

ORDER NO. 08-543

ENTERED 11/12/08

**BEFORE THE PUBLIC UTILITY COMMISSION
OF OREGON**

UE 199

In the Matter of)	
)	
PACIFICORP, dba PACIFIC POWER,)	ORDER
)	
2009 Transition Adjustment Mechanism)	
Schedule 200, Cost-Based Supply Service.)	

DISPOSITION: STIPULATION ADOPTED

I. INTRODUCTION

On April 1, 2008, PacifiCorp, dba Pacific Power ("Pacific Power" or the "Company") filed revised tariff sheets for its 2009 Transition Adjustment Mechanism (TAM), to be effective January 1, 2009. The purpose of the TAM filing is to update Net Power Costs (NPC) to set transition adjustments for the Company's Oregon customers who may choose direct access service in the November 2008 open enrollment window.

Concurrently with its TAM application, Pacific Power filed its Renewable Adjustment Clause (RAC), docket UE 200. The subject matters of the two proceedings overlap in material aspects.

In its 2009 TAM filing, Pacific Power estimated total forecasted normalized system-wide NPC for the test period (12 months ending December 31, 2009) of about \$1.129 billion. That amount is approximately \$148.9 million higher than the \$980.2 million included in rates set in Pacific Power's 2008 TAM proceeding (Docket UE 191).

On an Oregon-allocated basis the amount was about \$41.2 million higher than the \$247.4 million NPC currently included in Pacific Power's Oregon rates. That amount would result in an overall increase its Oregon rates of about 4.4 percent.

On July 25, 2008, Pacific Power filed an update and corrections to its April 1, 2008 filing. The updates and corrections resulted in an increase in the Company's forecasted normalized NPC for the calendar year 2009 on an Oregon-allocated basis to \$304.3 million, an increase of \$15.7 million from the earlier filing.

ORDER NO. 08-543

The updated amount would result in an overall increase to Oregon rates of about 6 percent.

A prehearing conference was held on April 25, 2008 and a schedule adopted. The target date for a Commission decision was set for October 24, 2008.

Testimony was filed by Pacific Power, the Staff of the Public Utility Commission of Oregon (Staff), the Industrial Customers of Northwest Utilities (ICNU) and Sempra Energy Solutions LLC (Sempra).

The parties convened a settlement conference on August 15, 2008, and the settlement discussions continued on August 19, 2008. All parties participated in the settlement discussions. As a result of their settlement discussions, the parties reached a comprehensive settlement in this docket.

On September 4, 2008, the parties filed their Stipulation and joint testimony in support of the Stipulation. Parties to the Stipulation (Joint Parties) are Pacific Power, Staff, ICNU, Sempra and the Citizens' Utility Board of Oregon (CUB). On October 29, 2008, Pacific Power submitted an amended version of the Stipulation. The changes to the Stipulation are not substantive; the only changes are to the scheduled dates, reflecting a delay in the issuance of the final order in UE 200. The amended Stipulation is attached to this order. The parties' signatory pages to the original Stipulation are attached.

II. STIPULATION

The net effect of the settlement is to reduce Pacific Power's proposed increase in NPC from \$56.9 million to \$34.2 million (on an Oregon-allocated basis). That amount will be updated for certain NPC elements on November 7, 2008, and November 14, 2008, with a contract "lock-down" date of November 1, 2008. For rate design purposes, the final NPC will be decreased by \$10.2 million to account for increased revenues due to forecast sales growth from 2007 to 2009. The resulting rate increase is expected to be about 2.4 percent. The effective date of the new rates will be January 1, 2009.

Attached to the Stipulation are exhibits that show the calculation of: the NPC increase (Exhibit A); the rate spread (Exhibit B); the adjustment for sales growth (Exhibit C); and the 2009 energy forecast by rate schedule (Exhibit D).

The Joint Parties propose to spread the rate increase to each rate schedule, based on the ratio of each schedule's present Schedule 200 (Cost-Based Supply Service) revenues to total Schedule 200 present revenues. The TAM Adjustment Rates in cents per kilowatt hour will be calculated by dividing each rate schedule's total allocated TAM Revenue Adjustment by the forecast 2009 energy for that rate schedule.

ORDER NO. 08-543

The November Updates include the following:

- a. The Company will update its NPC on November 7, 2008, for (1) the September 30, 2008, forward price curve for electricity and natural gas; and (2) contracts executed on or before November 1, 2008. (Such contracts include long-term and short-term wholesale electric contracts and natural gas supply contracts.)
- b. The Company will update its NPC on November 14, 2008, using the forward price curve for electricity and natural gas prices developed on November 4, 2008. The Company will use the new forward price curve to reshape hydro energy in its Generation and Regulation Initiatives Decision Tools (GRID) model.

The Joint Parties agree there is no cap on the November Updates.

The Joint Parties agree to defer the resolution of certain issues related to Pacific Power's Glenrock and Rolling Hills wind resources to the RAC proceeding (UE 200). Although Pacific Power objects to any such adjustment, the Joint Parties understand that the Commission may order in the RAC proceeding that the capacity factors or generation profiles be changed through an NPC adjustment in this proceeding in the November updates.

The Joint Parties agree that the Seven Mile Hill II and Glenrock III wind resources will remain in the NPC dispatch stack for purposes of calculating the November 2008 TAM updates. The Joint Parties further agree that the Company will exclude the non-NPC related costs of these two resources from the RAC for 2009. Pacific Power will file deferral applications, such that the deferral will be effective January 1, 2009, or when the resource is on line, whichever comes later.

Pacific Power agrees to not file for deferred accounting for 2009 for the fixed costs of either the Chehalis or Lake Side power plants. The Joint Parties agree that the Chehalis power plant should not be reflected in the Company's November updates.

The Joint Parties agree to modify the calculation of the Transition Adjustment for direct access in two ways: (1) Pacific Power will relax the market cap limitations in the GRID model by 15 MW at Mid-Columbia and 10 MW at COB to determine the value of the freed-up power; and (2) any remaining monthly thermal generation that is backed down for assumed direct access load will be priced at the simple monthly average of the COB price, the Mid-Columbia price, and the avoided cost of thermal generation as determined by GRID.

The Joint Parties agree that any party may raise the issue of forced outage rates for hydroelectric generating units in Docket UM 1355. If the Commission has not resolved this issue prior to Pacific Power filing its next general rate case, the Company will raise the issue in its rate case.

ORDER NO. 08-543

The Stipulation includes provisions relating to certain elements in Pacific Power's future TAM proceedings. If the parties cannot agree regarding the elements of TAM updates, revenue growth adjustments, and filing requirements, Pacific Power will initiate a proceeding before the Commission to resolve issues.

Pacific Power agrees to provide access to its GRID model to parties who enter into a confidentiality agreement or are subject to a protective order.

Pacific Power commits itself to provide workpapers for its original TAM filing and updates. Pacific Power agrees to provide parties a "forty-year hydro data set" applicable to the test year in the TAM proceeding and the data necessary to calculate forced outages using a weekday/weekend split.

III. DISCUSSION

In their testimony, the Joint Parties explain and defend the terms of their Stipulation. They identify issues not resolved in the Stipulation, including issues deferred to Docket UE 200, the RAC proceeding. They explain the November 2008 update factors and how the deferred issues will be accounted for in the November updates. They describe their proposed rate design and set out their intentions for future TAM proceedings.

As noted by the Joint Parties, in its filings Pacific Power requested an increase of about \$56.9 million. In their Stipulation, the Joint Parties agree to a nominal increase of \$34.2 million, to be adjusted downward by \$10.2 million to reflect load growth. They do not explain what adjustments were made to reach the amount of their proposed increase.

The difference in the amount requested by Pacific Power and the amount adopted by the Joint Parties in their Stipulation is \$22.7 million, with the additional \$10.2 million to account for load growth. In their joint testimony the Joint Parties do not address the derivation of these figures.

In its direct testimony, Staff proposed to reduce Pacific Power's request by \$18.4 million, including a reduction of \$12.6 million to account for customer load growth. In its surrebuttal testimony, Staff proposed to increase one of its proposed adjustments by about \$920 thousand.

Staff's proposed adjustments included the following:

- (1) A reduction of \$12,566,029 to account for load growth;
- (2) A reduction of \$524,595 to account for changes in net ancillary service revenue;

ORDER NO. 08-543

(3) A reduction of \$623,477 to account for increased revenue associated with the Little Mountain gas facility steam sales;

(4) A reduction of \$189,093 for the wind integration charge associated with the Pacific Power wind storage contracts;

(5) A reduction of \$800,605 for the wind integration charge associated with Pacific Power owned wind facilities;

(6) A reduction of \$2,922,698 to account for the new forced outage rate methodology for hydro facilities; and

(7) A reduction of \$789,034 to account for a change in capacity factor for the Rolling Hills wind generation project.

In its rebuttal testimony Staff proposed to increase the Rolling Hills capacity factor adjustment to \$1.7 million, “taking into account [Pacific Power’s] updated GRID model.”

In its direct testimony, ICNU proposed 19 adjustments to Pacific Power’s GRID study. ICNU found that Pacific Power had overstated its total company NPC by \$55.7 million and recommended a reduction in the allocation to Oregon of \$12.8 million. ICNU proposed an additional reduction of \$12.6 million to account for load growth.

In its direct testimony, Sempra addresses the calculation of the Transition Adjustment as applied to Pacific Power’s Schedules 294 (Transition Adjustment) and 295 (Transition Adjustment Opt Out). Sempra recommends that the Commission direct Pacific Power to calculate the Schedules 294 and 295 adjustments “in a manner that applies market prices to all megawatt-hours associated with the decrement of direct access load being evaluated.

The adjustment for load growth (\$10.2 million) is less than the \$12.6 million proposed by Staff and ICNU, but well within the range of reasonable outcomes for settling such an issue. We approve this provision of the Stipulation.

In all other respects the terms of the Stipulation explain and improve the TAM process. The stipulation is in the public interest and should be approved.

ORDER

IT IS ORDERED that:

1. Advice No. 08-006, filed by PacifiCorp, dba Pacific Power, on April 1, 2008, is permanently suspended.
2. The Stipulation, as amended by and between PacifiCorp, dba Pacific Power, the Public Utility of Oregon Commission Staff, the Industrial Customers of Northwest Utilities, Semptra Energy LLC and the Citizens' Utility Board of Oregon, is approved and is attached as Appendix A.
3. Pacific Power shall update its net power costs (NPC) to reflect the provisions of the Stipulation to establish its Transition Adjustment Mechanism NPC for the calendar year 2009, to tariffs to be effective January 1, 2009.

Made, entered, and effective NOV 12 2008.

Commissioner

A party may request rehearing or reconsideration of this order pursuant to ORS 756.561. A request for rehearing or reconsideration must be filed with the Commission within 60 days of the date of service of this order. The request must comply with the requirements in OAR 860-014-0095. A copy of any such request must also be served on each party to the proceeding as provided by OAR 860-013-0070(2). A party may appeal this order by filing a petition for review with the Court of Appeals in compliance with ORS 183.480-183.484.

**BEFORE THE PUBLIC UTILITY COMMISSION
OF OREGON**

UE 199

In the Matter of:

AMENDED STIPULATION

PACIFICORP, dba PACIFIC POWER
2009 Transition Adjustment Mechanism
Schedule 200, Cost-Based Supply Service

This Stipulation is entered into for the purpose of resolving the issues among the parties to this Stipulation related to PacifiCorp's (or the "Company") proposed transition adjustment mechanism ("TAM") for direct access that updates the Company's net power costs ("NPC") in rates. The Stipulation also addresses certain issues in the Company's Renewable Adjustment Clause ("RAC") case, Docket No. UE 200.

PARTIES

1. The parties to this Stipulation are PacifiCorp, Staff of the Public Utility Commission of Oregon ("Staff"), the Citizens' Utility Board ("CUB"), the Industrial Customers of Northwest Utilities ("ICNU"), and Sempra Energy Solutions LLC ("Sempra") (together, the "Parties").

BACKGROUND

2. On April 1, 2008, PacifiCorp filed revised tariff sheets for Schedule 200: PacifiCorp's 2009 Transition Adjustment Mechanism, to be effective January 1, 2009. The purpose of the TAM filing is to update NPC for 2009 and to set transition adjustments for Oregon customers who choose direct access in the November 2008 open enrollment window. The Company's RAC was filed concurrently with the TAM filing.

3. The April 1, 2008 TAM filing reflected total forecasted normalized system-wide NPC for the test period (12 months ended December 31, 2009) of approximately \$1.129 billion. This amount is approximately \$148.9 million higher than the \$980.2 million included in rates through the 2008 TAM (Docket UE 191). On an Oregon-allocated basis, the forecasted

1 normalized NPC for 2009 are approximately \$288.6 million. This is approximately
2 \$41.2 million higher than the \$247.4 million NPC currently included in Oregon rates. This
3 amount would result in an overall increase to Oregon rates of approximately 4.4 percent.

4 4. On July 25, 2008, the Company filed an update and corrections to the April 1,
5 2008 filing. The updates and corrections increased the Company's forecasted normalized
6 NPC for the calendar year 2009 on an Oregon-allocated basis to \$304.3 million. This reflects
7 an increase of \$15.7 million from the April filing of \$288.6 million. This updated amount would
8 result in an overall increase to Oregon rates of approximately 6 percent.

9 5. The Parties convened a settlement conference on August 15, 2008. The Parties
10 continued the settlement conference via conference call on August 19, 2008. All parties to the
11 docket participated in the settlement conferences.

12 AGREEMENT

13 6. As a result of the settlement conferences, the Parties have reached a
14 comprehensive settlement in this case. The net effect of the Stipulation reduces PacifiCorp's
15 proposed increase in NPC to \$34,216,174 on an Oregon-allocated basis. This amount will be
16 updated for the NPC elements described in this Stipulation on November 21, 2008, and
17 December 2, 2008, with a contract lock-down date of November 14, 2008 (collectively the
18 "November/December Updates.") For purposes of designing rates, the final increase to NPC
19 will be decreased by \$10,216,174 to account for increased revenues due to forecast sales
20 growth from 2007 to 2009. The overall rate increase prior to the November/December
21 Updates resulting from this Stipulation is expected to be approximately 2.4 percent. The
22 Parties retain all procedural and substantive rights to challenge the November/December
23 Updates in the compliance filing in the proceeding. The effective date of the new rates will be
24 January 1, 2009.

25 7. The Parties agree to submit this Stipulation to the Commission and request that
26 the Commission approve the Stipulation as presented. The Parties agree that the

1 adjustments and the rates resulting from their application are sufficient, fair, just, and
2 reasonable.

3 8. Exhibit A to this Stipulation contains the calculation that will be used to determine
4 the NPC increase in this docket, the Total Company NPC approved in this docket, and the
5 Oregon-allocated NPC baseline in rates resulting from this docket. Exhibit B shows the
6 calculation that will be used to determine the spread of the stipulated rate increase to rate
7 schedules and to determine the TAM rate adjustments by rate schedule. Exhibit C shows the
8 calculation of the adjustment for revenues resulting from sales growth. Exhibit D shows the
9 calculation that was used to determine the 2009 energy forecast by schedule and the
10 Schedule 200 present revenues.

11 9. Calculation of NPC Increase and Baselines: The Parties agree to a TAM NPC
12 increase for 2009 that is calculated as described below and as shown in Exhibit A to this
13 Stipulation:

14 **Step One:** Calculate the Adjusted Oregon-allocated NPC Baseline in Rates for the July 2008
15 TAM filing by adding \$34,216,174 to the Oregon-allocated NPC Baseline in Rates from UE
16 191 of \$247,421,525 to obtain the Adjusted Oregon-allocated NPC Baseline in Rates of
17 \$281,637,699.

18 **Step Two:** Calculate the Final Oregon-allocated NPC Increase and 2009 Baseline in Rates:
19 Using the December 2, 2008 Update, calculate the difference between the November Oregon-
20 allocated NPC and the July 2008 Oregon allocated NPC. Add this difference (either positive
21 or negative) to the stipulated \$34,216,174 increase. The result is the Final Oregon-allocated
22 NPC Increase. Next, add the difference to the Adjusted Oregon-allocated NPC Baseline in
23 Rates of \$281,637,699 to obtain the Final Oregon-allocated 2009 NPC Baseline in Rates.
24 The Final Oregon-allocated 2009 NPC Baseline in Rates will be compared against the 2010
25 Oregon-allocated NPC Baseline in Rates to determine the NPC increase/decrease in the 2010
26 TAM proceeding.

1 Nothing in this paragraph shall be construed as eliminating the need for an adjustment to
2 the 2010 NPC increase/decrease to capture the effects of revenues resulting from sales
3 growth if the 2010 TAM proceeding is filed outside of a general rate case proceeding.

4 10. Adjustment for Revenues Resulting from Sales Growth: The Parties agree that
5 the Final Oregon-allocated NPC Increase will be reduced by \$10,216,174 as shown on Exhibit
6 B. This adjustment is computed as shown in Exhibit C.

7 11. Revenue Allocation and Rate Design: The Parties agree that the Final Oregon-
8 allocated NPC Increase and the adjustment for revenues resulting from sales growth will be
9 spread to rate schedules through changes to Schedule 200 rates and the adjustments to
10 Schedule 200 rates (TAM Adjustment Rates) will be calculated based on a forecast 2009 rate
11 design test year. The 2009 forecast energy by rate schedule is shown in column 3 of Exhibit
12 B and was determined by spreading the 2009 forecast energy (MWh) by class to each rate
13 schedule by class, voltage level, and rate tier based on the forecast 2007 billing determinants
14 from the last general rate case, Docket UE 179. This calculation is shown in Exhibit D and
15 summarized in column 3 of Exhibit B. The 2009 forecast energy by schedule has been
16 multiplied by the present Schedule 200 rates to calculate the present Schedule 200 revenues.
17 This calculation is shown in Exhibit D and summarized in column 4 of Exhibit B. The Final
18 Oregon-allocated NPC Increase and the agreed adjustment for revenues resulting from sales
19 growth of (\$10,216,174) will be spread to each schedule based on the ratio of each schedule's
20 present Schedule 200 revenues to total Schedule 200 present revenues. Columns 5, 6, and 7
21 of Exhibit B show the spread of these three elements. Column 6 currently shows a zero
22 adjustment, but will be updated with the November/December Updates. The three revenue
23 elements will then be added by rate schedule to obtain a total TAM Revenue Adjustment by
24 rate schedule. The TAM Adjustment Rates in cents per kilowatt-hour will then be calculated
25 by dividing each schedule's total TAM Revenue Adjustment by the forecast 2009 energy for
26 that rate schedule. This process is shown in Exhibit B, although the rates in the Exhibit are

1 not final and are subject to change with the November/December Updates as set forth in this
2 Stipulation. The final TAM adjustment rates calculated including the November/December
3 Updates will be added to the present Schedule 200 rates to arrive at the final Schedule 200
4 rates for this docket.

5 12. Scope of November/December Updates:

6 a. The Company will update its NPC on November 21, 2008, for only: (1)
7 the November 4, 2008 forward price curve for electricity and natural gas; and (2) contracts
8 executed on or before November 14, 2008. These contracts include: (a) wholesale electric
9 sales and purchase contracts that are for long term firm sales and purchases, short term firm
10 sales and purchases, or exchanges and storage with and without energy or capacity prices;
11 and (b) natural gas sales and purchases contracts. These transactions may have fixed prices
12 or prices linked to market indexes. They may require physical deliveries or be settled
13 financially (e.g., swaps).

14 b. The Company will update its NPC on December 2, 2008 using the
15 forward price curve for electricity and natural gas prices developed on November 17, 2008.
16 The Company will reshape hydro energy in the GRID model resulting from the use of the new
17 forward price curve. The Company agrees to provide work papers and other documentation
18 supporting the changes to GRID inputs resulting from the forward price curve comparable to
19 those provided for the July update, with the additional detail provided in the response to Staff
20 on-site data request 1 for electric swaps.

21 c. The amount of the November/December Updates may be positive or
22 negative, depending on whether the November/December Updates result in an increase or
23 decrease to NPC. The Parties agree that there is no cap on the November/December
24 Updates. The Parties reserve their rights to challenge: (1) the forward price curve for
25 electricity and natural gas developed on November 17, 2008; (2) new contracts included in the
26

1 November/December Updates; and 3) whether any updates are consistent with this
2 Stipulation.

3 d. PacifiCorp agrees to provide information on new contracts that will be
4 included in the November/December Updates as soon as practical after execution. The
5 Company will track the contracts and produce them in groups as their total number or value
6 become material. For short-term firm contracts, the Company agrees to provide detail
7 comparable to the first supplemental response to ICNU data request No. 18.24.

8 13. Wind Resource-related Issues:

9 a. The Parties agree to litigate the adjustments associated with the Rolling
10 Hills and Glenrock resources in the RAC proceeding. Although PacifiCorp objects to such an
11 adjustment, the Parties understand that the Commission may order in the RAC proceeding
12 that the capacity factors or generation profiles be changed through an NPC adjustment in this
13 proceeding in the November/December Updates. The Parties agree that the only capacity
14 factors and generation profiles or both that are subject to the November/December Updates
15 are those ordered by the Commission. The Parties agree they will not further advocate for
16 updates to the 2009 TAM for capacity factors or generation profiles of other wind resources.

17 b. The Parties agree that the Seven Mile Hill II and Glenrock III resources
18 will remain in the NPC dispatch stack for purposes of calculating the November 2008 TAM
19 updates. The Parties further agree that the Company will exclude the non-NPC related costs
20 of these two resources from the RAC for 2009. The Parties agree that PacifiCorp may
21 request and no party will oppose deferred accounting for each resource. PacifiCorp will file
22 deferral applications such that the deferral would be effective January 1, 2009 or when the
23 resource is on line, whichever comes later. The applications would request deferral of (1) the
24 revenue requirement associated with the non-NPC related costs of the resource and (2) the
25 decrease to NPC that is associated with the resource as reflected in the November/December
26 Updates. The decrease to NPC would be reflected in the deferral so that the Company could

1 later seek to recover the associated NPC decrease included in the 2009 TAM should the
2 Commission later disallow costs of the resource in a prudence determination. No Party
3 waives any arguments or rights during the amortization phase of such deferred accounting.

4 14. Deferral Applications for Lake Side and Chehalis: The Company agrees to not
5 file for deferred accounting for 2009 for the fixed costs of either the Lake Side power plant or
6 the Chehalis power plant or both. Likewise, the Parties agree that the Chehalis power plant
7 should not be reflected in the Company's November/December Updates.

8 15. Transition Adjustment: The Parties agree to modify the calculation of the
9 Transition Adjustment for direct access in two ways: (1) the Company will relax the market
10 cap limitations in the GRID model by 15 MW at Mid-Columbia and 10 MW at COB to
11 determine the value of the freed up power; and (2) any remaining monthly thermal generation
12 that is backed down for assumed direct access load will be priced at the simple monthly
13 average of the COB price, the Mid-Columbia price, and the avoided cost of thermal generation
14 as determined by GRID. The monthly COB and Mid-Columbia prices will be applied to the
15 heavy load hours or light load hours separately. The existing balancing account mechanisms
16 will remain in effect.

17 16. Hydro Forced Outage Rate: Any Party may raise the issue of forced outage
18 rates for hydroelectric generating units in Docket UM 1355. If the Commission has not
19 resolved this issue prior to the Company's filing of its next general rate case, the Company will
20 raise the issue in the rate case.

21 17. Future Stand-alone TAM Filings:

22 a. Adjustment for Revenue Growth: The Company agrees that its future
23 stand-alone TAM filings should be designed to recover the Company's Oregon-allocated NPC,
24 including consideration of increased/decreased revenues due to load growth/loss.

25 b. Workshops: PacifiCorp will convene a series of workshops prior to filing
26 its next general rate case in Oregon for the purpose of seeking consensus on the specific

elements of any future TAM proceeding including, but not limited to, cost elements to be included in the initial filing and each update, filing requirements for the content and timing of workpapers, and the mechanism for implementing Section 18.a above. These workshops will be convened to provide sufficient time for the Company to consider incorporating recommendations into its next general rate case filing. PacifiCorp agrees that if the Parties cannot reach consensus on the elements of TAM updates, revenue growth adjustments, and filing requirements in the workshops, the Company will initiate a proceeding before the Commission to resolve these issues. The Company will initiate this proceeding by January 15, 2009 to provide the Commission the ability to resolve the proceeding prior to June 1, 2009, or in time to be implemented in the Company's first update for the 2010 TAM.

c. GRID Model: The Company will provide access to the GRID model to Parties when it makes its initial TAM filing or general rate case, provided that the Party has entered into a confidentiality agreement with the Company applicable to the GRID model or is subject to a Protective Order applicable to the relevant TAM proceeding or general rate case.

d. Workpapers: The Company commits to providing workpapers for its original TAM and updates. These workpapers will include all input files the Company relied upon in preparing the final GRID run used in the filing. The Parties will endeavor to define this concept with more specificity in the TAM workshops. The Company agrees to provide Staff and intervenors that have executed a relevant confidentiality agreement with the Company or are subject to a relevant Commission Protective Order with the following data that the Company has used in proceedings in other states: a forty-year hydro data set applicable to the test year in the TAM proceeding and the data necessary to calculate forced outages using a weekday/weekend split. The Company's agreement to provide this data does not imply its agreement to adjustments proposed by Staff or intervenors relying upon this data.

18. Tariff: Upon approval of this Stipulation and after the Company files its November/December Updates, PacifiCorp will file revised Schedule 200 rates and revised

1 transition adjustment Schedules 294 and 295 as a compliance filing in Docket UE 199,
2 effective January 1, 2009, reflecting rates designed as agreed in this Stipulation.

3 19. This Stipulation will be offered into the record of this proceeding as evidence
4 pursuant to OAR 860-014-0085. The Parties agree to support this Stipulation throughout this
5 proceeding and any appeal, (if necessary) provide witnesses to sponsor this Stipulation at the
6 hearing, and recommend that the Commission issue an order adopting the settlements
7 contained herein.

8 20. If this Stipulation is challenged by any other party to this proceeding, the Parties
9 agree that they will continue to support the Commission's adoption of the terms of this
10 Stipulation. The Parties agree to cooperate in cross-examination and put on such a case as
11 they deem appropriate to respond fully to the issues presented, which may include raising
12 issues that are incorporated in the settlements embodied in this Stipulation.

13 21. The Parties have negotiated this Stipulation as an integrated document. If the
14 Commission rejects all or any material portion of this Stipulation or imposes additional material
15 conditions in approving this Stipulation, any Party disadvantaged by such action shall have the
16 rights provided in OAR 860-014-0085 and shall be entitled to seek reconsideration or appeal
17 of the Commission's Order.

18 22. By entering into this Stipulation, no Party shall be deemed to have approved,
19 admitted, or consented to the facts, principles, methods, or theories employed by any other
20 Party in arriving at the terms of this Stipulation, other than those specifically identified in the
21 body of this Stipulation. No Party shall be deemed to have agreed that any provision of this
22 Stipulation is appropriate for resolving issues in any other proceeding, except as specifically
23 identified in this Stipulation.

24 23. This Stipulation may be executed in counterparts and each signed counterpart
25 shall constitute an original document.

26

This Stipulation is entered into by each party on the date entered below such Party's
signature.

UE-207/PacifiCorp
June 19, 2009
Sempra 1st Set Data Request 1.1

Sempra Data Request 1.1

Please refer to the following excerpt from Section 15 of the Stipulation dated September 4, 2008 in UE-199:

Transition Adjustment: The Parties agree to modify the calculation of the Transition Adjustment for direct access in two ways: (1) the Company will relax the market cap limitation in the GRID model by 15 MW at Mid-Columbia and 10 MW at COB to determine the value of the freed up power; and (2) any remaining monthly thermal generation that is backed down for assumed direct access load will be priced at the simple monthly average of the COB price, the Mid-Columbia price, and the avoided cost of thermal generation as determined by GRID. The monthly COB and Mid-Columbia prices will be applied to the heavy load hours or light load hours separately.

- a. Has PPL used the calculation described above in calculating the Sample Schedule 294 Transition Adjustments for Schedules 30 and 48 filed in UE-207?
- b. If so, please identify where in the workpapers this calculation occurs.
- c. If not: (i) Please explain the basis for not using the methodology developed as part of the resolution of UE-199, and (ii) Please provide a calculation of the Sample Schedule 294 Transition Adjustments for Schedules 30 and 48 using the methodology developed in UE-199 described above.

Response to Sempra Data Request 1.1

- a. Yes.
- b. Please refer to TAM Support Set 2 1st Supplemental, Attachment Non-Confidential Workpapers 1st Supplemental, which provides a supplement to workpaper "L." Four of the files within this set of workpapers are net power cost reports for Schedules 30 and 48, HLH and LLH. The "Analysis" tab shows the calculation of the transition adjustments.

Sempra Data Request 1

Section 15a of the Settlement Agreement dated September 25, 2009 in Docket UE-207 states that:

Transition adjustments in Schedules 294 and 295 will be calculated based on the Final Update and consistent with the modifications to the calculation described in Section 15 of the Stipulation adopted by the Commission in Order No. 08-543 in Docket UE 199.

Section 15 of the Stipulation dated September 4, 2008 in UE-199 states:

The Parties agree to modify the calculation of the Transition Adjustment for direct access in two ways: (1) the Company will relax the market cap limitation in the GRID model by 15 MW at Mid-Columbia and 10 MW at COB to determine the value of the freed up power; and (2) any remaining monthly thermal generation that is backed down for assumed direct access load will be priced at the simple monthly average of the COB price, the Mid-Columbia price, and the avoided cost of thermal generation as determined by GRID. The monthly COB and Mid-Columbia prices will be applied to the heavy load hours or light load hours separately.

- (a) Has PPL used the calculation described above in calculating the Sample Schedule 294 Transition Adjustments for Schedules 30 and 48 filed in UE-216?
- (b) If not: (i) Please explain the basis for not using the methodology developed as part of the resolution of UE-199 and UE-207, and (ii) Please provide a calculation of the Sample Schedule 294 Transition Adjustments for Schedules 30 and 48 using the methodology developed in UE-199 described above.

Response to Sempra Data Request 1

Yes, the calculation described above was used in calculating the Sample Schedule 294 Transition Adjustments for Schedules 30 and 48 filed in UE-216.

NAES Data Request 2

Section 15a of the Settlement Agreement dated September 25, 2009 in Docket UE-207 states that:

Transition adjustments in Schedules 294 and 295 will be calculated based on the Final Update and consistent with the modifications to the calculation described in Section 15 of the Stipulation adopted by the Commission in Order No. 08-543 in Docket UE 199.

Section 15 of the Stipulation dated September 4, 2008 in UE-199 states:

The Parties agree to modify the calculation of the Transition Adjustment for direct access in two ways: (1) the Company will relax the market cap limitation in the GRID model by 15 MW at Mid-Columbia and 10 MW at COB to determine the value of the freed up power; and (2) any remaining monthly thermal generation that is backed down for assumed direct access load will be priced at the simple monthly average of the COB price, the Mid-Columbia price, and the avoided cost of thermal generation as determined by GRID. The monthly COB and Mid- Columbia prices will be applied to the heavy load hours or light load hours separately.

(a) In UE-216, PPL indicated that the Company used the calculation described above in calculating the Sample Schedule 294 Transition Adjustments for Schedules 30 and 48. Is this also true for the Sample Schedule 294 Transition Adjustments filed in this docket, UE-227?

(b) If not: (i) Please explain the basis for not using the methodology developed as part of the resolution of UE-199 and UE-207, and (ii) Please provide a calculation of the Sample Schedule 294 Transition Adjustments for Schedules 30 and 48 using the methodology used in UE-216 described above.

Response to NAES Data Request 2

(a) Yes. Please refer to the Company's Response to TAM Support 2nd Set Data M.

(b) Please refer to (a) above.

NAES Data Request 2.4

Please identify the projected load growth for PacifiCorp on a system-wide and Oregon jurisdictional basis for the period during which the 2013 TAM rates will be in effect. Are PacifiCorp's loads currently growing? Please explain and identify the location in PacifiCorp's filing containing load projections.

Response to NAES Data Request 2.4

PacifiCorp's sales are continuing to grow. PacifiCorp 2013 retail sales are expected to be approximately 1.6 percent higher than its 2011 weather normalized sales. PacifiCorp's Oregon 2013 retail sales are expected to be approximately 1.0 percent higher than 2011 weather normalized sales. Please refer to Attachment NAES 2.4, which provides the load forecast workpapers accompanying the testimony of Company witness, Mr. Gregory N. Duvall prepared for the Oregon general rate case proceeding (Docket UE 246).

NAES Data Request 2.10

In 2010 or 2011, did PacifiCorp re-direct or otherwise change the point of delivery for any transmission rights from Mid-C identified in Response to Request No. 2.2? If yes, please identify the MW and term (i.e. duration) of the re-direct transactions.

Response to NAES Data Request 2.10

Yes. PacifiCorp made long-term changes to the point of delivery on Mid-Columbia transmission rights on three occasions:

- Starting December 1, 2010, PacifiCorp redirected 6 MW of capacity on path Mid-Columbia to Midway 230 kV (Yakima) to new path of Mid-Columbia to Napavine 500 kV (Chehalis) through October 31, 2015.
- Starting June 1, 2011, PacifiCorp redirected 75 MW of capacity on path Mid-Columbia to Yamsay 230 kV (Southern Oregon) to new path of Mid-Columbia to Foster 115 kV (Willamette Valley) through October 31, 2014.
- Starting June 1, 2011, PacifiCorp redirected 10 MW of capacity on path Mid-Columbia to Yamsay 230 kV (Southern Oregon) to new path Mid-Columbia to Troutdale 230 kV (Portland) through October 31, 2014.
