PUBLIC UTILITY COMMISSION OF OREGON

UW 124

STAFF DIRECT TESTIMONY OF Michael Dougherty

In the Matter of SEVEN MTN GOLF VLG WATER COMPANY Request for a General Rate Increase

July 2, 2008

CASE: UW 124

WITNESS: Michael Dougherty

PUBLIC UTILITY COMMISSION OF OREGON

STAFF EXHIBIT 100

Direct Testimony
In Support of the
Stipulation

Q. PLEASE STATE YOUR NAME AND POSITION.

A. My name is Michael Dougherty. I am employed by the Public Utility Commission of Oregon as Program Manager, Corporate Analysis and Water Regulation in the Economic Research and Financial Analysis section of the Utility Program. My business address is 550 Capitol Street NE, Salem, Oregon 97301-2551.

Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND WORK EXPERIENCE.

A. My Witness Qualification Statement is found in Exhibit Staff/101, Dougherty/1.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of my testimony is to introduce and support the Stipulation entered into by Staff; Seventh Mountain Golf Village Water Company (SMGV or Company); and Thomas G. Clifford, Robert J. Selder, and Leo Mottau (Intervenors).¹

Q. WHO ARE THE PARTIES IN THIS DOCKET?

A. The parties in this docket are Staff, the Company, and Intervenors (Parties).

Q. DID ANY PARTY NOT SIGN THE STIPULATION?

A. No.

Q. DID YOU PREPARE ANY EXHIBITS FOR THIS DOCKET?

A. Yes. Exhibit Staff/102 contains exhibits in support of the Direct Testimony.

- Description of Seventh Mountain Golf Village Water Company and an Explanation of why Widgi Creek Golf Course is no longer a customer of SMGV;
- 2) Summary of SMGV's Application;
- 3) Staff's analysis of SMGV's filing;
- 4) Staff's adjustments to SMGV's filing; and
- 5) Summary of the Stipulation agreed to by the Parties.

SEVENTH MOUNTAIN GOLF VILLAGE WATER COMPANY

Q. PLEASE DESCRIBE SEVENTH MOUNTAIN GOLF VILLAGE WATER COMPANY.

A. SMGV is an investor-owned water utility located in the vicinity of Bend, Oregon. The water system consists of a well, 250,000 gallon two-chambered storage reservoir, pump station, various pumps, and distribution pipe lines. The water system currently serves 181 residential customers, seven commercial customers, and approximately 25 irrigation customers.²
The seven commercial customers are associated with Widgi Creek Golf Course (Widgi Creek Grill, Widgi Creek Commons, Widgi Creek Maintenance Shed, Pool, Pool House/Spa, 7th Tee Restroom, and 14th Tee Restroom).

² On June 11, 2008, Staff, Company representatives, and representatives from the Elkai Woods Homeowners Association (EWHOA) and Elkai Woods Fractional Homeowners Association

⁽EWFHOA) performed a walk through of the common areas and determined that seven meters required installation that would increase the irrigation meter count from 18 to 25 as of the date of the walkthrough.

Previously, the Company provided irrigation water to Widgi Creek Golf Course (WCGC); however, due to the transfer of land and water rights associated with the land, WCGC is no longer a customer of SMGV.

Q. PLEASE EXPLAIN IN MORE DETAIL WHY WIDGI CREEK GOLF COURSE IS NO LONGER A CUSTOMER OF SMGV.

A. Widgi Creek was previously partly owned by the owner of SMGV; however, Widgi Creek filed for Chapter 7 Bankruptcy in 2004, going into Receivership in March 2004. Widgi Creek was auctioned in December 2004 and purchased by a third party not affiliated with SMGV.

In 2005, Widgi Creek's owner obtained legal counsel who researched the chain of title and history of the water permit for the irrigation, commercial, and pond water for the golf course and concluded that Widgi Creek was the absolute owner of the irrigation, commercial, and pond water. As a result, Widgi Creek sent a letter to SMGV on November 2, 2005, stating that it would no longer pay for water that it owns.

Subsequent to the letter notifying SMGV of water rights, SMGV and Widgi Creek entered into a Reciprocal Easement Agreement that will allow SMGV to draw all of its water for its operations from the well located on Widgi Creek's property. As part of the agreement, Widgi Creek will allow SMGV a permanent, non-exclusive easement to access, maintain, repair, replace, and use the water pump, well, and cisterns located on Widgi Creek property. The agreement states that SMGV will maintain ownership of the electrical pump located in the well. Widgi Creek will not charge SMGV for use of the easement.

As part of the agreement, SMGV will allow Widgi Creek a permanent, non-exclusive easement to access, maintain, repair, replace, and use its irrigation equipment that is located on property used by SMGV. SMGV will not charge Widgi Creek for use of the easement; however, Widgi Creek will continue to pay its pro-rata share of the utility operations and maintenance expenses concerning the delivery of water as long as the delivery facilities are located on property used by SMGV. In addition, Widgi Creek comprises the seven commercial customers of SMGV and will continue to pay the commercial water rates since the commercial water is delivered by SMGV's distribution system.

Q. WHEN WAS THE COMPANY'S LAST RATE FILING?

A. The Company filed tariffs, UW 116, on April 16, 2006. The Commission in Order No. 06-501, dated August 28, 2006, approved a Stipulation between all parties in the docket resulting in a flat rate for residential customers of \$21.14 per month, a flat rate for the Widgi Creek commercial customer of \$173 per month, and a flat rate of \$173 per month for the months of June through August for the Widgi Creek Pool.

Q. DOES THE COMPANY HAVE ANY AFFILIATED INTEREST AGREEMENTS?

- A. Yes. The following are approved affiliated interest (AI) agreements:
 - UI 280 (Commission Order No. 08-144) Employment Service agreement between SMGV and its owner Dale Bernards for annual total compensation payments of \$2,400 per year.
 - UI 246 (Commission Order No. 06-017) Property rental agreement between SMGV and Braber Properties LLC (owned by minor sons of Dale

26 27 Bernards). As a result of the lower of cost or market transfer policy, the approval did not recognize any utility expense for the property.³

UI 217(1) (Commission Order No. 06-015) – Management contract between SMGV and Canterbury Property Management LLC.4

SUMMARY OF SMGV'S RATE APPLICATION

Q. PLEASE SUMMARIZE THE COMPANY'S GENERAL RATE FILING.

- A. Pursuant to ORS 757.205, the Company filed tariffs on November 20, 2007, to be effective January 1, 2008. In its Application, the Company requested an increase in revenues of \$23,912 (from \$50,691 to \$74,603) or 47 percent. SMGV also requested a 9.04 percent return on a rate base of \$86.074.5 The Company states the increase in rates is necessary because of:
 - Investments of over \$50,000 in the last few years for meter installations and additional improvements;
 - An increase in management fees from \$850 per month to \$1,200 per month; and
 - Payment of back property taxes from 2002 and prior that was not previously included in rates.

Q. PLEASE DESCRIBE THE EFFECT OF COMPLETION OF METER INSTALLATIONS.

A. The installation of meters has resulted in a change from flat rates to the proposed metered rates with base and variable components. The Company, in its application, submitted a history of meter readings from September 2006

³ The land referred to in UI 246 was transferred from a SMGV affiliate B&B Properties to Braber Properties at no cost. The previous AI agreement between SMGV and B&B Properties was docketed as UI 215.

⁴ The manager of Canterbury Property Management LLC has severed her ties with Canterbury and now manages SMGV through her own Company, Pathfinder Commercial Management Inc. I will discuss this later in testimony.

Although the application states \$86,074, Staff/102, Dougherty/1 indicates a rate base of \$89,582.

through September 2007. Additionally, as a response to a data request, SMGV submitted meter readings from October 2007 through April 2008 allowing sufficient data to structure a metered rate.

As a result of meter installations, the commercial customer count increased from two to seven to account for different areas and operations controlled by the commercial customer. Also, completion of the meter installations would result in the ability to separate residential use from common area irrigation use should the two townhome homeowners associations, Elkai Woods

Homeowners Association (EWHOA) and Elkai Woods Fractional Homeowners

Association (EWFHOA), find such information beneficial. Currently, separately existing irrigation lines serve the common areas between certain residences in EWHOA and EWFHOA and the yards in front and behind each of the individual townhomes which are not common area. The irrigation systems around each building serve two or more residences. EWHOA and EWFHOA will pay for all water used for both inside and irrigation purposes on behalf of their homeowners.

Q. DID THE COMPANY INCLUDE ANY CHANGES TO ITS RULES AS PART OF THE APPLICATION?

A. In addition to a requested change in rates, the Company has also proposed to change three of its tariffed rules, Rule 14(b) concerning disconnection, Rule 19 concerning location of meters, and Rule 22 to reflect monthly and not quarterly billings. I will discuss these changes later in testimony.

Q. PLEASE EXPLAIN WHY STAFF REQUESTED A MOTION TO EXTEND
THE SUSPENSION PERIOD FOR AN ADDITIONAL THREE MONTHS
THAT WAS GRANTED BY THE COMMISSION IN ORDER NO. 08-199,
DATED APRIL 10, 2008.

- A. During my investigation into rates, Deschutes County informed me that it foreclosed on a judgment lien on the utility property of SMGV for failure to pay approximately \$40,000 in personal (utility plant) property taxes. Because of this development, and the uncertainty of the outcome, I requested additional time to complete my investigation.
- Q. WHAT WAS THE RESULT OF THE FORECLOSURE?

- A. SMGV secured a loan, docketed as UF 4249, and settled the judgment (approximately \$34,796 plus interest of 10 percent starting on February 13, 2008) on May 13, 2008.
- Q. PLEASE DESCRIBE THE COMPANY'S CURRENT AND PROPOSED RESIDENTIAL RATES.
- A. SMGV currently charges a flat rate of \$21.14. This rate was approved by the Commission in Order No. 06-501 (UW 116), dated August 28, 2006. The following table shows the current residential rate and the Company's proposed metered (base and commodity) rate.

Residential

Meter Size	Meter Size Current Flat Rate Proposed Base/Commo		
4"6	\$21.14	\$22.07	
ı		\$0.88 per 100 cubic feet (cf)	

2

6 7

8

9

10

11

12

13

14

15

Q. PLEASE DESCRIBE THE COMPANY'S CURRENT AND PROPOSED COMMERCIAL RATES AS STATED IN THE APPLICATION.

A. As previously mentioned, commercial customers include Widgi Creek Grill, Widgi Creek Commons, Widgi Creek Maintenance Shed, Pool, Pool House/Spa, 7th Tee Restroom, and 14th Tee Restroom. The following table shows the current commercial rate and the Company's proposed metered (base and commodity) rate.

Commercial

Meter Size	Current Flat Rate	Proposed Base/Commodity Rate	
1"	\$173.00 ⁷	\$22.07 \$0.88 per 100 cf	

Q. PLEASE DESCRIBE THE COMPANY'S CURRENT AND PROPOSED IRRIGATION RATES AS STATED IN THE APPLICATION.

A. As previously mentioned, completion of the installation of meters allowed the Company to separate water usage for common areas from certain residential meters. Prior to the installation of these irrigation meters (that is still ongoing)

⁶ As a result of different builders being involved in the Widgi Creek development, a small amount (approximately six) 5/8" x 3/4" meters were installed in the system. Because these smaller meters serve the same type of structures (townhomes), I did not distinguish between these meters and the 1" meters for pricing.

⁷ SMGV's current tariff includes a three-month (June, July, and August) rate of \$173.00 per month for the Pool.

certain irrigation valves were connected to meters that provided water to certain residences. The following table shows the current irrigation rate and the Company's proposed metered (base and commodity) rate.

Irrigation

Meter Size	Meter Size Current Flat Rate Proposed Base/Con		
1"	\$0.00	\$22.07	
'		\$0.88 per 100 cf	

Q. ALTHOUGH YOU REFER TO THESE METERS AS IRRIGATION, THESE METERS BASICALLY SERVE SMALL COMMON AREAS. ARE THERE OTHER REGULATED COMPANIES THAT HAVE IRRIGATION RATES THAT ALSO SERVE SMALLER COMMON AREAS?

A. Yes. Cline Butte Utility (Eagle Crest), Running Y, and Sunriver are examples of companies that have non-golf course irrigation rates.

STAFF'S ANALYSIS OF THE COMPANY'S RATE FILING

- Q. WHAT ARE THE RESULTS OF YOUR ANALYSIS OF THE COMPANY'S **APPLICATION?**
- A. My analysis of the Company's Application results in a recommended revenue requirement of \$68,186, which is a \$9,301 increase, or 15.80 percent increase, from SMGV's filed total test year revenues of \$58,885. The revenue requirement is to be collected as follows: \$59,330 from residential, commercial, and irrigation customers; and \$8,855 from the Widgi Creek Golf Course special contract revenue resulting from electrical and property tax pro-rata sharing. In addition, Staff recommends the Company be allowed to earn a 9.5 percent rate

of return on rate base of \$58,506. Exhibit Staff/102, Dougherty/1 and 2 shows the revenue requirement calculations.

STAFF ADJUSTMENTS

Q. DID YOU MAKE ANY ADJUSTMENTS TO THE COMPANY'S TEST PERIOD EXPENSES?

A. Yes. Staff/102, Dougherty/2 and 3 show my revenue and expense adjustments with a brief description of each; however, below is additional explanation of significant adjustments.

Account No. 461.1 – Residential Water Sales

Revenue was calculated based on an increased customer count to 181 based on newly completed and current construction.

Account No. 461.2 –Commercial Water Sales

Revenue was calculated based on seven commercial customers and not the previous two commercial customers.

Account No. 465 – Irrigation (Non-golf) Water Sales

Revenue was imputed for irrigation based on 25 customers at the UW 116 rate of \$21.14 multiplied by 12 months.

Special Contract Revenue

The calculated amount was based on a pro-rata sharing of electrical costs billed to SMGV for Widgi Creek Golf Course (WCGC) use and a share of property taxes for equipment that supplies water to WCGC. Electricity is allocated between the two entities based on water consumption. During months of no golf course use, WCGC pays one-half of the electric base rate.

Docket UW 124

Account No. 603 - Salaries and Wages - Officers

As previously mentioned, UI 280 authorized total compensation to the Company's owner of \$2,400 per year.

Account No. 615 - Purchased Power

In its application, the Company requested \$17,000. Based on review of test year invoices, increases resulting from PacifiCorp's UE 179 rate case, and likely increases due to SB 408 tax true-ups and power costs, I recommend a purchased power expense of \$17,770; \$770 above the Company's requested amount.

Account 619 – Office Supplies

In its application, the Company requested \$2,070. Based on a review of invoices, I moved certain charges to other accounts. I then escalated the resulting amount for increases in customer count and recommend an expense of \$686.

Account No, 621 - Repairs to Water Plant

In its Application, the Company submitted \$2,456 in proposed expenses. After reviewing invoices, Staff recommends \$3,319 in expenses. The Company uses a contract operator for repairs and operations. The Company does not pay the operator on a monthly basis, but based on work performed by the operator. As a result, the Company separated labor and parts charges from the operator's invoices and placed the charges in two accounts, Account 621, Repairs to Water Plant and Account 636, Contract Services – Labor. I removed this separation because the associated labor was directly tied to the

Docket UW 124

1 repair work being performed. In addition, I reclassified certain expenses as 2 Plant and Contributions in Aid of Construction (CIAC) for invoices related to 3 service connections. 4 <u>Account No. 632 - Contract Services – Accounting</u> 5 In its application, the Company submitted a proposed expense of \$4,284. After 6 reviewing test year invoices and a 2008 projected cost submitted by the 7 Company's accountant, I adjusted this amount to \$3,100. 8 Account No. 634 - Contract Services – Management 9 In its application, the Company submitted \$14,400 in proposed expenses. As 10 previously mentioned, SMGV's management is performed by a former 11 employee of SMGV's affiliate, Canterbury Properties Management 12 (Canterbury). Although the employee has severed most ties with Canterbury, I 13 continued to review the contract using the same method described in UI 217(1). 14 I increased the hours performed by the manager from 30 hours per month to 15 39 hours per month based on submitted documentation. I also escalated the 16 expense by 2.5 percent per year that is allowed in UI 217(1). As a result, my 17 recommended amount is \$13,603 per year. 18 Account No. 635 – Contract Services - Testing 19 In its application, SMGV stated its 2005 Testing Expense as \$2,423. I 20 recalculated the proposed testing expense at \$1,913 using a four-year average 21 of the costs for scheduled tests based on documentation that was provided by 22 a testing lab. I also added sampling costs charged by the contract operator for 23 drawing the required samples.

Account No. 636 - Contract Services - Labor

In its application, SMGV submitted \$5,000 in labor costs. As previously mentioned, I included contract operator labor associated with repairs in Account 621, Repairs to Water Plant. I allowed \$488 in temporary labor based on invoices submitted.

Account No. 638 - Contract Services - Meter Reading

As a result of the new requirement to read meters, SMGV submitted an annual cost of \$3,600. I calculated costs based on \$1.50 reading per meter multiplied by 11 months for residential and commercial customers. I used 11 months instead of 12 months because of Elkai Woods' high elevation. In 2007 / 2008, SMGV could not read meters for the months of December through March due to snow and frozen ground. Although a similar amount of snow may not happen in subsequent years, using an 11-month basis for readings is reasonable based on the location (higher elevation) of the Company's service area. For irrigation meters, I multiplied \$1.50 reading per meter by seven months, because the irrigation system is only in operation seven months a year. My recommended expense is \$3,363.

Account No. 641 – Rental Expense

In its application, SMGV submitted an expense of \$1,487. As previously mentioned, the land rental is an affiliated transaction described in UI 246, Commission Order No. 06-017. In its memo, Staff recommended a zero expense because the underlying asset (land) had zero value based on an

assessment by the Deschutes County Assessor. The County, at that time considered the property to be common area.

However, per the Judicial Amendment to the Joint EWHOA and EWFHOA CCRs, the land (Tract A) can only be used by SMGV. If SMGV ceases to operate as a water company for a period of six months, Tract A is to be deeded to EWFHOA as common area. Further, Tract A was transferred to the affiliate at no cost. OAR 860-036-0739, Allocation of Costs by a Water Utility, requires any services provided by an affiliate to the utility to be at the affiliate's cost or market rate, whichever is lower. In this case, because the land was transferred to the affiliate (Braber Properties LLC) at no cost, the only allowable cost should be \$199, the amount of the 2007 taxes. As a result, I recommend an expense of \$199.

Although the Company does not agree with my assessment, it has for this docket, accepted the Stipulation. The Company plans to research the land costs in more detail and may present inclusion of the costs in a subsequent rate application.

The Intervenors also do not agree with, but are willing to accept, my recommendation of the \$199 expense. According to the Intervenors, even though Braber Properties LLC (Braber) holds the title to Tract A, EWFHOA is the beneficial owner of the land as a result of a lawsuit settlement. The Assessor's office was required to give the property a nominal assessment since the title has not been transferred to EWFHOA. According to the Intervenors, if title is transferred to EWFHOA with SMGV continuing to use the

Docket UW 124

Staff/100 Dougherty/15

property, SMGV will be able to use the property for water utility operations and incur no property taxes. Thus, in the view of the Intervenors, the Company is voluntarily incurring property tax expenses which are passed to customers. From the Intervenor's point of view, there is no need for SMGV to be incurring such costs since SMGV would be able to continue to use the property as it does now for no rent and no property taxes. As noted above, per the Judicial Amendment to the Joint EWHOA and EWFHOA CCRs, if SMGV ceases to operate as a water company for a period of six months, Tract A is to be deeded to EWFHOA as common area.

However, all Parties agreed to accept the \$199 rental expense in the calculation of rates.

Account No. 675 – General Expense

In its application, the Company submitted \$0.00 for general expense. I recommend including \$799 to cover Oregon Association of Water Utilities (OAWU) dues, bank charges, sanitary survey (amortized over two years), and licenses. Both the Intervenors and I had two concerns over the Company's checking account: (1) the high amount of bank charges (\$459 in rates); and (2) the account still reflects Canterbury Commercial LLC, dba Seventh Mountain Golf Village. The Intervenors recommend that the Company consider other banking institutions that have fewer charges; and that a new account be established under Pathfinder Commercial Management, the unaffiliated property manager for SMGV.

Account 408.1 - Property Tax

In its application, the Company included \$7,200 in property taxes. I recommend \$4,691, which includes \$2,819 in current 2007 taxes and \$1,872 in back taxes from the years 1997 through 2002 that were not included in rates. The background on back taxes is that on December 6, 2002, the Company received a series of letters from the Deschutes County Assessor notifying the Company that certain property was omitted from the County's tax roles from the years 1997 through 2002. According to Deschutes County, the taxes were scheduled to be added to the 2003 – 2004 tax rolls.

According to the owner of SMGV, he was not aware of these taxes as he believed these taxes were included in the Golf Course property taxes. The owner appealed the valuation of the property, which was reset at \$200,000. The lower valuation resulted in lower taxes. The following table highlights the back taxes:

Property Taxes

Year	Amount
1997	\$2,949
1998	\$3,178
1999	\$2,948
2000	\$2,788
2001	\$2,701
2002	\$2,725
Total	\$17,288

Based on a search of correspondence, it appears that Staff first became aware of the back taxes during UW 95 (Commission Order No. 04-156, dated

28 29

30

31

33

32

March 15, 2004).8 A discussion with Staff assigned to the case indicates that the taxes were not included in rates due to the appeal to the County filed by the Company's owner. In a May 27, 2004, e-mail to the Company, Staff informed SMGV that if the taxes were found to be prudent that Staff would likely recommend recovery over a longer than 12-month period.

In UW 116 (Commission Order No. 06-501, dated August 28, 2006), Staff refers to this issue of back taxes and states in testimony:

> Staff also removed \$4,973 in amortization of unpaid utility (equipment) property tax from the year 1998 through 2003. This amount of unpaid taxes, not including penalties and interest equals \$16,978. This amount and tax is distinct and distinguishable from the property tax on the real property (land) property tax. The Company claims it believed these taxes were included in the golf course taxes and paid by the Golf Course. Intervenors claim that the Company should have been aware of these taxes, and that there was a previous agreement between the Company and Intervenors that Intervenors would not pursue collection of previously unpaid golf course water charges if SMGV did not include collection from customers, the unpaid utility property back taxes.

> Since records of previous agreements were not available during settlement and additional research on this subject is required by all Parties, the Parties agreed to defer this issue until the subsequent SMGV filing for metered rates occurs. As a result, Staff adjusted out the amount submitted by the Company.

Both UW 95 and UW 116 rates included amounts for property taxes, which allowed the Company the opportunity to pay current property taxes. In UW 95, WCGC was still a customer of SMGV. In its UW 95 analysis of expenses to determine allocations between residential, commercial, and golf course customers, Staff allocated 35 percent of the property tax expense to the golf

⁸ The issue of back property taxes was not discussed in Staff's UW 95 testimony.

 course. I used this allocation to determine the amount of back property taxes that should be funded by current customers. The following table highlights my calculations.

Property Tax Allocation

Year	Amount	Residential / Commercial Allocation (UW 95) - 65%	
1997	\$2,949	\$1,917	
1998	\$3,178	\$2,065	
1999	\$2,948	\$1,916	
2000	\$2,788	\$1,806	
2001	\$2,701	\$1,755	
2002	\$2,725	\$1,771	
Total	\$17,288	\$11,230	

Because the taxes occurred over a six-year period, I recommend amortizing the taxes over a six-year period, which equals \$1,872 per year. The Parties agreed not to accrue interest to the unamortized balance. Additionally, I did not add any penalties or interest to the back taxes, as penalties and interest should be a shareholder cost.

Because the Company has settled the judgment lien with the County, all back taxes have been paid. The amortization of the allocated back taxes allows the Company to partially recover its expenditures in rates. However, a large portion of the back taxes and all interest and penalties are recommended to be shareholder funded.

Q. DID STAFF MAKE ADJUSTMENTS TO UTILITY PLANT IN SERVICE?

A. Yes. After reviewing the Application, analyzing responses to data requests, and evaluating SMGV's Plant records, I determined that the Company's Utility Plant in Service is actually \$54,210 and not \$84,666 as shown in the

Application. My amount includes the cost of new projects to be completed by July and August 2008. Additionally, based on certain other records (accountants, Deschutes County, construction data), I reset the costs of certain plant equipment to reflect as accurately as possible the costs of the equipment.

Included as part of the Stipulation, the Parties agree that existing plant and respective costs established in this docket, UW 124, will serve as a basis for subsequent rate cases.

<u>Landscaping</u>

An item that was not included in plant was proposed landscaping charges that was referenced in the UW 116 Stipulation. The Stipulation stated:

The Company agrees to work with the other Parties to the Stipulation to determine the proper timing and method to determine categorizing future landscape plant costs and operating expenses. The agreement concerning landscape issues will include a determination if these costs are Company Plant and expenses, or if SMGV's affiliate, Braber Properties LLC., assumes the costs and charges the Company for the annual maintenance cost and return on the improvement. The Parties agreed to work towards resolution of this issue amongst themselves prior to SMGV's next rate application.

Landscaping of the Company Property (Tract A) was one of many issues included in a lawsuit between EWHOA and the many entities that the owner of SMGV was previously involved in. These entities include SMGV, Yamazoe International Inc. (Yamazoe), Bernards Golf LLC, and others. Concerning the lawsuit, the "Notice of Pendency of An Action" was recorded with the Deschutes County Clerk Office on November 20, 2003. The "First Amended"

Complaint" was also signed on November 20, 2003,⁹ when the owners of SMGV also owned 100 percent of the golf course property and also were the declarant / developers of Elkai Woods (Yamazoe owned 2/3 of SMGV and the golf course property and Mr. Bernards owned 1/3 of SMGV and the golf course property). Yamazoe transferred its 2/3 interest in SMGV to Mr. Bernards in 2005 in consideration for services provided by Mr. Bernards to Yamazoe over the years.

The lawsuit between EWHOA and the various defendants primarily involved issues related to the declarant / developers' alleged failures to complete the turnover of the HOA and complete the Elkai Woods development. The lawsuit was settled in April 2005. In October 2004, the entity holding Yamazoe's 2/3's interest in the golf course property declared bankruptcy under Chapter 7.

Based on a separate agreement between BHelm LLC (purchaser of all of the golf course property in the December 2004 auction conducted by the bankruptcy trustee) and EWHOA and EWFHOA, BHelm LLC agreed to perform various items addressed in the lawsuit related to the golf club and such performance items were dropped from the lawsuit in the 3rd amended complaint. Such items did not involve or impact Tract A or SMGV. In June 2006, the bankruptcy trustee concluded his administration of the estate. After payment of all allowed secured and unsecured liabilities and all of the costs of administration, Yamazoe and Bernards received \$859,493.06 from the estate.

⁹ Various amendments to both the Notice of Pendency of An Action and Complaints were subsequently filed with the court.

The settlement of the lawsuit involved the signing of two separate settlement agreements and the filing of a Stipulated General Judgment and General Judgment of Dismissal. The Stipulated General Judgment included a Judicial Amendment to the Declaration of Covenants, Conditions & Restrictions (CCRs) for EWFHOA Recorded as Document Number 2002-65397 and EWHOA and EWFHOA Recorded as Document Number 2001-43400. Section 4.C of the Judicial Amendment states:

Tract "A" as identified on the proposed plat for Elkai Woods Phase VI shall be subject to the Declaration and shall be subject to the following restrictions: (1) assessment by the EWFHOA as if it were a single undeveloped lot within the EWFHOA development; (2) may be utilized as the site of a water company facility providing water service to Elkai Woods, the golf club and other surrounding property, whether part of Elkai Woods or not; (3) the owner or lessee of the water company site shall maintain the water company building(s) in a reasonable and attractive manner; (4) EWFHOA shall be responsible for the maintenance of the landscaping installed by the Water Company or the owner of Tract "A"; and (5) in the event that the water company ceases operation for a period of six months as a water company, Tract "A" shall be deeded to the EWFHOA as additional common area.

Although the Judicial Amendment states that SMGV will install the landscaping on Tract A, the lawsuit primarily was directed at the declarant / developers for their failure to complete the development including failure to complete the landscaping of the common areas within the development and the turnover of such common areas to the HOAs. Because the lawsuit was directed at Yamazoe and the developers, customers of SMGV should not have to pay for this landscaping. In its simplest form, Tract A is common area which

SMGV is allowed to use for the purpose of providing water to the Widgi Creek / Elkai Woods areas under the Judicial Amendment to the CCRs. If SMGV wants to pursue Yamazoe for reimbursement of the landscaping, that is a business decision for the Company. However, I do not support customers paying for this landscaping.

Although the Company does not agree with my assessment, it has for this docket accepted the Stipulation. Currently the landscaping has not been installed; however, the Company did receive three quotes for landscaping (\$13,036, \$15,685, and \$56,189). A representative from the EWFHOA has relayed to me that they are looking at a more "minimalist" approach to landscaping and believes the actual costs will be in \$4,000 - \$5,000 range. Because the Company does not agree with my analysis on the landscaping, it reserves its prerogative to address this in subsequent rate applications. Because Tract A is subject to the CCRs and EWFHOA is responsible for the maintenance of any landscaping installed on Tract A, any landscaping on Tract A requires approval by the EWFHOA board.

Meters

The UW 116 Stipulation also included a discussion of meters and stated:

The Company agrees to work with the other Parties to the Stipulation to develop a plan for the Company to assume ownership of all meters prior to meters being included in rate base. This plan will include a method to purchase meters from homeowners and contain a proper accounting of all meters demonstrating that the Company has ownership of all meters.

Based on the UW 116 Stipulation, the Company, with Staff's knowledge and concurrence, reimbursed customers the depreciated value of the meters. For most meters, the value was set at \$32 per meter. The intent was to meet the requirements of the UW 116 Stipulation. After "buying back" the meters, SMGV was to place the depreciated value in rates at \$32 and depreciate the meters over the remaining life of the meters for four years, at \$8 per year.

The Intervenors objected to this method and held on to many of the Company's checks without cashing. The Intervenors did not want the meters, which were installed by the developer and paid by customers through the purchase of their lots, to be included in rate base. In order to make the Company whole for any reimbursements of meters, the Parties stipulated to the following:

The Parties agree that the Company will charge customers for meter installations for any meters not currently installed. For meters being installed in Elkai Woods Homeowners Association and Elkai Woods Fractional Homeowners Association, SMGV will invoice the party(ies) responsible for the cost of these installations. Once purchased, customers will contribute the purchased meters to the Company as Contributions in Aid of Construction (CIAC). The Parties further agree that the Company will be reimbursed for any meters purchased or "bought back" by SMGV including commercial, irrigation, and residential meters. As a result, all meters, with the exception of the master (badger) meter, will be reflected as CIAC for ratemaking purposes.

As a result, I did not include meters in plant. Concerning new installations, invoices from the contract operator indicate that meters were included in the cost of the service connections, which the Company charged \$450 in accordance with its tariff. The Parties agreed by including meters into plant,

certain customers would be paying "twice" for meters; once from purchasing their own meter, and twice by paying a return on and recovery of meters in rate base.

To prevent any future meters from being part of rate base, the Parties agree that the Company will charge customers for meter installations for any meters not currently installed. For meters being installed in Elkai Woods Homeowners Association and Elkai Woods Fractional Homeowners Association, SMGV will invoice the party(ies) responsible for the cost of these installations. Once purchased, customers will contribute the purchased meters to the Company as Contributions in Aid of Construction (CIAC). The Parties further agree that the Company will be reimbursed for any meters purchased or "bought back" by SMGV including commercial, irrigation, and residential meters. As a result, all meters, with the exception of the master (badger) meter, will be reflected as CIAC for ratemaking purposes.

The proposed Schedule No. 2, Miscellaneous Service Charges, reflects a charge of "At cost (includes meters)" for future service connections.

Q. DID YOU MAKE ANY ADJUSTMENTS TO ACCUMULATED DEPRECIATION?

A. Yes. My calculation of Accumulated Depreciation resulted from the additions and deletions to plant and equaled \$57,545 rather than the Company proposed amount of \$63,430 shown in the Application. Staff/102, Dougherty/5 shows Staff's Plant in Service and Accumulated Depreciation calculations.

SUMMARY OF THE STIPULATION AGREED TO BY THE PARTIES

- Q. PLEASE DESCRIBE THE REVENUE REQUIREMENT STIPULATED TO BY THE PARTIES.
- A. The Stipulation is composed of Staff's recommended revenue requirement and rates, as shown in SMGV's tariffs attached to the Stipulation. The Stipulation supports an increase of \$9,301, or 15.80 percent above the Company's proposed test year revenues, for a total revenue requirement of \$68,186. In addition, the Parties stipulated to a 9.5 percent rate of return on rate base of \$58,506. The stipulated Revenue Requirement is shown in Staff/102, Dougherty/1.

Q. WHAT ARE THE STIPULATED RESIDENTIAL, COMMERCIAL AND IRRIGATION RATES?

A. The following table shows a comparison of current rates, proposed rates, and stipulated rates.

Residential	Current Flat Rate	SMGV Proposed Base Rate	Stipulated Base Rate
1" meter or smaller	\$21.14	\$22.07	\$13.86
Commercial			
1"	\$173	\$22.07	\$13.86
2"	N/A	N/A	\$27.72
Irrigation	Current Flat Rate	SMGV Proposed Base Rate	Stipulated Base Rate
1" meter or smaller	N/A	\$22.07	\$13.86

1
2
_
3
J

	SMGV Proposed	Stipulated
Commodity Rate	\$0.88 per 100 cf	\$0.59 per 100 cf

Q. DID THE PARTIES STIPULATE TO ANY CHANGES IN MISCELLANEOUS FEES?

A. Yes. As previously mentioned, the Parties agreed that the Connection Charge for new service should be at cost and include the meter. This change results from an examination of the contract operator invoices that indicate that the actual charge to the Company was less than the tariffed \$450 and actually included the cost of the meter. In addition, the Meter Test, Pressure Test, Returned-Check Charge, and the Disconnect Visit Charge were increased to \$25 from the current rates of \$20. The Company also added a Trouble-Call Charge for after normal business hours trouble-calls of \$75.

Q. DID THE PARTIES AGREE TO ANY CHANGES IN THE COMPANY'S TARIFFS?

A. Yes. Currently the EWHOA and EWFHOA make consolidated payments to the Company for all their respective members. The HOAs would like to continue this arrangement. The consolidated payments also benefit the Company because it would be receiving two monthly payments instead of a possible 86 individual checks. The Company's Rule 22 has been changed to state in part:

Bills are due and payable when rendered by deposit in the mail or other reasonable means of delivery. As near as practical, meters shall be read at monthly intervals on the corresponding day of each meter reading or billing period. The bill shall be rendered immediately thereafter.

 Concerning customers residing in the Elkai Woods Homeowners Association (EWHOA) and Elkai Woods Fractional Homeowners Association (EWFHOA), collectively the HOAs, the utility will provide copies of individual bills to customers and provide consolidated bills in order to allow the HOAs to make one consolidated payment for their respective members.

Because of the placement of meters the Company also requested a change to its Rule 19 to clarify that not all meters are between the street curb and property lines. As a result, Rule 19 has been changed to state in part:

Meters placed in service shall be adequate in size and design for the type of service, set at convenient locations, accessible to the utility, subject to the utility's control, and placed in a meter box or vault between the street curb and property line or on the customer's property. Each meter box or vault shall be provided with a suitable cover.

The Company also requested a change in its Rule 14 to allow disconnection of a customer if there is an excessive leak on the customer's side of the meter. Although this is a valid concern under a flat rate structure, customers under a metered rate have the motivation to fix excessive leaks because they are paying for all water that goes through their meter, whether it is used for intended purposes or being wasted through a leak in their lines. As a result, the Parties agreed not to change Rule 14.

Q. DID THE PARTIES AGREE TO ANYTHING ELSE IN THE STIPULATION?

- A. Yes. The Parties also stipulated to the following, many which have been previously addressed in testimony.
 - The Parties support the Company rates set forth in tariff sheets PUC
 Oregon No. 3, Original Sheet No. 3, Schedule No. 1 and Original Sheet
 No. 4, Schedule No. 2 to become effective September 1, 2008. The

1 Compa 2 for the 3 custon

Company shall read meters on September 1, 2008, to establish a basis for the October 2008 charges to customers. The amount to be charged customers at the beginning of October 2008 will be the base rate for September 2008 plus the amount for September 2008 water usage.

- 2. The Parties agree to support the Company charging customers for meter installations for any meters not currently installed. For meters being installed in Elkai Woods Homeowners Association and Elkai Woods Fractional Homeowners Association, SMGV will invoice the party(ies) responsible for the cost of these installations. Once purchased, customers will contribute the purchased meters to the Company as Contributions in Aid of Construction (CIAC). The Parties further agree to support the Company reimbursement for any meters purchased or "bought back" by SMGV including commercial, irrigation, and residential meters. As a result, all meters, with the exception of the master (badger) meter, will be reflected as CIAC for ratemaking purposes.
- The Parties agree that all required irrigation meters that are not presently in place will be installed by August 1, 2008.
- 4. The Parties agree that existing plant and respective costs established in this docket, UW 124, will serve as a basis for subsequent rate cases.
- The Parties agree that the portion of the plant property taxes for the years
 1997 through 2002 (minus any penalties and interest) included in the

determination of the Revenue Requirement equaling \$68,186 will be amortized into rates over a six-year period.

- 6. The Company agrees to pay plant property taxes on a timely basis. Staff agrees to audit the Company's property tax payments for three consecutive years starting with the 2008 / 2009 plant property tax that will come due in the November 2008 time frame.
- The Company agrees to file its next rate application during the first six months of 2011 using a 2010 test year.

Q. ARE THESE PROVISIONS OF THE STIPULATION REASONABLE?

A. Yes. The provisions of the Stipulation are reasonable.

Q. PLEASE DISCUSS IN MORE DETAIL THE TIMING OF RATES.

A. While customers were to be invoiced a flat rate at the beginning of each quarter (in advance for that quarter) under UW 116, during 2007, the Company switched to billing customers in advance at the beginning of each month. As a result, the flat rate covering August 2008, the last month under UW 116, will have been invoiced in advance at the beginning of August. The Company will read meters on September 1, 2008 to establish the beginning point for the new rate structure. The base rate for September 2008 and for commodity usage for September 2008 will be invoiced at the beginning of October 2008. Going forward, the Company and customers agreed to work together to enable the Company, to the extent possible, to send memo invoices to EWFHOA and EWHOA customers via e-mail.

Q. PLEASE EXPLAIN WHY THE LANGUAGE FOR EWHOA AND EWFHOA METERS ON NUMBER 2 OF THE STIPULATED ITEMS IS DIFFERENT FOR OTHER CUSTOMERS OF SMGV AND WHETHER THERE ARE ANY OTHER SPECIFIC ISSUES RELATED TO CHARGING CUSTOMERS FOR METERS THAT SHOULD BE ADDRESSED.

A. The settlement of the lawsuit between EWHOA and various defendants including SMGV specifically addresses the party(ies) responsible for the cost of installing meters in the EWHOA section and meters serving one building in the EWFHOA section. Accordingly, the party(ies) responsible for the cost of installing such meters will be invoiced by SMGV in accordance with the provisions of the settlement of the lawsuit.

UW 55, Order No 97-291 entered August 4, 1997, provided for a refund to customers of \$21,081 before certain adjustments for advances made by Yamazoe and for the commercial customer's portion of the refund. After these adjustments, the 31 residential customers were to receive a refund of \$16,750 (\$540 per customer) of which \$200 per customer was to be used to prepay for the installation of meters for their lots and the remaining \$340 per customer was to be refunded to the customers via a credit against future charges for water. Upon installation, the meters would be contributed to SMGV and accounted for as CIAC. Because the meters for these lots have been paid for via the UW 55 refund, SMGV should not again charge the past or current owners of the 31 lots for any meters subsequently installed by SMGV on the 31 lots.

Q. ARE THE NEW RATES JUST AND REASONABLE?

A. Yes. Based on Staff's investigation and the documented costs provided by SMGV, Staff believes the proposed new revenue requirement generates rates that are just and reasonable.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY IN SUPPORT OF THE STIPULATION?

A. Yes.
