Re: UG 305 - In the Matter of CASCADE NATURAL GAS CORPORATION, Request for a General Rate Revision

Attention Filing Center:

Attached for filing in docket UG 305 is an electronic copy of Cascade Natural Gas Corporation's Reply Testimony of Michael Parvinen, Anne M. Jones, Donna Genora, Tammy Nygard, Mark Chiles, Richard Amen, and Jennifer F. Gross. Since this is a document over 100+ pages, a copy is being sent via Federal Express.

Please contact this office with any questions.

Very truly yours, 1QXV

Sharon Cooper Legal Assistant

Q. Are any other Cascade witnesses providing reply testimony?

2 Yes. Anne Jones responds to Staff of the Public Utilities Commission (Staff) witness Α. 3 Marianne Gardner and Citizens Utility Board of Oregon (CUB) witness Bob Jenks regarding wages and salaries. Specifically, Ms. Jones discusses the Company's 4 approach to establishing base wages and wage increases to support the Company's 5 proposed level of wages and salaries. Donna Genora will address Ms. Gardner's 6 7 proposed Accumulated Deferred Income Tax (ADIT) adjustment, particularly as it relates 8 to bonus depreciation. This is identified as Issue 11 in the chart below. Tammy Nygard and Mark Chiles respond to Staff witness Lance Kaufman's adjustments regarding inter-9 10 company cost allocations. This is identified as Issue 12 in the chart below. Ron Amen 11 will address the cost of service/rate spread/rate design alternatives and recommendations sponsored by Staff witness George Compton, CUB witness Bob 12 Jenks, and NWIGU witness Michael Gorman. Finally, Jennifer Gross will address the 13 Housekeeping Tariff testimony sponsored by Staff witness Scott Shearer. 14 15 Q. Please summarize your testimony. 16 Α. In my testimony I support a revised revenue requirement increase of \$988,093, as

compared to our originally-proposed increase of \$1,906,285.¹ The revised revenue

18 requirement is shown in the chart below.

| 1 | | II. DESCRIPTION OF PARTIAL SETTLEMENT BY ALL PARTIES |
|----|----|--|
| 2 | Q. | Have the parties agreed to settle any of the issues in this case? |
| 3 | Α. | Yes. On August 17, 2016, the parties held the first settlement conference in this docket. At that |
| 4 | | time, the parties agreed to settle many of the issues raised by Staff and Intervenor testimony, |
| 5 | | filed on August 11, 2016. |
| 6 | Q. | Did the parties prepare a term sheet memorializing the issues they agreed to settle? |
| 7 | Α. | No. At this time, the parties have a settlement in principle only. A term sheet will be filed at a |
| 8 | | later date. |
| 9 | Q. | What is the revenue requirement impact of the partial settlement? |
| 10 | Α. | The partial settlement reduces the Company's proposed revenue requirement by \$660,000. A |
| 11 | | table further describing the settled issues and amounts in terms of impact on revenue |
| 12 | | requirement is included as Confidential Exhibit CNGC/501. |
| 13 | | III. RESPONSE TO PARTIES' TESTIMONY ON THE ISSUES |
| 14 | | Issue 1 – Wage and Salaries |
| 15 | Q. | Please briefly describe the wage and salary costs included in Cascade's case. |
| 16 | Α. | To calculate the wage and salary costs for its rate request, the Company started with its |
| 17 | | actual wage and salary costs for the base year 2015. The Company then adjusted the |
| 18 | | 2015 base year amounts by including: (1) actual wage increases granted for 2016; (2) |
| 19 | | an annualizing adjustment for 2015; and (3) two additional budgeted full-time equivalent |
| 20 | | employees (system), which will be added during 2016 to work on resource planning. |

| 1 | | Thus, the wage and salary costs included in the Company's case reflects the actual |
|----|----|--|
| 2 | | wages granted to union and non-union employees in the 2016 test year. ² |
| 3 | Q. | Does Staff propose an adjustment to the Company's proposed wages and salaries |
| 4 | | amounts? |
| 5 | Α. | Yes. Staff proposes a decrease to operations and maintenance expense (O&M) of |
| 6 | | \$228,750 and \$59,192 to rate base. ³ |
| 7 | Q. | How does Staff calculate its adjustments? |
| 8 | Α. | Staff's adjustment is based on the application of its three-year wage and salary model |
| 9 | | (Three-Year Model or Staff's Model). Staff's Model starts with actual historical wages for |
| 10 | | non-union employees going back three years (in this case, 2013). This historical amount |
| 11 | | is then escalated for inflation each year for three years by the All-Urban CPI, to arrive at |
| 12 | | the 2016 test year level. ⁴ Staff then allows the Company to share 50/50 with customers |
| 13 | | the lesser of the difference between the Company's and Staff's calculated projections, or |
| 14 | | a 10 percent band around Staff's calculated projection. ⁵ In this way, Staff's Model allows |
| 15 | | the Company to recover a maximum of 5 percent over Staff's wage and salary number, |
| 16 | | as calculated assuming CPI wage increases from the 2013 "base year." |

² CNGC/200, Parvinen/6:12-17.

³ Staff/100, Gardner/10.

⁴ Staff/100, Gardner/8-9.

⁵ Staff's electronic workpaper entitled UG 287 S-2 Wages and 9 Salaries.xlsx., S-4.4 PUC 3-year OT

| 1 | Q. | Does Staff provide any rationale for using the Three-Year Model to estimate |
|----|----|--|
| 2 | | wages, when in fact the Company's case includes the actual wages paid to non- |
| 3 | | union employees in the test year? |
| 4 | A. | Staff does not provide any specific rationale, other than to note that the Public Utility |
| 5 | | Commission of Oregon (Commission) typically relies on Staff's Model to estimate non- |
| 6 | | union wages. ⁶ |
| 7 | Q. | Do you agree that the wage and salary level included in Cascade's rates should be |
| 8 | | calculated based on Staff's Model? |
| 9 | Α. | No, I do not, for several reasons. <i>First,</i> typically, Staff uses the Three-Year Model to |
| 10 | | estimate wages for a future test year when the actual wages paid to employees for that |
| 11 | | year are not known. However, in this case, we know the actual wages paid by the |
| 12 | | Company for the test year. Therefore, unless the evidence shows that the actual wages |
| 13 | | were imprudently set, there is no reason to reduce the Company's request. |
| 14 | | Second, the testimony of Anne Jones establishes that the Company's processes |
| 15 | | for setting wages is reasonable and prudent. As explained by Ms. Jones, the Company |
| 16 | | follows an established method for determining wages that ensures that they are set at |
| 17 | | the minimum level required to attract and retain a qualified workforce. That method has |
| 18 | | been reviewed and found to be conservative by a third-party review. |
| 19 | | Third, Staff's assumption that annual wage increases provided to employees |
| 20 | | should be limited to the CPI is unreasonable. As explained by Ms. Jones, the |
| 21 | | businesses with which Cascade competes for labor all provide merit increases that are |

⁶ Staff/100, Gardner/8.

6 - REPLY TESTIMONY OF MICHAEL PARVINEN

set at a level above the CPI. If Cascade were to limit its wage increases to CPI, it would
 be unable to recruit and retain employees.

3 Q. Has Staff made any errors in applying its Three-Year Model?

4 A. Yes. The model is intended to incorporate full time equivalent (FTE) employee counts
 5 for the test year—2016. Instead. Staff relies on 2015 FTE employee counts.⁷

6 Q. Does it appear that Staff used 2015 FTE employee counts intentionally?

- 7 A. No. Staff's use of 2015 employee counts appears to be the result of an error made by
- 8 Cascade in responding to a data request. Specifically, Staff states that in determining
- 9 FTE counts, it relied on Cascade's Response to Staff Data Request No. 254—which is
- 10 included as an exhibit to Ms. Gardner's testimony as Staff/103.⁸ In that response, the
- 11 Company provided unadjusted 2015 FTE employee counts, which is what is reflected in
- 12 the Company's test year presentation not actual 2016 FTEs.⁹

13 Q. What would be the impact to the Staff adjustment if Staff were to instead have

14 used the 2016 employee count?

- 15 A. Rerunning the Staff calculation using actual employees as of August 1, 2016 would
- 16 reduce Staff's adjustment to O&M to (\$101,116), as opposed to Staff's original proposal,
- 17 (\$205,554). The rate base adjustment would decrease to (\$29,116), as opposed to
- 18 Staff's original proposal, (\$59,192). The revised calculation is shown in Exhibit
- 19 CNGC/502, Parvinen/1. The text highlighted in yellow identifies the changes to the
- 20 calculation from Staff's Model.

⁸ Staff/100, Gardner/10.

7 - REPLY TESTIMONY OF MICHAEL PARVINEN

⁹ Staff/103, Gardner/8.

- 1 Q. Does the Company accept these revised adjustments?
- A. No. As discussed above, we believe that the Commission should rely on the Company's *actual* wages and salaries for the test year. Staff's own model shows that with just the
 employee count update described above, the total projected payroll is actually greater
 than the total payroll amount the Company is seeking to recover in this case. Therefore,
 the Company's proposed wages and salaries amounts are reasonable.

7 Q. Do you have other concerns with the Staff model?

- 8 A. Yes. It appears that Staff may have misapplied the 10 percent band. The Staff work
- 9 paper describing the Three-Year Model states that the model calculates a 10 percent
- 10 band around Staff's calculation which is described as "allowable."¹⁰ However, instead of
- allowing the 10 percent amount in the band and sharing 50/50 any amounts beyond the
- 12 10 percent band, Staff instead shares 50/50 the lower of either the band or the
- 13 difference between actual versus the projected payroll. Thus, it appears that Staff is
- 14 treating the 10 percent "band" as if it were a 5 percent "cap." This makes no sense, and
- 15 appears to contradict Staff's characterization of the 10 percent band amount being
- 16 "allowable."

17 Q. If Staff's Model is adjusted to include a true 10 percent band, what is the result?

- 18 A. Cascade considered the application of the 10 percent band to officer, exempt and non-
- 19
- exempt employees. All officer and exempt employee wages would fit within the 10

¹⁰ In Staff's workpapers, the 10 percent band is described as follows: "staff... allows the company to share 50/50 the lesser of the difference between the company's & staff's calculated projections, or a 10% band around staff's calculated projection." See Excel spreadsheet, Gardner Wage_Salary Model, tab I-2.1 PUC 3-year W&S (explanation at cell A5). Additionally, Line No. 9 of Staff's workpapers describe the 10 percent band as "allowable". See Excel spreadsheet, Gardner Wage_Salary Model, tab I-2.1 PUC 3-year W&S, cell E21.

| 1 | | percent band, and only the non-exempt employee class would fall outside the 10 percent |
|----|----|--|
| 2 | | band. Taking the officer, exempt, non-exempt, and union employee wages |
| 3 | | together, however, the total allowed wages is greater than the Company's |
| 4 | | requested level. |
| 5 | Q. | Have you prepared an exhibit showing the calculation? |
| 6 | Α. | Yes. Exhibit CNGC/503 uses Staff's wage and salary adjustment corrected to include |
| 7 | | 2016 FTE (as shown in Exhibit CNGC/502) and adjusts the formula in line 10 to reflect |
| 8 | | an actual band and compared the calculated adjustment to the band to determine if |
| 9 | | allowable. Again, changes from the Staff's Model are highlighted in yellow. |
| 10 | Q. | Do you have an alternative recommendation that relies on the Three-Year Model? |
| 11 | Α. | Yes. If the amount by which rates are escalated each year is adjusted to a more realistic |
| 12 | | reflection of actual market demands, Staff's Model will produce a reasonable result. In |
| 13 | | particular, if the Oregon Average Wage Rate value, or even the U.S. Average Wage |
| 14 | | Rate value, is substituted for Staff's All Urban CPI, Staff's Model will produce a wage |
| 15 | | calculation much more in line with the Company's actual wages. |
| 16 | Q. | What is the impact to the impact to Staff's wage and salary adjustment from |
| 17 | | reflecting the U.S. Average Wage Rate value and using actual 2016 FTEs? |
| 18 | Α. | The values used are found in Exhibit Staff/110, Gardner/1 and would reduce the Staff's |
| 19 | | adjustment to O&M to (\$6,938), and rate base to (\$1,998). The calculation is provided in |
| 20 | | Exhibit CNGC/504, which uses the values from Exhibit CNGC/503. |

| 1 | Q. | In summary, based on Exhibits CNGC/502 – 504 and the Staff original calculation, |
|----|----|---|
| 2 | | do you have a concluding comment? |
| 3 | A. | Yes. It is important to note that each of the corrections and alternatives by itself results in |
| 4 | | a total allowed salary for all employee classes combined that is greater than the original |
| 5 | | Company proposed level. Therefore, no adjustment is necessary to the Company's |
| 6 | | original proposal. |
| 7 | Q. | Does CUB also propose a wage and salary adjustment? |
| 8 | Α. | Yes. CUB witness Jenks recommends allowing only 1.5 times the current CPI of 1.0 |
| 9 | | percent for non-union employees. ¹¹ |
| 10 | Q. | Do you agree with this adjustment? |
| 11 | Α. | No. The CUB recommendation does not reflect the current economic conditions built |
| 12 | | into the Company's wage and salary analysis as described by Company witness Anne |
| 13 | | Jones. CUB also misrepresents the components built into the authorized salary |
| 14 | | increases for non-union employees. Company witness Anne Jones describes these |
| 15 | | components. |
| 16 | | Issue 2 – MDU Cross-Charge Labor |
| 17 | Q. | Please summarize the Staff proposed MDU Cross-Charge Labor adjustment. |
| 18 | Α. | Staff applied its Three-Year Model to labor expenses that were cross-charged by the |
| 19 | | MDU Utilities Group and MDU Resources to Cascade. Staff also identified incentive |
| 20 | | payments to MDU Utilities Group and MDU Resources employees that were allocated to |
| 21 | | Cascade. Staff then applied its historical approach of disallowing 100 percent of |

¹¹ CUB/100, Jenks/4.

incentive payments to officers, 75 percent of incentives tied to earnings, and 50 percent
 of incentives associated with customer service.

3 Q. Do you accept the Staff adjustment?

A. The Company accepts Staff's application of the Commission's policy for determining the
amount for cross-charged incentives that should be included in rates. However, the
Company does not accept the application of the Three-Year Model for the same reason
as described in the Wage and Salary adjustment above.

Q. Is there another adjustment to cross charged wages and salaries that needs to be made in this case?

- 10 A. Yes. In its original filing, the Company mistakenly omitted the increase to bring test year
- 11 charges for cross-charged labor to a test year amount. MDU Utilities Group and MDU
- 12 Resources employees who were cross charged to Cascade received the same average
- 13 four percent increase for 2016 as were provided to the Cascade employees. This
- 14 increase should have been applied to the Customer Service Center and Information
- 15 Technology employees, and all other employees of the MDU Utilities Group and MDU
- 16 Resources that were cross-charged to Cascade.
- 17 Q. What impact would that have on the results?
- 18 A. Increasing the total Oregon assigned cross-charged labor would increase expenses by
- 19 \$47,690 (\$1,192,254 from Exhibit CNGC/505, Parvinen/ 1 times 4%).

20 Q. What is the overall adjustment for cross-charged labor, accepting Staff's incentive

- 21 adjustment and adjusting salaries to reflect actual 2016 increases?
- A. The adjustment would be (\$121,649) for expense and a rate base reduction of \$48,763.
- 23 This amount is calculated in Exhibit CNGC/505.

| 1 | | <u>Issue 3 – Rate Case Costs</u> |
|----|----|--|
| 2 | Q. | Please briefly describe Cascade's proposal regarding rate case costs. |
| 3 | Α. | The rate case costs included in Cascade's case are set at the level incurred by Cascade |
| 4 | | in its 2015 base year, associated primarily with the 2015 general rate case. The |
| 5 | | Company expects that the costs incurred in the 2015 case are representative of those |
| 6 | | that will be incurred in this case. Because the Company plans to file annual rate cases, |
| 7 | | it believes that the level of costs included in the base year are reflective of the costs it |
| 8 | | will incur during the test year. |
| 9 | Q. | Why does the Company assume it will be filing rate cases annually or at a |
| 10 | | minimum every two years? |
| 11 | Α. | The largest component of this case and the Company's last rate case (UG 287) is plant |
| 12 | | additions. The Company is incurring significant capital additions primarily focused on |
| 13 | | safety and reliability. In other words, the Company is incurring additional investment that |
| 14 | | will not result in additional customers or revenue. This situation will apply significant rate |
| 15 | | pressure. |
| 16 | Q. | Why is the Staff approach of use of a three-year average inappropriate? |
| 17 | Α. | The Company has demonstrated that it is in a mode of filing rate cases more often than |
| 18 | | every three years. The Staff approach understates in rates the actual cost incurred to |
| 19 | | sponsor a rate case not only in this current case but the last rate case as well. |
| 20 | Q. | If one were to assume two-year normalization, what would be the impact? |
| 21 | Α. | There would be no change to the company's presentation. The 2015 rate case costs |
| 22 | | and the expected 2016 rate case costs are essentially at the same level. A two year |

| 1 | | normalization calculation would allow half of each year thus equaling the amount |
|----|----|---|
| 2 | | included in the base year expenses. |
| 3 | | Issue 4 – Plant Additions |
| 4 | Q. | Please briefly describe Cascade's original plant addition request. |
| 5 | Α. | The Company originally requested recovery for \$13.6 million in plant additions based on |
| 6 | | the expected capital spend reflected in its 2016 capital budget. |
| 7 | Q. | Does Staff propose any adjustments to the Company's request? |
| 8 | Α. | Yes. Staff proposed adjustments based on three factors. First, relying on Company |
| 9 | | projections as provided in data requests, Staff determined that several projects will not |
| 10 | | go into service until after the rate-effective date, reducing the investment by \$300,000. |
| 11 | | Second, for the Bend Pipe Replacement, the Company has decreased the amounts it |
| 12 | | estimates will be transferred to plant for the test year by \$2.3 million. Third, Staff |
| 13 | | identifies planned reductions in spending for two information technology projects and |
| 14 | | one safety upgrade and accordingly reduces recovered investment by \$663,000. |
| 15 | Q. | Do you agree with Staff's proposed reductions? |
| 16 | Α. | Yes. However, it appears that Staff focused only on those projects where actual costs |
| 17 | | were less than the original projection. However, if we consider the actual costs—and |
| 18 | | actual updated estimates of costs for all projects that will be in service by the end of |
| 19 | | February 2017, the reduction to rate base is not as great as Staff projects. |
| 20 | Q. | Please explain further. |
| 21 | Α. | Our records show that the costs associated with several of the projects included in the |
| 22 | | case show some variation from the originally estimated amount. Staff's approach was to |
| 23 | | review each project and propose reductions for those that showed a marked decrease |

| 1 | | from projections. However, Staff ignored entirely the many projects for which actual |
|----|----|---|
| 2 | | costs are coming out above projections. Any update to costs to reflect actuals for these |
| 3 | | plant additions must be even-handed—both increases and decreases must be reflected. |
| 4 | Q. | Has the Company calculated the impact of including all updates for actual spend |
| 5 | | on projects? |
| 6 | Α. | Yes. The Company also verified that each project is or will be in service and used and |
| 7 | | useful by the effective date of this case. |
| 8 | Q. | What is the impact of the analysis? |
| 9 | A. | It is a decrease to rate base of \$2,099,727 or a decrease in revenue requirement of |
| 10 | | \$223,949. Exhibit CNGC/506 shows the changes from the Company's original |
| 11 | | projections. The cells highlighted in yellow are Staff's adjustments, which the Company |
| 12 | | accepts and agrees with, and the green highlights are the projects that have been |
| 13 | | updated based on the most recent information. Two projects highlighted in green are |
| 14 | | also lower than the original projections. |
| 15 | | Issue 5 – Environmental Remediation Cost Amortization |
| 16 | Q. | Did the Company originally propose an amortization of deferred environmental |
| 17 | | remediation costs? |
| 18 | A. | No, not in this case. In the Company's last general rate case, the Company had |
| 19 | | proposed to amortize the total deferred remediation costs plus the expected remediation |
| 20 | | costs for the test year net of expected insurance proceeds. However, parties were |
| 21 | | concerned in part that the expected remediation costs were not firm enough and the |
| 22 | | remediation process had not yet begun. The proposal was ultimately withdrawn as part |

| 1 | | of the settlement. As of this date, the remediation process still has not begun, so the |
|----|----|---|
| 2 | | Company has chosen to wait until a later rate case to seek recovery. |
| 3 | Q. | Does the Company agree with the Staff recommendation to start amortization |
| 4 | | now? |
| 5 | A. | Generally no. The Company understands Staff's concern that deferred costs could at |
| 6 | | some point reach an unmanageable level. However, the intent of the deferral account is |
| 7 | | to offset costs incurred over time with insurance proceeds. The Company believes that |
| 8 | | it is optimal for the Company to seek recovery once it is clearer what the final <i>net</i> costs |
| 9 | | will be. We do agree that at some point the deferral balance may increase to the point |
| 10 | | where it seems prudent and reasonable to begin amortization, even without knowing the |
| 11 | | ultimate recovery amount. However, the deferral balance as of July 31 is \$155,324, and |
| 12 | | we do anticipate further recovery against that amount. On the other hand, Cascade is |
| 13 | | comfortable with beginning amortization if Staff believes it is necessary. |
| 14 | Q. | Based on Staff's recommendation to start amortization, does the Company have a |
| 15 | | proposal? |
| 16 | Α. | Yes. The Company proposes to start amortization of the current balance using a three- |
| 17 | | year amortization. This will reduce the interest accrual to a short term rate. The |
| 18 | | Company then proposes to create a new deferral account to track future costs and |
| 19 | | insurance proceeds. |
| 20 | Q. | What is the impact of the Company's proposal? |
| 21 | A. | The result of this proposal is an increase in expenses of \$51,775 and revenue |
| 22 | | requirement of \$53,601. The calculation is shown in Exhibit of the expense increase |
| 23 | | CNGC/507. |

| 1 | | <u>Issue 6 – ADIT</u> |
|----|----|---|
| 2 | Q. | Please briefly describe the Accumulated Deferred Income Tax (ADIT) included in |
| 3 | | the Company's case. |
| 4 | Α. | In the Company's original presentation the 2015 rate base was carried forward to 2016 |
| 5 | | reflecting an additional year of depreciation expense on accumulated depreciation. |
| 6 | | NWIGU witness Gorman correctly points out that the Company did not reflect the |
| 7 | | change in ADIT from 2015 to 2016. |
| 8 | Q. | Do you agree with NWIGU witness Gorman's calculation? |
| 9 | Α. | No. While Mr. Gorman is correct that an additional year of deferred tax change must be |
| 10 | | included, his calculation of the impact of that additional year is incorrect. In particular, |
| 11 | | Mr. Gorman's calculation has the impact of assuming all plant at the end of 2015 was |
| 12 | | placed in service during 2016—with the result that deferred taxes for would be |
| 13 | | increasing from the base year to the test year. ¹² Obviously this is not the case. In fact |
| 14 | | most plant has been in service long enough that book straight line depreciation is greater |
| 15 | | than tax depreciation thus the deferred tax balance—or ADIT—is actually reducing. |
| 16 | Q. | Has the Company calculated the impact on ADIT for 2016 based on the 2015 plant |
| 17 | | balances? |
| 18 | Α. | Yes. Exhibit CNGC/508 shows an increase to rate base of \$748,927 which has a |
| 19 | | corresponding increase to the revenue requirement of \$79,886. |

¹² Company witness Donna Genora provides a detailed discussion of the impact of accelerated depreciation on deferred taxes in Exhibit CNGC/700 and CNGC/701.

Issue 7 – Basic Charges 1 2 Q. Please briefly describe the Company's recommendation regarding the basic 3 charges for residential and commercial rate schedules. 4 The Company is proposing no change to the \$3.00 basic charge for Schedules 101 Α. 5 (Residential) and 104 (Commercial) customers. This relatively low basic charge is 6 proposed in light of the fact that gas users are also electric utility users, and so are 7 required to bear two basic charges each month. Moreover, this proposal appropriately 8 supports the direct use of natural gas, which is an environmentally sound policy. 9 Please provide a brief summary of the Staff proposal. Q., 10 Α. Staff opposes the Company's proposal. Specifically, Staff performed an analysis 11 comparing the impact of Staff's versus Cascade's proposal on customer demand charges in the highest use months. Staff found that in those months, customers benefit 12 13 from a \$5 basic charge for both of these rate schedules. 14 Does the Company disagree with Staff's analysis? Q. 15 Α. The Company does not dispute Staff's calculations. However, the Company continues 16 to support using its current basic charge as a matter of policy to support and endorse a 17 direct use of natural gas philosophy. 18 Q. Does the Company have a compromise proposal? 19 Α. Yes. Cascade would agree to modify the basic charge by \$1 per month as long as the 20 increase does not result in a decrease to the margin rate. Cascade believes that 21 reducing the margin rate sends the wrong price signal to customers, thus discouraging conservation. However, the Company's Long Run Incremental Cost of Service Study 22 23 shows that no increase to schedule 104 is warranted at this time, so this compromise

| 1 | | proposal is not reflected in the revised rate calculations sponsored by Company witness |
|----|----|--|
| 2 | | Mr. Amen. |
| 3 | | Issue 8 – WACOG Reallocation |
| 4 | Q. | Please summarize the Staff proposal regarding the WACOG reallocation. |
| 5 | Α. | Staff witness Gibbens recommends that the commodity portion of gas costs be allocated |
| 6 | | differently to the various customer classes. Mr. Gibbens bases this proposal on the fact |
| 7 | | that there are seasonal differences in gas prices, and therefore higher load factor |
| 8 | | classes should pay a lower commodity rate. |
| 9 | Q. | Does Cascade agree with the Staff proposal? |
| 10 | Α. | No, not at all. |
| 11 | Q. | Can you identify the flaws in the Staff proposal? |
| 12 | A. | Yes. First, Staff only looks at gas prices for a small sample of years and uses a narrow |
| 13 | | scope in his review. As a result, Staff does not take into account the full range of |
| 14 | | variation in seasonal prices. Over time, the Company has experienced significant |
| 15 | | variation in seasonal gas prices and in fact, there have been years when the actual |
| 16 | | winter price is lower than the summer price. See Exhibit CNGC/509 where the August 1 |
| 17 | | price is identified with an arrow and the following winter prices were lower. Second, |
| 18 | | Staff's analysis looks only at market prices and does not take into account the |
| 19 | | advantage that storage provides to the overall winter price particularly during peak |
| 20 | | usage and peak prices. Third, the proposal by Staff adds a tremendous amount of |
| 21 | | complication and unnecessary administrative burden to the gas cost deferral process. |

1 Q. Please explain further the complication created in the gas cost deferral process.

A. The Staff proposal appears to create the need to track specific contracts and purchases
by class, thus trying to track therms used by class at a very granular level such as daily.
There can be extreme daily difference in customer usage versus gas purchases. For
example, issues such as line pack, drafting, imbalances, and even daily injections and
withdrawals from storage would create complications.

7 Q. Please further describe line pack, drafting, and imbalances.

A. Cascade can, either intentionally or unintentionally, purchase more gas than is required
to serve customers. The excess gas is essentially stored in the pipeline. This would be
referred to as line pack. Drafting would be the opposite effect, where Cascade would
draft or take more gas from the pipeline than it actually purchased for the day. The net
effect of line pack and drafting create imbalance on the pipelines. Granted the pipelines
have tolerances and Cascade cannot stay "imbalanced" indefinitely, but there is flexibility
that is not reflected in simply assigning a WACOG to each customer class.

15 Q. What is the effect of these complications?

A. All these identified components that are reflected in an average system price create
 severe complications when trying to track individual molecules to specific customer
 classes and cannot be ignored.

19 Q. Does the Company have an alternative proposal?

- 20 A. At a minimum, if Staff or the Commission wishes to pursue this topic, it would be more
- 21 appropriate to reopen UM 950, the PGA guideline process, or to initiate a generic
- 22 investigation proceeding where the topic can be explored in detail on an industry-wide
- 23 basis, rather than just be applied to Cascade.

19 - REPLY TESTIMONY OF MICHAEL PARVINEN

- 1 Q. Does this conclude your reply testimony?
- 2 A. Yes.

i - REPLY TESTIMONY OF ANNE M. JONES

| 1 | | I. INTRODUCTION AND SUMMARY |
|----|----|---|
| 2 | Q. | Would you please state your name and business address? |
| 3 | Α. | Yes, my name is Anne M. Jones. My business address is 1200 West Century Avenue, |
| 4 | | Bismarck, North Dakota 58503. |
| 5 | Q. | What is your position with MDU Resources Group, Inc. (MDU Resources)? |
| 6 | Α. | I am the Vice President Human Resources. |
| 7 | Q. | What are your duties and responsibilities? |
| 8 | Α. | I am responsible for all the disciplines in the Human Resources (HR) arena including |
| 9 | | compensation and benefits, organization development and training, labor and employee |
| 10 | | relations and governmental compliance with employment and employee relations laws |
| 11 | | and practices. I lead the Human Resources function for MDU Resources Group, Inc., |
| 12 | | Cascade Natural Gas Corporation (Cascade or Company), Great Plains Natural Gas |
| 13 | | Co., Intermountain Gas Company, Montana-Dakota Utilities Co., and WBI Energy. My |
| 14 | | team also provides services to Knife River Corporation and MDU Construction Service |
| 15 | | Group, Inc. |
| 16 | Q. | Would you please outline your educational and professional background? |
| 17 | Α, | Yes. I have a Bachelor's Degree in Management with an emphasis in Human |
| 18 | | Resources from the University of Mary in Bismarck, ND. I began my career with MDU |
| 19 | | Resources in 1982 and have been in a variety of positions throughout the corporation. |
| 20 | | have worked within Human Resources since 1997. My most recent job change was to |
| 21 | | move from Vice President, Human Resources and Customer Service for the Utility |
| 22 | | Group to Vice President Human Resources at MDU Resources Group, Inc. in January |
| 23 | | 2016. |

- 1 Q. What is the purpose of your testimony?
- 2 The purpose of my testimony is to respond to the testimony of Staff witness Marianne Α. 3 Gardner and Citizens' Utility Board of Oregon (CUB) witness Bob Jenks, regarding the 4 Company's wage and salary costs included in this case. In particular, I am responding 5 to Ms. Gardner's proposal to decrease the Company's wages and salary request for 6 non-union employees by a total of \$287,942 on an Oregon-allocated basis. My 7 response is also relevant to Mr. Jenks' proposal to decrease the Company's proposal by 8 \$66,000. My testimony will explain the Company's process by which it sets wages and 9 salaries, and the philosophy behind the process. 10 Q. Are any other witnesses addressing Staff's proposed decrease to the Company's wage and salary recovery? 11 12 Α. Yes. Michael Parvinen will address the reasons why Staff's three-year wage model (Staff's Model or Three-Year Salary Model), upon which the proposed disallowance is 13 14 based, does not produce an accurate estimate of the wage and salary costs that the 15 Company can expect to incur during the rate-effective period. 16 П. **RESPONSE TO PARTIES' TESTIMONY ON WAGE AND SALARY** 17 Q. Please explain how the Company calculated the wage and salary costs included in 18 its rate request. 19 Α. The Company started with its actual wage and salary costs for the base year 2015. The 20 Company escalated this cost to test year amounts by including: (1) actual wage 21 increases granted for 2016; (2) an annualizing adjustment for 2016; and (3) two 22 additional budgeted full-time equivalent employees planned to work with our regulatory 23 group on resource planning.

| 1 | Q. | Does Staff support any aspect of the Company's rate proposal for labor costs? |
|----|----|--|
| 2 | Α. | Yes. Staff supports the Company's request for wages and salaries for its union |
| 3 | | employees. ¹ In addition, Staff supports the Company's request for recovery of costs |
| 4 | | associated with benefits and incentives. ² To be clear, Staff's proposed adjustment |
| 5 | | relates only to the calculation of base wages and salaries for non-union employees. |
| 6 | Q. | What is the basis of Staff's proposed adjustment? |
| 7 | Α. | Staff relies on an application of its Three-Year Model to support its decrease. Staff's |
| 8 | | Model assumes that the Company's annual increase for employees' wages should be |
| 9 | | tied to the rate of inflation based on the All-Urban CPI. ³ |
| 10 | Q | What is the basis of CUB's proposed adjustment? |
| 11 | Α. | CUB also focusses on the annual increase the Company granted employees for 2016, |
| 12 | | arguing that it is unwarranted given that the inflation rate for 2016 over 2015 was 1%. ⁴ |
| 13 | Q. | Do you agree that employees' annual increases should be tied to the inflation? |
| 14 | Α. | As I will discuss further, inflation is only one factor in determining annual increases for |
| 15 | | employees. Market forces demand that we also provide appropriate merit and/or tenure |
| 16 | | increases. If we were to restrict annual increases to the rate of inflation, our |
| 17 | | compensation would fall below market levels and we would be unable to attract or retain |
| 18 | | a qualified work force. |

¹ Staff/100, Gardner/11. ² Staff/100, Gardner/11

³ Staff/100, Gardner/8-9.

⁴ CUB/100, Jenks/4.

1 Q. Please describe Cascade's general approach to setting wages and salaries.

A. There are three basic principles underlying Cascade's approach to employee
 compensation—all designed to minimize costs while allowing the Company to attract and
 retain the qualified employees required to deliver safe and reliable gas service to our
 customers.

First, Cascade has adopted a Total Rewards philosophy. This approach
requires that we view base pay, incentives (or, pay-at-risk) and benefits together, as a
total package—what we call the Total Rewards package-- when determining how to
compensate our employees.

Second, we make every attempt to set total compensation at the market
 average. We are finding that the market for employees with the skills and experience we
 require is quite competitive. For that reason, the compensation we offer must provide
 the same general pay levels and components in its total remuneration package as are
 included in the packages provided by the Company's competitors for labor.

Third, the Company believes that, in order to encourage satisfactory performance, a
certain percentage of each employee's market compensation must be "at risk."
Accordingly, under the Company's incentive plan, each employee has the opportunity to
receive total compensation and benefits at the market average, so long as the employee

19 performs at an acceptable level. However, employees will earn less than the average

20 remuneration when performance is less than acceptable and, conversely, will earn

21 higher than the average remuneration when performance is exceptional. Importantly,

22 the **goal** is for total wages and salary for the total Company to average at or very close

23 to market.

4 - REPLY TESTIMONY OF ANNE M. JONES

1 2

18

Q. How does the Company determine the market average when it sets the base pay component of the Total Rewards package?

A. When we market price a position within the organization, we pull data from all of our
survey and/or online sources. The Company uses many reputable industry surveys
when determining base pay levels, including the American Gas Association, Mercer
Benchmark, Milliman, Towers Watson, World at Work and Compensation Analyst,
among others.

8 The first step in determining market average base pay for a particular position is 9 to review the requirements of the positions listed in our surveys and on-line sources against the job description we have created. Once we have determined a match, we 10 then use the 50th percentile pricing associated with that position to determine where our 11 new job will fit in our pay grade structure. This 50th percentile wage level then becomes 12 the Company's market pay level pay-or "grade"-associated with the job we have 13 14 created. To be clear, our pay grade is set at the middle of the market range of pay, 15 as indicated by our sources. 16 Q. When you hire new employees, is their compensation set at grade? Not typically. In general, we start an employee somewhere closer to ten to fifteen 17 Α.

19 50th percentile wage level. Our goal is for most employees to achieve 100 percent of

percent below market-meaning new employees start at ten to fifteen percent below the

- 20 grade, or the middle of the market range of pay, within five-seven years from hire.
- 21 Q. Do any of your employees earn above market?
- 22 A. Yes. Some employees may earn above grade for reasons of performance or tenure.
- 23 And there are occasionally more unusual situations—such as where the Company must

5 - REPLY TESTIMONY OF ANNE M. JONES

| 1 | | provide a pay increase to maintain a supervisor's pay above that of union employees |
|----------------------------|----|---|
| 2 | | who have received negotiated increases. However, because we set our pay grade at |
| 3 | | the 50 th percentile of the market range, even those Cascade employees earning at the |
| 4 | | 120 percent level of grade are still earning well below the top of the market range. |
| 5 | | Moreover, we have many more employees making below market than above market. |
| 6 | | Attached as Exhibit CNGC/601 is a breakdown of non-bargaining employees and where |
| 7 | | they fall within their grade. |
| 8 | Q. | Do you have additional processes in place to ensure that the Company is not |
| 9 | | paying more than the minimum necessary to attract and retain a qualified |
| 10 | | workforce? |
| 11 | Α. | Yes. Periodically the Company contracts with an outside independent consultant to |
| 12 | | review compensation programs and practices. For instance, in 2013, the Company |
| 13 | | contracted with Aon Hewitt to provide a third-party review of base compensation and |
| 14 | | incentive compensation. This will be done again in 2017. |
| 15 | Q. | What was the result of the 2013 Aon Hewitt review? |
| 16 | Α. | The report issued by Aon Hewitt indicated Cascade's compensation programs are well |
| 17 | | designed and utilize high quality and established external survey sources to ensure the |
| 18 | | programs align well with other utilities and industries that compete for the same types of |
| 19 | | employees. Importantly, the report made the following observations that suggest that |
| 20 | | the Company's wages and salaries are set at conservative levels: |
| 21 22 23 24 25 | | It is CNGC's standard practice to market price jobs using national general industry data. This practice is part of a growing trend in the utility industry. We support this approach for non-utility- specific roles at CNCG, given that the Company recruits from and loses talent to general industry for these roles. However, we do |

| 1 2 3 4 | | recognize that market pay level for these roles based on utility industry data tends to be higher than market data based on general industry. As such, CNGC has established a conservative approach to measuring the market for non-utility specific roles. ⁵ |
|------------------|----|--|
| 5 6 7 | | CNGC's salary structure midpoints compare favorably to the market in that they are 94% of the market values for the priced jobs.⁶ |
| 8 | | Recommendations for improvement were primarily minor enhancements to employee |
| 9 | | pay opportunities because of our conservative approach to total compensation. For |
| 10 | | example, Aon Hewitt suggested that in order to keep the Company from falling below |
| 11 | | market competitive base pay levels, salary structures should be increased more |
| 12 | | aggressively than they have been in the past. A copy of the Aon Hewitt Report is |
| 13 | | attached as Confidential Exhibit CNGC/602. |
| 14 | Q. | Does the Company take any other measures to ensure that compensation does |
| 15 | | not exceed market average? |
| 16 | Α. | Yes. In addition to periodic third-party reviews, Human Resources reviews standard |
| 17 | | benchmark jobs in the corporation annually, including job families such as engineers, |
| 18 | | construction supervisors and system analysts. The Company's total compensation |
| 19 | | package for the benchmark jobs are compared to market compensation for comparable |
| 20 | | positions to ensure that the Company is compensating employees at the appropriate pay |
| 21 | | grade and range. Human Resources also reviews positions on an "as needed" basis |
| 22 | | throughout the year to ensure it is competitively compensating within the established pay |
| 23 | | ranges. |

⁵ Confidential CNGC/602, Jones/4. ⁶ Confidential CNGC/602, Jones/6.

7 - REPLY TESTIMONY OF ANNE M. JONES

Q. How does the Company determine annual increases for the employees of Cascade?

Each year, we review the information provided by our compensation vendors which 3 Α. 4 indicates the national percentage of compensation increase per the research in the 5 report. There are two things we look at annually. First, we determine whether we need to adjust the pay grade structure for inflation. Any increase related to inflation would 6 7 typically be close to that indicated by the CPI Index referenced by Ms. Gardner in her 8 testimony. Ms. Gardner is absolutely correct that this is one aspect of the compensation 9 process conducted annually. However, we must also consider the fact that employees must be granted increases related to merit, tenure, etc. To determine an overall amount 10 for such increase, we rely on our compensation survey data as well as The Conference 11 12 Board, World at Work, etc. Based on these resources, we set our overall budget for all employees' increases-increases-of which some employees may receive less and 13 14 others may receive more. Individual increases are based on performance, placement 15 within the grade structure and a review of equity to others within the grade. 16 We also include in that budget one half of one percent for the promotion of

employees that may occur throughout the year and an additional one half of one percent
is set aside for Human Resources to use if we have pay equity issues in the pay grades
based on gender, ethnicity, etc.

20Q.Staff's Three-Year Model does not include merit or tenure increases. Is that21approach realistic?

A. No, it is not. In addition to increases to account for inflation, our competitors all provide
 their employees with merit and tenure increases to compensate them for increased

8 - REPLY TESTIMONY OF ANNE M. JONES

| 1 | | experience and skill. If we did not provide merit increases, we would be unable to retain |
|----|------------|---|
| 2 | | our skilled employees. |
| 3 | Q. | You mentioned that Staff supports the Company's wage and salary recovery for |
| 4 | | its union employees. How do your union employees' negotiated salary increases |
| 5 | | effect your overall structure? |
| 6 | A. | Oversight of our bargaining unit employees at the field level is typically via positions that |
| 7 | | are non-bargained. Therefore, over time we can experience compression issues in the |
| 8 | | pay equity between our bargained employees and those who have supervisory |
| 9 | | responsibilities. In such cases we have used additional funds to bring a supervisor or |
| 10 | | manager's compensation in line with those for whom they are responsible. |
| 11 | Q. | CUB points out that the annual wage and salary increase granted by the Company |
| 12 | | for non-union employees for the test year was 4 percent compared to 3.1 percent |
| 13 | | for union employees, and nearly four times the rate of inflation. For that reason, |
| 14 | | CUB recommends that the Company's recovery for this increase be scaled back |
| 15 | | to 1.5 percent—which results in a \$66,000 downward adjustment on an Oregon |
| 16 | \searrow | basis. ⁷ What is your response? |
| 17 | A. | As I have explained, we simply could not retain qualified employees if we were to limit |
| 18 | | annual increases to the inflation rate—or even 1.5 percent of inflation as proposed by |
| 19 | | CUB. Moreover, annual increases are particularly important in our Company, given that |
| 20 | | we hire new employees at a level below market, with the intent to get their salaries to |
| 21 | | market within five to seven years. The bottom line is that, overall, our wages and |
| | | |

⁷ CUB/100, Jenks/4.

9 - REPLY TESTIMONY OF ANNE M. JONES

- 1 salaries are set at market, using an approach that is, as the Aon Hewitt Report confirms,
- 2 conservative.
- 3 Q. Does this complete your testimony?
- 4 A. Yes, it does.

Reply Testimony of Donna Genora

Taxes and Bonus Depreciation EXHIBIT CNG/700

| 1 | | I. INTRODUCTION AND SUMMARY |
|----|----|---|
| 2 | Q. | Please state your name, title and business address. |
| 3 | A. | My name is Donna Genora. I am the Tax Director for MDU Resources Group, Inc. |
| 4 | | (MDU Resources). My business address is 400 North Fourth Street, Bismarck, North |
| 5 | | Dakota 58501. |
| 6 | Q. | Would you please summarize your education and professional experience? |
| 7 | A. | I graduated from San Jose State University with a Bachelor of Science in Accounting |
| 8 | | and I am pursuing a Masters in Taxation from Villanova University School of Law. I have |
| 9 | | worked as a tax professional for over 20 years, holding positions of increasing |
| 10 | | responsibility in both public accounting and industry. I have held my current position at |
| 11 | | MDU Resources since February of 2015. Prior to joining MDU Resources, I served as |
| 12 | | the Tax Director for SOAProjects, from 2012 to 2015, and a Senior Tax Manager at |
| 13 | | Omnicell, Inc., and before that at Ernst & Young. |
| 14 | Q. | What is the purpose of your testimony in this proceeding? |
| 15 | A. | The purpose of my testimony is to respond to Staff's proposed adjustment to the |
| 16 | | Company's income tax calculation, and the resulting reduction to rate base. |
| 17 | Q. | Please explain Staff's proposed adjustment to the Company's proposed level of |
| 18 | | income taxes. |
| 19 | A. | Staff proposes that the Company's accumulated deferred income tax liability—or ADIT— |
| 20 | | be increased by \$4,094,231 million, which will result in a decrease to the Company's |

| 1 | | rate base in that same amount. ¹ Staff's proposal results in a revenue requirement |
|----|----|--|
| 2 | | reduction of \$437,000. |
| 3 | Q. | What is the reason for Staff's proposed adjustment? |
| 4 | A. | Cascade's income taxes are computed as part of a consolidated entity with all of the |
| 5 | | MDU Resources' companies. Staff claims that MDU Resources' decision not to take |
| 6 | | bonus depreciation for 2015 and 2016 was imprudent and detrimental to Cascade's |
| 7 | | customers. ² In particular, Staff argues that customers are negatively impacted because |
| 8 | | rates are increased for the new plant additions without the offset of deferred income |
| 9 | | taxes in rate base. ³ For that reason, Staff has considered the increase to the |
| 10 | | Company's deferred tax balance that would have resulted from a decision to elect bonus |
| 11 | 2 | depreciation in 2015 and 2016, and then used it to offset the Company's rate base in |
| 12 | | this case.⁴ |
| 13 | Q. | Please summarize the Company's response. |
| 14 | Α. | Cascade objects to Staff's proposal for three primary reasons: |
| 15 | | • First, MDU Resources' decision to opt out of bonus depreciation for 2015 and |
| 16 | | 2016 was based on important business considerations that benefitted the entire |
| 17 | | corporate family and Cascade's customers as well; |
| 18 | | • Second, Staff's proposed decrease to rate base would result in a normalization |
| 19 | | violation that could seriously harm the Company and its customers; and |

2 - REPLY TESTIMONY OF DONNA GENORA

¹ Staff/100, Gardner/20

² Staff/100, Gardner/17.

³ Staff/100, Gardner/18,

⁴ Staff/100, Gardner/20.

| 1 | | • Third, Cascade's customers have overall benefitted from paying taxes on a |
|----|----|---|
| 2 | | consolidated basis through lower rate base; it is inappropriate for Staff to ignore |
| 3 | | the net benefit received by customers while punishing the Company for a |
| 4 | | decision that in isolation may have contributed to a rate base increase. |
| 5 | Q. | In order to provide background, can you please explain what deferred taxes are |
| 6 | | and how they impact the utility ratemaking process? |
| 7 | Α. | Yes. Deferred income taxes arise when income tax amounts expensed for book |
| 8 | | purposes—and thus the amounts calculated and recovered in rates—differ from the |
| 9 | | amount of taxes that are currently due and payable by the utility to the federal |
| 10 | | government. These tax differences are primarily caused by the fact that taxes included |
| 11 | | in rates are calculated using straight-line depreciation rates, while state and federal tax |
| 12 | | authorities use accelerated depreciation—formally referred to as Modified Accelerated |
| 13 | | Cost-Recovery System (MACRS) to calculate tax obligations. Use of accelerated |
| 14 | | depreciations results in higher depreciation expense for tax purposes than for regulatory |
| 15 | | book purposes, in the early years of the life of the asset. The higher expense accrued |
| 16 | | will reflect as a reduction to profit for the period, causing the income taxes computed for |
| 17 | | regulatory purposes – and thus included in revenue requirement—to be higher than the |
| 18 | | taxes paid to the Internal Revenue Service (IRS) and state taxing authorities. In the later |
| 19 | | years in the life of the asset the situation reverses itself and the revenue requirement will |
| 20 | | include an amount less than is due in taxes. |
| 21 | Q. | Could you provide an example of how the timing differences created by |

22 accelerated depreciation result in deferred taxes?

3 - REPLY TESTIMONY OF DONNA GENORA

A. Yes. The first two columns of the table below illustrate the results of the timing
 differences created, assuming a \$3,000 asset, with a tax life of 3 years (resulting in
 \$1,000 depreciation per year depreciation expense) and book life of 5 years (\$600 per
 year depreciation expense), and a tax rate of 40 percent.

5

| INCOME TAX EFFECT OF 1 | DEPRECIATION EXPENSE' | | |
|------------------------|-----------------------|--|-----------------------------|
| IRS TAXES | BOOK TAXES | CURRENT YR. DIT | DIT BALANCE |
| \$1,000 x 40% = \$400 | \$600 x 40% = \$240 | \$400 - \$240 = \$160 | \$160 |
| \$1,000 x 40% = \$400 | \$600 x 40% = \$240 | \$400 - \$240 = \$160 | \$160 + \$160 = \$320 |
| \$1,000 x 40% = \$400 | \$600 x 40% = \$240 | \$400 - \$240 = \$160 | \$320 + \$160 = \$480 |
| 0 x 40% = 0 | \$600 x 40% = \$240 | \$ 0 - \$ 240 = (\$ 240) | \$480 - \$240 = \$240 |
| 0 x 40% = 0 | \$600 x 40% = \$240 | \$ 0 - \$240 = (\$240) | \$240 - \$240 = \$ 0 |

6

| 7 | As you can see from the third column, labelled "CURRENT YR DIT", these timing |
|---|---|
| 8 | differences result in deferred taxes in the first three years, and a deferred tax credit in |
| 9 | the last two years. |

10 Q. What is the ADIT?

11 Α. ADIT—which is shown in the last column of the table above labelled "DIT BALANCE" --12 refers to the accumulated balance of deferred taxes carried on the utility's books. As 13 you can see from the example above, for any one asset, the ADIT balance will increase 14 for a period of time, and then decrease down to zero, over the life of the asset. The 15 ADIT balance is available to the utility to invest until it is needed to fund the taxes due 16 and payable in the later years. For that reason, the ADIT is sometimes characterized as 17 an interest-free loan from the government. ADIT can either be a liability or asset. A 18 deferred tax liability (DTL) is a future tax payment and a deferred tax asset (DTL) 19 represents a future tax deduction.

4 - REPLY TESTIMONY OF DONNA GENORA

| 1 | Q. | How does the amount of the ADIT generally impact rates? |
|----|----------------|---|
| 2 | Α. | When the utility has a DTL, it is in effect receiving an interest-free loan from the |
| 3 | | government. Therefore, the DTL is applied as a deduction to rate base, thus decreasing |
| 4 | | customer rates. On the other hand, a DTA represents an interest free loan to the |
| 5 | | government. Because the company is not receiving interest on the loan, the amount of |
| 6 | | the DTA is added to rate base, thus increasing customer rates. |
| 7 | Q. | What is a net operating loss and how does it create a deferred tax asset? |
| 8 | Α. | A net operating loss (NOL) occurs when the Company's taxable deductions exceed |
| 9 | | taxable earnings in the current year. The IRS allows the NOL to be carried over to future |
| 10 | | years to be deducted against future taxable income, which creates a deferred tax asset. |
| 11 | Q. | Can you also explain what bonus depreciation is? |
| 12 | Α. | Since the beginning of the 2008 recession, Congress has used different approaches to |
| 13 | | boost the economy, including the allowance of "bonus depreciation"—which allows more |
| 14 | | rapid recovery of an investment, on the assumption that the money will be reinvested. |
| 15 | | Bonus depreciation allows companies to deduct from taxable income 50 percent to 100 |
| 16 | | percent of the cost of the new asset in the year of expenditure. As with accelerated |
| 17 | | depreciation, bonus depreciation reduces the taxable income of the company and the |
| 18 | | amount of income taxes that it must pay. For regulatory purposes, bonus depreciation |
| 19 | | increases the size of the ADIT in the year claimed. |
| 20 | Q. | It sounds as if bonus depreciation is a good thing for companies. Why did MDU |
| 21 | | Resources elect out of bonus for 2015 and 2016? |
| 22 | A _x | Bonus depreciation is generally a good thing for companies, insofar as it reduces the |
| 23 | | company's income tax obligation. However, if the company's income tax obligation is |
| | | |

| case, MDU Resource's tax obligation was already at zero for 2015 and 2016 even without bonus depreciation, because we experienced and expected to have significant net operating losses NOLs for both periods. As a result, the bonus depreciation would have provided no cash benefit to the company. Q. Net operating losses due to bonus depreciation can be carried over for as long as 20 years. Wouldn't it have made sense for the Company to elect bonus depreciation for 2015 and 2016, and simply carry the net operating loss forward, to reduce the Company's tax obligation in some future year when the Company is not operating at a loss? |
|---|
| net operating losses NOLs for both periods. As a result, the bonus depreciation would have provided no cash benefit to the company. Q. Wouldn't it have made sense for the Company to elect bonus depreciation for 2015 and 2016, and simply carry the net operating loss forward, to reduce the Company's tax obligation in some future year when the Company is not operating at a loss? |
| have provided no cash benefit to the company. Q. Net operating losses due to bonus depreciation can be carried over for as long as 20 years. Wouldn't it have made sense for the Company to elect bonus depreciation for 2015 and 2016, and simply carry the net operating loss forward, to reduce the Company's tax obligation in some future year when the Company is not operating at a loss? |
| 6 Q. Net operating losses due to bonus depreciation can be carried over for as long as 20 years. Wouldn't it have made sense for the Company to elect bonus depreciation for 2015 and 2016, and simply carry the net operating loss forward, to 9 reduce the Company's tax obligation in some future year when the Company is 10 not operating at a loss? |
| 20 years. Wouldn't it have made sense for the Company to elect bonus depreciation for 2015 and 2016, and simply carry the net operating loss forward, to reduce the Company's tax obligation in some future year when the Company is not operating at a loss? |
| depreciation for 2015 and 2016, and simply carry the net operating loss forward, to reduce the Company's tax obligation in some future year when the Company is not operating at a loss? |
| 9 reduce the Company's tax obligation in some future year when the Company is 10 not operating at a loss? |
| 10 not operating at a loss? |
| |
| |
| 11 A. No. It is true that net operating losses due to bonus depreciation can be carried forward |
| 12 to future years, and act as an addition tax deduction on future returns. However, there |
| 13 are other business considerations that the Company factors in when it determines |
| 14 whether to elect bonus depreciation. |
| 15 As explained by Staff, the Company did elect to take bonus depreciation in years |
| 16 2008 through 2014. However, in 2015 the company was impacted by two colliding |
| 17 factors. First, Cascade, along with other utility partners, had record capital expenditure |
| 18 during 2015. Second, MDU Resources experienced unprecedented changes in the oil & |
| 19 gas industry. Management and its Board of Directors, adopted a strategy to lower risk in |
| 20 MDU Resources Group business mix/portfolio and accordingly sold off assets and lines |
| of business with high volatility. The strategy was adopted to strengthen the company's |
| 22 credit profile, which reflects metrics valued by our utility investors. These two factors |
| created significant tax NOLs that across the board put at eminent risk our ability to |

| 1 | | realize state income tax credits earned together with other permanent tax benefits. |
|----|----|--|
| 2 | | These would be detriments of a permanent nature as opposed to temporary differences |
| 3 | | created by bonus depreciation. |
| 4 | Q. | What was the result of this strategy? |
| 5 | Α. | The market and investors have look favorably on these decisions and our outlook is |
| 6 | | solid. However, this has been an unusual and extraordinary circumstance that is not |
| 7 | | indicative of past or future. With respect to bonus depreciation, we reiterate that opting |
| 8 | | out of bonus depreciation is an exception but an available tool only when necessary. |
| 9 | Q. | Regardless of the reason MDU Resources did not take bonus depreciation for |
| 10 | | 2015 and 2016, why shouldn't Cascade's customers get the benefit of a bonus |
| 11 | | depreciation election? In other words, why shouldn't the Commission accept |
| 12 | | Staff's proposal to offset rate base as if the Company had elected bonus |
| 13 | | depreciation—which would have increased the Company's ADIT and thus served |
| 14 | | as a further reduction to rate base? |
| 15 | Α, | Because even if the Company had elected bonus depreciation, it would have received |
| 16 | | no benefit from the election—and therefore any associated ADIT would not appropriately |
| 17 | | have been offset against rate base. |
| 18 | Q. | Please explain further. |
| 19 | Α. | Let's assume that MDU Resources <i>had</i> elected bonus depreciation for the 2015 and |
| 20 | | 2016 tax years. That election would have increased Cascade's ADIT. However, |
| 21 | | because MDU Resources was already in a net operating loss position, even before the |
| 22 | | election, any tax benefits associated with the increased net operating loss will be |
| 23 | | delayed until a future tax year. As a result, MDU Resources would not have received a |

| 1 | | cash benefit. And that for that reason, it would not have been appropriate to use the |
|----|----|---|
| 2 | | ADIT associated with the bonus deprecation as an offset to rate base. As explained |
| 3 | | above, the reason regulatory commissions use ADIT as an offset to rate base is |
| 4 | | because it acts like an interest-free loan, with the utility getting free use of cash until the |
| 5 | | associated taxes are due. However, in our case, MDU Resources would have received |
| 6 | | no benefit until some future date, so an offset to rate base today would make no sense. |
| 7 | Q. | What would be the consequence if the Commission accepted Staff's adjustment to |
| 8 | | ADIT and consequent reduction to rate base? Increasing the amount of ADIT as if |
| 9 | | bonus was taken in 2015 for purpose of rate making, which is not reflective with our |
| 10 | | 2015 income tax filing, would be inconsistent with the normalization requirements, and |
| 11 | | result in a normalization violation. |
| 12 | Q. | What is normalization? |
| 13 | Α. | Normalization spreads the tax benefits associated with utility assets over the same |
| 14 | | period that the costs of those assets are recovered from customers. It seeks to treat |
| 15 | | current and future utility customers equitably by allowing all customers to enjoy the tax |
| 16 | | benefits of depreciation. |
| 17 | Q. | What is a normalization violation? |
| 18 | Α. | Although the normalization regulations are complex, generally speaking, any action that |
| 19 | | passes the benefits of accelerated depreciation, including bonus depreciation, to |
| 20 | | customers faster or in an amount greater than the related tax benefits are realized by the |
| 21 | | company is a normalization violation. When accelerated depreciation first became tax |
| 22 | | law, Congress included a provision in the legislation requiring the normalization method |
| 23 | | of accounting to be used in order to ensure that the company claiming deductions under |
| | | |

| 1 | | the new law received the benefits of accelerated depreciation. If a utility were required to |
|----|----|--|
| 2 | | "flow through" the benefit to customers in the ratemaking process, then the intent of |
| 3 | | Congress would be thwarted. The provision insured that accelerated depreciation would |
| 4 | | remain a viable means of stimulating the economy when Congress so desired. For a |
| 5 | | regulated utility, the normalization method of accounting for accelerated depreciation |
| 6 | | requires the recording of deferred income tax liabilities resulting from the differences |
| 7 | | between book depreciation and the accelerated tax depreciation on which taxes are |
| 8 | | calculated. As previously mentioned, the normalization method of accounting prohibits |
| 9 | | passing through the benefits of accelerated depreciation to ratepayers faster than the |
| 10 | | benefits are realized or monetized by the company. An example of a normalization |
| 11 | | violation would be a reduction of Cascade's rate base through tax deduction for bonus |
| 12 | | depreciation, when Cascade did not actually claim that deduction on its tax return, or in |
| 13 | | an amount greater than used to reduce the utility's tax liability to the government. |
| 14 | Q. | What happens if the Company is found to have committed a normalization |
| 15 | | violation? |
| 16 | Α. | If Cascade were found to have violated the federal normalization requirements, it would |
| 17 | | be limited to using only regulatory (book) depreciation for tax purposes henceforth, |
| 18 | | meaning that the company could not take advantage of any additional accelerated |
| 19 | | depreciation, including MACRS or bonus depreciation, at any time in the future. This |
| 20 | | would deprive the company of source zero-cost capital, which is extended to the |
| 21 | | company in the form of deferred liabilities for taxes owed to the government. The effect |
| 22 | | of a normalization violation would be to risk permanently removing a source of zero-cost |
| 23 | | capital, thereby increasing the Company's cost of capital and harming ratepayers. |

Q. Are there other problems with Staff's adjustment? 1 2 Α. The proposed adjustment is overstated because Staff has neglected to consider the 3 additional deferred tax asset produced by the net operating loss-which would increase 4 customer rates. 5 Q. Please explain. For a complete picture, we need to examine the effect of NOL carry-overs. As described 6 Α. 7 above, NOLs can be carried forward as credits against future taxes due. These carried-8 over NOLs result in deferred tax assets. In our case, had Cascade taken bonus 9 depreciation in 2015 and 2016 on a standalone basis, as Staff proposes it should have, Cascade would have been in an NOL position, which results in a DTA which would have 10 to be added to rate base. 11 Staff's adjustment seeks to set Cascade's rate recovery as if it had elected bonus 12 Q. depreciation for 2015 and 2016, on a standalone basis. Have you analyzed 13 whether Cascade's customers have benefitted by virtue of the fact that they have 14 filed taxes on a consolidated basis with MDU Resources? 15 16 Α. Yes. Since 2008, the consolidated group of MDU Resources has consistently been able to use Cascade's stand-alone taxable losses. As such, Cascade's customers have 17 18 enjoyed the benefit of cash inflows for the monetization of these taxable losses on an 19 annual basis. 20 Q. Have you calculated the benefits that Cascade's customers have received? 21

10 - REPLY TESTIMONY OF DONNA GENORA

| 1 | Α. | Yes. I compared Cascade's rate base as it exists today—and as presented in this |
|----|----|---|
| 2 | | case—with what it would have been had Cascade been filing its taxes on a standalone |
| 3 | | basis 2008 to 2014, and taking bonus depreciation in each year. |
| 4 | Q. | What is the result? |
| 5 | A. | The result is an increase to ADIT of \$2.8 million dollars, which translates to a \$350,000 |
| 6 | | annual reduction in revenue requirement. |
| 7 | Q. | Please explain. |
| 8 | Α. | The \$350,000 is the annual revenue requirement benefit that Cascade customers have |
| 9 | | received as a result of the additional ADIT the Company has over what it would have |
| 10 | | today, had Cascade filed on a standalone basis. This benefit is calculated by measuring |
| 11 | | the effect of the NOL generated from accelerated depreciation and bonus depreciation |
| 12 | | that the Company would have experienced on a stand-alone basis and comparing it to |
| 13 | | what was actually included in rate base. Furthermore, Staff's proposal to impute ADIT |
| 14 | | as if bonus were taken (omitting normalization implications and the ability to use all of |
| 15 | | the bonus depreciation on a stand-alone basis) 2015 & 2016 would have an incremental |
| 16 | | \$1.4 million rate base increase or if you like a \$4.2 million cumulative effect. This |
| 17 | | calculation is shown in CNGC/701. |
| 18 | Q. | Does this conclude your testimony? |
| 19 | A. | Yes. |

i - REPLY TESTIMONY OF TAMMY NYGARD

| 1 | | I. INTRODUCTION AND SUMMARY |
|----|----|---|
| 2 | Q. | Please state your name and business address. |
| 3 | Α. | My name is Tammy Nygard and my business address is 400 North Fourth Street, |
| 4 | | Bismarck, North Dakota 58501. |
| 5 | Q. | By whom are you employed and in what capacity? |
| 6 | A. | I am the Controller for the MDU Utilities Group which provides leadership and services |
| 7 | | for the four utility brands associated with MDU Resources Group, Inc. (MDU Resources): |
| 8 | | Cascade Natural Gas Corporation (Cascade), Intermountain Gas Company |
| 9 | | (Intermountain), Montana-Dakota Utilities Co. (Montana-Dakota) and Great Plains |
| 10 | | Natural Gas Co. (Great Plains). |
| 11 | Q. | What are your duties and responsibilities with the MDU Utilities Group? |
| 12 | Α. | I am responsible for management of the accounting and the financial |
| 13 | | forecasting/planning functions, including the analysis and reporting of all financial |
| 14 | | transactions for Cascade, Intermountain, Montana-Dakota, and Great Plains. |
| 15 | Q. | Please describe your educational and professional background. |
| 16 | Α. | I graduated from the University of Mary with a Bachelor of Science degree in Accounting |
| 17 | | and Computer Information Systems. I started my career with Montana-Dakota in 2002 in |
| 18 | | a professional development role and during my tenure with the Company have held |
| 19 | | positions of increasing responsibility, including Financial Analyst for Montana-Dakota as |
| 20 | | well as Director of Accounting and Finance for Cascade. |
| 21 | Q. | Did you provide direct testimony in this proceeding? |
| 22 | Α. | No. |

| 1 | Q. | What is the purpose of your reply testimony? |
|----|----|---|
| 2 | Α. | I provide additional background regarding the corporate structure of MDU Resources, |
| 3 | | provide information regarding the overall reasonableness of Cascade's administrative |
| 4 | | and general (A&G) expenses, and respond to several of the adjustments proposed by |
| 5 | | Mr. Lance Kaufman on behalf of Staff regarding inter-company allocations. |
| 6 | Q. | Do any other Cascade witnesses respond to the Mr. Kaufman's adjustment |
| 7 | | regarding inter-company allocations? |
| 8 | Α. | Yes. Mark Chiles also addresses Mr. Kaufman's adjustment regarding allocations, |
| 9 | | specifically with regard to inter-company allocation of costs related to customer service |
| 10 | | functions. |
| 11 | Q. | Please summarize your testimony. |
| 12 | Α. | In my testimony, I: |
| 13 | | Provide background regarding MDU Resources' corporate structure, and |
| 14 | | describe the overall reasonableness of Cascade's A&G expenses. I also |
| 15 | | respond to Mr. Kaufman's comments regarding the transparency of inter- |
| 16 | | company cost allocations. I explain why Mr. Kaufman's adjustment regarding |
| 17 | | general overhead allocation incorrectly includes capitalization of MDU |
| 18 | | Resources' unregulated subsidiaries. I also respond to Mr. Kaufman's proposed |
| 19 | | adjustments for expenses with no supporting description and those expenses |
| 20 | | described by Mr. Kaufman as "non-utility" costs by providing additional |
| 21 | | justification and support for the expenses. Finally, I address Mr. Kaufman's |
| 22 | | adjustment regarding affiliated rent charges, and propose modifications to Mr. |
| 23 | | Kaufman's adjustment. |

| 1 | | Describe the corporate structure of MDU Resources and explain why Cascade's |
|----|----|--|
| 2 | | overall share of A&G expenses is low compared to other similarly situated |
| 3 | | utilities, as further described in Sections II and III of my testimony. I propose |
| 4 | | holding a workshop so that Staff and interested stakeholders may gain a better |
| 5 | | understanding of MDU Resources' methodology for cost allocation in Section IV |
| 6 | | of my testimony. I demonstrate that the Company's methodology for inter- |
| 7 | | company allocations is reasonable and I also demonstrate that the expenses |
| 8 | | described by Mr. Kaufman as non-utility expenses or expenses having no |
| 9 | | supporting description are prudently incurred utility costs that are appropriate for |
| 10 | | recovery in rates in Section V, VI, and VII of my testimony. Finally, I demonstrate |
| 11 | | that the Company's methodology for calculating rent charges is reasonable, as |
| 12 | | modified to accept Mr. Kaufman's recommendations regarding cost of capital and |
| 13 | | net plant balances assumed in the rent charges as described further below in |
| 14 | | Sections VIII, IX, and X of my testimony. |
| 15 | Q. | Did you prepare any exhibits in support of your testimony? |
| 16 | Α, | Yes, I prepared the following exhibits: |
| 17 | • | Exhibit CNGC/801 - Organizational Chart |
| 18 | • | Exhibit CNGC/802 - Cascade Administrative and General Study |
| 19 | • | Exhibit CNGC/803 – Cascade Administrative and General Benchmark Analysis |
| 20 | • | Confidential Exhibit CNGC/804 - MDU Resources Corporate Overhead Allocation Factor |
| 21 | ٠ | Exhibit CNGC/805 - Summary of Reply to Staff's "Non-Utility Costs" Adjustment |
| 22 | | Exhibit CNGC/806 - Cascade Rental Receipt Calculation |

| 1 | • | Exhibit CNGC/807 - Intermountain Rental Receipt Calculation |
|----|----|---|
| 2 | • | Exhibit CNGC/808 - FutureSource Cost of Service |
| 3 | • | Exhibit CNGC/809 - Description of FutureSource Expenses and Cost Allocation |
| 4 | • | Exhibit CNGC/810 - MDU Rental Receipt Calculation |
| 5 | | II. CORPORATE STRUCTURE OF MDU RESOURCES |
| 6 | Q. | What is the Company's relationship to MDU Resources? |
| 7 | A. | Cascade is a wholly-owned subsidiary of MDU Resources. MDU Resources is located |
| 8 | | in Bismarck, North Dakota. |
| 9 | Q. | Please briefly describe the corporate structure of MDU Resources. |
| 10 | Α. | MDU Resources is the parent company of Cascade and Intermountain, as well as its |
| 11 | | unregulated subsidiaries (WBI Holdings, Knife River, Construction Services, and |
| 12 | | FutureSource). Montana-Dakota and Great Plains are divisions of MDU Resources. |
| 13 | | The MDU Utilities Group is an operating division of MDU Resources, which provides |
| 14 | | leadership and services to MDU Resources' utility brands. Please see my Exhibit |
| 15 | | CNGC/801 for an organizational chart depicting the corporate structure of MDU |
| 16 | | Resources. |
| 17 | Q. | Please describe each utility brand. |
| 18 | А. | The four utility brands include Cascade, Intermountain, Montana-Dakota, and Great |
| 19 | | Plains. The following is a high level overview of each brand: |
| 20 | | Cascade provides natural gas service in Oregon and Washington. As of December |
| 21 | | 31, 2015, Cascade served 69,833 retail customers in Oregon and 207,160 retail |
| 22 | | customers in Washington. |

| 1 | | As of December 31, 2015, Intermountain provided natural gas service in Idaho to |
|----|----|--|
| 2 | | 338,149 retail customers. |
| 3 | | Montana-Dakota provides both natural gas and electric service in Montana, |
| 4 | | Wyoming, North Dakota, and South Dakota. As of December 31, 2015, Montana- |
| 5 | | Dakota served 189,612 natural gas-only retail customers, 64,698 electric-only retail |
| 6 | | customers, and 77,889 combined natural gas and electric retail customers. |
| 7 | | Great Plains provides natural gas service in Minnesota and North Dakota. Great |
| 8 | | Plains serves 21,520 customers in Minnesota and 2,182 customers in North Dakota. |
| 9 | | III. REASONABLENESS OF CASCADE'S A&G EXPENSE |
| 10 | Q. | Please provide some context for Cascade's overall A&G expense. |
| 11 | Α. | In August 2016, Cascade completed a study regarding Cascade's A&G expenses. The |
| 12 | | results of the study demonstrate that Cascade has maintained a relatively low A&G |
| 13 | | expense per customer compared with other gas utilities in the region and across the |
| 14 | | country. Specifically, Cascade's 2014 A&G expense was \$84.86 per customer, which is |
| 15 | | lower than both the mean and median A&G per customer for gas utilities in the west and |
| 16 | | nationwide. ¹ |
| 17 | Q. | Is Cascade's A&G expense as a subsidiary of MDU Resources less than it would |
| 18 | | be for Cascade as a standalone utility? |
| 19 | Α. | Yes. As a condition of the acquisition of Cascade by MDU Resources, Cascade |
| 20 | | committed that "for Oregon regulatory purposes, that commencing with the closing of the |

¹ See Exhibit CNGC/802, Nygard/1 and Nygard/4.

5 - REPLY TESTIMONY OF TAMMY NYGARD

| 1 | | Transaction and through December 31, 2012, the allocated shared corporate costs, as |
|----|----|---|
| 2 | | well as its allocated and assigned utility division costs, will not exceed the costs the |
| 3 | | Cascade customers would otherwise have paid absent the acquisition, as adjusted for |
| 4 | | changes in the Consumer Price Index." ² As provided in section (a) of Commitment 10, |
| 5 | | compliance is determined through comparison with a 2005 Benchmark adjusted annually |
| 6 | | by the increase in the Consumer Price Index (CPI). Through December 31, 2012, |
| 7 | | Cascade filed an annual earnings report with the Public Utility Commission of Oregon |
| 8 | | (Commission) showing the calculation of actual A&G expense compared to the 2005 |
| 9 | | benchmark as adjusted for CPI and demonstrating that the Company has stayed under |
| 10 | | the threshold for A&G costs as adjusted for changes in CPI. Although Cascade no |
| 11 | | longer files the comparison to the 2005 A&G benchmark with the Commission, Cascade |
| 12 | | still performs this analysis. As shown in Exhibit CNGC/803, Cascade's 2015 A&G |
| 13 | | expense is still below the 2005 benchmark as adjusted for CPI. |
| 14 | | IV. TRANSPARENCY OF ALLOCATION METHODOLOGY |
| 15 | Q. | Mr. Kaufman comments that the MDU Resources' methodology for allocating |
| 16 | | costs to Cascade is not transparent. ³ How do you respond? |
| 17 | Α. | Throughout this proceeding, Cascade has endeavored to provide clear and accurate |
| 18 | | information regarding the methodology used to allocate costs from MDU Resources to |
| 19 | | Cascade. These efforts include responses to data requests as well as informal meetings |
| | | |

20 with Staff. Nevertheless, Cascade acknowledges that its allocation methodology is

6 - REPLY TESTIMONY OF TAMMY NYGARD

 ² In the Matter of MDU Resources Group, Inc. Application for Authorization to Acquire Cascade Natural Gas Corporation, Docket No. UM 1283, Order No. 07-221, Attachment A at 16 (June 5, 2007).
 ³ Staff/1000, Kaufman/6.

| 1 | | complicated and the documentation may be a bit confusing, and that additional |
|----|----|--|
| 2 | | explanation beyond what has been provided to date may be useful to Staff and other |
| 3 | | parties. To help Staff and other interested stakeholders better understand the allocation |
| 4 | | methodology used by the Company, Cascade proposes to hold a workshop regarding |
| 5 | | the allocation methodology. Montana-Dakota and Cascade will make its staff available |
| 6 | | to provide a presentation regarding the allocation methodology, and Staff and other |
| 7 | | interested stakeholders may ask questions as needed. Montana-Dakota and Cascade |
| 8 | | will also share information about their accounting system which will help parties |
| 9 | | understand the allocation process. |
| 10 | Q. | Where and when do you propose to offer the workshop regarding the allocation |
| 11 | | methodology? |
| 12 | Α. | Cascade proposes to offer the workshop at the Commission in Salem, Oregon in the |
| 13 | | second quarter of 2017. |
| 14 | Q. | Does Mr. Kaufman propose an adjustment in connection with his comment |
| 15 | | regarding the transparency of the allocation methodology? |
| 16 | Α. | No. |
| 17 | | V. GENERAL OVERHEAD ALLOCATION |
| 18 | Q. | How does MDU Resources allocate corporate overhead? |
| 19 | Α. | MDU Resources allocates corporate overhead based on each of its business unit's |
| 20 | | corporate allocation factor. The corporate allocation factor is determined by the relative |
| 21 | | capitalization of each business unit as a percentage of overall capitalization of MDU |
| 22 | | Resources. Cascade's corporate allocation factor—which reflects the Company's |
| 23 | | capitalization relative to MDU Resources' other business units—is 10.4 percent. The |

| 1 | | confidential Exhibit CNGC/804. The capital investment in Cascade—along with the |
|----|----|--|
| 2 | | other subsidiaries' capital investment amounts—were used to calculate the corporate |
| 3 | | overhead allocation factors. If the investment in the unregulated subsidiaries of \$2.4 |
| 4 | | billion is not removed, it would result in double counting capital investment. Montana- |
| 5 | | Dakota is a division of MDU Resources, not a subsidiary of MDU Resources. Therefore, |
| 6 | | you see the removal of the investment in the subsidiaries in the MDU Utilities Group |
| 7 | | (labeled as "Utilities Group") column in the Cascade allocation manual. ⁸ The 10.4% |
| 8 | | allocation for Cascade is correct. |
| 9 | Q. | Why does including the subsidiaries result in double counting? |
| 10 | Α. | As explained above, because of MDU Resources' corporate structure and the required |
| 11 | | Generally Accepted Accounting Principles (GAAP) accounting, the investment in the |
| 12 | | subsidiaries are included in Montana-Dakota's books. In the table on page 24 of |
| 13 | | Cascade's allocation manual, the investment is accounted for again for each business |
| 14 | | unit individually. ⁹ Thus, to avoid double-counting the investment in subsidiaries, it is |
| 15 | | necessary to remove \$2.4 billion from the MDU Utilities Group (Utilities Group) column. |
| 16 | | VI. EXPENSES WITH NO SUPPORTING DESCRIPTION |
| 17 | Q. | Please describe Mr. Kaufman's proposed adjustment regarding certain MDU |
| 18 | | Resources expenses allocated to Cascade for which no narrative description was |
| 19 | | provided? |
| 20 | Α. | Mr. Kaufman proposed removing expenses for which no narrative description was |
| 21 | | included on the spreadsheets documenting the charges to Cascade. Based on this |
| | | |

8 Staff/1002, Kaufman/26,

9 Staff/1002, Kaufman/26.

9 - REPLY TESTIMONY OF TAMMY NYGARD

- concern, Mr. Kaufman proposes a recommended reduction \$234,201 on a total system
 basis, or \$57,894 Oregon-basis.¹⁰
- 3 Q. Is Mr. Kaufman's proposed adjustment appropriate?

No. The expenses Mr. Kaufman proposes to exclude are primarily related to payroll and Α. 4 5 benefits which are cross charges of employee time from MDU Resources. And while the Company has not provided narrative descriptions of these costs on the supporting 6 spreadsheets, they can clearly be recognized as payroll and benefit costs by the 7 reference number in the object code column,¹¹—object code 7110 indicates payroll and 8 object codes 8191-8199 indicate benefits. The Company provided the key to these 9 object codes in response to Staff's Data Request No. 122. The first digit of the object 10 codes for MDU Resources is a 7 or 8 whereas the first digit of the objects codes for 11 Cascade's is a 5. Thus, the documentation provided by the Company demonstrates that 12 the charged costs are legitimate utility expenses that should be recovered in rates. 13 VII. NON-UTILITY EXPENSES 14 Please describe Mr. Kaufman's proposed adjustment for expenses he claims do 15 Q. 16 not have a utility purpose. Mr. Kaufman reviewed the MDU Resources, Montana-Dakota and Intermountain 17 Α. expenses allocated to Cascade and concluded that certain expenses do not have a 18 utility purpose, such as expenses for a corporate jet and private hanger, "flights to Palm 19 Springs for Board of Director meetings held at luxury estates, golf supplies, golf green 20

¹⁰ Staff/1000, Kaufman/10.

10 - REPLY TESTIMONY OF TAMMY NYGARD

¹¹ The object code is in included in Staff's workpapers, Excel file 1005 Corporate Allocations, tab MDUR (4760500), Column H.

| 1 | | fees, jewelry purchases, lobbying expenses and investor relation expenses." Mr. | | | | | | | |
|----|----|--|--|--|--|--|--|--|--|
| 2 | | Kaufman's proposed adjustment to remove these expenses would result in a reduction | | | | | | | |
| 3 | | of \$334,770 on a total system basis, or \$82,755 on an Oregon basis. | | | | | | | |
| 4 | Q. | Do you agree with Mr. Kaufman's proposed adjustment? | | | | | | | |
| 5 | Α. | Yes, in part. Cascade inadvertently included certain costs that are inappropriate for | | | | | | | |
| 6 | | inclusion in utility rates, and accordingly is removing those expenses. The expenses | | | | | | | |
| 7 | | that Cascade agrees should be removed are for event sponsorships, lobbying, | | | | | | | |
| 8 | | advertising, public relations and expenses specific to Knife River or Construction | | | | | | | |
| 9 | | Services Group. These adjustments result in a reduction of \$25,144 on a total system | | | | | | | |
| 10 | | basis, or \$6,216 on an Oregon-basis. | | | | | | | |
| 11 | Q. | Do you agree that golf related expenses and jewelry purchases should be | | | | | | | |
| 12 | | removed? | | | | | | | |
| 13 | Α. | No. The golf-related expenses are for corporate team building and are important to | | | | | | | |
| 14 | | building positive company morale, and the jewelry purchases were for service | | | | | | | |
| 15 | | anniversary awards. Consistent with the Commission's prior treatment of cost recovery | | | | | | | |
| 16 | | for team building activities and gifts to employees, ¹² it is appropriate to share cost | | | | | | | |
| 17 | | recovery for these expenses equally between customers and shareholders. Cascade | | | | | | | |
| 18 | | proposes to share these costs equally between customers and shareholders, which | | | | | | | |
| 19 | | results in a reduction of \$2,143 on a total system basis, or \$530 on an Oregon-basis. | | | | | | | |

¹² See In the Matter of Portland Gen. Elec. Co., Request for a Gen. Rate Revision, Docket No. UE 197, Order No. 09-020 at 20-21 (Jan. 22, 2009).

11 - REPLY TESTIMONY OF TAMMY NYGARD

| 1 | Q. | Do you agree that expenses for a corporate jet and hanger, expenses associated | | | |
|----|----|--|--|--|--|
| 2 | | with Board of Directors meetings, and investor relations expenses should be | | | |
| 3 | | excluded? | | | |
| 4 | Α. | No. These costs are legitimate costs of doing business, and are spread across the | | | |
| 5 | | organization. | | | |
| 6 | Q. | Please explain why the corporate jet expenses are appropriately allocated to | | | |
| 7 | | Cascade. | | | |
| 8 | Α. | The corporate jet provides an important and cost effective alternative to commercial | | | |
| 9 | | travel in many specific circumstances. MDU Resources and its executives are located in | | | |
| 10 | | Bismarck, North Dakota—which has a small regional airport with limited flight options. | | | |
| 11 | | As a result, if our executives need to attend a meeting in another city, flying commercial | | | |
| 12 | | would mean flying out the day before the meeting and returning home the day after, | | | |
| 13 | | which involves overnight lodging and meals and wasted time. By comparison, use of the | | | |
| 14 | | corporate jet allows us to complete roundtrip travel on the same day. Thus, the | | | |
| 15 | | corporate jet provides a less costly alternative mode of transportation for MDU | | | |
| 16 | | Resources personnel, particularly when four or more people are all travelling to the | | | |
| 17 | | same destination. As described further below, the MDU Resources travel coordinators | | | |
| 18 | | perform an analysis for each flight to determine whether it is more cost effective to use | | | |
| 19 | | the corporate jet or to book commercial flights. | | | |
| 20 | Q. | Please provide examples as to when the corporate jet may be used and charged to | | | |
| 21 | | Cascade. | | | |
| 22 | A. | The corporate jet is used and may be charged to Cascade when MDU Utilities Group | | | |
| 23 | | executives from Bismarck and Boise fly to Salem and Olympia for meetings at the Public | | | |
| | | | | | |

| 1 | | Utility Commission of Oregon and Washington Utilities and Transportation Commission. |
|----|----|--|
| 2 | | Additionally, Cascade may be charged for a portion (according to its corporate allocation |
| 3 | | factor) of the corporate jet expenses for MDU Resources executives to fly for out of town |
| 4 | | meetings, such as utility financing meetings and meetings with ratings agencies. |
| 5 | Q. | What steps does the MDU Resources travel department take to ensure that use of |
| 6 | | the corporate jet economical? |
| 7 | A. | The MDU Resources travel department analyzes the cost effectiveness of each flight |
| 8 | | using the corporate jet in comparison with commercial travel. In particular, the variable |
| 9 | | costs of using the corporate jet (<i>i.e.</i> , pilot time for temporary pilots, airport fees and fuel) |
| 10 | | are compared with the costs of commercial travel. |
| 11 | Q. | Are there also fixed costs associated with the corporate jet? |
| 12 | A. | Yes. The fixed costs include depreciation of the aircraft, pilot payroll (non-temporary |
| 13 | | pilots), and the hanger facilities as well as insurance and the return component. |
| 14 | Q. | What factors do the travel coordinators in the MDU Resources travel department |
| 15 | | analyze to determine the cost-effectiveness of using the corporate jet compared to |
| 16 | | using commercial flights? |
| 17 | A. | The travel coordinators consider not only the cost of the commercial airline ticket, but |
| 18 | | also other factors that may entail additional costs such as additional hotel rooms, rental |
| 19 | | car expense and days of travel. The travel coordinators also consider the minimum |
| 20 | | passenger ratio. For example, flying three people from Bismarck to Minneapolis will not |
| 21 | | justify use of the corporate jet, but flying four or more people will typically be less |
| 22 | | expensive than flying commercial. |

Can you provide an example cost comparison? 1 Q. For example, a round trip of five MDU Utilities Group staff traveling from Bismarck to 2 Α. Salem would cost \$648/person on the corporate jet compared to \$807/person 3 4 commercial. How are costs for the corporate jet billed to each business unit? 5 Q. Costs for usage of the aircraft are billed based upon the number of individuals from each 6 Α. business unit utilizing the aircraft for each leg of travel and based upon an hourly usage 7 rate. The rate is determined based on an estimate of the variable costs associated with 8 9 the aircraft usage. If the aircraft is utilized by MDU Resources employees (i.e., debt ratings agencies, investment analyst presentations, etc.), the hourly usage charges for 10 the specific travel are chargeable to all business units based on the corporate allocation 11 factor. On the other hand, if the aircraft is utilized by employees of a particular utility for 12 the sole benefit of that utility, charges for the specific travel are chargeable to the utility. 13 Are fixed costs charged differently than variable costs? 14 Q. Yes. Fixed costs are billed to all business units according to their respective corporate 15 Α. 16 allocation factors. Please describe the expenses associated with Board of Directors meetings that 17 Q. 18 Mr. Kaufman proposes to exclude. Mr. Kaufman proposes to exclude expenses associated with a 2015 Board of Directors 19 Α. 20 meeting in Palm Springs, California. Why was it reasonable for the Board of Directors to meet in Palm Springs? 21 Q. The Board of Directors had requested a private, off-site location for the February 2015 22 Α. 23 strategic planning meeting. The secluded location at the Smoke Tree Ranch in Palm

14 - REPLY TESTIMONY OF TAMMY NYGARD

| 1 | | Springs, California included lodging and meeting facilities that provided the Board of |
|----|----|--|
| 2 | | Directors the ability to focus on strategic planning without distraction. Contrary to Mr. |
| 3 | | Kaufman's assertions, the Board of Directors did not stay at a "luxury estate." ¹³ In |
| 4 | | arranging for the meeting location and lodging for Board of Directors meetings, the travel |
| 5 | | department considers the available options and carefully selects a reasonably priced |
| 6 | | option that will provide appropriate facilities for the type of meeting to be held. |
| 7 | Q. | Please describe the investor relations expenses that Mr. Kaufman proposes to |
| 8 | | exclude. |
| 9 | Α. | These expenses include costs associated with utility business such as financing |
| 10 | | meetings and meetings with ratings agencies. These meetings are essential to the |
| 11 | | financial health of the utility and directly benefit Cascade customers by ensuring access |
| 12 | | to low-cost capital. There is no precedent to suggest that these are not legitimate utility |
| 13 | | costs and there is no basis for Mr. Kaufman's proposal to exclude such costs from rates. |
| 14 | Q. | Have you prepared workpapers that provide additional descriptions regarding the |
| 15 | | expenses that Mr. Kaufman has characterized as "non-utility" expenses? |
| 16 | Α. | Yes. I have added descriptions for the expenses that Mr. Kaufman proposed to remove |
| 17 | | as "non-utility" expenses. The additional detail regarding these expenses is provided in |
| 18 | | my workpapers in the Excel file Nygard Reply Workpapers for Exhibit CNGC/805, tabs |
| 19 | | MDUR (4760500), 47660 DA, and 47662 DA, in the far right hand column. |
| | | |

¹³ Staff/1000, Kaufman/9.

15 - REPLY TESTIMONY OF TAMMY NYGARD

| 1 | Q. | What conclusions can be drawn from reviewing the additional descriptions for the | | | | | | | |
|----|----|--|--|--|--|--|--|--|--|
| 2 | | expenses that Mr. Kaufman characterized as "non-utility" expenses? | | | | | | | |
| 3 | Α. | The additional descriptions identify nearly all costs as legitimate business expenses, with | | | | | | | |
| 4 | | the exclusion of costs such as event sponsorship, lobbying, advertising, public relations | | | | | | | |
| 5 | | and expenses specific to Knife River or Construction Services Group. Additionally, | | | | | | | |
| 6 | | Cascade proposes to share 50-50 cost recovery for corporate team building activities | | | | | | | |
| 7 | | and gifts to employees. Accordingly, Cascade proposes that the appropriate adjustment | | | | | | | |
| 8 | | to remove non-utility expenses is a reduction of \$32,278 on a total system basis, or | | | | | | | |
| 9 | | \$7,979 on an Oregon-basis as shown in my Exhibit CNGC/805. | | | | | | | |
| 10 | | VIII. AFFILIATED RENT RECEIPT | | | | | | | |
| 11 | Q. | Do the utility brands in the MDU Utilities Group charge each other rent for use of | | | | | | | |
| 12 | | their office buildings and other facilities? | | | | | | | |
| 13 | Α. | Yes. | | | | | | | |
| 14 | Q. | Why do the utility brands charge each other rent? | | | | | | | |
| 15 | Α. | Certain groups of employees perform functions for the benefit of all utility brands. For | | | | | | | |
| 16 | | example, information technology employees and gas control employees perform work | | | | | | | |
| 17 | | for all utility brands. Because the other utilities receive a benefit from these employees | | | | | | | |
| 18 | | without incurring a cost to provide local office space for the work functions, the utilities | | | | | | | |
| 19 | | charge each rent for the space occupied by the employees performing work for all utility | | | | | | | |
| 20 | | brands. | | | | | | | |
| 21 | Q. | Please describe how the amount of rent chargeable to each utility is determined. | | | | | | | |
| 22 | Α. | All of the utility brands use a revenue requirement model to charge rent to each other. | | | | | | | |
| 23 | | The model calculates rent based on the square footage of the offices used by | | | | | | | |

| 1 | | employees to provide service to the other utilities. The square footage is determined by |
|----|----|--|
| 2 | | the size of the cubicle the employee occupies, or for gas control, by the size of the room. |
| 3 | | The square footage amount does not include common spaces, such as lunchrooms, |
| 4 | | hallways, or bathrooms. The revenue requirement model also factors in a projected cost |
| 5 | | of capital of 8.75 percent, which is applied consistently across all utilities. The rent costs |
| 6 | | are then allocated among the utilities based on customer count. |
| 7 | Q. | Please describe Mr. Kaufman's proposed adjustment for Cascade's affiliated rent |
| 8 | | receipts? |
| 9 | Α. | Mr. Kaufman seems to generally agree with the revenue requirement model, but |
| 10 | | proposes three changes. First, Mr. Kaufman proposes that Cascade use a cost of |
| 11 | | capital of 7.309 percent instead of 8.75 percent. Second, Mr. Kaufman proposes that |
| 12 | | customer count be calculated differently. Specifically, Mr. Kaufman proposes that the |
| 13 | | combined gas and electric customers of Montana-Dakota be counted as two individual |
| 14 | | customers, instead of a single customer, as calculated by the Company. Third, Mr. |
| 15 | | Kaufman proposes that the rents charged by Cascade to the other utility brands be |
| 16 | | assumed to include rent for common space in the calculation for rent in each building. ¹⁴ |
| 17 | | Mr. Kaufman's proposed adjustment results in an increase in rent charged by Cascade |
| 18 | | to the other utilities brands of \$257,335 on a total system basis, or \$63,613 on an |
| 19 | | Oregon basis. ¹⁵ |

¹⁴ Staff/1000, Kaufman/10-11,

¹⁵ Staff/1000, Kaufman/10.

17 - REPLY TESTIMONY OF TAMMY NYGARD

| 1 | Q. | Do you agree with Mr. Kaufman's proposed adjustment? |
|----|----|--|
| 2 | Α. | In part. |
| 3 | Q. | Please elaborate, and address each component of Mr. Kaufman's proposed |
| 4 | | adjustment, starting with cost of capital. |
| 5 | Α. | Cascade agrees to revise the cost of capital used in the model to 7.309 percent as filed |
| 6 | | in this rate case, instead of 8.75 percent, as long as all three utility brands are adjusted |
| 7 | | to use 7.309 percent. |
| 8 | Q. | How do you respond to Mr. Kaufman's recommendation regarding common |
| 9 | | space? |
| 10 | Α, | Regarding common space, Cascade's model intentionally excludes common space. |
| 11 | | Neither Montana-Dakota nor Intermountain charge for common space either. Because |
| 12 | | each utility brand has an IT department using common space at the other brand's |
| 13 | | facilities, all utility brands determined it would be appropriate to exclude common space |
| 14 | | from the rent calculation. If common space were included, however, the net effect would |
| 15 | | most likely be an increase in cost for Cascade because Cascade has the smallest office |
| 16 | | building. ¹⁶ |
| 17 | Q. | How do you respond to Mr. Kaufman's recommendation regarding customer |
| 18 | | count? |
| 19 | A. | I disagree with Mr. Kaufman's recommendation. Mr. Kaufman recommends counting a |
| 20 | | Montana-Dakota customer who receives both gas and electricity (combination) as two |

¹⁶ The total square footage of the Cascade general office buildings is 25,328. This compares to the total square footage of the Intermountain and Montana-Dakota Utilities general office buildings of 50,280 and 89,208, respectively.

| 1 | | separate customers. As explained in detail in the testimony of Mark Chiles, a |
|----|----|--|
| 2 | | combination customer generally causes the same costs on the utility as does a single |
| 3 | | service customer, and certainly does not cause double the work. ¹⁷ Therefore, |
| 4 | | combination customers should not be counted as two customers. The customer counts |
| 5 | | used by the Company are correct. |
| 6 | Q. | Did Mr. Kaufman propose an adjustment to Cascade's net plant balance? |
| 7 | Α. | No, though he proposed an adjustment to net plant balance to Intermountain and |
| 8 | | Montana-Dakota to use a 13 month average instead of the approach currently employed |
| 9 | | by all three companies, which uses year-end balances to calculate the next year's cost |
| 10 | | of service amounts. If there is an adjustment to Intermountain and Montana-Dakota, |
| 11 | | Cascade needs to be adjusted as well. |
| 12 | Q. | Please summarize your response to Mr. Kaufman's proposed adjustment. |
| 13 | A. | By revising the cost of capital percentage and using a 13-month average balance for net |
| 14 | | plant, but not changing the customer counts or the space allocation to include common |
| 15 | | space, the adjustment should be (on an Oregon basis) a reduction of revenue in the |
| 16 | | amount of \$14,371 instead of a revenue increase of \$63,613. This effects the revenue |
| 17 | | requirement by \$14,371. This adjustment is also shown in my Exhibit CNGC/806. |

¹⁷ See CNGC/900, Chiles/7-9.

^{19 -} REPLY TESTIMONY OF TAMMY NYGARD

| 1 | | IX. INTERMOUNTAIN AFFILIATED RENT CHARGE |
|----|----|--|
| 2 | Q, | Please describe Mr. Kaufman's proposed adjustment for Intermountain's affiliated |
| 3 | | rent receipts? |
| 4 | Α. | Mr. Kaufman proposes an adjustment to Intermountain's rent calculation to reflect cost of |
| 5 | | capital and customer counts as described above, and calculated the 13 month average |
| 6 | | balance for net plant in service, resulting in a proposed adjustment reducing charges to |
| 7 | | Cascade by \$97,019 on a total system basis, or \$23,983 on an Oregon basis. ¹⁸ |
| 8 | Q. | Do you agree with Mr. Kaufman's proposed adjustment? |
| 9 | Α. | Yes and no. I agree with Mr. Kaufman's recommendation to modify the cost of capital, |
| 10 | | so long as cost of capital is consistent for all three utilities. As explained above, I do not |
| 11 | | agree with Mr. Kaufman's proposed adjustment to customer counts because it |
| 12 | | inappropriately double counts combined gas and electric customers, and does not |
| 13 | | accurately reflect the actual costs to serve those customers. I agree with Mr. Kaufman's |
| 14 | | adjustment to the net plant balance for Intermountain and Montana-Dakota to the |
| 15 | | average, as long as all three companies are done consistently. As shown in Exhibit |
| 16 | | CNGC/807, by changing the cost of capital percentage and the net plant balance to the |
| 17 | | 13 month average, but leaving the customer counts as initially determined by Cascade, |
| 18 | | the corrected adjustment would be a reduction to charges to Cascade of \$63,492 on a |
| 19 | | total system basis or \$15,695 on an Oregon basis. |

¹⁸ Staff/1000, Kaufman/11.

1

X. MDU RESOURCES' AND MONTANA-DAKOTA'S AFFILIATED RENT CHARGE

- Q. Please describe Mr. Kaufman's proposed adjustment for MDU Resources' and
 Montana-Dakota's affiliated rent receipts.
- Mr. Kaufman proposes an adjustment to reflect the same cost of capital, customer count, Α. 4 and net plant average balance adjustments described above, and removes items Mr. 5 Kaufman believes are not appropriately booked to rent, such as postage, shipping, labor, 6 tax preparation and private jet costs.¹⁹ Additionally, Mr. Kaufman allocated revenue 7 requirement for Montana-Dakota's general office and Annex based on each affiliate's 8 share of printing impressions. Finally, Mr. Kaufman's adjustment reflects his proposed 9 change to Cascade's corporate allocation factor, changing it from 10.4 percent to 6.9 10 percent. Mr. Kaufman's adjustments result in a reduction to charges to Cascade of 11 \$635,007 on a total system basis or \$156,974 on an Oregon basis. 12

13 Q. Do you agree with Mr. Kaufman's proposed adjustment?

A. Consistent with Cascade's approach on Mr. Kaufman's other adjustments, Cascade
agrees to accept some portions of the adjustment and disagrees with other portions of
the adjustment. Cascade agrees with Mr. Kaufman's recommendation to modify the
cost of capital to 7.309 percent, as well as using the 13 month net plant average
balance. For the same reasons as described above, Cascade does not agree that the
customer counts or Cascade's corporate allocation factor should be adjusted.

19 Staff/1000, Kaufman/11-12.

21 - REPLY TESTIMONY OF TAMMY NYGARD

| 1 | Q. | Were postage, shipping, labor, tax preparation and private jet costs actually | | | | | | |
|----|----|--|--|--|--|--|--|--|
| 2 | | charged to Cascade as rent? | | | | | | |
| 3 | Α, | No. These costs are charged to Cascade like any other expense, however, they were | | | | | | |
| 4 | | booked to the object code rent, which may have caused some confusion. Nonetheless, | | | | | | |
| 5 | | they are not charged through the revenue requirement model for rent and do not include | | | | | | |
| 6 | | cost of capital. | | | | | | |
| 7 | Q, | Did Mr. Kaufman exclude any other costs? | | | | | | |
| 8 | A. | Yes. FutureSource operations and maintenance (O&M) costs were excluded. The | | | | | | |
| 9 | | FutureSource O&M costs are a cost of the organization that provides a benefit to | | | | | | |
| 10 | | Cascade. FutureSource is the company that owns the land and buildings for MDU | | | | | | |
| 11 | | Resources, and MDU Resources is the corporate office that holds departments like Tax | | | | | | |
| 12 | | and Treasury Services, etc. The MDU Resources buildings are separate from the MDU | | | | | | |
| 13 | | General Office and Annex, which hold Montana-Dakota Utilities. The costs incurred by | | | | | | |
| 14 | | FutureSource provide a benefit to Cascade and Cascade's customers and therefore | | | | | | |
| 15 | | should be recoverable in rates. | | | | | | |
| 16 | Q. | Please further describe the FutureSource O&M costs excluded by Mr. Kaufman. | | | | | | |
| 17 | Α. | Mr. Kaufman excluded \$1,241,713 of FutureSource O&M costs. These costs are | | | | | | |
| 18 | | described further in Table 1, below, as well as Exhibits CNGC/808 and CNGC/809. | | | | | | |
| 19 | | Table 1. Future Source O&M. | | | | | | |
| | | *** 344,533.75 hanger contract services *** 545,268.88 office supplies *** 351,909.99 Return on assets not owned | | | | | | |

22 - REPLY TESTIMONY OF TAMMY NYGARD

Regulatory Affairs Cascade Natural Gas Corporation 8113 W. Grandridge Blvd. Kennewick, WA 99336

1,241,712.62 Future Source O&M

| 1 | Q. | Does Cascade propose to exclude any costs associated with FutureSource O&M? |
|----|----|---|
| 2 | Α. | Yes. As shown in Exhibit CNGC/808, Cascade discovered that some of the Fitch and |
| 3 | | Standard & Poor costs were inadvertently included in the cost of service calculation, and |
| 4 | | should be excluded because some of these invoices were charged directly to each |
| 5 | | company. I have adjusted down the FutureSource O&M to account for this error. |
| 6 | Q. | Please summarize your response to Mr. Kaufman's proposed adjustment for MDU |
| 7 | | Resources' rent receipts. |
| 8 | Α. | I agree with updating the cost of capital percentage and using the net average plant |
| 9 | | balance, but disagree with Mr. Kaufman's recommendation to modify the customer |
| 10 | | counts and corporate allocation factor, as explained further above. I have taken out the |
| 11 | | Fitch and Standard & Poor costs that were included in error. The charges for the |
| 12 | | corporate aircraft and the MDU Resources land and building are appropriate, and I have |
| 13 | | included these costs in my recommended adjustment. Taking these modifications into |
| 14 | | account, I agree with making an adjustment to reduce charges to Cascade by \$101,372 |
| 15 | | or \$25,059 on an Oregon basis. This adjustment is shown in Exhibit CNGC/810. |
| 16 | | XI. <u>CONCLUSION</u> |
| 17 | Q. | Can you summarize the adjustments made in your testimony? |
| 18 | Α. | Yes, in total I am recommending adjustments to our filing of \$34,362 on an Oregon |
| 19 | | basis. These costs are described further in Table 2 below. |

Table 2. Summary of Cascade's Reply to Staff's Adjustments Regarding Allocations

DESCRIPTION OF FUTURESOURCE EXPENSES AND COST ALLOCATION EXHIBIT CNGC/809

FutureSource Explanation

The corporate office building and related land for MDU Resources Group, Inc. (as distinguished from the offices of its division – Montana-Dakota Utilities Co.), are owned jointly by FutureSource Capital Corp. ("FutureSource" which is an indirect subsidiary of MDU Resources Group, Inc./Centennial Energy Holdings, Inc.) and Montana-Dakota Utilities Co. The ownership of such property at the time by FutureSource and Montana-Dakota, was approximately 65% and 35%, respectively. These approximate ownership percentages were also true with respect to the corporate aircraft and hangar. The office furniture, office equipment, computer and network equipment, etc. within the MDU Resources corporate headquarters and hangar are wholly owned by FutureSource.

Montana-Dakota is invoiced monthly by FutureSource, based on Montana-Dakota's corporate factor, for its portion of the costs related to the corporate facilities and hangar. Such costs include the costs of maintaining the property (i.e., utilities, repairs, janitorial, etc.), insurance, property taxes, and office supplies. Budget amounts are used throughout the year, with a true-up of such operating costs to actual at year-end. The invoicing for corporate aircraft related ownership and operational costs, to the extent not recovered through an hourly usage rate, are also invoiced in a similar manner.

To the extent that the corporate factor for Montana-Dakota is greater than the ownership percentage at such time (approximately 35%), the monthly invoicing also includes an amount to recover depreciation, to the extent the depreciation for the total investment in the assets multiplied by Montana-Dakota's corporate factor exceeds the portion owned by Montana-Dakota.

In addition to the invoicing of the expenses for the costs described above, to the extent that the corporate factor for Montana-Dakota is greater than the ownership percentage at such time (which was approximately 35%), the monthly invoicing also includes an amount to recover a cost of capital charge. The calculation of this cost of capital charge is limited to the extent that the total investment in these assets multiplied by Montana-Dakota's corporate factor percentage, exceeds the portion of such assets which are owned by Montana-Dakota. Stated another way, Montana-Dakota is only assessed a cost of capital charge to the extent that the allocable investment in the facilities (based on its corporate factor) is in excess of its ownership portion.

Montana-Dakota allocates these FutureSource costs to Cascade based on capitalization.

| II. | SCOPE OF TESTIMONY | 2 |
| III. | RESPONSE TO STAFF ADJUSTMENT REGARDING ALLOCATION OF CUSTOMER SERVICE FUNCTIONS | |
| IV. | CONCLUSION 1 | 3 |

i - REPLY TESTIMONY OF MARK A. CHILES

I. INTRODUCTION

| 1 | Q. | Please state your name, title and business address. |
|----|----|---|
| 2 | Α. | My name is Mark A. Chiles. I am the Vice President of Regulatory Affairs for |
| 3 | | Cascade Natural Gas Corporation (Cascade, or Company) and Intermountain |
| 4 | | Gas Company and the Vice President of Customer Service for the MDU Utilities |
| 5 | | Group. My business address is 555 South Cole Road, Boise, ID 83709. |
| 6 | Q. | Would you please summarize your educational and professional experience? |
| 7 | Α. | I am a graduate of Boise State University with a Bachelor of Business |
| 8 | | Administration degree in Accounting. I am a certified public accountant and a |
| 9 | | member of the American Institute of Certified Public Accountants and the Idaho |
| 10 | | Society of Certified Public Accountants. I have over 20 years of experience in the |
| 11 | | energy industry including time spent in the utility, gas marketing, and exploration |
| 12 | | and production industries. During my utility career, I have held the positions of |
| 13 | | Accounting Manager, Director of Accounting and Finance, and Vice President |
| 14 | | and Controller. I was appointed to my current position in March 2016. I am |
| 15 | | responsible for providing executive leadership and management for regulatory |
| 16 | | affairs and customer service including the scheduling and credit and collections |
| 17 | | functions. |

1 - REPLY TESTIMONY OF MARK A. CHILES

II. SCOPE OF TESTIMONY

| 1 | Q. | What is the purpose of your testimony in this proceeding? |
|----|----|---|
| 2 | Α. | The purpose of my testimony is to respond to adjustments proposed by Staff |
| 3 | | witness Lance Kaufman regarding inter-company allocations to Cascade of costs |
| 4 | | related to MDU Utilities Group's customer service functions. |
| | | III. RESPONSE TO STAFF ADJUSTMENT REGARDING ALLOCATION OF CUSTOMER SERVICE FUNCTIONS |
| 5 | Q. | Please describe the customer service functions that are allocated to |
| 6 | | Cascade. |
| 7 | Α. | The customer service costs included in this case are primarily associated with |
| 8 | | services provided to the MDU Utilities Group ¹ for all three utility brands |
| 9 | | associated with MDU Resources—Cascade, Intermountain Gas Company, and |
| 10 | | Montana-Dakota Utilities Co./Great Plains Natural Gas Co. These services are |
| 11 | | provided by our Customer Service Call Center (or, Call Center), Credit and |
| 12 | | Collections, our Customer Support and Programs Department, the Scheduling |
| 13 | | Group, and the Director of Customer Service office. |
| 14 | Q. | Please describe the location and functions each of the MDU Utilities |
| 15 | | Group's customer service departments. |
| 16 | Α. | Certainly. I will describe each department separately: |

¹ The Reply Testimony of Tammy Nygard contains a description of the MDU Utilities Group (an operating division of MDU Resources) which oversees and provides services to our individual utility subsidiaries.

^{2 -} REPLY TESTIMONY OF MARK A. CHILES

| • | The Customer Service Call Center is located in Meridian, Idaho. This |
|---|---|
| | department takes inbound calls from our customers on a variety of issues |
| | ranging from initiation and cancellation of service, emergency services, low |
| | income programs, and billing/payment issues. The Call Center also handles |
| | inquiries from and provides information to each of our field offices. |
| | The Credit and Collections department is located in Bismarck, North |
| | Dakota. This department is responsible for all activities related to customer |
| | credit and bill collections, including outbound collection calls, assigning |
| | disconnect orders, documenting and recording bankruptcy information, |
| | working with assistance agencies, and monitoring credit card and pay station |
| | payments related to disconnect orders. The department also works with |
| | external credit and collection agencies. |
| • | The Customer Support and Programs department, located in Meridian, is |
| | responsible for administering customer programs such as level pay and |
| | landlord programs, and responding to requests for billing histories, monthly |
| | statement reprints, or form requests. They also are responsible for website |
| | management and social media postings, facilitating automated outbound calls |
| | for outage notifications or other major events, working with credit card and |
| | other outside vendors, and partnering with the Information Technology group |
| | on current and future applications. |
| | • |

3 - REPLY TESTIMONY OF MARK A. CHILES

| 1 | | The Scheduling Group also works from our Meridian location, and is the |
|----|----|---|
| 2 | | liaison between our customer service functions and the field service |
| 3 | | technicians. They are responsible for balancing the daily workload for all |
| 4 | | companies and oversee the Mobile Workforce Management system. They are |
| 5 | | also responsible for handling after-hours emergency calls, therefore providing |
| 6 | | 24-hour emergency coverage. |
| 7 | | In addition, the MDU Utilities Group has an office of the Director of |
| 8 | | Customer Service. This office has three Consumer Specialists, each |
| 9 | | assigned to a different company, that act as liaisons between the utility and |
| 10 | | consumer assistance groups, administer payment files for low income |
| 11 | | payments, research and respond on consumer complaints, and respond to |
| 12 | | commission, local, state, or federal inquiries. |
| 13 | Q. | What efficiencies have been gained through this organizational structure? |
| 14 | Α. | Since Cascade's acquisition, the MDU Utilities Group has been able to reduce |
| 15 | | the overall head count in the customer service area by roughly 25 employees. |
| 16 | | We have achieved this cost saving by assigning a single management team to |
| 17 | | oversee all customer service departments, integrating the individual departments, |
| 18 | | and implementing a common Customer Care and Billing System across all |
| 19 | | brands. |

4 - REPLY TESTIMONY OF MARK A. CHILES

| 1 | Q. | How does the Company allocate customer service costs among the |
|----|----|--|
| 2 | | utilities? |
| 3 | A. | Depending on the function involved, costs are either directly assigned (direct- |
| 4 | | assigned) to each utility, or they are allocated based on factors developed by |
| 5 | | MDU Utilities Group, with the consultation of the individual utilities. The |
| 6 | | methodology used for each department is described in Exhibit IV to Cascade's |
| 7 | | Cost Allocation Manual – Utility Operations Support Allocation Methodology. ² |
| 8 | Q. | What types of costs are direct-assigned to the utilities? |
| 9 | A. | Costs that are incurred by employees specifically assigned to particular utility, or |
| 10 | | costs that are specifically incurred on behalf of a particular utility, are direct- |
| 11 | | assigned. |
| 12 | Q. | Can you provide an example of specific customer service costs that are |
| 13 | | direct-assigned? |
| 14 | Α. | Yes. A significant portion of our labor costs for employees providing customer |
| 15 | | service functions are direct-assigned to the utilities. In particular, MDU Utilities |
| 16 | | Group has 116 Customer Service Representatives (CSRs) working in the Call |
| 17 | | Center in Meridian and in Bismarck. On average, 21 of those CSRs— |
| 18 | | representing 18 percent of the total number—are specifically assigned to answer |

² Staff/1002, Kaufman/31-33.

5 - REPLY TESTIMONY OF MARK A. CHILES

| 1 | | customer service calls from Cascade's customers. Thus, the labor costs |
|----|----|--|
| 2 | | associated with these 21 representatives are direct-assigned to Cascade. |
| 3 | Q. | How does the MDU Utilities Group determine how many Customer Service |
| 4 | | Representatives it requires for Cascade? |
| 5 | Α. | The number of CSRs assigned to Cascade is a function of the number of |
| 6 | | Cascade's customers, historical call volumes, and the response time required for |
| 7 | | Cascade's customer service calls. The management team evaluates the needs |
| 8 | | for each brand on an ongoing basis. |
| 9 | Q. | Are all of the CSRs assigned to one of the individual utilities? |
| 10 | Α. | No. Specific CSRs are trained to take calls for multiple brands. This system |
| 11 | | allows for more efficient use of our CSRs' time. The costs associated with these |
| 12 | | specific CSRs are not direct-assigned, but instead are equally allocated among |
| 13 | | the individual utilities for which these CSRs are trained to take calls. Cascade |
| 14 | | receives an allocation of time for 23 of these CSRs. |
| 15 | Q. | Are the costs associated with the agents in the Credit and Collections and |
| 16 | | Scheduling departments similarly allocated? |
| 17 | Α. | Generally, yes. Most of the agents in Credit and Collections and Scheduling |
| 18 | | departments handle matters for only one utility and therefore the associated labor |
| 19 | | costs are directly assigned to the relevant brand. The Credit and Collections |
| 20 | | agents who work on more than one utility track their time spent on each utility |
| 21 | | brand. The costs associated with these agents are allocated to each utility based |

6 - REPLY TESTIMONY OF MARK A. CHILES

| 1 | | on these time records. The Scheduling agents who work on more than one |
|----|----|--|
| 2 | | brand have their time allocated based on factors described in Cascade's Cost |
| 3 | | Allocation Manual, which are reviewed on an annual basis. |
| 4 | Q. | Are there other costs that are direct-assigned to the utilities? |
| 5 | Α. | Yes. Other costs that are direct-assigned to each utility include fees paid for |
| 6 | | electronic payments, postage, and billing supplies. For example, Cascade offers |
| 7 | | customers an option to pay bills at conveniently-located pay stations and covers |
| 8 | | the fee associated with the pay station. Therefore, the cost associated with walk- |
| 9 | | in pay stations are direct-assigned to Cascade. |
| 10 | Q. | How do you allocated costs related to management of the customer |
| 11 | | services departments? |
| 12 | Α. | Management includes the director, department managers, and certain of the |
| 13 | | supervisors, and team leads. These positions are assigned to each brand based |
| 14 | | on allocation factors. These factors represent management's determination of |
| 15 | | time spent for each brand and are reviewed on an annual basis. The specific |
| 16 | | management allocation factors for each customer service department are shown |
| 17 | | in Cascade's Cost Allocation Manual, Attachment C. ³ |
| | | |

³ Staff/1002, Kaufman/31-33.

7 - REPLY TESTIMONY OF MARK A. CHILES

| 1 | Q. | Are there any other customer service costs that are assigned on the basis |
|----|----|--|
| 2 | | of allocation factors determined by management? |
| 3 | Α. | In addition to those I have described above—for customer service management |
| 4 | | and scheduling agents that work on more than one utility—costs associated with |
| 5 | | employees in the Customer Programs and Support department are also assigned |
| 6 | | on the basis of allocation factors described in Cascade's Cost Allocation |
| 7 | | Manual. ⁴ |
| 8 | Q. | Does Staff support the Company's allocation methodology? |
| 9 | Α. | No. Staff takes the position that all customer service costs should be allocated |
| 10 | | among the utilities based on the relative number of customers of each utility. |
| 11 | | Staff calculates Cascade's share of all MDU Utilities Group customer service |
| 12 | | costs to be 25.6 percent, and accordingly proposes a downward adjustment of |
| 13 | | the Company's revenue requirement in this case by \$191,130 on an Oregon- |
| 14 | | allocated basis. ⁵ |
| 15 | Q. | What reason does Staff give for the recommendation to use customer |
| 16 | | counts to allocate all customer service costs? |
| 17 | Α. | Staff objects to the Company using fixed allocation factors—such as are used to |
| 18 | | allocate the labor costs associated with management employees—because such |

8 - REPLY TESTIMONY OF MARK A. CHILES

⁴ Staff/1002, Kaufman/31-33.

⁵ Staff/1000, Kaufman/7-8.

factors do not "vary with firm behavior."⁶ Mr. Kaufman states that they are
 therefore not appropriate proxies for allocating costs.⁷

3

Q. Do you agree with Staff's analysis?

A. No, for several reasons. First, a very significant proportion of the customer
service costs are allocated to Cascade by direct assignment. As I explained
above, we direct-assign only those costs that are caused by Cascade customers
alone. Therefore, there is no need to use customer count as a proxy for
allocation of these costs. Staff provides no rationale for rejecting direct
assignment of these costs and Mr. Kaufman's adjustment should be rejected on
that basis alone.

- 11 Second, the allocation factors developed for management and certain 12 other specific employees are not "fixed" as maintained by Staff. These factors 13 are reviewed in the budgeting process, and are updated as necessary at the 14 beginning of the year.
- 15 Third, based on my review of Staff's work papers, it appears that in 16 developing its customer count factor, Staff treats Montana-Dakota Utilities Co.'s 17 (Montana-Dakota) combined gas and electric customers as if they were two 18 separate customers. Staff provides no rationale for this approach, and in fact, 19 treating combination customers as if they were two customers completely
 - ⁶ Staff/1000, Kaufman/7,

7 Staff/1000, Kaufman/7,

9 - REPLY TESTIMONY OF MARK A. CHILES

misrepresents the customer service costs they are responsible for causing. In
 fact, for most purposes, these combination customers cause the same costs as
 single service customers.

4 Q. Please explain.

Α. For example, it only takes a single call to set up both the natural gas and electric 5 6 service, make account changes, or set up payment arrangements. In addition, 7 the combination customers receive a single bill and remit a single payment and any other correspondence is consolidated and sent as a single notification. Also, 8 9 field service calls are handled by a combination technician so any scheduling is 10 handled as a single transaction. These activities make up the vast majority of customer service costs imposed by our customers. In fact, the only area in which 11 a combined customer might impose more costs on the system than a single-12 service customer would be outage and other service complaint-type calls, which 13 are relatively infrequent. 14 What is the impact on Staff's customer count allocation factor if a 15 Q. combination customer were treated as a single customer? 16 When all of the Montana-Dakota's combined gas and electric customers are 17 A. counted only once. Cascade's allocation on that basis would increase from 18 25.6% to 28.53% as shown in Exhibit CNGC/901. 19

10 - REPLY TESTIMONY OF MARK A. CHILES

| 1 | Q. | Are there any other problems with Staff's analysis? | | |
|----|----|---|--|--|
| 2 | Α. | Yes. Mr. Kaufman's analysis erroneously excludes all customer service costs for | | |
| 3 | | the Scheduling group. | | |
| 4 | Q. | How would this affect the calculation? | | |
| 5 | Α. | As a percentage of total cost, Cascade was charged less than the calculated | | |
| 6 | | factor used by Mr. Kaufman. By appropriately including these costs in the | | |
| 7 | | calculation, the adjustment would be lower by \$34,765 based on Staff's allocation | | |
| 8 | | factor and would be lower by \$70,942 based on an allocation factor that counts | | |
| 9 | | combination customers as a single customer. | | |
| 10 | Q. | Have you performed an alternative allocation of customer service costs | | |
| 11 | | that places Staff's adjustment into perspective? | | |
| 12 | Α. | Yes. Cascade believes that its allocation approach results in an accurate and | | |
| 13 | | reasonable result. To place Staff's concerns into perspective, and for illustrative | | |
| 14 | | purposes only, I accepted certain of Staff's revisions to the allocation process, | | |
| 15 | | while correcting Staff's error and customer count approach. Specifically, my | | |
| 16 | | illustrative calculation was performed as follows: | | |
| 17 | | First, I retained the direct assignment of certain non-labor costs that I | | |
| 18 | | could identify as directly assigned. The Company believes that direct | | |
| 19 | | assignment is the most accurate way to allocate costs, and Staff has | | |
| 20 | | provided no rationale whatsoever for rejecting the direct assignment of | | |
| 21 | | any category of customer service costs. However, for the purposes of | | |
| | | | | |

11 - REPLY TESTIMONY OF MARK A. CHILES

- this calculation, I retained direct assignment only for these specific non labor costs.
- Second, all other costs were allocated based on customer counts. While
 the Company supports all of its directly allocated costs and those
 calculated using its own allocation factors, we applied Staff's method of
 allocation using customer counts to view the impact of that change.
- Third, I corrected customer counts so that each combination customer is
 counted as one customer. Staff has provided no evidence to rebut the
 Company's evidence that the customer service costs caused by
 combination customers do not differ in any significant respect from the
 costs caused by single service customers.
- Fourth, I corrected Staff's omission of the Scheduling Group costs—which
 I assume was in error.

14 Q. What is the impact of these changes on Staff's calculation?

- 15 A. As shown on Exhibit CNGC/902, the revenue impact of treating the Montana-
- 16 Dakota's combination customers as a single customer, correctly including the
- 17 scheduling department in the calculation, and separating out direct charges
- 18 versus allocable charges, other than payroll, would be to decrease the original
- 19 revenue requirement by \$29,500 for costs related to the customer service center.

20 Q. Do you recommend that the Commission adopt this illustrative calculation?

A. No. We believe our original approach is correct and should be adopted.

12 - REPLY TESTIMONY OF MARK A. CHILES

IV. <u>CONCLUSION</u>

- 1 Q. Does this conclude your testimony?
- 2 A. Yes.

i - REPLY TESTIMONY OF RONALD J. AMEN

| 1 | | I. INTRODUCTION AND SUMMARY |
|----|----|---|
| 2 | Q. | Please state your name and business address. |
| 3 | Α. | My name is Ronald J. Amen and my business address is 17806 NE 109 th Court, Redmond, |
| 4 | | Washington 98052. |
| 5 | Q. | Are you the same Ronald J. Amen who submitted pre-filed Direct Testimony on |
| 6 | | behalf of Cascade Natural Gas Corporation (Cascade or the Company)? |
| 7 | Α. | Yes. |
| 8 | Q. | What is the purpose of your Reply Testimony in this proceeding? |
| 9 | Α. | First, I will present the updated results of the Long-Run Incremental Cost (LRIC) Study |
| 10 | | filed by the Company in this proceeding. I will describe the revisions to the LRIC, which |
| 11 | | result from the adjustments to the Company's total cost of service discussed in the Reply |
| 12 | | Testimony of Company witness Mr. Parvinen, and some of the suggested modifications |
| 13 | | to the LRIC suggested by Staff witness Mr. Compton, as described below. |
| 14 | | Second, my Reply Testimony responds to Staff witness Compton's comments |
| 15 | | and recommendations regarding certain related aspects of the Cascade LRIC. The |
| 16 | | issues raised by Mr. Compton include: a) critical view of Cascade's minimum sized |
| 17 | | distribution (two-inch) mains cost as compared to that of Avista and NW Natural, b) a |
| 18 | | claim that Cascade's per books cost of 2" PE does not include all mains cost elements, |
| 19 | | c) a recommendation for using the lower of NW Natural's and Avista's mains cost |
| 20 | | estimates, and d) criticism of the amount of steel mains in system replacement costs. |
| 21 | | The LRIC recommendations of Mr. Compton that I have accepted are: a) deletion |
| 22 | | of capacity and safety related mains investment, b) separation of meters and services |

1 2 from main extensions to allocate embedded costs, and c) allocating M&R station equipment to system core mains.

3 Third, I will respond to certain cost allocation related issues that have been raised by other parties in these proceedings concerning the LRIC Study presented by 4 the Company. Specifically, my Testimony addresses the Direct Testimonies of CUB 5 6 witness Mr. Jenks and NWIGU witness Mr. Gorman. Issues raised by CUB witness Mr. 7 Jenks include: a) objection to the use of 2" plastic mains as customer related and the 8 assertion that Cascade's distribution system is oversized as a result, and by extension b) 9 Interruptible customers are not interrupted because the system is oversized. NWIGU witness Mr. Gorman is critical of the cost of meters that were assigned to the large 10 11 customer classes.

Finally, I will present the results of Cascade's revised proposed class revenues,
the resulting impact on the Company's proposed rates, and customer bill impacts.

14 Q. Please summarize the conclusions of your Reply Testimony.

15 A. First, the Commission should rely upon the Company's LRIC study, as adjusted for the

16 revisions I describe in this Reply Testimony, because it best reflects the long run

17 incremental costs incurred to serve the Company's customers. Second, the

- 18 Commission should reject the assertions made by CUB witness Mr. Jenks with respect
- 19 to the Company's use of 2" mains as customer related and the resulting oversizing of the
- 20 distribution system. Third, the criticism by NWIGU witness Mr. Gorman of the meter
- 21 costs assigned to the large customer classes is misplaced for the reasons stated in my
- 22 reply testimony. Finally, the Company's proposed revenue changes to the various rate

2 - REPLY TESTIMONY OF RONALD J. AMEN

| 1 | | classes that reflect the results of the Company's revised LRIC should be adopted for |
|----|----|--|
| 2 | | purposes of adjusting the rate components of the respective rate schedules. |
| 3 | Q. | Please provide a list of exhibits supporting your reply testimony. |
| 4 | Α. | The following exhibits accompany my reply testimony. |
| 5 | | Exhibit CNGC/1001 Summary of LRIC |
| 6 | | Exhibit CNGC/1002 Functional Revenue Requirement |
| 7 | | Exhibit CNGC/1003 Incremental Plant Carrying Costs |
| 8 | | Exhibit CNGC/1004 Incremental Operations and Maintenance (O&M) Costs |
| 9 | | Exhibit CNGC/1005 Summary of Revenue by Rate Class |
| 10 | | Exhibit CNGC/1006 Analysis of Revenue by Detailed Rate Schedule |
| 11 | | Exhibit CNGC/1007 Residential Impact by Month |
| 12 | | Exhibit CNGC/1008 Impact of Recommended Rate Changes |
| 13 | | II. CASCADE'S REVISED LRIC STUDY |
| 14 | Q. | Have you prepared a revised LRIC Study? |
| 15 | Α. | Yes. Exhibit CNGC/1001 presents Cascade's revised LRIC Study. In particular, the |
| 16 | | exhibit presents the resulting allocation by rate schedule of Cascade's revised proposed |
| 17 | | revenue requirement based strictly on the results of the LRIC computations included in |
| 18 | | the LRIC Study. |
| 19 | Q. | Please describe the revisions to Cascade's LRIC Study. |
| 20 | А. | I have made the following revisions to Cascade's LRIC Study in addition to updating the |
| 21 | | Company's revised revenue requirement, as mentioned earlier: 1) modification of |
| 22 | | growth-related distribution main extension cost for Residential (Schedule No. 101) and |

| 1 | | Commercial (Schedule No. 104), 2) acceptance of certain recommendations of Staff |
|----|----|---|
| 2 | | witness Compton, and 3) minor corrections to costs for certain metering and regulator |
| 3 | | station installations on the premises of large customers. |
| 4 | Q. | What were the modifications made to growth mains cost for Schedule Nos. 101 |
| 5 | | and 104? |
| 6 | A. | Sampled work orders with unreasonably low cost per foot results of less than \$5.00 |
| 7 | | (2015 dollars), were deleted from the calculation of the average cost per foot for 2-inch |
| 8 | | plastic main extensions for new customers in Schedule Nos. 101 and 104. I will discuss |
| 9 | | the reasons for this change later in my Reply Testimony. |
| 10 | Q. | Please list and describe Staff's recommended changes to the LRIC Study that you |
| 11 | | have adopted. |
| 12 | Α. | I have accepted the following recommendations by Staff with respect to Cascade's |
| 13 | | LRIC: |
| 14 | | 1. Elimination of the capacity and safety related mains categories. ¹ |
| 15 | | 2. The allocation of core mains, with exception of the cost of growth mains for |
| 16 | | Schedule Nos. 101 and 104 ² , and the composition of system replacement |
| 17 | | mains, ³ discussed later in my Reply Testimony. ⁴ |

 ¹ Staff/1300, Compton/14, Topic 3.
 ² Staff/1300, Compton/7, Topic 1.
 ³ Staff/1300, Compton/11, Topic 2.
 ⁴ Staff/1300, Compton/15, Topic 4.

| 1 | | 3. The change to cost functionalization related to separation of the meters and |
|----|----|--|
| 2 | | services from Main Extensions for embedded mains allocation; and shift of M&R |
| 3 | | Station Equipment to the System Core Mains column in Exhibit CNGC/1002. ⁵ |
| 4 | | A. Incremental Main Investment Costs |
| 5 | Q. | How were the costs to install customer growth-related distribution mains |
| 6 | | determined? |
| 7 | Α. | As described in my direct testimony, Cascade's distribution mains analysis derives the |
| 8 | | customer related costs associated with the installation of distribution mains to connect |
| 9 | | new customers. Mains investments that serve this function were extracted from |
| 10 | | Cascade's plant accounting records. Oregon new business project work orders were |
| 11 | | summarized for a fourteen-year period (2002 – 2015). The per customer cost was |
| 12 | | computed by taking the average cost per foot of Cascade's minimum-sized distribution |
| 13 | | main (two-inch), escalated to current dollars (2015) using the Handy Whitman Index of |
| 14 | | Public Utility Construction Costs, and multiplying that unit cost by the number of feet of |
| 15 | | main installed per new customer for Residential (Schedule No. 101), Commercial |
| 16 | | (Schedule No. 104), and Industrial (Schedule No. 105) service classes. |
| 17 | Q. | Do you agree with the conclusion reached by Staff regarding the installed cost of |
| 18 | | two-inch plastic mains? |
| 19 | | A. No. Staff concludes that the installed cost of Cascade's two-inch plastic |
| 20 | | mains is too low based almost exclusively on the basis of the claimed cost experience of |

⁵ Staff/1300, Compton/17, Topic 5.

5 - REPLY TESTIMONY OF RONALD J. AMEN

| 1 | | Avista and NW Natural. ⁶ This is an unprecedented tactic in my experience, whereby cost |
|----|----|--|
| 2 | | data from other utilities are quoted without the introduction of any comparative |
| 3 | | evidentiary data to critique pipeline construction costs within the context of a cost of |
| 4 | | service study. Further, Mr. Compton opines that the evidence provided by Cascade via |
| 5 | | responses to Staff data requests was of no value, when the information included over |
| 6 | | five years of work orders, with many containing twenty-five different categories of cost |
| 7 | | detail. ⁷ |
| 8 | Q. | Notwithstanding the cost data provided by Cascade in response to Staff data |
| 9 | | requests, are there other reasons why Cascade's cost experience may differ from |
| 10 | | that of the other Oregon utilities cited by Staff? |
| 11 | Α. | Yes. Cascade's pipeline construction practices include the use of "open trenching" in its |
| 12 | | Oregon service territory, which requires builders and developers of new residential and |
| 13 | | small commercial projects to provide an open trench for all of Cascade's facilities to be |
| 14 | | installed. This practice has been particularly economical for Cascade in its Bend service |
| 15 | | area where the majority of the residential and small commercial growth has occurred in |
| 16 | | recent years and where the terrain consists of predominantly rocky soil. The labor and |
| 17 | | equipment cost of the trench is a significant component of the overall construction cost |
| 18 | | of a pipeline project. For example, the current contractor price in Oregon to install 2-inch |
| 19 | | plastic main in an open trench is \$3.60 per foot, whereas the contractor price to dig a |
| 20 | | trench, provide bedding material, install and cover the pipe is \$12.40 per foot. The |
| | | |

⁶ Staff/1300, Compton/7, Topic 1.
⁷ See response to Staff Data Request No.178.

6 - REPLY TESTIMONY OF RONALD J. AMEN

| 1 | | contract labor, equipment and materials cost savings associated with Cascade's open |
|----|----|---|
| 2 | | trenching practice is \$8.80 per foot. By comparison, Cascade's current contractor price |
| 3 | | in its Washington territory where open trenching is not a common practice is \$15.30 per |
| 4 | | foot for the installation of 2-inch plastic main. |
| 5 | Q. | Please describe the adjustments to the installed cost of 2-inch plastic mains in the |
| 6 | | revised LRIC Study that you referenced earlier in your reply testimony. |
| 7 | Α. | As I described earlier, I have revised the growth main extension analysis to exclude all |
| 8 | | 2-inch plastic main installation work order records where the installed cost per foot is |
| 9 | | less than \$5.00, when adjusted to 2015 dollars. Following further evaluation of the |
| 10 | | sampled work orders included in the development of growth mains used in Cascade's |
| 11 | | initial LRIC, and discussions with Cascade's operations management personnel in |
| 12 | | Oregon, data irregularities related in particular to a conversion in 2013 from the |
| 13 | | Company's JDE plant records system to its current Power Plan system may have led to |
| 14 | | certain lower than expected recorded costs for some main extension work orders. |
| 15 | Q. | What was the reason for using \$5.00 per foot as the threshold cost for excluding |
| 16 | | certain work orders? |
| 17 | A. | As I mentioned, Cascade's currently effective price per foot for 2-inch plastic pipe in its |
| 18 | | pipeline construction contracts with third-party contractors in Oregon is \$3.60 for "open |
| 19 | | trench" installation. The current inventory cost of 2-inch plastic pipe is \$.86 per foot. |
| 20 | | Therefore, the minimum cost per foot of 2-inch plastic pipe installations in Oregon is |
| 21 | | \$4.46, excluding any required construction-related company labor and administrative |
| 22 | | overheads. |
| 23 | Q. | What was the result of the revisions made to the growth main extension analysis? |

 $_{2i}$

7 - REPLY TESTIMONY OF RONALD J. AMEN

| 1 | Α. | The revised growth main extension analysis raised the installed average cost per foot of |
|----|----|---|
| 2 | | customer mains investment applicable to Schedule Nos. 101 and 104 from \$7.81 to |
| 3 | | \$9.06. ⁸ |
| 4 | Q. | Do you agree with CUB's assertion that assigning 2-inch plastic main as customer |
| 5 | | related is problematic? ⁹ |
| 6 | Α. | No. Mr. Jenks appears to be mixing marginal cost principles with embedded cost of |
| 7 | | service methodology. The fact that the minimum 2-inch distribution system is built to |
| 8 | | meet the firm design day demands of residential and most small commercial customers |
| 9 | | is irrelevant to the determination of the incremental cost to serve new customers within |
| 10 | | the context of an LRIC Study. |
| 11 | Q. | Do you agree with CUB's assertion that Cascade's distribution system is |
| 12 | | oversized? ¹⁰ |
| 13 | Α. | No. The use of 2-inch plastic pipe as the minimum pipe size for newly constructed |
| 14 | | distribution mains is common practice in the natural gas utility industry and is the most |
| 15 | | economic minimum size main to serve residential neighborhoods and adjacent small |
| 16 | | commercial zones. The cost difference of using smaller diameter piping is negligible and |
| 17 | | would be inadequate under most circumstances to satisfy the design day peak demands |
| 18 | | of these customer classes. |

⁸ CNGC/1003, Amen/1.

⁹ CUB/100, Jenks/5.

¹⁰ CUB/100, Jenks/6.

8 - REPLY TESTIMONY OF RONALD J. AMEN

| 1 | Q. | Do you agree with CUB's claim that interruptible customers are not interrupted |
|----|----|---|
| 2 | | because the Cascade system is oversized due to the installation of 2-inch |
| 3 | | distribution mains? |
| 4 | Α. | No. First, CUB's premise that the minimum main installation size is relevant to |
| 5 | | interruptible customers is wrong because all of Cascade's interruptible customers are |
| 6 | | served from mains larger than 2 inches. Second, as Mr. Jenks confirms in his direct |
| 7 | | testimony ¹¹ , interruptible customers should not be assigned costs associated with |
| 8 | | capacity because they can be curtailed during design day weather conditions. Therefore |
| 9 | | the size of the balance of the distribution system piping is irrelevant, as Cascade's |
| 10 | | system design specifications do not recognize or reflect the connected loads of |
| 11 | | interruptible customers, as embodied in the Company's Integrated Resource Plan. |
| 12 | | B. Mains System Replacement Investment Costs |
| 13 | Q. | Mr. Compton created an alternative cost estimate of replacing the entire core |
| 14 | | mains system, excluding the estimated cost of the customer main extensions. Do |
| 15 | | you concur with his stated reasoning? |
| 16 | Α. | No. Mr. Compton assumes that all but 95 of the existing 553 miles of 2-inch steel pipe |
| 17 | | would be replaced with plastic pipe, on the basis of its lower cost per foot and his opinion |
| 18 | | that plastic pipe possesses "superior, noncorrosive, slower-to-deteriorate properties." ¹² |
| 19 | Q. | Is this a valid assumption? |

¹¹ CUB/100, Jenks/7.

¹² Staff/1300, Compton/13.

9 -- REPLY TESTIMONY OF RONALD J. AMEN

1 Α. No, for at least two reasons. First, Mr. Compton has failed to account for the presence 2 of 2-inch high pressure steel pipeline in the Company's Oregon system. Cascade's 3 plastic pipe does not have the physical properties to safely operate at high pressure (above 60 pounds per square inch (PSIG)). Cascade has many miles of high pressure 4 small diameter steel mains in its Oregon distribution system. Without a district by district 5 6 survey of the amount of 2-inch high pressure steel pipeline in the system, one cannot 7 simply assume that the existing miles of 2-inch steel pipe would be replaced entirely with 8 plastic pipe, the only exception being that which equates to the average main extension 9 to serve new commercial customers.¹³

10 Second, steel pipe is often installed for safety reasons in high density urban 11 areas with congested underground infrastructure because it is less likely to be accidently 12 penetrated by incautious excavation than plastic pipe, and is equally slow to deteriorate 13 through the application of cathodic protection systems. Plastic pipe has been installed in natural gas distribution systems since the 1970s; it's not a new technology. Like many 14 natural gas utilities since that time, Cascade has used plastic pipe where it was most 15 16 cost effective and suitable for adequately serving both the demand requirements and 17 locational circumstances of a particular installation. Again, without a survey of the 2-inch 18 steel mains in Cascade's Oregon system, one cannot assume that it would be 19 predominantly replaced by plastic pipe. Therefore, the mains system replacement cost in the Company's LRIC retains its methodology using like material type, size, and footage. 20

21

13 Staff/1303, Compton/1,

10 - REPLY TESTIMONY OF RONALD J. AMEN

| 1 | | C. Large Customer Meter Investment Costs |
|----|----|---|
| 2 | Q. | How are the costs of services, meters, and regulators determined for the large |
| 3 | | customer classes? |
| 4 | Α. | As stated in my direct testimony, the service, metering and regulating installations were |
| 5 | | specifically identified for each customer in the customer classes 111, 170, 163, and the |
| 6 | | Special Contract class 900, using the Cascade geographical information system (GIS) |
| 7 | | and then valued at current cost. Once the investment costs were derived, the |
| 8 | | incremental costs were computed by applying the Economic Carrying Charge Rate |
| 9 | | (ECCR) to the investment costs. The derivation of the LRIC for services and meters is |
| 10 | | presented in Exhibit CNGC/1003. |
| 11 | Q. | NWIGU witness Mr. Gorman believes that Cascade has overstated its meter costs |
| 12 | | for its large customers and further states that your testimony has not provided |
| 13 | | any support for the cost estimates for meters for customers served under |
| 14 | | Schedules 111, 163, 170, and 900. What is your response to his claims? |
| 15 | A. | Obviously Mr. Gorman has failed to review the workpapers filed with my testimony, |
| 16 | | specifically workpaper RJA-WP-5. This workpaper provides a detailed description of the |
| 17 | | specific meters, regulators, and related equipment, including capitalized installation |
| 18 | | costs (in 2015 dollars) for each of the customers served under the aforementioned |
| 19 | | Schedules. |
| 20 | Q. | What is the basis for Mr. Gorman's opinion? |
| 21 | Α. | Much like Mr. Compton's comparison of Cascade's main extension costs, Mr. Gorman |
| 22 | | simply compares the Company's large customer meter installation costs to the quoted |
| 23 | | meter costs of Avista and NW Natural. Had he compared the Avista and NW Natural |

| 1 | | meter costs to those listed in workpaper RJA-WP-5, NWIGU would have found that they |
|-----|----|--|
| 2 | | are not inconsistent. However, NWIGU has not considered the additional installed cost |
| 3 | | of the associated pressure regulators, parallel bypass pipeline, and other attendant |
| 4 | | equipment such as electronic supervisory control and data acquisition (SCADA) or |
| 5 | | Metretek monitoring devices that comprise the various measurement stations on the |
| 6 | | premises of Cascade's large customers. |
| 7 | Q. | Do you have any changes to your revised LRIC related to large customer meter |
| 8 | | investment cost? |
| 9 | Α. | Yes. While preparing my response to NWIGU's testimony and reviewing workpaper |
| 10 | | RJA-WP-5 related to large customer meter and regulator installations, I found four |
| 11 | | instances where the metering station installation costs were double counted. I have |
| 12 | | corrected these items and included the adjusted results in the revised LRIC Study. |
| 13 | | D. Summary of Revised LRIC Study Results |
| 14 | Q. | Please compare the revised LRIC Study estimates to the current rates and |
| 15 | | associated non-gas revenues for each of Cascade's rate schedules. |
| 16 | A. | Line 37 of Exhibit CNGC/1001 presents the total LRIC-based revenue requirement for |
| 17 | | each of Cascade's rate schedules. Line 32 of this Exhibit presents Test Year revenues |
| 18 | | by rate schedule under Cascade's current rates. By comparing these two sets of |
| 19 | | revenues, one can see the extent to which Cascade's current rates and non-gas |
| 20 | | revenues are reflective of LRIC. The revenue-to-cost ratios on line 38 of this exhibit |
| ~ 4 | | |
| 21 | | portray the relative difference between these two revenue amounts for each rate |

| 1 | | revenues of the particular rate schedule are below its indicated LRIC (e.g., Schedule |
|--|-----------------|---|
| 2 | | Nos. 101, 105, and 111), while a revenue-to-cost ratio of greater than 1.00 means that |
| 3 | | the rates and revenues of the rate schedule are above its indicated LRIC (e.g., Schedule |
| 4 | | Nos. 104, 163, 170 and Special Contract Class 900). These results provide cost |
| 5 | | guidelines for use in evaluating a utility's class revenue levels and rate structures. I will |
| 6 | | describe how these results were used to assign Cascade's proposed revenue increase |
| 7 | | to its rate classes in Section IV of my reply testimony. |
| 8 | Q. | What was the source of the revenue requirement components? |
| 9 | A. | Exhibit CNGC/1002 shows how the pro forma results of Cascade's operations, including |
| 10 | | the revised revenue increase discussed in Mr. Parvinen's Exhibit CNGC/500, have been |
| 11 | | assigned to the functional components used in the LRIC Study. |
| | | |
| 10 | | |
| 12 | | III. REVISED PROPOSED CLASS REVENUES |
| 12 13 | Q. | III. REVISED PROPOSED CLASS REVENUES Please describe how Cascade's revised proposed revenue increase of \$988,000 |
| | Q. | |
| 13 | Q. A. | Please describe how Cascade's revised proposed revenue increase of \$988,000 |
| 13 14 | | Please describe how Cascade's revised proposed revenue increase of \$988,000 was assigned to its rate classes. |
| 13 14 15 | | Please describe how Cascade's revised proposed revenue increase of \$988,000 was assigned to its rate classes. As described in my direct testimony, the apportionment of revenues among rate classes |
| 13 14 15 16 | | Please describe how Cascade's revised proposed revenue increase of \$988,000 was assigned to its rate classes. As described in my direct testimony, the apportionment of revenues among rate classes consisted of deriving a reasonable balance between various criteria or guidelines that relate |
| 13 14 15 16 17 | | Please describe how Cascade's revised proposed revenue increase of \$988,000 was assigned to its rate classes. As described in my direct testimony, the apportionment of revenues among rate classes consisted of deriving a reasonable balance between various criteria or guidelines that relate to the design of utility rates. The various criteria that were considered in the process |
| 13 14 15 16 17 18 | | Please describe how Cascade's revised proposed revenue increase of \$988,000 was assigned to its rate classes. As described in my direct testimony, the apportionment of revenues among rate classes consisted of deriving a reasonable balance between various criteria or guidelines that relate to the design of utility rates. | 13 14 15 16 17 18 19 | | Please describe how Cascade's revised proposed revenue increase of \$988,000 was assigned to its rate classes. As described in my direct testimony, the apportionment of revenues among rate classes consisted of deriving a reasonable balance between various criteria or guidelines that relate to the design of utility rates. The various criteria that were considered in the process included: (1) cost of service; (2) class contribution to present revenue levels; and (3) customer impact considerations. These criteria were evaluated for each of Cascade's rate |

| 1 | Q. | Does Cascade accept Staff's proposed limitation on the maximum increase to a |
|----|----|---|
| 2 | | particular class of two to three times the system average? |
| 3 | A. | Yes. This maximum increase limitation is reflected in Cascade's revised revenue |
| 4 | | allocation to Schedules Nos. 105 and 111. |
| 5 | Q. | Have you prepared a comparison of Cascade's present and proposed revenues |
| 6 | | by rate schedule? |
| 7 | A. | Yes. Exhibit CNGC/1005 presents a comparison of present and proposed revenues for |
| 8 | | each of Cascade's rate schedules based on the revisions to the LRIC. |
| 9 | | IV. SUMMARY OF CASCADE'S RATE DESIGN PROPOSALS |
| 10 | Q. | Please summarize the rate design changes Cascade has proposed in this rate |
| 11 | | proceeding. |
| 12 | A. | Cascade has proposed the following rate structure and design changes to its current |
| 13 | | rate schedules: |
| 14 | | • The establishment of a monthly Basic Service Charge for Schedule No. 111, Large |
| 15 | | Volume General Service, and Schedule No. 170, Interruptible Service, and the |
| 16 | | renaming of the current Dispatch Service Charge in the consolidated Schedule |
| 17 | | No.163 as a monthly Basic Service Charge. |
| 18 | | • For customers served under Schedule No. 105, General Industrial Service, and |
| 19 | | Schedule No. 163, Cascade proposes to adjust the monthly Basic Service Charges |
| 20 | | to better reflect the underlying costs of providing basic customer service as well as |
| 21 | | the proposed change in class revenues. |

| 1 | Q. | Please describe the proposed Basic Service Charges for Schedule No. 111 and |
|----|----|--|
| 2 | | Schedule No. 170. |
| 3 | A, | Cascade is proposing to establish the Basic Service Charge for Schedule No. 111 at |
| 4 | | \$200.00 per month, approximately 27 percent of the upper range of incremental |
| 5 | | customer-related O&M and meter and service carrying charges for the class. The |
| 6 | | proposed Basic Service Charge for Schedule No. 170 was set at \$300.00 per month, |
| 7 | | which is approximately 9 percent of the upper range of incremental customer-related |
| 8 | | O&M and meter and service carrying charges for the class. |
| 9 | Q. | Please describe the changes to the monthly Customer Charge levels for Schedule |
| 10 | | No. 105 and Schedule No. 163. |
| 11 | Α. | The proposed monthly Basic Service Charge for Schedule No. 105 is \$30.00, |
| 12 | | approximately 26 percent of the upper range of the incremental customer-related O&M |
| 13 | | and meter and service carrying charges for the class, as indicated in the LRIC Study. |
| 14 | | The renamed Basic Service Charge proposed for Schedule No. 163 is \$750.00, which |
| 15 | | raises the charge to within 45 percent of the upper range of the indicated incremental |
| 16 | | customer-related O&M and meter and service carrying charges for the class. |
| 17 | Q. | Have any of the Company's aforementioned proposals been challenged by any |
| 18 | | party to this proceeding? |
| 19 | A. | No. |
| 20 | Q. | Is Cascade proposing to change the Basic Service Charge for any of the |
| 21 | | remaining Schedules? |
| 22 | Α. | No. Cascade recommends that the Basic Service Charges for Schedule No. 101, |
| 23 | | General Residential Service, and Schedule No. 104, General Commercial Service, |

| 1 | | remain at their current \$3.00 per month level. At this level, the Basic Service Charge for |
|----|----|---|
| 2 | | these two classes of service will recover the monthly customer-related O&M, as |
| 3 | | indicated by the LRIC Study. Cascade witness Mr. Parvinen discusses this |
| 4 | | recommendation further in his testimony. |
| 5 | Q. | Have you provided an Exhibit that depicts the proposed rates for all classes of |
| 6 | | service? |
| 7 | Α. | Yes. Exhibit CNGC/1006 shows the derivation of each rate component for each of |
| 8 | | Cascade's service schedules. |
| 0 | | V. CUSTOMER BILL IMPACTS |
| 9 | - | |
| 10 | Q. | Please describe the revised bill impacts for residential customers under |
| 11 | | Cascade's rate design proposal. |
| 12 | Α. | The monthly and annual bill impacts for a typical residential customer using 659 therms |
| 13 | | per year is shown on Exhibit CNGC/1007. The average monthly increase for this |
| 14 | | residential customer under the Company's proposed rate design is \$1.25 or 2.48 |
| 15 | | percent. Average monthly residential bill impacts are depicted on page 1 of Exhibit |
| 16 | | CNGC/1007 and bill impacts over varying monthly levels of usage is presented on page |
| 17 | | 1 of Exhibit CNGC/1008. |
| 18 | Q. | Have you prepared bill comparisons for Cascade's other rate classes? |
| 19 | Α. | Yes. Pages 2 through 6 of Exhibit CNGC/1008 presents bill comparisons for Cascade's |
| 20 | | non-residential service schedules at varying monthly levels of gas usage. |
| 21 | Q. | Does this complete your testimony? |
| 22 | Α. | Yes, it does. |

i - REPLY TESTIMONY OF JENNIFER G. GROSS

I. INTRODUCTION

| 1 | Q. | Please state your name and business address. |
|----|----|---|
| 2 | Α. | My name is Jennifer G. Gross. My business address is 8113 W. Grandridge Boulevard, |
| 3 | | Kennewick, Washington 99336-7166. My email address is jennifer.gross@cngc.com. |
| 4 | Q. | By whom are you employed and in what capacity? |
| 5 | Α. | I am employed by Cascade Natural Gas Corporation (Cascade or Company) as a |
| 6 | | Regulatory Analyst IV. |
| 7 | Q. | How long have you been employed by Cascade? |
| 8 | A. | I have been with the Company since May 4, 2015. |
| 9 | Q. | What are your educational and professional qualifications? |
| 10 | A. | I graduated from Oregon State University in June 1993 with a Bachelor of Arts in English |
| 11 | | and from Portland State University in December 1995 with a Master of Arts in English. |
| 12 | | I worked for Portland General Electric for twelve years in various capacities, |
| 13 | | including seven years as a Regulatory Analyst in Rates and Regulatory Affairs. |
| 14 | | Following my time at Portland General Electric, I worked for seven years as a Tariff and |
| 15 | | Compliance Consultant in the Rates and Regulatory Department at Northwest Natural |
| 16 | | Gas Corporation. In 2015, I began working for Cascade as a Regulatory Analyst. |
| 17 | Q. | Have you testified before the Public Utility Commission of Oregon (Commission) |
| 18 | | before? |
| 19 | A. | No. I have not filed testimony before but I have prepared materials and assisted in other |
| 20 | | utility proceedings including advice filings, rulemakings, and various Commission |
| 21 | | investigations, and I have testified before the Washington Utility and Transportation |

1 - REPLY TESTIMONY OF JENNIFER G. GROSS

1 Commission in the Company's last general rate case in Washington, docketed as UG-

2 152286.

II. SCOPE AND SUMMARY OF TESTIMONY

3 Q. What is the purpose of your testimony in this docket? My reply testimony responds to Staff Exhibit 800, the Opening Testimony of Scott 4 Α. 5 Shearer, and Exhibit 803, Proposed Tariff Language Revisions. My testimony addresses Mr. Shearer's comments on the tariff housekeeping changes proposed in the 6 7 Company's initial submission. I make no comments on Mr. Shearer's presentation on 8 consumer complaints. 9 Q. Are you sponsoring any exhibits in this proceeding? Yes, I am sponsoring the following three exhibits which are explained in my testimony: 10 Α. 11 Exhibit CNGC/1101 Table of Tariff Revisions 12 Exhibit CNCG/1102 Redlined Tariff Sheets 13 Exhibit CNGC/1103 Clean Replacement Tariff Sheets 111. RECOMMENDED TARIFF LANGUAGE REVISIONS On pages 5 through 7 of his opening testimony, Mr. Shearer presents twelve 14 Q. issues (labeled A through L) with the Company's proposed tariff language. In 15 16 Exhibit Staff/803, he provides recommended revisions to the Company's tariff language for each issue addressed in his testimony. Does the Company agree 17 18 with all of Mr. Shearer's recommended tariff revisions? The Company agrees to all of Mr. Shearer's recommended tariff language revisions with 19 Α. 20 three exceptions—where we propose minor alterations to Staff's proposals.

2 - REPLY TESTIMONY OF JENNIFER G. GROSS

| 1 | Q. | Which of recommended changes does the Company agree to without alterations? | /hicł | ns? |
|----|----|---|-------|------|
| 2 | Α. | The Company agrees to adopt Staff's recommended language on the sheets as noted | ne C | ed |
| 3 | | for Issues A, B, C, D, E, H, J, K, and L. | r Iss | |
| 4 | Q. | On which issues does the Company propose alterations to Staff's proposals? | n wł | |
| 5 | Α, | The Company proposes minor alterations to Staff's proposals on Issues F, G, and I. | າe C | |
| 6 | Q. | What are the Company's concerns with Issues F, G, and I? | 'hat | |
| 7 | Α. | The Company's concerns with Issues F, G, and I are simple: | າe C | |
| 8 | | The Company agrees with Mr. Shearer's presentation of Issue F and his | Th | |
| 9 | | recommendation to make the tariff language match OAR 860-021-0405(2); however | rea | ever |
| 10 | | there appears to be a typographical error in Staff's insertion of the rule's | th€ | |
| 11 | | requirements and as a result, the language presented in Exhibit Staff/803 does not | rec | not |
| 12 | | match the administrative rule. This appears to be an unintentional error. The | ma | |
| 13 | | Company's replacement Sheet No. 5.2 includes language from the rule rather than | Сс | an |
| 14 | | Staff's exhibit, Staff/803. | Sta | |
| 15 | | • The Company agrees with Mr. Shearer's presentation of Issue G; however, the | Th | |
| 16 | | recommended language in Exhibit Staff/803 is the language the Company initially | rec | у |
| 17 | | filed in Exhibit Archer/502. The Company includes in its replacement Sheet No. 5.3 | file | 5.3 |
| 18 | | language that addresses Staff's concerns, and on which Staff and the Company | lar | |
| 19 | | agreed to by email on June 15, 2016. | ag | |
| 20 | | • The Company agrees to the language recommended for Issue I, but notes that due | Th | lue |
| 21 | | to revisions that adjusted pagination, this language is on Sheet No. 5.5, not Sheet | to | ət |
| 22 | | No. 5.4. | Nc | |

3 - REPLY TESTIMONY OF JENNIFER G. GROSS

1 **Q.**

Does that address all Staff's issues?

2 A. Yes.

| 3 | Q. | Do | bes the Company recommend additional revisions to the tariff as initially filed? |
|----|----|-----|--|
| 4 | A. | Ye | es. After the Company filed its proposed housekeeping revisions with this case, Staff |
| 5 | | со | ntacted us with some of their concerns. As a result of discussions with Staff, the |
| 6 | | Сс | ompany considered how Staff's concerns impacted the tariff more broadly. As a result |
| 7 | | the | e Company has a number of additional recommended language changes, which are |
| 8 | | as | follows: |
| 9 | | • | Sheet No. ii. In response to Staff Issue D, the Company revised the title of Rule 4 |
| 10 | | | from Customer Deposits to "Customer Deposits and Other Security." This change is |
| 11 | | | made to the Index. |
| 12 | | ٠ | Sheet No. 2.2. In Issue C, Staff raised the concern with the awkward and |
| 13 | | | unnecessary citation found in the definition of "High Priority Use." This issue caused |
| 14 | | | the Company to realize the same awkward type of citation was in the definition of |
| 15 | | | "Essential Agricultural Use." That citation is removed. |
| 16 | | ٠ | Sheet No. 4.1. After discussing Issue D with Staff, the Company has renamed and |
| 17 | | | revised Rule 4 to clarify the terms related to other, non-cash forms of security. |
| 18 | | • | Sheet 4.3. In response to Issue E, the Company removed language requiring that a |
| 19 | | | nonresidential customer may need to establish credit, and to capture the intent, |
| 20 | | | added a term to non-residential deposit requirements, stating that non-residential |
| 21 | | | customers may owe a deposit if they are past due on other financial obligations. |

4 - REPLY TESTIMONY OF JENNIFER G. GROSS

| 1 | | <u>Sheet No. 5.1</u>. The Company revised the list of reasons why a customer n | nay have |
|----|----|--|------------------------|
| 2 | | service disconnected so that the list matches OAR 860-021-0305. This ch | ange was |
| 3 | | discussed with Staff but not included in Staff's final recommended changes | . |
| 4 | | Sheet No. 17.1. Language is added to clarify the meaning of "agricultural s | ervice |
| 5 | | customers" and "high priority use customers." This issue was raised by Sta | aff's |
| 6 | | concern, in Issue C, regarding the definition of high priority use. | |
| 7 | | • Sheet No. 170.2. Again, in response to Staff Issue C, the Company looked | at the use |
| 8 | | of the terms "essential agricultural use" and "high priority" use within the Inf | erruptible |
| 9 | | Service Schedule and realized that the language where these terms were u | used was |
| 10 | | no longer accurate and is now removed. | |
| 11 | | • Sheet. 200.1. Apart from Staff review, the Company realized that the Late | ^{>} ayment |
| 12 | | Charge was incorrectly stated as being \$200. It is corrected to be 0.3% an | nualized |
| 13 | | interest. | |
| 14 | Q. | Does this represent all the Company's recommended tariff changes? | |
| 15 | A. | No. The revisions resulted in changes to pagination and, therefore, the need to | o submit |
| 16 | | other replacement sheets. Exhibit CNGC/1103 includes all replacement sheet | s. Exhibit |
| 17 | | CNGC/1102 is a redlined version showing the language changes as compared | to the |
| 18 | | ariff sheets submitted in the Company's initial rate case filing. Exhibit CNGC/ | 1101 is a |
| 19 | | able listing all replacement sheets as well as a brief summary of the changes | made and |
| 20 | | he corresponding Staff issue, if applicable. | |
| | | | |

5 - REPLY TESTIMONY OF JENNIFER G. GROSS

IV. <u>CONCLUSION</u>

- 1 Q. Does this conclude your testimony?
- 2 A. Yes.

6 - REPLY TESTIMONY OF JENNIFER G. GROSS

Jennifer G. Gross

TABLE OF TARIFF REVISIONS EXHIBIT CNGC/1101

September 2016

| REVISED PAGES | RULE OR SCHEDULE TITLE | SUMMARY OF CHANGE | CITATION FOR RELATED ISSUE AS PRESENTD IN STAFF 800, SHEARER |
|------------------------|---------------------------|---|--|
| Original Sheet No. ii | Index | Revises The title of Rule 4 from "Customer Deposits" to "Customer Deposits and Other Security" to respond to Issue D | Issue D, page Shearer/5, lines 18- 20 |
| | | | Staff did not directly request this change. |
| Original Sheet No. 2.1 | Definitions | Corrects reference to Rule 2 in definition of "Applicant" from to Rule 3 | Issue A, page Shearer/5, lines 9-10 |
| | | Revises definition of "Customer" to include someone who has voluntarily terminated service within the past 20 days. | Issue B, page Shearer/5, lines 11- 14 |
| | | | The changes to this page are as requested by Staff. |
| Original Sheet No. 2.2 | Definitions | Removes defined term, "Essential Agricultural Use" | Staff did not request this change; but like Issue C, the definition contained an unnecessary citation which is now removed. |
| Original Sheet No. 2.3 | Definitions | Removes defined term, "High Priority Use." This term is used only in Rule 17 so the definition is removed from Rule 2, revised and placed in Rule 17, the only place where the term | Issue C, page Shearer/5, lines 15- 17 |
| | | is used. | The changes to this page are as requested by Staff. |
| Original Sheet No. 3.1 | Establishing Service | The option to provide a written surety agreement is added. | Issue D, page Shearer/5, lines 18- 20 |
| | | | The changes to this page are as requested by Staff. |
| Original Sheet No. 3.2 | Establishing Service | Language is removed that states a non-residential customer may have to establish credit. | Issue E, page Shearer/5, lines 21- 23 The changes to this page are as |
| | | | requested by Staff |

| Original Sheet No. 4.1 | Customer Deposits | The title of the Rule is Changes from "Customer Deposits" to | While Staff did not request this |
|------------------------|---|---|--|
| | and Other Security | "Customer Deposits and Other Security". (all of rule 4) | change, it is consistent with Issue D, page Shearer/5, lines 18-20 |
| | | A General section is added to clarify the terms and conditions established in the Rule are applicable for cash deposits and other forms of security. | Same as above. |
| | | The title to the second section is revised to include surety agreements. | Same as above. |
| | | The language establishing surety agreements as an option is moved from no. 2 to no. 4 in the list, and additional information is added about surety agreements for added clarity. And addition | Same as above. |
| Original Sheet No. 4.2 | Customer Deposits and Other Security | Changes resulted in revised pagination. | N/A |
| Original Sheet No. 4.3 | Customer Deposits and Other Security | Section (f) under Nonresidential Deposit Requirements is added to clarify that a non-residential customer may have to pay a deposit if that customer is passed due on other financial commitments. | This language change was not requested by Staff but relates to Issue E, page Shearer/5, lines 21- 23. When we remove the requirement that a customer may have to establish credit, we needed to capture the initial intent of that language by adding language requiring a deposit when a large customer is having financial difficulties. |
| Original Sheet No. 4.4 | Customer Deposits and Other Security | Revisions to the rule changed the pagination | N/A - pagination |
| Original Sheet No. 5.1 | Discontinuation of Service | The grounds for disconnecting a customer's service are revised to align with OAR 860-021-0305. | While this issue is not included in Staff's testimony, Staff discussed it with the Company. |

| Original Sheet No. 5.2 | Discontinuation of Service | The language describing the contents of disconnect notices is revised to match OAR 860-021-0405. | Issue F, page Shearer/6, lines 4-6 |
|---------------------------------------|-------------------------------|---|---|
| | Service | | The changes related to this issue match the rule. The language as presented in Staff/800, Shearer/2 |
| | | | has typos. |
| Original Sheet No. 5.3 | | The language detailing when a 15-day notice is not required is revised to match the language in OAR 860-021-0405. | Issue G |
| | | | The revised language removes establishing credit as a reason for |
| | | | disconnecting without a 15-day |
| | | | notice. This language differs from Staff's as presented in Exhibit |
| | | | Staff/803, but matches was Staff and the Company discussed over email (June 15, 2016). |
| Original Sheet No. 5.3 | Discontinuation of Service | Revisions are made to section (5) correcting when service is complete on a 15-day notice. | Issue H, page Shearer/6, lines 12- 15 |
| | | | The changes related to this issue are as requested by Staff. |
| Original Sheet No. 5.5 | Discontinuation of Service | Language is added defining the different timeframes for medical certificates issued for both non-specific chronic illnesses and specific chronic illnesses. | Issue I, page Shearer/6, lines 16- 18 |
| | | | The changes related to this issue are as requested by Staff. |
| Original Sheet No. 5.6 through 5.8 | Discontinuation of Service | Revisions resulted in changes to pagination. | N/A |
| Original Sheet No. 6.1 | Billing | Revisions are made to correct when a bill is due and payable. | Issue J, page Shearer/6, lines 19- 22 |
| | | | The changes related to this issue are as requested by Staff. |
| Original Sheet No. 6.2 | Billing | Language allowing estimated bills is removed. | Issue K, page Shearer/7, lines 1-6 |

| | | The language on Budget payment plans is revised to align with OAR 860-021-0414. | Issue L, page Shearer/7, lines 7-13 |
|-----------------------------------|--------------------------------------|---|---|
| | | | The changes on this sheet are as requested by Staff. |
| Original Sheet No. 6.3 and 6.4 | | Changes resulted in revised pagination. Original Sheet No. 6.5 is removed. | N/A |
| Original Sheet No. 17.1 | Order of Priority for Gas Service | Language is added to clarify the meaning of the terms essential agricultural use and high priority use. | While not requested by Staff, this revision stems from looking at Issue C, page Shearer/5, lines 15- 17. |
| Original Sheet No. 170.2 | Interruptible Service | A section on Essential Agricultural and High Priority Use is removed as it is not accurate. | While not requested by Staff, this revision stems from looking at Issue C, page Shearer/5, lines 15- 17. |
| Original Sheet No. 200.1 | Various Miscellaneous Charges | The Late Payment Charge is corrected from \$200 to 0.3% annualized interest. | The Company noticed this error apart from Staff's review. |

RULE 2 DEFINITIONS

DEFINITIONS

When used in this Tariff the following terms shall have the meanings defined below:

- <u>Applicant</u> A person, firm, or corporation that (1) applies for service; (2) reapplies for service at a new or existing location after service has been disconnected; or (3) has not met the requirements for becoming a customer as established in Rule 23.
- 2. BTU British Thermal Unit
- 3. <u>British Thermal Unit</u> The standard unit for measuring a quantity of thermal energy. One BTU equals the amount of thermal energy required to raise the temperature of one pound of water one degree Fahrenheit and is exactly defined as equal to 1,055.05585262 joules. 100,000 BTUs is equivalent to one therm.
- 4. <u>Commission</u> The Public Utility Commission of Oregon or otherwise referred to as OPUC.
- 5. <u>Company</u> Cascade Natural Gas Corporation (Cascade) or its assigned agents acting through its duly authorized officers or employees within the scope of their respective duties.

6. Customer - Any person, firm, or corporation that has applied for, been accepted, and

a. Applied for, been accepted, and is currently receiving gas and, or distribution service from the Company under these Rules and Regulations at one location under one rate classification contract, or

6-b. Received gas or distribution service from the Company, and voluntarily terminated service within the past twenty days.

- <u>Curtailment</u> An event when the Company must interrupt service to customers in accordance with Rule 17. A Curtailment event may affect any level of service depending on the severity and geographical scope of the event.
- 8. Customer Classifications:
 - A. <u>Residential</u> Service to a single family dwelling, two family (duplex) dwelling or to an individual dwelling unit in a multiple family dwelling building for residential purposes including space heating, water heating, and cooking.
 - <u>Dwelling</u> A building designed exclusively for housing that contains permanent facilities for sleeping, bathing, and cooking. A dwelling may be a one family home, a duplex, a multiplex, but not including hotel or motel units that have no permanent kitchens.

RULE 2 DEFINITIONS

DEFINITIONS (continued)

Customer Classifications (continued)

- B. <u>Commercial</u> Service to a customer engaged in selling, warehousing, or distributing a commodity, in some business activity or in a profession, or in some form of economic or social activity (office, stores, clubs, hotels, etc.) and for purposes that do not come directly under another classification of service.
- C. <u>Industrial</u> Service to a customer engaged in a process which creates or changes raw or unfinished materials into another form or product. (Factories, mills, machine shops, mines, oil wells, refineries, pumping plants, creameries, canning and packing plants, shipyards, etc., i.e., in extractive, fabricating or processing activities).
- D. Institutional Service to a customer of a public character including but not limited to governmental buildings, colleges, schools, hospitals, clinics, institutions for the care or detention of persons, and similar establishments.
- E. <u>Interruptible Gas</u> An interruptible gas service customer is considered "non-core" and receives a reduced rate on natural gas service because this class of customers is the first curtailed when gas supply or distribution is constrained for reasons other than force majeure.
- F. <u>Transportation</u> Transportation customers purchase their own natural gas and procure only distribution services from the Company.
- 9. <u>Gas Day</u> A twenty-four hour period beginning daily at 7:00 a.m. Pacific Clock Time (PCT), which is Pacific Standard Time or Daylight Savings Time in Kennewick, Washington, whichever is effective at the time of reference. The Company's Gas Day coincides with the Gas Day established in Northwest Pipeline's tariff, which may change from time to time, upon approval of the Federal Energy Regulatory Commission (FERC).
- 10. Essential Agricultural Use When As established by the Secretary of Agriculture under section 401(c) of the Natural Gas Policy Act of 1978 (NGPA), or identified in 7 CFR 2900, et seq. and amendments thereof, essential agricultural use is gas use (1)gas is used: (1)f-For agricultural production, natural fiber production, natural fiber processing, food processing, food quality maintenance, irrigation pumping, crop drying; or (2) As a process fuel or feedstock in the production of fertilizer, agricultural chemicals, animal feed, or food which the Secretary of Agriculture determines is necessary for full food and fiber production.
- 11. <u>Firm Service</u> The sale of natural gas on a firm basis where the Company will exercise reasonable diligence to supply and deliver continuous service to customers not receiving interruptible service. See Order of Priority in Rule 17.

RULE 2 DEFINITIONS

DEFINITIONS (continued)

12. <u>12. High Priority Use As defined in 281.203(a), Title 18 Code of Federal Regulations, high priority use is natural gas in a residence, a small commercial establishment, in a school or hospital, or for police protection, for fire protection or in a correctional facility. High Priority Use – High priority use is where continuity of gas service is considered in the public's best interest such as gas usage in a residence, school, hospital, or correctional facility, or for police or fire protection.</u>

13. <u>Month</u>- The period of time between and including the date of the current meter read and the date of the prior meter read which is the period upon which the Customer's monthly bill is based. A billing month may be contained within a single calendar month, or may encompass a portion of two separate calendar months.

14. <u>Premise</u> - All of the real property and personal property in use by a single customer on a parcel of land which comprises the site upon which customer facilities are located and to which natural gas service is provided.

- 15. <u>Tariff</u> This Tariff, including all schedules, rules, regulations, and rates as they may be modified or amended from time to time.
- 16. Therm A unit of heating value equivalent to 100,000 BTUs.
- 17. <u>WACOG</u> The Weighted Average Commodity Cost of System Supply Gas (WACOG) reflected in Cascade's tariffs shall be as established by gas cost tracking or other similar filings.

RULE 3 ESTABLISHING SERVICE

REQUIREMENTS FOR ESTABLISHING SERVICES

To establish service with the Company, an applicant must do the following:

- 1. Provide the Company with: a) the date service is to begin; b) whether the premise has previously received service from the Company; c) the purpose for which the gas is to be used; d) whether the applicant owns or rents the premise; e) the applicable rate schedule; and f) any other information that the Company deems necessary;
- 2. Establish Identity in accordance with the requirement in Section A below in this Rule; and
- 3. Establish Credit in accordance with the requirements found in Section B below in this Rule.

By establishing service, a customer agrees to be bound by all the terms and conditions of service as established in the Company Tariff as periodically revised and approved by the Public Utility Commission of Oregon.

A. ESTABLISHING IDENTITY

To establish an account, each applicant, including an applicant for co-customer, is required to provide documentation verifying his/her identity. Cascade may require: a) the name of person responsible; b) name on the account if different; c) birthdate; d) Social Security Number; e) valid Oregon driver's license; f) service address; g) billing address if different; h) telephone numbers where applicant can be reached; and I) other information as deemed necessary by the Company.

If the applicant does not wish to provide his/her Social Security Number or valid driver's license, he/she may provide a valid State or Federal picture identification; a combination of a birth certificate and current school or employer picture identification; the name of another person that can verify the applicant's identity; or other information deemed sufficient by the utility.

Once an account is established, at the customer's request, Cascade will restrict access of the account by other individuals through the use of a password.

B. ESTABLISHING CREDIT

Below are the criteria for establishing credit for residential and non-residential customers, respectively. A customer who cannot meet the requirements put forth below must pay a Deposit or provide other it insecurity in accordance with the terms and conditions in Rule 4.

(continued)

P.U.C. OR. No. 10

Original Sheet No. 3.2

RULE 3 ESTABLISHING SERVICE

ESTABLISHING SERVICE (continued)

B. ESABLISHING CREDIT (continued)

1. RESIDENTIAL SERVICE

Satisfactory credit may be established by any of the following:

- a. Received twelve months of continuous utility service (of same type) in the preceding 24month period and the utility can verify that the applicant voluntarily terminated service and paid for services as required;
- b. Provides proof of ability to pay by providing either proof of employment during the prior 12month period, or statement by income provider that applicant has a regular source of income; or
- c. Meets the Commission approved minimum credit requirements based on a third party credit report score or the Company's own credit scoring formula.

2. NON RESIDENTIAL SERVICE

A non-residential applicant or customer may establish credit if either of the following is verified:

- a. The non-residential applicant or customer has received continuous utility service of a type and in quantities similar to the service for which application is made during the 12-month period prior to the date of the credit screen and has not received any notices of disconnection during such period; or
- b. The non-residential applicant or customer is licensed to do business in the state of Oregon and has kept current over the past twelve months on all real estate mortgages or lease agreements, commercial loans, utility bills and trade accounts.

COMPLIANCE TO RULES AND REGULATIONS

By establishing an account, a customer agrees to comply with all the applicable rules and regulations as established in this Tariff as revised from time to time.

5. Paying a deposit does not excuse a customer from complying with Cascade's tariffs or other regulations on file with the Commission, such as the obligation to pay bills promptly.

DEPOSIT PAYMENT ARRANGEMENTS FOR RESIDENTIAL SERVICE

 When Cascade require a deposit, the customer may pay the deposit in full or elect to pay the deposit in three installments. The first installment is due immediately. The remaining installments are due 30 days and 50 days after the first installment payment. Except for the last payment, installments shall be the greater of \$30 or one-third the deposit.

 Where an installment payment of a deposit is made together with a payment for gas service, the amount paid shall first be applied toward payment of the amount due for deposit.

RULE 4 CUSTOMER DEPOSITS AND OTHER SECURITY

DEPOSIT PAYMENT ARRANGEMENTS FOR RESIDENTIAL SERVICE (continued) DEPOSIT PAYMENT ARRANGEMENTS FOR RESIDENTIAL SERVICE

 When Cascade requires a deposit, the customer may pay the deposit in full or elect to pay the deposit in three installments. The first installment is due immediately. The remaining installments are due 30 days and 60 days after the first installment payment. Except for the last payment, installments shall be the greater of \$30 or one-third the deposit.

 Where an installment payment of a deposit is made together with a payment for gas service, the amount paid shall first be applied toward payment of the amount due for deposit.

- 3. In the event a consumer is required to pay an additional deposit, the customer shall pay within five days one-third of the total deposit, or at least \$30, whichever is greater. The remainder of the deposit is due under the terms of Subsection 1. If the customer has an existing deposit installment agreement, the remaining installment payments will be adjusted to include the additional deposit; however, two installment payments cannot be required within the same 30-day period.
- 4. Where a customer enters into an installment agreement for payment of a deposit under Subsection 1 of these rules, Cascade shall provide written notice explaining its deposit requirements. The notice shall specify the date each installment payment shall be due and shall include a statement printed in boldface type informing the person that service will be disconnected if payment is not received when due. The notice shall also set forth the name and telephone number of the appropriate unit within the Department of Human Services or other agencies which may be able to help the customer obtain financial aid.
- 5. If a customer fails to abide by the terms of a deposit installment agreement, the Company may disconnect service after a five-day notice. The notice shall contain the information and shall be served in the manner set forth in Rule 5.
- 6. Where good cause exists, Cascade may provide more liberal arrangements for payment of deposits than those set forth in this rule. Cascade shall keep a written record of the reasons for such action.
- 7. Should disconnection for nonpayment of a deposit occur, the person disconnected shall be required to pay the full amount of the deposit, and any applicable reconnection fee, disconnect visit charge, late-payment fee, and one-half the past due amount before service is restored. The balance of the past-due amount shall be paid within 30 days of the date service is restored. A customer may continue with an existing time-payment agreement by paying all past-due installments, along with the full deposit and other applicable fees.

NONRESIDENTIAL DEPOSIT REQUIREMENTS

CNG/O16-04-01 Issued April 29, 2016 Effective for Service on and after May 30, 2016

P.U.C. OR. No. 10

Original Sheet No. 4.4

 <u>Deposit Requirement - Nonresidential (Seasonal and Non-seasonal Service)</u>. A deposit may be required equal to one sixth the estimated annual usage at the service address if an applicant or sustemen

a. Does not satisfy the credit-screening criteria set forth in Rule 3.

(continued)

P.U.C. OR. No. 10

Original Sheet No. 4.5

RULE 4 CUSTOMER DEPOSITS AND OTHER SECURITY

NONRESIDENTIAL DEPOSIT REQUIREMENT (continued)

NONRESIDENTIAL DEPOSIT REQUIREMENTS

 Deposit Requirement - Nonresidential (Seasonal and Non-seasonal Service). A deposit may be required equal to one-sixth the estimated annual usage at the service address if an applicant or customer:

a. Does not satisfy the credit-screening criteria set forth in Rule 3.

- b. Owes a bill that is overdue by thirty (30) days or more;
- c. Was previously exempted from paying a deposit based upon false information given at the time of application;
- d. Is involved in a bankruptcy action, liquidation, bulk sale or financial reorganization; or
- a. Is adding incremental demand at a premise with an existing service account...; or
 f. The non-residential customer is past due on commitments to creditor such as real estate mortgages or lease agreements, commercial loans, other utility bills and trade accounts.

DEPOSIT PAYMENT ARRANGEMENTS FOR NON-RESIDENTIAL SERVICE

- An applicant for nonresidential service who is required to pay a deposit shall pay the deposit in full prior to receiving service. An applicant for nonresidential service may also fulfill the deposit requirement with an irrevocable letter of credit, surety bond (performance bond) or some other form of guarantee acceptable to the Company.
- 2. An existing nonresidential customer is considered to be an applicant for purposes of satisfying the deposit requirement. An existing nonresidential customer, if required to pay or supplement a deposit, is required to pay the full amount within 10 days of the date of the notice from the Company that such a deposit is required. This notice will also serve as the notice of disconnection required under OAR 860-021-0505.
- 3. If service is disconnected for nonpayment of a deposit, the customer disconnected will be required to pay the full amount of the deposit, plus any applicable reconnection fee, disconnect visit charge, late payment fee and past due account balance before service is restored.

INTEREST ON DEPOSITS FOR RESIDENTIAL AND NONRESIDENTIAL SERVICE

1. Unless otherwise specified by the Commission, customer deposits shall accrue interest at a rate based upon the effective interest rate for new issues of one-year Treasury Bills issued during the last week of October as determined by the Commission in Docket No. UM 779. This interest rate, rounded to the nearest percent, shall apply to deposits held during January 1 through December 31 of the subsequent year.

RULE 4 CUSTOMER DEPOSITS AND OTHER SECURITY

INTEREST ON DEPOSITS FOR RESIDENTIAL AND NONRESIDENTIAL SERVICE (continued)

- 2. Upon payment of a deposit, Cascade shall furnish a receipt showing the date, name of the applicant or customer, the service address, the amount of deposit, a statement that the deposit will accrue interest at the rate prescribed by the Commission, and an explanation of the conditions under which the deposit will be refunded.
- 3. If the deposit is held beyond one year, accrued interest will be paid through a credit to the customer's account. If held less than one year, interest will be prorated. Cascade shall keep a detailed record of each deposit received until the deposit is credited or refunded.

(continued)

RULE-4

CUSTOMER DEPOSITS

REFUND OF DEPOSITS FOR RESIDENTIAL AND NONRESIDENTIAL SERVICE

- 1. Upon termination of service, a customer's deposit plus accrued interest, shall first be applied to any unpaid balance on the customer's account and any remaining balance will be refunded to the customer.
- Cascade may continue holding a deposit until such time as credit is satisfactorily established or reestablished. For purposes of this rule, credit shall be considered to be established or reestablished if one year after a deposit is made:
 - a. The account is current;
 - b. Not more than two five-day disconnection notices were issued to the customer during the previous 12 months; and
 - c. The customer was not disconnected for nonpayment during the previous 12 months.
- 3. After satisfactory credit has been established or reestablished, the deposit plus any accrued interest shall be promptly credited to the customer's account or refunded at the customer's request.
- 4. In the event the customer moves to a new address within Cascade's service area, the deposit, plus accrued interest, will be transferred to the new account.
- 5. Unless otherwise specified by the customer, Cascade shall mail deposit refunds to the customer's last known address. Valid claims for refunds received within one year of the date service was terminated shall be promptly honored. Funds held beyond one year will be disposed of in accordance with ORS 98.316.

| d. Where the customer does not cooperate in providing access to the meter; | |

CNG/O16-04-01 Issued April 29, 2016 Effective for Service on and after May 30, 2016

P.U.C. OR. No. 10

Original Sheet No. 5.2

e. Where a customer requests Cascade to disconnect service or close an accounty

f. Where dangerous or emergency conditions exist at the service premise;

g. For failure to pay Oregon tariff or price listed charges due for services rendered, or by meter tampering, diverting service, or other theft of service (Rule 5);

h. For failure to abide by the terms of a time-payment agreement; or

. Where the Commission approves the disconnection of service.

VOLUNTARY DISCONNECTION

Every customer who is about to vacate any premise supplied with gas service, or who for any reason wishes to have such service discontinued, shall give five days' notice to the Company in advance of specified date of discontinuance of service. Until the Company has such notice, the customer shall be held responsible for all service rendered.

EMERGENCY DISCONNECTION

In emergencies endangering life or property, a utility may terminate service without following the procedures set forth in this rule. However, Cascade shall immediately thereafter notify the Commission. In such cases, where the necessity for emergency termination was through no fault of the customer, there will be no charge made for restoration of service.

(continued)

P.U.C. OR. No. 10

Original Sheet No. 5.3

RULE 5 DISCONTINUATION OF SERVICE

EMERGENCY DISCONNECTION

In emergencies endangering life or property, a utility may terminate service without following the procedures set forth in this rule. However, Cascade shall immediately thereafter notify the Commission. In such cases, where the necessity for emergency termination was through no fault of the customer, there will be no charge made for restoration of service.

DISCONNECTION OF SERVICE ON WEEKENDS AND HOLIDAYS

Gas service shall not be disconnected for nonpayment on or the day prior to a weekend or a state or utility-recognized holiday.

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE

- 1. Notice requirements are waived where safety concerns, or meter tampering, diverting of service, or other theft of service is detected. When a written notice is given under these rules:
 - a. The notice shall contain multilingual information as required by Commission rules and be served on the customer's designated representative, if any;
 - b. If Cascade's records show that the billing address is different from the service address, and Cascade has reason to believe the address is occupied by someone other than the customer, Cascade shall provide a five-day notice to both the occupants of the service address and to the customer's mailing address. The notice may be addressed to "tenant" or "occupant." The envelope shall bear a bold notice stating "Important notice regarding continuance of gas service" or similar words. The notice to occupants may not include the dollar amount owing.
 - c. When Cascade's records show service is to a master-metered multi-family dwelling (including rooming houses), Cascade must notify the Commission's Consumer Services Section at least five business days prior to disconnecting the service. Cascade will use reasonable efforts to notify occupants of the impending disconnection and alternatives available to them.
- 2. The notice shall be printed in **bold face type** and shall state in easy to understand language?

a. The reason for the proposed disconnection; The reason for the proposed disconnection;

c.b. The earliest date for disconnection;

b. An explanation of the Commission's complaint process and toll-free number; and

RULE S **DISCONTINUATION OF SERVICE**

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE (continued)

At least 15 days before Cascade disconnects a residential customer for nonpayment of services rendered, Cascade will provide written notice to the customer. A 15-day notice is not required when disconnection is for:

failure to establish credit, theft of service, or safety. a) Providing false identification to establish service, continue service, or verify identity;

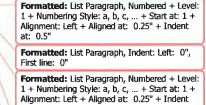

b) Meter tampering diverting service, or other theft; or

c) The existence of unsafe conditions.

4. A notice of disconnection may not be sent prior to the due date for payment of a bill.

5. Cascade may serve the 15-day notice of disconnection in person or send it by first class mail to the last known address of the customer. Service is complete on the date of the mailing or personal delivery or the day after notification is postmarked.

RULE 5 DISCONTINUATION OF SERVICE

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE (continued)

- At least five business days before the proposed disconnection date, Cascade must mail or deliver a written disconnection notice to the customer.
 - a. The disconnection notice shall inform the person that service will be disconnected on or after a specific date and shall explain the alternatives and assistance that might be available.
 - b. If notification is made by delivery to the residence, Cascade shall attempt personal contact. If personal contact cannot be made with the customer or an adult resident, Cascade shall leave the notice in a conspicuous place at the residence.
- On the day that Cascade expects to disconnect service and prior to disconnection, Cascade will make a good faith effort to personally contact the customer or an adult at the residence scheduled to be disconnected.
 - a. If the contact is made, Cascade shall advise the person of the proposed disconnection;
 - b. If contact is not made, Cascade must leave a notice in a conspicuous place at the residence informing the customer that service has been, or is about to be, disconnected.
- 8. Where personal contact is made by the Company under this rule, and the circumstances are such that a reasonable person would conclude that the customer does not understand the consequences of disconnection, the Company must:
 - a. Notify the Department of Human Services and the Commission; and
 - b. Delay the proposed disconnection date for five additional business days.

RULE 5 DISCONTINUATION OF SERVICE

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE (continued)

- 9. Where personal contact is made, the representative of the Company making contact shall be empowered to accept reasonable partial payment of the overdue balance in accordance with the time payment provisions.
- 10. Cascade must document its effort to provide notice and shall make the documentation available to the customer and the Commission upon request.

EMERGENCY MEDICAL CERTIFICATE FOR RESIDENTIAL SERVICE

- Cascade shall not disconnect residential service if the customer submits certification from a qualified medical professional stating that disconnection would significantly endanger the physical health of the customer or a member of the customer's household. "Qualified medical professional" means a licensed physician, nurse-practitioner, or physician's assistant authorized to diagnose and treat the medical condition described without direct supervision by a physician.
- 2. An oral certification must be confirmed in writing within 14 days by the qualified medical professional prescribing medical care. Written certification must include:
 - a. The name of the person to whom the certificate applies and relationship to the customer;
 - b. A complete description of the health condition;
 - c. An explanation how the health of the person will be significantly endangered by the termination of service;
 - d. A statement indicating how long the health condition is expected to last;
 - e. A statement specifying the particular type of utility service required (e.g. gas for heating); and
 - f. The signature of the qualified medical professional prescribing medical care.
- 3. An emergency medical certificate shall be valid only for the length of time the health endangerment is certified to exist, but no longer than six months without renewal when the certificate is issued for a non-specific chronic illness or no longer than twelve months without renewal when the certificate is issued for a specific chronic illness. At least 15 days before the certificate's expiration date, Cascade will give the customer written notice of the date the certificate expires unless it is renewed with Cascade before that day arrives.

(continued)

CNG/O16-04-01 Issued April 29, 2016

P.U.C. OR. No. 10

Original Sheet No. 5.9

RULE 5 DISCONTINUATION OF SERVICE

EMERGENCY MEDICAL CERTIFICATE FOR RESIDENTIAL SERVICE (continued)

4. A customer submitting a medical certificate is not excused from paying for gas service.

- a. Customers are required to enter into a written time-payment agreement with Cascade where an overdue balance exists. Terms of the time-payment agreement shall be those set forth in this Rule 5 or other terms as agreed upon in writing between the parties.
- b. Where financial hardship can be shown, a customer with a medical certificate shall be permitted to renegotiate the terms of a time-payment agreement with Cascade.
- c. Time-payment arrangements in effect when a medical certificate terminates remain in effect for the balance then owing. If a customer fails to pay charges incurred after the certificate terminates, standard time-payment provisions (Rule 5) will apply to payment of the arrearage incurred after the medical certificate expires. The terms of the medical certificate timepayment plan continue to apply to the arrearage accrued during the disability.
- 5. If a medical certificate customer fails to enter into a written time-payment agreement within 20 days of filing the certificate or to abide by its terms, Cascade shall notify the Commission's Consumer Services Section of its intent to disconnect service and the reason for the disconnection. Cascade may disconnect service after providing a notice 15 days in advance of disconnection for nonpayment, or five days before disconnection for failure to enter into a written time-payment agreement. The notice shall comply with the requirements of Part 1, Subsection 2, except that Subsection e shall not apply. A hearing may thereafter be held to determine whether Cascade should be permitted to disconnect service to the customer.
- 6. Cascade may verify the accuracy of a medical certificate. If Cascade believes a customer does not qualify, or no longer qualifies for a medical certificate, Cascade may apply to the Commission for permission to disconnect the customer's service.

TIME-PAYMENT AGREEEMENTS FOR RESIDENTIAL SERVICE (NON MEDICAL CERTIFICATE CUSTOMERS)

 Cascade will not disconnect residential service for nonpayment if a customer enters into a written time-payment plan. Cascade will offer customers a choice of payment agreements. At a minimum, the customer may choose between a levelized payment plan and an equal payment arrearages plan.

(continued)

CNG/O16-04-01 Issued April 29, 2016

P.U.C. OR. No. 10

Original Sheet No. 5.10

RULE 5 DISCONTINUATION OF SERVICE

TIME-PAYMENT AGREEEMENTS FOR RESIDENTAIL SERVICE (NON MEDICAL CERTIFICATE CUSTOMERS) (continued)

- A customer who selects a levelized-payment plan will pay a down payment equal to the average annual bill including the account balance, divided by twelve, and a like payment each month for eleven months thereafter.
 - a. Cascade shall periodically review the monthly installment plan. If necessary, due to changing rates or variations in the amount of service used by the customer, the installment amount may be adjusted to bring the account into balance within the time period specified in the original agreement.
 - b. If a customer changes service address at any time during the period of a time-payment agreement, provided that payments are then current and the customer pays other tariff charges associated with the change in residence, Cascade shall recalculate the customer's deposit and/or monthly installment. The recalculated amount shall reflect the balance of the account at the previous service address and the average annual bill at the new service address for the months remaining in the original time-payment agreement. When installments on a time-payment agreement have not been kept current, a customer shall be required to pay all past-due installments, together with any other applicable charges before service is provided at the new residence.
- 3. A customer who selects an equal payment arrearages plan will pay a down payment equal to one-twelfth the amount owed for past gas service (including the overdue amount and any amounts owed for a current bill or a bill being prepared but not yet delivered to the customer). Each month, for the next eleven months, an amount equal to the down payment will be added to, and payable with, the current charges due for service. If a customer changes service address at any time during the period of an arrearages payment plan, the plan continues. However, the customer must pay any past-due charges and all other applicable charges before Cascade provides service at the new address.
- 4. Cascade and the customer may agree in writing to an alternate payment arrangement, provided Cascade first informs the customer of the availability of the payment terms set forth in this rule.
- 5. If a customer fails to abide by the time-payment agreement, Cascade may disconnect service after serving 15 days' notice.

(continued)

CNG/O16-04-01 Issued April 29, 2016

P.U.C. OR. No. 10

Original Sheet No. 5.11

RULE 5 DISCONTINUATION OF SERVICE

FIELD VISIT CHARGE

A Field Visit Charge as established in Schedule 200 may be charged whenever Cascade is required to visit a residential service address for the purpose of disconnecting or reconnecting service, but due to the customer's action, is unable to complete the reconnect or disconnect.

LATE PAYMENT CHARGE

A Late-Payment Charge as established in Schedule 200 will be applied to overdue account balances, both residential and nonresidential, at the time of preparing the subsequent month's bill. The Late-Payment Charge may not be applied to time-payment or equal-payment accounts that are current, and will be applied only to accounts that have an overdue balance greater than \$200. The Commission will determine the Late-Payment Charge by surveying prevailing market rates for late-payment charges of commercial enterprises. The Commission will notify Cascade by November 15 of each year what rate may be used to determine late-payment charges on overdue customer accounts during the following calendar year. The current late-payment rate and the conditions for its application to customer accounts shall be specified on the gas bill.

P.U.C. OR. No. 10

Original Sheet No. 6.1

RULE 6 BILLING

GENERAL

Gas consumed, as indicated by meter readings, will be billed to customers as promptly as possible after reading dates, at approximately thirty day intervals, computed per applicable filed tariff rates. Bills will be due and payable as of dates rendered and delinquent or past due fifteen days thereafter after they are rendered.

When an under- or overbilling occurs, Cascade shall provide written notice to the customer detailing the circumstances, period of time, and amount of adjustment. The exception to these provisions is if issuing a correction is uneconomical in the sole view of the Company.

 <u>Underbillings</u>: For underbillings, the Company may issue a bill correction if the error occurred within the prior twelve month period ending on the date on which the customer or former customer was last billed. The Company will not issue billing corrections for underbillings in excess of two years (twenty-four months). However, if an underbilling is a result of fraud, tampering, diversion, theft, misinformation, false information or other unlawful conduct on the part of the customer or former customer, the Company may collect full payment for any amount owed without limitation.

Where a Customer is required to repay an underbilling, the Customer shall be entitled to enter into a time payment agreement without regard to whether the customer already participates in such an agreement. If the customer and Cascade cannot agree upon payment terms, the Commission shall establish terms and conditions to govern the repayment obligation. Cascade shall provide written notice advising the customer of the opportunity to enter into a time payment agreement and of the Commission's appeal and complaint process.

 <u>Overbillings</u>: For overbillings, the Company will issue a credit for amounts previously overbilled within the prior twelve month period ending on the date on which the customer or former customer was last overbilled. The Company will not issue credits for amounts overbilled for more than three years (thirty-six months) before the date the energy utility discovered the overbilling.

No billing adjustment shall be required if a gas meter registers less than two percent error under conditions of normal operation.

Bills will show dates of readings, readings at beginning of period and end of period, the number of cubic feet, therms, or other units of measurement of gas consumed, the tariff schedule code applicable, the delinquent date of bill, and the amount of the bill. Any estimated reading shall be clearly noted on the bill.

Cascade should make reasonable efforts to prepare opening and closing bills from actual meter readings.

CNG/O16-04-01 Issued April 29, 2016

P.U.C. OR. No. 10

Original Sheet No. 6.3

RULE 6 BILLING

ESTIMATED BILLING CAPABILITY

The Company may issue small commercial customers and residential customers excluding accounts with pool water heating load an estimated bill during the months of June through September. Actual meter readings will be made the month following any month in which the customer's bill is estimated.

TRANSFER BILLINGS

If Cascade identifies that a customer owes Cascade a balance from the customer's prior account for Oregon service, Cascade may transfer the amount to the customer's current account after giving the customer notice of the transfer, the amount due under the prior account, the period of time during which the balance was incurred and the service address under which the bill was incurred. The notice must also meet the provisions for notifications as established in Rule 5. If the bill is identified at the time a customer changes residences, the provisions of this rule apply.

If the customer has six months or more remaining on a time-payment agreement, the installment amount will be adjusted in order to bring the account into balance within the time period specified in the original agreement. If the customer has less than six months remaining on a time-payment agreement, Cascade will recalculate the agreement to bring the account into balance within 12 months. The customer must pay any past due time-payment installments before Cascade adjusts or recalculates the agreement. Cascade may make more liberal payment arrangements for customers on medical certificates who cannot reasonably be expected to pay the outstanding balance in the time otherwise applicable under this rule.

BUDGET PAYMENT PLAN FOR PAYMENTS OF GAS BILLS

The budget payment plan for payment of gas bills is devised to averages out the <u>a</u> residential customer's monthly payments for gas service-<u>for a period of no less than twelve months</u>. The budget payment plan is available to residential customers who have no outstanding balance with the <u>Company</u>. of any residential customer who can establish satisfactory credit with the <u>Company</u>.

At the request of a residential customer with satisfactory credit and no balance outstanding, the Company will estimate the customer's annual billing for gas service, based on the previous twelve months' usage. The estimated amount will then be divided by twelve. The resultant amount, rounded to the next full dollar, shall be the amount the customer will pay in lieu of the regular monthly billing for each month of the budget payment plan period. At the end of the plan year, any outstanding debit or credit balances will be rolled into the estimated usage for the following plan year and will be reflected in that year's monthly budget payment plan amount. Credit balances will be refunded to the customer if the customer specifically requests a refund.

For each succeeding annual budget payment period the Company will re-estimate the amount of the customer's bills for service for the ensuing period and so advise the customer. Unless the customer

CNG/O16-04-01 Issued April 29, 2016

P.U.C. OR. No. 10

Original Sheet No. 6.4

advises the Company to the contrary, such new monthly budget payment installments will be used for the ensuing payment period. If the customer requests to leave the plan, any debit balance will be due and payable under the regular terms of payment for gas service; credit balances may be applied to future gas bills or, if the customer so requests, refunded to the customer.

(continued)

P.U.C. OR. No. 10

Original Sheet No. 6.5

RULE 6 BILLING

BUDGET PAYMENT PLAN FOR PAYMENTS OF GAS BILLS (continued)

For each succeeding annual budget payment period the Company will re estimate the amount of the sustemer's bills for service for the ensuing period and so advise the customer. Unless the customer advises the Company to the contrary, such new monthly budget payment installments will be used for the ensuing payment period. If the sustemer requests to leave the plan, any debit balance will be due and payable under the regular terms of payment for gas service, credit balances may be applied to future gas bills or, if the sustemer so requests, refunded to the customer.

During each budget payment plan period the customer shall be entitled to receive gas service so long as the customer pays each monthly budget payment plan installment as it becomes due. If a customer fails to comply with the terms of this plan, the budget payment plan will be discontinued and the customer will be billed monthly on the basis of actual usage. If a customer fails to comply with the terms of this plan, and has a debit balance, customer may be subject to disconnection of service under Rule 5.

For each billing period the customer will receive a bill showing the amount of gas used during the billing period, the charge for such gas used, the balance of account and the amount of the current month's budget payment plan installment.

Any estimates furnished by the Company in connection with such budget payment plan shall not be construed as a guarantee or assurance that the total actual charges will not exceed the estimates. The Company may at any time submit a revised estimate to the customer and require that the customer pay the revised monthly budget payment plan installment as a condition to the continuation of the budget payment plan for that customer.

Such estimates or any revising thereof shall apply only to the premise then occupied by the customer. If the customer vacates such premise and moves to a different premise served by Cascade, the amount of the budget payment will be re-estimated and the customer will be advised of the change. If the customer will not desire natural gas service from Cascade at the new premise, the budget payment plan shall immediately terminate and any amount payable from the customer will be due and payable under the regular terms of payment for gas service; any amount due the customer by the Company shall be refunded.

RETURNED PAYMENT FEE

The Company will charge a Returned Payment Fee, as established in Schedule 200, for any payment returned unpaid.

CONVERSION OF METER MEASUREMENTS TO THERMS

All meter measurements for gas service shall be converted to a therm basis for billing purposes. Such conversion shall be based on the temperature of the gas, the absolute pressure of the gas, and the measured heating values at standard conditions of the gas received from the pipeline supplier(s).

CNG/O16-04-01 Issued April 29, 2016

P.U.C. OR. No. 10

Original Sheet No. 6.7

RULE 6 BILLING

CONVERSION OF METER MEASUREMENTS TO THERMS (continued) CONVERSION OF METER MEASUREMENTS TO THERMS

All meter measurements for gas service shall be converted to a therm basis for billing purposes. Such conversion shall be based on the temperature of the gas, the absolute pressure of the gas, and the measured heating values at standard conditions of the gas received from the pipeline supplier(s).

In cases where meters are <u>not</u> mechanically or electronically corrected for temperature, monthly temperature correction factors (Heat Value Multiplier) will be used to determine customer billing therms. The Heat Value Multiplier is calculated as the current pipeline heating value times a temperature factor of 520, divided by the sum of 460 and the published 30-year normal average temperature data.

In cases where meters are <u>not</u> mechanically or electronically corrected for pressure, a Pressure Factor will be used to determine customer billing therms. The Pressure Factor equals the sum of individual customer delivery pressure and the following applicable atmospheric pressure, both divided by 14.73 psi, (atmospheric pressure at sea level).

| ssure at sea revery. | |

P.U.C. OR, No. 10

Original Sheet 17.1

RULE 17 ORDER OF PRIORITY FOR GAS SERVICE

GENERAL

The Company will exercise reasonable diligence to supply and deliver continuous natural gas service to all customers receiving firm service, as defined in Rule 2.

Should the Company's supply of gas or capacity be insufficient at any time or any location, for reasons other than force majeure (as defined in Company's Rule 16) to meet the full requirements of all customers, the Company will curtail service to customers in the inverse order of order of priority listed hereinafter. Such curtailment, when required, will be imposed to protect continuity of service first, to firm service customers, and more generally, to customers having a higher service priority.

ORDER OF PRIORITY

- 1. Residential customers.
- 2. Firm Service Commercial and institutional customers as follows:
 - a. Commercial and institutional customers served under Rate Schedules 104 and 105-
 - b. Commercial or institutional customers served on other firm service rate schedules;
 - c. Agricultural service customers including customers who use gas for <u>-and essential agricultural</u> production, natural fiber production or processing, food processing, food quality maintenance, and irrigation pumping, and where gas is used as a process fuel or feedstock in the production of fertilizer, agricultural chemicals, animal feed, or food; and

service and other high priority users not covered elsewhere.d. High priority use customerswhere the continuity of gas service is considered in the public's best interest such as gas usage in a school, hospital, correctional facility or for police or fire protection.

- 3. Firm Service Industrial customers using gas as feedstock in a process in which natural gas is used as a raw material and as plant protection requirements of lower priority customers.
- 4. Firm Service Industrial customers with consumption of less than 1,000 therms per day.
- 5. Firm Service Industrial customers with consumption of more than 1,000 therms per day but less than 10,000 therms per day.
- 6. Industrial customers with consumption of more than 10,000 therms per day, including customers receiving service on Schedule 201, Special Contracts.
- 7. General distribution system interruptible transportation service customers.
- 8. Customers receiving interruptible natural gas service.

CNG/O16-04-01 Issued April 29, 2016 Effective for Service on and after May 30, 2016 Formatted: Indent: Left: 0.19", Tab stops: 0.44", Left + Not at 0.45"

Original Sheet 170.2

SCHEDULE 170 INTERRUPTIBLE SERVICE

ANNUAL DEFICIENCY BILL

In the event a customer purchases less than the annual minimum quantity, as defined in the contract, the customer shall be charged an Annual Deficiency Bill. Annual Deficiency Bill shall be calculated by multiplying the difference between the Annual Minimum Quantity and the therms actually taken (Deficiency Therms) times the difference between the commodity rate in this Rate Schedule 170, as modified by any applicable rate adjustments, and the weighted average commodity cost of system supply gas as such costs are reflected in the Company's tariffs. If the Company curtailed or interrupted service, the Annual Minimum Quantity shall be reduced by a fraction, the numerator of which is the actual number of days or fraction thereof, service was curtailed and the denominator of which is 365.

CURTAILMENT

Service under this schedule is subject to curtailment as established in Rule 17. Customer usage of gas above the amount authorized by the Company during a curtailment period shall be considered an unauthorized overrun volume. The overrun charge that will be applied during any overrun entitlement period will equal the greater of \$1.00 per therm or 150% of the highest midpoint price for the day at NW Wyoming Pool, NW south of Green River, Stanfield Oregon, NW Canadian Border (Sumas), Kern River Opal, or El Paso Bondad supply pricing points (as published in "Gas Daily"), converted from dollars per dekatherms to dollars per therm by dividing by ten. The overrun charge will be in addition to the incremental costs of any supplemental gas supplies the Company may have had to purchase to cover such unauthorized use, in addition to the regular charges incurred in the Rate section of this Schedule and any other charges incurred per the terms and conditions established in this Schedule. The payment of an overrun penalty shall not under any circumstances be considered as giving customer the right to take unauthorized overrun gas or to exclude any other remedies which may be available to the Company to prevent such overrun. The charge that will apply during any underrun entitlement period will be \$1.00 per therm for any underrun imbalances.

ESSENTIAL AGRICULTURAL AND HGH PRIORITY USE

Service under this schedule is not available to an essential agricultural user or a high priority user, as defined in Rule 2.

SPECIAL TERMS AND CONDITIONS

Service under this schedule shall be rendered through one or more meters at a single point of delivery and may at the Company's option be rendered in conjunction with firm service to said customer.

GENERAL TERMS

Service under this rate schedule is governed by the terms of this schedule, the Rules contained in this Tariff, any other schedules that by their terms or by the terms of this rate schedule apply to service under this rate schedule, and by all rules and regulations prescribed by regulatory authorities, as amended from time to time.

Original Sheet No. 200.1

SCHEDULE 200 VARIOUS MISCELLANEOUS CHARGES

APPLICABILITY

This schedule sets forth the provisions for various charges throughout these rules and regulations. The name and amount of the charges are listed below. The rules or rate schedules to which each charge applies are in parenthesis.

| I. | Reconnection Charge (Rule 5) | |
|----|---|----------|
| | a. Standard, 8 a.m. and 5 p.m., Monday through Friday, excluding holidays | \$32.00 |
| | b. After Hours between 5 p.m. and 9 p.m., Monday through Friday | \$50.00 |
| | c. Same Business Day or on a Saturday, Sunday or holidays | \$100.00 |

A reconnection charge will be required for reestablishment of service at the same address for the same person taking service, if service was disconnected at the customer's request or if it was disconnected involuntarily for reasons other than for Company initiated safety or maintenance.

| 11. | Deposit for Meter Test - (Rule 8) | \$50.00 |
|-----|---|-----------------|
| | Field Visit Charge - (Rule 5) A field visit charge may be assessed whenever Cascade visits a customer's address for the purp disconnecting service or reconnecting service and due to the customer's action is unable to cor the disconnection or reconnection. | |
| IV. | Late Payment Charge – (Rule 5) 0.3% annualized interest A late payment charge at a rate determined by the Commission based upon a survey of premarket rates will be charged to the customer's current bill when the customer has a prior based owing of \$200 or more. | vailing |
| V. | <u>Returned Payment Charge - (Rule 6)</u> A returned check fee of ten dollars (\$10.00) may apply for any payment returned unpaid. | \$10.00 |
| | Note: | 38.00 curred |

b. Modifying an Existing Service Line:

- Time of Construction Crew up to \$220.00 per hour
 Cost of Materials required to open and close service connection trench, including asphalt replacement, if any.
- Installation of the Excess Flow Valve

\$38.00

Original Sheet No. 2.1

RULE 2 DEFINITIONS

DEFINITIONS

When used in this Tariff the following terms shall have the meanings defined below:

- 1. <u>Applicant</u> A person, firm, or corporation that (1) applies for service; (2) reapplies for service at a new or existing location after service has been disconnected; or (3) has not met the requirements for becoming a customer as established in Rule 3.
- 2. <u>BTU</u> British Thermal Unit
- 3. <u>British Thermal Unit</u> The standard unit for measuring a quantity of thermal energy. One BTU equals the amount of thermal energy required to raise the temperature of one pound of water one degree Fahrenheit and is exactly defined as equal to 1,055.05585262 joules. 100,000 BTUs is equivalent to one therm.
- 4. <u>Commission</u> The Public Utility Commission of Oregon or otherwise referred to as OPUC.
- 5. <u>Company</u> Cascade Natural Gas Corporation (Cascade) or its assigned agents acting through its duly authorized officers or employees within the scope of their respective duties.
- 6. <u>Customer</u> Any person, firm, or corporation that has:
 - a. Applied for, been accepted, and is currently receiving gas and, or distribution service from the Company under these Rules and Regulations at one location under one rate classification contract, or
 - b. Received gas or distribution service from the Company, and voluntarily terminated service within the past twenty days.
- 7. <u>Curtailment</u> An event when the Company must interrupt service to customers in accordance with Rule 17. A Curtailment event may affect any level of service depending on the severity and geographical scope of the event.
- 8. <u>Customer Classifications</u>:
 - A. <u>Residential</u> Service to a single family dwelling, two family (duplex) dwelling or to an individual dwelling unit in a multiple family dwelling building for residential purposes including space heating, water heating, and cooking.
 - <u>Dwelling</u> A building designed exclusively for housing that contains permanent facilities for sleeping, bathing, and cooking. A dwelling may be a one family home, a duplex, a multiplex, but not including hotel or motel units that have no permanent kitchens.

Original Sheet No. 2.2

RULE 2 DEFINITIONS

DEFINITIONS (continued)

Customer Classifications (continued)

- B. <u>Commercial</u> Service to a customer engaged in selling, warehousing, or distributing a commodity, in some business activity or in a profession, or in some form of economic or social activity (office, stores, clubs, hotels, etc.) and for purposes that do not come directly under another classification of service.
- C. <u>Industrial</u> Service to a customer engaged in a process which creates or changes raw or unfinished materials into another form or product. (Factories, mills, machine shops, mines, oil wells, refineries, pumping plants, creameries, canning and packing plants, shipyards, etc., i.e., in extractive, fabricating or processing activities).
- D. <u>Institutional</u> Service to a customer of a public character including but not limited to governmental buildings, colleges, schools, hospitals, clinics, institutions for the care or detention of persons, and similar establishments.
- E. <u>Interruptible Gas</u> An interruptible gas service customer is considered "non-core" and receives a reduced rate on natural gas service because this class of customers is the first curtailed when gas supply or distribution is constrained for reasons other than force majeure.
- F. <u>Transportation</u> Transportation customers purchase their own natural gas and procure only distribution services from the Company.
- 9. <u>Gas Day</u> A twenty-four hour period beginning daily at 7:00 a.m. Pacific Clock Time (PCT), which is Pacific Standard Time or Daylight Savings Time in Kennewick, Washington, whichever is effective at the time of reference. The Company's Gas Day coincides with the Gas Day established in Northwest Pipeline's tariff, which may change from time to time, upon approval of the Federal Energy Regulatory Commission (FERC).
- 10. Essential Agricultural Use When gas is used: (1)for agricultural production, natural fiber production, natural fiber processing, food processing, food quality maintenance, irrigation pumping, crop drying; or (2) As a process fuel or feedstock in the production of fertilizer, agricultural chemicals, animal feed, or food which the Secretary of Agriculture determines is necessary for full food and fiber production.
- 11. <u>Firm Service</u> The sale of natural gas on a firm basis where the Company will exercise reasonable diligence to supply and deliver continuous service to customers not receiving interruptible service. See Order of Priority in Rule 17.

Original Sheet No. 2.3

RULE 2 DEFINITIONS

DEFINITIONS (continued)

- 12. <u>High Priority Use</u> High priority use is where continuity of gas service is considered in the public's best interest such as gas usage in a residence, school, hospital, or correctional facility, or for police or fire protection.
- 13. <u>Month</u> The period of time between and including the date of the current meter read and the date of the prior meter read which is the period upon which the Customer's monthly bill is based. A billing month may be contained within a single calendar month, or may encompass a portion of two separate calendar months.
- 14. <u>Premise</u> All of the real property and personal property in use by a single customer on a parcel of land which comprises the site upon which customer facilities are located and to which natural gas service is provided.
- 15. <u>Tariff</u> This Tariff, including all schedules, rules, regulations, and rates as they may be modified or amended from time to time.
- 16. Therm A unit of heating value equivalent to 100,000 BTUs.
- 17. <u>WACOG</u> The Weighted Average Commodity Cost of System Supply Gas (WACOG) reflected in Cascade's tariffs shall be as established by gas cost tracking or other similar filings.

Original Sheet No. 3.1

RULE 3 ESTABLISHING SERVICE

REQUIREMENTS FOR ESTABLISHING SERVICES

To establish service with the Company, an applicant must do the following:

- 1. Provide the Company with: a) the date service is to begin; b) whether the premise has previously received service from the Company; c) the purpose for which the gas is to be used; d) whether the applicant owns or rents the premise; e) the applicable rate schedule; and f) any other information that the Company deems necessary;
- 2. Establish Identity in accordance with the requirement in Section A below in this Rule; and
- 3. Establish Credit in accordance with the requirements found in Section B below in this Rule.

By establishing service, a customer agrees to be bound by all the terms and conditions of service as established in the Company Tariff as periodically revised and approved by the Public Utility Commission of Oregon.

A. ESTABLISHING IDENTITY

To establish an account, each applicant, including an applicant for co-customer, is required to provide documentation verifying his/her identity. Cascade may require: a) the name of person responsible; b) name on the account if different; c) birthdate; d) Social Security Number; e) valid Oregon driver's license; f) service address; g) billing address if different; h) telephone numbers where applicant can be reached; and I) other information as deemed necessary by the Company.

If the applicant does not wish to provide his/her Social Security Number or valid driver's license, he/she may provide a valid State or Federal picture identification; a combination of a birth certificate and current school or employer picture identification; the name of another person that can verify the applicant's identity; or other information deemed sufficient by the utility.

Once an account is established, at the customer's request, Cascade will restrict access of the account by other individuals through the use of a password.

B. ESTABLISHING CREDIT

Below are the criteria for establishing credit for residential and non-residential customers, respectively. A customer who cannot meet the requirements put forth below must pay a Deposit or provide other security in accordance with the terms and conditions in Rule 4.

Original Sheet No. 3.2

RULE 3 ESTABLISHING SERVICE

ESTABLISHING SERVICE (continued)

B. ESABLISHING CREDIT (continued)

1. <u>RESIDENTIAL SERVICE</u>

- Satisfactory credit may be established by <u>any</u> of the following:
- a. Received twelve months of continuous utility service (of same type) in the preceding 24month period and the utility can verify that the applicant voluntarily terminated service and paid for services as required;
- b. Provides proof of ability to pay by providing either proof of employment during the prior 12month period, or statement by income provider that applicant has a regular source of income; or
- c. Meets the Commission approved minimum credit requirements based on a third party credit report score or the Company's own credit scoring formula.

2. NON RESIDENTIAL SERVICE

A non-residential applicant may establish credit if either of the following is verified:

- a. The non-residential applicant has received continuous utility service of a type and in quantities similar to the service for which application is made during the 12-month period prior to the date of the credit screen and has not received any notices of disconnection during such period; or
- b. The non-residential applicant is licensed to do business in the state of Oregon and has kept current over the past twelve months on all real estate mortgages or lease agreements, commercial loans, utility bills and trade accounts.

COMPLIANCE TO RULES AND REGULATIONS

By establishing an account, a customer agrees to comply with all the applicable rules and regulations as established in this Tariff as revised from time to time.

Original Sheet No. 4.1

RULE 4 CUSTOMER DEPOSITS AND OTHER SECURITY

GENERAL

The Company may require a deposit or other form security from an applicant or customer for reasons set forth in Rule 3 and this Rule.

Paying a deposit or providing some other form of security does not excuse a customer from complying with Cascade's tariffs or other regulations on file with the Commission, such as the obligation to pay bills promptly.

RESIDENTIAL DEPOSITS REQUIREMENTS AND SURETY AGREEMENTS

- 1. An applicant or customer may be required to pay a deposit when the applicant or customer:
 - a. Is unable to establish credit as outlined in Rule 3;
 - b. Received the same type of service from any Oregon energy utility within the prior 24 months and owed a balance when service was terminated; or
 - c. Was previously terminated for theft of service by any Oregon utility, found to have tampered with the meter, or diverted service.
- 2. A deposit required under these rules shall not exceed one-sixth the amount of reasonable estimated billing for one year at rates then in effect. This estimate shall be based upon the use of service at the premise during the prior year or upon the type and size of the customer's equipment that will use the service.
- 3. Any additional or subsequent deposit may be required as a condition of continued service if any of the following are true:
 - a. If the customer remodels, adds gas appliances or moves, and the anticipated usage will be at least 20 percent greater than that upon which the prior deposit was based;
 - b. The customer gave false information to establish an account and/or credit status; or
 - c. The customer has stolen service, tampered with the meter, or diverted service.
- 4. In lieu of paying a deposit, a residential customer may provide the Company with a written surety agreement from a responsible party. A responsible party must be a current Cascade customer who is able to meet the requirements for establishing credit per Rule 3. The written surety must secure payment equal to two months average usage. If the customer, whose account is secured with a surety agreement, is disconnected for non-payment, the Company may require that the responsible party who signed the surety agreement pay the amount specified in the surety agreement.

Original Sheet No. 4.2

RULE 4 CUSTOMER DEPOSITS AND OTHER SECURITY

DEPOSIT PAYMENT ARRANGEMENTS FOR RESIDENTIAL SERVICE

- When Cascade requires a deposit, the customer may pay the deposit in full or elect to pay the deposit in three installments. The first installment is due immediately. The remaining installments are due 30 days and 60 days after the first installment payment. Except for the last payment, installments shall be the greater of \$30 or one-third the deposit.
- 2. Where an installment payment of a deposit is made together with a payment for gas service, the amount paid shall first be applied toward payment of the amount due for deposit.
- 3. In the event a consumer is required to pay an additional deposit, the customer shall pay within five days one-third of the total deposit, or at least \$30, whichever is greater. The remainder of the deposit is due under the terms of Subsection 1. If the customer has an existing deposit installment agreement, the remaining installment payments will be adjusted to include the additional deposit; however, two installment payments cannot be required within the same 30-day period.
- 4. Where a customer enters into an installment agreement for payment of a deposit under Subsection 1 of these rules, Cascade shall provide written notice explaining its deposit requirements. The notice shall specify the date each installment payment shall be due and shall include a statement printed in boldface type informing the person that service will be disconnected if payment is not received when due. The notice shall also set forth the name and telephone number of the appropriate unit within the Department of Human Services or other agencies which may be able to help the customer obtain financial aid.
- 5. If a customer fails to abide by the terms of a deposit installment agreement, the Company may disconnect service after a five-day notice. The notice shall contain the information and shall be served in the manner set forth in Rule 5.
- 6. Where good cause exists, Cascade may provide more liberal arrangements for payment of deposits than those set forth in this rule. Cascade shall keep a written record of the reasons for such action.
- 7. Should disconnection for nonpayment of a deposit occur, the person disconnected shall be required to pay the full amount of the deposit, and any applicable reconnection fee, disconnect visit charge, late-payment fee, and one-half the past due amount before service is restored. The balance of the past-due amount shall be paid within 30 days of the date service is restored. A customer may continue with an existing time-payment agreement by paying all past-due installments, along with the full deposit and other applicable fees.

(continued)

CNG/O16-04-01 Issued April 29, 2016

Original Sheet No. 4.3

RULE 4 CUSTOMER DEPOSITS AND OTHER SECURITY

NONRESIDENTIAL DEPOSIT REQUIREMENTS

- 1. <u>Deposit Requirement Nonresidential (Seasonal and Non-seasonal Service)</u>. A deposit may be required equal to one-sixth the estimated annual usage at the service address if an applicant or customer:
 - a. Does not satisfy the credit-screening criteria set forth in Rule 3.
 - b. Owes a bill that is overdue by thirty (30) days or more;
 - c. Was previously exempted from paying a deposit based upon false information given at the time of application;
 - d. Is involved in a bankruptcy action, liquidation, bulk sale or financial reorganization;
 - e. Is adding incremental demand at a premise with an existing service account; or
 - f. The non-residential customer is past due on commitments to creditor such as real estate mortgages or lease agreements, commercial loans, other utility bills and trade accounts.

DEPOSIT PAYMENT ARRANGEMENTS FOR NON-RESIDENTIAL SERVICE

- 1. An applicant for nonresidential service who is required to pay a deposit shall pay the deposit in full prior to receiving service. An applicant for nonresidential service may also fulfill the deposit requirement with an irrevocable letter of credit, surety bond (performance bond) or some other form of guarantee acceptable to the Company.
- 2. An existing nonresidential customer is considered to be an applicant for purposes of satisfying the deposit requirement. An existing nonresidential customer, if required to pay or supplement a deposit, is required to pay the full amount within 10 days of the date of the notice from the Company that such a deposit is required. This notice will also serve as the notice of disconnection required under OAR 860-021-0505.
- 3. If service is disconnected for nonpayment of a deposit, the customer disconnected will be required to pay the full amount of the deposit, plus any applicable reconnection fee, disconnect visit charge, late payment fee and past due account balance before service is restored.

INTEREST ON DEPOSITS FOR RESIDENTIAL AND NONRESIDENTIAL SERVICE

1. Unless otherwise specified by the Commission, customer deposits shall accrue interest at a rate based upon the effective interest rate for new issues of one-year Treasury Bills issued during the last week of October as determined by the Commission in Docket No. UM 779. This interest rate, rounded to the nearest percent, shall apply to deposits held during January 1 through December 31 of the subsequent year.

P.U.C. OR. No. 10

Original Sheet No. 4.4

RULE 4 CUSTOMER DEPOSITS AND OTHER SECURITY

INTEREST ON DEPOSITS FOR RESIDENTIAL AND NONRESIDENTIAL SERVICE (continued)2. Upon payment of a deposit, Cascade shall furnish a receipt showing the date, name of the applicant or customer, the service address, the amount of deposit, a statement that the deposit will accrue interest at the rate prescribed by the Commission, and an explanation of the conditions under which the deposit will be refunded.

3. If the deposit is held beyond one year, accrued interest will be paid through a credit to the customer's account. If held less than one year, interest will be prorated. Cascade shall keep a detailed record of each deposit received until the deposit is credited or refunded.

REFUND OF DEPOSITS FOR RESIDENTIAL AND NONRESIDENTIAL SERVICE

- 1. Upon termination of service, a customer's deposit plus accrued interest, shall first be applied to any unpaid balance on the customer's account and any remaining balance will be refunded to the customer.
- 2. Cascade may continue holding a deposit until such time as credit is satisfactorily established or reestablished. For purposes of this rule, credit shall be considered to be established or reestablished if one year after a deposit is made:
 - a. The account is current;
 - b. Not more than two five-day disconnection notices were issued to the customer during the previous 12 months; and
 - c. The customer was not disconnected for nonpayment during the previous 12 months.
- 3. After satisfactory credit has been established or reestablished, the deposit plus any accrued interest shall be promptly credited to the customer's account or refunded at the customer's request.
- 4. In the event the customer moves to a new address within Cascade's service area, the deposit, plus accrued interest, will be transferred to the new account.
- 5. Unless otherwise specified by the customer, Cascade shall mail deposit refunds to the customer's last known address. Valid claims for refunds received within one year of the date service was terminated shall be promptly honored. Funds held beyond one year will be disposed of in accordance with ORS 98.316.

Original Sheet No. 5.1

RULE 5 DISCONTINUATION OF SERVICE

GROUNDS FOR DISCONNECTING GAS SERVICE

Gas service may be disconnected:

- a) When the applicant or customer fails to pay a deposit or make payments in accordance with the terms of a deposit payment arrangement as outlined in Rule 4;
- b) When the applicant or customer provides false identification to establish service, continue service, or verify identity;
- c) When the customer fails to pay Oregon tariff or price-listed charges due for services rendered.
- d) When the customer fails to abide by the terms of a time-payment agreement;
- e) When the customer requests Cascade disconnect service or close an account or when a co-customer fails to reapply for service within 20 days after a joint account is closed by the other co-customer, so long as the Company has provided a notice of pending disconnection;
- f) When the customer does not cooperate in providing access to the meter;
- g) When facilities provided are unsafe or do not comply with state and municipal codes governing service or the utility's rules and regulations;
- h) When there is evidence of meter-tampering, diverting service, or other theft of service;
- i) When dangerous or emergency conditions exist at the service premises under OAR 860-021-0315; or
- j) When the Commission approves the disconnection of service.

VOLUNTARY DISCONNECTION

Every customer who is about to vacate any premise supplied with gas service, or who for any reason wishes to have such service discontinued, shall give five days' notice to the Company in advance of specified date of discontinuance of service. Until the Company has such notice, the customer shall be held responsible for all service rendered.

Original Sheet No. 5.2

RULE 5 DISCONTINUATION OF SERVICE

EMERGENCY DISCONNECTION

In emergencies endangering life or property, a utility may terminate service without following the procedures set forth in this rule. However, Cascade shall immediately thereafter notify the Commission. In such cases, where the necessity for emergency termination was through no fault of the customer, there will be no charge made for restoration of service.

DISCONNECTION OF SERVICE ON WEEKENDS AND HOLIDAYS

Gas service shall not be disconnected for nonpayment on or the day prior to a weekend or a state or utility-recognized holiday.

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE

- 1. Notice requirements are waived where safety concerns, or meter tampering, diverting of service, or other theft of service is detected. When a written notice is given under these rules:
 - a. The notice shall contain multilingual information as required by Commission rules and be served on the customer's designated representative, if any;
 - b. If Cascade's records show that the billing address is different from the service address, and Cascade has reason to believe the address is occupied by someone other than the customer, Cascade shall provide a five-day notice to both the occupants of the service address and to the customer's mailing address. The notice may be addressed to "tenant" or "occupant." The envelope shall bear a bold notice stating "Important notice regarding continuance of gas service" or similar words. The notice to occupants may not include the dollar amount owing.
 - c. When Cascade's records show service is to a master-metered multi-family dwelling (including rooming houses), Cascade must notify the Commission's Consumer Services Section at least five business days prior to disconnecting the service. Cascade will use reasonable efforts to notify occupants of the impending disconnection and alternatives available to them.
- 2. The notice shall be printed in **bold face type** and shall state in easy to understand language:
 - a. The reason for the proposed disconnection;
 - b. The earliest date for disconnection;
 - b. An explanation of the Commission's complaint process and toll-free number; and

Original Sheet No. 5.3

RULE 5 DISCONTINUATION OF SERVICE

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE (continued)

- c. If the disconnection is for nonpayment of services rendered, including failure to abide by a time payment agreement, the notice must also state:
 - 1. The amount to be paid to avoid disconnection;
 - 2. An explanation of the time payment agreement provisions of OAR 860-021-0415;
 - 3. An explanation of the medical certificate provisions of OAR 860-021-0410; and
 - 4. The name and telephone number of the appropriate unit of the Department of Human Services or other agencies that may be able to provide financial assistance.
- At least 15 days before Cascade disconnects a residential customer for nonpayment of services rendered, Cascade will provide written notice to the customer. A 15-day notice is not required when disconnection is for:
 - a) Providing false identification to establish service, continue service, or verify identity;
 - b) Meter tampering diverting service, or other theft; or
 - c) The existence of unsafe conditions.
- 4. A notice of disconnection may not be sent prior to the due date for payment of a bill.
- 5. Cascade may serve the 15-day notice of disconnection in person or send it by first class mail to the last known address of the customer. Service is complete on the date of personal delivery or the day after notification is postmarked.

Original Sheet No. 5.4

RULE 5 DISCONTINUATION OF SERVICE

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE (continued)

- 6. At least five business days before the proposed disconnection date, Cascade must mail or deliver a written disconnection notice to the customer.
 - a. The disconnection notice shall inform the person that service will be disconnected on or after a specific date and shall explain the alternatives and assistance that might be available.
 - b. If notification is made by delivery to the residence, Cascade shall attempt personal contact. If personal contact cannot be made with the customer or an adult resident, Cascade shall leave the notice in a conspicuous place at the residence.
- 7. On the day that Cascade expects to disconnect service and prior to disconnection, Cascade will make a good faith effort to personally contact the customer or an adult at the residence scheduled to be disconnected.
 - a. If the contact is made, Cascade shall advise the person of the proposed disconnection;
 - b. If contact is not made, Cascade must leave a notice in a conspicuous place at the residence informing the customer that service has been, or is about to be, disconnected.
- 8. Where personal contact is made by the Company under this rule, and the circumstances are such that a reasonable person would conclude that the customer does not understand the consequences of disconnection, the Company must:
 - a. Notify the Department of Human Services and the Commission; and
 - b. Delay the proposed disconnection date for five additional business days.

Original Sheet No. 5.5

RULE 5 DISCONTINUATION OF SERVICE

NOTICE OF PENDING DISCONNECTION OF RESIDENTIAL SERVICE (continued)

- Where personal contact is made, the representative of the Company making contact shall be empowered to accept reasonable partial payment of the overdue balance in accordance with the time payment provisions.
- 10. Cascade must document its effort to provide notice and shall make the documentation available to the customer and the Commission upon request.

EMERGENCY MEDICAL CERTIFICATE FOR RESIDENTIAL SERVICE

- Cascade shall not disconnect residential service if the customer submits certification from a qualified medical professional stating that disconnection would significantly endanger the physical health of the customer or a member of the customer's household. "Qualified medical professional" means a licensed physician, nurse-practitioner, or physician's assistant authorized to diagnose and treat the medical condition described without direct supervision by a physician.
- 2. An oral certification must be confirmed in writing within 14 days by the qualified medical professional prescribing medical care. Written certification must include:
 - a. The name of the person to whom the certificate applies and relationship to the customer;
 - b. A complete description of the health condition;
 - c. An explanation how the health of the person will be significantly endangered by the termination of service;
 - d. A statement indicating how long the health condition is expected to last;
 - e. A statement specifying the particular type of utility service required (e.g. gas for heating); and
 - f. The signature of the qualified medical professional prescribing medical care.
- 3. An emergency medical certificate shall be valid only for the length of time the health endangerment is certified to exist, but no longer than six months without renewal when the certificate is issued for a non-specific chronic illness or no longer than twelve months without renewal when the certificate is issued for a specific chronic illness. At least 15 days before the certificate's expiration date, Cascade will give the customer written notice of the date the certificate expires unless it is renewed with Cascade before that day arrives.

Original Sheet No. 5.6

RULE 5 DISCONTINUATION OF SERVICE

EMERGENCY MEDICAL CERTIFICATE FOR RESIDENTIAL SERVICE (continued)

4. A customer submitting a medical certificate is not excused from paying for gas service.

- a. Customers are required to enter into a written time-payment agreement with Cascade where an overdue balance exists. Terms of the time-payment agreement shall be those set forth in this Rule 5 or other terms as agreed upon in writing between the parties.
- b. Where financial hardship can be shown, a customer with a medical certificate shall be permitted to renegotiate the terms of a time-payment agreement with Cascade.
- c. Time-payment arrangements in effect when a medical certificate terminates remain in effect for the balance then owing. If a customer fails to pay charges incurred after the certificate terminates, standard time-payment provisions (Rule 5) will apply to payment of the arrearage incurred after the medical certificate expires. The terms of the medical certificate timepayment plan continue to apply to the arrearage accrued during the disability.
- 5. If a medical certificate customer fails to enter into a written time-payment agreement within 20 days of filing the certificate or to abide by its terms, Cascade shall notify the Commission's Consumer Services Section of its intent to disconnect service and the reason for the disconnection. Cascade may disconnect service after providing a notice 15 days in advance of disconnection for nonpayment, or five days before disconnection for failure to enter into a written time-payment agreement. The notice shall comply with the requirements of Part I, Subsection 2, except that Subsection e shall not apply. A hearing may thereafter be held to determine whether Cascade should be permitted to disconnect service to the customer.
- 6. Cascade may verify the accuracy of a medical certificate. If Cascade believes a customer does not qualify, or no longer qualifies for a medical certificate, Cascade may apply to the Commission for permission to disconnect the customer's service.

TIME-PAYMENT AGREEEMENTS FOR RESIDENTIAL SERVICE (NON MEDICAL CERTIFICATE CUSTOMERS)

1. Cascade will not disconnect residential service for nonpayment if a customer enters into a written time-payment plan. Cascade will offer customers a choice of payment agreements. At a minimum, the customer may choose between a levelized payment plan and an equal payment arrearages plan.

Original Sheet No. 5.7

RULE 5 DISCONTINUATION OF SERVICE

TIME-PAYMENT AGREEEMENTS FOR RESIDENTALL SERVICE (NON MEDICAL CERTIFICATE CUSTOMERS) (continued)

- 2. A customer who selects a levelized-payment plan will pay a down payment equal to the average annual bill including the account balance, divided by twelve, and a like payment each month for eleven months thereafter.
 - a. Cascade shall periodically review the monthly installment plan. If necessary, due to changing rates or variations in the amount of service used by the customer, the installment amount may be adjusted to bring the account into balance within the time period specified in the original agreement.
 - b. If a customer changes service address at any time during the period of a time-payment agreement, provided that payments are then current and the customer pays other tariff charges associated with the change in residence, Cascade shall recalculate the customer's deposit and/or monthly installment. The recalculated amount shall reflect the balance of the account at the previous service address and the average annual bill at the new service address for the months remaining in the original time-payment agreement. When installments on a time-payment agreement have not been kept current, a customer shall be required to pay all past-due installments, together with any other applicable charges before service is provided at the new residence.
- 3. A customer who selects an equal payment arrearages plan will pay a down payment equal to onetwelfth the amount owed for past gas service (including the overdue amount and any amounts owed for a current bill or a bill being prepared but not yet delivered to the customer). Each month, for the next eleven months, an amount equal to the down payment will be added to, and payable with, the current charges due for service. If a customer changes service address at any time during the period of an arrearages payment plan, the plan continues. However, the customer must pay any past-due charges and all other applicable charges before Cascade provides service at the new address.
- 4. Cascade and the customer may agree in writing to an alternate payment arrangement, provided Cascade first informs the customer of the availability of the payment terms set forth in this rule.
- 5. If a customer fails to abide by the time-payment agreement, Cascade may disconnect service after serving 15 days' notice.

Original Sheet No. 5.8

RULE 5 DISCONTINUATION OF SERVICE

FIELD VISIT CHARGE

A Field Visit Charge as established in Schedule 200 may be charged whenever Cascade is required to visit a residential service address for the purpose of disconnecting or reconnecting service, but due to the customer's action, is unable to complete the reconnect or disconnect.

LATE PAYMENT CHARGE

A Late-Payment Charge as established in Schedule 200 will be applied to overdue account balances, both residential and nonresidential, at the time of preparing the subsequent month's bill. The Late-Payment Charge may not be applied to time-payment or equal-payment accounts that are current, and will be applied only to accounts that have an overdue balance greater than \$200. The Commission will determine the Late-Payment Charge by surveying prevailing market rates for late-payment charges of commercial enterprises. The Commission will notify Cascade by November 15 of each year what rate may be used to determine late-payment charges on overdue customer accounts during the following calendar year. The current late-payment rate and the conditions for its application to customer accounts shall be specified on the gas bill.

Original Sheet No. 6.1

RULE 6 BILLING

GENERAL

Gas consumed, as indicated by meter readings, will be billed to customers as promptly as possible after reading dates, at approximately thirty day intervals, computed per applicable filed tariff rates. Bills will be due and payable fifteen days after they are rendered.

When an under- or overbilling occurs, Cascade shall provide written notice to the customer detailing the circumstances, period of time, and amount of adjustment. The exception to these provisions is if issuing a correction is uneconomical in the sole view of the Company.

1. <u>Underbillings</u>: For underbillings, the Company may issue a bill correction if the error occurred within the prior twelve month period ending on the date on which the customer or former customer was last billed. The Company will not issue billing corrections for underbillings in excess of two years (twenty-four months). However, if an underbilling is a result of fraud, tampering, diversion, theft, misinformation, false information or other unlawful conduct on the part of the customer or former customer, the Company may collect full payment for any amount owed without limitation.

Where a Customer is required to repay an underbilling, the Customer shall be entitled to enter into a time payment agreement without regard to whether the customer already participates in such an agreement. If the customer and Cascade cannot agree upon payment terms, the Commission shall establish terms and conditions to govern the repayment obligation. Cascade shall provide written notice advising the customer of the opportunity to enter into a time payment agreement and of the Commission's appeal and complaint process.

 <u>Overbillings</u>: For overbillings, the Company will issue a credit for amounts previously overbilled within the prior twelve month period ending on the date on which the customer or former customer was last overbilled. The Company will not issue credits for amounts overbilled for more than three years (thirty-six months) before the date the energy utility discovered the overbilling.

No billing adjustment shall be required if a gas meter registers less than two percent error under conditions of normal operation.

Bills will show dates of readings, readings at beginning of period and end of period, the number of cubic feet, therms, or other units of measurement of gas consumed, the tariff schedule code applicable, the delinquent date of bill, and the amount of the bill. Any estimated reading shall be clearly noted on the bill.

Cascade should make reasonable efforts to prepare opening and closing bills from actual meter readings.

Original Sheet No. 6.2

RULE 6 BILLING

TRANSFER BILLINGS

If Cascade identifies that a customer owes Cascade a balance from the customer's prior account for Oregon service, Cascade may transfer the amount to the customer's current account after giving the customer notice of the transfer, the amount due under the prior account, the period of time during which the balance was incurred and the service address under which the bill was incurred. The notice must also meet the provisions for notifications as established in Rule 5. If the bill is identified at the time a customer changes residences, the provisions of this rule apply.

If the customer has six months or more remaining on a time-payment agreement, the installment amount will be adjusted in order to bring the account into balance within the time period specified in the original agreement. If the customer has less than six months remaining on a time-payment agreement, Cascade will recalculate the agreement to bring the account into balance within 12 months. The customer must pay any past due time-payment installments before Cascade adjusts or recalculates the agreement. Cascade may make more liberal payment arrangements for customers on medical certificates who cannot reasonably be expected to pay the outstanding balance in the time otherwise applicable under this rule.

BUDGET PAYMENT PLAN FOR PAYMENTS OF GAS BILLS

The budget payment plan for payment of gas bills averages a residential customer's monthly payments for gas service for a period of no less than twelve months. The budget payment plan is available to residential customers who have no outstanding balance with the Company.

At the request of a residential customer with satisfactory credit and no balance outstanding, the Company will estimate the customer's annual billing for gas service, based on the previous twelve months' usage. The estimated amount will then be divided by twelve. The resultant amount, rounded to the next full dollar, shall be the amount the customer will pay in lieu of the regular monthly billing for each month of the budget payment plan period. At the end of the plan year, any outstanding debit or credit balances will be rolled into the estimated usage for the following plan year and will be reflected in that year's monthly budget payment plan amount. Credit balances will be refunded to the customer if the customer specifically requests a refund.

For each succeeding annual budget payment period the Company will re-estimate the amount of the customer's bills for service for the ensuing period and so advise the customer. Unless the customer advises the Company to the contrary, such new monthly budget payment installments will be used for the ensuing payment period. If the customer requests to leave the plan, any debit balance will be due and payable under the regular terms of payment for gas service; credit balances may be applied to future gas bills or, if the customer so requests, refunded to the customer.

(continued)

CNG/O16-04-01 Issued April 29, 2016

RULE 6 BILLING

BUDGET PAYMENT PLAN FOR PAYMENTS OF GAS BILLS (continued)

During each budget payment plan period the customer shall be entitled to receive gas service so long as the customer pays each monthly budget payment plan installment as it becomes due. If a customer fails to comply with the terms of this plan, the budget payment plan will be discontinued and the customer will be billed monthly on the basis of actual usage. If a customer fails to comply with the terms of this plan, and has a debit balance, customer may be subject to disconnection of service under Rule 5.

For each billing period the customer will receive a bill showing the amount of gas used during the billing period, the charge for such gas used, the balance of account and the amount of the current month's budget payment plan installment.

Any estimates furnished by the Company in connection with such budget payment plan shall not be construed as a guarantee or assurance that the total actual charges will not exceed the estimates. The Company may at any time submit a revised estimate to the customer and require that the customer pay the revised monthly budget payment plan installment as a condition to the continuation of the budget payment plan for that customer.

Such estimates or any revising thereof shall apply only to the premise then occupied by the customer. If the customer vacates such premise and moves to a different premise served by Cascade, the amount of the budget payment will be re-estimated and the customer will be advised of the change. If the customer will not desire natural gas service from Cascade at the new premise, the budget payment plan shall immediately terminate and any amount payable from the customer will be due and payable under the regular terms of payment for gas service; any amount due the customer by the Company shall be refunded.

RETURNED PAYMENT FEE

The Company will charge a Returned Payment Fee, as established in Schedule 200, for any payment returned unpaid.

CONVERSION OF METER MEASUREMENTS TO THERMS

All meter measurements for gas service shall be converted to a therm basis for billing purposes. Such conversion shall be based on the temperature of the gas, the absolute pressure of the gas, and the measured heating values at standard conditions of the gas received from the pipeline supplier(s).

Original Sheet No. 6.4

RULE 6 BILLING

CONVERSION OF METER MEASUREMENTS TO THERMS (continued)

In cases where meters are <u>not</u> mechanically or electronically corrected for temperature, monthly temperature correction factors (Heat Value Multiplier) will be used to determine customer billing therms. The Heat Value Multiplier is calculated as the current pipeline heating value times a temperature factor of 520, divided by the sum of 460 and the published 30-year normal average temperature data.

In cases where meters are <u>not</u> mechanically or electronically corrected for pressure, a Pressure Factor will be used to determine customer billing therms. The Pressure Factor equals the sum of individual customer delivery pressure and the following applicable atmospheric pressure, both divided by 14.73 psi, (atmospheric pressure at sea level).

| at sea level). | |
|------------------|---------------|
| | Atmospheric |
| Town | Pressure, psi |

Original Sheet No. 17.1

RULE 17 ORDER OF PRIORITY FOR GAS SERVICE

GENERAL

The Company will exercise reasonable diligence to supply and deliver continuous natural gas service to all customers receiving firm service, as defined in Rule 2.

Should the Company's supply of gas or capacity be insufficient at any time or any location, for reasons other than force majeure (as defined in Company's Rule 16) to meet the full requirements of all customers, the Company will curtail service to customers in the inverse order of order of priority listed hereinafter. Such curtailment, when required, will be imposed to protect continuity of service first, to firm service customers, and more generally, to customers having a higher service priority.

ORDER OF PRIORITY

- 1. Residential customers.
- 2. Firm Service Commercial and institutional customers as follows:
 - a. Commercial and institutional customers served under Rate Schedules 104 and 105;
 - b. Commercial or institutional customers served on other firm service rate schedules;
 - c. Agricultural service customers including customers who use gas for agricultural production, natural fiber production or processing, food processing, food quality maintenance, and irrigation pumping, and where gas is used as a process fuel or feedstock in the production of fertilizer, agricultural chemicals, animal feed, or food; and
 - d. High priority use customers where the continuity of gas service is considered in the public's best interest such as gas usage in a school, hospital, correctional facility or for police or fire protection.
- 3. Firm Service Industrial customers using gas as feedstock in a process in which natural gas is used as a raw material and as plant protection requirements of lower priority customers.
- 4. Firm Service Industrial customers with consumption of less than 1,000 therms per day.
- 5. Firm Service Industrial customers with consumption of more than 1,000 therms per day but less than 10,000 therms per day.
- 6. Industrial customers with consumption of more than 10,000 therms per day, including customers receiving service on Schedule 201, Special Contracts.
- 7. General distribution system interruptible transportation service customers.
- 8. Customers receiving interruptible natural gas service.

Original Sheet No. 170.2

SCHEDULE 170 INTERRUPTIBLE SERVICE

ANNUAL DEFICIENCY BILL

In the event a customer purchases less than the annual minimum quantity, as defined in the contract, the customer shall be charged an Annual Deficiency Bill. Annual Deficiency Bill shall be calculated by multiplying the difference between the Annual Minimum Quantity and the therms actually taken (Deficiency Therms) times the difference between the commodity rate in this Rate Schedule 170, as modified by any applicable rate adjustments, and the weighted average commodity cost of system supply gas as such costs are reflected in the Company's tariffs. If the Company curtailed or interrupted service, the Annual Minimum Quantity shall be reduced by a fraction, the numerator of which is the actual number of days or fraction thereof, service was curtailed and the denominator of which is 365.

CURTAILMENT

Service under this schedule is subject to curtailment as established in Rule 17. Customer usage of gas above the amount authorized by the Company during a curtailment period shall be considered an unauthorized overrun volume. The overrun charge that will be applied during any overrun entitlement period will equal the greater of \$1.00 per therm or 150% of the highest midpoint price for the day at NW Wyoming Pool, NW south of Green River, Stanfield Oregon, NW Canadian Border (Sumas), Kern River Opal, or El Paso Bondad supply pricing points (as published in "Gas Daily"), converted from dollars per dekatherms to dollars per therm by dividing by ten. The overrun charge will be in addition to the incremental costs of any supplemental gas supplies the Company may have had to purchase to cover such unauthorized use, in addition to the regular charges incurred in the Rate section of this Schedule and any other charges incurred per the terms and conditions established in this Schedule. The payment of an overrun penalty shall not under any circumstances be considered as giving customer the right to take unauthorized overrun gas or to exclude any other remedies which may be available to the Company to prevent such overrun. The charge that will apply during any underrun entitlement period will be \$1.00 per therm for any underrun imbalances.

SPECIAL TERMS AND CONDITIONS

Service under this schedule shall be rendered through one or more meters at a single point of delivery and may at the Company's option be rendered in conjunction with firm service to said customer.

GENERAL TERMS

Service under this rate schedule is governed by the terms of this schedule, the Rules contained in this Tariff, any other schedules that by their terms or by the terms of this rate schedule apply to service under this rate schedule, and by all rules and regulations prescribed by regulatory authorities, as amended from time to time.

Original Sheet No. 200.1

SCHEDULE 200 VARIOUS MISCELLANEOUS CHARGES

APPLICABILITY

This schedule sets forth the provisions for various charges throughout these rules and regulations. The name and amount of the charges are listed below. The rules or rate schedules to which each charge applies are in parenthesis.

| I. | Reconnection Charge (Rule 5) | |
|----|---|----------|
| | a. Standard, 8 a.m. and 5 p.m., Monday through Friday, excluding holidays | \$32.00 |
| | b. After Hours between 5 p.m. and 9 p.m., Monday through Friday | \$50.00 |
| | c. Same Business Day or on a Saturday, Sunday or holidays | \$100.00 |

A reconnection charge will be required for reestablishment of service at the same address for the same person taking service, if service was disconnected at the customer's request or if it was disconnected involuntarily for reasons other than for Company initiated safety or maintenance.

| II. Deposit for Meter Test - (Rule 8) | \$50.00 |
|---|--------------------------------|
| III. <u>Field Visit Charge- (Rule 5)</u> A field visit charge may be assessed whenever Cascade visits a custor disconnecting service or reconnecting service and due to the custom the disconnection or reconnection. | |
| IV. <u>Late Payment Charge – (Rule 5)</u> A late payment charge at a rate determined by the Commission be market rates will be charged to the customer's current bill when t owing of \$200 or more. | |
| V. <u>Returned Payment Charge - (Rule 6)</u> A returned check fee of ten dollars (\$10.00) may apply for any paymer | \$10.00 nt returned unpaid. |
| VI. <u>Residential Excess Flow Valves – (Rule 9)</u> a. Installation of an Excess Flow Valve: The customer will be responsible for any maintenance or replace due to the excess flow value. Such cost shall be based upon time | • |
| b. Modifying an Existing Service Line:Time of Construction Crew | up to \$220.00 per hour |

- up to \$220.00 per hour Cost of Materials required to open and close service connection trench, including asphalt • replacement, if any.
- Installation of the Excess Flow Valve \$38.00 .
