

**BEFORE THE PUBLIC UTILITY COMMISSION
OF OREGON**

UM 2274

In the Matter of

PORTLAND GENERAL ELECTRIC
COMPANY,

2023 All-source Request for Proposals.

**ERRATA
ORDER**

DISPOSITION: ORDER NOS. 24-011 and 24-024 CORRECTED

On January 12, 2024, the Commission memorialized its decision in Order No. 24-011, approving Portland General Electric Company's 2023 All-source Requests for Proposals with modifications. In the written order, in a section entitled "Form Contract" the order references Appendix P when referring to PGE's form PPA. This sentence should have referenced any location where form contracts that may be affected or are represented in the RFP. The sentence is hereby changed to reference the correct appendix:

Prior to issuance, PGE will amend its form contracts in the RFP to reflect changes to five to seven terms that the IE, based on its analysis of the last RFP and its understanding of the bidding environment, deems most likely to be unacceptable to bidders, paying special attention to termination, delay, and credit requirement provisions.

Additionally, the memorialization of that decision inadvertently included appeal language, which is typically included with final public meeting orders, but not Request for Proposal or Integrated Resource Plan orders. The Commission decision was not a final order and should not have been designated as such.

ORDER

IT IS ORDERED that the appeal language following our signatures in Order No. 24-011 and Order No. 24-024 is omitted, and the first paragraph under "Form Contract" on page 2 of the order is corrected as described above. The remainder of the order remains unchanged.

Made, entered, and effective Apr 01 2024.
