9.1 DESCRIPTION

Centrex is a business communications system furnished only from a suitably equipped central office and is offered subject to the availability of facilities and applicable generic feature programs. It is a central office based service arrangement. A group of station lines is translated for an individual customer group and provides common access to a predetermined group of system features. Access to and/or from the public network from the station lines is provided via controlled access. The customer chooses the level of unblocked access desired to and from the general network.

Centrex enables stations to dial each other within their customer group and to dial outgoing calls directly. Direct inward calls may be dialed directly to any station. Incoming calls to the main listed number for the service are connected to a designated station and then may be transferred to the party by operation of the call transfer feature.

TERMS AND CONDITIONS

- A. Centrex is offered for a minimum period of one month.
- B. For purposes of applying Centrex rates and charges, a Customer Group shares a common dialing plan with a single billing entity responsible for payment of Company rates and charges.
- C. Centrex Service and features are provided up to the network demarcation at rates and charges specified herein. The customer will be responsible for the provision of all wire terminal equipment, and/or cable facilities on the customer's side of the network demarcation. Any such facilities installed or provided by the Company will be provided on a time and material basis. Terminal equipment provided by the customer must be compatible with the operating characteristics of facilities used for the provision of Centrex Service.
- D. Private Line charges apply if facilities are required to provision a channel termination located in a different central office exchange area than the one in which the dial switching equipment is located.
