute into each retail nonrecurring charge all of the nonrecurring charges applicable to the component building blocks. At present, the Commission only requires that the combination of ILEC recurring and nonrecurring retail service charges cover the sum of the recurring and nonrecurring charges for the component building blocks.

**BEFORE THE PUBLIC UTILITY COMMISSION**

**OF OREGON**

UT 138/UT 139  
PHASE III

In the Matter of Ascertaining the Unbundled	)	
Network Elements that must be Provided by	)	
Incumbent Local Exchange Carriers to	)	ORDER
Requesting Telecommunications Carriers	)	
Pursuant to 47 C.F.R. § 51.319.	)	

DISPOSITION: COMPLIANCE FILINGS REVIEWED; REVISED  
FILINGS ORDERED

**INTRODUCTION AND PROCEDURAL HISTORY**

On April 24, 1997, the Public Utility Commission of Oregon (Commission) opened Dockets UT 138 and UT 139 to consider unbundled network element (UNE) nonrecurring charges (NRCs), special construction charges, and tariff terms and conditions proposed by Qwest Communications, Inc. (“Qwest”) (formerly U S WEST Communications, Inc.) and Verizon Northwest, Inc. (“Verizon”) (formerly GTE Northwest Incorporated). The Commission authorized the UNE NRCs to take effect subject to refund, including interest accrued at the authorized rate of return for the respective carriers.<sup>1</sup>

On November 13, 1998, the Commission entered Order No. 98-444, prescribing methods for calculating UNE nonrecurring costs and resulting NRCs. On June 19, 2000, the Commission entered Order No. 00-316 on reconsideration, modifying certain aspects of Order No. 98-444.<sup>2</sup> In addition, the Commission initiated Phase II of dockets UT 138/UT 139 (UT 138/139) for the purpose of “mapping” the Commission’s “building blocks” to the list of UNEs adopted by the Federal Communications Commission (FCC).<sup>3</sup>

On December 26, 2001, following a series of workshops, the Commission entered Order No. 01-1106 in Phase II, adopting a comprehensive list of UNEs to be made available by Qwest and Verizon in Oregon. The Commission also initiated Phase III of dockets

<sup>1</sup> Order No. 97-157 at 1; Order No. 97-153 at 1. For simplicity, this order refers to Qwest and Verizon, rather than their respective predecessors. Qwest and Verizon are also referred to herein as the incumbent local exchange carriers, or ILECs.

<sup>2</sup> Order No. 00-316 was reaffirmed in Order No. 00-643, entered October 13, 2000.

<sup>3</sup> Order No. 00-316 at 22.

ORDER NO. 03-085

UT 138/139 for the purpose of investigating the UNE NRC filings made by Qwest and Verizon in compliance with Order Nos. 98-444 and 00-316.<sup>4</sup>

On January 16, 2002, the Commission convened the first prehearing conference in Phase III. At the conference, questions arose regarding the scope of the docket and related scheduling matters.

On February 19, 2002, the Administrative Law Judge (ALJ) issued a Ruling clarifying the scope of the Phase III proceeding (the ALJ Ruling). The ALJ concluded that Phase III is limited to determining whether the NRCs filed by Qwest and Verizon comply with the requirements set forth in Order Nos. 98-444 and 00-316. Accordingly, the ALJ rejected Verizon's proposal to introduce new cost studies and analyses at this stage of the proceeding.<sup>5</sup>

On March 15, 2002, Qwest made its NRC compliance filing. Verizon submitted its filing on April 16, 2002.<sup>6</sup> A series of workshops were then held to discuss each filing. As a result of those discussions, the parties developed separate issue lists for Qwest and Verizon.<sup>7</sup>

At the second prehearing conference on May 21, 2002, the ALJ approved the issue lists proposed by the parties. The parties also agreed on a procedural schedule requiring them to submit written comments regarding the issues. Comments were filed by Qwest, Verizon, the Joint Competitive Local Exchange Carriers (Joint CLECs) and the Staff of the Public Utility Commission of Oregon (Staff).<sup>8</sup>

On September 6, 2002, the parties filed statements listing disputed issues. On September 12, 2002, the ALJ convened a hearing to discuss the statements and ask clarifying questions regarding the comments filed by the parties. At the hearing, Verizon requested an evidentiary hearing to resolve what it believes to be disputed issues of fact. The remaining parties indicated that an evidentiary hearing was not required. Pursuant to the ALJ's instructions, Verizon filed written comments on September 22, 2002, in support of its request for an evidentiary hearing. All parties filed final comments on September 30, 2002.<sup>9</sup>

On December 5, 2002, the ALJ issued a ruling denying Verizon's request for an evidentiary hearing. The ALJ concluded that the issues presented for consideration could be resolved without taking additional evidence.

---

<sup>4</sup> Order No. 01-1106 at 2.

<sup>5</sup> ALJ Ruling dated February 19, 2002 at 3-6.

<sup>6</sup> On May 30, 2002, Verizon filed a revised set of compliance cost studies.

<sup>7</sup> The Verizon issue list relates exclusively to the cost studies it filed in this docket. However, Verizon also concurs with several NRCs filed by Qwest. In those instances, the Qwest issue list also applies to Verizon.

<sup>8</sup> Second Prehearing Conference Report, Issued June 3, 2002. On August 26, 2002, the ALJ granted Verizon's motion to extend the deadline for filing comments.

<sup>9</sup> The Joint CLECs, Qwest and Staff were permitted to respond in their final comments to Verizon's request for evidentiary hearing.

## ORDER NO. 03-085

The parties have resolved the majority of the issues informally. Appendices A and B of this order are matrices listing the issues pertaining to Qwest and Verizon, respectively. This Order deals only with issues identified in the matrices as being unresolved.

**QWEST ISSUES****Issue Nos. 1a, 1b and 1c: Flow-Through.**

Section VII. A. of Order No. 98-444, entitled “Service Order Processing Costs,” addresses the amount of human intervention necessary to process CLEC orders for unbundled elements. The Commission concluded that the NRCs calculated by Qwest and Verizon should assume that 98 percent of the electronic service orders submitted by CLECs would “flow-through” the ordering process without need for intervention by incumbent local exchange carrier (ILEC) representatives. We affirmed that finding on reconsideration in Order No. 00-316, and again in Order No. 00-643.

Qwest, Verizon and Staff assert that the 98 percent flow-through rate applies only to service order processing functions. Those functions are performed in the Interconnection Service Center (ISC) and Interexchange Carrier Service Center (ICSC).

The Joint CLECs argue that the 98 percent flow-through rate should apply not only to service order processing activities in the ISC and ICSC, but also to “all downstream systems involved in ordering and provisioning service.”<sup>10</sup> In support of their position, the Joint CLECs cite portions of the discussion in Section VII. A of Order No. 98-444. They contend that the Commission “expressly agreed with the testimony of AT&T/WorldCom witness Petti,”<sup>11</sup> who recommended that the 98 percent flow-through rate should apply to ordering and provisioning activities in addition to those performed in the ISC and ICSC.

The Commission agrees with Qwest, Verizon and Staff on this issue. As the title of Section VII. A. indicates, the decision to adopt the 98 percent flow-through rate was limited to service order processing functions, and was not intended to encompass other downstream ordering and provisioning activities. If one reviews the discussion in its entirety rather than selected passages, it is clear that we are dealing only with the service order activities that take place before they are routed for further downstream processing.

Had the Commission intended to adopt Ms. Petti’s more expansive recommendation to apply the 98 percent flow-through rate to “downstream” nonrecurring activities, we would have so specified. Instead, the focus of the discussion in Section VII. A. concerns activities relating to the service order processing functions performed by Qwest’s ISC and Verizon’s National Open Market Center (NOMC), and culminates in our decision to require separate NRCs for electronically-submitted service orders

---

<sup>10</sup> Joint CLEC Opening Comments at 4-9.

<sup>11</sup> *Id.* at 7.

ORDER NO. 03-085

(incorporating the 98% flow through rate) and manually-submitted service orders (incorporating a 0% flow through rate).

The discussion elsewhere in Order No. 98-444 reinforces this conclusion. For example, we state:

In some cases, an activity must always be performed and the probability is 100 percent. Other times, the activity may need to be performed occasionally. For example, *we have determined that 98 percent of electronically-submitted service orders will not require the intervention of USWC's ISC personnel. Thus, there is a two percent probability that electronic orders will not flow-through and will have to be handled manually by ISC representatives.*" Order No. 98-444 at 79, footnote 178. (Emphasis added.)

\* \* \* \* \*

[W]e have determined that 98 percent of electronically submitted disconnection orders will flow-through without manual intervention *by USWC ISC representatives or GTE NOMC representatives.*" Order No. 98-444 at 89, fn. 200. (Emphasis added.)

These passages clearly reflect the Commission's intent to limit the scope of the 98 percent flow-through requirement to nonrecurring service order activities performed in the Qwest ISC<sup>12</sup> and Verizon NOMC centers. There is no basis in the order for applying the 98 percent requirement to other "downstream" nonrecurring activities.

**Issue 2a: Central Office Frames.**

In order to provision a loop, a CLEC may choose one of two possible configurations. First, the CLEC collocation space may be directly connected to the ILEC's Cosmic Frame/Main Distribution Frame (MDF). This configuration requires the placement of a single jumper at the MDF.<sup>13</sup> In the second configuration, the CLEC collocation space is connected to an Intermediate Distribution Frame (IDF) which is then connected to the MDF by an ILEC-provided tie cable. This configuration requires placement of two jumpers, one at the MDF, and a second at the IDF.<sup>14</sup> In Order No. 98-444, the Commission held that ILECs could not require CLECs to connect to an IDF.<sup>15</sup> Although CLECs may choose that type of configuration, they also have the option of connecting directly to the MDF.<sup>16</sup>

<sup>12</sup> In Phase III, the parties agreed that service order processing activities are also performed in Qwest's ICSC.

<sup>13</sup> See diagram at Staff/4, Reynolds/5.

<sup>14</sup> *Id.* at Reynolds/4.

<sup>15</sup> At the time Order No. 98-444 was entered, Qwest denominated its IDF as the "Single Point Of Termination, or "SPOT frame." Qwest states that it "no longer offers SPOT frames on a forward-looking

## ORDER NO. 03-085

Qwest's proposed Loop NRC includes the cost of connecting two jumpers, one at the MDF and another at the IDF. Qwest acknowledges that only one jumper is required if a CLEC chooses to connect a loop directly to the MDF. It maintains, however, that direct connection is inefficient because it requires using multiple tie cables to each module of the MDF. Qwest asserts the Loop NRC should include the cost of two jumpers since CLECs will use an IDF in most cases to avoid these costs.

The Joint CLECs propose removing all costs relating to the IDF and revising Qwest's Loop NRC to include the cost of only one jumper. They argue that, since Order No. 98-444 prohibits ILECs from requiring CLECs to use an IDF, the "default position" in Qwest's cost studies should be to include one jumper instead of two. Further, Qwest's cost studies do not even reflect the fact that CLECs can connect directly to the MDF and avoid paying for a second jumper. The Joint CLECs also emphasize that it is improper for Qwest to offer new evidence relating to the probable use of the IDF or to costs associated with that option.<sup>17</sup>

Staff also recommends revising Qwest's Loop NRC to include only the cost of one jumper at the MDF. It contends that the IDF and the tie cable connecting the IDF to the MDF are not part of the loop and therefore should not be included in the Loop NRC.<sup>18</sup> Staff emphasizes, however, that an ILEC should be permitted to charge for two jumpers in those cases where the CLEC opts to provision loops using an IDF. In Phase II, the Commission established the "Interconnection Tie Pair" (ITP) UNE which applies only when an IDF is used.<sup>19</sup> Staff recommends establishing a new NRC for jumper activity at the IDF whenever an ITP is provided at the request of a CLEC.

Qwest acknowledges that Staff's proposal is "theoretically correct," but states that it makes more sense to include two jumpers in the loop NRC because Qwest (a) is unaware of any CLEC requests for an unbundled loop with a direct connection to the MDF, and; (b) does not want to deal with the administrative expense of having two separate rates.<sup>20</sup>

The Commission adopts the Staff recommendation. Order No. 98-444 allows CLECs to provision loops by connecting directly to the MDF or by routing the connection through an IDF. Since each configuration requires placement of a different number of jumpers, it is logical to have a separate NRC for each. We are not persuaded

---

basis." To avoid confusion on this point, we emphasize that Order No. 98-444 prohibits ILECs from requiring CLECs to connect to *any* IDF, not merely the SPOT frame. Order No. 98-444 at 40-43.

<sup>16</sup> *Id.* at 44-46.

<sup>17</sup> The Joint CLECs argue that, "if the Commission were to allow Qwest's belated explanation in favor of the IDF, it would be required to consider conflicting factual evidence offered by the CLECs." They contend that such arguments are more "properly considered in UM 1025," Qwest's pending cost study docket. Joint CLEC Reply comments, August 29, 2002, p. 12.

<sup>18</sup> The "loop" UNE includes "the cable side of the main distribution frame, the feeder facilities, the serving area interface, the distribution facilities, the drop, and the network area interface device. Order No. 97-145, Confidential Appendix A at 3.

<sup>19</sup> ITP configurations are illustrated in Exhibit Staff/4, Reynolds/4.

<sup>20</sup> Qwest Response to Intervenor CLECs' and Staff's Comments (Qwest Response), August 9, 2002, p.12.

## ORDER NO. 03-085

by Qwest's claim that separate NRCs will significantly increase administrative costs. To the extent such costs exist, they can be examined in docket UM 1025, Qwest's pending cost study docket.

**Issue 2b Integrated Digital Loop Carrier**

This issue concerns the percentage of Integrated Digital Loop Carrier (IDLC) systems, as opposed to the percentage of copper loops, assumed to be present in ILEC networks for purposes of calculating nonrecurring costs. In Order No. 98-444, the Commission held that the percentage of IDLC included in the ILECs' nonrecurring cost studies should be consistent with that included in their recurring cost studies, *i.e.*, 25 percent. We observed that "[i]n general, a greater percentage of IDLC results in lower cost for provisioned loops and thus, lower nonrecurring costs."<sup>21</sup>

During the Phase I hearings, AT&T/WorldCom witness Bonni Petti testified that TR-303 IDLC systems represented the least cost forward-looking technology, and "are made up of intelligent, processor-controlled network elements that can communicate over standard interfaces to the OSS systems in a manner that little or no manual intervention is required for provisioning maintenance activities."<sup>22</sup> Order No. 98-444 concludes that "TR-303 systems should be assumed for purposes of calculating IDLC costs."<sup>23</sup>

Notwithstanding the 25 percent IDLC requirement in Order No. 98-444, Qwest's compliance filing assumes that jumper activity is required 100 percent of the time. Qwest and Staff assert that the 25 percent IDLC requirement has no impact on Qwest's nonrecurring cost studies because the Commission did not explicitly adopt Ms. Petti's testimony or mandate the specific technology that should be used to provision service to CLECs, leaving Qwest to "define the appropriate forward-looking treatment"<sup>24</sup> for loops served by IDLCs. Qwest further claims that Ms. Petti's Phase I testimony "is, in fact, incorrect" and that "jumper work is required," whether or not loops are provided over IDLC.<sup>25</sup>

The Joint CLECs respond that Order No. 98-444 requires Qwest to adjust its compliance filing to reflect that jumper activity is necessary to provision loops only 75 percent of the time.

The Commission concurs with the Joint CLECs on this issue. During the Phase I hearings, there was substantial debate concerning how loops should be supplied to CLECs where existing ILEC customers are served by IDLC facilities.<sup>26</sup> In Order

---

<sup>21</sup> Order No. 98-444 at 77.

<sup>22</sup> *Id.*

<sup>23</sup> *Id.*

<sup>24</sup> Exhibit Staff/22, White/4 Reply.

<sup>25</sup> Qwest Response, August 9, 2002, p. 13.

<sup>26</sup> The discussion centered on how CLECs should combine UNEs in accordance with the Eighth Circuit Court of Appeals in *Iowa Utilities Board v. FCC*, 120 F.3d 753, 813 (8<sup>th</sup> Cir. 1997). The Eighth Circuit decision was subsequently overturned by the Supreme Court of the United States in *AT&T Corp. v. Iowa*

## ORDER NO. 03-085

No. 98-444, we rejected the ILECs' claim that IDLC should be excluded from forward-looking nonrecurring cost calculations because digital carrier technology comprised a very small percentage of their existing networks. Although we declined to dictate how ILECs should provision loops from a technological standpoint, we certainly did not allow the ILECs to "define the appropriate forward-looking technology" as Staff suggests. Rather, we agreed with Ms. Petti that TR-303 IDLC systems represented the most advanced IDLC technology currently available and were therefore appropriate for determining the costs associated with a forward-looking efficient network.

The conclusion that nonrecurring cost studies should assume 25 percent of loops are provisioned via TR-303 IDLC systems must be viewed in conjunction with our finding that "a greater percentage of IDLC *results in lower cost for provisioned loops and thus, lower nonrecurring costs.*" The latter finding is consistent with the testimony presented by Ms. Petti regarding the capabilities and reduced provisioning costs associated with using TR-303 systems.

We are not persuaded by Qwest's argument that jumper work is required to provision all loops whether or not IDLC is employed in the network. Not only is this an untimely attempt to reargue evidence from Phase I, it is irrelevant in this case because the determining factor for purposes of calculating TELRIC is not Qwest's current method of operation, but rather the costs associated with an efficient, forward-looking network.

**Issue 4a and 4b: Dispatch/Installation—Travel Time**

This issue deals with the number of work activities completed each time an ILEC technician is dispatched to perform a job outside the central office. The cost studies presented by Qwest in Phase I assumed that technicians perform only one work activity per visit. In contrast, the AT&T/WorldCom Nonrecurring Cost Model (NRCM) assumed that ILEC technicians perform an average of four work activities per visit. After reviewing the evidence, the Commission concluded in Order No. 98-444 that, "[f]or purposes of calculating nonrecurring costs, therefore, we will assume that ILEC technicians will complete two activities per trip on average to all work locations."<sup>27</sup>

Qwest's compliance filing does not apply the "two activity per trip" requirement to technician visits to customer premises.<sup>28</sup> It argues that: (a) the reference in Order No. 98-444 to the "number of work activities per visit" actually relates to inputs in the AT&T/WorldCom NRCM model, rather than to inputs in Qwest's NRC model,<sup>29</sup> and; (b) the Order incorrectly states that the NRCM includes technician visits to "all work locations, including customer sites, outside plant locations, and unattended central

---

*Utilities Board*, 119 S. Ct. 721 (1999). We held that, regardless of how Qwest and Verizon provision service, all of the loops provided to CLECs must meet required technical specifications and be capable of providing the telecommunications services available to ILEC customers. *See* Order No. 98-444 at 54.

<sup>27</sup> Order No. 98-444 at 93.

<sup>28</sup> Qwest Response, August 12, 2002, p. 15.

<sup>29</sup> Qwest claims that "these inputs are used only in the development of costs in the NRCM for *travel time to the central office*," and that "in the NRCM there are no costs at all for travel to a customer premise." *Id.*

ORDER NO. 03-085

offices,”<sup>30</sup> when in fact, the NRCM only deals with travel time to unmanned offices. As a result, Qwest maintains that the “two activity per trip” requirement should not apply to visits to outside plant locations, since the issue in Phase I related only to trips to unmanned offices within the context of the NRCM.

Staff and the Joint CLECs disagree with Qwest’s claim that Order No. 98-444 applies only to the NRCM and not to the ILEC cost studies. They emphasize that the Order specifically requires the ILECs to assume two work activities per trip “to all work locations” when calculating nonrecurring costs. In addition, Staff contends that Qwest has interpreted the NRCM incorrectly. The Joint CLECs add that Qwest’s attempt to challenge the findings in Order No. 98-444 is untimely.

The Commission agrees with Staff and the Joint CLECs regarding this issue. Order No. 98-444 clearly states that the ILECs must revise their cost studies to include the “two activity per trip” assumption “to all work locations.” The order is not limited to the NRCM as Qwest suggests.

Qwest’s claim regarding the findings in Order No. 98-444 is also untimely. The opportunity to challenge the evidentiary basis underlying Order No. 98-444 is long past. If Qwest wants to present new evidence regarding this issue, it may do so in docket UM 1025.

**Issue 6: Time Estimates**

Nonrecurring cost studies identify the work time required by ILEC personnel to complete a given activity. The work time estimate is multiplied by the probability that the activity will occur in order to produce a labor cost for the activity. In Order No. 98-444, we observed that work times and labor rates are significant drivers for nonrecurring costs.<sup>31</sup>

In Phase I, Qwest used “Task Oriented Cost” (TOC) studies as a starting point for developing its work time and probability (WTAP) estimates. Qwest’s practice was to have subject matter experts (SMEs) review each TOC study to determine if it reflected current company practices. In some cases, the TOC studies were deemed current and incorporated in Qwest’s nonrecurring cost studies. In other cases, the SMEs either modified the TOC studies or concluded that the studies were outdated and unusable. In still other cases, WTAP estimates were based on new analyses conducted by SMEs.<sup>32</sup>

In Order No. 98-444, the Commission rejected all of the WTAP estimates included in Qwest’s nonrecurring cost studies. After identifying numerous deficiencies in the TOC studies -- including SME work product -- we concluded that Qwest had not produced sufficient evidence to substantiate its proposed work times and probabilities.

---

<sup>30</sup> Order No. 98-444 at 92.

<sup>31</sup> *Id.* at 79.

<sup>32</sup> *Id.*

## ORDER NO. 03-085

We also rejected the WTAP estimates included in the AT&T/WorldCom NRCM and the Verizon cost study. As in the case of Qwest's studies, we found that Verizon and AT&T/WorldCom did not include sufficient documentation to support the SME determinations upon which WTAP estimates were based.<sup>33</sup>

Because of the deficiencies in the Phase I studies, we concluded in Order No. 98-444 that "nonrecurring costs should be based on the minimum WTAP estimates included in [Qwest's] TOC studies."<sup>34</sup> During the Phase III workshops, however, Qwest indicated that it could not produce minimum time estimates for its TOC studies. Because of this, Qwest's Phase III compliance filing uses the same WTAP estimates included in its Phase I nonrecurring cost studies. Qwest takes the position that the Phase I estimates comply with the requirements set forth in Order No. 98-444 because the "weighted average" times calculated by the TOC studies incorporate the minimum time estimates.<sup>35</sup>

In its opening comments, Staff recommended using Qwest's Phase I estimates because (a) the minimum work times required by the Commission are unavailable, and (b) new WTAP studies could not be completed within the 60-day compliance filing deadline. The Joint CLECs, on the other hand, proposed a compromise that averages Qwest's Phase I work times with CLEC-supported times in order to approximate the reductions contemplated by Order No. 98-444.<sup>36</sup>

At the September 12, 2002 hearing, the ALJ observed that Order No. 98-444 contemplates reductions in Qwest's WTAP estimates. In view of Qwest's failure to produce the minimum time estimates specified by the Order, the ALJ recommended that the parties attempt to resolve the issue informally.

In its final comments, Qwest proposed a proxy for the minimum time requirement. It suggests that *when TOC studies are used to identify work times*, the times included in the nonrecurring cost studies should be calculated by averaging the work times from Qwest's Phase I TOC studies with the remodeled work times developed by AT&T/WorldCom witness Petti. Qwest states, however, that SME estimates should not be included in the averaging process because Order No. 98-444 specifically refers to Qwest's "TOC studies."<sup>37</sup> Staff concurs with Qwest's proposed compromise.<sup>38</sup>

The Joint CLECs disagree with Qwest's proposed compromise. They contend that the work times *for all nonrecurring activities* should be based on an average

---

<sup>33</sup> *Id.* at 82.

<sup>34</sup> The study questionnaires underlying Qwest's TOC studies include a line where the "minimum," "maximum," and "most likely" times are supposed to be entered for each work activity. *Id.* at 81-82.

<sup>35</sup> This argument is addressed below.

<sup>36</sup> In Phase I, AT&T/WorldCom witness Petti presented a "remodeled" version of Qwest's cost studies, based on assumptions contained in the NRCM. *See*, Confidential Exhibit AT&T/WorldCom/7. The Joint CLECs propose to average Qwest's work times with the time estimates in Ms. Petti's exhibit. Joint CLEC Reply Comments, August 29, 2002, p. 17.

<sup>37</sup> Qwest observes that, unlike the TOC studies, SME estimates do not have a place where "minimum, maximum and most likely work times" can be entered. Qwest Final Comments, September 30, 2002, p. 2.

<sup>38</sup> Staff states, however, that "if Qwest and the Joint CLECs are able to reach a different, mutually agreeable solution, [Staff] would likely support that as well." Staff Exhibit/30, White/10.

## ORDER NO. 03-085

of Qwest-proposed times and AT&T/WorldCom-proposed times. In other words, the averaging process should apply not only to the WTAP estimates in unaltered TOC studies, but also to WTAP estimates developed with SME input.

The Commission agrees with the Joint CLECs on this issue. To begin with, there is no merit to Qwest's initial claim that its Phase I estimates satisfy Order No. 98-444 because the "weighted average" times in the TOC studies incorporate minimum time estimates. Order No. 98-444 clearly requires the ILECs to calculate their nonrecurring costs with the minimum time estimates used to develop the weighted average times proposed by Qwest in Phase I. If we had intended to approve the weighted average times as Qwest suggests, we would have simply adopted the Phase I estimates. Instead, we rejected Qwest's weighted average times because of the numerous deficiencies identified at pp. 80-82 of Order No. 98-444.

We also disagree with Qwest's proposal to use minimum work times and probabilities only for WTAP estimates produced without SME input. Implicit in this proposal is the assumption that the WTAP estimates offered by Qwest in Phase I can somehow be neatly divided between TOC estimates and SME estimates. That assumption is incorrect.

In Order No. 98-444, we observed that several WTAP estimates resulted from a SME modifying a TOC study. In many cases, however, we could not discern whether or to what extent the TOC study was modified by a SME.<sup>39</sup> The manner in which the WTAP estimates were presented--including the deficiencies in the underlying studies themselves--made it impossible for the Commission to differentiate estimates based solely upon TOC studies from those developed with SME input. As a consequence, the Commission was required to treat all of Qwest's proposed WTAP estimates the same. It is apparent from even a cursory reading of Section VII. D. of Order No. 98-444, that the reference to Qwest's "TOC studies" was intended to encompass all of Qwest's WTAP estimates.

Qwest's observation that estimates produced with SME input do not include a "minimum, maximum, and most likely" estimate is irrelevant to our decision. Regardless of whether the estimates are based upon a TOC study, a SME study or some combination thereof, all of the studies are intended to provide a reasonable assessment of the average time it takes to complete a given activity (or, in the case of probability, the number of times that activity will take place). Again, it is clear from Order No. 98-444 that we expected Qwest to (a) produce the documentation underlying its proposed "weighted average" times for all nonrecurring WTAP estimates, including estimates prepared with SME input, and (b) calculate its NRCs using the minimum WTAP estimates incorporated in the "weighted average" times proposed by Qwest in Phase I.

---

<sup>39</sup> Even when the Commission was able to discern that a TOC study was modified by an SME, Qwest's failure to provide supporting documentation made it impossible to determine why the changes were made. Order No. 98-444 at 80.

## ORDER NO. 03-085

For the reasons set forth, the Commission finds that Qwest's nonrecurring cost studies shall include WTAP estimates calculated using the averaging process recommended by the Joint CLECs.

**VERIZON ISSUES****Issue No. 1: Service Order Flow-Through**

As noted above, Order Nos. 98-444 and 00-316 require Qwest and Verizon to file NRCs that incorporate a 98 percent flow-through rate for all service order processing functions. Verizon claims that the actual flow-through rate associated with the following four service order functions is less than 98 percent: Telephone Number Assignment, Summary Bill Master, Billing Inquiries, and Local Service Provider.<sup>40</sup> It further asserts that "some manual intervention is necessary [to perform these work functions] even if a fully automated OSS is assumed."<sup>41</sup> For this reason, Verizon proposes to use the same time and probabilities submitted in its original cost study filed in Phase I of this proceeding. It also requests an evidentiary hearing to establish that the 98 percent flow through requirement should not apply to these functions.

Staff and the Joint CLECs oppose Verizon's proposal to apply a lower flow-through rate to the four service order functions listed above. They emphasize that issues relating to service order processing costs were fully adjudicated in Order Nos. 98-444 and 00-316, and that Verizon is essentially requesting a rehearing. The Joint CLECs further emphasize that evidence regarding the manner in which Verizons's actual OSS operates today is irrelevant, since the appropriate inquiry, and indeed the Commission's mandate, is "based upon its findings regarding the forward looking costs associated with an efficient OSS."<sup>42</sup>

The Commission agrees with Staff and Joint CLECs. Order Nos. 98-444 and 00-316 require Verizon to develop nonrecurring costs using a 98 percent flow-through *for all nonrecurring activities* associated with processing electronically submitted service orders. The four functions identified by Verizon -- Telephone Number Assignment, Summary Bill Master, Billing Inquiries, and Local Service Provider-- are all service order activities performed within Verizon's NOMC and are therefore subject to the 98 percent flow-through requirement.<sup>43</sup> Thus, the NRCs proposed by Verizon are not in compliance and must be revised.

Verizon's request to reexamine the flow-through rate associated with the four functions in an evidentiary hearing is also untimely. The functions were part of the cost studies submitted by Verizon in Phase I, and were considered by the Commission in arriving at the decision in Order No. 98-444 to adopt the 98 percent flow-through rate for service order processing activities. That decision was reaffirmed on reconsideration in

---

<sup>40</sup> The four functions are described in Verizon's Comments, August 15, 2002, at 6-7, 14-15.

<sup>41</sup> *Id.* at 6.

<sup>42</sup> Joint CLEC Final Comments, September 30, 2002, pp. 3-4

<sup>43</sup> *See, e.g.*, Order No. 98-444 at 89, footnote 200.

## ORDER NO. 03-085

Order Nos. 00-316 and 00-643. As emphasized elsewhere in this order, it is inappropriate for Verizon to attempt to relitigate this issue during the compliance filing phase of this docket.

**Issue 3: Service Order Labor Rates**

Verizon concurs with Staff and the Joint CLECs that the labor rates authorized in Order Nos. 98-444 and 00-316 should be used to calculate refunds in this proceeding. The parties dispute whether revised labor rates based on Verizon's current costs should be used to calculate nonrecurring costs *on a going-forward basis*. Verizon contends that the labor rates authorized in Order Nos. 98-444 and 00-316 are six to eight years old and cannot not be used to establish going-forward costs without offending the policy of using forward-looking costs.

The Joint CLECs and Staff oppose using Verizon's revised labor rates for NRCs assessed on a going-forward basis. They maintain that the revised rates violate both the Commission's orders which do not allow any change in labor rates, and the ALJ's Ruling prohibiting using new cost studies in Phase III. Staff further asserts that Verizon's revised labor rates constitute a new cost study because, at minimum, they require new work times, frequencies and elements because of changes in loading factors.<sup>44</sup>

The Commission finds that Verizon's current labor rates should not be used to calculate going-forward NRCs. We agree with Staff that inserting new labor rates at this point in the process effectively amounts to using new cost studies. As the ALJ emphasized, it is inappropriate to introduce new cost studies during the compliance filing process. Moreover, allowing Verizon to introduce new cost studies at this stage prejudices other parties by unreasonably delaying the implementation of NRCs and refunds due.<sup>45</sup>

Verizon is not prejudiced by this result. If it wants to implement more current labor rates on a going-forward basis, it may include that proposal in its ongoing cost study docket, UM 874. That docket was suspended over two years ago at Verizon's request, but may be reactivated by the company at any time.

**Issue 4: Installation (Loop and Port) – Work Times**

Staff claims that Verizon's NRC compliance filing improperly double-counts the work time required by the Customer Zone Technician (CZT) to install and disconnect jumpers. According to Staff, Verizon includes jumper connection and

---

<sup>44</sup> Staff Exhibit/26, White/7.

<sup>45</sup> At a minimum, other parties would require additional time to analyze and rebut Verizon's labor cost studies. For example, Staff maintains that the 1997 times and frequencies taken from Verizon and Qwest studies are inappropriate when used with current labor rates because the times and frequencies do not incorporate productivity gains Verizon has made since 1997. Staff contends that these productivity gains and increased efficiencies in OSS more than offset annual labor increases that Verizon has incurred since 1997. In all likelihood, evidentiary hearings would be necessary to resolve these issues.

ORDER NO. 03-085

disconnection times in two places – once in its installation order activity, and a second time in its disconnection order activity.<sup>46</sup>

Verizon denies that it double-counts jumper times for CZT functions. It states:

When Verizon receives an order to install a loop (or port), it must *disconnect* the existing service (jumper) it has in place (separating the loop from Verizon’s port), and *install* a new service (jumper) to the CLEC, connecting the loop to the CLEC’s cable. In the case of a disconnection order, the process is simply reversed – the old CLEC service (jumper) is disconnected and the loop is returned to “dial tone ready” status by reconnecting service (jumper) from the loop to Verizon’s port. In each case (installing the loop or disconnecting a loop), two functions are necessary, namely a “disconnection” of an exiting service (jumper) and reconnecting to the new service (jumper) status.<sup>47</sup> (Emphasis in original.)

Staff responds that Verizon misconstrues the amount of jumper activity that must take place when service is connected or disconnected. It states:

When a loop is placed into service for a CLEC, it is inappropriate to charge for disconnection from the previous service arrangement. The previous service arrangement may be Verizon retail [service], [service to] another CLEC, etc. Connection and disconnection costs for the previous service arrangement are recovered from that service, *e.g.*, from retail charges, UNE recurring and nonrecurring rates, etc. The error in Verizon’s proposal becomes more apparent in a case where a CLEC orders a new service to a newly constructed residence or building. There would be no disconnection cost [in that instance] because there is no previous service to disconnect. Similarly, it is not appropriate for the CLEC to absorb jumper connection charges for a future service arrangement that replaces the CLEC service. For example consider a customer who obtains service from a CLEC for a period of time, then discontinues the service and moves. A new customer then arrives and orders retail service from Verizon. Under Verizon’s proposal the CLEC would have paid for the new jumper connection charges. The new retail customer would have paid for

---

<sup>46</sup> In other words, connection work time is counted once in the installation process and again in the disconnection process. Likewise, disconnection work time is counted once in the installation process and again in the disconnection process. This is illustrated in Exhibit Staff/18, Reynolds/3, lines 23-24, 27-28, and Reynolds/4, lines 23-24, 27-28. *See also*, diagram at Exhibit Staff/32.

<sup>47</sup> For purposes of the CZT functions, Verizon notes that it has adopted the work times used in Qwest’s nonrecurring cost studies. In addition, it assumes that only one distribution frame is used. Verizon Comments, August 15, 2002, pp. 8-9.

## ORDER NO. 03-085

connection costs, also, through recurring and nonrecurring charges.<sup>48</sup>

The Commission agrees with Staff on this issue. Specifically, we find that when Verizon receives an order from a CLEC to install a loop or port, it is improper for Verizon to charge the CLEC for jumper activity required to disconnect any existing service (*i.e.*, separating the loop from Verizon's port). As illustrated by Staff in Exhibit Staff/32, Step 2 – Disconnection,<sup>49</sup> these costs are already recovered in Verizon's retail charges. We noted this fact in Order No. 98-444:

Also, the ILEC may incur short jumper-related cost but have already recouped that cost. For example, where an ILEC customer migrates to a CLEC and the CLEC purchases building blocks to serve that customer, the ILECs cost of disconnecting that short jumper is included in the retail installation charge paid by the customer when ILEC service is established.<sup>50</sup>

It is also inappropriate to charge a CLEC to “return the loop to dial tone ready” status by reconnecting service (the jumper) from the loop to Verizon's port. This scenario is illustrated in Exhibit Staff/32, “Step 5—Connection to Verizon.” As in the situation described above, when a customer establishes service with Verizon, the costs of connection – including jumper costs – are already included in Verizon's retail charges.

### **Issue 6: Installation Flow Through**

For the reasons stated in our discussion of Qwest Issues 1a – 1c, the 98 percent flow through requirement applies only to nonrecurring service order processing activities performed by Qwest's ISC and ICSC and Verizon's NOMC.

### **Issue 7: Installation Labor Rates**

For the reasons stated in our discussion of Issue No. 3, we find that the labor rates authorized in Order Nos. 98-444 and 00-316 should be utilized, both for refunds and on a going-forward basis.

### **Issue 8: Loop Conditioning**

In Order No. 98-444, the Commission found that costs associated with loop conditioning<sup>51</sup> and other similar outside plant rearrangement activities are included

---

<sup>48</sup> Exhibit Staff/23, Reynolds/22-23. Staff emphasizes that, unlike Verizon, Qwest uses connection and disconnection times only once where a single distribution frame used.

<sup>49</sup> Exhibit Staff/32 is attached to this Order as Appendix C and is incorporated herein by reference.

<sup>50</sup> Order No. 98-444 at 86, footnote 194.

<sup>51</sup> Loop conditioning, or loop unloading, involves removing loading coils, bridge taps and other similar devices from the loop. Such devices diminish the loop's capacity to deliver advanced services, and thus preclude competitive carriers from gaining full use of the loop's capabilities. *Implementation of the Local Competition Provisions of the Telecommunications Act of 1996*, Third Report and Order and Fourth Further

## ORDER NO. 03-085

in the maintenance factors used to develop monthly recurring UNE rates. Thus, to prevent double recovery of those costs, we declined to adopt the NRCs proposed by Qwest and Verizon. Our findings on this issue were based upon testimony and evidence presented by Staff witness Jack Breen. As a matter of general policy, we also concluded that it is more reasonable to recover costs of outside plant activities such as loop conditioning, in recurring costs than to attempt to separately identify and assess NRCs for the many types of activities that take place.<sup>52</sup>

The Commission revisited this issue on reconsideration in Order No. 00-316. The ILECs claimed that Order No. 98-444 was contrary to the FCC's UNE Remand Order, which contemplates that the cost of conditioning loops may be recovered through NRCs. Upon review, we found that the UNE Remand Order did not preclude State commissions from requiring recovery of loop conditioning costs through recurring charges, and we again rejected the NRC proposed by Qwest and Verizon for line conditioning. Specifically, we found that the recommended \$597.61 per loop up-front charge constituted a barrier to competitive entry.

At the same time, Order No. 00-316 acknowledges that FCC Rule 507(e) allows requesting carriers to pay nonrecurring loop conditioning costs via installment payments over a reasonable time determined by the Commission.<sup>53</sup> Before considering such a proposal, however, we emphasized that it would first be necessary for the ILECs to remove loop conditioning costs from the maintenance factor included in the monthly recurring cost of the loop. Once those costs were removed, the Commission could then determine the length of time over which the nonrecurring loop conditioning costs should be collected. We also emphasized that the loop conditioning costs calculated by Qwest and Verizon would be subject to review and challenge by other parties.

Verizon's Phase III compliance filing includes a NRC for loop conditioning.<sup>54</sup> In calculating that NRC, however, Verizon did not present any documentation showing that it removed loop conditioning costs from the monthly recurring loop rate as required by Order No. 00-316. On the contrary, Verizon contends that the Commission erred when it concluded that loop conditioning costs are included in the maintenance factor used to develop the monthly recurring loop rate. In support of this claim, Verizon relies on testimony presented during the Phase I hearings by Qwest witness Don Mason. In the alternative, Verizon asserts that any loop conditioning costs included in recurring rates are *de minimis*. According to Verizon, cost studies presented

---

Notice of Proposed Rulemaking, CC Docket No. 96-98, FCC 99-328, (rel. Nov 5, 1999), ¶172. (hereafter, the "UNE Remand Order.")

<sup>52</sup> Order No. 98-444 at 93.

<sup>53</sup> For purposes of this discussion, it is important to note the difference between recurring costs recovered on a continuing basis through monthly charges and nonrecurring costs recovered over a time certain, *i.e.*, through installment-type payments. As noted, ILEC line conditioning costs are currently included in the monthly charges paid for UNEs. In Order No. 00-316, we held that, if line conditioning costs are instead to be recovered via installment-type payments, they must first be removed from the maintenance factor used to develop the recurring monthly loop cost.

<sup>54</sup> Qwest did not propose a loop conditioning NRC in Phase III.

ORDER NO. 03-085

in docket UM 773 disclose that loop conditioning costs comprise “less than one percent of the total recurring loop cost.”<sup>55</sup>

The Joint CLECs and Staff oppose Verizon’s proposed loop conditioning NRC. They contend that Verizon has not complied with Order Nos. 98-444 and 00-316 and further, that Verizon’s challenge to the evidentiary basis underlying those orders is untimely.

The Commission rejects Verizon’s proposed nonrecurring charge for loop conditioning. Order Nos. 98-444 and 00-316 clearly require Verizon to “first remove” costs associated with loop conditioning from monthly recurring costs before calculating the nonrecurring costs of loop conditioning. Verizon did not follow this directive.

In addition, we agree that Verizon’s attempt to challenge the Commission’s findings regarding loop conditioning is untimely. As the Staff and Joint CLECs emphasize, the Commission reexamined loop conditioning on reconsideration in Order No. 00-316. Verizon did not appeal that decision, and the time for doing so has now past.

ORS 756.068 authorizes the Commission to “rescind, suspend, or amend any order” at any time upon notice and an opportunity to be heard. Verizon suggests that such action is warranted based on Mr. Mason’s Phase I testimony and the data Verizon has extrapolated from docket UM 773. We disagree. Although Mr. Mason testified that Qwest’s maintenance factor did not include loop conditioning costs, his claim was contradicted by the more detailed analysis of Staff witness Breen adopted in Order Nos. 98-444 and 00-316.<sup>56</sup> Furthermore, Qwest subsequently acknowledged in its Phase I post-hearing briefs that Mr. Breen “was correct” when he testified that loop conditioning costs are included in the maintenance factor.<sup>57</sup> As we have emphasized, the purpose of Phase III is *to review compliance filings made in accordance with the Commission’s directives in Order Nos. 98-444 and 00-316*. It is not a forum to relitigate issues that have already been decided.

Verizon’s alternative rationale--that the Commission should rely upon information extrapolated from docket UM 773 to conclude that recurring loop rates should only be reduced by one percent to account for line conditioning costs-- is totally without merit. The speculative nature of Verizon’s claim does not warrant reopening the record and holding additional evidentiary hearings.<sup>58</sup>

<sup>55</sup> Verizon Comments, August 15, 2002, p. 12.

<sup>56</sup> For example, Mr. Breen identified the specific account where line conditioning costs are included. *See* Staff Exhibit 15, Breen/7. *See also*, Order No. 98-444 at 93-95; Order No. 00-316 at 16, 18.

<sup>57</sup> Qwest Phase I Opening Brief, March 17, 1998, p. 14; Qwest Phase I Reply Brief, March 31, 1998, p. 7; *See also*, Order No. 98-444 at 94.

<sup>58</sup> Verizon’s proposal would require, among other things, a comprehensive review of the UM 773 record, which alone comprises several thousand pages. Other parties would then be entitled to dispute Verizon’s claims, necessitating the filing of testimony and evidentiary hearings. An undertaking of this magnitude would result in a lengthy delay in the disposition of this matter.

## ORDER NO. 03-085

Verizon states that it will be forced to pay “unlawful refunds” if it is not permitted to assess a NRC for loop conditioning. In fact, it is the CLECs who will be prejudiced if Verizon is allowed to relitigate this issue. Despite the fact that the Commission rejected the ILECs’ proposed loop conditioning NRCs in Order No. 98-444, those charges have remained in effect on a “subject to refund” basis for more than five years. It would be manifestly unfair to the CLECs to defer the refunds of those charges while the loop conditioning issue is litigated once again, especially in view of the dubious justification Verizon has offered in support of its claim. Verizon is not prejudiced by this decision since it may always request the Commission revisit line conditioning issues in docket UM 874.

**Issue 10: Loop Facility Testing Charge**

Verizon proposes to charge a Loop Facility Testing NRC that would apply to additional, specialized testing when requested by a CLEC as part of an order for a loop UNE.<sup>59</sup> Qwest imposes similar NRCs for conformance testing and for coordinated installation with cooperative testing.

Staff states that a Loop Facility Testing NRC would allow CLECs to request additional specialized testing at a standardized rate without resorting to a “time and materials” charge. It agrees with Verizon’s proposed charge provided (a) it applies only when ordered by a CLEC as part of a Loop UNE order; (b) Commission-authorized labor rates are used, and; (c) Staff’s proposed technician travel time estimates are used. Verizon agrees with condition (a) but disagrees with (b) and (c).

The Joint CLECs do not address Verizon’s Loop Facility Testing NRC in their final comments, but stated previously that they oppose any charge that is significantly different than Qwest’s. To avoid a delay in the distribution of refunds, they suggest that Verizon’s proposed testing charge be considered in docket UM 874.

The Commission adopts the Staff position. Staff and Verizon concur that the Loop Facility Testing charge should only apply when it is part of a CLEC’s loop order. As for the two remaining issues, we have concluded that NRCs should incorporate the labor rates authorized in Order Nos. 98-444 and 00-316, as well as Staff’s proposed technician travel time estimates. *See Verizon Issues 3 and 4, supra.*

---

<sup>59</sup> Verizon previously proposed an Outside Facility Connection Charge (OFCC) that would apply whenever a technician was dispatched to an end user’s premises to provision a loop. The Commission rejected the OFCC in Order Nos. 98-444 and 00-316, concluding that the costs of these activities were already included in the Qwest loop recurring charges that had been adopted by Verizon. On June 24, 2002, Verizon filed a petition to modify Order No. 98-444 and the related ALJ Ruling dated February 19, 2001. After discussion, however, Verizon indicated that its proposed charge was actually intended to mirror the NRCs for conformance/cooperative testing assessed by Qwest. Verizon thereupon withdrew its petition, but sought consideration of the testing charge. On August 16, 2002, the ALJ ruled that Order No. 98-444 allowed Verizon’s proposed charge to be considered in Phase III. Verizon has since denominated its proposed testing charge the “Loop Facility Testing Charge.”

## ORDER NO. 03-085

The Joint CLECs are not harmed by this decision. Verizon's testing charge is designed to correspond with a similar charge already imposed by Qwest. We do not anticipate any delay in the issuance of refunds.

**Issues 13a and 13d: Refund Mechanics—Notice Timing; Deadline for CLECs to Dispute Refund Calculation**

Verizon and the Joint CLECs disagree over the amount of time Verizon should have to make refunds to CLECs after this order is entered. The Joint CLECs propose the same time frame agreed to with Qwest, *i.e.*, 90 business days. Verizon, on the other hand, proposes: (a) 90 calendar days for Verizon to provide the refund calculation, (b) no more than 90 calendar days for the CLEC to respond, and; (c) 45 calendar days for Verizon to provide the CLEC with a bill credit or check.

The Commission agrees with the Joint CLECs. Assuming that there are 22 business days each month, the Joint CLEC/Qwest agreement ensures that CLECs receive refunds in slightly more than four months, or approximately 120 days. Conversely, the refund process could take almost twice as long under Verizon's proposal. The Commission believes that four months is more than adequate time to calculate and distribute the refunds due in this proceeding.

**Issue 13h: Method of Refund Payments**

Verizon and the Joint CLECs disagree over the manner in which refunds should be provided where a CLEC has a current account.<sup>60</sup> Verizon proposes to provide a bill credit only. The Joint CLECs, on the other hand, argue that CLECs with a current account are also entitled to receive direct payment in the form of a check, wire transfer or other similar mechanism, regardless of the account balance, provided the account is not in arrears.

The Commission finds that CLECs with a current account should be allowed to receive refunds by bill credit or direct payment. Direct payment may be by check, wire transfer, or similar mechanism. At the same time, a CLEC should only be entitled to receive direct payment where the refund due exceeds the balance owing on the CLEC's account.<sup>61</sup> This approach is efficient and avoids potential errors that may result from having the parties engage in multiple transactions.

---

<sup>60</sup> Verizon and the Joint CLECs agree that where the CLEC does not have a current account and a refund is due, a check will be issued. The parties also agree to follow the bankruptcy code where applicable.

<sup>61</sup> Thus, if the refund due is \$100 and the account balance is \$50, the amount of the direct payment would be \$50.

ORDER NO. 03-085

**ORDER**

IT IS ORDERED that Qwest and Verizon shall submit revised nonrecurring costs and charges in compliance with the terms of this Order. The compliance filings shall be made no later than 30 days from the date this Order is entered.

Made, entered, and effective \_\_\_\_\_.

Commissioner

A party may request rehearing or reconsideration of this order pursuant to ORS 756.561. A request for rehearing or reconsideration must be filed with the Commission within 60 days of the service date of this order and must comply with the requirements in OAR 860-014-0095. A copy of any such request must also be served on each party to the proceeding as provided by OAR 860-013-0070(2). A party may appeal this order to a court pursuant to applicable law.

General Note: Changes in a party's position since the last filed comments are indicated by *strikethroughs* and *underlined text*. Both are in *boldface* type. A footnote provides further information on the source of the change.

<sup>1</sup> As directed by the ALJ at Clarifying hearing on Sept. 12, 2002, Staff and Verizon conducted a conference call on Sept. 17., 2002. ("Sept. 17 conference call.") Verizon explained to Staff's satisfaction that the Facility Assignment Center work activity for *disconnect order* was a component of Verizon's 1997 study. (Qwest did not show an equivalent entry.) Since Qwest showed no activity for *disconnection*, Verizon used the time for *connection* in its place, claiming that it was approximately the same.

## **DRAFT – 11-28-05**

**(This draft only reflects the “clean-up” changes made from the 11/22/05 and 11/23/05 calls. Started from Eschelon’s 11/4/05 version.)**

9.3.3.8.1 For those locations where CLEC is serving Customers, Qwest shall provide CLEC notice that an agreement has been reached with the building owner to move the Demarcation Point in the owner’s MTE to the minimum point of entry. The Qwest notice will provide the timeframe for when the Demarcation Point will be moved to the minimum point of entry. Qwest shall provide such notice within ten (10) business days after the agreement has been reached.

9.3.3.8.2 CLEC shall have the option of moving its service to the newly established Demarcation Point or negotiating with the building owner connecting to the wiring as previously provided. Qwest shall make the appropriate Billing adjustments as of the date a newly established Demarcation Point is active.

9.3.3.8.3 If CLEC elects to move its service to the new minimum point of entry, CLEC may either perform its own cross-connect or request that Qwest perform the cross-connect. If Qwest performs the cross-connect appropriate time and material charges are applicable.

**9.3.4 Detached Terminal Subloop Access General Terms**

9.3.4.1 With the exception of an MTE Terminal, Unbundled Subloop elements are accessed at an FCP through an accessible terminal. However, if power and/or heat dissipation are required, a Remote Collocation request should be submitted pursuant to Section 8 of this Agreement.

9.3.4.2 To the extent that the accessible terminal does not have adequate capacity to house the network interface associated with the FCP, Qwest will place the FCP in an adjacent terminal when Technically Feasible.

9.3.4.2.1 Reserved for Future Use.

**9.3.4.3 Field Connection Point**

9.3.4.3.1 Qwest is not required to build additional space for CLEC to access Subloop elements. When Technically Feasible, Qwest shall allow CLEC to construct its own structure adjacent to Qwest’s accessible terminal. CLEC shall obtain any necessary authorizations or rights of way required (which may include obtaining access to Qwest rights of way, pursuant to section 10.8 of this Agreement) and shall coordinate its facility placement with Qwest, when placing their facilities adjacent to Qwest facilities. Obstacles that CLEC may encounter from cities, counties, electric power companies, property owners and similar third parties, when it seeks to interconnect its equipment at Subloop access points, will be the responsibility of CLEC to resolve with the municipality, utility, property owner or other third party.

9.3.4.3.2 The optimum point and method to be determined during the FCP process. The obligation to interconnect in a manner that maintains reliability, and security.

9.3.4.3.3 CLEC must identify the size and location of the facility. It will be the responsibility of CLEC to resolve with the municipality, utility, property owner or other third party.

**EXHIBIT 25**

## Description of Eschelon Rate Proposals and Cost Model Changes Oregon

### Issues 22-90(b), 22-90(r) partial, and 22-90(s) partial

Issue #	Exhibit A Section	Rate Element	RATE PROPOSAL			
			Eschelon		Qwest	
			REC	NRC	REC	NRC
22-90(b)	8.1.1.2	Cable Augment Quote Preparation Fee		\$700.25		\$1,608.58
22-90(r) - partial	8.8.1	ICDF Collocation - Quote Preparation Fee		\$700.25		\$1,608.58
22-90(s) - partial	8.12.2	FC Collocation Engineering Fee, per Job		\$700.25		\$1,608.58

Qwest provided a cost study.

Eschelon averaged the approved rates in the other large Qwest states.

Section	Rate Element	RC/NRC	AZ	CO	MN	UT	WA	Average	OR Qwest Proposed
8.1.1.2	Cable Augment Quote Preparation Fee	NRC	\$ 345.00	\$ 1,055.50				\$ 700.25	\$ 1,608.58
8.8.1	Quote Preparation Fee	NRC	\$ 345.00	\$ 1,055.50				\$ 700.25	\$ 1,608.58

For 8.1.1.2 Eschelon's proposed rate in the issues matrix contained a typo and should read \$700.25 rather than \$700.00.

For 8.12.2 there are no Commission approved rates in other states. However, because Qwest's proposed interim rates are identical for these three rate elements, Eschelon's proposed interim rates are also the same for the three rate elements.

The Qwest-Qwest interconnection agreement<sup>1</sup> contains a rate of \$1,500 for quote preparation fees in general. The quote preparation / engineering fees for these three rate elements are typically less than the quote preparation fee for caged or cageless collocation. See issues 22-90(k) and 22-90(l).

### Issue 22-90(c)

Issue #	Exhibit A Section	Rate Element	RATE PROPOSAL			
			Eschelon		Qwest	
			REC	NRC	REC	NRC
22-90(c)	8.1.2.2	Cageless & Caged Standard Shared, per Fiber	\$4.14		\$5.92	
22-90(c)	8.1.2.3	Cross Connect, per Fiber	\$3.66		\$6.09	
22-90(c)	8.1.2.4	Express, per Cable	\$21.49	\$20,279.08	\$96.38	\$9,415.02

Qwest provided a cost study.

<sup>1</sup> Qwest Corporation (Qwest) has an interconnection agreement with its CLEC affiliate, Qwest Communications Corp. This agreement was approved by the Oregon Commission in Order 04-630 as part of Docket ARB 616, and is referred to in Eschelon's testimony and exhibits as the Qwest-Qwest Interconnection Agreement. The Commission approved a TRRO amendment to the Qwest-Qwest interconnection agreement on September 27, 2006 in Order 06-559.

Eschelon's proposed rates are from the current Eschelon-Qwest interconnection agreement.

For 8.1.2.4 Eschelon's proposed NRC is almost two times higher than the NRC proposed by Qwest, but the recurring charge is one quarter the size of the Qwest charge. For express fiber purchased under the current Eschelon-Qwest contract, Eschelon would have paid the higher NRC. It would be inappropriate for Qwest to now quadruple the recurring charge for this rate element as Eschelon did not have the benefit of the lower NRC.

### Issues 22-90(d) and 8-21(e)

Issue #	Exhibit A Section	Rate Element	RATE PROPOSAL			
			Eschelon		Qwest	
			REC	NRC	REC	NRC
8-21(e)	8.1.4.1.1	Power Plant, Less Than 60 Amps	\$9.20		\$11.95	
8-21(e)	8.1.4.1.2	Power Plant, Equal to or Greater Than 60 Amps	\$7.32		\$9.31	
22-90(d)	8.1.5.1.1	Backup AC Power Feed, 120V	\$17.13		\$19.98	
22-90(d)	8.1.5.1.2	208V, Single Phase	\$29.69		\$34.63	
22-90(d)	8.1.5.1.3	208V, Three Phase	\$51.37		\$59.92	
22-90(d)	8.1.5.1.4	240V, Single Phase	\$34.26		\$39.96	
22-90(d)	8.1.5.1.5	240V, Three Phase	\$59.27		\$69.13	
22-90(d)	8.1.5.1.6	480V, Three Phase	\$118.55		\$138.27	

Qwest provided a cost study.

Eschelon averaged the approved rates in the other large Qwest states.

Section	Rate Element	RC/NRC	AZ	CO	MN	UT	WA	Average	OR Qwest Proposed
8.1.4.1.1	Power Plant, Less Than 60 Amps	RC	\$ 10.75	\$ 9.22	\$ 4.93	\$ 11.78	\$9.34	\$ 9.20	\$11.95
8.1.4.1.2	Power Plant, Equal to 60 Amps	RC		\$7.22	\$ 4.93	\$ 7.79	\$9.34	\$ 7.32	\$9.31
8.1.4.1.2	Power Plant, Greater Than 60 Amps	RC		\$ 6.14	\$ 4.93	\$ 7.79	\$9.34	\$ 7.05	\$9.31
	Backup AC Power Feed, per Amp, per Month								
8.1.5.1.1	120 V	RC	\$15.48	\$18.72	\$16.13	\$17.39	\$17.94	\$ 17.13	\$19.98
