

ORDER NO. 00-051

ENTERED FEB 2 2000

This is an electronic copy. Appendices may not appear.

**BEFORE THE PUBLIC UTILITY COMMISSION
OF OREGON**

CP 731

In the Matter of the Application of)	
GERVAIS TELEPHONE COMPANY for a)	
Certificate of Authority to Provide)	ORDER
Telecommunications Service in Oregon and)	
Classification as a Competitive Provider.)	
)	

DISPOSITION: APPLICATION GRANTED

Note: By issuing this certificate, the Commission makes no endorsement or certification regarding the certificate holder's rates or service.

The Application

On November 4, 1999, Gervais Telephone Company (Applicant) filed with the Commission an application for certification to provide telecommunications service in Oregon as a competitive provider. Applicant seeks to provide intraexchange (local exchange) telecommunications service in areas coextensive with local exchanges of U S WEST Communications, Inc. (USWC), GTE Northwest Incorporated (GTE), CenturyTel of Oregon, Inc. (CenturyTel), and United Telephone Company of the Northwest dba Sprint (United). Applicant also seeks to provide interexchange telecommunications service statewide in Oregon.

The local exchanges of USWC encompassed by the application are listed in Appendix A to this order. The local exchanges of GTE encompassed by the application are listed in Appendix B. The local exchanges of CenturyTel encompassed by the application are listed in Appendix C. The local exchanges of United encompassed by the application are listed in Appendix D.

Applicant proposes to provide intraexchange (local exchange) switched service (i.e., local dial tone) and nonswitched private line service (dedicated transmission service) in exchanges listed in Appendices A, B, C, and D to this order. Applicant will operate as a facilities based provider, but not as a reseller, of the above services. Applicant may construct

its own lines or transport facilities and may purchase unbundled network elements (building blocks) from other certified carriers.

Applicant also proposes to provide interexchange switched telecommunications service (i.e., long distance toll) and nonswitched private line service (dedicated transmission service) statewide in Oregon. Applicant will operate strictly as a reseller of interexchange service. Applicant will not construct its own lines or transport facilities and will not purchase unbundled network elements (building blocks) from other carriers. Applicant may purchase interexchange telecommunications service for resale only from other carriers certified in Oregon.

Operator services are part of switched telecommunications service. Applicant will not directly provide operator services as defined in OAR 860-032-0001. Applicant will not be an 'operator service provider' as defined in ORS 759.690(1)(d). A statement of compliance with Commission rules and with state law, including ORS 759.690 and OAR 860-032-0005 (regarding operator services), was included in the application.

Applicant, Gervais Telephone Company, is a small cooperative and is an incumbent local exchange carrier (LEC), which has a certificate of authority to serve the Gervais telephone exchange. *See* Order No. 89-999, docket UM 248, dated July 31, 1989. In the application before us Applicant seeks authority to provide local exchange telecommunications service in exchanges outside its current service area. Applicant also seeks authority to provide interexchange telecommunications service statewide in Oregon. Statewide service includes the Gervais telephone exchange, where Applicant is the incumbent LEC.

On June 30, 1999, the Federal Communications Commission (FCC) released the Second Order on Reconsideration and Memorandum Opinion and Order, CC Docket No. 96-149 and CC Docket No. 96-61 (the Order). In the Order, the FCC adopted rules pertaining to in-region, interstate toll service provided by independent incumbent LECs, such as Gervais Telephone Company. Those rules have been codified as 47 C.F.R. §64.1901 through §64.1903. In this proceeding, the Gervais telephone exchange is Applicant's region. The FCC requires incumbent LECs, which provide in-region, interstate telecommunications service, to do so through a separate subsidiary and to use separate books of account. If the incumbent LEC provides such service strictly on a resale basis, then the incumbent may use a separate division, but must still use separate books of account.

By a letter filed December 9, 1999, Applicant stated that it would provide the in-region, interexchange service using a separate division of Gervais Telephone Company. Applicant also stated that it would comply with applicable FCC rules requiring separate books of account for in-region interexchange service. The Commission accepts these commitments by Applicant and interprets them to specifically include a commitment to adhere to FCC rules 47 C.F.R. §64.1901 through §64.1903. Adherence to applicable FCC rules, as well as to state laws, Oregon Commission rules and orders is a condition of this certificate of authority.

The Commission served notice of the application on the Commission's telecommunications mailing list on November 12, 1999. The Commission did not receive any protests. However, USWC, GTE, CenturyTel, and United will be considered parties to this proceeding. On December 20, 1999, an Administrative Law Judge (ALJ) with the Commission issued a ruling that adopted procedures for processing this docket. The ALJ set a procedural schedule. On December 30, 1999, the Commission Staff (Staff) distributed a proposed order for review by the parties.

On January 12, 2000, USWC filed comments regarding the proposed order. USWC did not oppose granting the application, but requested the Commission to clarify that USWC is not the Primary Toll Carrier (PTC) or Designated Toll Carrier (DXC) for Applicant's customers. On January 26, 2000, Staff filed its reply to exceptions, which concurred with USWC's request. Staff revised the proposed order.

Though distinctions can be made between the meanings of DXC and PTC, both have similar rights and obligations. A DXC or PTC is the designated or default toll carrier. USWC is the DXC for intraLATA message toll in its exchanges and many other exchanges in Oregon. GTE is the DXC for intraLATA message toll in its exchanges, and United is the DXC for intraLATA message toll in its exchanges. To our knowledge Applicant has not requested either USWC, GTE, or United to be the DXC or PTC for customers it may acquire in those incumbents' exchanges. The Commission will not require USWC, GTE, or United to be the Primary Toll Carrier or Designated Carrier of intraLATA, intrastate calls originated from Applicant's customers in exchanges outside the Gervais exchange. Nothing in this order shall change the status of USWC's, GTE's, or United's designations as Primary Toll Carriers for other customers where they are now the PTCs or DXCs. USWC, GTE, and United, at their option, may offer competitive intraLATA message toll services to Applicant's customers.

The Commission has reviewed the proposed order, the exceptions, and the record in this matter. Based on a preponderance of the evidence, the Commission makes the following:

FINDINGS AND CONCLUSIONS

Applicable Law

Applications to provide telecommunications service and for classification as a competitive telecommunications service provider are filed pursuant to ORS 759.020. ORS 759.020 provides that:

- (1) No person [or] corporation * * * shall provide intrastate telecommunications service on a for-hire basis without a certificate of authority issued by the Public Utility Commission under this section.

* * * * *

(5) The commission may classify a successful applicant for a certificate as a telecommunications utility or as a competitive telecommunications services provider. If the commission finds that a successful applicant for a certificate has demonstrated that services it offers are subject to competition or that its customers or those proposed to become customers have reasonably available alternatives, the commission shall classify the applicant as a competitive telecommunications services provider. * * * For purposes of this section, in determining whether telecommunications services are subject to competition or whether there are reasonably available alternatives, the commission shall consider:

- (a) The extent to which services are available from alternative providers in the relevant market.
- (b) The extent to which services of alternative providers are functionally equivalent or substitutable at comparable rates, terms and conditions.
- (c) Existing economic or regulatory barriers to entry.
- (d) Any other factors deemed relevant by the commission.

Applications to provide local exchange (intraexchange) telecommunications service are reviewed pursuant to ORS 759.050, the “competitive zone law.” Under ORS 759.050(2)(a), the Commission may:

Certify one or more persons, including another telecommunications utility, to provide local exchange telecommunications service within the local exchange telecommunications service area of a certified telecommunications utility, if the commission determines that such authorization would be in the public interest. For the purpose of determining whether such authorization would be in the public interest, the commission shall consider:

- (A) The effect on rates for local exchange telecommunications service customers both within and outside the competitive zone.
- (B) The effect on competition in the local exchange telecommunications service area.
- (C) The effect on access by customers to high quality innovative telecommunications service in the local exchange telecommunications service area.
- (D) Any other facts the commission considers relevant.

Under ORS 759.050(2)(b), the Commission shall:

Upon certification of a telecommunications provider under paragraph (a) of this subsection, establish a competitive zone defined by the services to be provided by the telecommunications provider and the geographic area to be served by the telecommunications provider.

Under ORS 759.050(2)(c), the Commission may:

Impose reasonable conditions upon the authority of [the applicant] to provide competitive zone service within the competitive zone * * * at the time of certification of a telecommunications provider, or thereafter.

Subsection (5)(a) of ORS 759.050 provides that:

Unless the commission determines that it is not in the public interest at the time a competitive zone is created, upon designation of a competitive zone, price changes, service variations, and modifications of competitive zone services offered by a telecommunications utility in the zone shall not be subject to ORS 759.180 to ORS 759.190 [notice, hearing and tariff suspension procedures], and at the telecommunications utility's discretion, such changes may be made effective upon filing with the commission.

ORS 759.690 and OAR 860-032-0005 establish certain requirements providers of operator services must meet. Included are the following conditions:

The certificate holder involved in the provision of operator services shall:

1. Notify all callers at the beginning of the call of the telecommunications provider's name and allow a sufficient delay period to permit a caller to terminate the call or advise the operator to transfer the call to the customer's preferred carrier.
2. Disclose rate and service information to the caller when requested.
3. Not transfer a call to another operator service provider without the caller's notification and consent.
4. Not screen calls and prevent or "block" the completion of calls which would allow the caller to reach an operator service company different from the certificate holder. In addition, the certificate holder shall, through contract provisions with its reseller clients, prohibit the reseller from blocking a caller's access to his or her operator service company of choice.

5. When entering into operator service contracts or arrangements with call aggregators include in each contract provisions for public notification. A sticker or nameplate identifying the name of the certificate holder shall be attached to, or in close proximity to, each telephone that has public access.

OAR 860-032-0015(1) authorizes the Commission to suspend or cancel the certificate if the Commission finds that (a) the holder made misrepresentations when it filed the application, or (b) the certificate holder fails to comply with the terms and conditions of the certificate.

Designation as a Competitive Provider

Applicant has met the requirements for classification as a competitive telecommunications service provider. Applicant's customers or those proposed to become customers have reasonably available alternatives. The incumbent telecommunications utilities, USWC, GTE, CenturyTel, and United provide the same or similar local exchange services in the local service area requested by Applicant. AT&T, MCI WorldCom, Sprint Communications, USWC, and others provide interexchange toll, private line and operator services in the service area requested by Applicant. Subscribers to Applicant's services can buy comparable services at comparable rates from other vendors. Economic and regulatory barriers to entry are relatively low.

Conditions of the Certificate

As part of the application, Applicant agreed to, or acknowledged, several conditions listed in the application. Those conditions are adopted and made conditions of this certificate of authority.

The Commission first applied the competitive zone law, ORS 759.050, in dockets CP 1, CP 14, and CP 15. After full evidentiary hearings and consideration of the public interest criteria set forth in ORS 759.050(2)(a), the Commission designated three competitive providers of switched local exchange services as alternate exchange carriers or competitive local exchange carriers (CLECs) in the Portland metropolitan area. *See* Order No. 96-021. The Commission subsequently applied those findings and conclusions to dockets CP 132, CP 139, and CP 149, and certified two CLECs to provide switched local exchange services in areas located throughout the state.

The Commission takes official notice of the record in dockets CP 1, CP 14, and CP 15.¹ In Order No. 96-021, the Commission established conditions applicable to CLEC certificates. Since Applicant, Gervais Telephone Company, proposes to offer switched local exchange services, it seeks certification as a CLEC. Pursuant to

¹ Under OAR 860-014-0050(2), a party may object to facts noticed within 15 days of notification that official notice has been taken. The objecting party may explain or rebut the noticed facts.

ORS 759.050(2)(c) and Order No. 96-021, Applicant as a CLEC shall comply with the following conditions:

1. Applicant shall terminate all intrastate traffic originating on the networks of other telecommunications service providers that have been issued a certificate of authority by the Commission.
2. Whenever Applicant terminates intrastate long distance traffic directly or indirectly from interexchange carriers or from its own toll network to its end user customers, Applicant shall contribute to the Oregon Customer Access Fund (OCAF), or its equivalent, in accordance with provisions of the Oregon Customer Access Plan (OCAP) or any successor plan approved by the Commission. Applicant shall contribute using rates approved by the Commission on intrastate terminating carrier common line access minutes, or on any other basis determined by the Commission. Applicant may not participate in (i.e., receive money from) pooling arrangements established under the OCAP or any successor plan unless authorized by the Commission.
3. Applicant shall comply with the Oregon Exchange Carrier Association's (OECA) informational and operational needs as specified by the OCAP or any successor plan approved by the Commission.
4. Applicant shall offer E-911 service. Applicant has primary responsibility to work with the E-911 agencies to make certain that all users of their services have access to the emergency system. Applicant will deliver or arrange to have delivered to the correct 911 Controlling Office its customers' voice and dialable Automatic Number Identification (ANI) telephone numbers so the lead 911 telecommunications service provider can deliver the 911 call to the correct Public Safety Answering Point (PSAP). Applicant shall work with each 911 district and lead 911 telecommunications service provider to develop database comparison procedures to match Applicant's customer addresses to the 911 district's Master Street Address Guide in order to obtain the correct Emergency Service Number (ESN) for each address. Applicant shall provide the lead 911 telecommunications service provider with daily updates of new customers, moves, and changes with the correct ESN for each.
5. Applicant shall not take any action that impairs the ability of other certified telecommunications service providers to meet service standards specified by the Commission.
6. At the request of the Commission, Applicant shall conduct, and submit to the Commission, traffic studies regarding traffic exchanged with telecommunications service providers and other entities designated by the Commission.

7. For purposes of distinguishing between local and toll calling, Applicant shall adhere to local exchange boundaries and Extended Area Service (EAS) routes established by the Commission. Further, Applicant shall not establish an EAS route from a given local exchange beyond the EAS area for that exchange.
8. When Applicant is assigned one or more NXX codes, Applicant shall limit each of its NXX codes to a single local exchange and shall establish a toll rate center in each exchange that is proximate to the toll rate center established by the telecommunications utility serving the exchange.
9. Applicant shall comply with universal service requirements as determined by the Commission.
10. Unless otherwise provided pursuant to an interconnection agreement adopted by the Commission pursuant to Section 252 of the Telecommunications Act of 1996, Applicant shall enter into interconnection agreements with telecommunications utilities for exchange of local and EAS traffic, ancillary services (i.e., directory listings, directory assistance, 911 arrangements, mutual repair referral) and other interconnection matters in accordance with requirements the Commission established in Order No. 96-021 as otherwise modified by the Commission.
11. If Applicant provides services to a subscriber who, in turn, resells the services, including operator services, then Applicant and the subscriber must comply with ORS 759.690 and OAR 860-032-0005.
12. Applicant shall comply with laws, Commission rules, and Commission orders related to provision of telecommunications service in Oregon.

By the letter filed December 9, 1999, Applicant, Gervais Telephone Company, stated it would comply with applicable FCC rules regarding separate books of account. Applicable rules include the FCC rules in 47 C.F.R. §64.1901 through §64.1903. Applicant will provide interexchange telecommunications service through a separate corporate division and use separate books of account. This Commission recognizes that the FCC rules pertain to interstate telecommunications service. We also recognize that our jurisdiction is limited to intrastate service. However, as a practical business reality, Applicant, like most interexchange carriers, will provide both interstate and intrastate interexchange service using the same business operation, personnel, and facilities. This is so because customers make both intrastate and interstate calls. Therefore, the following are also conditions of this certificate of authority:

13. For interexchange telecommunications service Applicant shall operate strictly as a reseller of other certified carriers' interexchange interstate and intrastate service.
14. Applicant shall provide interexchange interstate and intrastate telecommunications service subject to and in compliance with FCC rules in 47 C.F.R. §64.1901 through §64.1903, as adopted by the FCC in the Second Order on Reconsideration and Memorandum Opinion and Order, CC Docket No. 96-149 and CC Docket No. 96-61, released on June 30, 1999.
15. In recognition that Applicant is the incumbent local exchange carrier in the Gervais exchange, and the potential for Gervais Telephone Company to favor itself over other competitive providers of interexchange service, Applicant shall comply with the following conditions. Applicant shall not have arrangements or practices that discriminate in favor of itself, or provide preferential treatment for itself, over other competitive interexchange carriers in regards to rates, terms or conditions for:
 - a. The provision of access to Gervais Telephone Company's local exchange network;
 - b. The provision of customer billing, collection, verification and credit card information, and related services; and
 - c. The provision of other products and services such as shared or joint use of facilities and equipment, customer dialing codes, maintenance, testing and repair services, market promotions and advertised services, network information, and customer and market information.

These conditions will allow the Commission to readily detect and resolve any competitive issues that may arise with applicant's provision of interexchange toll services in its Gervais telephone exchange.

Public Interest

In Order No. 93-1850, docket UM 381, the Commission considered the public interest aspects of local exchange competition for dedicated transmission service similar to that described in the application before us now. In dockets CP 1, CP 14, and CP 15, Order No. 96-021, the Commission made several public interest findings regarding local exchange competition in general.

The Commission's Findings of Fact and Opinion in docket UM 381, Order No. 93-1850, at pages 4 – 6, and the Commission's Findings and Decisions in dockets CP 1, CP 14, and CP 15, Order No. 96-021 at pages 6 - 21, entered pursuant to ORS 759.050(2)(a)(A) - (C), are adopted. The Commission takes official notice of the record in dockets UM 381, CP 1, CP 14, and CP 15.² Based on a review of those findings, as well as information contained in the application, the Commission concludes that it is in the public interest to grant the application of Gervais Telephone Company to provide local exchange telecommunications service as a competitive telecommunications provider in the exchanges listed in Appendices A, B, C, and D, as described in the application. Further, it is in the public interest to grant the application to provide intrastate, interexchange switched (toll) telecommunications service and dedicated transmission service statewide in Oregon, as described in the application.

Competitive Zones

The exchanges listed in Appendices A, B, C, and D to this order are designated competitive zones pursuant to ORS 759.050(2)(b).

Pricing Flexibility

In Order No. 93-1850, docket UM 381, the Commission granted pricing flexibility for dedicated transmission service at the time the Commission granted the certificate of authority. Applicant seeks authority to provide intraexchange dedicated transmission service. Accordingly, USWC, GTE, CenturyTel, and United are granted pricing flexibility for dedicated transmission service in the exchanges listed in Appendices A, B, C, and D.

For intraexchange, switched telecommunications service the following applies. The Commission's Findings and Decisions in dockets CP 1, CP 14, and CP 15, Order No. 96-021 at pages 82 and 83, entered pursuant to ORS 759.050(5)(a) - (d), are adopted. Accordingly, USWC will gain pricing flexibility in an exchange listed in Appendix A when:

² Under OAR 860-014-0050(2), a party may object to facts noticed within 15 days of notification that official notice has been taken. The objecting party may explain or rebut the noticed facts.

1. Applicant, or an authorized CLEC, has received a certificate of authority to provide local exchange service.
2. USWC files a tariff that satisfies the Commission's requirements regarding the provision of interim number portability, as set forth in Order No. 96-021, and the Commission approves the tariff. USWC satisfied this requirement. *See* Order No. 96-277.
3. Staff notifies the Commission that a mutual exchange of traffic exists between USWC and an authorized CLEC, including but not limited to, Applicant. If Staff previously provided the required notice regarding an exchange, no additional notice is required for that exchange.
 - (a) As used in paragraph 3 above, "mutual exchange of traffic" means a mutual exchange of traffic between USWC and the CLEC within each exchange on an exchange-by-exchange basis. For example, if there is a mutual exchange of traffic in the Bend exchange, USWC would get pricing flexibility in the Bend exchange only.
 - (b) As used in paragraph 3 above, for a CLEC who is a reseller (i.e., the CLEC does not use its own lines or switches to provide the particular service at issue), a "mutual exchange of traffic" exists when the CLEC orders and receives one service, at a wholesale rate, from the LEC for resale pursuant to a certificate granted under ORS 759.050.

Similarly, GTE will gain pricing flexibility in an exchange listed in Appendix B when:

1. Applicant, or an authorized CLEC, has received a certificate of authority to provide local exchange service.
2. GTE files a tariff that satisfies the Commission's requirements regarding the provision of interim number portability, as set forth in Order No. 96-021, and the Commission approves the tariff. GTE satisfied this requirement. *See* Order No. 96-278.
3. Staff notifies the Commission that a mutual exchange of traffic exists between GTE and an authorized CLEC, including but not limited to, Applicant. If Staff previously provided the required notice regarding an exchange, no additional notice is required for that exchange. The definitions in paragraphs 3.(a) and 3.(b) above, also apply here.

Similarly, CenturyTel will gain pricing flexibility in an exchange listed in Appendix C when:

1. Applicant, or an authorized CLEC, has received a certificate of authority to provide local exchange service.
2. CenturyTel files a tariff that satisfies the Commission's requirements regarding the provision of interim number portability, as set forth in Order No. 96-021, and the Commission approves the tariff.
3. Staff notifies the Commission that a mutual exchange of traffic exists between CenturyTel and an authorized CLEC, including but not limited to, Applicant. If Staff previously provided the required notice regarding an exchange, no additional notice is required for that exchange. The definitions in paragraphs 3.(a) and 3.(b) above, also apply here.

Similarly, United will gain pricing flexibility in an exchange listed in Appendix D when:

1. Applicant, or an authorized CLEC, has received a certificate of authority to provide local exchange service.
2. United files a tariff that satisfies the Commission's requirements regarding the provision of interim number portability, as set forth in Order No. 96-021, and the Commission approves the tariff.
3. Staff notifies the Commission that a mutual exchange of traffic exists between United and an authorized CLEC, including but not limited to, Applicant. If Staff previously provided the required notice regarding an exchange, no additional notice is required for that exchange. The definitions in paragraphs 3.(a) and 3.(b) above, also apply here.

ORDER

IT IS ORDERED that:

1. The application of Gervais Telephone Company to provide intraexchange switched service and dedicated transmission service and to provide interexchange switched (toll) service and dedicated transmission service, as described in the application, is in the public interest and is granted with conditions described in this order.
2. Applicant is designated as a competitive telecommunications provider for intraexchange service in the exchanges listed in Appendices A, B, C, and D, and for intrastate, interexchange service statewide in Oregon.

3. The local exchanges of USWC listed in Appendix A, those of GTE listed in Appendix B, those of CenturyTel listed in Appendix C, and those of United listed in Appendix D are designated as competitive zones.
4. USWC, GTE, CenturyTel, and United shall receive pricing flexibility on an exchange-by-exchange basis as set forth in this order.
5. Pursuant to ORS 759.050(2)(c), Applicant shall comply with Commission imposed universal service requirements as a condition of authority to provide local exchange service.

Made, entered, and effective _____.

William G. Warren
Director
Utility Program

A party may request rehearing or reconsideration of this order pursuant to ORS 756.561. A request for rehearing or reconsideration must be filed with the commission within 60 days of the date of service of this order. The request must comply with the requirements in OAR 860-014-0095. A copy of any such request must also be served on each party to the proceeding as provided by OAR 860-013-0070(2). A party may appeal this order to a court pursuant to ORS 756.580.
