Q. PLEASE STATE YOUR NAME, AND CURRENT EMPLOYMENT POSITION OR TITLE.

A. My name is David W. Brown. I am the Owner of Obsidian Renewables LLC (“Obsidian”). My testimony is based on my personal knowledge gained through my experience as a developer of solar and other renewable generating facilities. I have degrees and considerable experience in finance and law and I have considerable professional experience with taxes and structuring complex transactions. I am active at the Oregon legislature on renewable energy matters and have been active in several of the recent renewable energy dockets before this Commission.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to inform the Commission about the amount of QF and other renewable power development in PacifiCorp’s Oregon service territory over the past several years. Contrary to PacifiCorp’s unsubstantiated allegations, the *evidence* set forth in my testimony conclusively shows that PacifiCorp has *not* experienced any extreme or unprecedented spike in PURPA power development since the Commission issued Order 14-058 last year. To the extent that there has been a modest surge in requests for PURPA contracts by solar developers, that surge has passed now that the window for obtaining the 30% federal tax credit has, for all practical purposes, closed. Further, my testimony also shows very few proposed renewable energy projects are actually built, even among those that request interconnection service.

/ / /
/ / /
/ / /

1 **Q. WERE YOU ABLE TO FIND DATA CONCERNING THE RATE OF QF**
2 **PROJECT COMPLETION AND GENERAL RENEWABLE POWER**
3 **DEVELOPMENT IN PACIFICORP'S OREGON SERVICE TERRITORY?**

4 **A.** Although PacifiCorp does not include in its filings in this docket any comparative
5 data of QF project completion or general renewable power development in prior
6 years, I was able to find this information on my own. First, I have reviewed the
7 PacifiCorp's non-confidential data responses in this docket. As explained in
8 detail below, these data responses show that the rate of QF project completion in
9 PacifiCorp's Oregon service territory has not increased since Order 14-058 was
10 issued.

11 Second, I was able to find information concerning general (both PURPA
12 and non-PURPA) renewable power development in PacifiCorp's Oregon service
13 territory. Any energy project to be developed in PacifiCorp's service territory,
14 including any proposed QF project, must request interconnection service from
15 PacifiCorp. Under federal law, PacifiCorp maintains a public database of all such
16 interconnection requests. PacifiCorp's interconnection database can be accessed
17 at: <https://www.oasis.oati.com/PPW/PPWdocs/pacificorplgiaq.htm>. This
18 database shows all interconnection requests on PacifiCorp's system dating back to
19 September 1, 2000. By comparing the number of projects seeking
20 interconnection service with the number of projects that are actually completed, I
have completely debunked PacifiCorp's misleading implication that a surge in
PURPA contract requests will result in a surge of completed PURPA projects.

16 **Q. HAVE YOU ANALYZED THE NUMBER OF PURPA PROJECTS THAT**
17 **HAVE ACTUALLY ACHIEVED COMMERCIAL OPERATION IN**
18 **PACIFICORP'S OREGON SERVICE TERRITORY OVER THE PAST**
19 **TEN (10) YEARS?**

20 **A.** Yes. The basic theme of PacifiCorp's petition and request for relief in this docket
is that its ratepayers are suddenly being burdened with more QF power than they
can handle. Specifically, PacifiCorp alleges that since Order 14-058 was issued

1 just last year, there has already been an “unprecedented” and “extreme” increase
2 in QF power development within its Oregon service territory. This sharp increase
3 in QF power development, according to PacifiCorp, warrants an immediate and
4 dramatic reversal of certain key PURPA policies. One thing that is conspicuously
5 absent from PacifiCorp’s petition and testimony in this proceeding, however, is
6 any actual facts, data or evidence showing that the number of completed QF
7 projects has accelerated following Order 14-058.

8 Interveners in this proceeding have asked PacifiCorp to list the number of
9 QF projects that have been completed by year over the last ten (10) years.
10 PacifiCorp has provided that data on a non-confidential basis. I have received and
11 reviewed such data. My testimony in this docket is therefore not based on my
12 fears, wishes, opinions, or ideology. It is based on what the *data* shows to be true.

13 **Q. DOES THE DATA PROVIDED BY PACIFICORP IN RESPONSE TO
14 INTERVENER DATA REQUESTS SHOW ANY INCREASE IN
15 COMPLETED QF PROJECTS IN PACIFICORP’S OREGON SERVICE
16 TERRITORY SINCE ORDER 14-058 WAS ISSUED?**

17 **A.** No, not at all. If the fundamental allegation made by PacifiCorp in this docket
18 were correct, then the Commission should expect to see a sharp (or, at least
19 discernable) increase in completed QF projects during years 2014 and 2015.
20 What the data actually shows, and shows conclusively, is that there has been no
increase in completed PURPA projects since Order 14-058.

**Q. PLEASE SUMMARIZE BY YEAR THE NUMBER OF QF PROJECTS
AND THE CORRESPONDING NAMEPLATE CAPACITY THAT HAVE
BEEN COMPLETED IN PACIFICORP’S OREGON SERVICE
TERRITORY OVER THE PAST TEN (10) YEARS.**

A. According to PacifiCorp’s own data, the number of completed QF projects, and
the corresponding nameplate capacity, is as follows:

Year	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
Number of completed QF Projects	2	3	1	12	4	1	4	1	3	2
Installed QF Capacity (MW)	26.25	18	1.28	76.55	12.53	1.6	6.10	.75	7.5	3.02

Q. GIVEN THAT THERE HAS BEEN NO INCREASE IN THE NUMBER OF COMPLETED PURPA PROJECTS IN 2014 AND 2015, WHY DOES PACIFICORP SAY THAT THERE HAS BEEN AN “UNPRECEDENTED” AND “EXTREME” INCREASE IN PURPA PROJECTS SINCE ORDER 14-058 WAS ISSUED?

A. In my opinion, PacifiCorp’s petition and testimony in this docket is deliberately designed to mislead the Commission into thinking that there has been a dramatic increase in QF projects when, in fact, there has not. PacifiCorp’s ruse is based on overstating the level of “interest” in QF project development rather than actual QF project development. As I explain below, there is virtually no statistical correlation between the level of “interest” and the level of completed projects. This is true not only of QF projects, but general renewable project development in PacifiCorp’s Oregon service territory. Frankly, if I were a Commissioner, I would be frustrated with PacifiCorp’s omission of data on completed QF projects, which is essential for the Commission to make a fully informed decision in this case.

Q. HAVE YOU REVIEWED THE TESTIMONY OF BRUCE W. GRISWOLD FILED IN THIS PROCEEDING ON MAY 21, 2015 (“GRISWOLD TESTIMONY”)?

A. Yes.

1 **Q. DOES THE GRISWOLD TESTIMONY OFFER ANY EVIDENCE OR**
2 **DATA WITH RESPECT TO COMPLETED PURPA PROJECTS?**

3 **A.** No. If you read the Griswold Testimony closely, it deliberately and carefully
4 avoids making any direct representation that requests for PURPA contracts
5 correlate with completed projects. Nothing in the Griswold Testimony states that
6 a large number of QF projects will actually be built in the next 12 or 18 months.
7 There is, therefore, no evidence in the record—even in PacifiCorp’s own
8 testimony—supporting the conclusion that PacifiCorp will experience a glut of
9 new QF development. In terms of the affect on PacifiCorp’s ratepayers, the mere
10 requests for PURPA contracts described in the Griswold Testimony are a non-
11 event.

12 **Q. SHOULD THE COMMISSION SIMPLY ASSUME THAT AN INCREASE**
13 **IN PURPA CONTRACT REQUESTS WILL RESULT IN AN INCREASE**
14 **IN COMPLETED PURPA PROJECTS?**

15 **A.** No. This may seem like an intuitive assumption, but the data clearly shows
16 otherwise. There is no actual evidence in the record that supports the assumption.
17 It is extremely difficult to develop successful PURPA projects in the state of
18 Oregon, and the vast majority of projects that are started are never built. Two of
19 the many reasons are unexpectedly high interconnection costs and difficulty
20 obtaining law use approval under Oregon law. The low success rate for PURPA
projects in Oregon has been true for many years. The evidence from PacifiCorp’s
interconnection queue shows that very few proposed renewable energy projects—
even among those that make it as far as the final interconnection study stage—are
actually completed. From a statistical standpoint, the interconnection data shows
that there is no significant correlation between the number of projects requesting a
contract and the number of projects that are actually completed.

///

1 **Q. HAVE YOU ANALYZED PACIFICORP'S INTERCONNECTION**
2 **REQUESTS SPECIFIC TO RENEWABLE ENERGY DEVELOPMENT IN**
3 **OREGON?**

4 **A.** Yes. In order to make the relevant data in PacifiCorp's interconnection queue
5 more accessible and user friendly, I have copied the entire interconnection
6 database into an Excel file, which is attached hereto as Exhibit 1, first tab. I then
7 extracted all of the Oregon projects from the database, which data is the second
8 tab of Exhibit 1. I then extracted all of the Oregon renewable energy projects
9 after January 1, 2014, which is the third tab of Exhibit 1. I then extracted all of
10 the Oregon renewable energy projects after January 1, 2014 that have entered into
11 interconnection agreements, which is the fourth tab of Exhibit 1. Finally, at the
12 fifth tab of Exhibit 1, I extracted all of the Oregon projects that have requested
13 interconnection services and made the file sortable. The sort I used was based on
14 motive force (so all the wind projects are together, the biomass, etc.).

15 **Q. PLEASE SUMMARIZE HOW MANY RENEWABLE ENERGY**
16 **PROJECTS HAVE ACTUALLY BEEN COMPLETED SINCE 2007 IN**
17 **COMPARISON TO THE NUMBER OF PROJECTS THAT SOUGHT**
18 **INTERCONNECTION SERVICE.**

19 **A.** PacifiCorp's records show that the overwhelming majority of renewable projects
20 seeking interconnection service from PacifiCorp fail to achieve commercial
operation:

- From 2001 through 2006 PacifiCorp received interconnection requests for 544 MW from 35 renewable energy projects. Only 157 MW were ever completed.
- In 2007 PacifiCorp received interconnection requests for 325 MW of capacity. Only 50 MW were ever completed.
- In 2008 PacifiCorp received interconnection requests for 1,857 MW of capacity. Only 5.3 MW were ever completed.
- In 2009 PacifiCorp received interconnection requests for 981 MW of capacity. Only 12 MW were ever completed.
- In 2010 PacifiCorp received interconnection requests for 951 MW of capacity. Only 6.6 MW have been completed. A single wind project for

1 100 MW is still listed in the queue as “in progress.” All other projects
2 have dropped from the queue.

- 3 • In 2011 PacifiCorp received interconnection requests for 350 MW of
4 capacity. Only 5 MW have been completed. All other projects have
5 dropped from the queue.
- 6 • In 2012 PacifiCorp received interconnection requests for 597 MW of
7 capacity. None have been completed yet. Projects representing 538 MW
8 of capacity have already been dropped from the interconnection queue. 59
9 MW are still in progress.
- 10 • In 2013 PacifiCorp received interconnection requests for 14 renewable
11 energy projects totaling 667 MW. Of the renewable energy projects, 12
12 have already been deactivated and the remaining two that are in-progress
13 total only 14 MW, and it is unclear whether or not they will ever be
14 completed.

15 **Q. BASED ON PACIFICORP’S INTERCONNECTION DATA, CAN YOU
16 SUMMARIZE HOW MANY RENEWABLE ENERGY PROJECTS HAVE
17 BEEN COMPLETED IN PACIFICORP’S OREGON SERVICE
18 TERRITORY SINCE 2007?**

19 **A.** According to PacifiCorp’s interconnection queue, since 2007 to date, at least 215
20 renewable energy projects in Oregon have requested interconnection services
21 from PacifiCorp. These 215 projects represent an aggregate nameplate capacity
22 of 6,912 MW. Of these 215 potential projects, only 22 have actually been
23 completed and placed in service. Those 22 completed projects resulted in only 80
24 megawatts of installed capacity. That is a 10 percent success rate on projects and
25 a 1.3 percent success rate on megawatts.

26 **Q. PACIFICORP’S PETITION IN THIS DOCKET IS FOCUSED
27 SPECIFICALLY ON SOLAR PROJECTS. OVER THE SAME TIME
28 PERIOD, HAS THE SUCCESS RATE OF SOLAR PROJECTS BEEN
29 HIGHER THAN OTHER RENEWABLE ENERGY PROJECTS?**

30 **A.** No, solar projects actually have a lower success rate. PacifiCorp’s queue data
31 shows that 95 solar projects have requested interconnection services in Oregon in
32 the last 15 years. Of these 95 solar projects, only one project, having a nameplate

17
18
19
20

capacity of just 2 MW, was actually built. It was not a QF project, and it was built specifically for PacifiCorp by my company.

Q. IS THIS DATA CONSISTENT WITH YOUR PERSONAL EXPERIENCE AS A SOLAR DEVELOPER IN OREGON?

A. Absolutely. In my experience, fewer than 20 percent of larger solar projects proposed for development ever get completed. In the last five years, Obsidian has responded to RFPs, requested PPAs, and begun development work for more than 24 different solar projects. Of these, we have completed two small projects (under 500 kW each) that did not require interconnection services as defined in the interconnection queue database, the Black Cap project (2 MW), and the Outback project (5 MW, not in PacifiCorp's service territory). We recently began construction on the Old Mill project (5 MW). None of these projects were QFs. We have requested PPAs and started interconnection services requests for 9 different QF projects in Oregon (120 MW capacity) and none have been built. We are expecting that 2 projects with 16 MW of capacity will be built in 2016, one in PacifiCorp's service territory and one not in PacifiCorp's service territory. We are hopeful more may follow, but that depends on many factors, including decisions to come from the Commission.

Q. ARE PACIFICORP'S RATEPAYERS BEING FORCED TO PURCHASE UNWANTED OR OVERPRICED SOLAR QF POWER?

A. No. As far as I am aware, PacifiCorp's ratepayers in Oregon are not purchasing *any* solar QF power. According to PacifiCorp's interconnection queue, no solar QF projects have been built in PacifiCorp's Oregon service territory. *None*. Even with the small handful of solar projects now in progress, the amount of solar development in PacifiCorp's Oregon service territory is extremely small and on a completely different scale from the hundreds of MWs that PacifiCorp has represented in its Motion.

1 **Q. YOUR TESTIMONY SHOWS THAT PACIFICORP’S PETITION IS FULL**
2 **OF MISLEADING STATEMENTS AND DELIBERATELY OMITTS**
3 **CRITICAL FACTS. HOW HAS PACIFICORP RESPONDED TO YOUR**
4 **POSITION?**

5 A. I previously testified in this docket in opposition to PacifiCorp’s request for
6 interim relief. In my previous testimony, I showed that there is no correlation
7 between “interest” in PURPA projects and actual completed PURPA projects. I
8 also showed how the vast and overwhelming number of proposed renewable
9 projects that reach the interconnection stage are never completed. I testified that
10 there are currently *no* solar QFs in PacifiCorp’s Oregon service territory. To date,
11 PacifiCorp has offered no substantive rebuttal to any of these points. Instead,
12 PacifiCorp simply repeated the mantra that “QF solar development is increasing
13 in both volume and scale is clear and unequivocal.” Just to be clear—PacifiCorp
14 is asserting that QF solar development is increasing in both volume and scale
15 while simultaneously admitting that there are *zero* solar QF projects in Oregon.
16 PacifiCorp’s position is hopelessly irreconcilable.

17 **Q. ARE THE POLICY CHANGES REQUESTED BY PACIFICORP IN THIS**
18 **DOCKET NEEDED TO CURTAIL A SHARP INCREASE IN SOLAR QF**
19 **PROJECTS IN THE FUTURE?**

20 A. No, I do not believe that there will be a significant increase in solar QF projects in
PacifiCorp’s Oregon service territory going forward for two reasons. First is the
pending statutory expiration of the 30% federal tax credit for new solar projects,
and the second is the dramatic decrease in PacifiCorp’s avoided cost rates. Taken
together, these factors will make it extremely difficult to develop a new solar
project in PacifiCorp’s service territory for the foreseeable future. In my opinion
as a solar developer, PacifiCorp should actually see a decline in requests for
PURPA contracts from new solar QF projects. The surge of interest in solar QF
development—such as it was—is likely over already.

1 **Q. PLEASE EXPLAIN HOW THE EXPIRATION OF THE 30% FEDERAL**
2 **TAX CREDIT AT THE END OF 2016 WILL HAVE AN IMMEDIATE**
3 **AFFECT ON SOLAR QF PROJECTS.**

4 **A.** There is simply not enough time to complete a new project prior to the expiration
5 of the tax credit. In order to be eligible for the 30% federal tax credit, new
6 projects must be completed and achieve commercial operation before December
7 31, 2016. PacifiCorp's own Schedule 37 website discussing QF contracts advises
8 that no new project will be able to complete the necessary interconnection work in
9 less than 18 months. This estimate of time is consistent with our experience with
10 PacifiCorp. Thus, a project seeking a PURPA contract today cannot be built and
11 interconnected before the tax credit expires.

12 **Q. ARE PACIFICORP'S REVISED AVOIDED COST RATES LIKELY TO**
13 **INCENTIVIZE OR CHILL FUTURE RENEWABLE QF**
14 **DEVELOPMENT?**

15 **A.** PacifiCorp's new avoided cost rates went into effect on July 1, 2015. These rates
16 are much lower than the previous rates. In my opinion as a developer, these new
17 rates are likely to have a significant chilling effect on new renewable QF
18 development in PacifiCorp's Oregon service territory. Again, this indicates that
19 PacifiCorp's proposed PURPA policy changes attacking solar QF projects are
20 completely unnecessary.

Q. CAN YOU SUMMARIZE PACIFICORP'S NEW AVOIDED COST
RATES?

A. I have prepared a summary of PacifiCorp's revised avoided cost rates, which is
attached hereto as Exhibit 2. By way of illustration, the fifteen-year, levelized
price of the weighted current peak and off-peak prices for renewable avoided cost
(accounting for the fact that solar is a daytime resource) as adjusted for inflation is
\$.0437 KWh. The standard avoided cost rate (as compared to renewable avoided
cost rate) is even less. If these avoided cost rates accurately reflect PacifiCorp's

1 avoided cost of wholesale power, then the Commission should be investigating an
2 immediate rate decrease for PacifiCorp's retail customers.

3 **Q. ARE YOU ABLE TO DEVELOP NEW SOLAR QF PROJECTS AT
PACIFICORP'S CURRENT AVOIDED COST RATES?**

4 **A.** No. PacifiCorp's current avoided cost rates are currently so low that I am not able
5 to build a solar QF project that is profitable. There are significant economies of
6 scale that can be achieved with a 10 MW project. But even if the threshold for
7 standard avoided cost rates were left at 10 MW as the Commission decided in
8 Order 14-058, the economies of scale still would not be sufficient to allow me to
9 develop a project at current rates. Thus, there is no reason for the Commission to
10 revise its PURPA policies making it even more difficult for me and other
11 developers to develop projects in the future.

10 **Q. WHAT WOULD BE THE PRACTICAL EFFECT OF PERMANENTLY
11 LOWERING THE THRESHOLD FOR STANDARD CONTRACTS AS
12 REQUESTED BY PACIFICORP IN THIS PROCEEDING?**

11 **A.** Lowering the threshold for standard contracts would essentially require all (or
12 almost all) QFs to negotiate a Schedule 38 non-standard contract with PacifiCorp.
13 Even if the negotiation is undertaken by both parties in good faith, it would still
14 be a very time-consuming and expensive process.

14 **Q. HAVE YOU EVER TRIED TO NEGOTIATE A NON-STANDARD QF
15 PROJECT WITH PACIFICORP?**

15 **A.** Yes. That is to say that I tried to negotiate while PacifiCorp refused to negotiate.
16 I requested a non-standard QF contract from PacifiCorp pursuant to Schedule 38
17 for a new solar project. Not only did PacifiCorp fail to honor any of the deadlines
18 imposed by law for negotiating or processing my contract request, but PacifiCorp
19 proposed a purchase price that was actually *lower* than the prevailing market
20 prices at the Mid-C trading hub. When questioned on this below-market purchase
price, PacifiCorp responded that they had no legal authority under PUC orders to

negotiate a price based on renewable energy avoided cost. My conclusion based on this experience is that “negotiating” a non-standard QF contract with PacifiCorp means acquiescing to terms dictated by PacifiCorp on a take-it or leave-it basis.

Q. ARE YOU AWARE OF ANY OTHER QF DEVELOPER THAT HAS NEGOTIATED A NON-STANDARD QF PROJECT WITH PACIFICORP?

A. No. I have been in the business of developing renewable energy projects in Oregon for about the last ten (10) years. During the time that I have been in this business, I am not personally aware of any developer that has successfully negotiated a non-standard QF contract with PacifiCorp in Oregon. It is possible that it has been done in Utah, but I am not personally aware of any in Oregon, Washington or Idaho.

Q. DOES THIS CONCLUDE YOUR TESTIMONY?

A. Yes.

Company Name: Only displayed after Interconnection Agreement has been filed with FERC or is an affiliate of PacifiC

Affiliate Initial Scoping Meeting Notification: It is PacifiCorp's intention to hold initial scoping meetings for all projects listed that are associated with an affiliate per the relevant timing requirements.

Service Type: Not applicable to Large Generator Interconnection requests made prior to 01/20/2004, Small Generator Interconnection requests, or Qualifying Facility Interconnection requests.

ER: Energy Resource Interconnection Service

NR: Network Resource Interconnection Service

NR with ER: Network Resource Interconnection Service requested, but also studied as Energy Resource. Customer will choose Service Type (ER or NR) prior to Facilities Study.

Study Reports: If displayed, click "Available" link to view PDF files.

Study Schedule Deviation: If displayed, click "More Info" link to view PDF files.

Deactivated Explanation

WITHDRAWN BY CUSTOMER: Interconnection Customer requested application be withdrawn

REMOVED-LACK OF PROGRESS: Removed by PacifiCorp due to lack of progress through procedures by Interconnection Customer

REMOVED-ERROR IN ENTRY: Removed by PacifiCorp due to entry error by PacifiC

EXHIBIT 1

TAB 2

PacifiCorp Generation Interconnection Queue

As of: 7/3/15

Company Name: Only displayed after Interconnection Agreement has been filed with FERC or is an affiliate

Affiliate Initial Scoping Meeting Notification: It is PacifiCorp's intention to hold initial scoping meetings for all projects listed that are associated with an affiliate per the relevant filing

Service Type: Not applicable to Large Generator Interconnection requests made prior to 01/20/2004, Small Generator Interconnection requests, or Qualifying Facility Interconnection requests

ER: Energy Resource Interconnection Service

NR: Network Resource Interconnection Service

NR with ER: Network Resource Interconnection Service requested, but also studied as Energy Resource. Customer will choose Service Type (ER or NR) prior

Study Reports: If displayed, click "Available" link to view PDF files.

Study Schedule Deviation: If displayed, click "More Info" link to view PDF files.

Deactivated Explanation

WITHDRAWN BY CUSTOMER: Interconnection Customer requested application be w

REMOVED-LACK OF PROGRESS: Removed by PacifiCorp due to lack of progress through procedures by Intercon

REMOVED-ERROR IN ENTRY: Removed by PacifiCorp due to entry error by PacifiCo

Company Name: Only displayed after Interconnection Agreement has been filed with FERC or is an affiliate of PacifiCorp.

Affiliate Initial Scoping Meeting Notification: It is PacifiCorp's intention to hold initial scoping meetings for all projects listed that are associated with an affiliate per the relevant timeline.

Service Type: Not applicable to Large Generator Interconnection requests made prior to 01/20/2004, Small Generator Interconnection requests, or Qualifying Facility Interconnection requests.

ER: Energy Resource Interconnection Service

NR: Network Resource Interconnection Service

NR with ER: Network Resource Interconnection Service requested, but also studied as Energy Resource. Customer will choose Service Type (ER or NR) prior to filing.

Study Reports: If displayed, click "Available" link to view PDF files.

Study Schedule Deviation: If displayed, click "More Info" link to view PDF files.

Deactivated Explanation

WITHDRAWN BY CUSTOMER: Interconnection Customer requested application be withdrawn.

REMOVED-LACK OF PROGRESS: Removed by PacifiCorp due to lack of progress through procedures by Interconnection Customer.

REMOVED-ERROR IN ENTRY: Removed by PacifiCorp due to entry error by PacifiCorp.

Deactivated Explanation

WITHDRAWN BY CUSTOMER: Interconnection Customer requested application be w

REMOVED-LACK OF PROGRESS: Removed by PacifiCorp due to lack of progress through procedures by Intercon

REMOVED-ERROR IN ENTRY: Removed by PacifiCorp due to entry error by PacifiCo

PacifiCorp Avoided Cost Schedule for QFs Effective June 1, 2015 with levelized cost calculations

Year	Price (On-Peak)	Price (Off-Peak)	On- and Off-Peak Weighted Average of daylight hours	On- and Off-Peak Weighted Average of daylight hours, adjusted for inflation	Levelized Avoided Cost discount rate:	Inflation rate:	
1	2015	2.77	2.19	2.68	7%	2.0%	
2	2016	2.87	2.20	2.76			4.20 ¢/kWh
3	2017	3.13	2.43	3.02			3.24 ¢/kWh
4	2018	3.38	2.54	3.25			4.05 ¢/kWh
5	2019	3.55	2.73	3.42			3.80 ¢/kWh
6	2020	3.82	2.93	3.68			3.46 ¢/kWh
7	2021	4.11	3.18	3.96			
8	2022	4.41	3.44	4.25			
9	2023	4.72	3.69	4.56			
10	2024	9.28	7.05	8.92			
11	2025	9.46	7.24	9.10			6.05 ¢/kWh
12	2026	9.56	7.51	9.23			4.72 ¢/kWh
13	2027	9.73	7.71	9.41			5.84 ¢/kWh
14	2028	9.91	7.91	9.59			5.08 ¢/kWh
15	2029	10.07	8.11	9.76			4.37 ¢/kWh

First 10 years (2015 - 2024) avg. peak cost:	2.90
First 10 years (2015 - 2024) avg. off-peak cost:	3.06
Arithmetic mean of weighted average:	3.16
10-year levelized cost unadjusted:	3.33
10-year levelized cost adjusted for inflation:	3.52

15 year (2015 - 2029) avg. peak cost:	7.42
15 year (2015 - 2029) avg. off-peak cost:	7.42
Arithmetic mean of weighted average:	7.42
15-year levelized cost unadjusted:	7.41
15-year levelized cost adjusted for inflation:	7.39
