

**BEFORE THE PUBLIC UTILITY COMMISSION
OF OREGON**

UM 1908, UM 2206

In the Matter of

LUMEN TECHNOLOGIES,¹

Proposed Commission Action Pursuant to
ORS 756.515 to Suspend and Investigate
Price Plan (UM 1908), and

QWEST CORPORATION,

Investigation Regarding the Provision of
Service in Jacksonville, Oregon and
Surrounding Areas (UM 2206).

Hearing on Orders No. 22-340 and 22-422.

ORDER

DISPOSITION: STAFF'S RECOMMENDATION ADOPTED AS MODIFIED

This order memorializes our decision, made and effective at our September 21, 2023 Regular Public Meeting, to adopt Staff's recommendation in this matter with the modifications discussed below. The Staff Report with the recommendation is attached as Appendix A.

In addition to the questions proposed by Staff in the Staff Report, we adopt the recommendation of the Oregon Citizens' Utility Board to require Lumen Technologies (Lumen) to describe how it is complying with each requirement of Order Nos. 22-340 and 22-422 related to the September 2 and September 3 outages and to provide supporting documentation.² We also direct Lumen to respond to the proposal made by Priscilla Weaver at the public meeting regarding a Jackson-area outage triage process, as outlined in Appendix B. We further direct Lumen to provide updated call logs that include information for September 7, 2023.

Regarding the deadline for the assessment and any responses to it, we understand that the outage issues in Jackson and addressing those issues with Lumen have been a long process. While we appreciate the frustrations and concerns raised in the comments, we

¹ Formerly known as Qwest Corporation, United Telephone Company of the Northwest, CenturyTel of Oregon, and CenturyTel of Eastern Oregon.

² CUB Comments at 2 (Sept. 20, 2023).

find that a slightly longer timeframe for Lumen to respond will ensure that Lumen has sufficient time to adequately respond to all the directives of this order. We direct Lumen to provide the assessment and all the components outlined at the public meeting and in this order by October 23, 2023. Public comments on Lumen's assessment are due by October 31, 2023, and Staff will submit a memorandum and recommendation for the public meeting scheduled for November 16, 2023.

Made, entered, and effective Sep 28 2023.

Megan W. Decker

Letha Tawney
Commissioner

Mark R. Thompson
Commissioner

A party may request rehearing or reconsideration of this order under ORS 756.561. A request for rehearing or reconsideration must be filed with the Commission within 60 days of the date of service of this order. The request must comply with the requirements in OAR 860-001-0720. A copy of the request must also be served on each party to the proceedings as provided in OAR 860-001-0180(2). A party may appeal this order by filing a petition for review with the Circuit Court for Marion County in compliance with ORS 183.484.

ITEM NO. RA3

**PUBLIC UTILITY COMMISSION OF OREGON
STAFF REPORT
PUBLIC MEETING DATE: September 21, 2023**

REGULAR X **CONSENT** **EFFECTIVE DATE** _____

DATE: September 18, 2023

TO: Public Utility Commission

FROM: Russ Beitzel, Joseph Bartholomew, and Melissa Nottingham **SIGNED**

THROUGH: Bryan Conway and Marc Hellman

SUBJECT: LUMEN dba CENTURYLINK:
(Docket No. UM 1908/UM 2206)
Report on Recent Outages in Jacksonville and recommended PUC action

STAFF RECOMMENDATION:

Staff recommends the Commission direct CenturyLink¹ to provide a post-incident assessment by October 21, 2023.

DISCUSSION:

Issue

Whether Lumen complied with applicable orders during the September 2nd and 3rd outages, and whether the Company should be required to take additional actions to ensure customer safety.

Applicable Rule or Law

A telecommunications utility is obligated to afford safe and adequate services. Under ORS 759.506(1), a telecommunications utility with allocated territory is obligated to “[p]rovide adequate and safe service to the customers of this state.”

¹ Formerly known as Qwest Corporation, United Telephone Company of the Northwest, CenturyTel of Oregon, and CenturyTel of Eastern Oregon.

Docket No. UM 1908/2206
September 18, 2023
Page 2

OAR 860-023-0005 provides: “Each energy utility, large telecommunications utility, and intrastate toll service provider must have and maintain its entire plant and system in such condition that it will furnish safe, adequate, and reasonably continuous service.”

Under ORS 756.040(1), the Commission’s general powers and duties include the obligation to obtain for the customer of telecommunications utility “adequate service at fair and reasonable rates.” To this end, “[t]he commission is vested with power and jurisdiction to supervise and regulate every public utility and telecommunications utility in this state, and to do all things necessary and convenient in the exercise of such power and jurisdiction.” ORS 756.040(2).

Order No. 22-340, as modified by Order No. 22-422 and affirmed in Order No.23-109, requires the utility to address all tickets and make repairs to the within 48 hours of the creation of the ticket. The Order additionally requires the Company to provide a customer support line to the customers in the Jacksonville/Little Applegate area which allows reporting of service issues for multiple addresses.

Analysis

Background

On December 14, 2021, at the Oregon Public Utility Commission Public Meeting, the Commission adopted Staff’s recommendation in Docket No. UM 2206 under Order No. 21-470 to open an investigation into the un-reliable telephone services provided by CenturyLink for Jacksonville, Oregon and surrounding areas. UM 2206 was latter consolidated with UM 1908. Staff received numerous complaints in the UM 1908 docket regarding an outage impacting customers in the Little Applegate/Jacksonville area. Because of the history of service quality issues and role of landlines in protecting health and safety of the community, Staff was compelled to investigate these complaints further to ensure compliance with applicable Commission orders.

September Assessment

On Saturday, September 2, 2023, Staff and Consumer Services began receiving multiple emails from customers residing in the Little Applegate area of Jacksonville. Customers reported an outage beginning on September 2, and a subsequent outage on September 3. Customers whose service was restored after the September 2nd outage

Docket No. UM 1908/2206
September 18, 2023
Page 3

were again without telephone service. Order No. 22-340,² requires the company to allow customers to report multiple outages, and Lumen must address each outage ticket within 48 hours.³

Customers had several complaints including commitment times provided by the company exceeding 48 hours and customers being unable to report multiple outage tickets for neighbors when contacting the dedicated phone line. Customers reported that Lumen employees were not aware of any other outages in the area, could not explain the extended commitment dates, and were unaware the September 3 outage was due to catastrophic damage to equipment.

Attachment A provides redacted summary of the customer complaints received by Consumer Services. The table demonstrates when the outage began, the commitment date provided by Lumen, the restoration date, if the customer attempted to report multiple outages, and if the company was aware of an outage in the area. If the customer did not provide the information to Consumer Services, it is marked as unknown. If the customer was part of both outages, a semi-colon differentiates between the September 2 and September outages. Consumer Services began working with Lumen to address these complaints as they were received.

On September 6, 2023, Lumen, and Staff met to discuss the outages that occurred starting September 2, 2023. Staff received information on two separate outages occurring on September 2, 2023, and the September 3, 2023, respectively.

September Outages

The first outage began the afternoon of September 2, 2023, and was reported by a customer directly to a Lumen repair technician. The technician began troubleshooting the issue and narrowed the cause to out of balance Terminal (T1) spans in the Jacksonville central office. The technician contacted Lumen's switching surveillance group, and attempted to remotely restore the T1 spans. The remote restoration was not successful, and the technician manually reset the T1 spans, and service was restored around 8:00 pm, September 2, 2023.

The September 3, 2023 outage was the result of vehicle accident near the intersection of Oregon Hwy 238 and Pair-A-Dice Ranch Road west of Jacksonville. The vehicle struck and destroyed a telecom cabinet.⁴ The cabinet houses feeder cables from the central office to the customers on Upper and Little Applegate Road and surrounding

Page 4

areas. Technicians first isolated the T1 span cables and placed temporary splices for those circuits. The next step was to identify working pairs and begin splicing operations of working circuits on the cables damaged by the vehicle. A new cabinet was installed and the work of making permanent repairs to the temporary splices was completed. Due to the extent of the damage and the complexity of the repairs, intermittent service disruptions were unavoidable as temporary splices were removed and cut over to the permanent fix.

On Wednesday afternoon, September 6, 2023, Lumen's corporate communications posted information regarding the outages on Twitter/X and Facebook. As of Thursday, September 7, 2023, Lumen's local field operations group reported that all customers were restored and repairs complete.

On September 8, 2023, Consumer Services was notified by a customer in the area, the telephone service was not restored on the 7th and remained out of service. A new outage ticket was issued on the 8th at 1:50 pm with a commitment date of September 13th. The customer reported the telephone service, to his knowledge, was not operational since September 2, 2023. On September 11, 2023, Lumen investigated the customer's outage and reported the "system was busy at the switch." Although a technician was dispatched to the customer's home, ultimately, the issue was resolved by a technician at the Central Office. The customer reported the phone service was operational on September 11th at 2:22pm.

Only the September 3 outage persisted for over 48 hours. Under OAR 860-023-0055(h), uncontrollable events, including negligent or willful misconduct by third parties, constitute "Force Majeure."⁵ Staff does not believe that the Commission intended the 48 hour repair time frame articulated in Order No. 22-340 to apply in a force majeure situation.

Conclusion

Staff found that any Lumen non-compliance with Order No. 22-340 is excused by force majeure. Nevertheless, Staff is concerned with how this outage was communicated to the public, the repair timelines provided to customers, and with reports that the dedicated customer line was not working as intended with respect to customers being allowed to report outages for multiple addresses. Since the safety of this community is so directly tied to its landline service, Lumen has a heightened requirement to communicate with its customers and provide avenues for its customers to communicate with the Company. In this vein Staff believes that a post-incident assessment is appropriate to pinpoint the hurdles to effective customer communication and identify

⁵ [OAR 860-023-0055](#).

Docket No. UM 1908/2206
September 18, 2023
Page 5

strategies for mitigating those hurdles during future outages. Specifically, the Company should address the following:

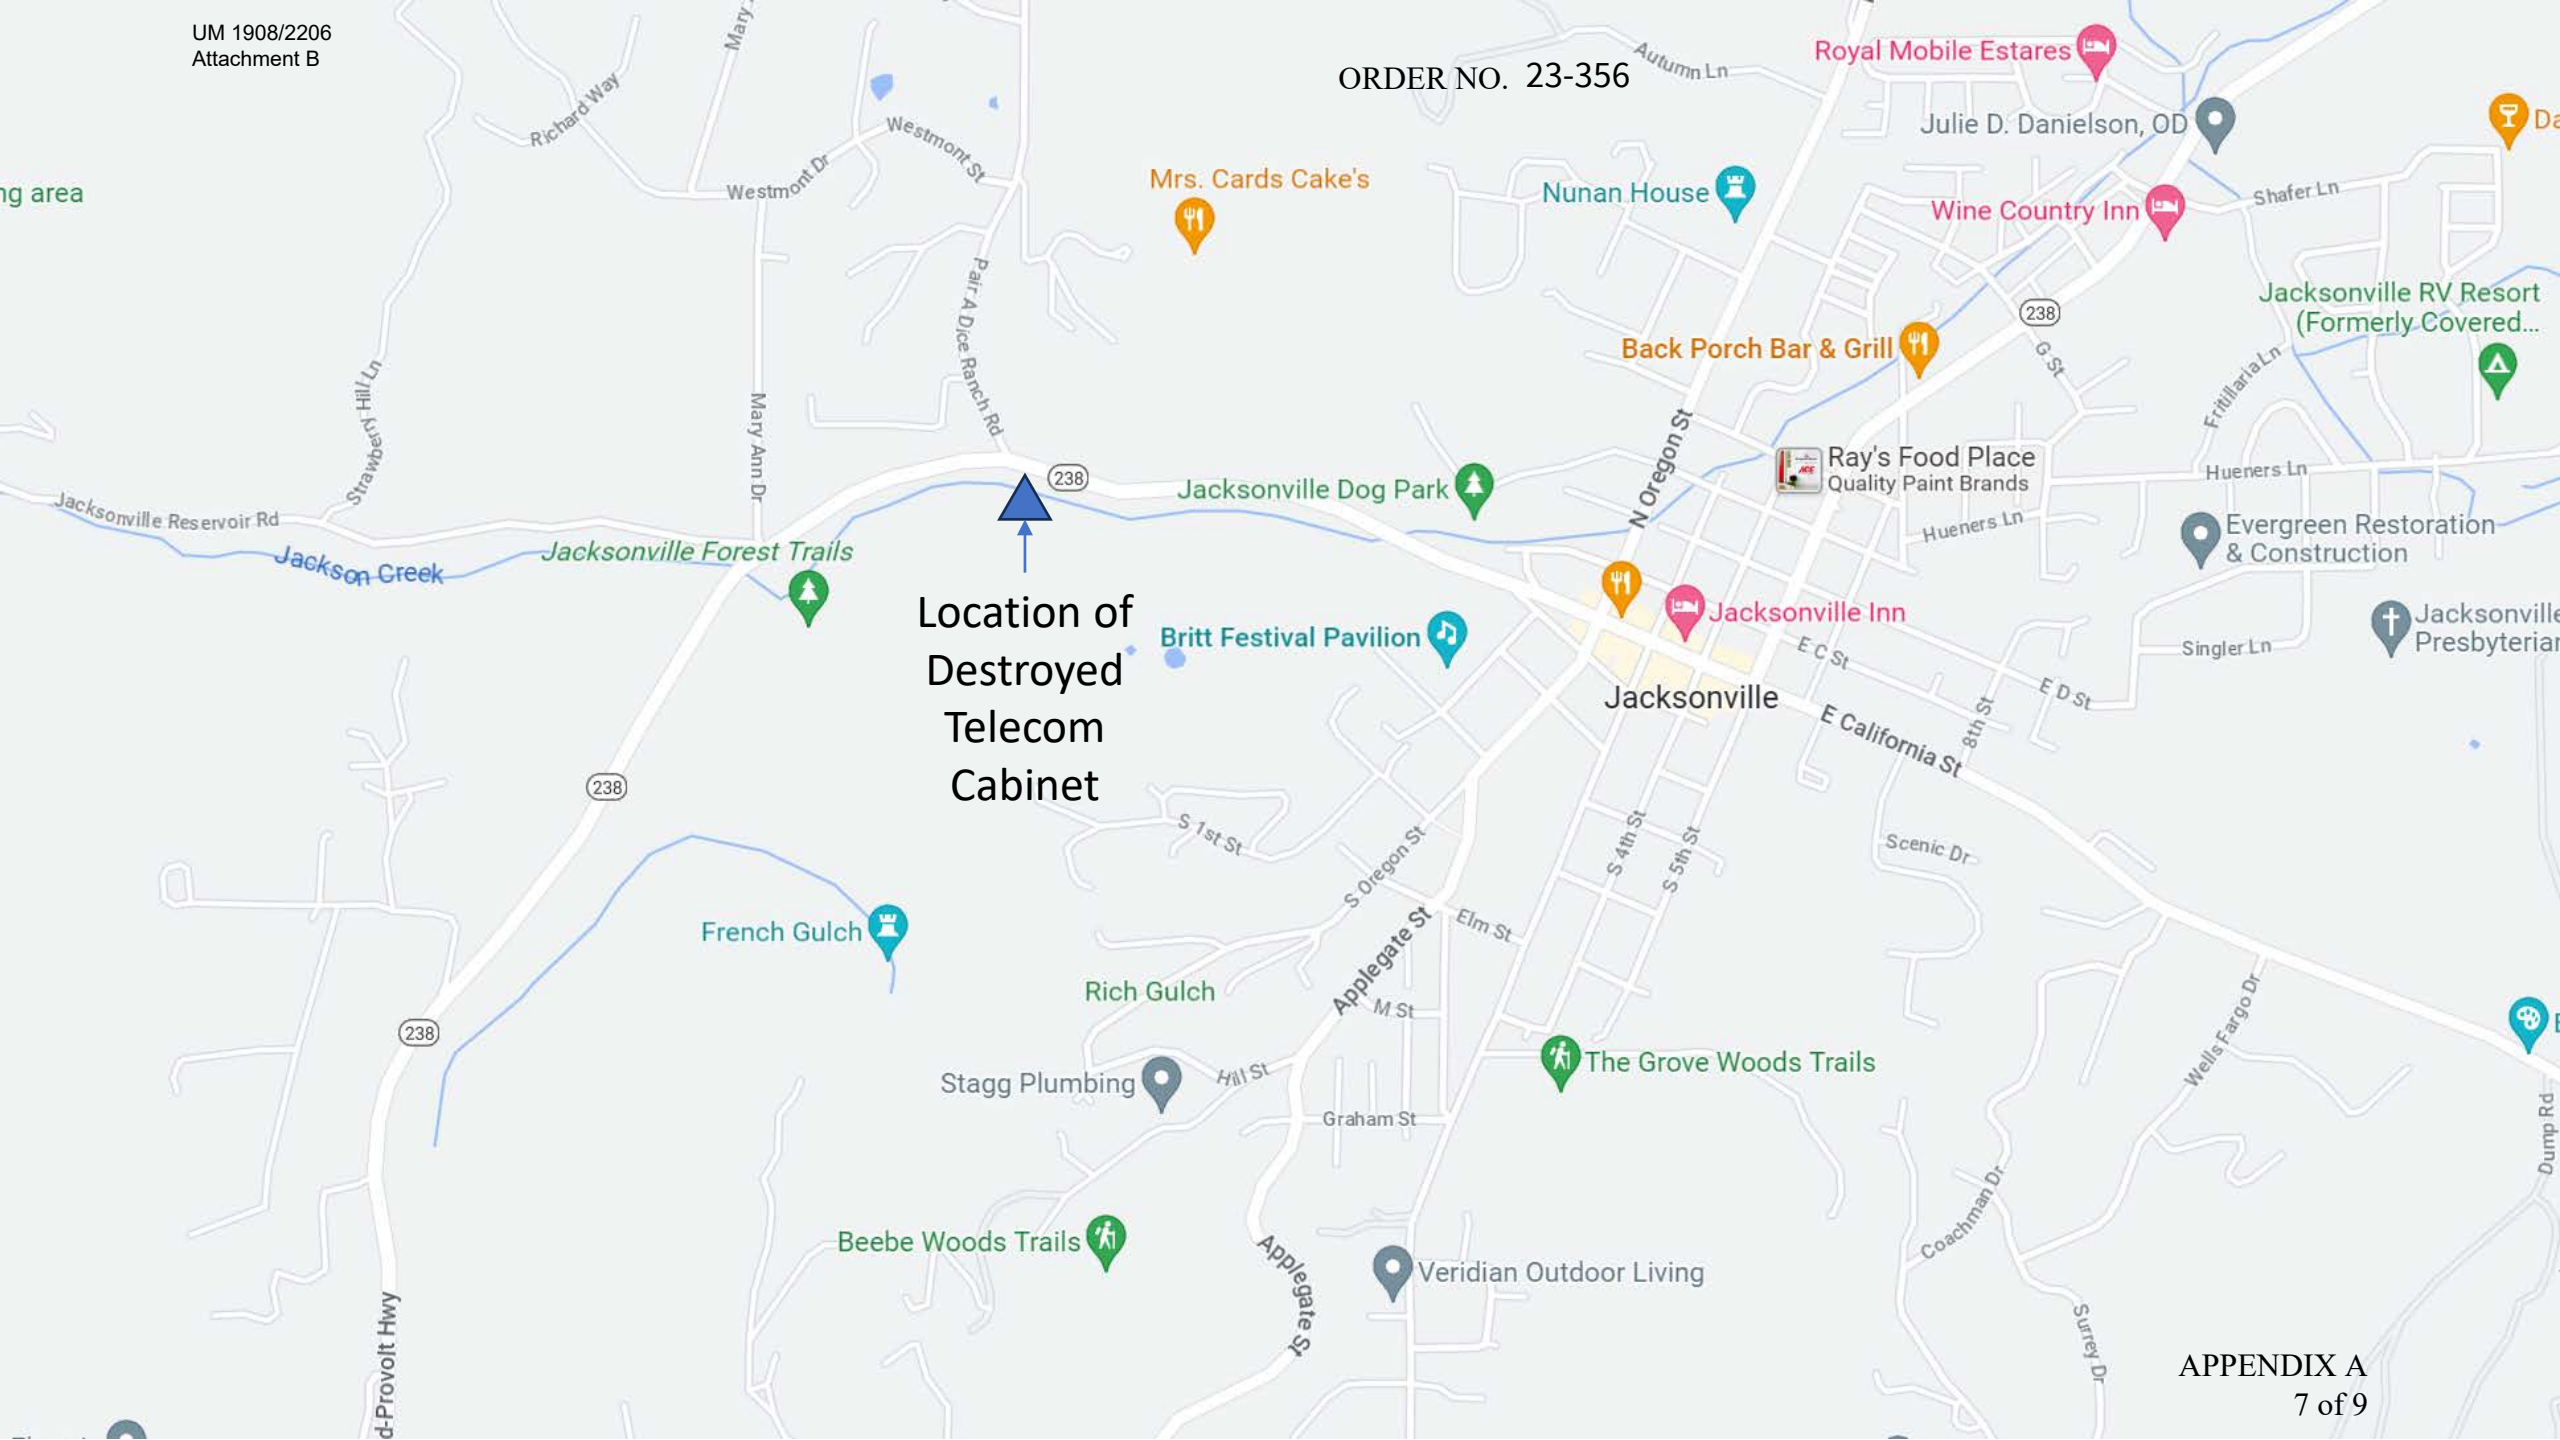

- Were customers allowed to report an outage for multiple addresses to the dedicated support line? If not, what caused the issue?
- Were customers communicated with on a timeline and in a manner consistent with Lumen policies?
- What challenges were experienced in attempting to disseminate outage information to customers? How can these challenges be addressed or overcome?

PROPOSED COMMISSION MOTION:

Direct Lumen to provide a post-incident assessment reviewing communication challenges and recommending improvements to benefit customers by October 21, 2023.

Priscilla Weaver, CL customer and intervenor: Okay, I actually have what I think would be a solution that could be implemented today.

No more assessments. You decide how to fine them or punish them for the violations that undeniably have been occurring.

Ok, you decide that. But here's what can work. I was so frustrated this time that on I think it was the third-- Sunday this September third, when we were still out. I actually think we didn't come back on until Sunday night. But you know I don't care, because it made the forty-eight hour, anyway. So on Sunday, September third, I actually in the morning, when our phones were out, I actually started. No, it was in the afternoon. I'm sorry Sunday afternoon. Okay, I have an emergency phone list that we use to try to find each other when there's a fire or something, and our phones are working.

So I started calling, and this is in a comment that I submitted on September seventh. It's already part of the record, and I-- not the first-- I dial thirty-nine different numbers on our street Little Applegate, and the adjacent street Sterling, where the (inaudible)

Thirty-nine people got busy signals. Thirty-nine. It's a fast busy signal when our phones aren't working-- CenturyLink may not know that, but I'm letting them know that now.

The other way we know is sometimes the call goes immediately to our voicemails, and that's how we know the other person's line is out, and there may be other ways. Thirty-nine fast busy signals. That's even more than six.

Okay. So if CenturyLink would take that dedicated number that they gave us and have it answered by somebody with the authority to do two little things.

That person should start the conversation by saying, "Hi! This is CenturyLink. I'm sorry you are having an outage. Can I have your address and name?" And they've got it. They have a list of all this. Okay? The next question out of that operator's mouth should be: "Are there other people in your area that are already experiencing an outage." If the answer is yes, operator then immediately picks up the phone, says, "Please stay on the line," picks up the phone and calls whoever that-- What was it? Whoever that team in the field is who has the authority to prioritize, prioritize and assign the ticket. Immediately.

Okay, we don't sit on a desk until we get six or seven, and we don't send it to the dispatch. We don't send it every day. (inaudible) None of this stuff.

That's what happens if the customer happens to know that other people are out.

If the customer-- and sending it right to that person who has the authority to send a technician right away--

and I think, CenturyLink can figure out how to how to give that operator the authority to make that call. It's one phone call.

What if the customer says "I don't know if anybody else is out, you know I can't call them to find out my phone's not working." Okay, If the customer says I don't know, or if the operator wants to confirm that the customer is telling the truth, all the other operator has to do is type in the name of the street, like little Applegate Road. If I call and say sixty-two sixty-eight Little Applegate is out, all she has to do is call up that other number. Okay. Some-- anybody's-- any of my neighbors and dial it, and if she gets a fast busy signal or she goes immediately to voicemail then that operator knows that's two, okay? And (inaudible) can pick up the phone and she can call the field team and initiate an immediate repair.

There's a third way. All three of these don't require anything except the authority for that operator to do two things. Check and send.

She could also say, and I think this would be really in compliance with your order. This is a call from the area that gets special protection. There's been order protecting you so that people don't die. I'm going to send this right now to the field team in your area. Okay. And they're going to investigate. And if they find out that it's a multiple house outage, we'll have priority repairs, and you can rest assured. If they figure out it's only you then

Then somebody will contact you, Priscilla, because it's only you. They'll call you back, and they'll let you know what day the technician will come out to repair your phone.
