

ORDER NO. 17 305

ENTERED AUG 10 2017

**BEFORE THE PUBLIC UTILITY COMMISSION
OF OREGON**

UM 1483(7)

In the Matter of

PACIFICORP, dba PACIFIC POWER,

Request for Reauthorization of to Defer Costs
Associated with the Oregon Solar Incentive
Program.

ORDER

DISPOSITION: STAFF'S RECOMMENDATION ADOPTED

At its public meeting on August 8, 2017, the Public Utility Commission of Oregon adopted Staff's recommendation in this matter. The Staff Report with the recommendation is attached as Appendix A.

BY THE COMMISSION:

Michael Dougherty
Chief Operating Officer

A party may request rehearing or reconsideration of this order under ORS 756.561. A request for rehearing or reconsideration must be filed with the Commission within 60 days of the date of service of this order. The request must comply with the requirements in OAR 860-001-0720. A copy of the request must also be served on each party to the proceedings as provided in OAR 860-001-0180(2). A party may appeal this order by filing a petition for review with the Circuit Court for Marion County in compliance with ORS 183.484.

ITEM NO. CA9

PUBLIC UTILITY COMMISSION OF OREGON
 STAFF REPORT
 PUBLIC MEETING DATE: August 8, 2017

REGULAR CONSENT EFFECTIVE DATE May 19, 2017

DATE: August 1, 2017

TO: Public Utility Commission

FROM: Mitchell Moore ^{mm}

THROUGH: Jason Eisdorfer and Marc Hellman ^{JE} ^{MH}

SUBJECT: PACIFIC POWER: (Docket No. UM 1483(7)) Requests reauthorization to defer costs associated with the Oregon Solar Incentive Program.

STAFF RECOMMENDATION:

Staff recommends the Commission approve Pacific Power's (Pacific, PacifiCorp, or Company) request for reauthorization to defer costs associated with the Oregon Solar Incentive Program (OSIP) for 12 months beginning May 19, 2017.

DISCUSSION:

Issue

Whether the Commission should reauthorize deferral of costs associated with the OSIP.

Applicable Law

Pursuant to ORS 757.365(10) all prudently-incurred costs associated with compliance with ORS 757.365 (pilot program for small solar energy systems) are recoverable in the utility's rates. Under ORS 469A.120(1) and (3), all prudently incurred costs associated with the renewable portfolio standards are recovered through an automatic adjustment clause. ORS 757.259 and OAR 860-027-0300 are the laws that concern deferrals and the automatic adjustment mechanism.

The Company makes this filing pursuant to ORS 757.365(10), 469A.120(1) and (3), or 757.259 and OAR 860-027-0300. Deferral of these OSIP costs was originally granted by the Commission in Order No. 11-021 and has been annually reauthorized, most recently by Order No. 16-411.

Discussion and Analysis

Pacific Power requests reauthorization to defer the costs and expenses associated with the photovoltaic feed-in tariff pilot program, including payments to owners of qualified systems for generation (i.e. a volumetric incentive rate) and costs associated with the administration of the pilot program. The Company will seek amortization of the deferred amount in a future Commission proceeding. This deferral is necessary to allow the Company to recover costs associated with compliance with ORS 757.365, as allowed by ORS 757.365(10).

Although the OSIP is now closed to new participants, the program was designed to provide payments to participating customers for 15 years at a specified volumetric incentive rate. Therefore, the Company has indicated that there will be costs directly associated with this program through 2032, 15 years after the last project is completed and began receiving payments.

Description of Expense:

The expense to be deferred includes the prudently incurred incremental costs to administer the program, including payments to participants in the program.

Reason for Deferral:

The incremental costs associated with compliance with ORS 757.365 are not currently included in rates. As the statute provides that prudently incurred costs associated with compliance with the statute are recoverable in rates, the deferral is necessary to accomplish that outcome.

Proposed Accounting:

The Company proposes to continue accounting for the deferred costs of the program by recording the deferral in specific subaccounts of FERC Account 182.3 Other Regulatory Assets pursuant to the accounting conditions required by Order No 11-021. Absent Commission approval of this application, the Company would not normally incur the costs for the program. Were such costs incurred, they would be recorded in FERC Account 908, Customer Assistance Expenses.

Estimate of Amounts:

For the program year through April 2017, Pacific has deferred approximately \$1.8 million of costs associated with the program. The Company estimates that the costs for this deferral period may range from \$4.5 million to \$4.9 million. Changes in the incentive rate established by the Commission, as well as differences between actual

PAC UM 1483(7)
August 1, 2017
Page 3

and projected generation due to the timing of project interconnection, may affect this estimate.

Information Related to Future Amortization:

- Earnings review – Pursuant to ORS 757.259(5), amortization of this deferral does not require an earnings review as it is subject to an automatic adjustment clause under ORS 757.210(1). See also OAR 860-084-0060 and ORS 469A.120.
- Prudence Review – A review to determine that costs were prudently incurred must be done prior to amortization. The review should include the verification of the accounting methodology used to determine the final amortization balance.
- Sharing – This deferral is not subject to a sharing mechanism.
- Rate Spread/Design – On September 30, 2011, Pacific filed an application to establish a cost allocation methodology for amortization of the Oregon Solar Incentive Program costs, which was docketed as UE 240. Subsequent to the filing, Staff, the Citizens' Utility Board (CUB), and the Industrial Customers of Northwest Utilities (ICNU) (UE 240 Parties) reached agreement and Pacific withdrew the application.

The UE 240 Parties agreed to support allocation to all customer classes based on an equal percent of generation revenue applied on a cents per kilowatt-hour (kWh) basis for the 2011 Amortization Period, consistent with the approved generation allocation from Pacific's last general rate case.

In previous comments to the Commission, ICNU opposed allocating the incentive portion of the OSIP costs on an equal percent of generation revenue applied on a cents per kWh basis. ICNU did not oppose this allocation for the 2011 Amortization Period, but ICNU has reserved the right to challenge this cost allocation in a future proceeding regarding solar incentive costs. Pacific, CUB, and Staff do not oppose ICNU raising its cost allocation arguments in a future proceeding.

- Three Percent Test (ORS 757.259(6)) – The three percent test measures the annual overall average effect on customer rates resulting from deferral amortizations. The three percent test limits (exceptions at ORS 757.259(7) and (8)) the aggregated deferral amortizations during a 12-month period to no more than three percent of the utility's gross revenues for the preceding year. Because Pacific is an electric utility, ORS 757.259(8) allows the Commission to

PAC UM 1483(7)
August 1, 2017
Page 4

consider up to a six percent limit. The limit for these deferrals will be determined at the time of amortization.

Conclusion

As Pacific Power's application to defer is appropriately made under the statutes, and the application meets the requirements of OAR 860-027-0300, Staff recommends approval with the condition that Pacific's accounting and reporting of incremental program costs and credits continue to be done as specified in Appendix A to Order No. 11-021.

PROPOSED COMMISSION MOTION:

Approve Pacific Power's application pursuant to ORS 757.259, 757.365(10), and 469A.120(1) and (3), subject to the same conditions required by Order No. 11-021, for the 12 months beginning May 19, 2017.
