ORDER

DISPOSITION: APPLICATION APPROVED

On January 30, 2002, Springfield Utility Board (SUB) filed an application with the Public Utility Commission of Oregon (Commission) requesting allocation of exclusive rights to provide electricity service to unserved territory adjacent to SUB’s existing territory. On August 22, 2006, SUB filed an amended application. A general description of the property is attached as Appendix A and is incorporated by reference.

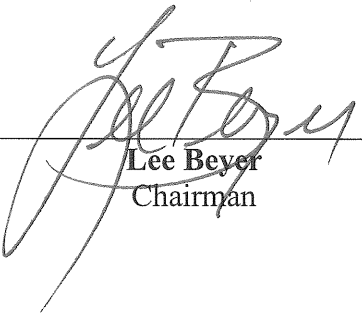

The original application requested allocation of exclusive rights to unserved territory adjacent to SUB’s existing territory. This created a competitive application with an application by Emerald People’s Utility District (Emerald), docket UA 92, for exclusive rights to territory currently being served. Following litigation between SUB and Emerald, the parties settled the matter through an Intergovernmental Agreement. Each party then withdrew opposition to the other party’s territory allocation application.

Commission Staff finds that SUB can economically provide service to the territories because its provision of exclusive electric utility service within those areas will prevent the duplication of facilities. The territory allocation modifications are acceptable and not contrary to the public interest.

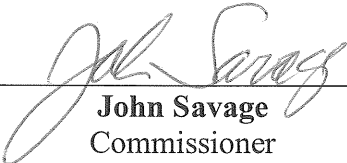

ORDER

IT IS ORDERED that the amended application filed by Springfield Utility Board for rights to exclusively served territory and adjacent unserved territory, which will become a part of its exclusive service territory, is approved.
