REGULAR _____ CONSENT X EFFECTIVE DATE October 1, 2013

SUBJECT: PORTLAND GENERAL ELECTRIC: (Docket No. UM 1561(7)) Updates the company's non-firm avoided cost information for the fourth quarter 2013.

STAFF RECOMMENDATION:

Staff recommends that the Commission approve Portland General Electric's (PGE) fourth quarter 2013 non-firm avoided energy costs.

DISCUSSION:

OAR 860-029-0080(4) requires electric utilities contracting to buy non-firm power from a Public Utility Regulatory Policies Act (PURPA) qualifying facility (QF) to submit quarterly filings of non-firm avoidable energy costs. PGE filed its non-firm avoided costs for the fourth quarter of 2013 on August 15, 2013. These avoided costs represent the amount PGE will pay for energy deliveries in excess of 110 percent of the delivery schedule for a QF. The Covanta Marion solid waste facility in Brooks, Oregon, has received payments based on the quarterly non-firm avoided energy costs in the past when its energy delivery to PGE has exceeded 110 percent of the scheduled amounts. Covanta Marion is likely to deliver excess power during the fourth quarter of 2013 and throughout the remaining term of the contract, which expires in 2014.

PGE's fourth quarter non-firm avoidable energy costs are 3.768 cents per kWh for on-peak power and 3.288 cents per kWh for off-peak power. These costs were developed from the Company's forward market price curves at the time of the filing, and include transmission costs and line losses.

In comparison, PGE's fixed price option firm avoided costs for small QFs for the fourth quarter of 2013 are currently 3.943 cents per kWh on-peak and 3.426 cents per kWh off-peak.

Staff has reviewed PGE's non-firm avoided energy costs for the fourth quarter of 2013, and finds the estimates consistent with current forward market price curves.

PROPOSED COMMISSION MOTION:

PGE's non-firm avoided energy costs for the fourth quarter of 2013 be approved.
