I. CONTRACT ANALYSIS

- a. Please provide the rationale and justification for creating a special class of service. The rationale must include a discussion as to why no previously approved class of service (contract or tariff) is acceptable to the Customer for whom the utility proposes a special class of service. Determination of a special class of service must be based on the following:

The quantity of service used, the time when used, the purpose for which used, the existence of price competition or a service alternative, the services being provided, the conditions of service, or any other reasonable consideration.

Answer:

Current tariffs for services included in the contract do not provide pricing recognizing this customer's volume of service and commitment to retain service across CenturyLink's territory. The total volume of facilities being ordered by the customer justifies going beyond the standard terms offered in the tariff for similar services. Competitive alternatives such as resale of CenturyLink QC service are available to customers.

- b. The number of similarly situated Customers who should receive the same terms and conditions. Also, include the number of billing units for those Customers.

Answer:

All similarly situated customers should receive the same terms and conditions.

- c. If there are other similarly situated Customers who should not receive the same terms and conditions, explain the differences between those Customers and the special contract Customer.

Answer:

Not applicable; all similarly situated customers should receive the same offer.

- d. Summarize termination clause in the contract that protects CenturyLink if the customer stops the service early and CenturyLink does not recover initial costs.

Answer:

Termination Liability applies per the Oregon QC Exchange and Network Services Price List.

Filing Concurrence

CenturyLink may be required to submit this Agreement and any subsequent addenda for ISDN PRS to certain regulatory agencies for approval because the rates and some terms in this Agreement are being offered on an individual case basis ("ICB"). The ISDN PRS rates on this Exhibit 1 and the terms in ISDN PRS Section of this Agreement require filing with or approval by regulatory agencies ("ICB Terms"). Although the general terms and conditions of this Agreement are effective on the Effective Date, the ICB Terms will not become effective for a given jurisdiction until the filing and approval requirements for that jurisdiction are fulfilled. Service will be offered in accordance with the applicable Tariff until the ICB Terms become effective. If Customer receives reduced pricing under this Agreement and a regulatory agency later invalidates the ICB Terms after they had become effective, Customer will pay to CenturyLink any difference in the amounts listed in the applicable Tariff for ISDN PRS and the amounts Customer was charged for ISDN PRS. When approved by the regulatory agencies, Customer may add additional quantities of ISDN PRS pursuant to the Service Changes Section under the same terms and conditions with no further filing required. If a regulatory agency does not approve this Agreement, the parties will enter into good faith negotiations to mutually resolve the failure to receive the necessary approval. This Agreement will remain in full force and effect for ISDN PRS in all other jurisdictions.
